In the vocational certificate category, 40 to 60 semester hours in aviation flight technology (comparable to F.A.A. commercial and instrument ratings on category aircraft). NOTE: Knowledges and skills may be equivalent to other F.A.A. ratings (flight instructor, instrument instructor, etc.), or the applicant may be trained on additional categories of aircraft; award additional credit for these areas on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for the vocational certificate category plus 3 semester hours in general mathematics, 3 in technical writing, 3 in aviation safety, 3 in communication skills (oral), and 3 for field experience in personnel supervision. In the upper-division baccalaureate category, if served as section or platoon chief, assistant section or assistant platoon chief, or aircraft repair technician (designated on Army records as 155EG), 3 semester hours in personnel management, 3 for management electives, and 3 in human relations; if served as instructor pilot (designated on Army records as 155EC), 3 semester hours in psychology electives, 3 for management electives, and 3 in human relations (7/78).

MOS-155E-002

C-12 Pilot

155E0

Exhibit Dates: 1/90–Present.

Career Pattern

May have progressed to MOS 155E from any pilot Warrent Officer MOS in the 152, 153, or 154 MOS series.

Description

Pilots and commands fixed wing utility aircraft under tactical and nontactical conditions; operates aircraft during all types of meteorological conditions during day and night; transports passengers and cargo; routinely performs instrument flight procedures, navigation, and airborne weather radar interpretations; performs military intelligence and airborne radio relay missions; maintains current flight status in accordance with established training requirements; knowledge and skills are equivalent to F.A.A. commercial/instrument ratings on rotorcraft category aircraft. NOTE: Knowledge and skills may be equivalent to other F.A.A. certificates/ratings (flight instructor, instrument instructor, ground instructor, airline transport pilot, flight engineer, etc.) or the applicant may be trained on additional categories of aircraft.

Recommendation

In the lower-division baccalaureate/associate degree category, 18 semester hours in commercial/instrument rating, 3 in aircraft rules and procedures, 3 in navigation (VFR), 3 in flight psychology, 3 in aviation meteorology, 3 in instrument flight planning and procedures, 3 in aircraft engines and systems, 3 in aircraft performance, 3 in general mathematics, 3 in aviation safety, 3 in communication skills (oral), and 3 in principles of supervision. In the upper-division baccalaureate category, if served as instructor pilot (designated on Army records as 155EC), 3 semester hours in educational psychology, 3 in personnel management, and 3 in interpersonal communications; if served as an instrument flight examiner (designated on Army records as 155EF), 3 semester hours in airline transport pilot training; if served as section leader or aircraft repair maintenance technician (designated on Army records as 155EG), 3 semester hours in organizational management, 3 in accident investigation procedures, and 3 in aircraft systems management (4/90).

MOS-156A-001

OV-1/RV-1 PILOT

156A0

Exhibit Dates: 7/87–12/89.

Career Pattern

May have progressed to warrant officer pilot from any enlisted MOS.

Description

Pilots and commands combat service/support fixed wing aircraft under tactical and non-tactical conditions; transports passengers, mail, or cargo for military purposes; supervises aircraft maintenance; supervises loading and unloading to ensure load stability balance, and adherence to aircraft load limitations; may function as a service school instructor for aviators; may serve in aircraft procurement activities.

Recommendation

In the vocational certificate category, 40 to 60 semester hours in aviation flight technology (comparable to F.A.A. commercial and instrument ratings on category aircraft). NOTE: Knowledges and skills may be equivalent to other F.A.A. ratings (flight instructor, instrument instructor, etc.), or the applicant may be trained on additional categories of aircraft; award additional credit for these areas on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for the vocational certificate category plus 3 semester hours in general mathematics, 3 in technical writing, 3 in aviation safety, 3 in communication skills (oral), and 3 for field experience in personnel supervision. In the upper-division baccalaureate category, if served as section or platoon chief, assistant section or assistant platoon chief, or aircraft repair technician (designated on Army records as 156AG), 3 semester hours in personnel management, 3 for management electives, and 3 in human relations; if served as instructor pilot (designated on Army records as 156AC), 3 semester hours in psychology electives, 3 for management electives, and 3 in human relations (7/78).

MOS-156A-002

OV-1/RV-1 PILOT

156A0

Exhibit Dates: 1/90–Present.

Career Pattern

May have progressed to MOS 156A from Warrant Officer Pilot MOS's 155A, 155D, or 155E.

Description

Pilots and commands fixed wing surveillance aircraft under tactical and nontactical conditions; operates aircraft during all types of meteorological conditions during day, and night; routinely performs instrument flight procedures, navigation, and airborne weather radar interpretations; performs military intelligence gathering, threat penetration, reconnaissance, imagery and message drop, and electronic countermeasure missions; maintains current flight status in accordance with established training requirements; knowledge and skills are equivalent to F.A.A. commercial/instrument ratings on rotorcraft category aircraft. NOTE: Knowledge and skills may be equivalent to other F.A.A. certificates/ratings (flight instructor, instrument instructor, ground instructor, airline transport pilot, flight engineer, etc.) or the applicant may be trained on additional categories of aircraft.

Recommendation

In the lower-division baccalaureate/associate degree category, 18 semester hours in commercial/instrument rating, 3 in aircraft rules and procedures, 3 in navigation (VFR), 3 in flight psychology, 3 in aviation meteorology,3 in instrument flight planning and procedures, 3 in aircraft engines and systems, 3 in aircraft performance, 3 in general mathematics, 3 in aviation safety, 3 in communication skills (oral), and3 in principles of supervision. In the upper-division baccalaureate category, if served as instructor pilot (designated on Army records as 156AC), 3 semester hours in educational psychology, 3 in personnel management, and 3 in interpersonal communications; if served as an instrument flight examiner (designated on Army records as 156AF), 3 semester hours in airline transport pilot training; if served as section leader or aircraft repair maintenance technician (designated on Army records as 156AG), 3 semester hours in organizational management, 3 in accident investigation procedures, and 3 in aircraft systems management (4/90).

MOS-160A-001

AVIATION MAINTENANCE TECHNICIAN
(AVIATION TECHNICIAN)

160A0 (formerly 103A0)

Exhibit Dates: 3/75–Present.

Career Pattern

May have progressed to Aviation Maintenance Technician (160A) or Aviation Technician (103A) from MOS 67G (Airplane Repairer), MOS 67N (Utility Helicopter Repairer), MOS 67U (Medium Helicopter Repairer), MOS 67V (Observation/Scout Helicopter Repairer), MOS 67W (Aircraft Quality Control Supervisor), MOS 67X (Heavy Lift Helicopter Repairer), MOS 67Y (Attack Helicopter Repairer), MOS 67Z (Aircraft Maintenance Senior Sergeant), MOS 68B (Aircraft Power Plant Repairer), MOS 68D (Aircraft Powertrain Repairer), MOS 68F (Aircraft Electrician), MOS 68G (Aircraft Structural Repairer), or MOS 68H (Aircraft Pneudraulics Repairer).

Description

Supervises aviation maintenance and repair shops, teams, sections, or platoons which maintain or repair army rotary and fixed-wing aircraft; organizes and manages maintenance facilities, equipment, and personnel to inspect, service, test, disassemble, replace parts on, repair, reassemble, adjust and retest aircraft or aircraft components; assigns work to subordinates and supervises work in progress, final inspection, and final testing; develops operating procedures and performs administrative duties related to supply and maintenance activities; provides technical assistance to pilots and flight crews concerning required crew maintenance of aircraft and aircraft components; interprets technical material related to aircraft maintenance.

Recommendation

In the vocational certificate category, 3 semester hours in essentials of supervision, 3 in survey of computer concepts, 3 in technical writing, 2 in maintenance shop record keeping, 2 in warehousing and storage, 2 in material handling and safety, and 3 in maintenance management and inventory control. In the lower-division baccalaureate/associate degree category, 3 semester hours in maintenance management, 3 in shop practices and procedures, 2 in inventory management, 2 in material handling and safety, 3 in personnel supervision, 3 in survey of computer concepts, 2 in maintenance shop record keeping, and 3 in communication skills (speech/technical writing). In the upper-division baccalaureate category, 3 semester hours in personnel management and 3 in management electives; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management; if duty assignment was platoon leader, section leader, or equivalent leadership position, credit in leadership and supervision on the basis of institutional evaluation (7/78).

MOS-180A-001

SPECIAL OPERATIONS TECHNICIAN

180A0

Exhibit Dates: 9/84–Present.

Career Pattern

May have progressed to MOS 180A from MOS 18B (Special Operations Weapons Sergeant), 18C (Special Operations Engineer Sergeant), 18D (Special Operations Medical Sergeant), 18E (Special Operations Communications Sergeant), 18F (Special Operations Intelligence Sergeant), or 18Z (Special Operations Senior Sergeant).

Description

Summary: NOTE: Duties primarily involve participation in a special operations team or detachment involving unconventional warfare, foreign internal defense, strike operations, strategic reconnaissance, and counterterrorism; the operational detachment works unilaterally or with foreign military forces; duties frequently require regional orientation, including foreign language proficiency and in-country experience; duties include participation in waterborne, jungle, desert, mountain, and winter operations; many of the duties are highly classified. Manages and supervises special operations team members and technicians in communications, weapons, engineering, medicine, and operations techniques; conducts management assistance, planning, and training of special operations detachments; provides technical expertise in administration, logistics, intelligence, planning, and training; manages, supervises, and trains from 12 to 100 personnel.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision and 3 in technical report writing. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 for a practicum in instructional techniques, and 6 for field experience in management (5/87).

MOS-201A-001

Meteorology Technician

201A0

Exhibit Dates: 6/61–12/87. (Effective 1/88 the MOS designator 201A was changed to 132A; see exhibit MOS-132A-001.)

Career Pattern

May have progressed to Meteorology Technician from MOS 35D (Meteorological Equipment Repairman), MOS 93E (Meteorological Observer), or MOS 93F (Ballistic Meteorology Crewman or Field Artillery Meteorological Crewman).

Description

Normally serves as the chief of a meteorology section that provides ballistic meteorological data, not involving weather forecasting to artillery units; is responsible for the organization and operation of the section and its physical facilities as well as the supervision and training of enlisted specialists in the section; manages and allocates resources to install, operate, and maintain mercurial, aneroid, electronic, optical, and mechanical meteorological instruments and equipment; determines layout of ballistic meteorological stations and facilities and plans equipment installation; knows methods of observing and plotting meteorological data; inspects and tests meteorological equipment; determines operating procedures and techniques; allocates work to subordinates; determines requirements for, procures, and manages supplies, repair parts, and equipment; supervises calibration of graphs and other recording devices; evaluates ballistic meteorological data and produces messages to be transmitted to artillery units; instructs subordinates on established maintenance techniques and operating procedures; may serve as an instructor at a formal service school; may be employed in research, development, and evaluation activities.

Recommendation

In the vocational certificate category, 2 semester hours in electronic laboratory and 1 in basic mathematics. In the lower-division baccalaureate/associate degree category, 3 semester hours for field experience in management, 3 in industrial/human relations, 2 in electronic laboratory, 1 in basic mathematics, and 1 in meteorology. In the upper-division baccalaureate category, 3 semester hours in personnel management and 3 in management electives (3/77).

MOS-202A-001

Biomedical Equipment Repair Technician

202A0

Exhibit Dates: 6/61–Present.

Career Pattern

May have progressed to Biomedical Equipment Repair Technician from MOS 35B (Electronic Instrument Repairman), MOS 35G (Biomedical Equipment Repairer), MOS 35S (Electronic Biomedical Equipment Repairer), MOS 35T (X-ray Biomedical Equipment Repairer), or MOS 35U (Biomedical Equipment Maintenance Chief).

Description

Organizes, supervises, and manages personnel and organizations responsible for installing, operating, maintaining, and repairing optical; dental, and medical technical diagnostic and treatment equipment; plans and develops detailed procedures for installation of instruments or equipment; develops internal operating procedures and manages allocated resources; anticipates and determines repair requirements, parts, and replacement of equipment; instructs on established maintenance techniques and operating procedures; advises on and supervises use of schematics, tube testing equipment, oscilloscopes, voltmeters, and other test equipment to isolate equipment malfunctions; inspects inoperative equipment, develops cost estimates for repair, and makes appropriate recommendations regarding repair or replacement; maintains records; distributes workload; makes final inspections; develops plans for design and layout of medical laboratory or equipment facilities; prepares drawings, sketches, notes, and materials for installation of equipment; may serve as a service school instructor; may perform duties in support of the procurement or research, development, test, and evaluation of medical equipment.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 3 in human relations, 3 in communication skills (oral and written), and 3 in record keeping. In the upper-division baccalaureate category, 6 semester hours in personnel management, 3 for field experience in management, 3 in management problems, 3 in introduction to management, 3 in public speaking, 3 in technical report writing, 3 in records administration, and 3 in office management; IF rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (11/79).

MOS-210A-001

Utilities Operation and Maintenance Technician

210A0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated MOS 310A. May have progressed to Utilities Operation and Maintenance Technician from MOS 52D (Power Generation Equipment Repairer), 52E (Prime Power Production Specialist), or 52F (Turbine Engine Driven Generator).

Description

Manages personnel engaged in utilities operation and maintenance; performs administrative, supply management, and quality control functions which insure operation, delivery, and maintenance of utilities for an installation, hospital, or associated activity; manages and knows the fundamentals of installation, operation, and maintenance of water supply, plumbing, heating, sewage, electrical, refrigeration, air conditioning, and fire fighting systems, and power stations; estimates material and personnel requirements for maintenance and repair of utilities plants and systems; reads and interprets blueprints, schematics, and electrical diagrams; knows electrical, electronic, and mechanical theory and applications relevant to electrical power plants using steam, gas, or diesel-powered generating units; knows basic principles of military, civilian, and contractor procedures and personnel management; understands technical publications of operating principles of utilities plants and systems; diagnoses difficulties; plans maintenance and repair schedules and procedures; manages personnel and equipment engaged in the production of electrical power; determines maintenance and repair requirements and establishes work priorities; allocates maintenance and repair resources; establishes shop practices and policies; directs activities of plant and shift supervisors, electricians, mechanics, instrumentation and process control technicians, and health physics specialists; supervises installation and maintenance of high-voltage electrical power transmission lines and substations; establishes operating procedures for power plant operations, maintenance, equipment inspections, and industrial safety programs; supervises preparation of operating, malfunction, and supply reports; directs procurement and distribution of supplies, tools, and equipment, administers appropriate budgets; acts as technical advisor to commanders concerned with utilities operations; may serve as service school instructor; serves as station or power plant superintendent, power system technician, section or team chief; may directly supervise up to 100 persons; may be able to apply occupational skill to specialized features of nuclear power plants or of ballistic missile (Safeguard System) support equipment.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in industrial safety, 3 in shop management, 3 in material management, 3 in personnel supervision, 3 in office administration, 3 in record keeping, 3 in technical writing, and 3 in human relations, and credit in ballistic missile support equipment repair and nuclear power on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in management problems, 3 in management and training, and 2 for field experience in management; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management; if duty assignment was service school instructor, 6 semester hours for a practicum in education (11/77).

MOS-211A-001

Target Acquisition Radar Technician (Field Artillery Radar Technician)

211A0

Exhibit Dates: 10/66–12/87. (Effective 1/88, the MOS designator 211A was changed to 131A; see exhibit MOS-131A-001.)

Career Pattern

May have progressed to Target Acquisition Radar Technician from MOS 13W (Field Artillery Target Acquisition Senior Sergeant), MOS 17B (Field Artillery Radar Crewman), MOS 17C (Field Artillery Target Acquisition Specialist), MOS 17Z (Combat Surveillance and Target Acquisition NCO), MOS 24P (Defense Acquisition Radar Mechanic), MOS 26B (Weapons Support Radar Repairman), MOS 26C (Combat Area Surveillance Radar Repairer), MOS 26D (Ground Control Approach Radar Repairer), or MOS 26W (Radar Maintenance Supervisor-Inspector).

Description

Normally serves as chief of a section or platoon engaged in maintaining and operating field artillery radars to provide target location; has a detailed knowledge of the operational aspects of field artillery radar, the technical principles of equipment construction, the scope and techniques of field artillery radar, and safety precautions relevant to operations and maintenance; advises on technical considerations involving field artillery radar; coordinates the activities of field artillery radar personnel; supervises the movement and emplacement of radar and associated equipment; interprets technical data; implements changes in inspections, repair, and test procedures; instructs personnel on new or revised techniques of radar electronics maintenance and employment; inspects completed work and assists personnel in isolating and correcting malfunctions in equipment; must be able to transmit target and counterfire data to support artillery units; reviews maintenance records; supervises the requisitioning of tools, repair parts, technical supplies, publications, and equipment; may serve as an instructor at a formal training school, on a headquarters staff, or in research, development, test, and evaluation activities.

Recommendation

In the vocational certificate category, 6 semester hours in electronics theory and laboratory and 2 in use of basic hand tools. In the lower-division baccalaureate/associate degree category, 6 semester hours in electronics theory and laboratory, 3 in personnel supervision, 3 for field experience in management, 2 in industrial/human relations, 2 in technical report writing, and 2 in maintenance management (3/77).

MOS-212A-001

Remotely Piloted Vehicle Technician

212A0

Exhibit Dates: Pending evaluation. 4/86–Present.

MOS-213A-001

Engineer Equipment Repair
Technician

213A0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated 621A. May have progressed to Engineer Equipment Repair Technician from MOS 52C (Utilities Equipment Repairer), MOS 52D (Power Generation Equipment Repairer), MOS 52F (Turbine Engine Driven Generator Repairer), MOS 62B (Construction Equipment Repairer), or MOS 62N (Construction Equipment Supervisor).

Description

Supervises personnel engaged in maintenance of engineer equipment; analyzes malfunctions and supervises minor repair and adjustment of engineer equipment utilized for power generation, earthmoving, shaping and compacting, lifting and loading, quarrying and rock crushing, asphalt/concrete mixing and surfacing, water purification, refrigeration and air conditioning, missile systems support, water gap crossing, transfer and engineer electronic application; supervises modification of equipment required by modification work orders; inspects incoming equipment to determine repair requirements; assigns work and inspects out-going equipment; establishes maintenance and repair schedules; establishes internal administrative procedures for procurement, storage, and distribution of tools, parts, and publications.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in shop management, 3 in maintenance management, 3 in administrative office management, 3 in business communications, 3 in record keeping, 3 in computer and data processing concepts, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in management problems, 3 for field experience in management, 3 in education electives (instruction and counseling) and additional credit in leadership and supervision on the basis of institutional evaluation; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (5/78).

MOS-214E-001

Missile System Technician, Pershing
(Field Artillery Missile System
Technician, Pershing)

214E0

Exhibit Dates: 12/62–12/87. (Effective 1/88, the MOS designator 214E was changed to 130A; see exhibit MOS-130A-001.)

Career Pattern

May have progressed to Missile System Technician, Pershing, from MOS 15E (Pershing Missile Crewman), MOS 21G (Pershing Electronics Materiel Specialist), MOS 21L (Pershing Electronics Repairman), or MOS 46N (Pershing Electrical Mechanical Repairer).

Description

Supervises the maintenance of field artillery missiles, fire control systems, and missile launching and handling equipment; oversees assembly of missiles; supervises utilization, testing, and maintenance of tools, specialized test sets, cable sets, and warhead assemblies; inspects and directs testing, servicing, and repair of missile launching and guidance equipment; supervises maintenance of missile components, determines repair/replacement requirements, insures that repairs and adjustments are made, and makes final inspections; advises superiors on technical and tactical considerations affecting the employment of missiles; serves as a technical advisor on matters of preventive maintenance and inspection of radar, missiles, fire control systems, missile launching and handling equipment, and on-missile materiel; observes and corrects improper technical procedures and repair techniques; coordinates maintenance techniques and standards with preventive maintenance personnel to insure uniformity; implements changes in inspection, repair, and test procedures and instructs personnel on new techniques of missile maintenance and repair; insures that equipment modifications are accomplished; examines and interprets procedures, directives, schematics, and technical publications for data pertinent to the employment of radar, missiles, and related equipment and transmits data to subordinate personnel; reviews operating and maintenance records and tests equipment to ascertain adequacy of maintenance; monitors storage of missile guidance and motor sections; insures compliance with safety and security regulations and procedures; writes and reviews technical reports; reviews and consolidates requests for tools, spare parts, technical supplies, publications, and equipment; may serve as an instructor at a formal training school or be employed in missile procurement activities.

Recommendation

In the vocational certificate category, 3 semester hours in electronics laboratory and 1 in care and use of hand tools. In the lower-division baccalaureate/associate degree category, 3 semester hours in electronics laboratory, 3 in personnel supervision, 3 for field experience in management, 3 in technical report writing, 2 in maintenance management, and 2 in industrial/human relations, and additional credit in instructional methods on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours for field experience in management; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (3/77).

MOS-214G-001

Missile System Technician, Lance
(Field Artillery Missile System
Technician, Lance)

214G0

Exhibit Dates: 2/75–12/87. (Effective 1/88, the MOS designator 214G was changed to 130B; see exhibit MOS-130B-001.)

Career Pattern

May have progressed to Missile System Technician, Lance, from MOS 15D (Lance Missile Crewman) or MOS 27D (Lance Missile System Repairman).

Description

Supervises the maintenance of field artillery missiles, fire control systems, and missile launching and handling equipment; oversees assembly of missiles; supervises utilization, testing, and maintenance of tools, specialized test sets, cable sets, and warhead assemblies; inspects and directs testing, servicing, and repair of missile launching and guidance equipment; supervises maintenance of missile components, determines repair/replacement requirements, insures that repairs and adjustments are made, and makes final inspections; advises superiors on technical and tactical considerations affecting the employment of missiles; serves as a technical advisor on matters of preventive maintenance and inspection of radar, missiles, fire control systems, missile launching and handling equipment, and on-missile materiel; observes and corrects improper technical procedures and repair techniques; coordinates maintenance technical procedures and repair techniques; coordinates maintenance techniques and standards with preventive maintenance personnel to insure uniformity; implements changes in inspection, repair, and test procedures and instructs personnel on new techniques of missile maintenance and repair; insures that equipment modifications are accomplished; examines and interprets procedures, directives, schematics, and technical publications for data pertinent to the employment of radar, missiles, and related equipment and transmits data to subordinate personnel; reviews operating and maintenance records and tests equipment to ascertain adequacy of maintenance; monitors storage of missile guidance and motor sections; insures compliance with safety and security regulations and procedures; writes and reviews technical reports; reviews and consolidates requests for tools, spare parts, technical supplies, publications, and equipment; may serve as an instructor at a formal training school or be employed in missile procurement activities.

Recommendation
In the vocational certificate category, 3 semester hours in electronics laboratory and 1 in care and use of hand tools. In the lower-division baccalaureate/associate degree category, 3 semester hours in electronics laboratory, 3 in personnel supervision, 3 for field experience in management, 3 in technical report writing, 2 in maintenance management, and 2 in industrial/human relations, and additional credit in instructional methods on the basis of institutional evaluation (3/77).

MOS-215A-001

PHOTOMAPPING TECHNICIAN

215A0

Exhibit Dates: 1/88–Present.

Career Pattern
NOTE: This MOS was formerly designated 811A. May have progressed to Photomapping Technician from MOS 81C, Cartographer.

Description
Supervises activities and personnel engaged in preparation and revision of military maps, charts, and orthophotographs; supervises technical and specialized photogrammetric and drafting procedures used in the preparation of detailed military maps, mosaics, overlays, and prints; must be proficient in photogrammetric techniques and principles and know topographic drafting operations and procedures; establishes work priorities; assigns duties; solves unusual problems in map making; prepares records and reports; writes technical reports.

Recommendation
In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 3 in plant management or office management, 3 in technical report writing, 3 in photogrammetry, and 3 in aerial photographic interpretation. In the upper-division baccalaureate category, 3 semester hours in personnel management and training, 3 for management electives, and 3 for field experience in management; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (6/78).

MOS-215B-001

SURVEY TECHNICIAN

215A0

Exhibit Dates: 1/88–Present.

Career Pattern
NOTE: This MOS was formerly designated 821A. May have progressed to Survey Technician from MOS 82C (Field Artillery Surveyor) or MOS 82D (Topographic Surveyor).

Description
Manages field-surveying activities and personnel in support of map-making and artillery survey requirements; supervises technical and special procedures employed by survey parties; knows land, highway, and topographic surveying procedures; prepares and interprets aerial photographs and topographic maps; knows basic survey methods such as traverse, triangulation, and resection; knows standard survey computing forms; knows methods for determining azimuth by astronomic or other means; uses astronomical publications such as star lists and ephemeris; coordinates the activities of crews engaged in land, highway, and topographic surveys; adapts survey methods to terrain conditions; converts grid and geographical coordinates; uses trigonometry in various calculations; interprets ground maps, aerial photographs, and map substitutes; insures exact location of points, distances, elevations, lines, areas, and contours in map making efforts; keeps accurate records of secured data; oversees proper use of surveying instruments; verifies accuracy of data obtained from surveys; makes appropriate calculations for map making, using reference tables, standard data, and mathematical formulas; establishes work priorities; designates survey parties and teams; solves complex and unusual problems encountered during survey operations; supervises accountability and maintenance of equipment; maintains records and reports of surveying activities; may serve as a service school instructor.

Recommendation
NOTE: Has knowledge of surveying or geodetic science equivalent to an associate degree (30-40 semester hours, depending on the general education requirements) in geometronic technology. In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 in management problems, 3 in quality control, 3 in records management, 3 in personnel management, 3 in supervision and leadership, and 2 for field experience in management; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management; and additional credit in geodetic or related sciences and cartography on the basis of institutional evaluation (11/77).

MOS-215C-001

REPRODUCTION TECHNICIAN

215C0

Exhibit Dates: 1/88–Present.

Career Pattern
NOTE: This MOS was formerly designated 833A. May have progressed to Reproduction Technician from MOS 83E (Photo and Layout Specialist) or MOS 83F (Printing and Bindery Specialist).

Description
Supervises fixed and mobile platoons and teams engaged in the reproduction of maps, related material, or psychological operations material; organizes activities, schedules production, and establishes procedures; oversees maintenance of equipment; supervises reproduction of topographic maps, pictomaps, overlays, and overprints; must know lithogrphic reproduction quality standards and color separation processes; prepares records and reports; writes technical reports.

Recommendation
In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 3 in production control, 3 in technical report writing, and 6 for field experience in graphic arts. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in management electives, and 2 for field experience in management; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (5/78).

MOS-215D-001

TERRAIN ANALYSIS TECHNICIAN

215D0

Exhibit Dates: 1/88–Present.

Career Pattern
This MOS was formerly designated 841A. May have progressed to Terrain Analysis Technician from MOS 81Q, Terrain Analyst, 81C, Cartographer, 82D, Topographic Surveyor, 93E, Meteorological Observer, or 96B, Intelligence Analyst.

Description
Supervises activities and personnel in identification, analysis, synthesis, production, and dissemination of terrain information; collects data; designs and develops graphics; identifies project needs; analyzes impact of weather; briefs commanders at all levels; develops automated and manual filing systems; supervises use and operation of computer-aided equipment; interacts with other units; understands elements of soils, vegetation, geology, weather hydrology and their relationship to each other; prepares lengthy reports; presents oral briefings.

Recommendation
In the lower-division baccalaureate/associate degree category, 3 semester hours in public speaking and 3 in expository writing. In the upper-division baccalaureate category, 3 semester hours in advanced physical geography, 3 in geodesy, 3 in geographic information systems, 3 in human resource management, and 3-6 semester hours for field experience in management (7/88).

MOS-221B-001

MISSILE ASSEMBLY TECHNICIAN, NIKE

221B0

Exhibit Dates: 1/69–12/87. (Effective 1/88, the MOS designator 221B was changed to 140C (Custodial Systems Technician); see exhibit MOS-140C-001.)

Career Pattern
May have progressed to Missile Assembly Technician, Nike, from MOS 22N (Nike-Hercules Missile-Launcher Repairman), MOS 23W (Nike Maintenance Chief), MOS 24U (Hercules Electronics Mechanic), or MOS 28M (Anti-Ballistic Missile Maintenance Specialist).

Description
Supervises the assembly, testing, and maintenance of all components of Air De-

fense/Ballistic Missile Defense (AD/BMD) missiles; knows operations, theory, and on-line maintenance of missile testing and servicing equipment associated with warhead sections, fuses, electronic and mechanical on-missile guidance equipment, hydraulic systems, and propulsion units; knows theory and function of hydraulic systems, vacuum tubes, solid state devices, and associated circuits and circuit elements; performs checkouts of electronic, electrical, mechanical, electromechanical, and hydraulic systems; knows authorized procedure for modifying existing equipment; knows AD/BMD missile transport, storage, and safety program regulations and policies for nuclear and explosive components; knows theory, operation, and maintenance procedures for all launching area equipment; oversees uncrating and mating of missiles, rocket motor assemblies, and warhead sections; supervises emplacement of missiles and launching area equipment in mobile air defense units; knows maintenance record keeping and inventory control procedures; trains and evaluates missile maintenance personnel in troubleshooting and maintenance procedures; advises commander on the tactical aspects of missile employment, emplacement, readiness status, and firing.

Recommendation

In the lower-division baccalaureate/associate degree category, 6 semester hours in troubleshooting, 3 in technical mathematics, 3 in basic electronics, 3 in AC/DC circuit analysis, 3 in transistor theory, 3 in maintenance management, 2 in instrumentation, 2 in controls, 2 in pulse circuits, 2 in inventory management, 2 in personnel supervision, 2 in report writing, 1 in maintenance shop record keeping, and additional credit in controls, transistor theory, mathematics, hydraulics, and public speaking/communication on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in personnel management and training and 3 in management electives; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management; if duty assignment was platoon leader, credit in leadership and supervision on the basis of institutional evaluation (5/77).

MOS-221C-001

MISSILE MAINTENANCE TECHNICIAN,
SAFEGUARD

221C0

Exhibit Dates: 3/72–3/78. NOTE: Effective 4/78, MOS 221C was discontinued and its functions were incorporated into MOS 221B, Missile Assembly Technician, Nike. The skills, competencies, and knowledge required to maintain the Safeguard missile are comparable to those required to maintain the Nike missile. Use the recommendation in exhibit MOS-221B-001.

MOS-222B-001

MISSILE FIRE CONTROL TECHNICIAN, NIKE
(AIR DEFENSE MISSILE FIRE CONTROL
TECHNICIAN, NIKE)

222B0

Exhibit Dates: 1/69–6/87. (Effective 7/87, MOS 222B was discontinued.)

Career Pattern

May have progressed to Missile Fire Control Technician, Nike, from MOS 16Z (Air Defense Artillery Senior Sergeant), MOS 22L (Nike Test Equipment Repairman), MOS 22N (Nike-Hercules Missile-Launcher Repairman), MOS 23N (Nike-Track Radar Repairman), MOS 23U (Nike High Power Radar-Simulator Repairman), MOS 23W (Nike Maintenance Chief), MOS 24P (Defense Acquisition Radar Mechanic), MOS 24Q (Nike-Hercules Fire Control Mechanic), MOS 24U (Hercules Electronic Mechanic), MOS 26H (Air Defense Radar Repairman), or MOS 34G (Fire Control Computer Repairman).

Description

Supervises the repair and maintenance of Nike air defense missile control equipment, data processing and simulator equipment, and radars; supervises the movement, emplacement, and testing of fire control and auxiliary equipment; understands theory, function, and operation of solid-state devices, associated circuits, tracking radars, acquisition radars, interrogator equipment, computer data transmission systems, tactical control circuits, counter-countermeasure systems, and power supply equipment for Nike air defense missile fire control equipment; supervises the use, testing, and maintenance of tools and test equipment used in diagnosing complex malfunctions in missile electronic ground guidance and tactical data processing equipment; monitors equipment during testing, simulations, and missile firing exercises to detect operator error and/or systems malfunctions and initiates corrective action, if required; knows regulations and procedure required for working with high voltage, electromagnetic radiation, and x-rays; supervises emplacement, testing, and maintenance of fire control equipment, advises commander on employment of counter-countermeasures; knows operation, function, and maintenance of battery terminal equipment; trains maintenance and operator personnel in Nike air defense missile control equipment; supervises parts inventory and supply system, including procurement for Nike air defense missile; supervises maintenance and operation inventory; evaluates effectiveness of maintenance programs, operator training, and parts and equipment supply operations; prepares reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 6 semester hours in electronics troubleshooting, 3 in technical mathematics, 3 in basic electronics, 3 in AC/DC circuits analysis, 3 in transistor theory, 3 in maintenance management, 2 in instrumentation 2 in pulse circuits, 2 in digital circuitry, 2 in computer fundamentals, 2 in inventory management, 2 in personnel supervision, 2 in report writing, 1 in maintenance shop record keeping, 1 in control systems, 1 in radar/microwave theory, 1 in machine language, and additional credit in electronics, mathematics data processing, computer science, and public speaking/communication on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in personnel mangement and training and 3 in management electives; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management; if duty assignment was platoon leader, credit in leadership and supervision on the basis of institutional evaluation (5/77).

MOS-222C-001

MISSILE SYSTEM TECHNICIAN, PATRIOT

222C0

Exhibit Dates: 4/80–Present. NOTE: The skills, competencies, and knowledge required to maintain the Patriot missile are comparable to those required to maintain the Nike. Use the recommendation in exhibit MOS-222B-001.

MOS-223B-001

MISSILE SYSTEM TECHNICIAN, HAWK
(MISSILE SYSTEM TECHNICIAN, IMPROVED
HAWK)

223B0

Exhibit Dates: 10/71–12/87. (Effective 1/88, the MOS designator 223 was changed to 140D; see exhibit MOS-140D-001.) NOTE: MOS 223B was established in 4/78. It is a consolidation of two previous MOS's, MOS 223D (Air Defense Missile System Technician, Improved Hawk) and MOS 251D (Air Defense Missile System Repair Technician, Improved Hawk). Because these two MOS's represented substantially the same skills, competencies, and knowledge required for MOS 223B, persons who held MOS 223D or MOS 251D are eligible for the credit recommended in this exhibit for MOS 223B. However, readers should also note that many persons who held two other previous MOS's, MOS 223C (Air Defense Missile System Technician, Hawk) and MOS 251C (Air Defense Missile System Repair Technician, Hawk) were reassigned to MOS 223B. Because of the additional training normally required for personnel to change over from the Hawk missile system to the Improved Hawk missile system, the recommendation in this exhibit should be applied to a person who held MOS 223C or MOS 251C only after an institutional evaluation confirms that the individual acquired substantially the same skills, competencies, and knowledge described for MOS 223B. This MOS was formerly designated MOS 223D and MOS 251D.

Career Pattern

May have progressed to Missile System Technician, Improved Hawk, from any enlisted MOS in Improved Hawk missile system repair or mechanics MOS in Career Management Field 23 (subfields 233, 234, 235, or 236).

Description

Supervises the assembly, inspection, and repair of the Improved Hawk missile system, simulator equipment, and associated test equipment; understands theory, functions, and operation on on-missile guidance equipment, ranging radars, pulse radars, launchers, fire control equipment, simulator stations, computers, and automatic data transmission systems used with the Improved Hawk air defense missile system and associated power generation and air-conditioning equipment; knows theory and functions of solid-state devices and associated circuits and circuit elements; knows how to assemble and test components of missile, radar, and fire control equipment; supervises testing of the system specialized test sets and procedures; supervises repairmen in isolating malfunctions and in repairing, adjusting, and aligning systems and system components; advises personnel on equipment modificatons and of changes to inspection, repair, test, and maintenance calibration procedures; knows safety procedures and regulations pertaining to high-energy electromagnetic radiation hazards, high-voltage hazards, and high-pressure hydraulic equipment; knows missile transport and storage methods; knows operation, function, and maintenance of battery terminal equipment; trains personnel in safety and security procedures and maintenance techniques; interprets technical publications; supervises parts inventory and supply system, including procurement; reviews and prepares reports; evaluates supply and maintenance problems, advises superiors, and recommends corrective actions; may serve as an instructor at a formal training school or be employed in missile procurement activities.

Recommendation

In the lower-division baccalaureate/associate degree category, 6 semester hours in technical mathematics, 6 in electronics troubleshooting, 3 in basic electronics, 3 in AC/DC circuit analysis, 3 in transistor theory, 3 in instrumentation, 2 in pulse circuits, 2 in control systems, 2 in digital circuitry, 2 in computer fundamentals, 1 in radar/microwave theory, 1 in machine language, 3 in maintenance management, 2 in inventory management, 2 in personnel supervision, 2 in report writing, 1 in maintenance shop record keeping, and additional credit in electronics, mathematics, data processing, computer science, and public speaking/communication on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in personnel management and training and 3 in management electives; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4 6 additional semester hours for field experience in management; if duty assignment was platoon leader, credit in leadership and supervision on the basis of institutional evaluation (5/77).

MOS-223D-001

Air Defense Missile System
Technician, Improved Hawk

223D0

Exhibit Dates: 10/71-3/78. NOTE: Effective 4/78, MOS 223D was discontinued and its functions were incorporated into MOS 223B, Missile System Technician, Improved Hawk. See exhibit MOS-223B-001.

MOS-224B-001

Short Range Air Defense Systems
Technician
(Chaparral/Vulcan System
Technician)

224B0

Exhibit Dates: 12/68-12/87. (Effective 1/88, the MOS designator 224B was changed to 140B; see exhibit MOS-140B-001.)

Career Pattern

May have progressed to Short Range Air Defense Systems Technician from MOS 24M (Vulcan System Mechanic), MOS 24N (Chaparral Systems Mechanic), MOS 27B (Land Combat Support System Test Specialist), MOS 27F (Chaparral/Vulcan Air Defense System Repairman or Vulcan Repairer), MOS 27G (Redeye Missile System Repairman or Chaparral/Redeye Repairer), or MOS 27Z (LCSS Missile Maintenance Chief).

Description

Supervises repair and maintenance of the Chaparral and Vulcan light air defense electronic systems and land combat support missile systems, including forward area alert radar (FAAR) and target alerting identification systems; supervises operation of maintenance shops, on-site maintenance activities, and shop quality control activities; knows theory, operation, and functioning of Chaparral/Vulcan systems and associated equipment, including test and training equipment and motor support units; has knowledge of electricity, electronics, pneumatics, hydraulics, and mechanics; reads, uses, and interprets schematic diagrams and other technical publications; uses special tools and test equipment to maintain, adjust, troubleshoot, and repair system equipment; organizes, supervises, manages, and evaluates most phases of maintenance programs peculiar to the system and to its support equipment; acts in the capacity of maintenance officer in the absence of a line officer; coordinates activities with other maintenance organizations; supervises 20-50 subordinates; advises and assists in establishing training programs for operators and crewmen; knows and provides staff supervision for supply functions; supervises inventory and purchasing of maintenance parts, tools, and equipment; knows safety procedures pertaining to the missile systems and associated equipment; writes technical and administrative reports; advises superiors on the technical and tactical capabilities, limitations, and employment of the missile systems; may serve as an instructor at a formal training school or as a technical advisor on a headquarters staff.

Recommendation

In the vocational certificate category, 6 semester hours in electricity/electronics laboratory, 5 in automotive mechanics, 5 in diesel mechanics, 5 in industrial truck mechanics, 3 in troubleshooting, 1 in shop practices and procedures, and 1 in industrial safety. In the lower-division baccalaureate/associate degree category, 5 semester hours in automotive mechanics, 5 in diesel mechanics, 5 in industrial truck mechanics, 3 in basic electronics, 3 in troubleshooting, 1 in shop practices and procedures, 1 in industrial safety, 3 in maintenance management, 3 in personnel supervision, 2 in inventory management, 2 in maintenance shop record keeping, 2 in report writing, and credit in public speaking/communication on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in personnel management and training and 3 in management electives; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management; if duty assignment was platoon leader, credit in leadership and supervision on the basis of institutional evaluation (5/77).

MOS-224D-001

Sgt. York Air Defense Systems
Technician
(DIVAD Gun System Technician)

224D0

Exhibit Dates: 3/83-Present. NOTE: The skills, competencies, and knowledge required for MOS 224D are comparable to those required for MOS 224B. Use the recommendation in exhibit MOS-224B-001.

MOS-225B-001

Air Defense Artillery (ADA)
Command and Control
Maintenance Technician

225B0

Exhibit Dates: 1/85-12/87. (Effective 1/88, the MOS designator 225B was changed to 140A; see exhibit MOS-140A-001.)

Career Pattern

May have progressed to ADA Command and Control Maintenance Technician from MOS 24C (Hawk Firing Section Mechanic), MOS 24E (Hawk Fire Control Mechanic), MOS 24G (Hawk Information Coordination Central Mechanic), MOS 24H (Hawk Fire Control Repairer), MOS 24J (Pulse Radar Repairer), MOS 24K (Hawk Continuous Wave Radar Repairer), MOS 24L (Hawk Launcher and Mechanical Systems Repairer), MOS 24R (Hawk Master Mechanic), MOS 24T (Patriot Operator and Systems Mechanic), MOS 24U (Nike-Hercules Custodial Mechanic), MOS 24V (Hawk Maintenance Chief), or MOS 24L (AN/TSQ 73 Air Defense Artillery Command and Control System Operator/Repairer).

Description

Coordinates the activities of 25-30 maintenance personnel and manages equipment for the installation, repair, maintenance, and modification of Army air defense command and control systems, including data processing equipment, radar equipment, communications equipment, and power system equipment; develops maintenance procedures; performs hands-on troubleshooting when subordinate personnel are unable to isolate problems; advises and instructs repair personnel; estimates repair priorities based on mission, type of work to be performed, and availability of parts and personnel; advises commissioned officers on command and control system capabilities and limitations.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in shop management, 3 in maintenance management, 3 in computer and data processing concepts, and 3 in training management. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in human resource management, and 6 for field experience in management. Credit in the following areas on the basis of institutional evaluation: computer electronics, computer system repair, radar systems, electronic communications, and power systems (11/88).

MOS-241F-001

Field Artillery Missile System Repair
Technician, Pershing

241F0

Exhibit Dates: 12/62-2/78. NOTE: Effective 4/78, MOS 241F was discontinued and its functions were incorporated into MOS 214E, Missile System Technician, Pershing. Use the recommendation in the exhibit, MOS-214E-001, and award additional credit on the basis of institutional evaluation.

MOS-250A-001

Communications Security Technician
(Telecommunications Technician)

250A0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated 290A. May have progressed to MOS 250A from MOS 72E (Tactical Telecommunications Center Operator), 72G (Automatic Data Telecommunications Center Operator), 29F (Fixed Communications Security Equipment Repairer), 29S (Field Communications Security Equipment Repairer), and 29P (Communications Security Maintenance Chief).

Description

Manages and supervises personnel, equipment, and facilities for the operation of mobile and fixed communication center or activities; supervises personnel engaged in transmitting messages and operating communications or data processing equipment; performs systems analysis; organizes communication center activities; assigns work to subordinates; plans, supervises and conducts training; assumes responsibility for accounts; is accountable for procurement, storage, and use of communications equipment; may supervise, inspect and evaluate operations associated with automated message-processing centers and automatic digital switches or terminals; supervises testing, adjusting and repairing of communications security equipment in either fixed locations or in logistic support facilities; may serve as a service school instructor; may serve as an advisor to members of allied armies; may serve as a commodity manager for communications sections, material, and in procurement, research, developmental, tests, and evaluaton activities.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in shop management, 3 in maintenance management, 3 in administrative office management, 3 in business communications, 3 in record keeping, 3 in computer and data processing concepts, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in management problems, 3 for field experience in management, 3 in education electives (instruction and counseling) and additional credit in leadership and supervision on the basis of institutional evaluation; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (5/78).

MOS-250B-001

Tactical Automated Network
Technician

250B0

Exhibit Dates: 9/89–Present.

Career Pattern

May have progressed to Tactical Automated Network Technician from MOS 31F (Mobile Subscriber Equipment Network Switching System Operator), 31W (Mobile Subscriber Equipment Communications Chief), 31Y (Communications Systems Supervisor), 31Z (Communications-Operations Chief), 36L (Transportable Electronic Switching Systems Operator/Maintainer), or 72E (Telecommunications Center Operator).

Description

Manages and supervises the operation of tactical automated network message circuits and data switching systems; plans, conducts and supervises training on automated switching networks; coordinates network troubleshooting and restoration of systems; serves as network manager for Mobile Subscriber Equipment Tactical Communications systems; plans, directs, and manages the deployment, installation, activation and movement of communications facilities comprising the networks; loads and runs systems diagnostics.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in maintenance management. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (6/90).

MOS-251A-001

Data Processing Technician

251A0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated 741A. May have progressed to Data Processing Technican from MOS 74D (Computer/Machine Operator), MOS 74F (Programmer Analyst), or MOS 74Z (Data Processing NCO).

Description

Directs and coordinates production activities of electronic data processing element or unit including functional or machine design applications, programming, or operation of automatic data processing (ADP) equipment; analyzes, plans, and manages the development, test, evaluation, and modification of automatic data processing systems (ADPS); plans and coordinates activities of data processing personnel engaged in programming, wiring, and debugging programs; establishes work standards; supervises coding and machine processing of data and develops training programs; interprets policies, purposes, and goals of ADP activity to subordinates; participates in decisions regarding personnel staffing, allocation of ADP resources, and equipment acquisitions.

Recommendation

In the vocational certificate category, 3 semester hours in data processing principles, 3 in computer fundamentals, 3 in technical report writing, and credit in the appropriate computer languages on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in data processing principles, 3 in computer fundamentals, 3 in technical report writing, 3 in business communications, 3 in computer operating systems, 3 in computer facility management, 3 in personnel supervision, and additional credit in the appropriate computer languages on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in computer systems and program design, 3 in personnel management, and 3 in management electives; if rank was CW2, 2 semester hours for field experience in management; if rank was CW3, 4 semester hours for field experience in management; if rank was CW4, 6 semester hours for field experience in management (6/78).

MOS-251B-001

Air Defense Missile System Repair
Technician, Nike

251B0

Exhibit Dates: 1/69–3/78. NOTE: Effective 4/78, MOS 251B was discontinued and its functions were incorporated into MOS 222B, Missile Fire Control Technician, Nike. Use the recommendation in exhibit MOS-222B-001, and award additional credit on the basis of institutional evaluation.

MOS-251D-001

Air Defense Missile System Repair
Technician, Improved Hawk

251D0

Exhibit Dates: 10/71–3/78. NOTE: Effective 4/78, MOS 251D was discontinued and its functions were incorporated into MOS 223B, Missile System Technician, Improved Hawk. See exhibit MOS-223B-001.

MOS-252A-001

Test Measurement and Diagnostic
Equipment (TMDE) Technician
(Calibration and Repair Technician)
(Calibration Technician)

252A0

Exhibit Dates: 8/71–Present.

Career Pattern

May have progressed to Calibration Technician from MOS 35H (Calibration Specialist).

Description

Supervises or accomplishes repair and calibration of precision equipment used for the measuring, testing, controlling and indicating of temperature, pressure, vacuum, fluid flow, liquid level, mechanical motion, rotation, humidity, density, acidity, alkalinity, and combustion (equipment may include tools, dial pressure gauges, scales, balances, direction and sighting devices, oscilloscopes, meters, digital test equipment, signal generators, power supplies, and specialized mechanical and electronic testing equipment); maintains equipment within prescribed manufacturer standards and national or international bureau of standards tolerances and ensures that calibration surveillance standards are met; manages activities and personnel engaged in calibration of instruments or system components of all types of Army equipment and weapons; interprets and analyzes measurement data and specifications of equipment, instruments, or guages to conform to specified standards; develops procedures for testing and diagnosing malfunctions or implements established guidance to adjust or repair item requiring calibration; interprets technical data, schematics and transfer standards in the use and operation of this material; supervises testing systems to isolate malfunctions and faulty components; instructs subordinates on the correctional adjustments to obtain special readings or characteristics, such as frequency or inductance; certifies instruments for accuracy; may be assigned chief of section engaged in calibration activities, and may supervise up to 50 calibration technicians; may be employed as a contracting officer's representative to monitor and evaluate the performance of contractor personnel performing maintenance calibration functions for the Army; may be assigned as a service school instructor at U.S. Army or joint service schools, and typically is involved in writing of training materials and teaching of update courses to subordinates; may oversee budget of calibration unit, oversee office, personnel, job placement, employee relations, shipping of equipment, and other essential officer-level duties.

Recommendation

In the vocational certificate category, 3 semester hours in electricity/electronics, 6 in circuits, 6 in troubleshooting techniques, 3 in electronics measurement laboratory, and 3 in technical electives. In the lower-division baccalaureate/associate degree category, 3 semester hours in electricity/electronics, 6 in circuits, 3 in troubleshooting techniques, 3 in electronics measurement laboratory, 3 in personnel supervision and human relations, and 3 in technical writing and report preparation. In the upper-division baccalaureate category, 6 semester hours in management electives and 3 in education electives (8/79).

MOS-256A-001

COMMUNICATIONS-ELECTRONICS REPAIR TECHNICIAN

256A0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated 286A. May have progressed to Communications-Electronics Equipment Repair Technician from any of the following MOS's: 39C, 29E, 29J, 29M, 29T, 29U, 29W, 29Y, 35L, 35M, 35P, 35R, and 39E.

Description

Manages personnel and equipment in the installation, maintenance, and modification of radio, radar, television, microwave, navigation, avionics, wire communication equipment, and associated tools, tests sets and accessory equipment; receives and inspects equipment; prepares work assignments for subordinates; plans and implements maintenance schedules; develops repair and operating procedures and assures quality control; instructs personnel on test and maintenance procedures; supervises general technical and complex repair of communications-electronic/equipment at all command levels; estimates repair requirements and costs; advises commander or staff officers on communications equipment development, procurement, capabilities, limitations and employment; may serve as service school instructor; may serve as advisor to members of allied armies; may serve with procurement; may serve in research, development, and evaluation activities related to communications equipment.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in shop management, 3 in maintenance management, 3 in administrative office management, 3 in business communications, 3 in record keeping, 3 in computer and data processing concepts, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in management problems, 3 for field experience in management, 3 in education electives (instruction and counseling) and additional credit in leadership and supervision on the basis of institutional evaluation; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (5/78).

MOS-257A-001

DATA PROCESSING SYSTEMS REPAIR TECHNICIAN

257A0

Exhibit Dates: 1/88–Present

Career Pattern

NOTE: This MOS was formerly designated 287A. May have progressed to Data Processing Systems Repair Technician from any of the following MOS's: 25L, 29G, 29H, 39D, 39K, and 39Y.

Description

Manages personnel and equipment involved in the installation, operation, repair, maintenance, and modification of punch card, electronic data processing, command and control systems, and ancillary equipment and tools; develops operating procedures; interprets technical data; advises and instructs repair personnel; solves unusually complex problems of diagnosis, repair, and modification; establishes repair priorities; estimates repair requirements and costs; advises commander on use, capability, and limitations of data processing systems; may serve as an instructor in a service school; may serve in research, development, test, and evaluation activities.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in shop management, 3 in maintenance management, 3 in administrative office management, 3 in business communications, 3 in recordkeeping, 3 in computer and data processing concepts, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in management problems, 3 for field experience in management, 3 in education electives (instruction and counseling) and additional credit in leadership and supervision on the basis of institutional evaluation; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (5/78).

MOS-260A-001

NUCLEAR WEAPONS TECHNICIAN

260A0

Exhibit Dates: 3/74–12/87. (Effective 1/88, the MOS designator 260A was changed to 911A; see exhibit MOS-911A-002.)

Career Pattern

May have progressed to Nuclear Weapons Technician from MOS 35F (Nuclear Weapons Electronics Specialist) or MOS 55G (Nuclear Weapons Maintenance Specialist).

Description

Supervises the assembly, disassembly, inspection, test, repair, modification, maintenance, security and safety of nuclear warhead subsections, projectiles, munitions, components, and associated trainers; supervises from 8 to 40 personnel engaged in the maintenance calibration of the test and handling equipment associated with nuclear materials and weapons; determines the acceptability of nuclear warhead sections and subassemblies to assure their reliability through close supervision and personal inspection of maintenance operations, including electronic component replacement, nuclear material replacement, and proper storage and handling; ensures that equipment modifications are accomplished as announced; examines, interprets, rewrites, and disseminates technical materials for revised operating procedures, orders, technical publications, new test equipment, and new safety procedures pertinent to nuclear materials and weapons; enforces the compliance with weapons safety rules, OSHA regulations, security regulations, and unique safety requirements; performs emergency disarm and destruction of nuclear weapons, which involves handling nuclear materials and conventional high explosives; supervises all administrative duties associated with repair and maintenance, including requisitions for tools, parts, and supplies; manages personnel assignments; writes reports and maintains records; performs inspections; provides technical guidance and assistance to all support units, operating agencies and company commanders regarding all matters involving nuclear weapons.

Recommendation

In the vocational certificate category, 1 semester hour in electronic circuits, 3 in electronic measurements laboratory, 3 in explosives handling, 6 in nuclear materials handling, and 6 in nuclear security and safety procedures. In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic measurements laboratory, 6 in nuclear materials handling, 6 in nuclear security and safety procedures, 3 in personnel supervision and human relations, and 3 in technical writing and report preparation. In the upper-division baccalaureate category, 6 semester hours in management electives and 3 in education electives (8/79).

MOS-271A-001

LAND COMBAT SUPPORT MISSILE SYSTEMS REPAIR TECHNICIAN

271A0

Exhibit Dates: 10/66–12/87. (Effective 1/88, the MOS designator 271A was changed to 912A; see exhibit MOS-912A-001.)

Career Pattern

May have progressed to Land Combat Support Missile Systems Repair Technican from MOS 27B (Land Combat Support Test System Specialist/Lance Repairer), MOS 27D (Lance Missile System Repairman), MOS 27E (Wire-Guided Missile Systems Repairman or TOW/Dragon Repairer), MOS 27H (Shillelagh Repairer), or MOS 27Z (LCSS Missile Maintenance Chief).

Description

Manages supply, equipment, facility, and personnel assets in the maintenance and repair of land combat support missile systems (short or medium-distance guided missile weapon systems), associated system-designed electronic test systems, and training devices; directs the activities of personnel engaged in isolating malfunctions occurring in electronic firing and guiding systems and components; analyzes complex malfunctions; supervises repair of and modifications to systems components, including guidance control systems, optical trackers, modulators, infrared sensors, conduct-of-fire trainers, missiles, and specialized test equipment; oversees supply management and preparation of work reports and maintenance records; forecasts supply requirements; insure that final inspections and checkout procedures are conducted; examines, interprets, and disseminates technical material, including orders, bulletins, and manuals; instructs enlisted specialists in troubleshooting techniques, diagnostic procedures, and the interpretation of tests on system components, circuits, and optical elements; knows techniques and safety procedures for handling explosive components; may serve as instructor at a formal training school.

Recommendation

In the vocational certificate category, 6 semester hours in electronics theory and laboratory and 2 in use of basic hand tools. In the lower-division baccalaureate/associate degree category, 6 semester hours in electronics theory and laboratory, 3 in personnel supervision, 3 for field experience in management, 3 in industrial/human relations, 2 in maintenance management, and 1 in technical report writing. In the upper-division baccalaureate category, 3 semester hours in personnel management and training and 3 in management electives (3/77).

MOS-281A-001

RADIO REPAIR TECHNICIAN

281A0

Exhibit Dates: 6/61-3/78. NOTE: Effective 4/78, MOS 281A was discontinued and its function were incorporated into MOS 286A, Communications-Electronics Equipment Repair Technician. Use exhibit MOS-286A-001.

MOS-282A-001

RADAR REPAIR TECHNICIAN

282A0

Exhibit Dates: 6/61-3/78. NOTE: Effective 4/78, MOS 282A was discontinued and its function were incorporated into MOS 286A, Communications-Electronics Equipment Repair Technician. Use exhibit MOS-286A-001.

MOS-285A-001

ELECTRONIC WARFARE/INTERCEPT EQUIPMENT REPAIR TECHNICIAN (INTERCEPT REPAIR TECHNICIAN)

285A0

Exhibit Dates: 6/61-12/87. (Effective 1/88, the MOS designator 285A was changed to 353A; see exhibit MOS-353A-001.)

Career Pattern

May have progressed to Electronic Warfare/Intercept Equipment Repair Technician from MOS 26K (Aerial Electronic Warning/Defense Equipment Repairer), or MOS 33S (Electronic Warfare Intercept Systems Repairer).

Description

Manages personnel and equipment involved in installing, maintaining, repairing, and modifying complex electronic warfare, intercept, and related ancillary electronics equipment; applies theory and knowledge of functioning of vacuum tubes, transistors, and other solid-state devices, and digital techniques; applies techniques of circuit analysis and performance measurement; keeps maintenance records; supervises requisitioning of supplies and spare parts; recommends equipment modifications; instructs repair personnel on troubleshooting and repair techniques and on specialized tests and procedures; estimates repair requirements and costs; prepares and implements maintenance schedules; advises commander on use of electronic systems equipment; may serve as a service school instructor.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in shop management, 3 in maintenance management, 3 in administrative office management, 3 in business communications, 3 in recordkeeping, 3 in computer and data processing concepts, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in management problems, 3 for field experience in management, 3 in education electives (instruction and counseling) and additional credit in leadership and supervision on the basis of institutional evaluation; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (5/78).

MOS-286A-001

COMMUNICATIONS-ELECTRONICS EQUIPMENT REPAIR TECHNICIAN (COMMUNICATIONS-ELECTRONICS REPAIR TECHNICIAN)

286A0

Exhibit Dates: 6/61-12/87. (Effective 1/88, the MOS designator 286A was changed to 256A; see exhibit MOS-256A-001.)

Career Pattern

May have progressed to Communications-Electronics Equipment Repair Technician from MOS 24P (Defense Acquisition Radar Mechanic), MOS 26B (Weapons Support Radar Repairman), MOS 26C (Combat Area Surveillance Radar Repairer), MOS 26D (Ground Control Approach Radar Repairer), MOS 26H (Air Defense Radar Repairman), MOS 26L (Tactical Microwave Systems Repairman), MOS 26M (Aerial Surveillance Radar Repairer), MOS 26T (Radio/Television Systems Specialist), MOS 26V (Strategic Microwave Systems Repairman), MOS 26Y (Satellite Communications Ground Station Equipment Repairman), MOS 31B (Field Communications-Electronics Equipment Mechanic), MOS 31E (Field Radio Repairman), MOS 31J (Teletypewriter Repairman), MOS 31L (Multichannel Communications Equipment Repairman), MOS 31W (Tactical Electronics Maintenance Chief), MOS 32E (Fixed Plant Carrier Repairman), MOS 32H (Fixed Station Radio Repairman), MOS 32Z (Fixed Station Chief), MOS 35E (Special Electrical Devices Repairman), MOS 35K (Avionic Mechanic), MOS 35L (Avionic Communications Equipment Repairer), MOS 35M (Avionic Navigation and Flight Control Equipment Repairer), MOS 35P (Avionic Equipment Maintenance Supervisor), MOS 35R (Avionic Special Equipment Repairer), MOS 36G (Manual Central Office Repairman), MOS 36H (Dial Central Office Repairman), or MOS 36L (Electronics Switching Repairman).

Description

Manages personnel and equipment in the installation, maintenance, and modification of radio, radar, television, microwave, navigation, avionics, wire communication equipment, and associated tools, tests sets and accessory equipment; receives and inspects equipment; prepares work assignments for subordinates; plans and implements maintenance schedules; develops repair and operating procedures and assures quality control; instructs personnel on test and maintenance procedures; supervises general technical and complex repair of communications-electronic equipment at all command levels; estimates repair requirements and costs; advises commander or staff officers on communications equipment development, procurement, capabilities, limitations and employment; may serve as service school instructor; may serve as advisor to members of allied armies; may serve with procurement; may serve in research, development, and evaluation activities related to communications equipment.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in shop management, 3 in maintenance management, 3 in administrative office management, 3 in business communications, 3 in record keeping, 3 in computer and data processing concepts, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in management problems, 3 for field experience in management, 3 in education electives (instruction and counseling) and additional credit in leadership and supervision on the basis of institutional evaluation; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (5/78).

MOS-287A-001

DATA PROCESSING SYSTEMS REPAIR TECHNICIAN

287A0

Exhibit Dates: 6/61-12/87. (Effective 1/88, the MOS designator 287A was changed to 257A; see exhibit MOS-257A-001.)

Career Pattern

May have progressed to Data Processing Systems Repair Technician from MOS 25D (BIRDIE Repairman), MOS 25G (Mobile ADCP Monitor Repairman), MOS 25H (Radar Data Processing Equipment Repairman), MOS 25J (Operations Central Repairman), MOS 25K (AN/TSQ-51 System Repairman/Maintenance Chief), MOS 34B (Tabulating Equipment Repairman), MOS 34E (NCR 500 Computer Repairman), MOS 34F (DSTE Repairman), MOS 34G (Fire Control Computer Repairman), MOS 34H (ADMSE Repairer), MOS 34J (UNIVAC 1004/1005 DCT 9000 System Repairman), MOS 34K (IBM 360 Repairman), or MOS 34Z (ADP Maintenance Supervisor).

Description

Manages personnel and equipment involved in the installation, operation, repair, maintenance, and modification of punch card, electronic data processing, command and control systems, and ancillary equipment and tools; develops operating procedures; interprets technical data; advises and instructs repair personnel; solves unusually complex problems of diagnosis, repair, and modification; establishes repair priorities; estimates repair requirements and costs; advises commander on use, capability, and limitations of data processing systems; may serve as an instructor in a service school; may serve in research, development, test, and evaluation activities.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in shop management, 3 in maintenance management, 3 in administrative office management, 3 in business communications, 3 in recordkeeping, 3 in computer and data processing concepts, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in management problems, 3 for field experience in management, 3 in education electives (instruction and counseling) and additional credit in leadership and supervision on the basis of institutional evaluation; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (5/78).

MOS-290A-001

TELECOMMUNICATIONS TECHNICIAN

290A0

Exhibit Dates: 6/61-12/87. (Effective 1/88, the MOS designator 290A was changed to 250A; see exhibit MOS-250A-001.)

Career Pattern

May have progressed to Telecommunications Technician from MOS 31S (Field General COMSEC Repairman), MOS 31T (Field Systems COMSEC Reparman, MOS 31U (Tactical COMSEC Maintenance Chief), MOS 32F (Fixed Ciphony Repairman), MOS 32G (Fixed Cryptographic Equipment Repairman), MOS 76D (Material Supplyman), MOS 72E (Telecommunications Center Specialist), or MOS 72G (Data Communications Switching Center Specialist).

Description

Manages and supervises personnel, equipment, and facilities for the operation of mobile and fixed communication center or activities; supervises personnel engaged in transmitting messages and operating communications or data processing equipment; performs systems analysis; organizes communication center activities; assigns work to subordinates; plans, supervises and conducts training; assumes responsibility for accounts; is accountable for procurement, storage, and use of communications equipment; may supervise, inspect and evaluate operations associated with automated message-processing centers and automatic digital switches or terminals; supervises testing, adjusting and repairing of communications security equipment in either fixed locations or in logistic support facilities; may serve as a service school instructor; may serve as an advisor to members of allied armies; may serve as a commodity manager for communications sections, material, and in procurement, research, developmental, tests, and evaluaton activities.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in shop management, 3 in maintenance management, 3 in administrative office management, 3 in business communications, 3 in record keeping, 3 in computer and data processing concepts, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in management problems, 3 for field experience in management, 3 in education electives (instruction and counseling) and additional credit in leadership and supervision on the basis of institutional evaluation; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (5/78).

MOS-301A-001

DATA PROCESSING EQUIPMENT REPAIR TECHNICIAN

301A0

Exhibit Dates: 6/61-3/78. NOTE: Effective 4/78, MOS 301A was discontinued and its functions were incorporated into MOS 287A, Data Processing Equipment Repair Technician. Use exhibit MOS-287A-001.

MOS-310A-001

UTILITIES OPERATION AND MAINTENANCE TECHNICIAN
(UTILITIES MAINTENANCE TECHNICIAN)

310A0

Exhibit Dates: 6/61-12/87. (Effective 1/88, the MOS designator 310A was changed to 210A; see exhibit MOS-210A-001.)

Career Pattern

NOTE: This MOS was formerly designated MOS 521A. May have progressed to Utilities Operation and Maintenance Technician from any MOS in Career Management Field 52 (Power Production), or the following MOS's in career Management Field 51 (General Engineering): MOS 51A (Construction and Utilities Worker), MOS 51B (Carpenter), MOS 51G (Soils Analyst), or any MOS in subfield 512 (Utilities Engineering).

Description

Manages personnel engaged in utilities operation and maintenance; performs administrative, supply management, and quality control functions which insure operation, delivery, and maintenance of utilities for an installation, hospital, or associated activity; manages and knows the fundamentals of installation, operation, and maintenance of water supply, plumbing, heating, sewage, electrical, refrigeration, air conditioning, and fire fighting systems, and power stations; estimates material and personnel requirements for maintenance and repair of utilities plants and systems; reads and interprets blueprints, schematics, and electrical diagrams; knows electrical, electronic, and mechanical theory and applications relevant to electrical power plants using steam, gas, or diesel-powered generating units; knows basic principles of military, civilian, and contractor procedures and personnel management; understands technical publications of operating principles of utilities plants and systems; diagnoses difficulties; plans maintenance and repair schedules and procedures; manages personnel and equipment engaged in the production of electrical power, determines maintenance and repair requirements and establishes work priorities; allocates maintenance and repair resources; establishes shop practices and policies; directs activities of plant and shift supervisors, electricians, mechanics, instrumentation and process control technicians, and health physics specialists; supervises installation and maintenance of high-voltage electrical power transmission lines and substations; establishes operating procedures for power plant operations, maintenance, equipment inspections, and industrial safety programs; supervises preparation of operating, malfunction, and supply reports; directs procurement and distribution of supplies, tools, and equipment, administers appropriate budgets; acts as technical advisor to commanders concerned with utilities operations; may serve as service school instructor; serves as station or power plant superintendent, power system technician, section or team chief; may directly supervise up to 100 persons; may be able to apply occupational skill to specialized features of nuclear power plants or of ballistic missile (Safeguard System) support equipment.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in industrial safety, 3 in shop management, 3 in material management, 3 in personnel supervision, 3 in office administration, 3 in record keeping, 3 in technical writing, and 3 in human relations, and credit in ballistic missile support equipment repair and nuclear power on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in management problems, 3 in management and training, and 2 for field experience in management; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management; if duty assignment was service school instructor, 6 semester hours for a practicum in education (11/77).

MOS-311A-001

CID SPECIAL AGENT

311A0

Exhibit Dates: 1/88-Present.

Career Pattern

NOTE: This MOS was formerly designated 951A. May have progressed to CID Special Agent from MOS 95D (CID Special Agent).

Description

Conducts investigations and supervises technical and other personnel in the investigation of known or suspected crimes involving government property and individuals subject to military jurisdiction; examines scene of incident and collects and submits all relevant physical evidence (fingerprints, blood stains, suspected narcotics, castings, documents) to crime laboratory; studies and evaluates evidence to determine motives and responsible individuals; develops investigative plans; prepares reports of investigations; apprehends violators or suspects based on probable cause; testifies at courts-martial or other appropriate judiciary tribunals; engages in crime prevention efforts and physical security surveys; performs worldwide protective services for Department of Defense executives, visiting foreign officials, and other designated principals; knows techniques for effective investigation of any type of crime involving U.S. government property and individuals subject to the Uniform Code of Military Justice; knows what constitutes an offense under applicable criminal codes and laws; knows techniques governing search and apprehension; knows rules of evidence and methods of collecting, preserving, and protecting evidence; knows complete procedures for identifying, protecting, and searching a crime scene; knows techniques of surveillance, covert operation, raids, and search and seizure and conducts such activities; applies evidence, records, and laboratory reports to criminal investigations; knows techniques of crime prevention, physical security, and industrial defense surveys; evaluates findings and develops recommendations resulting from such surveys; interviews and interrogates complainants, witnesses, informants, suspects, and other persons considered knowledgeable of or connected with crimes; develops information on suspects concerning habits, associates, aliases, characteristics, and other personal information and uses such information in the investigative process; prepares proper records of information obtained through interviews and interrogations; supervises criminal investigation teams; understands basic techniques for conducting laboratory examinations and the analysis of physical evidence; applies laboratory techniques and procedures to physical evidence; evaluates all information obtained in connection with a specific crime; knows administrative procedures, report writing, correspondence formats, supply channels, and office management; testifies as expert witness concerning application of any standard technique or procedure used in criminal investigation; coordinates with appropriate civil and military agencies involving jurisdictional authority, exchange of information, and similar problems and considerations; may be an operations officer giving direction to other personnel involved in various investigations; may serve as an instructor or supervise instruction of personnel in various crime-related topics; may have foreign language proficiency; has extensive knowledge about narcotics and narcotics trafficking, including clandestine laboratories, drug traffic patterns, drug identification, and drug field testing; conducts drug abuse education programs.

Recommendation

In the vocational certificate category, 6 semester hours in laws/rules of evidence, 3 in report writing, and 3 in criminal investigation. In the lower-division baccalaureate/associate degree category, 6 semester hours in laws/rules of evidence, 4 in introduction to law enforcement, 3 in criminal law, 3 in criminal investigation, 3 in report writing, and 3 in oral communications, and additional credit in a foreign language on the basis of institutional evaluation. In the upper-division baccalaureate category, 6 semester hours for field experience in criminology (crime scene and laboratory) and 3 for a practicum in education, and additional credit in foreign language and education on the basis of institutional evaluation (11/77).

MOS-341A-001

CRYPOTOGRAPHIC EQUIPMENT REPAIR TECHNICIAN

341A0

Exhibit Dates: 6/61–3/78. NOTE: Effective 4/78, MOS 341A was discontinued and its functions were incorporated into MOS 290A, Telecommunications Technician. Use exhibit MOS-290A-001.

MOS-350B-001

ALL SOURCE INTELLIGENCE TECHNICIAN (ORDER OF BATTLE TECHNICIAN)

350B0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated 964A. May have progressed to MOS 350B from MOS 96B (Intelligence Analyst).

Description

Collects and evaluates tactical and strategic information related to organization, operations, capabilities, and limitations of armed forces; uses the accumulated information to develop order-of-battle data; makes reliability assessments of information through comparison with previously evaluated information; maintains close liaison with other intelligence activities, including counter-intelligence, photo interpretation, interrogation, and language interpretation units; develops and maintains maps and overlays to provide complete and accurate intelligence information relating to friendly and enemy armed forces; interprets maps; prepares written reports; gives briefings and oral reports; maintains current information concerning both friendly and enemy forces to include identification, disposition, personalities, combat efficiency, and history; evaluates the significance of armed forces vulnerability studies for use in predicting probable courses of actions; has a working knowledge of automatic data processing procedures as applied to tactical and strategic intelligence; supervises, commands, or acts as chief of a section, detachment, or team engaged in the development of the data or information required in this area; may serve as a service school instructor.

Recommendation

In the vocational certificate category, 3 semester hours in clerical practices, 3 in records administration, 3 in technical writing, 3 in communication skills (oral), and 1 in map reading. In the lower-division baccalaureate/associate degree category, 3 semester hours in clerical practices, 3 in records administration, 3 in technical writing, 3 in oral communication, 3 in personnel supervision, and 1 in map reading. In the upper-division baccalaureate category, 3 semester hours in management problems; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management; if duty assignment was service school instructor, 6 semester hours for a practicum in education (11/77).

MOS-350D-001

IMAGERY INTELLIGENCE TECHNICIAN

350D0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated 962A. May have progressed to Image Interpretation Technician from MOS 96D (Imagery Analyst).

Description

Manages activities or performs duties relative to image interpretations; applies techniques and principles of image interpretation, photogrammetry, and topographic drafting; knows and applies basic principles of geology and human and physical geography; understands basic cartography, surveying, geometry, trigonometry, and the metric system; prepares written summaries and gives oral reports; conducts briefings; establishes and maintains files; instructs subordinates in proper work techniques and procedures; directs training; supervises personnel; advises superiors; develops map overlays; may serve as a service school instructor.

Recommendation

In the vocational certificate category, 3 semester hours in map reading, 2 in mechanical drawing, 3 in photogrammetry, 3 in technical writing, 3 in technical mathematics, and 3 in aerial photographic interpretation. In the lower-division baccalaureate/associate degree category, 3 semester hours in map reading, 3 in photogrammetry, 3 in aerial photographic interpretation, 3 in physical geography, 3 in technical writing, 3 in technical mathematics, 2 in mechanical drawing, and 3 in human relations. In the upper-division baccalaureate category, 3 semester hours in management problems, 3 for field experience in management, and 3 in personnel management; if duty assignment was instructor at a formal training facility, 6 additional semester hours for a practicum in education (11/77).

MOS-350L-001

ATTACHE TECHNICIAN

350L0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated 961A. May have progressed to Attache Technician from MOS 71L (Administrative Specialist).

Description

Performs general administrative and logistics functions in support of Defense Army Attache office located in an embassy of the United States of America; must know regulations, directives, and procedures necessary for managing and operating administrative and logistics support functions; secures and manages housing accommodations for personnel assigned to the embassy; knows history, political and economic institutions, social customs, and, when possible, the language of the country to which assigned; advises other attache office personnel and visitors regarding matters of protocol, military courtesies, and public affairs; supervises enlisted and civilian support specialists; manages internal activities of the Defense Attache office; compiles and prepares reports and communications; receives, interviews and schedules meetings with U.S. and foreign military and civilian visitors; supervises internal communications; maintains files and administers the record keeping process; types correspondence, messages, forms, and manuscripts; authenticates vouchers; processes and reviews requisitions; may serve as service school instructor; may perform other officer-level duties as required.

Recommendation

In the vocational certificate category, 4 semester hours in typing, 2 in filing, 3 in office practices, 3 in business communications, 3 in records administration, and 1 in business machines. In the lower-division baccalaureate/associate degree category, 4 semester hours in typing, 2 in filing, 3 in office practices, 3 in business communications, 3 in records administration, 1 in business machines, 3 in human relations, 6 for field experience in office management, 6 in social science, 2 in public relations, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in management problems and 3 in real property management; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management. NOTE: Add credit for the specific foreign language in accordance with the recommendation in Volume 4 of the Guide to the Evaluation of Educational Experiences in the Armed Services (11/77).

MOS-351B-001

Counterintelligence Special Agent

351B0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated 971A. May have progressed to Counterintelligence Technician from MOS 97B (Counterintelligence Agent).

Description

Manages activities or performs duties that provide intelligence information; investigates personnel under U.S. Army jurisdiction to determine their suitability for assignment to sensitive duties; conducts interrogations, briefings, and debriefings; prepares intelligence and investigative reports; analyzes and interprets intelligence and counterintelligence data; works closely with civilian law enforcement officials and investigative agencies; supervises and trains subordinates; knows organization, mission, tactics, and operating methods of friendly and enemy intelligence units and personnel; knows principles and procedures involved in counterintelligence investigations; knows interrogation techniques; knows techniques for conducting effective liaison with local, state, and national investigative and other governmental agencies of friendly and occupied countries; knows operation, characteristics, and regulations governing the use of recording and monitoring equipment; knows techniques and regulations governing investigative surveillance; knows fundamentals of military and civil law, including due process and the application of legal principles to counterintelligence operations; collects evidence admissible for legal action and obtains depositions; knows the culture, custom, history, social, economic, and political structures of the area of operation; conducts security investigations, surveys, and vulnerability studies of installations; knows principles for communications and signal security; processes photographic film; may be a service school instructor.

Recommendation

In the lower-division baccalaureate/associate degree category, 6 semester hours in social science, 3 in police administration, 3 in industrial security, 3 in U.S. government, 3 in applied psychology, 3 in report writing, 3 in oral communication, 3 in office management, 2 in personnel supervision, and 1 in typing. In the upper-division baccalaureate category, 3 semester hours in political ideologies, 3 in constitutional law, and 3 in public relations; if the duty assignment was service school instructor, 6 additional semester hours for a practicum in education (11/77).

MOS-351C-001

Area Intelligence Technician

351C0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated 972A.

Description

Collects intelligence information on a specific geographic area through the use of human resources; works with a minimum of supervision; uses extremely demanding operational security procedures in a foreign environment; knows culture, customs, history, politics, geography, economics, and social structure of geographic area(s); knows procedures for preparing and forwarding reports; conducts interviews, interrogations, briefings, and debriefings; prepares informational and operational reports; analyzes and interprets information for intelligence implications; reads maps and prepares map overlays; supervises area intelligence units and teams. NOTE: Many of the required duties for this MOS involve highly classified materials, equipment, techniques and activities; therefore, not all the competencies and knowledges associated with the MOS were evaluated.

Recommendation

In the lower-division baccalaureate/associate degree category, 6 semester hours in area studies, 3 in regional geography, 3 in applied psychology, 3 in report writing, 3 in speech, 3 in photography, 1 in electronic systems, 1 in typing, and 1 in human relations. In the upper-division baccalaureate category, 6 semester hours in history electives, 3 in economics electives, 3 in comparative cultures, 3 in applied research, 3 in personnel management, and 3 in international relations; if the duty assignment was service school instructor, 6 semester hours for a practicum in education. In the graduate degree category, 3 semester hours for a seminar in military intelligence strategy and policy and additional credit in international relations on the basis of institutional evaluation. NOTE: Add credit for the specific foreign language in accordance with the recommendation in Volume 4 of the Guide to the Evaluation of Educational Experiences in the Armed Services (11/77).

MOS-351E-001

Interrogation Technician

351E0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated 963A. May have progressed to Interrogation Technician from MOS 97E (Interrogator).

Description

Knows history, culture, geography, and current politics and economics of country or countries in area to which assigned; knows techniques and principles of interrogation and document exploitation; knows interrogation reporting procedures; conducts interrogations, in a foreign language, of informants, prisoners of war, and refugees; prepares reports of interrogations and identifies and resolves conflicting information provided by different sources, such as documents; disseminates reports and makes assessments of the validity of information for dissemination to users; summarizes findings; functions as a supervisor, chief, or commander of a team or larger unit; translates technical publications related to recent scientific discoveries and inventions; usually is proficient in reading, writing, speaking, and translating two or more foreign languages.

Recommendation

In the lower-division baccalaureate/associate degree category, 6 semester hours in social science, 3 in report writing, 3 in oral communication, and 3 in personnel supervision, and additional credit in area studies on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in management problems, and additional credit in area studies on the basis of institutional evaluation. NOTE: Add credit for the specific foreign language in accordance with the recommendation in Volume 4 of the Guide to the Evaluation of Educational Experiences in the Armed Services (11/77).

MOS-352C-001

Traffic Analysis Technician

352C0

Exhibit Dates: 1/81–Present.

Career Pattern

NOTE: This MOS was formerly designated 982A. May have progressed to Traffic Analysis Technician from MOS 98C (Electronic Warfare/Signal Intelligence Analyst).

Description

Manages personnel and technical equipment engaged in intercepting, decoding, and analyzing communication traffic for content of possible intelligence value; establishes priorities of intercept missions for acquisition of desired traffic; plans, organizes, and coordinates activities; reviews data obtained in the traffic intercept process for accuracy and relevance; prepares and transmits information reports; advises commanders and staff officers on matters concerning traffic analysis and use of the data.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in personnel management and training and 3 for management electives; if rank was CW2, 2 semester hours for field experience in management; if rank was CW3, 4 semester hours for field experience in manangement; if rank was CW4, 6 semester hours for field experience in management (8/78).

MOS-352D-001

Emitter Location/Identification Technician

352D0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated MOS 986A. May have progressed to Emitter Location/Identification Technician from MOS 05D (Electronic Warfare/Signal Intelligence Emitter Identifier/Locator).

Description

Manages personnel and technical equipment assets engaged in establishment and employment of Emitter Location/Identification System (ELI) activities in a communications-electronic intelligence environment; supervises maintenance, calibration, adjustment, and testing of equipment; operates or supervises operation of radio (CW, voice, teletype), and cryptographic equipment; ensures that personnel follow established direction-finding communications nets; advises commanders or staff officers on the employment, deployment, and utilization of ELI assets; analyzes collected information and converts to usable intelligence for use of commanders.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic mathematics and 3 in personnel supervision; if served as platoon leader, 3 semester hours in principles of administration. In the upper-division baccalaureate category, 3 semester hours in personnel management and training, 3 in management problems, and 3 for management electives; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 semester hours for field experience in management; if rank was CW4, 6 semester hours for field experience in management (8/78).

MOS-352G-001

Voice Intercept Technician

352G0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated 988A. May have progressed to Voice Intercept Technician from MOS 98G (Electronic Warfare/Signal Intelligence Voice Interceptor).

Description

Manages and plans personnel and equipment engaged in the intercept and analysis of voice communications; supervises installation of and provides operational direction to voice intercept and electronic warfare activities; supervises the calibration, adjustment, and testing of voice intercept and standard communications equipment; applies knowledge of wave propagation antenna and electronic theory to ensure proper antenna emplacement and orientation; reads, writes, comprehends, transcribes, and translates at least one foreign language; supervises intercept, transcription, and translation of voice communications in a foreign language; advises commanders and staff officers on the employment and utilization of voice intercept and electronic equipment and personnel; conducts training programs for voice intercept and electronic countermeasures personnel; defines and advises the commander on language problem areas.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision; if served as platoon leader, 3 semester hours in principles of administration. In the upper-division baccalaureate category, 6 semester hours for humanities or social science electives, 3 in personnel management and training, 3 in management problems, and 3 for management electives; if rank was CW2, 2 semester hours for field experience in management; if rank was CW3, 4 semester hours for field experience in management; if rank was CW4, 6 semester hours for field experience in management. NOTE: Add credit for the specific foreign language(s) by referring to the recommendation in Volume 4 of the Guide to the Evaluation of Educational Experiences in the Armed Services and modifying the recommendation on the basis of institutional evaluation (8/77).

MOS-352H-001

Morse Intercept Technician

352H0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated MOS 984A. May have progressed to Morse Intercept Technician from MOS 05H (Electronic Warfare/Signal Intelligence Morse Interceptor).

Description

Manages personnel and technical equipment in establishment and employment of Morse intercept and electronic warfare activities; plans, coordinates, and supervises personnel engaged in these operations; may supervise up to several hundred personnel; establishes work schedules and priorities; evaluates performance of subordinates; supervises calibration, adjustment, and testing of Morse intercept equipment; conducts training programs for equipment operators; knows antenna theory and wave propogation characteristics; supervises application of message analysis; supervises cryptanalysis principles and procedures.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision; if served as platoon leader, 3 semester hours in principles of administration. In the upper-division baccalaureate category, 3 semester hours in personnel management and training, 3 in management problems, and 3 for management electives; if rank was CW2, 2 semester hours for field experience in management; if rank was CW3, 4 semester hours for field experience in management; if rank was CW4, 6 semester hours for field experience in management (8/78).

MOS-352J-001

Emanations Analysis Technician

352J0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated 983A. May have progressed to Emanations Analysis Technician from MOS 98J, Electronic Warfare/Signal Intelligence Noncommunications Interceptor.

Description

Manages personnel and technical equipment assets engaged in intercept and analysis of noncommunications electromagnetic emissions; plans, organizes, and supervises establishment and operation of facilities and units engaged in electronic intelligence activities; selects sites for tactical noncommunications intercept/analysis equipment; ensures that electronic intelligence operators and analysts follow established procedures, techniques, and analytical procedures in the intercept and interpretation of electromagnetic signals; advises operators and analysts; conducts training programs for noncommunications intercept operators/analysts; may serve as a service school instructor; may serve as platoon leader.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision; if served as platoon leader, 3 semester hours in principles of administration. In the upper-division baccalaureate category, 3 semester hours in personnel management and training, 3 in management problems, and 3 in a management elective; if rank was CW2, 2 semester hours for field experience in management; if rank was CW3, 4 semester hours for field experience in management; if rank was CW4, 6 semester hours for field experience in management (9/88).

MOS-352K-001

Non-Morse Intercept Technician

352K0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated MOS 985A. May have progressed to Non-Morse Intercept Technician from MOS 05K (Electronic Warfare/Signal Intelligence Non-Morse Interceptor).

Description

Manages personnel and technical equipment in establishment and employment of non-Morse intercept and electronic warfare activities; plans, coordinates, and supervises personnel engaged in these operations; may supervise up to several hundred personnel; establishes work schedules and priorities; evaluates performance of subordinates; supervises calibration, adjustment, and testing of various electronic intercept equipment including radios and printers; conducts training programs for equipment operators; knows antenna theory and wave propagation characteristics; supervises application of message analysis; supervises cryptanalysis principles and procedures.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision; if served as platoon leader, 3 semester hours in principles of administration. In the upper-division baccalaureate category, 3 semester hours in personnel management and training, 3 in management problems, and 3 for management electives; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 semester hours for field experience in management (8/78).

MOS-353A-001

Intelligence and Electronic Warfare
(IEW) Equipment Technician)

353A0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated 285A. May have progressed to Intelligence and Electronic Warfare Equipment Technician from andy of the following MOS's: 33M, 33P, 33Q, 33R, 33T, and 33V.

Description

Manages personnel and equipment involved in installing, maintaining, repairing, and modifying complex electronic warfare intercept, and related ancillary electronics equipment; applies theory and knowledge of functioning of vacuum tubes, transistors, and other solid-state devices, and digital techniques; applies techniques of circuit analysis and performance measurement; keeps maintenance records; supervises requisitioning of supplies and spare parts; recommends equipment modifications; instructs repair personnel on troubleshooting and repair techniques and on specialized tests and procedures; estimates repair requirements and costs; prepares and implements maintenance schedules; advises commander on use of electronic systems equipment; may serve as a service school instructor.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in shop management, 3 in maintenance management, 3 in administrative office management, 3 in business communications, 3 in recordkeeping, 3 in computer and data processing concepts, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in management problems, 3 for field experience in management, 3 in education electives (instruction and counseling) and additional credit in leadership and supervision on the basis of institutional evaluation; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (5/78).

MOS-361A-001

Fire Distribution Systems Repair
Technician

361A0

Exhibit Dates: 9/62–3/78. NOTE: Effective 4/78, MOS 361A was discontinued and its functions were incorporated into MOS 287A, Data Processing Systems Repair Technician. Use exhibit MOS-287A-001.

MOS-401A-001

Airdrop Equipment Technician
(Airdrop Equipment Repair
Technician)
(Aerial Equipment Repair Technician)

401A0

Exhibit Dates: 6/61–12/78. (Effective 1/88, the MOS designator 401A was changed to 921A; see exhibit MOS-921A-001.)

Career Pattern

NOTE: This MOS was formerly designated MOS 461A. May have progressed to Airdrop Equipment Technician from MOS 43E (Parachute Rigger).

Description

Supervises preparation of equipment for airdrop, airdrop of supplies and equipment, parachute packing, and repair of parachutes and associated equipment; plans and organizes activities for repair of airdrop equipment and establishes rigging sites to support airborne operations; instructs personnel in airdrop procedures; prescribes procedures used in adjustment, care, and preservation of parachutes and other support equipment tools and machinery; provides technical guidance and serves as liaison to commanders; provides technical assistance to the personnel responsible for life cycle management of items including design, research and development, testing, supply management, and classification; responsible for providing serviceable and safe parachutes and equipment to units engaged in parachute jumping and related airdrop operations; supervises repacking of parachutes in use; coordinates loading of equipment and supplies into aircraft and participates in joint airdrop load inspections; may serve as a service school instructor; knows maintenance record keeping and inventory control procedures.

Recommendation

In the lower-division baccalaureate/associate degree category, 2 semester hours in communication skills (oral). In the upper-division baccalaureate category, 3 semester hours in personnel management and 3 for management electives; if rank was CW2, 2 semester hours for field experience in management; if rank was CW3, 4 semester hours for field experience in management; if rank was CW4, 6 semester hours for field experience in management; if duty assignment was platoon leader, additional credit in leadership and supervision on the basis of institutional evaluation (5/78).

MOS-411A-001

Ammunition Technician

411A0

Exhibit Dates: 1/65–12/87. (Effective 1/88, the MOS designator 411A was changed to 910A; see exhibit MOS-910A-001.)

Career Pattern

May have progressed to Ammunition Technician from MOS 55B (Ammunition Specialist), MOS 55D (Explosive Ordnance Disposal Specialist), MOS 55X (Ammunition Inspector), or MOS 55Z (Ammunition Foreman).

Description

Manages personnel, equipment, supply, and facility assets for the receipt, storage, and issue of all classes of ammunition; plans, coordinates and supervises 50-150 personnel engaged in the requisitioning, receipt, inspection, surveillance, testing, maintenance, repair, modification, storage, issue, crating, packaging, transportation, and destruction of ammunition, missiles, rockets, explosive components, and non-nuclear warheads; plans for safe and efficient employment of munition and high explosives; conducts surveillance inspections and determines serviceability of conventional ammunition; monitors handling and storage of special ammunition; knows policies and procedures for technical escort of chemical, biological, and nuclear materials and radioactive wastes; provides technical assistance regarding conventional ammunition to field activities; interprets technical publications and trains enlisted specialists; classifies, evacuates, or determines disposition of captured or damaged ammunition; supervises load testing and calibration and use of ammunition test and handling equipment; participates in the investigation of accidents; prepares and reviews reports, including investigative reports; is familiar with military and civilian tariffs and the logistics of supply and transportation; insures compliance with safety and security regulations pertaining to ammunition and missiles; knows Occupational Safety and Health Act (OSHA) regulations and procedures; knows physiological effects of, protective measures against, and emergency and first aid procedures employed after exposure to toxic chemicals; knows firefighting procedures for conventional and special ammunition; plans and conducts safety programs for personnel handling ammunition and missiles; reports on problem areas related to accidents and changes to procedures for storing and handling hazardous chemicals; establishes and maintains control over ammunition stocks and insures accountability of munitions material; may serve as detachment commander, instructor at a formal service school, advisor to members of allied armies, or advisor to research, development, tests, and evaluation activities.

Recommendation

In the lower-division baccalaureate/associate degree category, 8 semester hours in physical science, 5 in industrial safety, 3 in basic electronics, 3 in personnel supervision, 3 in inventory management, 3 in report writing, 2 in maintenance shop record keeping, 2 in security practices, and additional credit in basic chemistry, chemistry of explosives, basic physics, nuclear physics, and public speaking/communication on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in personnel management and training, 3 in management electives, and 3 in logistics management; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management; if duty assignment was platoon leader, credit in leadership and supervision on the basis of institutional evaluation (5/77).

MOS-420A-001

Military Personnel Technician

420A0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated 711A. May have progressed from any enlisted MOS in Career Management Field 71.

Description

Supervises administrative activities related to personnel management, including office organization and operation, counseling of personnel, and personnel records; develops input for and interprets output from automated systems supporting the personnel function; oversees the selection and use of office equipment, including typewriters, calculators, and word processing equipment; supervises military and civilian personnel engaged in specialized administrative and personnel management duties; assists in hiring and evaluating civilian employees; participates in personnel selection, duty assignment, evaluation, and training to assure full utilization of personnel; counsels personnel from a wide variety of backgrounds, assisting them with career and personal decisions; makes referrals of individuals with problems to the chaplain, Judge Advocate General, medical personnel, or other appropriate agency, if necessary; initiates and prepares corespondence, messages, and reports; interprets regulations; makes decisions based on a variety of information sources and requirements; processes changes to manpower documents.

Recommendation

In the vocational certificate category, 3 semester hours in administrative office management, 3 in business communications, 3 in records management, 3 in introduction to computer concepts, and 6 for field experience in management. In the lower-division baccalaureate/associate degree category, 3 semester hours in administrative office management, 3 in business communications, 3 in records management, 3 in introduction to computer concepts, 3 in personnel supervision, and 6 for field experience in management. In the upper-division baccalaureate category, 3 semester hours in personnel management and 3 in counseling; if rank was CW2, 3 additional semester hours for field experience in personnel management and counseling; if rank was CW3, 6 additional semester hours for field experience in personnel management and counseling; if rank was CW4, 9 additional semester hours for field experience in personnel management and counseling; if duty assignment was platoon leader, additional credit in leadership and supervision on the basis of institutional evaluation. In the graduate degree category, credit for an internship in personnel management and counseling on the basis of institutional evaluation (10/77).

MOS-420C-001

BANDMASTER

420C0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated MOS 031A. Normally progresses to Bandmaster from an Army enlisted bandsman (currently any MOS in Career Management Field 97, Band, which includes MOS 02B through MOS 02Z), completing from one to three preparatory programs of instruction.

Description

Possesses skill and understanding in applied music ensemble playing basic music theory, planning concerts, conducting, etc.; acquires basic understanding of the techniques of all wind and percussion instruments; has extensive and practical experience in arranging music for bands and jazz ensembles and, in some cases, choral groups; conducts band literature equivalent to that included in upper-division and graduate courses; acquires a thorough grasp of military marching evolutions, commands, and procedure; is responsible for band administration and the supervision of the musical development of band units; directs personnel, administration, supply (uniforms, instruments, and publications), and repair and maintenance activities of band units; has fiscal control of band units; routinely serves as a company commander; may serve as an instructor in the Army element of the School of Music.

Recommendation

In the lower-division baccalaureate/associate degree category, 16 semester hours in music theory (includes harmony, sight singing, ear training, and keyboard), 8 in applied music, 4 in performing ensemble, 3 in woodwind, brass, and percussion techniques, and 3 in personnel supervision, and additional credit in applied music on the basis of institutional evaluation. In the upper-division baccalaureate category, 6 semester hours in arranging, 4 in performing ensemble, 6 in conducting, 2 in marching band techniques, and 3 for field experience in management, and additional credit in introduction to management on the basis of institutional evaluation; IF the duty assignment was an instructor in the army element of the school of music, credit in teaching methods in music, education materials, evaluation and testing in education, and for a practicum in education on the basis of institutional evaluation; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management. In the graduate degree category semester hours in conducting, 3 in band administration, and 2 in performing ensemble, and additional credit in educational administration on the basis of institutional evaluation (4/77).

MOS-420D-001

CLUB MANAGER

420D0

Exhibit Dates: 1/88–Present.

Career Pattern

May have progressed to warrant officer Club Manager from enlisted MOS 00J (Club Manager).

Description

Manages the operation of U.S. Army or joint service clubs, club systems, hotels, or similar activities involving up to several thousand members; supervises all business operations of the activities, including financial operations, beverage and food services, membership activities, and social and recreational activities; knows regulations and policies governing financial management and accountability for property and funds, including in-depth knowledge of internal controls, budgeting, credit card operations, and financial statements and reports; knows fundamentals of business law and contractual relationships; knows military and civilian protocol and social customs; monitors operations to insure control of costs, waste, pilferage, inventory rotation, and accountability; has knowledge of appropriate laws, codes, and regulations; supervises purchase, storage, preparation, and service of food and beverages; monitors club operations to insure control of costs, inventory, accountability, and receipts; completes required reports; supervises catering of social functions, parties, and special events; selects and recommends contracting for entertainment groups; enforces safety requirements, club rules of conduct and dress codes; supervises, directs, and trains subordinates and civilian employees.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in report writing, 3 in communication skills (oral), 3 in food and beverage management, 3 in food and labor cost control systems, 3 in personnel supervision, and 3 in office practices. In the upper-division baccalaureate category, 3 semester hours in hotel, motel, or club management, and 3 in personnel management and training; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (11/77).

MOS-421A-001

ARMAMENT REPAIR TECHNICIAN

421A0

Exhibit Dates: 2/48–Present.

Career Pattern

NOTE: This MOS was formerly designated MOS 4808. May have progressed to Armament Repair Technician from an enlisted Small Arms Repairman (MOS 45B), Artillery Repairman (MOS 45L), Tank Turret Repairman (MOS 45K), or Armament Maintenance Foreman (MOS 45Z).

Description

Manages activities and personnel engaged in the maintenance and repair of small arms, artillery and armor weapons, and crew-served weapons; oversees the inspection, repair, replacement, and modification of armament materiel; supervises inspections and check-out procedures; directs shop operations including workflow planning, requisitioning parts and supplies, inspecting maintenance procedures, and providing technical assistance to maintenance personnel in artillery or armor units; must know nomenclature design, operation, and employment of the Army's current inventory of field artillery weapons, armor weapons, and small arms; trains enlisted specialists in the use of shop equipment and power tools, in inspection and test procedures, and in the disassembly, repair, and adjustment of armament material; uses technical publications and interprets specifications; must be able to use automated and manual systems for supply of technical publications, tools, repair parts, and related maintenance supplies; must know regulations and procedures pertaining to physical security, accountability, and shipment of weapons; may serve as chief of a team, section, or platoon in field activities; may serve as instructor in a formal training school.

Recommendation

In the vocational certificate category, 3 semester hours in the use and care of hand and power tools. In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 3 for field experience in management, 3 in industrial/human relations, 3 in maintenance/shop management and record keeping, 3 in use and care of hand and power tools, and 1 in industrial safety. In the upper-division baccalaureate category, 3 semester hours in personnel management and training (3/77).

MOS-441A-001

REPAIR SHOP TECHNICIAN
(ORDNANCE SHOP TECHNICIAN)

441A0

Exhibit Dates: 6/61-12/87. (Effective 1/88, the MOS designator 441A was changed to 914A; see exhibit MOS-914A-001.)

Career Pattern

May have progressed to Repair Shop Technician from MOS 43M (Fabric Repair Specialist), MOS 44B (Metal Worker), MOS 44E (Machinist), MOS 55X (Ammunition Inspector), MOS 55Z (Ammunition Foreman), MOS 63F (Recovery Specialist), MOS 63J (Quartermaster Equipment Repairman), or MOS 63Z (Mechanical Maintenance Supervisor).

Description

Supervises set-up, maintenance, and operation of machine tools used to make or repair metal parts, mechanisms, tools or machinery by application of knowledge of mechanics, shop mathematics, metal properties, and layout machinery procedures; manages service section shop engaged in metalworking, automotive component repair, and the allied trades; supervises personnel who operate general or specialized metalworking machines, such as lathes and turning machines; supervises automotive body repair and painting, glass, plastic, machine, canvas, leather, welding, and wordworking shop activities, and the recovery of all types of wheeled or track vehicles or equipment; controls work quality by instruction of subordinates and inspection of work in progress and completed work; interprets regulation orders, and specifications and demonstrates correct procedures; plans shop layout; conducts training and orientation of personnel in technical procedures and equipment innovations; directs shop operations to include supply, scheduling, workflow and personnel management; uses automated and manual systems in managing supplies of repair parts, tools, fuel, and technical publications; prepares, implements, and maintains standing operating procedures for management of maintenance activities; may be employed as a service school instructor; performs other officer-level duties required by mission of the unit to which assigned.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in shop management, 3 in maintenance management, 3 in administrative office management, 3 in business communications, 3 in record keeping, 3 in computer and data processing concepts, and 3 personnel supervision. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in management problems, 3 for field experience in management, 3 in education electives (instruction and counseling) and additional credit in leadership and supervision on the basis of institutional evaluation; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (5/78).

MOS-461A-001

AERIAL EQUIPMENT REPAIR TECHNICIAN

461A0

See exhibit MOS-401A-001.

MOS-500A-001

MARINE DECK OFFICER

500A0

Exhibit Dates: 6/61-6/87. (Effective 7/87, the MOS designator 500A was changed to 880A; see exhibit MOS-880A-001.)

Career Pattern

May have progressed to Marine Deck Officer from MOS 57H (Terminal Operations Coordinator), MOS 61B (Watercraft Operator), MOS 61D (Amphibian Operator), or MOS 61Z (Marine Senior Sergeant).

Description

Commands Army watercraft vessels on oceans, bays, sounds, lakes, and coastal waters; is responsible for proper operation and safety of the vessel, including discipline of the crew and seaworthiness of the vessel; must know maritime law and have a working knowledge of international and inland rules of the road; is proficient in seamanship and ship handling; operates all deck machinery and equipment, including ground tackle, cargo gear, lifeboat, raft, firefighting and lifesaving equipment, emergency steering systems, and damage control; qualified to control destination of vessel, using all navigational aids, including electronic equipment (radio direction finders, radar, and fathometers); conducts radio and visual communication with government and commercial vessels and and shore stations, including flashing light, semaphore, and flaghoist signalling, using international procedures when required; knows cargo planning and stowage procedures and techniques of loading and securing cargo to insure seaworthiness; is proficient in celestial navigation; uses navigational aids, including charts, compasses, sextants, lighthouse, and light buoys, both at sea and when approaching shore; hold qualifying license for command position, validated by the Marine Qualification Board of the Army; if holding a masters license, must also hold radar operations qualifications.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 3 for field experience in management, 3 in record keeping, and 3 in principles of management. In the upper-division baccalaureate category, 3 semester hours in management electives, 3 in management problems, 3 for field experience in management, and 2 in human relations; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3; 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (9/79).

MOS-510A-001

MARINE ENGINEERING OFFICER

510A0

Exhibit Dates: 6/61-6/87. (Effective 7/87, the MOS designator 510A was changed to 881A; see exhibit MOS-881A-001.)

Career Pattern

May have progressed to Marine Engineering Officer from MOS 61C (Marine Engineer) or MOS 61E (Amphibian Engineer).

Description

Supervises the operation, maintenance, repair and overhaul of marine power plants, propulsion systems, heating and ventilating systems and other mechanical, plumbing, and electrical equipment in ships, docks, and marine-port facilities; inspects ship's machinery to determine compliance with maintenance standards or to determine extent, cost, and nature of repairs required; provides instruction in the proper maintenance and repair of machinery and shipboard equipment; monitors performance on repair contracts for marine repair and overhaul; supervises loading of fuel, water and ballast; maintains and records work performed and prepares maintenance reports; when assigned as Marine Engineering Technician or Marine Inspector, must be able to perform vessel inspections and preparation and processing of repair work orders; may serve as a school instructor.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 2 for field experience in management, 3 in record keeping, and 3 in principles of management. In the upper-division baccalaureate category, 3 semester hours in management electives, 3 in management problems, and 2 for field experience in management; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (9/79).

MOS-521A-001

UTILITIES OPERATION AND MAINTENANCE TECHNICIAN
(UTILITIES MAINTENANCE TECHNICIAN)

521A0

See exhibit MOS-310A-001.

MOS-550A-001

LEGAL ADMINISTRATOR

550A0

Exhibit Dates: 1/88-Present.

Career Pattern

NOTE: This MOS was formerly designated 713A. May have progressed to Legal Administrator from MOS 71D Legal Specialist), or MOS 71E (Court Reporter). Clerk) or MOS 71E (Court Reporter).

Description

Performs the duties of a paralegal as well the duties of a legal administrator; manages the office of the Staff Judge Advocate or the headquarters exercising general court-martial jurisdiction; analyses legal and administrative documents, claims, and records of court-martial and non-judicial punishment; drafts documents dealing with civil matters, such as wills, bills of sale, and separation and support agreements; interprets civil statutes and Army regulations governing the administration of military justice, contracts, and the procurement program; provides technical supervision to unit legal personnel and office staff; issues orders appointing members of courts, boards, and committees; receives, processes, and authenticates official technical correspondence and makes referrals to attorneys or to other agencies when required; maintains law and administrative libraries; researches cases and other references to support legal, administrative, or military decisions; maintains statistical information; participates in manpower surveys; acts as office security manager; supervises military and civilian personnel; is directly responsible for office financial and budgetary matters; if qualified as court reporter, records legal proceedings by dictation for later transcription.

Recommendation

In the vocational certificate category, 3 semester hours in legal terminology; if qualified as a court reporter, 8 additional semester hours in machine shorthand, 6 in typewriting, 3 in machine transcription, 3 in introduction to court reporting, and 3 in business communications. In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of supervision, 3 in principles of financial budgeting, 3 in legal terminology, 3 in law office management, 3 in trial preparation and procedures, 3 in legal research, 3 in paralegalism (duties and responsibilites of the legal assistant, code of ethics, principles of conduct, relationship to the attorney, etc.); if qualified as a court reporter, 8 additional semester hours in machine shorthand, 6 in typewriting, 3 in machine transcription, 3 in introduction to court reporting, and 3 in business communications. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in management electives, and 3 in legal environment and processes; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (10/77).

MOS-561B-001

HARBORMASTER/PILOT

561B0

Exhibit Dates: 6/61-3/78. NOTE: Effective 4/78, MOS 561B was discontinued and its functions were incorporated into MOS 500A, Marine Deck Officer. Use exhibit MOS-500A-001.

MOS-561C-001

VESSEL MASTER, 750 TON VESSEL

561C0

Exhibit Dates: 6/61-3/78. NOTE: Effective 4/78, MOS 561C was discontinued and its functions were incorporated into MOS 500A, Marine Deck Officer. Use exhibit MOS-500A-001.

MOS-561D-001

MASTER, 500 TON VESSEL

561D0

Exhibit Dates: 6/61-3/78. NOTE: Effective 4/78, MOS 561D was discontinued and its functions were incorporated into MOS 500A, Marine Deck Officer. Use exhibit MOS-500A-001.

MOS-561E-001

MASTER, 250 TON VESSEL

561E0

Exhibit Dates: 6/61-3/78. NOTE: Effective 4/78, MOS 561E was discontinued and its functions were incorporated into MOS 500A, Marine Deck Officer. Use exhibit MOS-500A-001.

MOS-562B-001

CHIEF ENGINEER, UNLIMITED

562B0

Exhibit Dates: 6/61-3/78. NOTE: Effective 4/78, MOS 562B was discontinued and its functions were incorporated into MOS 510A, Marine Engineering Officer. Use exhibit MOS-510A-001.

MOS-562C-001

CHIEF ENGINEER, 1800 HORSEPOWER

562C0

Exhibit Dates: 6/61-3/78. NOTE: Effective 4/78, MOS 562C was discontinued and its functions were incorporated into MOS 510A, Marine Engineering Officer. Use exhibit MOS-510A-001.

MOS-562D-001

CHIEF ENGINEER, 1250 HORSEPOWER

562D0

Exhibit Dates: 6/61-3/78. NOTE: Effective 4/78, MOS 562D was discontinued and its functions were incorporated into MOS 510A, Marine Engineering Officer. Use exhibit MOS-510A-001.

MOS-562E-001

CHIEF ENGINEER, 600 HORSEPOWER

562E0

Exhibit Dates: 6/61-3/78. NOTE: Effective 4/78, MOS 562E was discontinued and its functions were incorporated into MOS 510A, Marine Engineering Officer. Use exhibit MOS-510A-001.

MOS-600A-001

PHYSICIAN ASSISTANT

600A0

Exhibit Dates: 1/88-Present.

Career Pattern

NOTE: This MOS was formerly designated MOS 011A. May have progressed to Physician Assistant from any of the following MOS's: 91B, 91C, 91D, 91F, 91G, 91H, 91J, 91L, 91N, 91P, 91Q, 91S, 91U, 91V, 91W, 91Y, 92B, or 92E; has from 3 to 10 years of clinical experience prior to appointment as a Physician Assistant.

Description

Working under the guidance and supervision of a physician, provides general medical care for the sick and injured; makes diagnoses of diseases, disorders, and injuries; applies preventive, diagnostic, and therapeutic medical and surgical procedures; obtains and records medical data and case histories on prescribed forms; recognizes potential zoonotic and food-borne disease problems. NOTE: Appointment to Warrant Officer as a Physician Assistant is based upon satisfactory completion of the two-year Physician Assistant program of instruction at the Army's Academy of Health Sciences, Fort Sam Houston, Texas. This program consists of 52 weeks of didactic instruction and 52 weeks of clinical practicum. Didactic instruction is provided in human anatomy and physiology, clinical physiology, inorganic chemistry, biological chemistry, community health, mental health, pharmacology, clinical medicine, clinical surgery, pediatrics, pathology and laboratory practices, preventive medicine methods and practices, and medical and surgical procedures. Practica of either four weeks or six weeks duration are taken in the following clinics: obstetrics/gynecology, pediatric, EENT (eye, ear, nose and throat), neuro-psychiatric, dermatology, orthopedic, surgical medicine; clinical practices are also taken in preventive medicine, ambulatory care, and laboratory service.

Recommendation

In the upper-division baccalaureate category, 60 semester hours in physician assisting; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (6/77).

MOS-621A-001

ENGINEER EQUIPMENT REPAIR
TECHNICIAN

621A0

Exhibit Dates: 6/61-12/87. (Effective 1/88, the MOS designator 621A was changed to 213A; see exhibit MOS-213A-001.)

Career Pattern

May have progressed to Engineer Equipment Repair Technician from MOS 52C (Power Pack Specialist), MOS 52D (Power Generation Equipment Repairman), MOS 62B (Construction Equipment Repairman), or MOS 62C (Engineer Missile Equipment Specialist).

Description

Supervises personnel engaged in maintenance of engineer equipment; analyzes malfunctions and supervises minor repair and adjustment of engineer equipment utilized for power generation, earthmoving, shaping and compacting, lifting and loading, quarrying and rock crushing, asphalt/concrete mixing and surfacing, water purification, refrigeration and air conditioning, missile systems support, water gap crossing, transfer and engineer electronic application; supervises modification of equipment required by modification work orders; inspects incoming equipment to determine repair requirements; assigns work and inspects out-going equipment; establishes maintenance and repair schedules; establishes internal administrative procedures for procurement, storage, and distribution of tools, parts, and publications.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in shop management, 3 in maintenance management, 3 in administrative office management, 3 in business communications, 3 in record keeping, 3 in computer and data processing concepts, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in management problems, 3 for field experience in management, 3 in education electives (instruction and counseling) and additional credit in leadership and supervision on the basis of institutional evaluation; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (5/78).

MOS-630A-001

WHEEL VEHICLE MAINTENANCE TECHNICIAN (AUTOMOTIVE REPAIR TECHNICIAN)

630A0

Exhibit Dates: 6/61–12/87. (Effective 1/88, the MOS designator 630A was changed to 915A; see exhibit MOS-915A-001.)

Career Pattern

May have progressed to Automotive Repair Technician from MOS 63F (Recovery Specialist), MOS 63G (Fuel and Electrical Systems Repairman), MOS 63H (Automotive Repairman), MOS 63J (Quartermaster Equipment Repairman), or MOS 63Z (Mechanical Maintenance Supervisor).

Description

Supervises the maintenance and repair of wheel and track vehicles and accessory equipment; inspects vehicles; prepares, implements, and maintains procedures for management of maintenance activities; interprets regulations, technical manuals, and orders pertaining to automotive and accessory equipment maintenance functions; supervises personnel assigned to maintenance sections, motor pools, or similar activities; knows the theory, function, and operation of internal-combustion engines, and the assembly, nomenclature, check-out, inspection procedures, diagnostic tests, tuning, and other adjustments of automotive and nonengineer mechanical equipment, including electrical, mechanical, hydraulic, pneumatic, and hydropneumatic subsystems; knows use of special tools and test equipment; knows emergency maintenance methods including use of salvaged parts, reconditioning of equipment with hand tools, and substitution of parts and minor assemblies; uses automated and manual systems for supply of technical publications, tools, and repair parts; knows unit readiness reporting system; knows the use and functioning of automotive, metal, and tire shop equipment; diagnoses complex malfunctions and instructs personnel on isolation and repair of unusual malfunctions; may serve as a service school instructor; writes technical memoranda and other correspondence.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in shop management, 3 in maintenance management, 3 in administrative office management, 3 in business communications, 3 in record keeping, 3 in computer and data processing concepts, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in management problems, 3 for field experience in management, 3 in education electives (instruction and counseling) and additional credit in leadership and supervision on the basis of institutional evaluation; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (5/78).

MOS-630B-001

LIGHT SYSTEMS MAINTENANCE TECHNICIAN

630B0

Exhibit Dates: 9/84–Present. NOTE: The skills, competencies, and knowledge required to perform the duties of MOS 630B are comparable to those of MOS 630A. Use the recommendation in exhibit MOS-630A-001.

MOS-630C-001

FIELD ARTILLERY VEHICLE MAINTENANCE TECHNICIAN

630C0

Exhibit Dates: 9/84–Present. NOTE: The skills, competencies, and knowledge required to perform the duties of MOS 630C are comparable to those of MOS 630A. Use the recommendation in exhibit MOS-630A-001.

MOS-630D-001

ARMOR CAVALRY MAINTENANCE TECHNICIAN

630D0

Exhibit Dates: 9/84–Present. NOTE: The skills, competencies, and knowledge required to perform the duties of MOS 630D are comparable to those of MOS 630A. Use the recommendation in exhibit MOS-630A-001.

MOS-630E-001

SUPPORT/STAFF MAINTENANCE TECHNICIAN

630E0

Exhibit Dates: 9/84–Present. NOTE: The skills, competencies, and knowledge required to perform the duties of MOS 630E are comparable to those of MOS 630A. Use the recommendation in exhibit MOS-630A-001.

MOS-631A-001

AUTOMOTIVE MAINTENANCE TECHNICIAN

631A0

Exhibit Dates: 6/61–3/78. NOTE: Effective 4/78, MOS 631A was discontinued and its functions were incorporated into MOS 630A, Automotive Repair Technician. Use exhibit MOS-630A-001.

MOS-632A-001

AUTOMOTIVE REPAIR TECHNICIAN

632A0

Exhibit Dates: 6/61–3/78. NOTE: Effective 4/78, MOS 632A was discontinued and its functions were incorporated into MOS 630A, Automotive Repair Technician. Use exhibit MOS-630A-001.

MOS-640A-001

VETERINARY SERVICES TECHNICIAN

640A0

Exhibit Dates: Pending Evaluation. 1/88–Present.

MOS-670A-001

BIOMEDICAL EQUIPMENT REPAIR TECHNICIAN

670A0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated 202A. May have progressed to Biomedical Equipment Repair Technician from MOS 35U (Biomedical Equipment Specialist, Advanced).

Description

Organizes, supervises, and manages personnel and organizations responsible for installing, operating, maintaining, and repairing optical, dental, and medical technical diagnostic and treatment equipment; plans and develops detailed procedures for installation of instruments or equipment; develops internal operating procedures and manages allocated resources; anticipates and determines repair requirements, parts, and replacement of equipment; instructs on established maintenance techniques and operating procedures; advises on and supervises use of schematics, tube testing equipment, oscilloscopes, voltmeters, and other test equipment to isolate equipment malfunctions; inspects inoperative equipment, develops cost estimates for repair, and makes appropriate recommendations regarding repair or replacement; maintains records; distributes workload; makes final inspections; develops plans for design and layout of medical laboratory or equipment facilities; prepares drawings, sketches, notes, and materials for installation of equipment; may serve as a service school instructor; may perform duties in support of the procurement or research, development, test, and evaluation of medical equipment.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 3 in human relations, 3 in communication skills (oral and written), and 3 in record keeping. In the upper-division baccalaureate category, 6 semester hours in personnel management, 3 for field experience in management, 3 in management problems, 3 in introduction to management, 3 in public speaking, 3 in technical report writing, 3 in records administration, and 3 in office management; IF rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (11/79).

MOS-711A-001

MILITARY PERSONNEL TECHNICIAN
(PERSONNEL TECHNICIAN)
(UNIT PERSONNEL TECHNICIAN)

711A0

Exhibit Dates: 1/63-12/87. (Effective 1/88, the MOS designator 711A was changed to 420A; see exhibit MOS-420A-001.)

Career Pattern

May have progressed from any enlisted MOS in Career Management Field 71 (Administration), subfield 712 (Personnel); or MOS 75B (Personnel Administration Specialist or Unit Clerk), MOS 75C (Personnel Management Specialist), MOS 75D (Personnel Record Specialist), MOS 75E (Personnel Actions Specialist), or MOS 75Z (Personnel Senior Sergeant).

Description

Supervises administrative activities related to personnel management, including office organization and operation, counseling of personnel, and personnel records; develops input for and interprets output from automated systems supporting the personnel function; oversees the selection and use of office equipment, including typewriters, calculators, and word processing equipment; supervises military and civilian personnel engaged in specialized administrative and personnel management duties; assists in hiring and evaluating civilian employees; participates in personnel selection, duty assignment, evaluation, and training to assure full utilization of personnel; counsels personnel from a wide variety of backgrounds, assisting them with career and personal decisions; makes referrals of individuals with problems to the chaplain, Judge Advocate General, medical personnel, or other appropriate agency, if necessary; initiates and prepares corespondence, messages, and reports; interprets regulations; makes decisions based on a variety of information sources and requirements; processes changes to manpower documents.

Recommendation

In the vocational certificate category, 3 semester hours in administrative office management, 3 in business communications, 3 in records management, 3 in introduction to computer concepts, and 6 for field experience in management. In the lower-division baccalaureate/associate degree category, 3 semester hours in administrative office management, 3 in business communications, 3 in records management, 3 in introduction to computer concepts, 3 in personnel supervision, and 6 for field experience in management. In the upper-division baccalaureate category, 3 semester hours in personnel management and 3 in counseling; if rank was CW2, 3 additional semester hours for field experience in personnel management and counseling; if rank was CW3, 6 additional semester hours for field experience in personnel management and counseling; if rank was CW4, 9 additional semester hours for field experience in personnel management and counseling; if duty assignment was platoon leader, additional credit in leadership and supervision on the basis of institutional evaluation. In the graduate degree category, credit for an internship in personnel management and counseling on the basis of institutional evaluation (10/77).

MOS-712A-001

GENERAL STAFF ADMINISTRATIVE TECHNICIAN

712AO

Exhibit Dates: 1/63-6/87. (Effective 3/79, MOS 712A was discontinued and its duties were incorporated into MOS 711A, Personnel Administrative Technician, with SQI 'U'. Those individuals who held MOS 711AU from 3/79 - 8/84 should receive credit for MOS 712A. Effective 9/84, MOS 712A was reinstituted, and SQI 'U' was discontinued; in 7/87, MOS 712A was discontinued again.)

Career Pattern

Normally progresses to General Staff Administrative Technician from Warrant Officer MOS 711A, Personnel Technician, or through demonstration of outstanding skills in stenography in an enlisted MOS.

Description

Performs general and technical administrative duties in an office headed by lieutenant generals or higher; supervises the office clerical staff; develops office procedures; prepares and reviews correspondence; researches and prepares reports, presentations, and speeches; interprets regulations and directives; coordinates with other offices to establish and maintain formal and informal lines of communication; performs some public relations and communication duties, including dealing with news media; acts as protocol officer; when assigned in foreign countries advises command officers on area geography, culture, politics, and other social factors.

Recommendation

In the vocational certificate category, 6 semester hours in public relations, 3 in business communications, 3 in report writing, 3 in office procedures, 3 in human relations skills, 3 in recordkeeping, and 3 in office management; if the duty position requires stenography skills, additional credit in dictation and transcription and typing on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 6 semester hours in English communication, 6 in social science, 6 in public relations, 3 in business communications, 3 in report writing, 3 in office procedures, 3 in interpersonal communication skills, 3 in recordkeeping, and 3 in office management; if the duty position requires stenographer skills, additional credit in dictation and transcription and typing on the basis of institutional evaluation. In the upper-division baccalaureate category, 6 semester hours in social science electives and 3 in protocol. In the graduate degree category, credit in management and in methods of research on the basis of institutional evaluation (10/77).

MOS-713A-001

LEGAL ADMINISTRATOR
(LEGAL ADMINISTRATIVE TECHNICIAN)

713A0

Exhibit Dates: 1/65-12/87. (Effective 1/88, the MOS designator 713A was changed to 550A; see exhibit MOS-550A-001.)

Career Pattern

May have progressed to Legal Administrative Technician from an enlisted legal specialist, MOS 71D (Legal Clerk) or MOS 71E (Court Reporter).

Description

Performs the duties of a paralegal as well the duties of a legal administrator; manages the office of the Staff Judge Advocate or the headquarters exercising general court-martial jurisdiction; analyses legal and administrative documents, claims, and records of court-martial and non-judicial punishment; drafts documents dealing with civil matters, such as wills, bills of sale, and separation and support agreements; interprets civil statutes and Army regulations governing the administration of military justice, contracts, and the procurement program; provides technical supervision to unit legal personnel and office staff; issues orders appointing members of courts, boards, and committees; receives, processes, and authenticates official technical correspondence and makes referrals to attorneys or to other agencies when required; maintains law and administrative libraries; researches cases and other references to support legal, administrative, or military decisions; maintains statistical information; participates in manpower surveys; acts as office security manager; supervises military and civilian personnel; is directly responsible for office financial and budgetary matters; if qualified as court reporter, records legal proceedings by dictation for later transcription.

Recommendation

In the vocational certificate category, 3 semester hours in legal terminology; if qualified as a court reporter, 8 additional semester hours in machine shorthand, 6 in typewriting, 3 in machine transcription, 3 in introduction to court reporting, and 3 in business communications. In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of supervision, 3 in principles of financial budgeting, 3 in legal terminology, 3 in law office management, 3 in trial preparation and procedures, 3 in legal research, 3 in paralegalism (duties and responsibilites of the legal assistant, code of ethics, principles of conduct, relationship to the attorney, etc.); if qualified as a court reporter, 8 additional semester hours in machine shorthand, 6 in typewriting, 3 in machine transcription, 3 in introduction to court reporting, and 3 in business communications. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in management electives, and 3 in legal environment and processes; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (10/77).

MOS-721A-001

TELECOMMUNICATIONS TECHNICIAN

721A0

Exhibit Dates: 9/76-3/78. Effective 4/78, MOS 721A was discontinued and its functions were incorporated into MOS 290A, Telecommunications Technician. Use exhibit MOS-290A-001.

MOS-741A-001

DATA PROCESSING TECHNICIAN

741A0

Exhibit Dates: 6/61-12/87. (Effective 1/88, the MOS designator 741A was changed to

251A; see exhibit MOS-251A-001.)

Career Pattern

May have progressed to Data Processing Technican from MOS 74B (Card and Tape Writer), MOS 74D (ADPS Machine Operations Specialist), MOS 74F (Computer Programmer), or MOS 74Z (Data Processing NCO).

Description

Directs and coordinates production activities of electronic data processing element or unit including functional or machine design applications, programming, or operation of automatic data processing (ADP) equipment; analyzes, plans, and manages the development, test, evaluation, and modification of automatic data processing systems (ADPS); plans and coordinates activities of data processing personnel engaged in programming, wiring, and debugging programs; establishes work standards; supervises coding and machine processing of data and develops training programs; interprets policies, purposes, and goals of ADP activity to subordinates; participates in decisions regarding personnel staffing, allocation of ADP resources, and equipment acquisitions.

Recommendation

In the vocational certificate category, 3 semester hours in data processing principles, 3 in computer fundamentals, 3 in technical report writing, and credit in the appropriate computer languages on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in data processing principles, 3 in computer fundamentals, 3 in technical report writing, 3 in business communications, 3 in computer operating systems, 3 in computer facility management, 3 in personnel supervision, and additional credit in the appropriate computer languages on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in computer systems and program design, 3 in personnel management, and 3 in management electives; if rank was CW2, 2 semester hours for field experience in management; if rank was CW3, 4 semester hours for field experience in management; if rank was CW4, 6 semester hours for field experience in management (6/78).

MOS-741B-001

DATA PROCESSING TECHNICIAN, PCM

741B0

Exhibit Dates: 6/61–8/76. NOTE: In 1974, MOS 741B was discontinued and its functions were incorporated into MOS 741C, Data Processing Technician, ADPS; in 9/76, MOS 741C was incorporated into MOS 741A, Data Processing Technician. Use exhibit MOS-741A-001.

MOS-741C-001

DATA PROCESSING TECHNICIAN, ADPS

741C0

Exhibit Dates: 6/61–8/76. NOTE: Effective 9/76, MOS 741C was discontinued and its functions were incorporated into MOS 741A, Data Processing Technician. Use exhibit MOS-741A-001.

MOS-741D-001

DATA PROCESSING TECHNICIAN
PROGRAMMER

741D0

Exhibit Dates: 6/61–8/76. NOTE: Effective 9/76, MOS 741D was discontinued and its functions were incorporated into MOS 741A, Data Processing Technician. Use exhibit MOS-741A-001.

MOS-761A-001

GENERAL SUPPLY TECHNICIAN
(UNIT SUPPLY TECHNICIAN)

761A0

Exhibit Dates: 1/71–12/87. (Effective 1/88, the MOS designator 761A was changed to 920A; see exhibit MOS-920A-001.)

Career Pattern

May have progressed to General Supply Technician or Unit Supply Technician from any enlisted supply MOS (currently Career Management Field 76, Supply).

Description

Administers and manages the Army supply systems; maintains inventory control; supervises purchasing procedures, inventory handling and storage, recordkeeping, and stock control; is responsible for accounting and management of capital stock for units and installatons; knows manual and automated property-accounting procedures; develops and administers supply budgets for units or installations; forecasts and plans supply requirements; knows how to use automatic data processing in the supply areas; gives technical advice to subordinate unit and activity commanders; establishes procedures for requisitioning, receiving, storing, and issuing supplies; establishes and maintains formal and informal lines of communication with supply control, maintenance, and transportation units; with supported activities, may monitor or evaluate supply contractor's performance; prepares reports and correspondence.

Recommendation

In the vocational certificate category, 2 semester hours in keypunch, 3 in recordkeeping, 3 in technical report writing, 3 in inventory management, 3 in warehousing and storage, 3 in introduction to computer concepts, 3 in purchasing, 3 in material handling and safety, and 3 in principles of financial budgeting. In the lower-division baccalaureate/associate degree category, 3 semester hours in technical report writing, 3 in personnel supervision, 3 in inventory management, 3 in introduction to computer concepts, 3 in warehousing and storage, 3 in recordkeeping, 3 in purchasing, 3 in material handling, 3 in principles of financial budgeting, and 2 in keypunch. In the upper-division baccalaureate category, 3 semester hours in management electives and 3 in personnel management and training; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (10/77).

MOS-762A-001

SUPPORT SUPPLY TECHNICIAN

762A0

Exhibit Dates: 12/71–12/87. (Effective 1/88, the MOS designator 762A was changed to 920B; see exhibit MOS-920B-001.)

Career Pattern

May have progressed to Support Supply Technician from MOS 761A (General Supply Technician or Unit Supply Technician) or from MOS 76D (Material Supplyman), MOS 76J (Medical Supplyman), MOS 76P (Stock Control Supplyman), MOS 76S (Vehicle Material Supply Specialist), MOS 76V (Storage Supplyman), MOS 76W (Petroleum Supply Specialist), MOS 76X (Subsistence Supplyman), MOS 76Y (Unit/Organization Supplyman), or MOS 76Z (Senior Supply Sergeant).

Description

Administers and manages the Army supply system as it applies to maintenance support units, usually at overseas locations; supervises the requisitioning, storage, distribution, and accounting of repair parts and maintenance-related supply items; knows manual and automated property accounting procedures; knows fundamentals of data processing as they apply to inventory management; knows the interrelationship of supply, maintenance, and transportation; knows policies and procedures for and interprets regulations regarding crating, packaging, preserving, shipping, and storing materiel and equipment; uses supply catalogs, technical manuals, bulletins, modification work orders, and cross-reference lists in requisitioning, receiving, storing, issuing, and identifying equipment, supplies, and repair parts; forecasts the requirements of repair parts and maintenance-related supply items; develops and administers supply budgets; inspects supported units to insure that stock levels are adequate and within prescribed limits; makes inventory recommendations; provides technical guidance to supported unit personnel; develops operating procedures and performs administrative duties related to the supply activity; evaluates efficiency and effectiveness of supply operations; prepares correspondence and reports.

Recommendation

In the vocational certificate category, 2 semester hours in keypunch, 3 in recordkeeping, 3 in technical report writing, 3 in inventory management, 3 in warehousing and storage, 3 in introduction to computer concepts, 3 in purchasing, 3 in material handling and safety, and 3 in principles of financial budgeting. In the lower-division baccalaureate/associate degree category, 2 semester hours in keypunch, 3 in recordkeeping, 3 in technical report writing, 3 in inventory management, 3 in warehousing and storage, 3 in introduction to computer concepts, 3 in purchasing, 3 in material handling and safety, 3 in principles of financial budgeting, and 3 in personnel supervision, and additional credit in traffic management on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in management electives and 3 in personnel management and training, and additional credit in transportation and physical distribution on the basis of institutional evaluation; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (10/77).

MOS-811A-001

PHOTOMAPPING TECHNICIAN

811A0

Exhibit Dates: 6/61–12/87. (Effective 1/88, the MOS designator 811A was changed to 215A; see exhibit MOS-215A-001.)

Career Pattern

May have progressed to Photomapping Technician from MOS 81C, Cartographic Specialist.

Description

Supervises activities and personnel engaged in preparation and revision of military maps, charts, and orthophotographs; supervises technical and specialized photogrammetric and drafting procedures used in the preparation of detailed military maps, mosaics, overlays, and prints; must be proficient in photogrammetric techniques and principles and know topographic drafting operations and procedures; establishes work priorities; assigns duties; solves unusual problems in map making; prepares records and reports; writes technical reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 3 in plant management or office management, 3 in technical report writing, 3 in photogrammetry, and 3 in aerial photographic interpretation. In the upper-division baccalaureate category, 3 semester hours in personnel management and training, 3 for management electives, and 3 for field experience in management; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (6/78).

MOS-821A-001

SURVEY TECHNICIAN

821A0

Exhibit Dates: 6/61–Present.

Career Pattern

May have progressed to Survey Technician from MOS 82C (Field Artillery Surveyor), MOS 82D (Topographic Surveyor), or MOS 82E (Topographic Computer).

Description

Manages field-surveying activities and personnel in support of map-making and artillery survey requirements; supervises technical and special procedures employed by survey parties; knows land, highway, and topographic surveying procedures; prepares and interprets aerial photographs and topographic maps; knows basic survey methods such as traverse, triangulation, and resection; knows standard survey computing forms; knows methods for determining azimuth by astronomic or other means; uses astronomical publications such as star lists and ephemeris; coordinates the activities of crews engaged in land, highway, and topographic surveys; adapts survey methods to terrain conditions; converts grid and geographical coordinates; uses trigonometry in various calculations; interprets ground maps, aerial photographs, and map substitutes; insures exact location of points, distances, elevations, lines, areas, and contours in map making efforts; keeps accurate records of secured data; oversees proper use of surveying instruments; verifies accuracy of data obtained from surveys; makes appropriate calculations for map making, using reference tables, standard data, and mathematical formulas; establishes work priorities; designates survey parties and teams; solves complex and unusual problems encountered during survey operations; supervises accountability and maintenance of equipment; maintains records and reports of surveying activities; may serve as a service school instructor.

Recommendation

NOTE: Has knowledge of surveying or geodetic science equivalent to an associate degree (30-40 semester hours, depending on the general education requirements) in geometronic technology. In the upper-division baccalaureate category, 3 semester hours in introduction to management, 3 in management problems, 3 in quality control, 3 in records management, 3 in personnel management, 3 in supervision and leadership, and 2 for field experience in management; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management; and additional credit in geodetic or related sciences and cartography on the basis of institutional evaluation (11/77).

MOS-831A-001

MAP REPRODUCTION TECHNICIAN

831A0

Exhibit Dates: 6/61–8/76. NOTE: Effective 9/76, MOS 831A was discontinued and its functions were incorporated into MOS 833A, Reproduction Technician. Use exhibit MOS-833A-001.

MOS-832A-001

PSYOP REPRODUCTION TECHNICIAN

832A0

Exhibit Dates: 6/61–8/76. NOTE: Effective 9/76, MOS 832A was discontinued and its functions were incorporated into MOS 833A, Reproduction Technician. Use exhibit MOS-833A-001.

MOS-833A-001

REPRODUCTION TECHNICIAN

833A0

Exhibit Dates: 6/61–Present.

Career Pattern

May have progressed to Reproduction Technician from MOS 83E (Platemaker) or MOS 83F (Offset Pressman).

Description

Supervises fixed and mobile platoons and teams engaged in the reproduction of maps, related material, or psychological operations material; organizes activities, schedules production, and establishes procedures; oversees maintenance of equipment; supervises reproduction of topographic maps, pictomaps, overlays, and overprints; must know lithogrphic reproduction quality standards and color separation processes; prepares records and reports; writes technical reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 3 in production control, 3 in technical report writing, and 6 for field experience in graphic arts. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in management electives, and 2 for field experience in management; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (5/78).

MOS-841A-001

TERRAIN ANALYSIS TECHNICIAN

841A

Exhibit Dates: 2/80–12/87. (Effective 1/88, the MOS designator 841A was changed to 215D; see exhibit MOS-215D-001).

Career Pattern

May have progressed to Terrain Analysis Technician from MOS 81Q, Terrain Analyst, 81C, Cartographer, 82D, Topographic Surveyor, 93E, Meteorological Observer, or 96B, Intelligence Analyst.

Description

Supervises activities and personnel in identification, analysis, synthesis, production, and dissemination of terrain information; collects data; designs and develops graphics; identifies project needs; analyzes impact of weather; briefs commanders at all levels; develops automated and manual filing systems; supervises use and operation of computer-aided equipment; interacts with other units; understands elements of soils, vegetation, geology, weather hydrology, and their relationship to each other; prepares lengthy reports; presents oral briefings.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in public speaking and 3 in expository writing. In the upper-division baccalaureate category, 3 semester hours in advanced physical geography, 3 in geodesy, 3 in geographic information systems, 3 in human resource management, and 3-6 semester hours for field experience in management (7/88).

MOS-880A-001

MARINE DECK OFFICER

880A0

Exhibit Dates: 7/87–Present.

Career Pattern

NOTE: This MOS was formerly designated 500A. May have progressed to Marine Deck Officer from MOS 88K (Watercraft Operator.)

Description

Commands Army watercraft vessels on oceans, bays, sounds, lakes, and coastal waters; is responsible for proper operation and safety of the vessel, including discipline of the crew and seaworthiness of the vessel; must know maritime law and have a working knowledge of international and inland rules of the road; is proficient in seamanship and ship handling; operates all deck machinery and equipment, including ground tackle, cargo gear, lifeboat, raft, firefighting and lifesaving equipment, emergency steering systems, and damage control; qualified to control destination of vessel, using all navigational aids, including electronic equipment (radio direction finders, radar, and fathometers); conducts radio and visual communication with government and commercial vessels and and shore stations, including flashing light, semaphore, and flaghoist signalling, using international procedures when required; knows cargo planning and stowage procedures and techniques of loading and securing cargo to insure seaworthiness; is proficient in celestial navigation; uses navigational aids, including charts, compasses, sextants, lighthouse, and light buoys, both at sea and when approaching shore; hold qualifying license for command position, validated by the Marine Qualification Board of the Army; if holding a masters license, must also hold radar operations qualifications.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 3 for field experience in management, 3 in record keeping, and 3 in principles of management. In the upper-division baccalaureate category, 3 semester hours in management electives, 3 in management problems, 3 for field experience in management, and 2 in human relations; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (9/79).

MOS-881A-001

Marine Engineering Officer

881A0

Exhibit Dates: 7/87–Present.

Career Pattern

NOTE: This MOS was formerly designated 510A. May have progressed to Marine Engineering Officer from MOS 88L (Watercraft Engineer).

Description

Supervises the operation, maintenance, repair and overhaul of marine power plants, propulsion systems, heating and ventilating systems and other mechanical, plumbing, and electrical equipment in ships, docks, and marine-port facilities; inspects ship's machinery to determine compliance with maintenance standards or to determine extent, cost, and nature of repairs required; provides instruction in the proper maintenance and repair of machinery and shipboard equipment; monitors performance on repair contracts for marine repair and overhaul; supervises loading of fuel, water and ballast; maintains and records work performed and prepares maintenance reports; when assigned as Marine Engineering Technician or Marine Inspector, must be able to perform vessel inspections and preparation and processing of repair work orders; may serve as a school instructor.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 2 for field experience in management, 3 in record keeping, and 3 in principles of management. In the upper-division baccalaureate category, 3 semester hours in management electives, 3 in management problems, and 2 for field experience in management; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (9/79).

MOS-910A-001

Ammunition Technician

910A0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated 411A. May have progressed to Ammunition Technician from MOS 55B (Ammunition Specialist), MOS 55D (Explosive Ordnance Disposal Specialist), MOS 55G (Nuclear Weapons Specialist), MOS 55R (Ammunition Stock Control and Accounting Specialist), MOS 55X (Ammunition Inspector), or MOS 55Z (Ammunition Supervisor).

Description

Manages personnel, equipment, supply, and facility assets for the receipt, storage, and issue of all classes of ammunition; plans, coordinates and supervises 50-150 personnel engaged in the requisitioning, receipt, inspection, surveillance, testing, maintenance, repair, modification, storage, issue, crating, packaging, transportation, and destruction of ammunition, missiles, rockets, explosive components, and non-nuclear warheads; plans for safe and efficient employment of munition and high explosives; conducts surveillance inspections and determines serviceability of conventional ammunition; monitors handling and storage of special ammunition; knows policies and procedures for technical escort of chemical, biological, and nuclear materials and radioactive wastes; provides technical assistance regarding conventional ammunition to field activities; interprets technical publications and trains enlisted specialists; classifies, evacuates, or determines disposition of captured or damaged ammunition; supervises load testing and calibration and use of ammunition test and handling equipment; participates in the investigation of accidents; prepares and reviews reports, including investigative reports; is familiar with military and civilian tariffs and the logistics of supply and transportation; insures compliance with safety and security regulations pertaining to ammunition and missiles; knows Occupational Safety and Health Act (OSHA) regulations and procedures; knows physiological effects of, protective measures against, and emergency and first aid procedures employed after exposure to toxic chemicals; knows firefighting procedures for conventional and special ammunition; plans and conducts safety programs for personnel handling ammunition and missiles; reports on problem areas related to accidents and changes to procedures for storing and handling hazardous chemicals; establishes and maintains control over ammunition stocks and insures accountability of munitions material; may serve as detachment commander, instructor at a formal service school, advisor to members of allied armies, or advisor to research, development, tests, and evaluation activities.

Recommendation

In the lower-division baccalaureate/associate degree category, 8 semester hours in physical science, 5 in industrial safety, 3 in basic electronics, 3 in personnel supervision, 3 in inventory management, 3 in report writing, 2 in maintenance shop record keeping, 2 in security practices, and additional credit in basic chemistry, chemistry of explosives, basic physics, nuclear physics, and public speaking/communication on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in personnel management and training, 3 in management electives, and 3 in logistics management; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management; if duty assignment was platoon leader, credit in leadership and supervision on the basis of institutional evaluation (5/77).

MOS-911A-001

Military Physician's Assistant

911A0

See exhibit MOS-011A-001.

MOS-911A-002

Nuclear Weapons Technician

911A0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated 260A. May have progressed to Nuclear Weapons Technician from MOS 55D (Explosive Ordnance Disposal Specialist), MOS 55G (Nuclear Weapons Specialist), or 55Z (Ammunition Supervisor).

Description

Supervises the assembly, disassembly, inspection, test, repair, modification, maintenance, security and safety of nuclear warhead subsections, projectiles, munitions, components, and associated trainers; supervises from 8 to 40 personnel engaged in the maintenance calibration of the test and handling equipment associated with nuclear materials and weapons; determines the acceptability of nuclear warhead sections and subassemblies to assure their reliability through close supervision and personal inspection of maintenance operations, including electronic component replacement, nuclear material replacement, and proper storage and handling; ensures that equipment modifications are accomplished as announced; examines, interprets, rewrites, and disseminates technical materials for revised operating procedures, orders, technical publications, new test equipment, and new safety procedures pertinent to nuclear materials and weapons; enforces the compliance with weapons safety rules, OSHA regulations, security regulations, and unique safety requirements; performs emergency disarm and destruction of nuclear weapons, which involves handling nuclear materials and conventional high explosives; supervises all administrative duties associated with repair and maintenance, including requisitions for tools, parts, and supplies; manages personnel assignments; writes reports and maintains records; performs inspections; provides technical guidance and assistance to all support units, operating agencies and company commanders regarding all matters involving nuclear weapons.

Recommendation

In the vocational certificate category, 1 semester hour in electronic circuits, 3 in electronic measurements laboratory, 3 in explosives handling, 6 in nuclear materials handling, and 6 in nuclear security and safety procedures. In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic measurements laboratory, 6 in nuclear materials handling, 6 in nuclear security and safety procedures, 3 in personnel supervision and human relations, and 3 in technical writing and report preparation. In the upper-division baccalaureate category, 6 semester hours in management electives and 3 in education electives (8/79).

MOS-912A-001

Land Combat Support Missile Systems Technician

912A0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated 271A. May have progressed to Land Combat Support Missile Systems Technican from any of the following MOS's: 27B, 27E, 27F, 27G, 27L, 27M, 27N, and 27Z.

Description

Manages supply, equipment, facility, and personnel assets in the maintenance and repair of land combat support missile systems (short or medium-distance guided missile weapon systems), associated system-designed electronic test systems, and training devices; directs the activities of personnel engaged in isolating malfunctions occurring in electronic firing and guiding systems and components; analyzes complex malfunctions; supervises repair of and modifications to systems components, including guidance control systems, optical trackers, modulators, infrared sensors, conduct-of-fire trainers, missiles, and specialized test equipment; oversees supply management and preparation of work reports and maintenance records; forecasts supply requirements; insure that final inspections and checkout procedures are conducted; examines, interprets, and disseminates technical material, including orders, bulletins, and manuals; instructs enlisted specialists in troubleshooting techniques, diagnostic procedures, and the interpretation of tests on system components, circuits, and optical elements; knows techniques and safety procedures for handling explosive components; may serve as instructor at a formal training school.

Recommendation

In the vocational certificate category, 6 semester hours in electronics theory and laboratory and 2 in use of basic hand tools. In the lower-division baccalaureate/associate degree category, 6 semester hours in electronics theory and laboratory, 3 in personnel supervision, 3 for field experience in management, 3 in industrial/human relations, 2 in maintenance management, and 1 in technical report writing. In the upper-division baccalaureate category, 3 semester hours in personnel management and training and 3 in management electives (3/77).

MOS-913A-001

Armament Repair Technician

913A0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated MOS 421A. May have progressed to Armament Repair Technician from any of the following MOS's: 41C, 45B, 45D, 45E, 45G, 45K, 45L, 45N, 45T, or 45Z.

Description

Manages activities and personnel engaged in the maintenance and repair of small arms, artillery and armor weapons, and crew-served weapons; oversees the inspection, repair, replacement, and modification of armament materiel; supervises inspections and check-out procedures; directs shop operations including workflow planning, requisitioning parts and supplies, inspecting maintenance procedures, and providing technical assistance to maintenance personnel in artillery or armor units; must know nomenclature design, operation, and employment of the Army's current inventory of field artillery weapons, armor weapons, and small arms; trains enlisted specialists in the use of shop equipment and power tools, in inspection and test procedures, and in the disassembly, repair, and adjustment of armament material; uses technical publications and interprets specifications; must be able to use automated and manual systems for supply of technical publications, tools, repair parts, and related maintenance supplies; must know regulations and procedures pertaining to physical security, accountability, and shipment of weapons; may serve as chief of a team, section, or platoon in field activities; may serve as instructor in a formal training school.

Recommendation

In the vocational certificate category, 3 semester hours in the use and care of hand and power tools. In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision, 3 for field experience in management, 3 in industrial/human relations, 3 in maintenance/shop management and record keeping, 3 in use and care of hand and power tools, and 1 in industrial safety. In the upper-division baccalaureate category, 3 semester hours in personnel management and training (3/77).

MOS-914A-001

Allied Trades Technician

914A0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated 441A, Repair Shop Technician. May have progressed to Allied Trades Technician from MOS 44B (Metal Worker) or MOS 44E (Machinist).

Description

Supervises set-up, maintenance, and operation of machine tools used to make or repair metal parts, mechanisms, tools or machinery by application of knowledge of mechanics, shop mathematics, metal properties, and layout machinery procedures; manages service section shop engaged in metalworking, automotive component repair, and the allied trades; supervises personnel who operate general or specialized metalworking machines, such as lathes and turning machines; supervises automotive body repair and painting, glass, plastic, machine, canvas, leather, welding, and wordworking shop activities, and the recovery of all types of wheeled or track vehicles or equipment; controls work quality by instruction of subordinates and inspection of work in progress and completed work; interprets regulation orders, and specifications and demonstrates correct procedures; plans shop layout; conducts training and orientation of personnel in technical procedures and equipment innovations; directs shop operations to include supply, scheduling, workflow and personnel management; uses automated and manual systems in managing supplies of repair parts, tools, fuel, and technical publications; prepares, implements, and maintains standing operating procedures for management of maintenance activities; may be employed as a service school instructor; performs other officer-level duties required by mission of the unit to which assigned.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in shop management, 3 in maintenance management, 3 in administrative office management, 3 in business communications, 3 in record keeping, 3 in computer and data processing concepts, and 3 personnel supervision. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in management problems, 3 for field experience in management, 3 in education electives (instruction and counseling) and additional credit in leadership and supervision on the basis of institutional evaluation; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (5/78).

MOS-915A-001

Wheel Vehicle Maintenance Technician

630A0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated 630A. May have progressed from any of the following MOS's: 63B, 63D, 63E, 63F, 63G, 63H, 63N, 63S, 63T, 63Y, 63W, or 63Z.

Description

Supervises the maintenance and repair of wheel and track vehicles and accessory equipment; inspects vehicles; prepares, implements, and maintains procedures for management of maintenance activities; interprets regulations, technical manuals, and orders pertaining to automotive and accessory equipment maintenance functions; supervises personnel assigned to maintenance sections, motor pools, or similar activities; knows the theory, function, and operation of internal-combustion engines, and the assembly, nomenclature, check-out, inspection procedures, diagnostic tests, tuning, and other adjustments of automotive and nonengineer mechanical equipment, including electrical, mechanical, hydraulic, pneumatic, and hydropneumatic subsystems; knows use of special tools and test equipment; knows emergency maintenance methods including use of salvaged parts, reconditioning of equipment with hand tools, and substitution of parts and minor assemblies; uses automated and manual systems for supply of technical publications, tools, and repair parts; knows unit readiness reporting system; knows the use and functioning of automotive, metal, and tire shop equipment; diagnoses complex malfunctions and instructs personnel on isolation and repair of unusual malfunctions; may serve as a service school instructor; writes technical memoranda and other correspondence.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in shop management, 3 in maintenance management, 3 in administrative office management, 3 in business communications, 3 in record keeping, 3 in computer and data processing concepts, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in management problems, 3 for field experience in management, 3 in education electives (instruction and counseling) and additional credit in leadership and supervision on the basis of institutional evaluation; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (5/78).

MOS-915B-001

Light Track Systems Maintenance Technician

915B0

Exhibit Dates: 1/88–Present. NOTE: The skills, competencies, and knowledge required to perform the duties of MOS 915B are comparable to those of MOS 915A. Use the recommendation in exhibit MOS-915A-001.

MOS-915C-001

Field Artillery Systems Maintenance Technician

915C0

Exhibit Dates: 1/88–Present. NOTE: The skills, competencies, and knowledge required to perform the duties of MOS 915C are comparable to those of MOS 915A. Use the recommendation in exhibit MOS-915A-001.

MOS-915D-001

Armor/Cavalry Systems Maitenance Technician

915D0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated 630D. May have progressed from warrant officer MOS 915A (Wheel Vehicle Maintenance Technician), MOS 915B (Light Track Systems Maintenance Technician), or MOS 915C (Field Artillery Systems Maintenance Technician).

Description

Supervises the maintenance and repair of wheel and track vehicles and accessory equipment; inspects vehicles; prepares, implements, and maintains procedures for management of maintenance activities; interprets regulations, technical manuals, and orders pertaining to automotive and accessory equipment maintenance functions; supervises personnel assigned to maintenance sections, motor pools, or similar activities; knows the theory, function, and operation of internal-combustion engines, and the assembly, nomenclature, check-out, inspection procedures, diagnostic tests, tuning, and other adjustments of automotive and nonengineer mechanical equipment, including electrical, mechanical, hydraulic, pneumatic, and hydropneumatic subsystems; knows use of special tools and test equipment; knows emergency maintenance methods including use of salvaged parts, reconditioning of equipment with hand tools, and substitution of parts and minor assemblies; uses automated and manual systems for supply of technical publications, tools, and repair parts; knows unit readiness reporting system; knows the use and functioning of automotive, metal, and tire shop equipment; diagnoses complex malfunctions and instructs personnel on isolation and repair of unusual malfunctions; may serve as a service school instructor; writes technical memoranda and other correspondence.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in shop management, 3 in maintenance management, 3 in administrative office management, 3 in business communications, 3 in record keeping, 3 in computer and data processing concepts, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in management problems, 3 for field experience in management, 3 in education electives (instruction and counseling) and additional credit in leadership and supervision on the basis of institutional evaluation; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (5/78).

MOS-915E-001

Support/Staff Maintenance Technician

915E0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated 630E. May have progressed from warrant officer MOS 915A (Wheel Vehicle Maintenance Technician), MOS 915B (Light Track Systems Maintenance Technician), MOS 915C (Field Artillery Systems Maintenance Technician), or MOS 915D (Armor/Cavalry Systems Maintenance Technician).

Description

Supervises the maintenance and repair of wheel and track vehicles and accessory equipment; inspects vehicles; prepares, implements, and maintains procedures for management of maintenance activities; interprets regulations, technical manuals, and orders pertaining to automotive and accessory equipment maintenance functions; supervises personnel assigned to maintenance sections, motor pools, or similar activities; knows the theory, function, and operation of internal-combustion engines, and the assembly, nomenclature, check-out, inspection procedures, diagnostic tests, tuning, and other adjustments of automotive and nonengineer mechanical equipment, including electrical, mechanical, hydraulic, pneumatic, and hydropneumatic subsystems; knows use of special tools and test equipment; knows emergency maintenance methods including use of salvaged parts, reconditioning of equipment with hand tools, and substitution of parts and minor assemblies; uses automated and manual systems for supply of technical publications, tools, and repair parts; knows unit readiness reporting system; knows the use and functioning of automotive, metal, and tire shop equipment; diagnoses complex malfunctions and instructs personnel on isolation and repair of unusual malfunctions; may serve as a service school instructor; writes technical memoranda and other correspondence.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in shop management, 3 in maintenance management, 3 in administrative office management, 3 in business communications, 3 in record keeping, 3 in computer and data processing concepts, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in management problems, 3 for field experience in management, 3 in education electives (instruction and counseling) and additional credit in leadership and supervision on the basis of institutional evaluation; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (5/78).

MOS-920A-001

Property Book Technician

920A0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated 761A. May have progressed to Property Book Technician from MOS 76J (Medical Supply Specialist) or MOS 76Y (Unit Supply Specialist).

Description

Administers and manages the Army supply systems; maintains inventory control; supervises purchasing procedures, inventory handling and storage, recordkeeping, and stock control; is responsible for accounting and management of capital stock for units and installatons; knows manual and automated property-accounting procedures; develops and administers supply budgets for units or installations; forecasts and plans supply requirements; knows how to use automatic data processing in the supply areas; gives technical advice to subordinate unit and activity commanders; establishes procedures for requisitioning, receiving, storing, and issuing supplies; establishes and maintains formal and informal lines of communication with supply control, maintenance, and transportation units; with supported activities, may monitor or evaluate supply contractor's performance; prepares reports and correspondence.

Recommendation

In the vocational certificate category, 2 semester hours in keypunch, 3 in recordkeeping, 3 in technical report writing, 3 in inventory management, 3 in warehousing and storage, 3 in introduction to computer concepts, 3 in purchasing, 3 in material handling and safety, and 3 in principles of financial budgeting. In the lower-division baccalaureate/associate degree category, 3 semester hours in technical report writing, 3 in personnel supervision, 3 in inventory management, 3 in introduction to computer concepts, 3 in warehousing and storage, 3 in recordkeeping, 3 in purchasing, 3 in material handling, 3 in principles of financial budgeting, and 2 in keypunch. In the upper-division baccalaureate category, 3 semester hours in management electives and 3 in personnel management and training; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (10/77).

MOS-920B-001

REPAIR PARTS TECHNICIAN

920B0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated 762A. May have progressed to Repair Parts Technician from MOS 76J (Medical Supply Technician), MOS 76P (Materiel Control and Accounting Specialist), or MOS 76V (Materiel Storage and Handling Specialist).

Description

Administers and manages the Army supply system as it applies to maintenance support units, usually at overseas locations; supervises the requisitioning, storage, distribution, and accounting of repair parts and maintenance-related supply items; knows manual and automated property accounting procedures; knows fundamentals of data processing as they apply to inventory management; knows the interrelationship of supply, maintenance, and transportation; knows policies and procedures for and interprets regulations regarding crating, packaging, preserving, shipping, and storing materiel and equipment; uses supply catalogs, technical manuals, bulletins, modification work orders, and cross-reference lists in requisitioning, receiving, storing, issuing, and identifying equipment, supplies, and repair parts; forecasts the requirements of repair parts and maintenance-related supply items; develops and administers supply budgets; inspects supported units to insure that stock levels are adequate and within prescribed limits; makes inventory recommendations; provides technical guidance to supported unit personnel; develops operating procedures and performs administrative duties related to the supply activity; evaluates efficiency and effectiveness of supply operations; prepares correspondence and reports.

Recommendation

In the vocational certificate category, 2 semester hours in keypunch, 3 in recordkeeping, 3 in technical report writing, 3 in inventory management, 3 in warehousing and storage, 3 in introduction to computer concepts, 3 in purchasing, 3 in material handling and safety, and 3 in principles of financial budgeting. In the lower-division baccalaureate/associate degree category, 2 semester hours in keypunch, 3 in recordkeeping, 3 in technical report writing, 3 in inventory management, 3 in warehousing and storage, 3 in introduction to computer concepts, 3 in purchasing, 3 in material handling and safety, 3 in principles of financial budgeting, and 3 in personnel supervision, and additional credit in traffic management on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in management electives and 3 in personnel management and training, and additional credit in transportation and physical distribution on the basis of institutional evaluation; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management (10/77).

MOS-921A-001

AIRDROP EQUIPMENT TECHNICIAN

921A0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated MOS 401A. May have progressed to Airdrop Equipment Technician from MOS 43E (Parachute Rigger).

Description

Supervises preparation of equipment for airdrop, airdrop of supplies and equipment, parachute packing, and repair of parachutes and associated equipment; plans and organizes activities for repair of airdrop equipment and establishes rigging sites to support airborne operations; instructs personnel in airdrop procedures; prescribes procedures used in adjustment, care, and preservation of parachutes and other support equipment tools and machinery; provides technical guidance and serves as liaison to commanders; provides technical assistance to the personnel responsible for life cycle management of items including design, research and development, testing, supply management, and classification; responsible for providing serviceable and safe parachutes and equipment to units engaged in parachute jumping and related airdrop operations; supervises repacking of parachutes in use; coordinates loading of equipment and supplies into aircraft and participates in joint airdrop load inspections; may serve as a service school instructor; knows maintenance record keeping and inventory control procedures.

Recommendation

In the lower-division baccalaureate/associate degree category, 2 semester hours in communication skills (oral). In the upper-division baccalaureate category, 3 semester hours in personnel management and 3 for management electives; if rank was CW2, 2 semester hours for field experience in management; if rank was CW3, 4 semester hours for field experience in management; if rank was CW4, 6 semester hours for field experience in management; if duty assignment was platoon leader, additional credit in leadership and supervision on the basis of institutional evaluation (5/78).

MOS-922A-001

FOOD SERVICE TECHNICIAN

922A0

Exhibit Dates: 1/88–Present.

Career Pattern

NOTE: This MOS was formerly designated 041A. May have progressed to Food Service Technician from MOS 94B (Food Service Specialist).

Description

Supervises and administers food service activities for installations, commands, or organizations; maintains complete operational control over facilities, personnel, and specialized equipment; supervises the procurement, storage, distribution, and preparation of foods to be served; writes reports; develops procedures for implementing policies from higher authority; uses specialized accounting methods; plans use, layout, and mainenance of food service equipment; in carrying out specialized duties, is required to devote most energies in the technical and human resource areas of food service administration; interprets contracts and monitors contractor's performance; if assigned to hospital food service duties, may be required to perform additional specialized supervisory functions in nutritional and diet therapy areas; may serve as staff advisor to a general officer or provide technical assistance to nonappropriated fund food service activites; may serve as a service school instructor.

Recommendation

In the lower-division baccalaureate/associate degree category, 6 semester hours in food service management, 3 in principles of management, 3 in personnel supervision, 3 in food service equipment and layout, and 3 in business report writing. In the upper-division baccalaureate category, 3 semester hours in management problems and 2 for field experience in management; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management; if duty assignment was service school instructor, 3 additional semester hours for a practicum in education; if assigned to a hospital as a food service technician, 3 additional semester hours in nutrition or diet therapy (11/77).

MOS-941A-001

FOOD SERVICE ADVISOR

941A0

See exhibit MOS-041A-001.

MOS-951A-001

CID SPECIAL AGENT CRIMINAL INVESTIGATOR

951A0

Exhibit Dates: 6/61–12/87. (Effective 1/88, the MOS designator 951A was changed to 311A; see exhibit MOS-311A-001.)

Career Pattern

May have progressed to Criminal Investigator from MOS 95B (Military Police) or MOS 95D (Assistant Special Agent).

Description

Conducts investigations and supervises technical and other personnel in the investigation of known or suspected crimes involving government property and individuals subject to military jurisdiction; examines scene of incident and collects and submits all relevant physical evidence (fingerprints, blood stains, suspected narcotics, castings, documents) to crime laboratory; studies and evaluates evidence to determine motives and responsible individuals; develops investigative plans; prepares reports of investigations; apprehends violators or suspects based on probable cause; testifies at courts-martial or other appropriate judiciary tribunals; engages in crime prevention efforts and physical security surveys; performs worldwide protective services for Department of Defense executives, visiting foreign officials, and other designated principals; knows techniques for effective investigation of any type of crime involving U.S. government property and individuals subject to the Uniform Code of Military Justice; knows what constitutes an offense under applicable criminal codes and laws; knows techniques governing search and apprehension; knows rules of evidence and methods of collecting, preserving, and protecting evidence; knows complete procedures for identifying, protecting, and searching a crime scene; knows techniques of surveillance, covert operation, raids, and search and seizure and conducts such activities; applies evidence, records, and laboratory reports to criminal investigations; knows techniques of crime prevention, physical security, and industrial defense surveys; evaluates findings and develops recommendations resulting from such surveys; interviews and interrogates complainants, witnesses, informants, suspects, and other persons considered knowledgeable of or connected with crimes; develops information on suspects concerning habits, associates, aliases, characteristics, and other personal information and uses such information in the investigative process; prepares proper records of information obtained through interviews and interrogations; supervises criminal investigation teams; understands basic techniques for conducting laboratory examinations and the analysis of physical evidence; applies laboratory techniques and procedures to physical evidence; evaluates all information obtained in connection with a specific crime; knows administrative procedures, report writing, correspondence formats, supply channels, and office management; testifies as expert witness concerning application of any standard technique or procedure used in criminal investigation; coordinates with appropriate civil and military agencies involving jurisdictional authority, exchange of information, and similar problems and considerations; may be an operations officer giving direction to other personnel involved in various investigations; may serve as an instructor or supervise instruction of personnel in various crime-related topics; may have foreign language proficiency; has extensive knowledge about narcotics and narcotics trafficking, including clandestine laboratories, drug traffic patterns, drug identification, and drug field testing; conducts drug abuse education programs.

Recommendation

In the vocational certificate category, 6 semester hours in laws/rules of evidence, 3 in report writing, and 3 in criminal investigation. In the lower-division baccalaureate/associate degree category, 6 semester hours in laws/rules of evidence, 4 in introduction to law enforcement, 3 in criminal law, 3 in criminal investigation, 3 in report writing, and 3 in oral communications, and additional credit in a foreign language on the basis of institutional evaluation. In the upper-division baccalaureate category, 6 semester hours for field experience in criminology (crime scene and laboratory) and 3 for a practicum in education, and additional credit in foreign language and education on the basis of institutional evaluation (11/77).

MOS-961A-001

ATTACHE TECHNICIAN
(ARMY ATTACHE ADMINISTRATIVE OFFICER)

961A0

Exhibit Dates: 3/54-12/87. (Effective 1/88, the MOS designator 961A was changed to 350L; see exhibit MOS-350L-001.)

Career Pattern

NOTE: This MOS was formerly designated 2122. May have progressed to Attache Technician from MOS 71L (Administrative Specialist) or MOS 71S (Attache Specialist).

Description

Performs general administrative and logistics functions in support of Defense Army Attache office located in an embassy of the United States of America; must know regulations, directives, and procedures necessary for managing and operating administrative and logistics support functions; secures and manages housing accommodations for personnel assigned to the embassy; knows history, political and economic institutions, social customs, and, when possible, the language of the country to which assigned; advises other attache office personnel and visitors regarding matters of protocol, military courtesies, and public affairs; supervises enlisted and civilian support specialists; manages internal activities of the Defense Attache office; compiles and prepares reports and communications; receives, interviews and schedules meetings with U.S. and foreign military and civilian visitors; supervises internal communications; maintains files and administers the record keeping process; types correspondence, messages, forms, and manuscripts; authenticates vouchers; processes and reviews requisitions; may serve as service school instructor; may perform other officer-level duties as required.

Recommendation

In the vocational certificate category, 4 semester hours in typing, 2 in filing, 3 in office practices, 3 in business communications, 3 in records administration, and 1 in business machines. In the lower-division baccalaureate/associate degree category, 4 semester hours in typing, 2 in filing, 3 in office practices, 3 in business communications, 3 in records administration, 1 in business machines, 3 in human relations, 6 for field experience in office management, 6 in social science, 2 in public relations, and 3 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in management problems and 3 in real property management; if rank was CW2, 2 additonal semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management. NOTE: Add credit for the specific foreign language in accordance with the recommendation in Volume 4 of the Guide to the Evaluation of Educational Experiences in the Armed Services (11/77).

MOS-962A-001

IMAGE INTERPRETATION TECHNICIAN

962A0

Exhibit Dates: 1/64-12/87. (Effective 1/88, the MOS designation 962A was changed to 350D; see exhibit MOS-350D-001.)

Career Pattern

May have progressed to Image Interpretation Technician from MOS 96D (Image Interpreter).

Description

Manages activities or performs duties relative to image interpretations; applies techniques and principles of image interpretation, photogrammetry, and topographic drafting; knows and applies basic principles of geology and human and physical geography; understands basic cartography, surveying, geometry, trigonometry, and the metric system; prepares written summaries and gives oral reports; conducts briefings; establishes and maintains files; instructs subordinates in proper work techniques and procedures; directs training; supervises personnel; advises superiors; develops map overlays; may serve as a service school instructor.

Recommendation

In the vocational certificate category, 3 semester hours in map reading, 2 in mechanical drawing, 3 in photogrammetry, 3 in technical writing, 3 in technical mathematics, and 3 in aerial photographic interpretation. In the lower-division baccalaureate/associate degree category, 3 semester hours in map reading, 3 in photogrammetry, 3 in aerial photographic interpretation, 3 in physical geography, 3 in technical writing, 3 in technical mathematics, 2 in mechanical drawing, and 3 in human relations. In the upper-division baccalaureate category, 3 semester hours in management problems, 3 for field experience in management, and 3 in personnel management; if duty assignment was instructor at a formal training facility, 6 additional semester hours for a practicum in education (11/77).

MOS-963A-001

INTERROGATION TECHNICIAN

963A0

Exhibit Dates: 7/68-Present.

Career Pattern

May have progressed to Interrogation Technician from MOS 96C (Interrogator).

Description

Knows history, culture, geography, and current politics and economics of country or countries in area to which assigned; knows techniques and principles of interrogation and document exploitation; knows interrogation reporting procedures; conducts interrogations, in a foreign language, of informants, prisoners of war, and refugees; prepares reports of interrogations and identifies and resolves conflicting information provided by different sources, such as documents; disseminates reports and makes assessments of the validity of information for dissemination to users; summarizes findings; functions as a supervisor, chief, or commander of a team or larger unit; translates technical publications related to recent scientific discoveries and inventions; usually is proficient in reading, writing, speaking, and translating two or more foreign languages.

Recommendation

In the lower-division baccalaureate/associate degree category, 6 semester hours in social science, 3 in report writing, 3 in oral communication, and 3 in personnel supervision, and additional credit in area studies on the basis of institutional evaluation. In the upper-division baccalaureate category, 3 semester hours in personnel management, 3 in management problems, and additional credit in area studies on the basis of institutional evaluation. NOTE: Add credit for the specific foreign language in accordance with the recommendation in Volume 4 of the Guide to the Evaluation of Educational Experiences in the Armed Services (11/77).

MOS-964A-001

Order of Battle Technician

964A0

Exhibit Dates: 7/68–12/87. (Effective 1/88 the MOS designator 964A was changed to 350B; see exhibit MOS-350B-001.)

Career Pattern

May have progressed to Order of Battle Technician from MOS 96B (Intelligence Analyst).

Description

Collects and evaluates tactical and strategic information related to organization, operations, capabilities, and limitations of armed forces; uses the accumulated information to develop order-of-battle data; makes reliability assessments of information through comparison with previously evaluated information; maintains close liaison with other intelligence activities, including counter-intelligence, photo interpretation, interrogation, and language interpretation units; develops and maintains maps and overlays to provide complete and accurate intelligence information relating to friendly and enemy armed forces; interprets maps; prepares written reports; gives briefings and oral reports; maintains current information concerning both friendly and enemy forces to include identification, disposition, personalities, combat efficiency, and history; evaluates the significance of armed forces vulnerability studies for use in predicting probable courses of actions; has a working knowledge of automatic data processing procedures as applied to tactical and strategic intelligence; supervises, commands, or acts as chief of a section, detachment, or team engaged in the development of the data or information required in this area; may serve as a service school instructor.

Recommendation

In the vocational certificate category, 3 semester hours in clerical practices, 3 in records administration, 3 in technical writing, 3 in communication skills (oral), and 1 in map reading. In the lower-division baccalaureate/associate degree category, 3 semester hours in clerical practices, 3 in records administration, 3 in technical writing, 3 in oral communication, 3 in personnel supervision, and 1 in map reading. In the upper-division baccalaureate category, 3 semester hours in management problems; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 additional semester hours for field experience in management; if duty assignment was service school instructor, 6 semester hours for a practicum in education (11/77).

MOS-971A-001

Counterintelligence Technician
(Intelligence Technician)

971A0

Exhibit Dates: 1/64–12/87. (Effective 1/88, the MOS designator 971A was changed to 351B; see exhibit MOS-351B-001.)

Career Pattern

May have progressed to Counterintelligence Technician from MOS 97B (Counterintelligence Agent) or MOS 97C (Area Intelligence Specialist).

Description

Manages activities or performs duties that provide intelligence information; investigates personnel under U.S. Army jurisdiction to determine their suitability for assignment to sensitive duties; conducts interrogations, briefings, and debriefings; prepares intelligence and investigative reports; analyzes and interprets intelligence and counterintelligence data; works closely with civilian law enforcement officials and investigative agencies; supervises and trains subordinates; knows organization, mission, tactics, and operating methods of friendly and enemy intelligence units and personnel; knows principles and procedures involved in counterintelligence investigations; knows interrogation techniques; knows techniques for conducting effective liaison with local, state, and national investigative and other governmental agencies of friendly and occupied countries; knows operation, characteristics, and regulations governing the use of recording and monitoring equipment; knows techniques and regulations governing investigative surveillance; knows fundamentals of military and civil law, including due process and the application of legal principles to counterintelligence operations; collects evidence admissible for legal action and obtains depositions; knows the culture, custom, history, social, economic, and political structures of the area of operation; conducts security investigations, surveys, and vulnerability studies of installations; knows principles for communications and signal security; processes photographic film; may be a service school instructor.

Recommendation

In the lower-division baccalaureate/associate degree category, 6 semester hours in social science, 3 in police administration, 3 in industrial security, 3 in U.S. government, 3 in applied psychology, 3 in report writing, 3 in oral communication, 3 in office management, 2 in personnel supervision, and 1 in typing. In the upper-division baccalaureate category, 3 semester hours in political ideologies, 3 in constitutional law, and 3 in public relations; if the duty assignment was service school instructor, 6 additional semester hours for a practicum in education (11/77).

MOS-972A-001

Area Intelligence Technician

972A0

Exhibit Dates: 1/64–12/87. (Effective 1/88, the MOS designator 972A was changed to 351C; see exhibit MOS-351C-001.)

Career Pattern

May have progressed to Area Intelligence Technician from MOS 97B (Counterintelligence Agent) or MOS 97C (Area Intelligence Specialist).

Description

Collects intelligence information on a specific geographic area through the use of human resources; works with a minimum of supervision; uses extremely demanding operational security procedures in a foreign environment; knows culture, customs, history, politics, geography, economics, and social structure of geographic area(s); knows procedures for preparing and forwarding reports; conducts interviews, interrogations, briefings, and debriefings; prepares informational and operational reports; analyzes and interprets information for intelligence implications; reads maps and prepares map overlays; supervises area intelligence units and teams. NOTE: Many of the required duties for this MOS involve highly classified materials, equipment, techniques and activities; therefore, not all the competencies and knowledges associated with the MOS were evaluated.

Recommendation

In the lower-division baccalaureate/associate degree category, 6 semester hours in area studies, 3 in regional geography, 3 in applied psychology, 3 in report writing, 3 in speech, 3 in photography, 1 in electronic systems, 1 in typing, and 1 in human relations. In the upper-division baccalaureate category, 6 semester hours in history electives, 3 in economics electives, 3 in comparative cultures, 3 in applied research, 3 in personnel management, and 3 in international relations; if the duty assignment was service school instructor, 6 semester hours for a practicum in education. In the graduate degree category, 3 semester hours for a seminar in military intelligence strategy and policy and additional credit in international relations on the basis of institutional evaluation. NOTE: Add credit for the specific foreign language in accordance with the recommendation in Volume 4 of the Guide to the Evaluation of Educational Experiences in the Armed Services (11/77).

MOS-973A-001

Interrogation Technician

973A0

Exhibit Dates: Until 3/79, the MOS designation for Interrogation Technician was 963A. Use exhibit MOS-963A-001.

MOS-982A-001

Traffic Analysis Technician

982A0

Exhibit Dates: 6/61–12/87. (Effective 1/88 the MOS designator 982A was changed to 352C; see exhibit MOS-352C-001.)

Career Pattern

May have progressed to Traffic Analysis Technician from MOS 98B (EW/Cryptologic Cryptanalyst), MOS 98C (EW/Signal Intelligence Analyst) or MOS 98Z (EW/Signal Intelligence Chief).

Description

Manages personnel and technical equipment engaged in intercepting, decoding, and analyzing communication traffic for content of possible intelligence value; establishes priorities of intercept missions for acquisition of desired traffic; plans, organizes, and coordinates activities; reviews data obtained in the traffic intercept process for accuracy and relevance; prepares and transmits information reports; advises commanders and staff officers on matters concerning traffic analysis and use of the data.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in personnel management and training and 3 for management electives; if rank was CW2, 2 semester hours for field experience in management; if rank was CW3, 4 semester hours for field experience in manangement; if rank was CW4, 6 semester hours for field experience in management (8/78).

MOS-983A-001

EMANATIONS ANALYSIS TECHNICIAN

983A0

Exhibit Dates: 1/66–12/87. (Effective 1/88, the MOS designator 983A was changed to 352J; see exhibit MOS-352J-001).

Career Pattern

May have progressed to Emanations Analysis Technician from MOS 98J, Electronic Warfare/Signal Intelligence Noncommunications Interceptor.

Description

Manages personnel and technical equipment assets engaged in intercept and analysis of noncommunications electromagnetic emissions; plans, organizes, and supervises establishment and operation of facilities and units engaged in electronic intelligence activities; selects sites for tactical noncommunications intercept/analysis equipment; ensures that electronic intelligence operators and analysts follow established procedures, techniques, and analytical procedures in the intercept and interpretation of electromagnetic signals; advises operators and analysts; conducts training programs for noncommunications intercept operators/analysts; may serve as a service school instructor; may serve as platoon leader.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision; if served as platoon leader, 3 semester hours in principles of administration. In the upper-division baccalaureate category, 3 semester hours in personnel management and training, 3 in management problems, and 3 in a management elective; if rank was CW2, 2 semester hours for field experience in management; if rank was CW3, 4 semester hours for field experience in management; if rank was CW4, 6 semester hours for field experience in management (9/88).

MOS-984A-001

MORSE INTERCEPT TECHNICIAN

984A0

Exhibit Dates: 6/61–12/87. (Effective 1/88, the MOS designator 984A was changed to 352H; see exhibit MOS-352H-001.)

Career Pattern

NOTE: This MOS was formerly designated MOS 051A. May have progressed to Morse Intercept Technician from MOS 05H (EW/Cryptologic Interceptor-Morse) or MOS 05K (EW/Cryptologic Interceptor-Teletypewriter).

Description

Manages personnel and technical equipment in establishment and employment of Morse intercept and electronic warfare activities; plans, coordinates, and supervises personnel engaged in these operations; may supervise up to several hundred personnel; establishes work schedules and priorities; evaluates performance of subordinates; supervises calibration, adjustment, and testing of Morse intercept equipment; conducts training programs for equipment operators; knows antenna theory and wave propogation characteristics; supervises application of message analysis; supervises cryptanalysis principles and procedures.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision; if served as platoon leader, 3 semester hours in principles of administration. In the upper-division baccalaureate category, 3 semester hours in personnel management and training, 3 in management problems, and 3 for management electives; if rank was CW2, 2 semester hours for field experience in management; if rank was CW3, 4 semester hours for field experience in management; if rank was CW4, 6 semester hours for field experience in management (8/78).

MOS-985A-001

NON-MORSE INTERCEPT TECHNICIAN

985A0

Exhibit Dates: 6/61–12/87. (Effective 1/88, the MOS designator 985A was changed to 352K; see exhibit MOS-352K-001.)

Career Pattern

NOTE: This MOS was formerly designated MOS 052A. May have progressed to Non-Morse Intercept Technician from MOS 05F (Radio Teletypewriter Operator), MOS 05K (EW/Cryptologic Interceptor-Teletypewriter), or MOS 98J (EW/Signal Intelligence Noncommunications Interceptor).

Description

Manages personnel and technical equipment in establishment and employment of non-Morse intercept and electronic warfare activities; plans, coordinates, and supervises personnel engaged in these operations; may supervise up to several hundred personnel; establishes work schedules and priorities; evaluates performance of subordinates; supervises calibration, adjustment, and testing of various electronic intercept equipment including radios and printers; conducts training programs for equipment operators; knows antenna theory and wave propagation characteristics; supervises application of message analysis; supervises cryptanalysis principles and procedures.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision; if served as platoon leader, 3 semester hours in principles of administration. In the upper-division baccalaureate category, 3 semester hours in personnel management and training, 3 in management problems, and 3 for management electives; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 additional semester hours for field experience in management; if rank was CW4, 6 semester hours for field experience in management (8/78).

MOS-986A-001

EMITTER LOCATION/IDENTIFICATION TECHNICIAN (SPECIAL IDENTIFICATION TECHNICIAN)

986A0

Exhibit Dates: 6/61–12/87. (Effective 1/88, the MOS designator 986A was changed to 352D; see exhibit MOS-352D-001.)

Career Pattern

NOTE: This MOS was formerly designated MOS 053A. May have progressed to Emitter Location/Identification Technician or Special Identification Technician from MOS 05D (EW/Cryptologic Special Identification Operator) or MOS 05H (EW/Cryptologic Interceptor-Morse).

Description

Manages personnel and technical equipment assets engaged in establishment and employment of Emitter Location/Identification System (ELI) activities in a communications-electronic intelligence environment; supervises maintenance, calibration, adjustment, and testing of equipment; operates or supervises operation of radio (CW, voice, teletype), and cryptographic equipment; ensures that personnel follow established direction-finding communications nets; advises commanders or staff officers on the employment, deployment, and utilization of ELI assets; analyzes collected information and converts to usable intelligence for use of commanders.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in basic mathematics and 3 in personnel supervision; if served as platoon leader, 3 semester hours in principles of administration. In the upper-division baccalaureate category, 3 semester hours in personnel management and training, 3 in management problems, and 3 for management electives; if rank was CW2, 2 additional semester hours for field experience in management; if rank was CW3, 4 semester hours for field experience in management; if rank was CW4, 6 semester hours for field experience in management (8/78).

MOS-988A-001

VOICE INTERCEPT TECHNICIAN

988A0

Exhibit Dates: 6/61–12/87. (Effective 1/88, the MOS designator 988A was changed to 352G; see exhibit MOS-352G-001.)

Career Pattern

May have progressed to Voice Intercept Technician from MOS 98G, (EW/Cryptologic Interceptor-Voice) MOS 98Z, (EW/Signal Intelligence Chief), or MOS 05E, (Voice Radio Operator).

Description

Manages and plans personnel and equipment engaged in the intercept and analysis of voice communications; supervises installation of and provides operational direction to voice intercept and electronic warfare activities; supervises the calibration, adjustment, and testing of voice intercept and standard communications equipment; applies knowledge of wave propagation antenna and electronic theory to ensure proper antenna emplacement and orientation; reads, writes, comprehends, transcribes, and translates at least one foreign language; supervises intercept, transcription, and translation of voice communications in a foreign language; advises commanders and staff officers on the employment and utilization of voice intercept and electronic equipment and personnel; conducts training programs for voice intercept and electronic countermeasures personnel; defines and advises the commander on language problem areas.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel supervision; if served as platoon leader, 3 semester hours in principles of administration. In the upper-division baccalaureate category, 6 semester hours for humanities or social science electives, 3 in personnel management and training, 3 in management problems, and 3 for management electives; if rank was CW2, 2 semester hours for field experience in management; if rank was CW3, 4 semester hours for field experience in management; if rank was CW4, 6 semester hours for field experience in management. NOTE: Add credit for the specific foreign language(s) by referring to the recommendation in Volume 4 of the Guide to the Evaluation of Educational Experiences in the Armed Services and modifying the recommendation on the basis of institutional evaluation (8/77).

Appendix A

The Evaluation Systems

The American Council on Education has developed and refined comprehensive procedures and criteria for the evaluation of military learning experiences. This appendix outlines the historical development of the *Guide;* defines which courses can be found in the *Guide;* provides background information on Army enlisted and warrant officer MOS's (military occupational specialties); describes the evaluation systems used to prepare the recommendations for military formal courses and MOS's; and includes definitions and guidelines pertaining to categories of educational credit, the semester hour standard, categories of apprentice training, and clock hours and contact hours.

BACKGROUND

Early editions of the *Guide to the Evaluation of Educational Experiences in the Armed Services* were prepared in response to specific needs. Immediately after World War II, the consensus in the civilian educational community was that the practice of granting blanket credit to World War I veterans as a reward for length of service was educationally unsound. Educators concluded that military learning experiences applicable to civilian curricula should be asessed by faculty for potential credit. Therefore, in December 1945, at the request of civilian educational institutions and the regional accrediting associations, the American Council on Education established the Commission on Accreditation of Service Experiences—renamed the Commission on Educational Credit and Credentials in 1979—to evaluate military educational programs and to assist institutions in granting credit for such experiences. Accordingly, the first edition of the *Guide* was published to assist educational institutions in evaluating service courses completed by returning veterans.

The extension of the World War II G.I. Bill to include veterans of the Korean conflict, and the subsequent enrollment of many veterans in colleges and universities, created a need for the second edition, published in 1954.

The 1968 edition was prepared in anticipation of the increased enrollment of veterans resulting from the educational assistance provided under the Veterans Readjustment Benefits Act of 1966, and with the expectation that many would apply for educational credit for their learning experiences in the armed services. In addition, technological advances had necessitated major changes in service training, with a resulting need for new or revised educational credit recommendations.

The 1974 edition was prepared primarily to respond to three emerging considerations. First, because of the growth in vocational and technical programs and the emergence of the concept of postsecondary education, there was a need to evaluate courses for possible credit in the vocational and technical categories in addition to the baccalaureate and graduate categories of previous editions. Second, active-duty service men and women were enrolling in increasing numbers in civilian educational programs and were seeking credit for military formal courses soon after completing their service school training. Third, credit recommendations were needed for the many courses initiated or revised by the military since 1968.

The 1974 edition marked the beginning of a new approach to reporting evaluations of formal military training. At its fall 1973 meeting, the Commission approved the concept of an ongoing *Guide* system. Elements of that system include the publication of biennial editions of the *Guide* through computerized composition, continual staff review of courses, and the computerized storage of course information for a more rapid updating of credit recommendations and for an improved ability to respond to inquiries related to course identification and credit recommendations.

Over the years the recommendations contained in the *Guide* have assisted education institutions in granting credit to hundreds of thousands of service men and women. Surveys conducted by The Center showed that most of the nation's colleges and universities use the formal course recommendations in awarding credit to veterans and active-duty service personnel. The recommendations have been widely accepted because military formal courses share certain key elements with traditional postsecondary programs: they are formally approved and administered, are designed for the express purpose of achieving learning outcomes, are conducted by qualified persons with specific subject-matter expertise, and are structured to provide for the reliable and valid assessment of student learning.

Until 1975, however, no mechanism existed for providing recognition for the learning a service man or woman attained through such learning experiences as self-instruction, on-the-job training, and work experience. As a first step in providing recognition for such learning experiences, the Commission in 1975 implemented a program for the evaluation of learning represented by demonstrated proficiency in Army enlisted military occupational

specialties (MOS's). The MOS evaluation procedures were developed, tested, and refined during a feasibility study conducted by the Council and sponsored by the U.S. Department of the Army. Evaluators made recommendations for educational credit and advanced standing in apprentice training programs. Subsequently, the occupational assessment program of the Commission was expanded to include the Navy general rates and ratings, Army warrant officer MOS's, Navy warrant officer and limited duty officer specialties, Coast Guard enlisted ratings and warrant officer specialties, and selected Marine Corps MOS's. A small number of Naval Enlisted Classifications (NECs) have also been evaluated.

The recommendations for advanced standing in apprentice training programs are the result of the cooperative efforts of the American Council on Education and labor and industry. Since the Army programs are now registered with the Bureau of Apprenticeship and Training, recommendations are no longer made for advanced standing in apprenticeship programs.

The recommendations reflect the Commission's belief that it is sound educational practice to give recognition for learning, no matter how or where that learning has been attained, provided that the learning is at the appropriate level, is in the appropriate area, and is applicable to an individual's postsecondary program of study or apprenticeship program.

ARMY ENLISTED MOS's

The following paragraphs include background information on Army enlisted MOS's, a description of the enlisted MOS classification system, and detailed information on the enlisted MOS evaluation score.

The Army Enlisted MOS Classification System

The Army Enlisted Military Occupational Specialty (MOS) Classification System is a comprehensive taxonomy of Army enlisted duty positions. Closely related positions that require similar qualifications and the performance of similar duties are grouped as an MOS under a generic title. The job title *clerk-typist*, for example, encompasses duty assignments such as file clerk, shipping clerk, reports clerk, clerk-typist, and senior clerk-typist.

Soldiers and Army veterans, and Army records usually refer to enlisted occupations using a designation with *at least* five characters (e.g., 71B10, 71B20, 71B30). **Figure 1** shows the elements of an enlisted MOS designation. The first three characters (two numbers and a letter) identify the MOS (e.g., 71B is the designation for clerk-typist). The fourth character, a number from one to five, indicates the type and level of skill within the MOS. As shown in Figure 1, only the skills, competencies, and knowledge represented by the *first four characters* of the MOS designation are evaluated for comparability with civilian learning.

The fifth character is normally zero ("0"); in some cases, a letter is used as a special qualification identifier (SQI) to indicate a soldier's specific duty assignment of special qualifications. In fact, an enlisted soldier's occupation may be expressed by as many as nine characters, but because the last five characters indicate special qualifications that are variable, the learning they represent is not evaluated by ACE. Appendixes B and C provide users with information describing the additional characters that make up the enlisted MOS designation. Enlisted Special Qualification Identifiers (SQIs) are described in Appendix B, and enlisted Additional Skill Identifiers (ASIs) are described in Appendix C. Users may want to conduct an individual assessment and grant credit to recognize the additional learning represented by these characters.

The first three characters, then, represent the MOS, or occupational designation, and the fourth character represents the skill level within the MOS. In accordance with Army practice, *skill levels are referred to in this publication with a neutral fifth character: zero* (i.e., 10, 20, 30, 40,

Skills, Competencies, and Knowledge Evaluated								
1st Character	2nd Character	3rd Character	4th Character	5th Character	6th Character	7th Character	8th Character	9th Character
number 0-9	number 0-9	letter A-Z	number 1-5	"O" letter	letter	number	letter	letter
Military Occupational Specialty (MOS)			Skill Level	Special Qualifications Identifier (SQI)	Additional Skill Identifier (ASI)		Language Identification Code (LIC)	
				See Appendix B	See Appendix C		Normally assigned after completion of Defense Language Institute course or achieving a comparable score on a competency examination. Refer to formal course recommendations.	

Figure 1: *The Enlisted MOS Structure*

and 50). Each enlisted MOS has from one to five skill levels, depending on the types of duty positions encompassed by the MOS. The five skill levels may be broadly characterized as follows:

Skill Level 10 identifies entry-level positions requiring performance of tasks under direct supervision.

Skill Level 20 identifies positions requiring performance of more difficult tasks under general supervision.

Skill Level 30 identifies positions requiring performance of still more difficult tasks under a minimum of supervision, and, in some instances, involving supervision of soldiers in Skill Levels 10 and 20.

Skill Level 40 identifies positions requiring relatively detailed knowledge of all tasks specified for a given MOS and normally involving first-line supervision of soldiers in Skill Levels 10, 20, and 30.

Skill Level 50 identifies managerial and supervisory positions requiring broad knowledge of the tasks performed at all subordinate levels in a given MOS and related MOS's in order to coordinate and give direction to work activities.

Thus, each skill level represents progressively complex duties, increased skills, and greater responsibility; and proficiency in a higher skill level includes the ability to perform the tasks required for the lower skill level(s), as well as additional tasks.

Enlisted MOS's are grouped into 33 career management fields within the enlisted MOS classification system. Each career management field provides opportunities for advancement and career progression among related MOS's. Most career management fields are divided into subfields of closely related MOS's. Brief descriptions of career management fields are provided in Appendix D.

The Enlisted MOS Evaluation System

The Army regularly evaluates each enlisted soldier's MOS proficiency through the Enlisted Evaluation System. Individuals are evaluated to determine whether they have acquired and maintained the necessary MOS skills, competencies, and knowledge, as codified and described in the enlisted MOS classification system. The means used to evaluate soldiers have recently undergone a series of changes.

An individual is awarded an MOS skill level when the skills, competencies, and knowledge for a particular MOS have been acquired. The MOS may be awarded (1) following successful completion of a period of supervised on-the-job training (reflected on the individual's set of orders) or (2) following successful completion of an MOS-producing course (reflected on a Course Completion Certificate).

Subsequently, an individual is periodically evaluated to determine whether he or she has *maintained* the MOS skills, competencies, and knowledge. Until December 1976, the result of this evaluation was an MOS evaluation score; since January 1977, the results are SQT scores and Enlisted Evaluation Reports (EERs) and Senior EERs (SEERs).

- *October 1973–December 1976. **The Enlisted MOS Evaluation Score.*** Until January 1977, the Army's Enlisted Evaluation System comprised a written examination (and in some MOS's, a performance examination such as typing or musical instrument performance) and the supervisor's rating of the soldier's job performance. The written examination was a 125-item, multiple-choice test that covered all major areas of skill-level proficiency. On the supervisor's rating, or EER/SEER, the soldier is rated on a wide range of characteristics and traits. (See Appendix G.)

The score that resulted from the application of the Enlisted Evaluation System was normally a composite score, consisting of the score on the written MOS test, the score from the supervisor's rating of job performance on the Enlisted Efficiency Report (EER), and the score on the performance test, if one was required. Composite MOS evaluation scores ranged from a low of 40 to a high of 160, with the minimum qualification score set at 70.

- *January 1977–July 1983. **The SQTs.*** The Skill Qualification Tests assess the soldier's occupational proficiency through a combination of a hands-on performance evaluation, a written test, and the supervisor's performance certification of specific tasks. Development of the SQTs is based on an analysis of critical skills required for proficiency in a given MOS skill level. The test is used for soldiers to requalify in their assigned skill level. They requalify in their skill level by achieving the verified minimum score for the particular MOS. SQTs have not been developed for pay grades E–8 and E–9.

EER/SEER. Due to the suspension of the use of MOS Evaluation Tests in December 1976 and the gradual phasing-in of SQTs, some soldiers have been evaluated solely on the basis of EER/SEERs. An "EER-only" enlisted MOS evaluation score will not be a composite score and will not include a score from a standardized examination. EERs were formerly given to those in paygrades E–4 and E–5, while E–6 and above received SEERs. Currently, those in paygrades E–5 through E–7 are given SEERs while E–4's, E–8's and E–9's are not evaluated. EERs have been discontinued.

- *August 1983–Present. **An Improved SQT.*** Since August 1983, the procedures for selecting the skills to be measured on each SQT have been standardized and are being applied uniformly to the new test edition. These new procedures produce tests that consistently sample skills that are representative of the MOS and only of the MOS. This standardization overcomes two of The Center's prior concerns: The original SQTs tested general military-specific items (e.g., maintenance of firearms) as well as MOS-specific items; and they used test items in both the skill level being tested as well as those in the next higher skill level. The revised SQT tests only MOS-related competencies and only those at the current skill level.

The SQT is a major component in a soldier's initial MOS certification and in the annual recertification process. Those who fail must retake the test the following year. Failing the test two years in a row results in either losing the MOS or having the skill level reduced.

Passing the SQT is one of several criteria used in promotion decisions. Other factors considered are: training and schooling records, supervisor's ratings (EERs), leadership activities, and awards and citations. The Army has set a score of 60 to indicate that MOS proficiency standards have been met.

- *Supervisor's Ratings.* If SQT score is not available, refer to EERs, SEERs, and NCO Evaluation Reports. (See Step 2 in *How to Find and Use MOS Exhibits.*)

ARMY WARRANT OFFICER MOS's

The following paragraphs provide background information on Army warrant officer MOS's and describe the warrant officer MOS classification system and the procedures used by the Army to select warrant officers and evaluate their MOS skills and knowledge.

The Army Warrant Officer MOS Classification System

Army warrant officers are highly skilled technicians. They are normally assigned to middle management or administrative positions that require highly specialized or technical skills and knowledge, and the supervision of enlisted technical specialists.

The warrant officer MOS classification system currently includes approximately 76 MOS's grouped into 16 career fields. Each warrant officer MOS represents a set of duties and qualifications that are highly consistent from one duty assignment to another.

Warrant officer MOS's are normally identified by *at least* four characters (three numbers and a letter, e.g., 214E). **Figure 2** shows the elements of a warrant officer MOS designation. Unlike enlisted MOS's, warrant officer MOS's consist of four characters, not three, and do not have skill levels.

As shown in the figure, a warrant officer's occupational qualifications may be expressed with as many as nine characters, but because the last five characters indicate special qualifications that are variable, the learning they represent is not evaluated. Only the skills, competencies, and knowledge represented by the *first four characters* are evaluated by ACE. The fifth character, a number or a letter, designates a Special Qualification Identifier (SQI); when a warrant officer has not been awarded an SQI, the fifth character is zero ("0"). The sixth and seventh characters (a number and a letter) are an Additional Skill Identifier (ASI) that relates a specific occupational skill or item of equipment to an MOS. The eighth and ninth characters represent competency in a specific foreign language.

Users may wish to conduct an individual assessment to grant credit for the additional learning represented by the last five characters. Because these additional characters are frequently awarded on the basis of successful completion of formal courses, the user may refer to the appropriate formal course recommendations in the *Guide*. Warrant officer Special Qualification Identifiers are described in Appendix E; Additional Skill Identifiers, in Appendix F. Readers should note that warrant officer SQIs and ASIs are *not* the same as enlisted SQIs and ASIs (described in Appendixes B and C, respectively).

There are four grades of warrant officers: Warrant Officer, W-1 (WO1); Chief Warrant Officer, W-2 (CW2); Chief Warrant Officer, W-3 (CW3); and Chief Warrant Officer, W-4 (CW4). The grades reflect rank and do not signify differences in job duties.

Figure 2: *The Warrant Officer MOS Structure*

Warrant Officer Selection and Evaluation

The procedures used in selecting warrant officers and evaluating their MOS skills and knowledge are different from those used for enlisted soldiers.

Selection. Warrant officers are appointed by the Secretary of the Army. Warrant officer vacancies are routinely announced, and interested persons undergo a competitive application process. Most applicants have had Army enlisted service experience, but such experience is not required.

To qualify for appointment, applicants must meet several criteria. For ACE purposes, the relevant criteria are:

1. Achieve a standard score of 110 or higher on the Aptitude Area General Technical Test of the Army Classification Battery or the Army Qualification Battery (this score is also required for commissioned officer applicants).
2. Demonstrate understanding of and proficiency in the English language.
3. Have sufficient education, technical training, and practical experience to ensure outstanding technical ability in the MOS for which application is being made.
4. Be a high school graduate or the equivalent and, when the MOS requires more than a high-school-level education, meet the additional education requirement for the specific MOS. (Two years of college or the equivalent is the desired goal for Regular Army warrant officers.)

Selected candidates must successfully complete a warrant officer candidate course before being appointed.

Evaluation. Under the present evaluation system, the normal procedure is for each warrant officer to be evaluated at least once a year. The evaluation is conducted by officers who serve as a rater and senior rater. Each performs independently. The rater, the warrant officer's immediate supervisor, completes the full evaluation report. The senior rater, the officer who supervises the rater, ensures that the evaluation report has been accurately and properly completed and adds comments and a rating of the rated warrant officer.

Warrant officer evaluations focus on technical competence in the MOS. Raters assign "adjectival" and numerical ratings for each of several important duty areas.

The ratings are recorded on the OER, which also contains a description of the specific functions, duties, and tasks that the rated warrant officer is required to perform during the assignment covered by the OER. Each report provides an appraisal of the rated warrant officer's professional attributes, quality of performance, and potential demonstrated during a specific period while in a particular duty assignment. Complete files of each warrant officer's OERs are maintained at the U.S. Total Army Personnel Command (PERSCOM), where all OERs are reviewed for accuracy and completeness.

ACE OCCUPATION EVALUATION SYSTEM

The ACE evaluation system for MOS's has three major components: the selection of evaluators, the materials required for evaluation, and the procedures and guidelines evaluators use in reaching decisions and making recommendations.

Selection of Evaluators

Nominations for evaluators are requested from postsecondary institutions; professional associations; disciplinary societies; labor unions; trade associations; industry associations; education associations; regional accrediting associations; state departments of education; state credentialing, licensing, and certifying agencies; and the Bureau of Apprenticeship and Training of the U.S. Department of Labor.

The criteria for selection of MOS evaluators are as follows:

1. The area of an evaluator's competency, as evidenced by formal occupational training, knowledge, and experience, will closely approximate the skills, competencies, and knowledge required for proficiency in the MOS.
2. When recommendations were made for apprenticeship programs, preference was given to candidates who were experienced in administration of apprentice training programs when an enlisted MOS was related to an apprenticeable trade.
3. Preference will be given to candidates with five or more years of postsecondary teaching or administrative experience, including curriculum development.
4. Preference will be given to candidates who are generally receptive to the recognition of learning that occurs in a variety of settings.

An evaluator candidate is interviewed by a staff member to determine whether the individual meets the selection criteria.

Evaluations are conducted by teams of at least three specialists. The teams, organized by staff members, use the following guidelines:

1. Subject-matter specialists on an evaluation team should represent a variety of postsecondary institutional types: 1-year/2-year/4-year, public/private, vocational/technical.
2. When ACE conducted evaluations of enlisted MOS's that were related to an apprenticeable trade, two evaluators on the team—one representing labor and one representing management—had experience in the administration of that apprentice training program.

3. Each team of evaluators should represent a variety of persons from within education, labor, government, industry, and business who have had teaching, supervisory, and administrative experiences.

An effort is also made to attain a diverse geographic representation among evaluators. Teams are formed based on the groups of MOS's to be evaluated. Because MOS skills do not always fall neatly into civilian educational and occupational fields and often encompass two or more fields, most MOS evaluation teams include a curriculum generalist. Provision is also made for an evaluation team, when it finds it cannot thoroughly evaluate an MOS, to refer the MOS or a particular skill level to another team or other specialists for further evaluation.

Materials Required for Evaluation

In order to make a recommendation, evaluators must first identify the skills, competencies, and knowledge associated with a given warrant officer or enlisted MOS. The materials relevant to the evaluation of each warrant officer MOS or enlisted MOS skill level are made available to staff members and evaluators by the Army. Materials include the official Army MOS manual which describes the duties and qualifications for each MOS; technical manuals, field manuals, and other publications used by enlisted soldiers and warrant officers in the day-to-day performance of their duties and by enlisted soldiers to prepare for their MOS evaluation tests; enlisted MOS skill-level evaluation tests; and study guides that outline the proficiency requirements for each enlisted MOS skill level. Additional information is obtained by observing and interviewing enlisted soldiers and warrant officers on-the-job during site visits to Army installations.

Evaluation Procedures and Guidelines

Evaluators identify the skills, competencies, and knowledge required of warrant officers who are qualified in a given MOS and enlisted soldiers who are qualified in a given MOS skill level and relate that demonstrated learning to the same attributes acquired by students who have completed a comparable postsecondary course or curriculum. Because the evaluations are based on a comparison of learning outcomes, the amount of time a given enlisted soldier or warrant officer may have spent acquiring MOS proficiency is not taken into consideration. The emphasis is on translating the learning demonstrated through MOS proficiency into terms used in formal civilian postsecondary education systems to recognize the same learning. This reflects the Commission's belief that the value of learning is not dependent on where or how the learning occurs.

Evaluation teams are assigned three tasks in the evaluation of each MOS: (1) to identify the learning represented by proficiency in the MOS by reviewing the pertinent written materials and by observing warrant officers or soldiers performing in the MOS and interviewing them; (2) to prepare a description of the duties, skills, competencies, and knowledge required for each warrant officer or enlisted MOS skill level; and (3) to make recommendations for each warrant officer MOS or enlisted MOS skill level based on discussion and consensus.

Throughout the evaluation process, evaluators are encouraged to exercise professional judgment in applying the evaluative criteria and procedures. This position reflects the Commission's belief that sound educational evaluation is more dependent on professional judgment and expertise than on rigid application of criteria.

The Commission on Educational Credit and Credentials continually reviews its criteria and procedures. Evaluators are encouraged to provide feedback and recommendations for consideration by the Commission.

THE RECOMMENDATIONS

In order to interpret exhibits correctly, readers should become thoroughly familiar with the definitions and guidelines utilized by evaluators in formulating the recommendations. The following paragraphs include definitions and guidelines pertaining to categories of educational credit, the semester hour standard, categories of apprentice training, and clock hours and contact hours.

Categories of Credit

Educational credit is a concept used by postsecondary institutions to quantify and record a student's successful completion of a unit of study. Postsecondary education consists of courses and programs of instruction for persons who are high school graduates or the equivalent, or who are beyond compulsory school age. ACE evaluators utilize the following categories of educational credit when formulating credit recommendations.

Vocational Certificate. This category describes course work of the type normally found in certificate or diploma (nondegree) programs that are usually a year or less in length and designed to provide students with occupational skills. This course work can also be found in curricula leading to associate degrees in applied science. Course content is specialized and the accompanying shop, laboratory, or similar practical components emphasize procedural more than analytical skills.

Lower-Division Baccalaureate/Associate Degree. This category describes course work of the type normally found in the first two years of a baccalaureate program and in programs leading to the Associate in Arts, the Associate in Science, or the Associate in Applied Science degree, the traditional transfer associate degrees. The instruction stresses development of analytical abilities at the introductory level. Verbal, mathematical, and scientific concepts associated with an academic discipline are introduced, as are basic principles. Occupationally oriented courses in this category are normally designed to prepare a student to function as a technician in a particular field.

Upper-Division Baccalaureate. This category describes courses of the type found in the last two years of a baccalaureate program. The courses involve specialization of a theoretical or analytical nature beyond the introductory level. Successful performance by students normally requires prior study in the area.

Graduate Degree. This category describes courses with content of the type found in graduate programs. These courses often require independent study, original research, critical analysis, and the scholarly and professional application of the specialized knowledge or discipline. Students enrolled in such courses normally have completed a baccalaureate program.

Semester Hours

Credit recommendations for courses are not derived by simple arithmetic conversion. Evaluators exercise professional judgment and consider only those portions of a course that can be equated with civilian postsecondary curricula. Intensive courses offered by the military do not necessarily require as much outside preparation as many regular college courses. Evaluators consider the factors of pre- and post-course assignments, prior work-related experience, the concentrated nature of the learning experience, and the reinforcement of the course material gained in the subsequent work setting.

The MOS recommendations are based on the skills, competencies, and knowledge gained, as demonstrated through proficiency in a given enlisted MOS skill level or in a given warrant officer MOS, without reference to how much time elapsed during the learning process. The semester hour is used as a standard to express how many semester hours of appropriate course work a student would normally complete to attain the same learning outcomes or attest to the same level of competency.

Credit recommendations are expressed in semester credit hours. In determining semester hour recommendations, evaluators will be guided by, but not restricted to, the following standard definitions:

1. One semester credit hour for the equivalent of 15 hours of classroom contact plus 30 hours of outside preparation; or

2. One semester credit hour for the equivalent of 30 hours of laboratory work plus necessary outside preparation, normally expected to be 15 hours; or

3. One semester credit hour for the equivalent of not less than 45 hours (contact hours) of shop instruction.

Apprentice Training

Apprentice training is the composite series of progressively more difficult learning experiences in the technology and skills of a tradesman. Apprentice training may be identified in clock hours or years of reasonably continuous on-the-job training and in contact hours of related instruction. On-the-job training and work experience focus on the performance of basic skills under the direct supervision of a journeyman. Related and supplemental instruction is normally closely correlated with on-the-job training, and the subject matter stresses practical application of technology. An *apprentice* is a person who is engaged in learning a trade by working with, and under the direct supervision of, a qualified journeyman in all phases of the trade for a specified period of time. A *journeyman* is a tradesman who has satisfactorily completed an apprentice training program or achieved proficiency in a given industry and who works without direct job supervision.

Evaluations resulting in apprenticeship recommendations have been restricted to enlisted MOS's in the areas of electronics/electricity and mechanical maintenance. Other apprenticeship-related MOS's have been evaluated only for postsecondary educational credit because the Army has already registered several apprenticeship programs with the Bureau of Apprenticeship and Training (BAT), U.S. Department of Labor. Since all apprenticeship programs are currently registered with BAT, MOS's are now evaluated for postsecondary educational credit only.

Clock Hours and Contact Hours

An MOS recommendation for advanced standing in an apprentice training program is stated in clock hours of occupational experience and contact hours of related instruction. *Clock hours* are based on hours worked at a trade; *contact hours* are based on hours spent in the presence of a qualified instructor.

The enlisted MOS recommendations are based on the skills, competencies, and knowledge gained, as demonstrated through proficiency in a given MOS skill level, without reference to how much time elapsed during the learning process. Clock hours and contact hours are used to express how much of an apprentice training program an apprentice would normally complete to attain the same learning outcomes or attest to the same level of competency.

Other Recommendations

The Defense Activity for Non-Traditional Education Support (DANTES) maintains the educational records of the service men and women who have completed SSTs, CLEP examinations, and GED Tests.

The results of courses and tests that were taken under the auspices of USAFI (United States Armed Forces Institute, disestablished 1974) which carry academic credit and were submitted prior to June 30, 1974, are available from DANTES Contractor Representative (transcripts), P.O. Box 2879, Princeton, New Jersey 08541. Former and current servicemembers are required to pay a $10.00 fee for USAFI transcripts. Military education personnel can obtain them free of charge.

Results of Subject Standardized Tests and CLEP examinations taken under the auspices of DANTES after

July 1, 1974, are available at a nominal charge from DANTES Contractor Representative (CLEP), Educational Testing Service, P.O. Box 2819, Princeton, New Jersey 08541.

Test reports for GED Tests taken after July 1, 1974, can be obtained from DANTES Contractor Representative (GED), GED Testing Service, American Council on Education, One Dupont Circle, Washington, DC 20036-1193.

In addition, credit recommendations for USAFI courses and tests and for DANTES Subject Standardized Tests are available from The Center and are published in the *Handbook to the Guide.*

Appendix B

Enlisted Special Qualifications Identifiers

A Special Qualifications Identifier (SQI) is a letter or number used to indicate special qualifications possessed by an individual. The SQI, when it is used, occupies the fifth character position of the enlisted MOS designation, replacing the zero that normally occupies the position. For example, 12B40 is a skill-level designation for a combat engineer (MOS 12B); 12B4P is the designation for a person who holds 12B40 and is also qualified as a parachutist (SQI P).

Special Qualifications Identifiers are listed alphabetically in this appendix. Each SQI code is accompanied by a title, a brief description, and the effective dates.

A **Technical Intelligence** (10/73–Present)

Identifies persons holding intelligence analyst positions who are able to identify and evaluate foreign materiel, systems, and technological developments.

B **Unit Race Relations Discussion Leader (Unit Interpersonal Relations Worker)** (10/73–9/87)

Identifies persons who have completed the Unit Race Relations Discussion Leaders Course or who have completed equivalent command-sponsored training.

C **NBC (Nuclear, Biological, and Chemical)** (3/88–Present)

Identifies persons who have knowledge of NBC warfare operations and training techniques and who have completed appropriate training in NBC warfare operations and applicable training techniques.

CBR (Chemical, Biological, and Radiological) Warfare Operations (10/73–2/88)

Identifies persons who have knowledge of CBR warfare operations and training techniques and who have completed appropriate training in CBR warfare operations and applicable training techniques.

D **Civil Affairs Operations** (10/73–Present)

Identifies persons qualified to assist in planning, directing, and coordinating activities that pertain to the civil population and its political, social, and economic institutions.

E **Northern Warfare Expert** (10/73–Present)

Identifies persons who have completed prescribed training at the Northern Warfare Training Center or who have received comparable training with a unit operating in an extreme northern environment to qualify them in military skiing, mountaineering, arctic river navigation, and movement and operating on glaciers.

F **Flying Status** (10/73–Present)

Identifies persons who are required to perform frequent and repetitive aerial flights.

G **Ranger** (10/73–Present)

Identifies persons who are Ranger-qualified and who have completed appropriate training at the Infantry School.

H **Instructor** (10/73–Present)

Identifies persons who are qualified to be full-time instructors or training advisers at an Army service school or in other organized training activity.

I **Installer** (10/73–Present)

Identifies persons who are qualified to install nonportable equipment systems or subsystems on a full-time duty basis.

J **SCUBA** (10/73–2/88)

Identifies persons who are trained in skills and safety measures used in diving with self-contained underwater breathing apparatus (SCUBA) and who apply these skills in underwater reconnaissance, maintenance, vehicle recovery, and demolition.

K **Logistics Noncommissioned Officer** (10/73–Present)

Identifies persons who qualify as program members in the Army Logistics Systems.

L **Linguist** (10/73–Present)

Identifies persons who have achieved elementary proficiency in either listening comprehension or reading comprehension in one or more foreign languages.

M **First Sergeant** (3/76–Present)

Identifies persons who are qualified to assist commander in planning, supervising, inspecting, developing, and executing unit policy; to advise commander on enlisted personnel matters; to provide counsel and guidance to subordinate personnel; and to coordinate administration of the unit and support services.

N **Joint Planner** (3/80–Present)

Command of Joint Operations Planning System (JOPS).

White House Communications Agency (10/73–9/76)

Identifies persons assigned to the White House Communications Agency.

O **No Special Qualifications** (10/73–Present)

Identifies positions which do not require the assignment of personnel possessing special qualifications.

P **Parachutist** (10/73–Present)

Identifies persons who are qualified parachutists.

Q **Equal Opportunity Adviser** (9/85–Present)

Identifies persons who have completed training at the Defense Equal Opportunity Management Institute.

Race Relations Instructor (10/73–8/84)

Identifies persons who have completed training in race relations education at the Defense Race Relations Institute.

R **Research, Development, Test, and Evaluation (RDTE)** (10/73–Present)

Identifies persons who are qualified in the design, development, test, or evaluation of military materiel, doctrine, methods, systems, or organization.

S **Special Forces** (10/73–Present)

Identifies qualified parachutists who have completed specialist training by the Special Forces Training Group of the U.S. Army John F. Kennedy Center for Military Assistance, completed similar training, or acquired equivalent qualifying experience.

T **Technical Inspector** (9/90–Present)

Identifies positions which require personnel to perform technical inspections of aircraft, aircraft armament systems, aircraft components, and avionic and flight control systems.

Transition (10/73–9/84)

Identifies persons who have completed transition-type formal training on late-model equipment; this SQI is used in the MOS designation for up to three years following such training.

U **Track Personnel/Cargo Driver** (10/73–8/81)

Identifies persons who are qualified to operate tracked personnel/cargo carrier vehicles.

V **Ranger-Parachutist** (10/73–Present)

Identifies persons who are qualified for the award of both SQI G and SQI P.

W **Psychological Warfare** (10/73–2/85)

Identifies persons qualified in the analysis, development, or implementation of psychological warfare materiel.

X **Drill Sergeant** (3/75–Present)

Identifies persons who complete a Drill Sergeant training course conducted at an Army Training Center.

Experimental (10/73–2/75)

Identifies positions which require personnel to perform duties in connection with the employment or maintenance of new or experimental military equipment or weapons.

Y **Pathfinder** (10/73–9/90)

Identifies qualified parachutists who have completed Pathfinder training at the U.S. Army Infantry School or who have acquired similar qualifications at unit schools with comparable programs of instruction and standards.

Z **Alcohol and Drug Abuse Prevention and Control Program** (10/73–Present)

Identifies persons who have met the following prerequisites: completion of U.S. Army Drug and Alcohol Rehabilitation Training or military or civilian experience in counseling or similar activities in the alcohol, drug abuse, or related fields, and formal recommendation and certification of qualification by a program behavioral scientist (psychiatrist, psychologist, or social worker).

2 **Training Development** (9/81–Present)

Identifies persons in TDA units with missions involving general support of and direct training of personnel associated with Interservice Procedures for Instructional Systems Development (IPISD).

3 **Organizational Effectiveness NCO (OENCO)** (9/81–9/87)

Identifies persons who have completed an organizational effectiveness (OE) course conducted by U.S. Army Organizational Effectiveness Training Center.

4 **Non-Career Recruiter** (3/82–Present)

Identifies non-career recruiter position.

Appendix C

Enlisted Additional Skill Identifiers

An Additional Skill Identifier (ASI) is a two-character code that is used to identify highly specialized skills that are in addition to the skills required for proficiency in a given enlisted MOS. The ASI is identified by a letter and a number, the sixth and seventh characters in the MOS designation. The skills content of each ASI requires a minimum of 10 days of formal training or equivalent on-the-job training.

Additional Skill Identifiers are listed alphanumerically in this appendix. Each ASI code is accompanied by a title, a brief description, and effective dates.

A1 Satellite Communications Control (3/82–3/89) **DSCS SATCOM Controller** (3/76–2/82)
Performance of operational satellite communications controller functions.

A2 Aviation Safety (3/76–Present)
Planning and implementing aviation accident prevention measures.

A3 Forces Development (TAADS) (3/82–Present) **The Army Authorization Document System (TAADS)** (3/76–2/82)
Qualification to use The Army Authorization Document System (TAADS).

A4 International Morse Code (IMC) (3/78–Present)
Receiving IMC by radio at rate of 10 five-letter random code groups per minute without error for 3 consecutive minutes out of 5; transmitting using hand key at 10 five-letter random code groups per minute without error for 2 consecutive minutes out of 3; and handling without error 15 plaindress (normal form) messages averaging 10 five-letter random code groups per hour in field radio net of 2 or more stations through natural interference.

A5 Communications Maintenance (AN/MRC–85) (9/82–2/87) **486L Wide Band Communications O/I Maintenance** (9/80–8/82)
AN/MRC–85 (10/73–8/80)
Maintenance of radio set AN/MRC-85.

A6 Communications Operations/Maintenance (TSEC/CY–104) (3/86–3/89) **Multichannel Ciphony System TSEC/CY–104** (3/79–2/86) **AN/MRC–98** (10/73–2/79)
Maintenance of Multichannel Ciphony System TSEC/CY-104, AN/MRC-98. Maintenance of radio set AN/MRC-98.

A7 Communications Maintenance Supervision AN/TTC 38(V) (9/86–Present) **Communications Maintenance Supervision (TASS–AN/TTC-25, AN/TTC–38)** (3/82–8/86) **TASS–AN/TTC-25, AN/TTC–38** (3/75–2/82) **TASS–AN/TTC–25** (10/73–2/75)
Maintenance of automatic central office equipment TASS-AN/TTC-25 and AN/TTC-38.

A8 Master Gunnery (M1 Tank) (3/82–Present) **XM1 Master Gunner** (9/81–2/82)
Assessment of training and weapons, development of training programs, and conduct of training for XM1 tank master guns.

Meatcutting (10/73–2/78)
Meatcutting. Trimming, cutting, boning, and grinding of meat.

A9 Patrol Dog Handling (10/73–Present)
Use and handling of patrol dogs in detecting and detaining suspected law violators. From 3/84–Present, also includes use and handling of sentry dogs as a means of security (formerly ASI P5).

B1 Rough Terrain Container Handling and Operation (9/84–Present)
Operation of rough terrain cargo handling equipment.

Artillery Calibration (10/73–8/80)
Calibration of field artillery weapons.

B2 Telephone Installation (Key Systems) (3/82–Present) **Telephone Key System Installer** (3/74–2/82)
Installation and organizational maintenance of key telephone systems.

B3 Teletypewriter Maintenance (Specialized Equipment) (9/81–Present) **Specialized Teletypewriter Equipment** (10/73–8/81)
Installation and maintenance of specialized teletypewriter equipment.

B4 Equipment Maintenance (Air Traffic Control/NAVAIDS) (9/81–2/86)
Maintenance of ATC navigation aids communications equipment in both tactical and nontactical Army airfields.

Air Traffic Control/NAVAIDS Equipment Repair (9/76–8/81)
Maintenance of ATC navigation aids communications equipment.

B5 Tactical Army Combat Service Support System/Standard Maintenance System (TACCS/SAMS) (3/86–Present)
Maintenance of TACC/SAM Systems.

AN/PRC–70 Radio Set Maintenance (9/78–2/82)
Maintenance of radio set AN/PRC-70.

B6 Communications Maintenance AN/TSC–38 (3/82–8/86)
AN/TSC–38 (10/73–2/82)
Maintenance of communications central radio set AN/TSC-38.

B7 Aircraft Maintenance (Ejection Seat) (3/82–Present)
Ejection Seat Repairer (3/77–2/82)
Maintenance of MK-J5 ejection seat, 9E2A ejection training device, and survival kits for OV-1 aircraft.

B8 M60A3 Tanker (9/85–Present)
Tank Operation/Organizational Maintenance (M60A3) (3/82–11/84) **M60A3 Tank** (9/81–2/82)
Assessment of training and weapons, development of training programs, and conduct of training for M60A3 tank.

Forensic Crime Lab Specialist (10/73–8/76)
Qualification as a crime laboratory specialist.

B9 Communications Operation (Defense Special Security) (3/82–9/88) **Defense Special Security Communications (DSSCS) Operator** (9/80–2/82)
Operation of Defense Special Security Communications System.

C1 MACOM Band Qualified (9/86–Present)
Qualified to perform as musicians in major commands (MACOM).

Executive Club Manager (9/76–8/82)
Management of a club with gross monthly sales in excess of $50,000.

C2 Dragon Gunnery (9/82–Present)
Dragon (10/73–8/82)
Employment of the XM-47 Medium Antitank Assault Weapon System.

C3 Well Drilling (9/83–Present)
Operation of well-drilling equipment.

Control Data Corporation 6000 Series (10/73–2/78)
Operation of Control Data computer in the 6000 series.

C4 **Communication Technical Evaluation** (3/82–Present) **Technical Evaluation Program (TEP)** (10/73–2/82)
Technical and operational checks on major communications systems within the Army.

C5 **Master Gunnery** (3/82–Present)
Master Gunner (3/78–2/82)
Assessment of training and weapons, development of training programs, and conduct of training for M48A5 and M60A1 tanks.

M551 Master Gunner (10/73–2/78)
Assessment of training and weapons, development of training programs and conduct of training for M551, M60A1/A3 and M60/A2.

C6 **High Power Radio Operator/Maintainer** (9/86–Present)
Maintenance on high power radio equipment.

Countermeasure System Maintenance (AN/TLQ–17) (3/82–2/85)
AN/TLQ–17 Repairer (3/78–2/82)
Maintenance on AN/TLQ–17.

M60A1/A3 Master Gunner (10/73–2/78)
Assessment of training and weapons, development of training programs, and conduct of training for M60A1/A3.

C7 **Countermeasure System Maintenance (AN/MLQ–24)** (3/82–2/85)
AN/MLQ–24 Repairer (3/80–2/82)
Maintenance on the AN/MLQ–24.

M60A2 Master Gunner
Assessment of training and weapons, development of training programs, and conduct of training for M60A2.

C8 **Transcribing/Gisting** (3/82–Present)
Transcriber/Gister (3/77–2/82)
Transcription and summarization of intercepted foreign language transmissions.

C9 **MAGIC MAST Maintenance** (9/87–Present)
Maintenance of MAGIC MAST hydraulic-pneumatic antennas.

Stereocompiler (10/73–2/82)
Compilation and revision of planimetric and topographic maps using stereoscopic plotting instruments.

D1 **Bread Baking** (3/83–Present)
Baking (9/82–2/83)
Ability to bake and to work in field bakeries.

Bread Baking (9/77–8/82)
Ability to bake bread.

D2 **Dermatology Specialty** (3/82–Present) **Dermatology Specialist** (3/79–2/82)
Qualification to assist medical officers with treatment of skin disorders and laboratory procedures.

RCA 301–501 (10/73–8/76)
Operation of RCA computers 301 and 501.

D3 **Bradley Fighting Vehicle System (BFVS)** (3/84–Present) **XM3 Cavalry Fighting Vehicle Operations/Maintenance** (9/83–2/84)
XM3 Cavalry Fighting Vehicle (9/82–8/83)
Operation of Cavalry and Bradley fighting vehicles.

RCA 3301–Spectra (10/73–2/78)
Operation of RCA computers 3301 and Spectra 70.

D4 **Battlefield Deception** (3/89–Present)
Identifies duties and tasks associated with battlefield deception.

Data Acquisition System (AS/GSQ–76) (9/79–2/85)
Maintenance of AN/GSQ–76 components.

IBM 7000 Series (10/73–8/76)
Operation of IBM computer in the 7000 series.

D5 **Area Intelligence Operations** (3/87–Present)
Identifies personnel involved in area intelligence operations.

Ashworth System Maintenance (3/82–8/85) **Ashworth/Becker Systems Maintenance** (9/79–2/85)
Maintenance of the Ashworth/Becker systems.

FORTRAN 2nd Generation (10/73–8/76)
Use of Formula Translation (FORTRAN) 2nd generation machine language in the development of computer programs.

D6 **AN/TRC–170(V) Digital Troposcatter Operations (TRITAC)** (9/85–Present)
Operation and maintenance of the AN/TRC–170(V) digital troposcatter radio terminal.

Lighter Air Cushion Vehicle Maintainer (9/79–2/82)
Maintenance of the LACV–30 aircraft engines.

COBOL 2nd Generation (10/73–8/76)
Use of Common Business Oriented Language (COBOL) 2nd generation machine language in the development of computer programs.

D7 **Secondary Reference Laboratory Maintenance** (9/89–Present)
Performance of duties and tasks associated with secondary reference laboratory maintenance.

Procurement Quality Assurance (9/83–8/86)
Performance of functions involving subsistence quality assurance, defense quality audit, or subsistence item survey.

Common Precision Soldering (3/78–2/82)
Ability to perform common precision soldering techniques.

D8 **Master Gunnery (M60A Tank)** (3/82–Present) **M60A3 Master Gunner** (9/81–2/82)
Assessment of training and weapons, development of training programs, and conduct of training for M60A3 master gunner.

SAAL (10/73–2/78)
Use of SAAL machine language (Single Address Assembly Language) in the development of computer programs.

D9 **Radio Frequency Management (Enlisted)** (3/82–9/90) **Enlisted Frequency Manager** (10/74–2/82)
Coordination, allocation, and assignment of radio frequencies.

E1 **Position Location Reporting System (PLRS)** (3/86–8/88)
Operations and Maintenance of Position Location Reporting System (PLRS).

Propeller Assembly Maintenance (3/77–2/82)
Maintenance of fixed-wing aircraft propellers, including hydraulic, electrical, and mechanical propeller systems.

E2 **LAFAIRE VITE Maintenance (AN/FAQ–91)** (3/82–3/89)
LAFAIRE VITE Maintenance (3/81–2/82)
Completion of the USAISD Mobile Maintenance Training Team Course in LAFAIRE VITE Special Purpose Receiving Facility Maintenance.

Shoe Repair (10/73–2/77)
Inspection and repair of leather footwear, application of authorized prescribed orthopedic devices, and operation of shoe repair equipment.

E3 **AN/USC–28 Satellite Communications Set Operations/Maintenance** (9/83–9/89)
Operation and maintenance of AN/USC–28 Satellite Communications Set.

AN/FRC–113 Radio Set (9/78–8/81)
Operation and/or maintenance of the AN/FRC–113 Radio Set Systems Equipment.

E4 **Instrumental Maintenance Power Station)** (3/86–Present)
Maintenance and calibration of electrical power plant monitoring and control instrumentation equipment, and maintenance of uninterruptible power supply systems.

Attache Administrative Support (3/82–2/86)
Attache Specialist (9/77–2/82)
Performance of general administrative duties in support of Defense Army Attache office located in an embassy of the United States of America.

E5 **Instrument Maintenance (Power Station)** (9/86–Present)
Maintenance and calibration of electrical power plant monitoring and control instrumentation equipment, and unit and intermediate maintenance of uninterruptible power supply systems.

Terrain Analyst (3/77–8/83)
Compilation and dissemination of terrain information to provide data for use in construction, mapping, and other operations.

E6 **Vehicle Operation and Maintenance (Lighter Air Cushion Vehicle)** (3/82–Present) **Lighter Air Cushion Vehicle Operator** (9/79–2/82)
Operation of the lighter air cushion vehicle (LACV-30).

Supply Data Analysis (10/73–8/76)
Analysis of forms, regulatory requirements, source data needs, and workflow pertaining to the supply reporting system.

E7 **Radio Controlled Miniature Aerial Target Operations/Maintenance** (9/82–Present)
Operation and maintenance of radio controlled miniature aerial targets.

COMSEC Equipment Maintenance (10/73–2/78)
Prior experience in communications security equipment maintenance through either MOS 32F (Fixed Ciphony Repair) or MOS 32G (Fixed Cryptographic Equipment Repair).

E8 **ADP Programming and Analysis (WWMCCS)** (3/82–Present)
WWMCCS (9/77–2/82)
ADP programming and analysis for the Worldwide Military Command and Control System (WWMCCS).

E9 **M901 (ITV) Gunner/Crew Training** (9/87–Present) **Improved TOW Vehicle (ITV) Operation** (3/82–8/87) **Improved TOW Vehicle (ITV)** (9/76–2/82)
Operation of the improved TOW vehicle.

Document Storage and Retrieval Equipment (10/73–8/76)
Operation of complex document storage and retrieval equipment related to intelligence data handling systems.

F1 **Operations and Intelligence (Special Forces)** (3/82–Present) **Special Forces Operations** (10/74–2/82) **Intelligence Analyst** (10/73–9/74)
Provision of Special Forces intelligence and operations, preparation and supervision of intelligence training programs, and applications of counterintelligence principles to environmental situations.

F2 **Antenna Installation** (3/84–Present)
Installation of antenna.

Intelligence Photography (10/73–2/82)
Use of standard and special camera equipment in intelligence photography.

F3 **Corps/Installation Supply Operation Automated** (3/82–Present)
Standard Army Intermediate Level Supply Subsystem (SAILS) (9/77–2/82)
Completion of formal training in the Standard Army Intermediate Level Supply (SAILS) subsystem. From 3/82, also includes management of packaged petroleum products.

F4 **Divisions Supply Operations Automated (Property Book)** (3/82–Present) **Automated Property Book and Equipment Status Reporting** (3/75–2/82)
Knowledge of policies, terms, management procedures, and functional operations of automated property book and equipment status reporting system at the division supply level.

F5 **Postal Operations** (3/77–Present)
Handling of U.S. mail, money orders, and international mail.

F6 **Cable Splicer** (3/84–Present)
Splicing of cables in the installation of wire systems.

AN/FSG–21, Electronic Mixer, HLC–1A/TSEC (10/73–2/82)
Maintenance on AN/FSG-21, Electronic Mixer, HLC-1A/TSEC.

F7 **Field Artillery Maintenance (FADAC)** (3/82–8/86) **Field Artillery Digital Automatic Computer (FADAC)** (3/78–2/82)
Maintenance on the FADAC and ancillary equipment.

F8 **Flight Simulator (UH1FS) Console Operations** (3/82–Present) **Flight Simulator (UH1FS) Console Operator** (3/77–2/82)
Operation of the UH1FS flight simulator console and related functions to provide aviators practice in instrument flight techniques.

F9 **Division Supply Operations Automated (Stock Accounting)** (3/82–Present) **Automated Supply Record Keeping and Supply Management** (3/75–2/82)
Use of the appropriate computer system to maintain and update supply accounts.

G1 **Terminal Crane Operations** (9/84–8/88)
Operation of container cranes.

UNIVAC 1004/1005/DCT–9000 (10/73–8/76)
Maintenance and operation of the card processor U-1005 and U-1004/DLT-6.

G2 **Radar Signal Simulator AN/TPG–T1** (3/78–2/88)
Identification of simulator mechanic positions.

G3 **Non-Divisional Supply Operations Automated (NCR 500)** (3/82–2/87)
NCR 500 (10/73–2/82)
Operation of the NCR 500 computer.

G4 **SPACOL Operations** (9/83–Present)
Identification of space collection operations positions.

Radar Engagement Simulator AN/TPQ–21 (3/78–8/80)
Identification of simulator mechanic positions.

G5 **Standard Property Book System (SPBS)** (9/84–Present)
Management of new centralized property book accounting system.

IBM 360 (10/73–2/82)
Operation of the IBM 360 computer.

G6 **Radar Engagement Simulator AN/TPQ–29 Operation/Organizational Maintenance** (3/82–Present) **Radar Engagement Simulator AN/TPQ–29** (3/78–2/82)
Identification of simulator mechanic positions.

G7 **COMSEC Full Maintenance (Field)** (3/86–Present)
Repair of communication security (COMSEC) equipment.

Command and Control System (10/73–2/82)
Operation of command and control systems equipment.

G8 **COMSEC Equipment Full Maintenance (Fixed)** (3/86–Present)
Repair of communication security (COMSEC) equipment.

DAME (10/73–2/82)
Provision of advice concerning Defense Against Methods of Entry (DAME), including locking devices, lock security intrusion, detection devices, and building vault construction.

G9 **Defense Against Sound Equipment (DASE)** (10/73–Present)
Provision of advice concerning Defense Against Sound Equipment (DASE), including specialized electronic equipment and techniques used in detection and location of clandestine listening devices.

H1 **Meteorological Equipment Maintenance** (3/82–Present)
Meteorological Equipment Repairer (3/76–2/82)
Maintenance of field artillery meteorological equipment.

H2 **Personal Property Movement** (3/84–Present)
Movement of household goods.

Non-Morse Code Communications Analysis (10/73–8/80)
Use of specialized analysis techniques pertaining to intercepted non-Morse code communications.

H3 **Physical Security Operations** (10/73–Present)
Planning and implementing physical security measure to control pilferage, espionage, sabotage, and other physical security hazards; to prevent unauthorized entry; and to control entry, exit, and circulation of foot and vehicular traffic.

H4 **Data Communications** (10/73–3/89)
Monitoring, testing, and analysis of the quality operational circuits between Automatic Digital Message Switching Center (ADMSC) and other switching centers; installation, operation and maintenance of overseas Automatic Digital Network (AUTODIN) ADMSC; use of data communications machine language in development of computer programs for AUTODIN.

H5 **Communications Operations and Maintenance (STREAMLINER)** (3/82–Present) **STREAMLINER Communications Systems Operator** (3/78–2/82)
Operation of the STREAMLINER Communications System including IS/100 Control Panel, Optical Character Reader, Disk Storage Unit, Magnetic Tape Unit, and TT Model 40 Keyboard Display and Printer Units.

H6 **Data Analysis (TEMPEST)** (3/82–Present) **TEMPEST Field Analyst** (3/78–2/82) **TEMPEST Test and Analysis** (9/76–2/78) **TEMPEST** (10/73–8/76)
Collection and on-site analyzing of data.

H7 **Petroleum Vehicle Operations** (3/89–Present)
Identifies duties and tasks associated with operation and operator maintenance of petroleum vehicle.

Light Armored Vehicle–25 (LAV–25) System (9/84–8/85)
Tactical operation, deployment, movement, and maintenance of the LAV–25.

Counseling Specialist (9/77–8/81)
Provision of assistance to chaplains in counseling duties.

H8 **Recovery Operations** (3/85–Present)
Performance of vehicle recovery operations.

Music and Drama Specialist (9/77–8/81)
Direction of formal musical and dramatic religious productions.

H9 **System Software Programming/Analysis (ASSIST)** (9/83–Present) **Army System for Standard Intelligence Support Terminal (ASSIST)** (9/79–2/82)
Performance of systems software programming/analysis on PDP 11/45 and 11/70 computers which employ RSX-11D operating system, and IDHSC II communications software system, interfaces with WWMCCS (Honeywell) computers, uses JCL, and WWDMS data management system.

SA 431 Telemetry Analog Production (10/73–8/77)
Use of procedures and techniques of analysis of specific telemetry data.

J1 **Telemetry Collection Operations** (3/82–Present) **Telemetry Identification and Collection** (10/73–2/82)
Use of procedures and techniques of collection and identification of specific telemetry data.

J2 **LEFOX Collection and Processing Systems (AN/FSQ–88(V))** (3/78–Present)
Operation of the AN-FSQ–88(V) processing systems (LEFOX).

J3 **Bradley Infantry Fighting Vehicle (BIFV) System** (3/88–Present) **Bradley Fighting Vehicle Master Gunner** (9/85–2/88)
BRADLEY Infantry Fighting Vehicle System (3/84–8/85)
Gunnery training and maintenance program for the BRADLEY infantry fighting vehicle system.

Advanced Non-Morse Operations (8/77–2/82) **IBM 360 Advanced Non-Morse Operations** (3/77–7/77)
Operation of specialized Non-Morse collection and processing equipment.

SC 260, A232–016 (10/77–2/78)
Operation of the SC 260 computer.

J4 **Nuclear Cannon Assembly** (9/87–Present)
Assembly, inspecting, handling, and storing of nuclear cannon assemblies.

Special Signal Analysis (10/73–8/80)
Analysis of special-type intercepted signal data.

J5 **Technical Escorting** (3/82–Present) **Technical Escort** (10/73–2/82)
Provision of safe and secure escort of shipments of chemical, biological, or etiological material and radioactive waste.

J6 **Reproduction Equipment Repair** (3/81–Present)
Performs maintenance on offset lithographic and reproduction equipment.

Tandem Switch (10/73–8/75)
Maintenance of tandem switching and associated equipment.

J7 **White House Communication Agency (WHCA) Console Control Operator** (3/87–Present)
Identifies personnel involved in WHCA console control operations.

High Speed (International Morse Code) Transmission and Receiving (10/73–2/82)
Receiving International Morse Code by radio at the rate of 22 five-letter random code groups per minute without error for a period of 3 consecutive minutes out of 5 and transmitting at the rate of 18 five-letter random code groups per minute without error for a minimum period of 2 consecutive minutes out of 3.

J8 **Photojournalism** (3/82–Present)
Photojournalist (9/76–2/82)
Completion of the United States Air Force Photojournalist Course at Lowerey Air Force Base, Colorado, or completion of a one-year photo-journalist program at Syracuse University, or the equivalent.

J9 **Equipment Operation/Maintenance Test Set, Guided Missile System (TOW-Ground)** (3/84–Present)
Use of test set, guided missile system.

K1 **MAGIIC Operations and Maintenance** (9/86–Present)
Operation and maintenance of the MAGIIC System.

Firefinder Radar Repairer (3/80–2/82)
Maintenance of firefinder radar at the DS/GS level.

K2 **Non-Morse Analyst (Senior)** (3/82–Present)
Senior Non-Morse Analyst (3/78–2/82)
Use of specialized techniques in the analysis of selected Non-Morse signal data.

K3 **Communications-Electronic Warfare Equipment Operations** (3/87–Present) **Communications Electronic Countermeasures Operations** (9/81–2/87) **Electronic Countermeasures Operations** (10/73–8/81)
Operation of electronic countermeasures equipment and devices.

K4 **Operations/Call Service Attending AN/TTC–39** (9/84–8/87)
Operation of the central office telephone automatic AN/TTC–39.

Mobile Floating Assault Bridge/Ferry (MAB) (10/73–8/81)
Maintenance on the mobile floating assault bridge ferry.

K5 **Weather Forecasting** (3/82–2/87) **Weather Forecaster** (10/73–2/82)
Forecasting weather for meteorological teams.

K6 **Non-Morse Collection/Operations (Senior)** (3/82–Present)
Senior Non-Morse Collector/Controller (9/78–2/82)
Performance of supervisory technical controller, mission controller, and mission coordinator duties.

K7 **Joint Tactical Communications (TRI-TAC) Systems Operation Supervision)** (9/84–Present)
Management and operation of joint tactical communications systems.

Finance Data Analysis (10/73–8/80)
Use of forms, transaction entries, verification procedures, and standardized codes for information processed in the Army's finance and accounting system.

K8 **Communications Maintenance (AN/FTC–31 SEVAC)** (3/82–Present) **AN/FTC–31/SEVAC** (10/73–2/82)
Support of the automatic dial central office (AN/FTC–31) and the secure voice access console (SEVAC).

K9 **Communications Intercept Operations** (3/82–Present) **UHF and VHF Operator** (10/73–2/82)
Operation of specialized very high frequency and ultra high frequency intercept equipment.

L1 **Satellite System Equipment Maintenance (AN/MSC–46)** (3/82–9/88) **AN/MSC–46 SATCOM Equipment System Maintenance** (9/78–2/82)
Maintenance of AN/MSC–46 Satellite System Equipment.

L2 **Mobile Subscriber Equipment (MSE) System Maintenance Management** (3/88–Present)
Identifies personnel involved in MSE systems maintenance management.

QUICKLOOK II Maintenance (3/81–2/85)
Completion of USAISD course 102–F46 (QUICKLOOK II Maintenance).

OV–1D [Mohawk] Infrared Surveillance Repairman (10/73–8/77)
Maintenance of the AN/AAS–24 infrared detecting set.

L3 **Field Artillery (AN/TPS–58B) Radar Operations** (3/87–Present)
Operation and maintenance of field artillery (AN/TPS–58B) radar.

AN/APS–94 (D) SLAR OV–1D AN/AYA–10 Data Annotation System (10/73–8/77)
Maintenance of the data annotator system of the airborne side-looking acquisition radar (SLAR) used on the OV–1D aircraft.

L4 **Ammunition Stock Control and Accounting** (3/76–8/82)
Preparation and maintenance of records associated with receipt, storage and issue of ammunition.

L5 **NBC Reconnaissance Specialty** (3/87–Present)
Identifies personnnel involved in armored NBC reconnaissance operations.

Automatic HFDF Systems Operator (EELPOT) (9/78–8/80)
Operation of the HFDF systems (EELPOT).

Automatic Message Address and Routing Systems (AMARS) (10/73–8/76)
Maintenance of the automatic multiple address routing system and tape.

L6 **Satellite System Equipment Maintenance (AN/TSC–86)** (3/82–9/90) **AN/TSC–86 SATCOM Equipment Systems Maintenance** (9/78–2/82)
Maintenance of the AN/TSC–86 Satellite Communications System equipment.

L7 **Satellite Equipment Maintenance (AN/TSC–54)** (3/82–8/88)
SATCOM Communications Link Terminal AN/TSC–54 (10/73–2/82)
Maintenance of satellite communications link terminal AN/TSC–54.

L8 **Tank Repair (M1)** (3/82–Present)
XM1 Tank Repair (9/81–2/82)
XM1 Turret Repair (3/80–8/80)
Maintenance of the XM1 tank turret.

AN/AAS–24 and AN/APS–94 [OV–1D] Operation (10/73–8/76)
Maintenance of AN/AAS–24 and AN/APS–94 radar equipment.

L9 **SHILLELAGH Repair** (3/85–Present)
Repair of SHILLELAGH missile system.

Controlled Nuclear Surety (9/76–8/78)
Qualification to hold controlled nuclear surety positions.

M1 **Communications Maintenance/Operations (MEECN)** (3/82–Present) **Minimum Essential Emergency Communications Network (MEECN) Repairer** (8/80–2/82)
Maintenance of 487L receivers.

Ship's Electrician (10/73–8/76)
Maintenance of electrical equipment and systems on Army seagoing vessels and in marine repair shops.

M2 **Communications Maintenance (Mode V Subscriber Terminal Equipment)** (3/82–3/89) **Mode V Digital Subscriber Terminal Equipment** (10/73–2/82)
Maintenance of Mode V (teletypewriter) and associated security equipment at a subscriber terminal of a data communications system.

M3 **Dialysis Specialty** (3/82–Present)
Dialysis Technician (10/73–2/82)
Operation of dialysis equipment in treatment of patients with kidney disorders.

M4 **Blood Grouping, Collecting, and Processing** (10/73–Present)
Grouping, collecting, and processing whole blood on a volume basis.

M5 **ABRAMS/BFVS Maintainer** (9/85–Present)
ABRAMS/Bradley Fighting Vehicle (3/84–8/84)
Maintenance of the Abrams tank and the Bradley fighting vehicle.

Nuclear Operations (8″ Howitzer) (10/73–2/82)
Assembly, disassembly, and prefire procedures for the 8-inch nuclear projectile.

M6 **Computer Operations/DAS3 (DAS3/SAAS1; DAS3/DASPS–E/DAMMS; DAS3; DAS3/DS4 Operations)** (9/84–Present)
Operation of hardware and software of one of the systems listed above.

Nuclear Operations (155mm Howitzer) (10/73–2/82)
Assembly, disassembly, and prefire procedures for the 155mm Howitzer.

M7 **Non-Morse Analysis (Intermediate)** (3/82–Present) **Intermediate Non-Morse Analyst** (8/80–2/82)
Completion of course A-232-0060.

Nuclear Operations (Sergeant) (10/73–8/77)
Assembly, disassembly, and prefire procedures for nuclear warhead in Sergeant weapon system.

M8 **Equipment Operation/Maintenance (TENCAP/MAGIIC)** (3/82–9/86)
Project TENCAP (8/80–2/82)
Operation and maintenance of Tactical Exploitation of National Space Program Capabilities and Maintenance of MAGIIC.

Nuclear Operations (LANCE) (10/73–8/77)
Assembly, disassembly, and prefire procedures for nuclear warhead in Lance weapon system.

M9 **Emitter Location and Identification (Senior)** (3/82–Present) **Emitter Location and Identification Techniques** (3/77–2/82)
Use of specialized identification techniques and communications electronics equipment to locate and identify signal emitters.

N1 **Aircraft Crewmember Standardization Instructor** (3/88–Present)
Identifies personnel instructing in aircraft crewmember standardization.

GUARDRAIL V Maintenance (3/81–2/85)
Completion of USAISD course 102–F52 (GUARDRAIL V Maintenance).

Nuclear Operations (Pershing) (10/73–8/77)
Assembly, disassembly, and prefire procedures for nuclear warhead in Pershing weapon system.

N2 **Nondestructive Tester (NDT Tester)** (9/86–Present)
Nondestructive testing of aircraft components.

Forward Area Alerting Radar (FAAR) (10/73–8/81)
Maintenance of the Forward Area Alerting Radar.

N3 Circuit Conditioning (10/73–3/89)
Testing, measurement, and adjustment of lines and circuits to insure high fidelity of communications within the Defense Communications System.

N4 Communications Operations and Maintenance (Emergency Action Console) (3/82–8/88) **Emergency Action Console** (10/73–2/82)
Maintenance and operation of the emergency action console.

N5 IATS Systems Operations and Maintenance (3/82–Present) **IATS Systems Controller** (9/78–2/82)
Operation of the IATS system.

N6 LEFOX Collection and Processing Systems (AN/FSQ-88(V)) Maintenance (9/83–Present) **LEFOX Collection and Processing Systems Maintenance** (9/78–2/82)
Maintenance on the AN/FSQ-88(V) system.

N7 Strategic Debriefing and Interrogation (3/85–Present)
Strategic debriefing and interrogation of civilian defectors, refugees, travelers, and resettlers.

IBM 1401, 1410, 1440, 1460, and 1620 (10/73–2/82)
Operation of IBM computers 1401, 1410, 1440, 1460, and 1620.

N8 Urology Specialty (3/86–Present)
Assisting medical officers in the care of patients with urology disorders and assisting in laboratory procedures to identify various urology diseases.

IATS System Maintenance (9/78–2/82)
Maintenance of the IATS system.

N9 FORTRAN 3rd Generation (10/73–2/82)
Use of Formula Translation (FORTRAN) 3rd generation machine language in development of computer programs.

P1 AN/FSC-78 Satellite Communications Set Operations/Maintenance (3/84–9/89) **AN/FSC-78 Satellite/Communications Ground Station Equipment Maintenance** (9/83–2/84)
Maintenance of AN/FSC-78 Satellite Communications ground station equipment.

COBOL 3rd Generation (10/73–8/76)
Use of Common Business Oriented Language (COBOL) 3rd generation machine language in development of computer programs.

P2 AN/TTC-38 Automatic Telephone Central Office Maintenance (9/85–3/89)
Maintenance of the AN/TTC-38 automatic telephone central office system.

HONEST JOHN Rocket Operations (3/80–2/82)
Used with MOS's 13B and 13Y to identify persons in HONEST JOHN support detachment.

Assembly Language 2nd Generation (10/73–8/76).
Use of Assembly Language 2nd generation machine language in the development of computer programs.

P3 AN/TYC-39 Automatic Message Switching Central Maintenance (9/85–8/87)
Maintenance of the AN/TYC-39 automatic message switching central system.

Assembly Language 3rd Generation (10/73–2/82)
Use of Assembly Language 3rd generation machine language in the development of computer programs.

P4 AN/GSC-49 Satellite Communications Terminal Equipment Maintenance (3/82–Present)
Maintenance of satellite communications terminal equipment.

Heavy Anti-Tank/Assault Weapons System (TOW) (10/73–2/82)
Use of tube-launched optically-tracked wire-guided (TOW) missiles against enemy armored vehicles.

P5 Master Fitness Trainer (3/88–Present)
Identifies personnel serving as master fitness trainers.

Sentry Dog Handling (10/73–8/84)
Use and handling of sentry dogs as a means of security.

P6 Army Community Services (3/81–Present)
Completion of course 5H-F1, Army Community Service or six months' job experience as NCOIC or Asst. NCOIC in ACS section.

Scout Dog Handling (On/Off Leash) (10/73–8/76)
Use and handling of scout dogs trained in on-leash and off-leash obedience and capable of giving early warning of enemy presence or traps.

P7 Narcotics Drug Dog Detector Handling (3/82–Present) **Narcotics Drug Dog Detector** (3/77–2/82) **Contraband Detector Dog Handling** (10/73–2/77)
Training and handling dogs capable of detecting presence of marijuana and its derivatives by scent alone.

P8 Polygraph Operations (3/89–Present)
Identifies duties and tasks associated with polygraph operations.

Clinical Perfusion (3/82–8/85)
Operation of heartlung machines during open heart surgery.

Critical Nuclear Surety (9/76–8/78)
Qualification to hold critical nuclear surety positions.

P9 Organizational Maintenance RPV Mechanic (9/86–Present)
Maintenance of RPV and associated equipment.

Mine/Tunnel Dog Handling (10/73–8/76)
Use and handling of dogs capable of finding mines or traps and ordnance cached in tunnels.

Q1 Ground Mobile Forces (GMF) Controller (9/83–Present)
Identifies persons associated with Ground Mobile Forces and operation and maintenance of AN/MSQ-114.

Welder (3/77–2/82)
Welding of aircraft structure and components using oxyacetylene, electric arc, and inert gas welding equipment.

Q2 Aviation Life Support Equipment (ALSE) (3/81–Present)
Accounting for, inspection of, and maintenance of aviation life support equipment.

Combat Tracker Dog Handling (10/73–8/76)
Use and handling of dogs used in combat tracker teams and capable of basic and advanced tracking.

Q3 Switching Center Supervision (AUTODIN) (3/82–3/89)
AUTODIN Switching Center Chief (3/81–2/82)
Operation of AUTODIN Switching Center.

Tank Turret Maintenance Supervision (10/73–8/77)
Supervision of maintenance of tank turrets.

Q4 Recording Equipment Maintenance (AN/GSR-4) (3/82–2/85)
MINCOM TICOR Recorder (AN/GSR-4) (10/73–2/82)
Maintenance of specialized recording equipment (wideband).

Q5 Special Operations Combat Diving, Medical (9/86–Present)
Performance of special operations combat diving.

Chapel Activities Specialist—Catholic (9/77–2/82) **Chaplain's Assistant** (10/73–8/77)
Knowledge of Catholic religious beliefs and rituals.

Q6 Long Range Surveillance Leader (3/88–Present)
Identifies personnel involved in conducting reconnaissance and surveillance operations.

Chapel Activities Specialist—Protestant (9/77–2/82) **Chaplain's Assistant** (10/73–8/77)
Knowledge of Protestant religious beliefs and rituals.

Q7 **AN/GSC-52(V) Satellite System Equipment Operations and Maintenance** (3/87–9/89)
Operation and maintenance on the AN/GSC-52(V) satellite system.

Chapel Activities Specialist—Jewish (9/77–2/82) **Chaplain's Assistant** (10/73–8/77)
Knowledge of Jewish religious beliefs and rituals.

Q8 **Tactical Air Operations** (9/81–Present)
Expertise in air/ground operations.

Nuclear Operations (HJ) (10/73–8/77)
Assembly, disassembly, and prefire procedures for nuclear warhead in Honest John weapon system.

Q9 **Traffic Accident Investigation** (3/82–Present) **Traffic Accident Investigator** (10/73–2/82)
Reconstruction of traffic accidents from evidence to determine reasons for occurrence, possibility of avoidance, and determination of fault.

R1 **Teletypewriter Maintenance (AN/FGG–158)** (3/82–2/88)
MOD 37D Teletypewriter Maintenance (3/79–2/82)
Maintenance of the MOD 37D Teletypewriter (AN/FGG-158).

R2 **Uninterruptable Power Supply (UPS) Repair** (3/82–Present)
Operation and maintenance of the UPS.

Nuclear Operations (Hercules) (10/73–9/76)
Assembly, disassembly, and prefire procedures for nuclear warhead in Hercules weapons system.

R3 **Tactical Army Combat Service Support Computer System/Standard Installation Division Personnel System (TACCS/SIDPERS) Operations** (3/88–Present)
Identifies personnel involved in working with the TACCS/SIDPERS system.

Nuclear Security (10/73–2/82)
Physical security and emergency destruction of nuclear weapons during movement in storage and in tactical operations.

R4 **Heavy Expanded Mobility Tactical Truck Operator (HEMTT)** (9/84–9/89)
Operation and maintenance of the heavy, expanded mobility tactical truck (HEMTT).

Automated HFDF System Maintenance (EELPOT) (9/78–8/80)
Maintenance of the EELPOT system.

R5 **Inertial Navigation Set Maintenance (AN/ASN–86)** (3/82–Present) **AN/ASN–86 Inertial Navigation Set** (10/73–2/82)
Maintenance of the AN/ASN-86 inertial navigation equipment used on Mohawk aircraft.

R6 **Radio Terminal/Repeater Set Operations/Maintenance** (3/88–Present)
Identifies personnel involved in operation and unit maintenance of the AN/TRC-175 radio terminal set and the TRC-138A radio repeater set.

Redeye Operations (10/73–8/76)
Use of Redeye missile system to engage enemy aircraft.

R7 **Bridge Erection Boat-Shallow Draft** (3/86–Present)
Operation of bridge erection boat-shallow draft.

DSSCS Maintenance (3/79–2/82)
Maintenance of the Defense Special Secure Communications System Message equipment.

R8 **Tank Operation/Unit Maintenance (M551 Sheridan)** (3/88–Present) **Tank Operation/Organizational Maintenance (M551 Sheridan)** (3/82–2/88) **M551 Sheridan** (10/78–2/78)
Operation of M551 Sheridan combat vehicle.

R9 **Communications Maintenance (STRAWHAT)** (3/82–Present) **STRAWHAT Maintenance** (3/79–2/82) **STRAWHAT/DSSCS** (10/73–2/79)
Maintenance of specialized equipment used in the STRAWHAT/defense special secure communications system (DSSCS).

S1 **Electronic Switching Systems Repairer (Intermediate)** (9/85–8/87)
Maintenance of electronic switching systems.

Special Purpose Receiving Equipment (10/73–2/82)
Maintenance of special purpose receiving equipment.

S2 **Mechanical Equipment Maintenance (Power Station)** (3/82–Present) **Power Station Mechanic** (3/78–2/82)
Maintenance of mechanical equipment used in electrical power production.

S3 **Electrical Equipment Maintenance (Power Station)** (3/82–Present) **Power Station Electrician** (3/78–2/82)
Maintenance of electrical equipment used in electric power production.

S4 **Instrument Maintenance (Power Station)** (3/82–9/87) **Power Station Instrument Repairer** (3/78–2/82)
Maintenance and calibration of electrical power plant monitoring and control instrumentation equipment.

S5 **Communications Terminal AN/TSC–109 Repair** (3/87–Present)
Maintenance on the communications terminal AN/TSC-109.

Health Physicist (3/82–9/83)
Power Station Health Physicist (3/78–2/82)
Use of radiological surveys and fluid processing treatment ensuring acceptable levels of radiation.

S6 **Special Operations Combat Diving, Supervision** (3/87–Present)
Supervision of special operations combat diving.

Special Demultiplexer Equipment Maintenance (AN/TCA–4) (3/82–8/85) **Digital Converting Programming Group AN/TC A–4** (10/73–2/82)
Maintenance of specialized demultiplex equipment assemblages.

S7 **Secure Communications Equipment Maintenance (Scope Safe)** (3/82–Present) **Scope Safe System** (10/73–2/82)
Maintenance of specialized equipment in a secure communications system.

S8 **Multiple Launch Rocket System Organizational Maintenance Mechanic** (9/81–Present)
Maintenance of the multiple launch rocket system (MLRS) unit.

M16 Ballistics Computer (10/73–8/76)
Maintenance of M16 ballistics computer.

S9 **Defense Sensor Interpretation and Application Training Program (DSIATP)** (9/84–9/85) **Imagery Exploitation Defense Sensor Interpretation Training Program (DSAITP)** (3/82–8/84)
Defense Sensor Interpretation Training Program (10/73–2/82)
Microscale interpretation, electronic data reporting, storage, retrieval.

T1 **Switching Equipment Maintenance (Overseas AUTOVON)** (3/82–9/89) **Overseas AUTOVON Switch** (10/73–2/82)
Maintenance on switching equipment in the overseas automatic voice network (AUTOVON).

T2 **Teletypewriter Maintenance (MOD 40TTY)** (3/82–Present) **Model 40 Teletypewriter Repair Maintenance** (3/80–2/82)
Maintenance of the Model 40TTY.

Sniper (10/73–8/76)
Highly accurate sharpshooting, usually at long range.

T3 Computer Operations (GE 600/Honeywell 6000) (3/82–Present) **GE 600/Honeywell 6000** (10/73–2/82)
Operation of the General Electric 600 and Honeywell 6000 computers.

T4 TENCAP Operations (9/88–Present) **TENCAP Operations and Maintenance** (9/87–8/88) **Equipment Operation/Maintenance (TENCAP/MAGIIC)** (3/87–8/87) **TENCAP Operations and Maintenance** (3/86–Present)
Operation and Maintenance of TENCAP system.

Nuclear/Conventional Power Plant Chief (3/78–8/79) **Power Plant Chief** (9/79–2/82)
Supervision of electric power production facility.

T5 Patriot Intermediate Level Maintenance (9/84–9/90)
Maintenance of PATRIOT AD system equipment.

Burroughs B–3500 (10/73–8/80)
Operation of data processing computer B–3500 (Burroughs Corporation).

T6 Electroencephalograph Specialty (EEG) (3/82–Present) **Electroencephalograph Operator (EEG)** (9/76–2/82)
Operation of EEG equipment.

T7 Interim Theater ADPE Service Center (ITASC) Repairer (3/86–9/89)
Maintenance of interim theater ADPE service center equipment.

Improved TOW Vehicle (ITV) Turret Mechanic (9/78–8/80)
Maintenance of the ITV turret.

T8 Division Supply Accounting (DS4/Direct Support Unit Standard Supply System) (3/82–Present) **DS4/Direct Support Unit Standard Supply System** (3/79–2/82)
Use of DS4 system to maintain and update supply accounts in divisional units.

T9 Cryptanalysis (3/77–Present)
Analysis of encrypted communications to determine system of encryption and to effect eventual solution.

U1 Enciphered Signals Traffic Analysis (3/82–Present) **Radio Teletype Analysis** (10/73–2/82)
Analysis of intercepted radio teletype signals.

U2 Power Generation Equipment, Unit Maintenance (3/88–Present) **Power Generation Equipment, Organizational Maintenance** (3/84–2/88)
Maintenance of power generation equipment.

Cytotechnology (10/73–8/81)
Staining, mounting, and microscopic examination of cells to detect evidence of cancer and other pathological conditions which must be referred to a pathologist for final interpretation.

U3 Automated Message Media Equipment (AMME) Operator (3/81–Present)
Operation of Automated Message Media (AMME) equipment.

U4 Property Disposal Operations (10/74–8/85)
Property administration or materials segregation and classification.

U5 Commissary Operations (10/74–Present)
Commissary operations such as sales, stock replenishment, and produce, grocery department, or general administration.

U6 FA Weapons Maintenance (3/84–Present)
Maintenance of towed field artillery weapons.

FA Weapons Mechanic (9/76–2/82)
Maintenance of field artillery (FA) weapons.

U7 Economic Crime Investigation (9/85–Present)
Investigation of economic crimes.

Film Library Operations 10/74–2/82)
Cataloging, receiving, and administering audio-visual equipment and material.

Computer Operations (DAS3/PHOENIX) (3/82–Present)
Operation of the DAS3 computer system and PHOENIX software.

U8 Computer Operations (DAS3/PHOENIX) (3/82–Present)
Operation of the DAS3 computer system and PHOENIX software.

DAS3 Operator/DS4 (3/78–2/82)
Operation of the DAS3 computer system/DS4, Direct Support Unit Standard Supply System.

U9 Non-Morse Operations (ICR) (3/82–Present) **ICR Non-Morse Operations** (3/79–2/82)
Collection, analysis, reporting and forwarding of ICR Non-Morse Communications signals; operation of AN/TCA-4 (KINDER) Digital Converting Programming Group and the AN/GNK-9 (FLEXSCOP) collection and processing system.

V1 AMOSIST Specialty (3/82–3/89) **AMOSIST** (9/76–2/82)
Use of the Automated Military Outpatient System (AMOSIST) for triaging patients to acute minor illness clinic, emergency treatment room, or appropriate specialty clinic.

V2 Dial Central Office Equipment Repair (3/86–3/89)
Repair of dial central office equipment.

V3 Remote Sensor System Maintenance (3/81–3/89)
Maintenance of remote sensor systems.

Unattended Ground Sensor Systems Maintenance (9/76–2/81)
Maintenance of unattended ground sensor systems.

V4 Mobile Subscriber Equipment (MSE) Systems Control Center Operator (3/88–9/90)
Identifies personnel involved in MSE system control central operations.

Communications Technical Control Center, AN/TSQ–84 (3/78–2/82)
Maintenance of the AN/TSQ-84 communications center.

V5 Military Police Investigation (10/73–Present)
Investigation of criminal offenses for which the maximum punishment is confinement at hard labor for less than one year and offenses involving larcenies of property valued at less than $250 and involving another major crime.

V6 Spectrometric Oil Analysis (10/73–Present)
Analysis of used oil for wear metal content, using the fluid analysis spectrometer A/E 35U-3 and appropriate analytic and evaluation techniques.

V7 Guidance Counseling (3/82–Present) **Guidance Counselor** (9/81–2/82)
Counsels enlistment applicants regarding specific options available. Matches aptitude, physical qualifications, and applicant's desire to Army requirements and available training.

Honeywell H200 (10/73–8/76)
Operation of the Honeywell H200 computer.

V8 Mobile Subscriber Equipment (MSE) Systems Maintainer (3/88–Present)
Identifies personnel involved in MSE systems maintenance.

UNIVAC 1106/1108 (10/73–2/82)
Operation of the UNIVAC 1106/1108 computer.

V9 Communications Operation and Maintenance (Theater Forces Communications System Terminal) (9/87–9/90) **Communications Operation and Maintenance (Theater Nuclear Forces Communications Systems Terminal)** (3/82–8/87)
Maintenance of TACSATCOM Radio Set, AN/MSC-64 unit.

Control Data CDC 3300 (10/73–2/78)
Operation of the Control Data Corporation CDC 3300 computer.

W1 **Aerial Photoactive Sensor Repair** (3/87–Present)
Maintenance of aerial photoactive sensors.

M60A2 Tank (10/73–2/78)
Operation of the M60A2 tank.

W2 **Hawk Simulator Station Maintenance (AN/TPQ–29)** (3/87–Present)
I-HAWK Simulator Station Maintenance (AN/TPQ–29) (3/82–2/87) **AN/TPQ–29 Repair Simulator Station Repair** (9/76–2/82)
Maintenance of the AN/TPQ–29 Simulator Station.

W3 **Intermediate Level Maintenance of AN/MSM–105(V)1** (9/86–Present)
Maintenance of AN/MSM–105(V)1 equipment.

Video Technical Control Facility (AN/TSQ–85) Repairman (10/73–2/82)
Maintenance of the AN/TSQ–85 video technical control facility.

W4 **Enlarger System Maintenance** (3/87–Present) **Intercept Equipment Maintenance (AN/FLR–9)** (3/82–2/87) **AN/FLR–9 Intercept Equipment Maintenance** (3/76–2/82)
Maintenance of the AN/FLR–9 intercept equipment.

AN/TLR–9 Intercept Equipment (3/74–2/76)
Maintenance of the AN/TLR–9 intercept equipment.

W5 **OH–58D Maintenance** (9/87–Present) **AH–64/OH–58D Maintainer** (9/86–8/87)
Specialized maintenance on the powerplant, powertrain, and electrical systems of the AH–64 and OH–58D helicopters.

Personnel Data Analysis (formerly W6) (9/76–2/82)
Use of forms, transaction entries, verification, procedures, and standardized codes for information processed through SIDPERS.

W6 **Aircraft Survivability Equipment (ASE) Repair** (3/82–Present)
Maintenance of electronic aircraft survivability equipment.

Personnel Data Analysis (10/73–8/76)
Use of forms, transaction entries, verification, procedures, and standardized codes for information processed through SIDPERS.

W7 **Special Forces Underwater Operations** (10/73–Present)
Participation in Special Forces underwater operations.

W8 **Special Forces Military Free Fall Operations** (3/82–Present) **Special Forces Military Free Fall** (8/80–2/82)
Participation in Special Forces military operations requiring free-fall parachuting.

W9 **Special Forces Military Free Fall Operations and Underwater Operations** (3/82–Present) **Special Forces Military Free Fall and Underwater Operations** (8/80–2/82)
Participation in both Special Forces free-fall parachuting and underwater operations.

X1 **AH–64 Maintenance** (9/86–Present)
Maintenance of the AH–64 helicopter.

AH–64A/OH–58D (9/83–2/86)
Maintenance of the AH–64A and OH–58D attack helicopters.

Advanced Attack Helicopter Maintenance (3/83–8/83)
Maintenance of the AH–64 attack helicopter.

Subsistence Procurement Quality Assurance Inspector (3/77–2/80)
Assurance of the quality of procurement.

X2 **Dental Hygiene Specialty** (3/82–Present) **Dental Hygienist** (9/80–2/82)
Performance of oral hygiene prophylactic procedures, implementing individual and group oral disease control programs, and reversible restorative dental procedures.

X3 **TACFIRE Remote Terminal Operation** (9/85–Present)
TACFIRE Operations (3/82–8/85) **TACFIRE Remote Terminal Operator** (9/79–2/82)
Operation of variable format message entry device as part of TACFIRE in FA unit.

X4 **PATRIOT UHF Communications Operator** (9/86–Present)
Operation and maintenance of PATRIOT UHF communications equipment.

Photolocator Operator (9/79–2/82)
Operation of the photolocator in FA survey unit.

X5 **Radar Maintenance (FIREFINDER)** (3/82–Present) **Firefinder Radar Mechanic** (3/80–2/82)
Maintenance of firefinder radar.

X6 **Communications Maintenance (TSEC/KG–45)** (3/82–8/88) **TSEC/KG–45 Repairer** (9/79–2/82)
Maintenance of the TSEC/KG–45 equipment.

X7 **FAAR Organizational Maintenance** (3/81–Present) **AN/MPQ–49 FAAR Radar Mechanic** (9/79–2/81)
Qualification as FAAR radar mechanic.

X8 **COMSEC System Maintenance (SRA)** (3/82–8/86) **COMSEC System Maintenance at SRA** (9/79–2/82)
Maintenance of the COMSEC systems at the specialized repair activity (SRA) level.

X9 **General COMSEC Maintenance at SRA** (9/79–2/82)
General maintenance of the COMSEC systems at the SRA level.

Y1 **Transition** (9/84–Present)
Identification of individuals who have completed transition-type training.

TACFIRE Equipment Repairer (9/79–8/81).
Maintenance on TACFIRE equipment.

Y2 **Transition** (9/84–Present)
Identification of individuals who require transition-type training because of specialty conversion.

Ground Laser Locator Designator (GLLD) Repairer (10/73–8/76)
Maintenance on GLLD equipment.

Y3 **Mobile Subscriber Equipment (MSE) Systems Planner** (3/88–9/90)
Identifies personnel involved in MSE systems planning.

Safeguard (10/73–8/76)
Completion of three-week Safeguard Missile Defense System Orientation course, Fort Bliss, Texas.

Y4 **Signal Search and Development (Advanced Morse)** (3/82–2/88) **Advanced Morse Identification—Signal Search and Development (Morse)** (3/76-2/82) **Morse Search and Development** (10/73–2/76)
Specialized search and development of target for intercept.

Y5 **TEMPEST Inspection** (9/76–Present)
Inspection of TEMPEST systems to assure cryptographic security.

Y6 **Cardiac Catheterization Specialty** (3/82–Present) **Cardiac Catheterization Specialist** (9/76–2/82)
Assistance during specialized invasive cardiac test and examination.

Y7 **Sterile Pharmacy Specialty** (3/82–Present) **Sterile Pharmacy Techniques** (3/74–2/82)
Sterile pharmacy practices leading to the preparation of items such as intravenous additives used to combat infection, restore and maintain electrolyte balance, and meet nutritional requirements.

Y8 **Allergy-Clinical Immunology Specialty** (3/82–Present) **Allergy Specialist** (3/78–2/82)

Qualification to prepare allergan extracts, perform diagnostic tests, and administer parental hyposensitization treatments.

Y9 **Meteorological Data System (MDS) Unit Maintenance AN/TMQ–31** (3/86–Present)

Operation and maintenance of meteorological data system equipment.

STREAMLINER Maintenance Specialist (3/77–2/82)

Maintenance of specialized equipment used in the STREAMLINER communications system.

Z1 **Aerial Scout Observation (Scout)** (3/82–8/87) **Aerial Scout Observer** (9/81–2/82)

Knowledge of aerial scout functions.

Reciprocating Engine Repairman (10/73–8/78)

Maintenance of aircraft reciprocating engines.

Z2 **Automatic Message Switching Center Operations** (9/87–Present) **Mobile Message Switching Center Operations** (9/82–8/87)

Operation of message center, switching, automatic AN/TYC–39.

Blacksmith (10/73–8/76)

Working, forming, and shaping heated metal, using forge, anvil, and hammer.

Z3 **LANCE Organizational Maintenance** (3/82–Present) **LANCE Organizational Maintenance Mechanic** (3/81–2/82)

Completion of LANCE Missile Mechanic course at USAFAS or equivalent OJT.

Pipeline Weld Radiographic Inspection Set (10/73–8/76)

Operation of radiographic inspection set for pipeline welds.

Z4 **Helicopter Avionics Maintenance (Blackhawk UH–60A)** (3/82–Present)

Maintenance of COMSEC Navigation and Flight Control Systems at AVUM level on BLACKHAWK Helicopters.

Inspector General NCO (9/76–2/79)

Completion of orientation course and performance of inspector general duties.

Z5 **Enlisted Aide** (3/86–Present)

Serving as an enlisted aide on general officer personal staff.

Modular Engine Test Stand (METS) (10/73–2/82)

Maintenance on the Modular Engine Test Stand (METS).

Z6 **Explosive Detector Dog Handling** (9/76–Present)

Use and handling of dogs capable of detecting explosives.

Z7 **Telemetry Internals Analysis** (9/83–Present)

Indentifies personnel involved in telemetry internals analysis.

Z8 **Advanced ELINT Collection and Analysis** (9/83–Present)

Identifies personnel performing advanced ELINT collection and analysis.

Depot-Level Maintenance (10/73–8/76)

Depot-level maintenance (disassembly, major repairs and modifications, and inspection) of aircraft.

Z9 **Communications Maintenance (SG–3082 and AN/TTC–38)** (3/82–8/86) **SB–3082 Electronic Cordless Semi-Automatic Switchboard and AN/TTC–38 Ancillary Equipment** (3/74–2/82)

Installation and maintenance of the SB–3082 switchboard and maintenance of AN/TTC–38 ancillary equipment such as telephones and converters.

4A **Reclassification Training** (9/88–Present)

Identifies personnel who have been involuntarily reclassified and require formal training.

Appendix D

Enlisted Career Management Fields

A career management field (CMF) is a grouping of related Army enlisted MOS's that is provided for use in the career development and counseling of enlisted personnel. Each career management field is structured to allow maximum upward mobility and follows a logical progression of related MOS's, ranging from trainee positions to leadership and supervisory positions.

The CMF is represented by a two-digit number and a title. When a CMF has a subfield, a third number is added to identify it. For example, CMF 52 (Power Production) has two subfields: Subfield 521 (Electrical Power Production) and subfield 522 (Nuclear Power Production). Each subfield includes only closely related MOS's.

This appendix provides summaries which outline the duties and qualifications of the CMFs and lists the subfields they contain.

00 Exceptional Management Specialties

A grouping of MOS's that are unrelated and must be considered individually. Qualifications vary considerably according to MOS.

11 Infantry (formerly Maneuver Combat Arms)

A grouping of MOS's that covers positions primarily in infantry units.

—Maneuver Combat Arms. A grouping of MOS's that covers positions primarily in infantry units and armor units. Infantry duties involve use of individual and crew-served weapons and armored vehicles and work in closely coordinated teams. Armor duties involve use of crew-served armor weapons and armored vehicles and work in closely integrated teams. Qualifications include knowledge of fundamental tactics, principles of fire and movement, use of individual light weapons, principles of field sanitation, protection from chemical contamination, map and aerial photo reading, use of compass, first aid, and preparation of rough maps and field sketches.

12 Combat Engineering

A grouping of MOS's that covers positions in engineer combat units. Duties involve construction tasks (roads, temporary shelters, bridges, rafts), laying and clearing of minefields, and conventional and atomic demolitions. Qualifications include ability to use power and hand tools, knowledge of rough carpentry and rigging, ability to identify and handle demolition ammunition, skill in operating small watercraft, and ability to fight in infantry units.

13 Field Artillery (formerly Field Artillery Cannon)

A grouping of MOS's that covers positions in field artillery cannon, missile, and target acquisition units. Duties involve operation, fire direction, and maintenance of field artillery guns and related weapons and working in closely controlled teams. (Prior to 9/76, CMF 13 was limited to MOS's that covered positions in field artillery cannon units only.)

15 Field Artillery Missiles

A grouping of MOS's that covers positions primarily in field artillery missile units. Duties involve emplacement, testing, and operation of field artillery missile systems. Qualifications include knowledge of the functioning, assembly, and testing of a wide variety of complex weapons systems. (Effective 9/76, CMF 15 was eliminated and the MOS's were reclassified under CMF 13, Field Artillery.)

16 Air Defense Artillery (ADA)

A grouping of MOS's that covers positions primarily in air defense units. Duties involve emplacement, assembly, testing, and operation of air defense weapons systems. Qualifications include knowledge of the functioning, assembly, and testing of highly intricate weapons systems.

17 Combat Surveillance and Target Acquisition

A grouping of MOS's that covers positions primarily in artillery units. Duties involve operation of combat surveillance and target acquisition systems. Qualifications include ability to determine locations, distance, direction and elevations from topographic maps; knowledge of artillery plotting procedures; familiarity with the function and operation of combat surveillance and target acquisition systems; and knowledge of basic mathematics. (Effective 9/76, CMF 17 was eliminated; the target acquisition MOS's were reclassified under CMF 13 (Field Artillery) and the combat surveillance MOS's were reclassified under CMF 96, Military Intelligence.)

18 Special Forces (formerly Special Operations)

A grouping of MOS's that covers positions in special operations units and in joint headquarters. Duties involve participation in special operations in one or all of the interrelated fields of unconventional warfare, foreign internal defense, strike operations, strategic reconnaissance, and counterterrorism. Qualifications include exceptional ability for oral communications, analytical ability, number facility, and demanding physical qualifications.

19 Armor

A grouping of MOS's that covers positions in armor combat units and in headquarters of division or higher level. Duties involve mechanized reconnaissance or employment or crew served armor weapons and armored vehicles. Qualifications include knowledge of fundamental combat tactics, ability for effective oral communication, reasoning ability, and number facility.

21 Ballistic Missile Repair

A grouping of MOS's that covers positions in field artillery units and in maintenance units. Duties involve maintenance of missiles and related equipment. Qualifications include knowledge of the functioning, assembly, testing, and maintenance of complex weapons systems. (Effective 9/77, CMF 21 was eliminated and the MOS's were reclassified under CMF 27 (Ballistic/Land Combat Missile and Light Air Defense Weapons Systems Maintenance.))

23 Air Defense System Maintenance (formerly Air Defense Missile Maintenance)

A grouping of MOS's that covers positions in air defense units and in missile maintenance units. Duties involve assembly and testing of air defense weapons and maintenance of missiles, guidance equipment, fire control equipment, fire distribution systems, radar, and computers. Qualifications include knowledge of functioning, assembly, testing and maintenance of Safeguard weapons systems, electromechanical and hydraulic basis of remote antenna positioning, and knowledge of binary system.

25 Visual Information (formerly Audio-Visual)

A grouping of MOS's used for audio-visual activities Army-wide. Duties involve radio and television equipment, still and motion picture photography, audio-visual equipment repair, and graphic illustrator.

26 Non-Integrated Radar Maintenance

A grouping of MOS's that covers positions primarily in signal corps units. Duties involve maintenance of radar equipment. Qualifications include knowledge of fundamentals of electricity/electronics, precautions required in working with high voltage equipment, and use of schematic diagrams and electrical measuring devices. (Effective 3/78, CMF 26 was eliminated and the MOS's were reclassified under CMF 23 and CMF 29.)

27 Land Combat and Air Defense System Direct and General Support Maintenance (formerly Land Combat and Air Defense System Intermediate Maintenance) (formerly Ballistic/Land Combat (LC) Missile and Light Air Defense (LAD) Weapons Systems Maintenance) (formerly Combat Missile Maintenance)

A grouping of MOS's that covers positions primarily in field artillery and maintenance units. Duties involve maintenance of various weapons systems. Qualifications include basic electrical, electronic, mechanical, and mathematical abilities and aptitude.

—Combat Missile Maintenance. A grouping of MOS's that covers positions primarily in field artillery units and maintenance units. Duties involve maintenance and repair of various weapons systems. Qualifications include knowledge of the funcitoning, assembly, testing, maintenance, and calibrations of various complex weapons systems.

28 Aviation Communications Electronics Systems Maintenance (formerly Aviation Communications—Electronics Systems Maintenance)

A grouping of MOS's that covers positions primarily in maintenance, aviation, and signal units. Duties involve maintenance on a variety of photographic, surveillance, and avionic equipment. (Effective 9/89, CMF 28 was eliminated and the MOS's were transferred to CMF 67, Aircraft Maintenance.)

29 Signal Maintenance (formerly Communications-Electronics Maintenance)

A grouping of MOS's that are used in combat arms, aircraft, signal, and maintenance units. Duties involve maintenance for radar, electronics equipment, communications equipment and automatic electronic switching equipment. Qualifications include mechanical, electrical/electronic, reasoning, and verbal abilities.

31 Signal Operations (formerly Communications-Electronics Operations) (formerly Field and Area Communications Maintenance)

A grouping of MOS's used in signal and tactical units. Duties involve operation and operator maintenance on electronics equipment. Qualifications include mechanical, verbal, and reasoning ability.

—Field and Area Communications Maintenance. A grouping of MOS's that covers positions primarily in signal corps units. Duties involve maintenance and repair of various tactical electronics equipment.

32 Fixed Plant Communications Maintenance

A grouping of MOS's that covers positions primarily in U.S. Army Communications Center (USACC) units. Duties involve operation and maintenance of fixed plant communications equipment. Qualifications include knowledge of the theory of operation and repair of fixed station electronic equipment, fundamentals of radio propagation, and precautions when working with high-voltage equipment. (Effective 3/78, CMF 32 was eliminated and the MOS's were reclassified under CMF 29 and CMF 31.)

33 Electronic Warfare/Intercept Systems Maintenance

Duties involve repair, maintenance, or supervision of repair of EW/Intercept systems used in both mobile and fixed sites. Qualifications include knowledge and tools commonly used by electricians and electronic workers, safety precautions required in working with electrical equipment, ability to read wire diagrams and technical manuals, and categories of equipment maintenance.

35 Electronic Maintenance and Calibration (formerly Electrical/Electronic Instrument Maintenance)

A grouping of MOS's that covers positions primarily in maintenance, aircraft, and medical units. Duties involve calibration and performance of all levels of maintenance and repair of various electrical/electronic and mechanical equipment. (Effective 3/78, CMF 35 was eliminated and the MOS's were reclassified under CMF 29 and CMF 91.)

36 Wire, Antenna, and Central Office Maintenance

A grouping of MOS's that covers maintenance positions primarily in signal corps units. Duties involve installation and maintenance of field wire, open wire, and cable communications systems; antenna systems; splicing communications cables; and maintenance on manual and dial telephone exchange equipment. Qualifications include knowledge of fundamentals of electricity and sound transmission, reading and understanding circuit diagrams, and techniques and maintenance involved in the installation and maintenance of wire systems. (Effective 3/78, CMF 36 was eliminated and the MOS's were reclassified under CMF 29 and CMF 31.)

46 Public Affairs

A grouping of MOS's that are used for public affairs Army-wide. Duties involve newspaper, radio and television equipment, and still photography.

51 General Engineering

A grouping of MOS's that covers positions primarily in engineer units. Duties involve use of construction skills (including construction surveying and drafting) for erection and maintenance of buildings, bridges, port facilities, roads, airfields, drainage structures, pipelines, storage tanks, and related facilities.

52 Power Production

A grouping of MOS's that covers positions primarily in nuclear power plants and in other engineer units. Duties involve operation and maintenance of power-generating equipment, transmission systems, and accessory equipment; maintenance of nuclear power plant equipment; and radiological surveys. Effective 3/78, CMF 52 was deleted.

54 Chemical

A grouping of MOS's that covers positions in chemical units, supply and service units, and in headquarters of battalion and higher level. Duties involve operation of flame equipment; decontamination of personnel, materiel, structures, and areas that have been under nuclear, biological, or chemical attack; generation of smoke for concealment and camouflage effect; staff activities relating to operations, training, and intelligence; chemical and physical testing of clothing, food, chemicals, paints, plastics, and similar materials. Qualifications include knowledge of safety precautions for work in contaminated areas and handling of chemical warfare materials, types and purpose of chemical agents, characteristics and uses of smoke, and effect of weather on chemical materials.

55 Ammunition

A grouping of MOS's that covers positions in ammunition support units Army-wide. Dutiesd involve support, supply, inspection, renovation, disposal, and maintenance of conventional, special, and nuclear ammunition. Qualifications include knowledge of the hazards and safety measures involved in handling, storing, transporting, destroying, and neutralizing various types of ammunition, ammunition components, and nuclear weapons.

57 Field Services

A grouping of MOS's that cover positions primarily in supply and service, supply and transportation, and field service units. Duties involve repair and alteration of textile, canvas, and leather supplies and equipment; laundry, bath and impregnation functions; memorial activities; supervising general work details; and general labor services. (Effective 3/77, CMF 57 was eliminated and the MOS's were reclassified under CMF 76, Supply.)

63 Mechanical Maintenance

A grouping of MOS's that covers positions primarily in support maintenance units. Duties involve maintenance of mechanical and electromechanical equipment. Qualifications include knowledge of handtools and metalworking tools, safety precautions, blueprint reading, and technical manuals.

64 Transportation

A grouping of MOS's that covers positions primarily in transportation units. Air operations MOS's cover positions in aviation units; motor transport MOS's cover positions in units Army-wide. (Prior to 3/76, the designation for transportation MOS's was CMF 65.) Duties involve operation and preventive maintenance of light, heavy cargo, and passenger vehicles; operation and maintenance of railway rolling stock and marine harborcraft; air traffic control; and movements control. (Effective 9/87, CMF 64 was deleted and redesignated CMF 88, Transportation.)

65 Transportation

Effective 3/76, CMF 65 was eliminated and the MOS's were reclassified under CMF 64.

67 Aircraft Maintenance (formerly Aviation Maintenance) (formerly Aircraft Maintenance)

A grouping of MOS's that covers positions in all types of aviation units Army-wide. Subfields include: Aircraft Maintenance (671); Aircraft Components Repair (672). Duties involve servicing and maintenance of aircraft, aircraft components, armament subsystems, and target aircraft. Qualifications include ability to use handtools, instruments, and gauges; ability to understand and interpret oral and written technical instructions, plans, blueprints and schematic diagrams; and specific mechanical, electrical, and electromechanical skills.

71 Administration

A grouping of MOS's that covers positions in units Army-wide. Duties involve general administration; personnel, legal, medical, and other specialized administration; postal service; clerical work; fiscal accounting; newspaper, radio, and television communication; and supervision of recreational activities. Qualifications include: basic clerical, typing, bookkeeping, stenography, and communication abilities and knowledge of clerical and administrative procedures, office management, preparation and use of military publications and correspondence, preparation and routing of orders, design and use of filing systems, and record keeping.

72 Telecommunications and Audio Visual

A grouping of MOS's that covers positions in radio, radio-teletype, and communications center facilities Army-wide; audiovisual MOS's cover positions in signal corps units and maintenance units. Duties involve operation of radio, teletype, telephone and data equipment; and transmission, reception, and delivery of Army communications. (Effective 3/77, Subfield 722 was eliminated and the MOS's were reclassified under CMF 84, Public Affairs and Audio Visual.)

74 Automatic Data Processing

A grouping of MOS's that covers data processing positions in units engaged in data processing, personnel, communications, finance, and supply. Operational duties involve systems analysis, programming, computer operations, and coding data for use with punched cards, magnetic tapes, and disks. Maintenance duties involve maintenance on tabulating equipment, automatic data processing equipment, viewer computer systems, and related test equipment. Maintenance MOS's require electronic and mechanical aptitude, number facility to solve formulas used in test computations, ability to make delicate adjustments and repairs, and perceptual speed for reading circuit diagrams and mechanical blueprints.

76 Supply and Services (formerly Supply)

A grouping of MOS's that covers positions in all types of units Army-wide. Duties may involve procurement, receipt, storage, issue, and administrative control of all classes of supplies, spare parts, and materiel (except ammunition, nuclear materials, and petroleum). Qualifications include: knowledge of standard supply records and clerical procedures, standard quantity measurements, color codes used to identify supplies, supply catalogs for identification of supply items, safety precautions involved in moving and storing supplies, and operation of office machines without minimum speed requirement.

77 Petroleum and Water

A grouping of MOS's involved in petroleum supply and storage, water treatment, and laboratory units/activities. Duties involve receipt, storage and distribution of bulk and packaged petroleum products, water storage, distribution and production/purification operations, and standard physical and chemical testing of petroleum products.

79 Recruitment and Reenlistment

Two MOS's primarily concerned with recruiting personnel for Army service and operating the reenlistment system. Duties involve contacting prospective enlistees/reenlistees, counseling concerning job and career opportunities in the Army, and performing administrative functions necessary to accomplish enlistment or reenlistment.

81 Topographic Engineering (formerly Topographic Engineering and Map Reproduction)

A grouping of MOS's that covers positions primarily in engineering units. Duties involve topographic survey, map making, reproduction, and printing; topographic instrument and reproduction equipment repair, terrain analysis, and illustrating and model making.

84 Public Affairs and Audio-Visual

A grouping of MOS's which are used for Public Affairs and audio-visual activities Army-wide. Duties consist of newspaper, radio and television communications, maintenance of radio and television equipment, still and motion picture photography, audio-visual equipment repair, and graphic illustrator. (Effective 3/87, CMF 84 was deleted and divided into CMF 25, Audio Visual and CMF 46, Public Affairs.)

88 Transportation

A grouping of MOS's mostly used in transportation units. All MOS's dealing with railway operations have been designated as Reserve Forces MOS's. Duties involve operation and preventive maintenance of passenger vehicles and light, medium, and heavy cargo vehicles, operation and maintenance of marine lighterage and harborcraft, railway motive power and rolling stock, air traffic control, and movements control.

91 Medical

A grouping of MOS's that covers positions in medical units Army-wide. Duties involve medical care and treatment; medical laboratory testing and analysis, and fabrication and repair of prosthetic appliances. Qualifications include knowledge of the organization and functions of the Army medical service; basic anatomy, physiology, first aid and emergency medical treatment; nomenclature and usage of basic drugs; transporation of sick and wounded; field sanitation; basic nursing techniques; basic principles of disease prevention.

92 Petroleum

A grouping of MOS's that covers positions in petroleum storage and laboratory units. Duties involve receipt, storage, preservation, and distribution of bulk and packaged petroleum products and standard physical and chemical testing of petroleum products. (Effective 3/87, CMF 92 was deleted and redesignated CMF 77, Petroleum and Water.)

93 Aviation Operations

A grouping of MOS's used in Army aviation and air traffic control units worldwide. Duties include visual and radar monitoring of aircraft takeoff, flight, and approach to landing; operations of control towers and preventive maintenance of control tower, radar, and ground control equipment.

94 Food Service

A grouping of MOS's that covers positions in the following areas: company, consolidated, and hospital food service activities; bakeries; meat-cutting plants; food service elements of headquarters; and personal staffs of general officers. Duties involve preparation and cooking of food; food service advisory and administrative activities; and service as enlisted aide or cook on the personal staff of a general officer. Qualifications include knowledge of sanitary standards and safety precautions, subsistence storage principles, and use of food service machinery and equipment.

95 Military Police (formerly Law Enforcement)

A grouping of MOS's that covers law enforcement positions. Duties involved patrolling areas, apprehending violators, controlling traffic, quelling disturbances, protecting security sites, guarding military prisoners and prisoners of war, providing correctional treatment for military prisoners in confinement facilities, criminal investigation, and criminal laboratory analysis.

96 Military Intelligence

A grouping of MOS's that covers positions primarily in military intelligence units and in intelligence staff sections in other units. Duties may involve the collection, analysis, protection, and dissemination of intelligence information through observation, compilation, investigation, survey, language translation and interpretation; electronic listening and sensing; photograph and image interpretation; censorship; technical analysis of enemy equipment; and application of security programs.

97 Band

A grouping of MOS's that covers positions in band units Army-wide. Duties involve playing brass, woodwind, or percussion instruments in marching, concert, dance, stage, and show bands; playing in combos and instrumental ensembles; and singing in vocal groups and writing and arranging music, when assigned. Qualifications include ability to play one or more band instruments; musical memory for playing compositions without sheet music; and ability to perform certain musical scores at sight.

98 Signals Intelligence (SIGINT) Electronic Warfare (EW) Operations (formerly Electronic Warfare (EW) Cryptologic Operations)

A grouping of MOS's that cover positions in fixed and mobile units engaged in support of strategic and tactical operations. Duties involve collection of electromagnetic emissions, analysis of these emissions, security of friendly communications and noncommunications, and electronic warfare operations.

Appendix E

Warrant Officer Special Qualifications Identifiers

Special Qualifications Identifiers are used with warrant officer MOS's to identify special qualifications possessed by an individual. The SQI is either a number or a letter; it occupies the fifth character of an MOS designation, replacing the zero that normally occupies that position.

Award of an SQI other than zero may mean that a person's records will show the title of the SQI rather than the title of the MOS. For example, the title for MOS 951A0 is Criminal Investigator; the title for MOS 951AK will normally appear as Polygraph Examiner.

The Special Qualifications Identifiers listed below are arranged by the numeric codes first, then by the alphabetic codes. Each SQI is accompanied by a title and a brief description.

0 No Special Qualifications

Used as the fifth character of the MOS designation when the position requires no special qualifications.

1 Master of Class A-1 Freight and Towing Vessels upon Coastal and Inland Waters, Mate of Class A-2 Unlimited Motor Vessels upon Oceans, Radar Observer *or* Chief Engineer of Class A-1 Motor Vessels and Assistant Engineer of Class A-2 Unlimited Motor Vessels (formerly Master of Coastal Vessels up to 250 Tons *or* Chief Engineer of Coastal Vessels up to 750 Horsepower)

Identifies persons who have been certified and issued the appropriate license by the U.S. Army Marine Qualifications Board. "Master" or "Mate" used with MOS 500A; "Chief Engineer" used with MOS 510A; currently used with MOS's 880A and 881A.

2 Master of Class A-2 Unlimited Motor Vessels upon Oceans, Radar Observer *or* Chief Engineer of Class A-2 Unlimited Motor Vessels (formerly Master of Coastal Vessels up to 500 Tons *or* Chief Engineer of Coastal Vessels up to 1,200 Horsepower)

Identifies persons who have been certified and issued the appropriate license by the U.S. Army Marine Qualifications Board. "Master" or "Mate" used with MOS 500A; "Chief" or "Assistant Engineer" used with MOS 510A; currently used with MOS's 880A and 881A.

3 Master of Oceans Unlimited Vessels *or* Chief Engineer of Oceans Unlimited Vessels

Identifies persons who have been certified and issued the appropriate license by the U.S. Army Marine Qualifications Board. "Master" or "Mate" used with MOS 500A; "Chief" or "Assistant Engineer" used with MOS 510A.

4 Harbormaster/Pilot *or* Marine Inspector (formerly Research, Development, Test, and Evaluation Technician—see SQI "Z")

Identifies persons who have been certified and issued the appropriate license by the U.S. Army Marine Qualifications Board. Used with MOS 500A and 510A.

5 Power Systems Technician *or* Power Generation Technician (formerly Nuclear Power Plant Superintendent—see below)

Identifies persons who are qualified to supervise operations and maintenance of high-voltage power stations and transmission systems. Currently used with MOS's 210A and 213A.

Nuclear Power Plant Superintendent

Identifies persons who are qualified to supervise operations and maintenance of power plants equipped for nuclear power generation and who have completed the Nuclear Power Plant Operator course at the U.S. Army Engineer School and the Radiological Safety course, at the U.S. Army Ordnance School.

6 Instruction Methods Developer (IMD) (formerly Instrument Flight Examiner—see SQI "F")

Identifies persons who are qualified in design, development, test, management, or evaluation of instructional systems. Used with any MOS.

7 Parachutist

Identifies persons who have completed airborne training.

8 Instructor

Identifies persons qualified as fulltime formal instructors at an Army Service School or other organized training facility. Used with any MOS.

9 Safeguard System Technician (formerly Safeguard)

Identifies persons who have completed the Safeguard Missile Maintenance Technician course or who have completed at least six months work experience with Safeguard system tactical support equipment.

A Air Traffic Control Technician

Identifies persons who are qualified to manage air traffic control operations and procedures and who have completed the Officer/Warrant Officer Air Traffic Control course at the U.S. Army Aviation School. Used with any Aviation MOS.

B Aviation Safety Officer (formerly Flight Safety Technician)

Identifies persons who are qualified to manage aviation unit flight safety programs.

C Instructor Pilot

Identifies persons qualified to instruct student and aviator personnel in the fundamentals of flight, to analyze flight training maneuvers, and to check out aviators on new equipment and aircraft. Used with any Aviator MOS.

D Aeromedical Evacuation Pilot

Identifies persons who are qualified in the procedures and techniques of aeromedical evacuation and who have completed the Army Medical Service Aviator course or have had equivalent experience. Used with any Aviator MOS.

E Aircraft Armament Maintenance Technician (formerly Aircraft Armament Maintenance)

Identifies persons who are qualified to supervise maintenance and repair of aircraft armament systems and who have completed the Aircraft Armament Repair Supervisor course or have equivalent experience. Used with any Aviation MOS.

F Instrument Flight Examiner

Identifies persons who are qualified to conduct written and flight examinations of aviators for award or retention of instrument certificates and who have completed the Instrument Flight Examiner course at the U.S. Army Aviation School. Used with any Aviator MOS.

G Aircraft Maintenance Technician (formerly Investigative Photography—see SQI "N")

Identifies persons who are qualified to supervise maintenance and repair of aircraft and who have completed the Maintenance Resource Management and Maintenance Operations phase of the Aircraft Maintenance Officers course at the U.S. Army Transportation School. Used with any Aviation MOS.

H Aerial Scout (formerly Defense Against Methods of Entry (DAME)—see ASI 9K in the Warrant Officer Additional Skill Identifiers Appendix)

Identifies persons who have performed aerial scout duties for a minimum of 60 days or who have completed the Air Cavalry/Attack Helicopter Commander Training course or the Air Cavalry Qualifications course at the U.S. Army Armor School.

J Engineer Test Pilot (formerly Engineering Test Pilot) (formerly Maintenance Test Pilot—see below)

Identifies persons who have successfully completed the U.S. Naval Test Pilot School.

Maintenance Test Pilot (formerly Defense Against Sound Equipment (DASE)—see ASI 9L in the Warrant Officer Additional Skill Identifiers Appendix)

Identifies persons who are qualified to conduct maintenance and/or functional test flights and who have completed the prescribed course of instruction for aircraft maintenance test pilots at the U.S. Army Transportation School.

K Polygraph Examiner (formerly Certified Polygraph Examiner)

Identifies persons certified to conduct polygraph examinations. Currently used with MOS's 311A, 351B, and 351C.

L COMSEC Logistics Technician (formerly Logisitics Technician)

Identifies persons holding the position of Criminal Investigation Logistics Technician *or* Communications Security (COMSEC) Logistics Technician. Criminal Investigation Logistics Technician is used with MOS 951A (Criminal Investigator) and identifies persons who are qualified to conduct or supervise criminal investigations and crime surveys involving logistical activities and who have completed prescribed courses at the U.S. Army Logistics Management Center. COMSEC Logistics Technician is used with MOS 290A (Telecommunications Technician) and identifies persons who are qualfied to supervise operation of communications security (COMSEC) logistics support activities and who have completed 6 months of experience in an assignment dealing with COMSEC logistics skills.

M Latent Print Examiner (formerly Latent Fingerprint Examiner)

Identifies persons who are qualified as expert latent fingerprint examiners and who have completed the 104-week Latent Fingerprint Examiner course at the U.S. Army Criminal Investigation Laboratory. Currently used with MOS 311A.

N Photographic Forensic Photographer *or* Intelligence Photographer (formerly Forensic Photographer) (formerly Nuclear Power Plant Superintendent—see SQI "5")

Identifies persons holding the position of Forensic Photographer (formerly Investigative Photographer) *or* Intelligence Photographer. Forensic Photographer was formerly used with MOS 951A (Criminal Investigator) and identifies persons who have completed the 104-week Forensic Photographer course at the U.S. Army Criminal Investigation Laboratory. Intelligence Photographer was formerly used with MOS 100B (Utility/Observation Helicopter Pilot), MOS 971A (Counterintelligence Technician), and MOS 972A (Area Intelligence Technician) and identifies persons who have completed the Intelligence Photography course at the U.S. Army Intelligence Agency. Currently used with MOS's 311A, 351B, and 351C.

P Questioned Document Examiner

Identifies persons qualified as expert documents examiners. Currently used with MOS 311A.

Q Standardization Instructor Pilot

See SQI "C."

R Forensic Chemist (formerly Aircraft Repair Technician—see SQI "G")

Identifies persons who have completed the 27-week Forensic Chemist course at the U.S. Army Criminal Investigation Laboratory. Currently used with MOS 311A.

S Firearms and Toolmark Examiner (formerly Aerial Scout—see SQI "H")

Identifies persons who have completed the 104-week Firearms and Toolmark Examiner course at the U.S. Army Criminal Investigation Laboratory. Currently used with MOS 311A.

T Transition

Identifies persons who begin either formal schooling or on-the-job training for cross-training into an existing MOS and/or qualification training for new weapons or equipment.

U General Staff Administrative Technician (formerly Maintenance Test Pilot—see SQI "J")

Identifies persons qualified to supervise the office clerical staff of a lieutenant general and higher. Currently used with MOS 420A.

V Intermediate Maintenance Repair Technician *or* COMSEC Equipment Repair Technician (formerly Support Repair Technician)

Identifies persons holding the position of Depot Support/General Support (DS/GS) Repair Technician *or* Communications Security (COMSEC) Equipment Repair Technician. DS/GS Repair Technician is used with any non-aviation MOS to identify persons who are qualified to conduct or supervise maintenance activities. COMSEC Equipment Repair Technician was formerly used with MOS 290A (Telecommunications Technician) and identifies persons who are qualified to supervise maintenance of communications security equipment. Currently used with any nonaviation MOS.

W ADP Operations Technician

Identifies persons who are qualified to supervise operation of automatic data processing (ADP) machines and ancillary equipment and who have completed the ADP Officers course at the U.S. Army Institute of Administration or have equivalent occupational and educational experience.

X ADP Programmer/Systems Analysis Technician

Identifies persons qualified to perform automatic data processing (ADP) programming and conduct systems analyses.

Y Telecommunication System Analyst (formerly Telecommunications Systems Analyst) (formerly Air Traffic Control Technician—see SQI "A")

Identifies persons who are qualified to supervise or perform analysis of computer-driven telecommunications systems and who have completed the advanced Automatic Data Processing Systems Analysis course or have equivalent training and experience.

Z Research, Development, Test, and Evaluation Technician

Identifies persons qualified in design, development, test or evaluation of military material, doctrine, methods, systems, or organizations. Used with any MOS.

Appendix F

Warrant Officer Additional Skill Identifiers

An Additional Skill Identifier is used with a warrant officer MOS to identify and define specialized skills or equipment. It consists of a number and a letter, and occupies the sixth and seventh positions in an MOS designation. The award of an ASI requires two or more weeks of formal schooling or equivalent work experience.

Each Additional Skill Identifier listed below is accompanied by a title and a brief description.

1A	**OH–58D Pilot (formerly OH–13 Pilot)**	Qualified as OH–58D or OH–13 pilot.
1B	**CH–47D Pilot (formerly OH–47D Pilot) (formerly OH–23 Pilot)**	Qualified as OH–47D or OH–23 pilot.
1C	**OH–6 Scout Pilot (formerly OH–6 Pilot)**	Qualified as OH–6 pilot.
1D	**OH–58A/C Scout Pilot (formerly OH–58A/C Pilot (Scout Configuration)) (formerly OH–58 Pilot) (Scout Configuration)**	Qualified as OH–58A/C or OH–58 pilot.
1E	**UH–1 Pilot**	Qualified as UH–1 pilot.
1F	**Aviation Life Support Equipment Technician (formerly CH–34 Pilot)**	Qualified as aviation life support equipment technician or CH–34 pilot.
1G	**CH–47A/B/C Pilot (formerly CH–47 Pilot)**	Qualified as CH–47A/B/C or CH–47 pilot.
1H	**CH–54 Pilot**	Qualified as CH–54 pilot.
1J	**AH–1G Pilot**	Qualified as AH–1G pilot.
1K	**VH–3A Pilot**	Qualified as VH–3A pilot.
1L	**AH–64 Pilot (formerly CH–37 Pilot)**	Qualified as AH–64 or CH–37 pilot.
1M	**AH–1Q/AH–1S Pilot (formerly AH–1Q [Cobra TOW])**	Qualified as AH–1Q/AH–1S pilot.
1N	**UH–60 Pilot**	Qualified as UH–60 pilot.
1P	**OH–58A/C OBSN Pilot (formerly OH–58A/C Pilot) (formerly OH–58 Pilot)**	Qualified as OH–58A/C or OH–58 pilot.
1U	**EH–1 Pilot**	Qualified as EH–1 pilot.
1Y	**Non-Standard Helicopter Pilot**	Qualified as non-standard helicopter pilot.
1Z	**M–22 Gunner**	Knowledge of the M–22 armament subsystem and the tactical employment of UH–1 helicopters equipped with the M–22 aerial gunnery system.
2A	**O–1; TO–1 Pilot**	Qualified as O–1, TO–1 pilot.
2B	**T–41 Pilot**	Qualified as T–41 pilot.
2C	**U–1 Pilot**	Qualified as U–1 pilot.
2D	**Instruction Pilot (formerly U–6 Pilot; see below)**	Qualified to instruct in the fundamentals of flying, to analyze flight training maneuvers, and to check aviators in new equipment and aircraft.
	U–6 Pilot	Qualified as U–6 pilot.
2E	**U–8 Pilot**	Qualified as U–8 pilot.
2F	**T–42 Pilot**	Qualified as T–42 pilot.
2G	**U–9 Pilot**	Qualified as U–9 pilot.
2H	**U–10 Pilot**	Qualified as U–10 pilot.
2J	**U–21 Pilot**	Qualified as U–21 pilot.
2K	**OV–1/RV–1 Pilot (formerly OV–1)**	Qualified as OV–1, RV–1 pilot.
2L	**P2V Pilot**	Qualified as P2V pilot.
2M	**C–45 Pilot**	Qualified as C–45 pilot.
2N	**C–47 Pilot**	Qualified as C–47 pilot.
2P	**C–12 Pilot**	Qualified as C–12 pilot.
2Q	**CV–2 Pilot**	Qualified as CV–2 pilot.
2R	**RU–21 Pilot**	Qualified as RU–21 pilot.
2S	**UV–18 Pilot**	Qualified as UV–18 pilot.
2V	**RC–12 Pilot**	Qualified as RC–12 pilot.
2Z	**Non-Standard FW Pilot (formerly Non-Standard Fixed-Wing Aircraft Pilot)**	Qualified as non-standard fixed-wing aircraft pilot.
3A	**Avionics and Navigation Equipment Repair Technician**	Repair of avionics and navigation equipment.
3B	**Fixed C–E Equipment Repair Technician**	Repair of fixed communications electronic equipment.
3C	**Tactical C–E Equipment Repair Technician**	Repair of tactical communications electronic equipment.
3D	**Radar Equipment Repair Technician**	Repair of radars and ancillary equipment.
3E	**Satellite Communications System Repair Technician**	Repair of satellite communications terminal equipment.
3F	**Transmission Systems Repair Technician**	Repair of communications transmission equipment and systems.
3H	**Joint Planner**	Qualified for Joint Operations Planning System positions.
3K	**IBM 360/65 Technician**	Repair of the IBM 360/65 data processing equipment.
3L	**IBM 360/30 Technician**	Repair of the IBM 360/30 data processing equipment.
3M	**IBM 360/40 Technician**	Repair of the IBM 360/40 data processing equipment.

3N Army Autodin Systems Technician

Repair of Army autodin systems equipment.

3P AN/TSQ-73 Technician

Repair of the AN/TSQ-73 equipment.

3Q AN/TSQ-51 Technician

Repair of the AN/TSQ-51 equipment.

3R AN/TSQ-38 Technician

Repair of the AN/TSQ-38 equipment.

3S TACFIRE Technician (Litton L350)

Maintenance of tactical automatic data processing equipment and peripheral devices within the division artillery or field artillery brigade.

3T Electronic Switching Systems Technical Manager

Qualified in tactical electronics switching systems.

3U Digital/Automation Maintenance Technician

Repair of digital automation or computer equipment.

3X Cryptanalytic Technician

See ASI 9B.

4A Warrant Officer Senior Course (WOSC) Graduate

Graduates of Warrant Officer Senior Course.

4W Underwater Special Forces (formerly Underwater Special Operations)

Qualified for Underwater Special Forces positions.

4X Military Free Fall Special Forces (formerly Military Free Fall Special Operations)

Qualified for Free Fall Special Forces positions.

4Y Military Free Fall and Underwater Special Forces (formerly Military Free Fall and Underwater Special Operations)

Qualified for Free Fall and Underwater Special Forces positions.

5A Missile System Technician, Basic Hawk

Knowledge of the basic Hawk missile system.

5B Basic Product Improvement Program (PIP) (PIP–I)

Completion of Phase I of the PIP training.

5C Advanced Product Improvement Program (Phase II) (PIP–II)

Completion of Phase II of the PIP training.

5G Special Forces (SF)

Qualified for assignment to Special Forces (SF) positions and units.

5J Technical Escort

Qualified as a technical escort.

5K Critical Nuclear Surety

Qualified to hold critical nuclear surety positions.

5L Controlled Nuclear Surety

Qualified to hold controlled nuclear surety positions.

5V Salvage Diver

Qualivied as marine divers.

5Z Missile System Technician, Sergeant (formerly Field Artillery Missile System, Sergeant)

Knowledge of the Sergeant missile system.

6A M–1 Abrams Tank Maintenance Technician (formerly XM1 Maintenance) (formerly Defense Sensor Interpretation and Application Training Program [DSIATP]—see ASI 9A)

Qualified to perform maintenance and repair of the engine, drive, and chassis components of the M–1 Tank.

—XM1 Maintenance Technician. Qualified to perform maintenance and repair of the engine, drive, and chassis components of the XM1 Tank.

6B General Safety Technician

Qualified for General Safety Technician positions.

6C M2 Bradley Infantry Fighting Vehicle/M3 Cavalry Fighting Vehicle Maintenance Technician (formerly M2 Bradley Infantry Fighting Vehicle Maintenance Technician)

Maintenance of the M2 Bradley Infantry Fighting Vehicle.

6P Master Fitness Trainer

Qualified to perform as a master fitness trainer.

7A Military Pay Technician

Qualified to perform duties involving military pay.

7B Court Reporter

Qualified as court reporter.

7C RCA 301, 501

Operation or repair of RCA 301, 501 equipment.

7D RCA 3301—Spectra 70 Technician

Operation or repair of RC 3301—Spectra 70 equipment.

7E IBM 7000 Series

Operation or repair of IBM 7000 series equipment.

7F IBM 360 Technician

Operation or repair of IBM 360 equipment.

7G GE 600

Operation or repair of GE 600 equipment.

7H Burroughs 3500

Operation or repair of Burroughs 3500 equipment.

7J IBM 1401

Repair of IBM 1401 equipment.

7K UNIVAC 1004, 1005 Technician

Operation or repair of UNIVAC 1004, 1005 equipment.

7L NCR 500 Technician

Operation or repair of NCR 500 equipment.

7M IBM 1410

Operation or repair of IBM 1410 equipment.

7N IBM 1401, 1410, 1440, 1460, 1620

Operation or repair of IBM 1401, 1410, 1440, 1460, 1620 equipment.

7P GE 200 Series Technician

Operation of GE 200 series equipment.

7Q FORTRAN, 2d Generation

Use of Formula Translation (FORTRAN) 2d generation machine language in development of computer programs.

7R COBOL, 2d Generation

Use of Common Business Oriented Language (COBOL) 2d generation machine language in development of computer programs.

7S SAAL

Use of SAAL machine language in the development of computer programs.

7T FORTRAN, 3d Generation

Use of Formula Translation (FORTRAN) 3d generation machine language in development of computer programs.

7U Assembly Language, 2d Generation

Use of Assembly Language 2d generation machine language in development of computer programs.

7V COBOL, 3d Generation

Use of Common Business Oriented Language (COBOL) 3d generation machine language in development of computer programs.

7W Assembly Language, 3d Generation

Use of Assembly Language 3d generation machine language in development of computer programs.

7X Manpower/Force Manager

Knowledge of military and civilian manpower management policies including planning, programming, development, and evaluation of organizational structure, determination of requirements, allocation of resources, position classification, and familiarity with automated systems which support these functions.

7Y Executive Club Manager

Qualified as executive club manager.

7Z **SHAL–A Programming Language Technician (formerly SHAL–A Computer Language)**
Use of SHAL–A machine language in development of computer programs.

9A **Defense Sensor Interpretation and Application Training Program (DSIATP) (formerly ASI 6A)**
Qualified in the Defense Sensor Interpretation and Application Training Program.

9B **Cryptanalytic Technician (formerly ASI 3X)**
Qualified to decipher encrypted intercepted communications.

9C **Tactical Exploitation of National Space Capabilities Operation Technician (TENCAP)**
Qualified in TENCAP.

9D **Economic Crime Investigator**
Identifies Warrant Officers involved with USACIC, Economic Crime Investigator Specialty Program.

9E **Senior Economic Crime Investigator**
Identifies Warrant Officers involved with USACIC, Senior Economic Crime Investigation Specialty Program.

9K **Defense Against Methods of Entry (DAME) Technician (formerly SQI "H")**
Qualified to supervise personnel engaged in activities to defend against surreptitious entry.

9L **Defense Against Sound Equipment (DASE) Technician (formerly SQI "J")**
Qualified to supervise personnel engaged in activities to defend against surreptitious use of sound detection equipment.

9M **Technical Intelligence Technician**
Qualified in the identification, analysis, and evaluation of technological developments or in the operation, employment, or maintenance of enemy or potential enemy systems or materiel.

9N **Strategic Debriefing/Interrogation (formerly Aerial E/W Systems)**
Qualified for Strategic Debriefing/Interrogation positions; or knowledge of sophisticated electronic systems and special electronic mission aircraft.

A1 **OH-58A/C Observation Pilot**
Additional or alternate aircraft qualification on OH-58 A/C observation helicopter.

A2 **OH-58A/C Scout Pilot**
Additional or alternate aircraft qualification on OH-58 A/C scout helicopter.

A3 **OH-58D Scout Pilot**
Additional or alternate aircraft qualification on OH-58D scout helicopter.

A5 **OH-6 Scout Pilot**
Additional or alternate aircraft qualification on OH-6 scout helicopter.

B1 **UH-1 Pilot**
Additional or alternate aircraft qualification on UH-1 helicopter.

B2 **UH-60 Pilot**
Additional or alternate aircraft qualification on UH-60 helicopter.

B4 **EH-1 Pilot**
Additional or alternate aircraft qualification on EH-1 helicopter.

B5 **EH-60 Pilot**
Additional or alternate aircraft qualification on EH-60 helicopter.

C1 **CH-47A/B/C Pilot**
Additional or alternate aircraft qualification on CH-47A/B/C helicopter.

C2 **CH-47D Pilot**
Additional or alternate aircraft qualification on CH-47D helicopter.

C4 **CH-54 Pilot**
Additional or alternate aircraft qualification on CH-54 helicopter.

D1 **AH-1G Pilot**
Additional or alternate aircraft qualification on AH-1G helicopter.

D2 **AH-1Q/S Pilot**
Additional or alternate aircraft qualification on AH-1Q/S helicopter.

D5 **AH-64 Pilot**
Additional or alternate aircraft qualification on AH-64 helicopter.

E1 **U-8 Pilot**
Additional or alternate aircraft qualification on U-8 helicopter.

E2 **T-42 Pilot**
Additional or alternate aircraft qualification on T-42 helicopter.

E4 **U-21 Pilot**
Additional or alternate aircraft qualification on U-21 helicopter.

E5 **C-12 Pilot**
Additional or alternate aircraft qualification on C-12 helicopter.

E9 **UV-18 Pilot**
Additional or alternate aircraft qualification on UV-18 helicopter.

F1 **OV-1/RV-1 Pilot**
Additional or alternate aircraft qualification on OV-1/RV-1 helicopter.

F2 **RU-21 Pilot**
Additional or alternate aircraft qualification on RU-21 helicopter.

F3 **RC-12 Pilot**
Additional or alternate aircraft qualification on RC-12 helicopter.

G1 **Instrument Flight Examiner**
Qualified to conduct written and flight examinations of Army aviators for award or retention of instrument certificates.

G2 **Instructor Pilot**
Qualified to instruct students in fundamentals of flying, to analyze flight training maneuvers, and to check aviators in new equipment and aircraft.

G3 **Nonstandard Fixed Wing Pilot**
Qualified on nonstandard fixed wing aircraft.

G4 **Nonstandard Rotary Wing Pilot**
Qualified on nonstandard rotary wing aircraft.

G5 **Experimental Test Pilot**
Qualified as engineering/experimental test pilot.

G6 **Aircraft Maintenance Technician**
Qualified to supervise maintenance and repair of aircraft and to perform maintenance test pilot functions.

G8 **Aviation Safety Officer**
Qualified to manage unit flight safety programs.

H1 **Aircraft Armament Maintenance Technician**
Qualified to supervise maintenance and repair of aircraft armament systems.

H2 **Aviation Life Support Equipment Technician**
Qualified in the inspection and maintenance of aviation life support equipment.

H4 **Aeromedical Evacuation Pilot**
Qualified in the procedures and techniques of aeromedical qualified evacuation.

H9 **M-22 Gunner**
Knowledge of the M-22 armament subsystem and the tactical employment of UH-1 helicopters equipped with the M-22 aerial gunnery subsystem.

K-4 **Special Operations Aviation**
Qualified in special operations aviation mission and specially modified aircraft.

APPLICATION FOR THE EVALUATION OF LEARNING EXPERIENCES DURING MILITARY SERVICE

(Date)

TO: (Name and address of educational institution, agency, or employer)

EVALUATION REQUEST FOR:

(Name of Applicant)

(Social Security Number)

ATTENTION:

Dear Official:

The applicant named above has requested that the attached summary of educational achievements, accomplished while in the Armed Forces of the United States, be forwarded to you for review and evaluation.

The American Council on Education publishes the *Guide to the Evaluation of Educational Experiences in the Armed Services* which includes postsecondary credit evaluations of military learning experiences. The 1954 edition of the *Guide* contains recommendations for formal courses offered by the Armed Services during the period 1941 to 1954. The current edition contains credit recommendations for (1) military training courses offered after 1954; (2) Army military occupational specialties (MOS's) for enlisted personnel and warrant officers; (3) ratings held by Navy and Coast Guard enlisted personnel; and (4) occupational designators held by Navy and Coast Guard warrant officers and Navy limited duty officers. In addition to recommendations for semester hour credits, some Army enlisted MOS's and Navy ratings also have recommendations for advanced standing in apprentice training programs.

The American Council on Education maintains an advisory service to provide credit recommendations for courses and tests, MOS's, ratings, and other occupations evaluated after the publication date of the current *Guide*. Credit recommendations are provided to officials of schools, state departments of education or other educational institutions, employers, apprenticeship training directors, labor union and trade association officials, military education officers and applicants. *Credit recommendations are not provided to officials at the applicant's request.* Authorized persons may write directly to the Military Evaluations Program Office, American Council on Education, One Dupont Circle, N.W., Washington, D.C. 20036-1193.

The evaluation of this applicant's learning experiences, as well as any guidance which you may provide, should be sent directly to the applicant at the address shown in block 6 on page 3. Your interest is genuinely appreciated.

Sincerely,

(Education Officer)

DD Form 295, NOV 86 *Previous editions are obsolete* Page 1 of 4 Pages
1207/330

Privacy Act Statement

AUTHORITY:	5 USC 301 and EO 9397, November 1943 (SSN).
PRINCIPAL PURPOSE:	To permit authorized agencies to evaluate military experience for academic placement and/or employment.
ROUTINE USES:	Used at the request of the individual for the evaluation of military training.
DISCLOSURE:	Voluntary; however, failure to provide requested information impedes the evaluation process by educational institutions or potential employers.

INSTRUCTIONS TO APPLICANT

DD Form 295 is for your convenience in applying for evaluation of your educational experiences during military service. Give as much detailed information as possible. Include additional information on separate sheets, if necessary.

You are encouraged to write a preliminary letter to the school or agency concerned, explaining your interest in its evaluation of your records for the continuance of your education. Training, correspondence study, or special experiences not described on this form, which you believe would be of interest to those reviewing your case, should be included in this letter.

The applicant should:

a. Complete items 1 through 15.

b. If you have attended college or completed any college correspondence courses, ask that college to send a transcript to the Registrar of the evaluating agency that this form is addressed to. DO NOT LIST ANY COLLEGE OR UNIVERSITY COURSES ON THIS FORM.

c. If you have completed any college-level standardized examinations for credit, such as USAFI or DANTES Subject Standardized Tests, or CLEP, ask the appropriate agency to send a score report to the Registrar of the evaluating agency that this form is addressed to. DO NOT LIST ANY EXAMINATIONS ON THIS FORM.

d. After completion, submit this DD Form 295 to the Certifying Officer.

INSTRUCTIONS TO CERTIFYING OFFICER

(Custodian of Personnel Records)

DD Form 295 is intended to provide factual information that schools and other evaluating agencies require for evaluation of the applicant's educational achievement. CERTIFYING OFFICERS WILL NOT MAKE RECOMMENDATIONS REGARDING CREDIT TO BE AWARDED.

The certifying officer should:

a. Complete items 16 through 18.

b. Insure that the information provided in Section II is documented in the applicant's Service Record. Names of schools or courses should not be abbreviated.

c. Send this DD Form 295 to the Education Officer.

INSTRUCTIONS TO EDUCATION OFFICER

The education officer should:

a. Complete item 19.

b. Counsel the service member.

c. Complete page 1. The name and address of the evaluating agency should be the same as that listed at the top of page 3 of this form.

PAGE 1 IS IN ADDITION TO, AND NOT A SUBSTITUTE FOR, THE LETTER TO BE WRITTEN TO THE EVALUATING AGENCY BY THE APPLICANT.

d. Mail DD Form 295 directly to the designated evaluating agency.

a. BLOCK E SCORE BELOW 6 OR OVER 24, BLOCK F SCORE BELOW 5 OR OVER 20, BLOCK G SCORE BELOW 6 OR OVER 36, BLOCK H SCORE BELOW 6 OR OVER 14, OR BLOCK D IF SOLDIER DOES NOT SUPPORT ARMY'S EQUAL OPPORTUNITY PROGRAM.
b. INDORSER WHO CHECKS BLOCK II B
c. REMARKS OTHERWISE OPTIONAL

RATER: MSG Preston is one of the most conscientious and dedicated soldiers whom I have ever met. He consistently accomplishes his duties in an exemplary manner. Indicative of this was his performance during field training exercises, specifically Reforger 75. He was responsible for receiving, compiling, and forwarding to higher, all battlefield intelligence. His efforts greatly assisted the Regiment in accomplishing its mission in an outstanding manner. MSG Preston possesses drive, initiative, and stamina. He is consistently striving to improve himself by enrolling in college courses during his off-duty time. His military leadership principles, traits, and personal conduct and integrity won him the respect and admiration of his subordinates and superiors. MSG Preston's ability to get the job done places him among those at the top of the NCO Corps.

INDORSER: MSG Preston clearly possesses those characteristics which place him in that select group of truly outstanding NCOs. Placing the needs of the organization first, he accepted reassignment to an area foreign to his previous experience and through personal initiative and enthusiasm rapidly gained the required technical knowledge. Having observed this NCO transition from operations to intelligence with complete ease and total competence, I highly recommend that he be flagged for special consideration in assignments and schooling. An obvious leader, he possesses talents and qualifications far in excess of his contemporaries.

C DEMONSTRATED PERFORMANCE OF PRESENT DUTY PASS 8410 66/152 YES

1 Rater's Evaluation performance during his first four months as Brigade Command Sergeant Major has been one of untiring effort and professional, outstanding performance. His initiatives and organizational abilities contributed significantly to the present high standards of appearance in the 1st Armor Training Brigade. He always provides sound and timely advice on a broad range of issues. His recommendations have been well thought out and appropriate. is in top physical condition and his highly visible participation in all aspects of physical training has set the example for the cadre, NCO and officer. His excellent performance is due mainly to his attention to detail in all aspects of his job and his commitment to perfection. is a community oriented soldier, he and his family are actively involved in numerous organizational and helping activities for the Fort Knox community.

2 Indorser's Evaluation

has vigorously stepped forward into the 1st Brigade Command Sergeant Major position and thus far has proven to be well suited for the demanding position. During his short tenure, he has become instrumental in the brigade's daily operation; of particular note is his involvement in the brigade's building refurbishing program. His ability to coordinate post agency support with the work effort of six battalions has been a major undertaking which has been superbly executed. He sets the example in all aspects of soldiering for the 1st Brigade cadre.

NCO COUNSELING CHECKLIST/RECORD

For use of this form, see AR 623-205; the proponent agency MILPERCEN

NAME OF RATED NCO	RANK	DUTY POSITION	UNIT

PURPOSE: The primary purpose of counseling is to improve performance and to professionally develop the rated NCO. The best counseling is always looking forward. It does not dwell on the past and on what was done, rather on the future and what can be done better. Counseling at the end of the rating period is too late since there is no time to improve before evaluation.

RULES:

1. Face-to-face performance counseling is mandatory for all Noncommissioned Officers.
2. This form is for use along with a working copy of the NCO-ER for conducting NCO performance counseling and recording counseling content and dates. Its use is mandatory for counseling all NCOs, CPL thru SFC/PSG, and is optional for counseling other senior NCOs.
3. Active Component. Initial counseling must be conducted within the first 30 days of each rating period, and at least quarterly thereafter. Reserve Components. (ARNG, USAR). Counseling must be conducted at least semiannually. There is no mandatory counseling at the end of the rating period.

CHECKLIST - FIRST COUNSELING SESSION AT THE BEGINNING OF THE RATING PERIOD

PREPARATION

1. Schedule counseling session, notify rated NCO.
2. Get copy of last duty description used for rated NCO's duty position, a blank copy of the NCO-ER, and the names of the new rating chain.
3. Update duty description (see page 2).
4. Fill out rating chain and duty description on working copy of NCO-ER, Parts II and III.
5. Read each of the values/responsibilities in Part IV of NCO-ER and the expanded definitions and examples on page 3 and 4 of this form.
6. Think how each value and responsibility in Part IV of NCO-ER applies to the rated NCO and his/her duty position.

Note: Leadership and training may be more difficult to apply than the other values/responsibilities when the rated NCO has no subordinates. Leadership is simply influencing others in the accomplishment of the mission and that can include peers and superiors. It also can be applied directly to additional duties and other areas of Army community life. Individual training is the responsibility of all NCOs whether or not there are subordinates. Every NCO knows something that can be taught to others and should be involved in some way in a training program.

7. Decide what you consider necessary for success (a meets standards rating) for each value/responsibility. Use the examples listed on pages 3 and 4 of this form as a guide in developing your own standards for success. Some may apply exactly, but you may have to change them or develop new ones that apply to your situation. Be specific so the rated NCO will know what is expected.
8. Make notes in blank spaces in Part IV of NCO-ER to help when counseling.
9. Review counseling tips in FM 22-101.

COUNSELING

1. Make sure rated NCO knows rating chain.
2. Show rated NCO the draft duty description on your working copy of the NCO-ER. Explain all parts. If rated NCO performed in position before, ask for any ideas to make duty description better.
3. Discuss the meaning of each value/responsibility in Part IV of NCO-ER. Use the trigger words on the NCO-ER, and the expanded definitions on pages 3 and 4 of this form to help.
4. Explain how each value/responsibility applies to the specific duty position by showing or telling your standards for success (a meets standards rating). Use examples on pages 3 and 4 of this form as a start point. Be specific so the rated NCO really knows what's expected.
5. When possible, give specific examples of excellence that could apply. This gives the rated NCO something special to strive for. Remember that only a few achieve real excellence and that real excellence always includes specific results and often includes accomplishments of subordinates.
6. Give rated NCO opportunity to ask questions and make suggestions.

AFTER COUNSELING

1. Record rated NCO's name and counseling date on this form.
2. Write key points made in counseling session on this form.
3. Show key points to rated NCO and get his initials.
4. Save NCO-ER with this checklist for next counseling session.

CHECKLIST - LATER COUNSELING SESSIONS DURING THE RATING PERIOD

PREPARATION

1. Schedule counseling session, notify rated NCO, and tell him/her to come prepared to discuss what has been accomplished in each value/responsibility area.
2. Look at working copy of NCO-ER you used during last counseling session.
3. Read and update duty description. Especially note the area of special emphasis; the priorities may have changed.
4. Read again, each of the values/responsibilities in Part IV of NCO-ER and the expanded definitions and examples on pages 3 and 4 of this form; then think again, about your standards for success.
5. Look over the notes you wrote down on page 2 of this form about the last counseling session.
6. Think about what the rated NCO has done so far during this rating period (specifically, observed action, demonstrated behavior, and results).
7. For each value/responsibility area, answer three questions. First, what has happened in response to any discussion you had during the last counseling session? Second, what has been done well?, and Third, what could be done better?
8. Make notes in blank spaces in Part IV of NCO-ER to help focus when counseling. (Use new NCO-ER if old one is full from last counseling session).
9. Review counseling tips in FM 22-101.

DA FORM 2166-7-1, AUG 87

COUNSELING

1. Go over each part of the duty description with rated NCO. Discuss any changes, especially to the area of special emphasis.

2. Tell rated NCO how he/she is doing. Use your success standards as a guide for the discussion (the examples on pages 3 and 4 may help). First, for each value/responsibility, talk about what has happened in response to any discussion you had during the last counseling session (remember, observed action, demonstrated behavior and results). Second, talk about what was done well. Third, talk about how to do better. The goal is to get all NCOs to be successful and meet standards.

3. When possible, give examples of excellence that could apply. This gives the rated NCO something to strive for. REMEMBER, EXCELLENCE IS SPECIAL. ONLY A FEW ACHIEVE IT! Excellence includes results and often involves subordinates.

4. Ask rated NCO for ideas, examples and opinions on what has been done so far and what can be done better. (This step can be done first or last).

AFTER COUNSELING

1. Record counseling date on this form.
2. Write key points made in counseling session on this form.
3. Show key points to rated NCO and get his initials.
4. Save NCO-ER with this checklist for next counseling session. (Notes should make record NCO-ER preparation easy at end of rating period).

COUNSELING RECORD

DATE OF COUNSELING	RATED NCO's INITIALS	KEY POINTS MADE
INITIAL		
LATER		
LATER		
LATER		

DUTY DESCRIPTION (PART III of NCO-ER)

The duty description is essential to performance counseling and evaluation. It is used during the first counseling session to tell rated NCO what the duties are and what needs to be emphasized. It may change somewhat during the rating period. It is used at the end of the rating period to record what was important about the duties.

The five elements of the duty description:

1 & 2. Principal Duty Title and Duty MOS Code. Enter principal duty title and DMOS that most accurately reflects actual duties performed.

3. Daily Duties and Scope. This portion should address the most important routine duties and responsibilities. Ideally, this should include number of people supervised, equipment, facilities, and dollars involved and any other routine duties and responsibilities critical to mission accomplishment.

4. Area of Special Emphasis. This portion is most likely to change somewhat during the rating period. For the first counseling session, it includes those items that require top priority effort at least for the first part of the upcoming rating period. At the end of the rating period, it should include the most important items that applied at any time during the rating period (examples are preparation for REFORGER deployment, combined arms drills training for FTX, preparation for NTC rotation, revision of battalion maintenance SOP, training for tank table qualification, ITEP and company AMTP readiness, related tasks cross-training, reserve components annual training support (AT) and SIDPERS acceptance rate).

5. Appointed Duties. This portion should include those duties that are appointed and are not normally associated with the duty description.

DA FORM 2166-7-1, AUG 87

VALUES/NCO RESPONSIBILITIES (PART IV of NCO-ER)

VALUES: Values are what soldiers, as a profession, judge to be right. They are the moral, ethical, and professional attributes of character. They are the heart and soul of a great Army. Part IVa of the NCO-ER includes some of the most important values. These are: Putting the welfare of the nation, the assigned mission and teamwork before individual interests; Exhibiting absolute honesty and courage to stand up for what is right; Developing a sense of obligation and support between those who are led, those who lead, and those who serve alongside; Maintaining high standards of personal conduct on and off duty; And finally, demonstrating obedience, total adherence to the spirit and letter of a lawful order, discipline, and ability to overcome fear despite difficulty or danger.

Examples of standards for "YES" ratings:

- Put the Army, the mission and subordinates first before own personal interest.
- Meet challenges without compromising integrity.
- Personal conduct, both on and off duty, reflects favorably on NCO corps.
- Obey lawful orders and do what is right without orders.
- Choose the hard right over the easy wrong.
- Exhibit pride in unit, be a team player.
- Demonstrate respect for all soldiers regardless of race, creed, color, sex, or national origin.

COMPETENCE: The knowledge, skills and abilities necessary to be expert in the current duty assignment and to perform adequately in other assignments within the MOS when required. Competence is both technical and tactical and includes reading, writing, speaking and basic mathematics. It also includes sound judgment, ability to weigh alternatives, form objective opinions and make good decisions. Closely allied with competence is the constant desire to be better, to listen and learn more and to do each task completely to the best of one's ability. Learn, grow, set standards, and achieve them, create and innovate, take prudent risks, never settle for less than best. Committed to excellence.

Examples of standards for "Success/Meets Standards" rating:

- Master the knowledge, skills and abilities required for performance in your duty position.
- Meet PMOS SQT standards for your grade.
- Accomplish completely and promptly those tasks assigned or required by duty position.
- Constantly seek ways to learn, grow and improve.

Examples of "Excellence":

- Picked as SSG to be a platoon sergeant over twelve other SSGs.
- Maintained SIDPERS rating of 98% for six months.
- Scored 94% on last SQT.
- Selected best truck master in annual battalion competition.
- Designated Installation Drill Sergeant of Quarter.
- Exceeded recruiting objectives two consecutive quarters.
- Awarded Expert Infantryman Badge (EIB).

PHYSICAL FITNESS AND MILITARY BEARING: Physical fitness is the physical and mental ability to accomplish the mission – combat readiness. Total fitness includes weight control, diet and nutrition, smoking cessation, control of substance abuse, stress management, and physical training. It covers strength, endurance, stamina, flexibility, speed, agility, coordination and balance. NCOs are responsible for their own physical fitness and that of their subordinates. Military Bearing consists of posture, dress, overall appearance, and manner of physical movement. Bearing also includes an outward display of inner-feelings, fears, and overall confidence and enthusiasm. An inherent NCO responsibility is concern with the military bearing of the individual soldier, to include on-the-spot corrections.

Examples of standards for "Success/Meets Standards" rating:

- Maintain weight within Army limits for age and sex.
- Obtain passing score in APFT and participate in a regular exercise program.
- Maintain personal appearance and exhibit enthusiasm to the point of setting an example for junior enlisted soldiers.
- Monitor and encourage improvement in the physical and military bearing of subordinates.

Examples of "Excellence":

- Received Physical Fitness Badge for 292 score on APFT.
- Selected soldier of the month/quarter/year.
- Three of the last four soldiers of the month were from his/her platoon.
- As Master Fitness Trainer, established battalion physical fitness program.
- His entire squad was commended for scoring above 270 on APFT.

DA FORM 2166-7-1, AUG 87

LEADERSHIP: Influencing others to accomplish the mission. It consists of applying leadership attributes (Beliefs, Values, Ethics, Character, Knowledge, and Skills). It includes setting tough, but achievable standards and demanding that they be met; Caring deeply and sincerely for subordinates and their families and welcoming the opportunity to serve them; Conducting counseling; Setting the example by word and act/deed; Can be summarized by BE (Committed to the professional Army ethic and professional traits); KNOW (The factors of leadership, yourself, human nature, your job, and your unit); DO (Provide direction, implement, and motivate). Instill the spirit to achieve and win; Inspire and develop excellence. A soldier cared for today, leads tomorrow.

Examples of standards for "Success/Meets Standards" rating:

- Motivate subordinates to perform to the best of their ability as individuals and together as a disciplined cohesive team to accomplish the mission.
- Demonstrate that you care deeply and sincerely for soldiers and welcome the opportunity to serve them.
- Instill the spirit to achieve and win; Inspire and develop excellence through counseling.
- Set the example: BE, KNOW, DO.

Examples of "Excellence":

- Motivated entire squad to qualify expert with M-16.
- Won last three platoon quad inspections.
- Selected for membership in Sergeant Morales Club.
- Inspired mechanics to maintain operational readiness rating of 95% for two consecutive quarters.
- Led his squad through map orienteering course to win the battalion competition.
- Counseled two marginal soldiers ultimately selected for promotion.

TRAINING: Preparing individuals, units and combined arms teams for duty performance; The teaching of skills and knowledge. NCOs contribute to team training, are often responsible for unit training (Squads, Crews, Sections), but individual training is the most important, exclusive responsibility of the NCO Corps. Quality training bonds units. Leads directly to good discipline; Concentrates on wartime missions; Is tough and demanding without being reckless; Is performance oriented; Sticks to Army doctrine to standardize what is taught to fight, survive, and win, as small units when AirLand battle actions dictate. "Good training means learning from mistakes and allowing plenty of room for professional growth. Sharing knowledge and experience is the greatest legacy one can leave subordinates."

Examples of standards for "Success/Meets Standards" rating:

- Make sure soldiers-
  - a. Can do identified common tasks.
  - b. Are prepared for SQT and Commander's Evaluation.
  - c. Develop and practice skills for duty position.
  - d. Train as a squad/crew/section.
- Identify and recommend subordinates for professional development courses.
- Participate in unit training program.
- Share knowledge and experience with subordinates.

Examples of "Excellence":

- Taught five common tasks resulting in 100% GO on Annual CTT for all soldiers in directorate.
- Trained best howitzer section of the year in battalion.
- Coached subordinates to win consecutive soldier of month competitions.
- Established company Expert Field Medical Badge program resulting in 85% of all eligible soldiers receiving EFMB.
- Distinguished 1 tank and qualified 3 tanks in platoon on first run of tank table VIII.
- Trained platoon to fire honor battery during annual service practice.

RESPONSIBILITY AND ACCOUNTABILITY: The proper care, maintenance, use, handling, and conservation of personnel, equipment, supplies, property, and funds. Maintenance of weapons, vehicles, equipment, conservation of supplies, and funds is a special NCO responsibility because of its links to the success of all missions, especially those on the battlefield. It includes inspecting soldier's equipment often, using manual or checklist; Holding soldiers responsible for repairs and losses; Learning how to use and maintain all the equipment soldiers use; Being among the first to operate new equipment; Keeping up-to-date component lists; Setting aside time for inventories; and Knowing the readiness status of weapons, vehicles, and other equipment. It includes knowing where each soldier is during duty hours; Why he is going on sick call, where he lives, and his family situation; It involves reducing accidental manpower and monetary losses by providing a safe and healthful environment; It includes creating a climate which encourages young soldiers to learn and grow, and, to report serious problems without fear of repercussions. Also, NCOs must accept responsibility for their own actions and for those of their subordinates.

Examples of standards for "Success/Meets Standards" rating:

- Make sure your weapons, equipment, and vehicles are serviceable, maintained and ready for accomplishing the mission.
- Stop waste of supplies and limited funds.
- Be aware of those things that impact on soldier readiness e.g., family affairs, SQT, CTT, PQR, special duty, medical conditions, etc.
- Be responsible for your actions and those of your subordinates.

Examples of "Excellence":

- His emphasis on safety resulted in four tractor trailer drivers logging 10,000 miles accident free.
- Received commendation from CG for organizing post special olympics program.
- Won the installation award for Quarters of the Month.
- His constant instruction on maintenance resulted in six of eight mechanics earning master mechanic badges.
- Commended for no APCs on deadline report for six months.
- His learn and grow climate resulted in best platoon ARTEP results in the battalion.

1. **AUTHORITY:** Sec 301 Title 5 USC; Sec 3012 Title 10 USC.

2. **PURPOSE:** DA Form 67–8, Officer Evaluation Report, serves as the primary source of information for officer personnel management decisions. DA Form 67–8–1, Officer Evaluation Support Form, serves as a guide for the rated officer's performance, development of the rated officer, enhances the accomplishment of the organization mission, and provides additional performance information to the rating chain.

3. **ROUTINE USE:** DA Form 67–8 will be maintained in the rated officer's official military Personnel File (OMPF) and Career Management Individual File (CMIF). A copy will be provided to the rated officer either directly or sent to the forwarding address shown in Part I, DA Form 67–8. DA Form 67–8–1 is for organizational use only and will be returned to the rated officer after review by the rating chain.

4. **DISCLOSURE:** Disclosure of the rated officer's SSN (Part I, DA Form 67–8) is voluntary. However, failure to verify the SSN may result in a delayed or erroneous processing of the officer's OER. Disclosure of the information in Part IV, DA Form 67–8–1 is voluntary. However, failure to provide the information requested will result in an evaluation of the rated officer without the benefits of that officer's comments. Should the rated officer use the Privacy Act as a basis not to provide the information requested in Part IV, the Support Form will contain the rated officer's statement to that effect and be forwarded through the rating chain in accordance with AR 623–105.

Accounting Specialist	MOS-73D-001 MOS-73D-002
Administrative Specialist	MOS-71L-001 MOS-71L-002
Aerial Electronic Warning Defense Equipment Repairer	MOS-26K-002
Aerial Equipment Repair Technician (Warrant Officer)	MOS-401A-001 MOS-461A-001
Aerial Intelligence Specialist	MOS-96H-002
Aerial Photoactive Sensor Repairer	MOS-26F-001
Aerial Radar Sensor Repairer	MOS-26E-002
Aerial Sensor Specialist (OV-1B/C)	MOS-17L-002
Aerial Sensor Specialist (OV-1D)	MOS-96H-001
Aerial Surveillance Infrared Repairer	MOS-26N-002
Aerial Surveillance Photographic Equipment Repairer	MOS-41G-002
Aerial Surveillance Radar Repairer	MOS-26M-002
Aerial Surveillance Sensor Repairer	MOS-26E-001
Aeroscout Observer	MOS-93B-001
Air Defense Artillery (ADA) Command and Control Maintenance Technician (Warrant Officer)	MOS-225B-001
Air Defense Artillery (ADA) Operations and Intelligence Assistant	MOS-16H-001
Air Defense Artillery (ADA) Senior Sergeant	MOS-16Z-001
Air Defense Missile Fire Control Technician, Nike (Warrant Officer)	MOS-222B-001
Air Defense Missile System Repair Technician, Improved Hawk (Warrant Officer)	MOS-251D-001
Air Defense Missile System Repair Technician, Nike (Warrant Officer)	MOS-251B-001
Air Defense Missile System Technician, Improved Hawk (Warrant Officer)	MOS-223D-001
Air Defense Radar Repairer	MOS-26H-002
Air Defense Radar Repairman	MOS-26H-001
Air Traffic Control (ATC) Operator	MOS-93C-001 MOS-93C-002
Air Traffic Control (ATC) Tower Operator	MOS-93H-001 MOS-93H-002
Air Traffic Control Systems, Subsystems and Equipment Repairer	MOS-93D-001
Air Traffic Control Technician (Warrant Officer)	MOS-150A-001 MOS-150A-002
Airborne Sensor Specialist	MOS-17L-001
Airborne Surveillance Radar Repairman	MOS-26M-001
Airbrake Repairer	MOS-65E-001 MOS-88R-001
Airbrake Repairman	MOS-65E-001
Aircraft Armament Repairman	MOS-45J-001
Aircraft Armament Subsystem Mechanic	MOS-45M-001
Aircraft Armament Technical Inspector	MOS-66J-001
Aircraft Armament/Missile Systems Repairer	MOS-68J-004
Aircraft Components Repair Supervisor	MOS-68K-001
Aircraft Electrician	MOS-68F-001 MOS-68F-002
Aircraft Fire Control Repairer	MOS-68J-002 MOS-68J-003
Aircraft Fire Control Repairman	MOS-35J-001
Aircraft Hydraulics Repairman	MOS-68H-001
Aircraft Maintenance Senior Sergeant	MOS-67Z-001 MOS-67Z-002 MOS-67Z-003
Aircraft Pneudraulics Repairer	MOS-68H-002
Aircraft Powerplant Repairer	MOS-68B-002
Aircraft Powertrain Repairer	MOS-68D-002
Aircraft Powertrain Repairman	MOS-68D-001
Aircraft Quality Control Supervisor	MOS-67W-002
Aircraft Rotor and Propeller Repairman	MOS-68E-001
Aircraft Structural Repairer	MOS-68G-002
Aircraft Turbine Engine Repairman	MOS-68B-001
Aircraft Weapon Systems Repairer	MOS-68M-002 MOS-68M-003
Airdrop Equipment Repair Technician (Warrant Officer)	MOS-401A-001
Airdrop Equipment Technician (Warrant Officer)	MOS-401A-001 MOS-921A-001
Airframe Repairman	MOS-68G-001
Airplane Repairer	MOS-67G-002
Airplane Technical Inspector	MOS-67F-001
All Source Intelligence Technician (Warrant Officer)	MOS-350B-001
Allied Trades Technician (Warrant Officer)	MOS-914A-001
Ammunition Foreman	MOS-55Z-001
Ammunition Inspector	MOS-55X-001
Ammunition Specialist	MOS-55B-002
Ammunition Stock Control and Accounting Specialist	MOS-55R-001
Ammunition Storage and Operations Specialist	MOS-55B-001 MOS-55B-002
Ammunition Supervisor	MOS-55Z-001
Ammunition Technician (Warrant Officer)	MOS-411A-001 MOS-910A-001
Animal Care Specialist	MOS-91T-002
Animal Specialist	MOS-91T-002 MOS-91T-003
Antenna Installer Specialist	MOS-36D-002
Antennaman	MOS-36D-001
Anti-Ballistic Missile Maintenance Specialist	MOS-28M-001
Area Air Defense Artillery Crewman	MOS-16R-002
Area Communications Chief	MOS-31Z-001
Area Intelligence Specialist	MOS-97C-001 MOS-97C-002
Area Intelligence Technician (Warrant Officer)	MOS-351C-001 MOS-972A-001
Armament Maintenance Foreman	MOS-45Z-001

Armament Maintenance Supervisor	MOS-45Z-001
Armament Repair Technician (Warrant Officer)	MOS-421A-001 MOS-913A-001
Armament/Fire Control Maintenance Supervisor	MOS-45Z-002
Armor Cavalry Maintenance Technician (Warrant Officer)	MOS-630D-001
Armor Crewman	MOS-11E-001 MOS-11E-002
Armor Reconnaissance Specialist	MOS-11D-001 MOS-11D-002
Armor Reconnaissance Vehicle Crewman	MOS-19G-001
Armor Reconnaissance Vehicle Driver	MOS-19H-001
Armor Senior Sergeant	MOS-19Z-001
Armor/Cavalry Systems Maitenance Technician (Warrant Officer)	MOS-915D-001
Army Attache Administrative Officer (Warrant Officer)	MOS-961A-001
Artillery Repairer	MOS-45L-001 MOS-45L-002
Artillery Repairman	MOS-45L-001
Artillery Surveyor	MOS-82C-001
Arts and Crafts Specialist	MOS-03D-001
Asphalt Equipment Operator	MOS-62D-001
Assistant Special Agent	MOS-95D-001
Atomic Demolition Munitions (ADM) Specialist	MOS-12E-002
Atomic Demolition Munitions Specialist	MOS-12E-001
Attache Specialist	MOS-71S-001
Attache Technician (Warrant Officer)	MOS-350L-001 MOS-961A-001
Attack Helicopter Pilot (Warrant Officer)	MOS-062E-001 MOS-100E-001
Attack Helicopter Repairer	MOS-67Y-002
Audio Specialist	MOS-84D-001
Audio-Visual Chief	MOS-25Z-001
Audio-Visual Equipment Repairer	MOS-41E-002
Audio-Visual Equipment Repairman	MOS-41E-002
Audio/TV Specialist	MOS-84F-002
Automated Communications Computer Systems Repairer	MOS-39G-001
Automatic Data Telecommunications Center Operator	MOS-72G-003
Automatic Digital Message Switch Equipment (ADMSE) Repairer	MOS-29H-001
Automatic Test Equipment Operator/Maintainer	MOS-39B-001
Automatic Test Equipment Repairer	MOS-35C-001
Automotive Maintenance Technician (Warrant Officer)	MOS-631A-001
Automotive Repair Parts Specialist	MOS-76S-001
Automotive Repair Technician (Warrant Officer)	MOS-630A-001 MOS-632A-001
Automotive Repairer	MOS-63H-003
Automotive Repairman	MOS-63H-001 MOS-63H-002 MOS-63H-003
Aviation Maintenance Technician (Warrant Officer)	MOS-151A-001 MOS-160A-001
Aviation Operations Specialist	MOS-93P-002
Aviation Technician (Warrant Officer)	MOS-103A-001 MOS-160A-001
Avionic Communications Equipment Repairer	MOS-35L-002 MOS-68L-001
Avionic Communications Equipment Repairman	MOS-35L-001
Avionic Equipment Maintenance Supervisor	MOS-35P-001 MOS-35P-002
Avionic Flight Control Equipment Repairman	MOS-35N-001
Avionic Flight Systems Repairer	MOS-68Q-001
Avionic Mechanic	MOS-35K-002 MOS-68N-001
Avionic Navigation and Flight Control Equipment Repairer	MOS-35M-002
Avionic Navigation Equipment Repairman	MOS-35M-001
Avionic Radar Equipment Repairman	MOS-35R-001
Avionic Radar Repairer	MOS-68R-001
Avionic Special Equipment Repairer	MOS-35R-002
Avionics Mechanic	MOS-35K-001
ADA (Air Defense Artillery) Short Range Gunnery Crewman	MOS-16R-002
ADA (Air Defense Artillery) Short Range Missile Crewman	MOS-16P-001
ADMS Peripheral Equipment Repairman	MOS-34L-001
ADMSE Repairman	MOS-34H-001
ADP (Automatic Data Processing) Systems Analyst	MOS-74G-001
ADPS (Automatic Data Processing Systems) Maintenance Supervisor	MOS-34Z-001
ADPS (Automatic Data Processing Systems) Repairman	MOS-34D-001
ADPS Machine Operations Specialist	MOS-74D-001
AH-1 Attack Helicopter Repairer	MOS-67Y-003
AH-1 Attack Helicopter Technical Inspector	MOS-66Y-001
AH-1 Attack Pilot (Warrant Officer)	MOS-152G-001 MOS-152G-002
AH-1G Helicopter Repairman	MOS-67Y-001
AH-64 Attack Helicopter Repairer	MOS-67R-001
AH-64 Attack Helicopter Technical Inspector	MOS-66R-001
AH-64 Attack Pilot (Warrant Officer)	MOS-152F-002
AH-64 Pilot (Warrant Officer)	MOS-152F-001
AN/TSQ-51 System Repairman/Maintenance Chief	MOS-25K-001
AN/TSQ-73 Air Defense Artillery Command and Control System Operator/Repairer	MOS-25L-001
ATC (Air Traffic Control) Radar Controller	MOS-93J-001
Baker	MOS-94D-001

Field Artillery Radar Crewmember	MOS-17B-002
Field Artillery Radar Technician (Warrant Officer)	MOS-211A-001
Field Artillery Senior Sergeant	MOS-13Z-001
Field Artillery Surveyor	MOS-82C-002 MOS-82C-003
Field Artillery Systems Maintenance Technician (Warrant Officer)	MOS-915C-001

Field Artillery Tactical Fire Direction Systems Repairer	MOS-34Y-001 MOS-39Y-001
Field Artillery Target Acquisition Senior Sergeant	MOS-13W-001
Field Artillery Target Acquisition Specialist	MOS-17C-002
Field Artillery Vehicle Maintenance Technician (Warrant Officer)	MOS-630C-001
Field Communications Security Equipment Repairer	MOS-29S-001
Field Communications-Electronics Equipment Mechanic	MOS-31B-001
Field General COMSEC Repairer	MOS-31S-002 MOS-31S-003
Field General COMSEC Repairman	MOS-31S-001
Field Illumination Crewman	MOS-17E-001
Field Radio Mechanic	MOS-31B-001
Field Radio Relay Equipment Repairman	MOS-31L-001
Field Radio Repairer	MOS-31E-002
Field Radio Repairman	MOS-31E-001
Field Systems COMSEC Repairer	MOS-31T-002 MOS-31T-003
Field Systems COMSEC Repairman	MOS-31T-001
Field Wireman	MOS-36K-001
Fighting Vehicle Infantryman	MOS-11M-001 MOS-11M-002
Finance Senior Sergeant	MOS-73Z-001
Finance Specialist	MOS-73C-001 MOS-73C-002
Fire Control Computer Repairer	MOS-34G-001
Fire Control Computer Repairman	MOS-34G-001
Fire Control Instrument Repairer	MOS-41C-002 MOS-41C-003
Fire Control Instrument Repairman	MOS-41C-001 MOS-41C-002
Fire Control System Repairer	MOS-45G-001
Fire Distribution Systems Repair Technician (Warrant Officer)	MOS-361A-001
Fire Support Specialist	MOS-13F-001 MOS-13F-002
Firefighter	MOS-51M-001 MOS-51M-002
Fixed Ciphony Repairer	MOS-32F-002
Fixed Ciphony Repairman	MOS-32F-001
Fixed Communications Security Equipment Repairer	MOS-29F-001
Fixed Cryptographic Equipment Repairer	MOS-32G-002
Fixed Cryptographic Equipment Repairman	MOS-32G-001
Fixed Plant Carrier Repairman	MOS-32E-001
Fixed Station Chief	MOS-32Z-001
Fixed Station Radio Repairer	MOS-32H-002
Fixed Station Radio Repairman	MOS-32H-001
Fixed Station Technical Controller	MOS-32D-001
Fixed Wing Aviator (Aircraft Nonspecific) (Warrant Officer)	MOS-155A-002
Fixed Wing Aviator (Warrant Officer)	MOS-155A-001
Flash Ranging Crewman	MOS-17D-001
Flight Operations Coordinator	MOS-71P-001 MOS-71P-002 MOS-93P-001
Flute or Piccolo Player	MOS-02G-002 MOS-02G-003
Flute-Piccolo Player	MOS-02G-001
Food Advisor, 4114 (Warrant Officer)	MOS-041A-001
Food Inspection Specialist	MOS-91R-001
Food Inspection Technician (Warrant Officer)	MOS-051A-002
Food Service Advisor (Warrant Officer)	MOS-941A-001
Food Service Advisor, 941A0 (Warrant Officer)	MOS-041A-001
Food Service Specialist	MOS-94B-001 MOS-94B-002 MOS-94B-003
Food Service Supervisor	MOS-94Z-001
Food Service Technician (Warrant Officer)	MOS-041A-001 MOS-922A-001
Forward Area Alerting Radar (FAAR) Repairer	MOS-27N-001
Forward Area Alerting Radar Operator	MOS-16J-002
French Horn Player	MOS-02D-001 MOS-02D-002 MOS-02D-003
Fuel and Electrical Systems Repairer	MOS-63G-001 MOS-63G-002
Fuel and Electrical Systems Repairman	MOS-63G-001

General Construction Equipment Operator	MOS-62J-002
General Construction Machine Operator	MOS-62J-001
General Draftsman	MOS-81A-001
General Engineering Supervisor	MOS-51Z-001
General Intercept Equipment Repairman	MOS-33B-001
General Staff Administrative Technician (Warrant Officer)	MOS-712A-001
General Supply Technician (Warrant Officer)	MOS-761A-001
Grader Operator	MOS-62K-001
Graphics Documentation Specialist	MOS-25Q-001
Graves Registration Specialist	MOS-57F-003
Ground Control Approach Radar Repairer	MOS-26D-002
Ground Control Approach Radar Repairman	MOS-26D-001
Ground Surveillance Radar Crewman	MOS-17K-001 MOS-17K-002
Ground Surveillance Systems Operator	MOS-96R-001
Guitar Player	MOS-02T-001 MOS-02T-002 MOS-02T-003

Harbormaster/Pilot (Warrant Officer)	MOS-561B-001
Hawk Continuous Wave Radar Mechanic	MOS-24B-001 MOS-24B-002
Hawk Continuous Wave Radar Repairer	MOS-24K-003 MOS-24K-004
Hawk Continuous Wave Radar Repairman	MOS-23T-001 MOS-23T-002
Hawk Field Maintenance Equipment/Pulse Acquisition Radar Repairer	MOS-27J-001
Hawk Fire Control Crew Member	MOS-16E-001
Hawk Fire Control Crewman	MOS-16E-001
Hawk Fire Control Mechanic	MOS-24E-003 MOS-24F-001
Hawk Fire Control Repairer	MOS-24H-003 MOS-24H-004
Hawk Fire Control Repairman	MOS-23Q-001
Hawk Fire Control/Continuous Wave Radar Repairer	MOS-27K-001
Hawk Firing Section Mechanic	MOS-24C-002

Hawk Firing Section Repairer	MOS-27H-003
Hawk Information Coordination Central Mechanic	MOS-24G-003
Hawk Launcher and Mechanical Systems Repairer	MOS-24L-002
Hawk Maintenance Chief	MOS-23V-001 MOS-23V-002 MOS-24V-003 MOS-27V-001
Hawk Master Mechanic	MOS-24R-001
Hawk Missile and Launcher Repairer	MOS-22K-003
Hawk Missile Crew Member	MOS-16D-001
Hawk Missile Crewman	MOS-16D-001
Hawk Missile System Mechanic	MOS-23R-001
Hawk Missile Systems Technician (Warrant Officer)	MOS-140D-001
Hawk Missile-Launcher Mechanic	MOS-24D-001 MOS-24D-002
Hawk Missile-Launcher Repairman	MOS-22K-001 MOS-22K-002
Hawk Pulse Radar Repairer	MOS-24J-003
Hawk Pulse Radar Repairman	MOS-23S-001
Health Physics Specialist	MOS-91X-001
Heating and Cooling Specialist	MOS-51L-001
Heating and Ventilating Specialist	MOS-51J-001
Heavy Antiarmor Weapons Crewman	MOS-11H-001 MOS-11H-002
Heavy Construction Equipment Operator	MOS-62E-002
Heavy Lift Helicopter Pilot (Warrant Officer)	MOS-062D-001 MOS-100D-001
Heavy Lift Helicopter Repairer	MOS-67X-002 MOS-67X-003
Heavy Lift Helicopter Technical Inspector	MOS-66X-001
Heavy Wheel Vehicle Mechanic	MOS-63S-001
Helicopter Missile Systems Repairer	MOS-68J-001
Helicopter Technical Inspector	MOS-67W-001
Helicopter Weapon System Repairer	MOS-68M-001
Hercules Electronics Mechanic	MOS-24U-001 MOS-24U-002
Hercules Fire Control Crew Member	MOS-16C-001
Hercules Fire Control Crewman	MOS-16C-001
Hercules Missile Crew Member	MOS-16B-002
Hercules Missile Crewman	MOS-16B-001 MOS-16B-002
Honest John Rocket Crew Member	MOS-15F-002
Honest John Rocket Crewman	MOS-15F-001 MOS-15F-002
Hospital Food Service Specialist	MOS-94F-001 MOS-94F-002
Illustrator	MOS-81E-001 MOS-81E-002

REQUEST FOR ARMY ENLISTED AND WARRANT OFFICER MOS EXHIBITS

Officials should use this form only for requesting exhibits that contain the phrase, "Pending evaluation." As occupations are evaluated, they will be listed in the *Update*. When you want to obtain the recommendation for a newly-evaluated occupation, identify the exhibit you are requesting by using the complete *exhibit I.D. number* (e.g., MOS-45T-001), and the title of the occupation. Include the applicant's name if you would like the name mentioned in the reply. Submit the form to The Center for Adult Learning and Educational Credentials, American Council on Education, One Dupont Circle, Washington, DC 20036-1193, ATTN: Military Evaluations.

The 1990 GUIDE to the EVALUATION of EDUCATIONAL EXPERIENCES in the ARMED SERVICES

1175

AMERICAN COUNCIL ON EDUCATION One Dupont Circle • Washington, D.C. 20036-1193

BEST COPY AVAILABLE

THE CHAIRMAN, JOINT CHIEFS OF STAFF
WASHINGTON, D.C. 20318

5 October 1990

Dear Service Member,

I support the DOD policy of providing postsecondary education opportunities for all active duty and Reserve Service members. I strongly advise you to take advantage of the voluntary education program to catch up with your education before you leave the military. The Military Services need well-trained, educated people. Your pursuit of higher education will not only enhance your military job performance and chance for promotion, but will also improve your job opportunities when you return to civilian life.

The Guide to the Evaluation of Educational Experiences in the Armed Services, published by the American Council on Education, describes how you can receive college credits for your military training and experience and is widely recognized by the colleges and universities that grant credit for this training and experience. This guide is available for your reference at your base or post Education Center.

A number of programs are available through education centers on military installations, including courses taught in the classroom, independent study, testing of all kinds, and education guidance. Take advantage of these resources and educational programs during your military tour, and continue to use educational and Montgomery GI Bill benefits when you return to civilian life.

I wish you good luck and success in pursuit of your educational goals.

Sincerely,

COLIN L. POWELL
Chairman
Joint Chiefs of Staff

Foreword

For nearly 50 years, the *Guide to the Evaluation of Educational Experiences in the Armed Services* has been the standard reference work for recognizing learning acquired in military life. ACE has worked cooperatively with the Department of Defense and the armed services in assisting hundreds of thousands of service men and women to achieve recognition for their learning. The long-term success of the *Guide* evaluation system for military training has resulted in its serving as a model for the evaluation of programs offered by other noncollegiate organizations, including business, industry, government agencies, voluntary and professional associations, and labor unions. These formalized efforts to evaluate noncollegiate-sponsored programs enable students to combine their extrainstitutional learning with study at postsecondary institutions to achieve degree-related educational objectives. Not only is this sound educational practice, it is also an efficient use of educational resources and an incentive for the persons affected to undertake further study.

Special recognition must be paid to hundreds of individuals who have served as evaluators and the many educational institutions, professional and disciplinary associations, and the apprenticeship training community for their wholehearted cooperation in this endeavor. Without their support and assistance, the *Guide* would not have been possible. We are greatly indebted to them.

Once again, we are pleased to commend this work to you in your continuing work with service men and women and veterans.

ROBERT H. ATWELL
President
American Council on Education

How to Find and Use Course Exhibits

This volume contains recommendations for formal courses offered by the Navy that have been evaluated through June 1990.

The instructions that follow provide a step-by-step procedure for finding and using the exhibits and recommendations. Readers unfamiliar with the ACE evaluation procedures should read Appendix A. Additional information on using the *Guide* and awarding credit is provided in the Questions and Answers section.

Step 1

Have the applicant complete a Request for Course Recommendation form.

A Request for Course Recommendation form appears at the back of this volume. It may be reproduced and should always be filled out by the applicant, using the information provided on official and personal records, as well as the applicant's own knowledge of the service course. *Applicants should not refer to the* ***Guide*** *while completing the form.* (See questions 4 through 7 in Questions and Answers.)

Step 2

Verify course completion from military records.

It is the responsibility of the school official to verify course completion. The following military records are normally used to verify successful completion of course requirements:

1. DD Form 295, Application for the Evaluation of Educational Experiences During Military Service or Application for the Evaluation of Learning Experiences During Military Service—available to active-duty service personnel from military education officers. (Form must be certified by an authorized commissioned officer or his/her designee in order to be official.)
2. DD Form 214, Armed Forces of the United States Report of Transfer or Discharge—available to veterans, together with other in-service training records, from the General Services Administration, National Personnel Records Center (Military Personnel Records), 9700 Page Boulevard, St. Louis, Missouri 63132.
3. Course Completion Certificates—may be used to complement other records or when service courses are not recorded on official records.

(See questions 1, 3 and 16 in Questions and Answers.)

The following steps refer to a course exhibit. See sample course exhibit, page xi.

Step 3

Find the course exhibit by identifying the American Council on Education (ACE) ID number in the Course Number Index or the Keyword Index.

A. *Course Number Index.* All available military course numbers are listed in the Course Number Index in alphanumeric sequence. If the applicant's military course number cannot be located in the Course Number Index, search for the course title in the Keyword Index.

B. *Keyword Index.* Identify all possible keywords within a formal course title. For example, the keywords in the title "Digital, Analog, and Hybrid Computer Fundamentals" are *Digital, Analog, Hybrid,* and *Computer.* Find one or all of those keywords in the Keyword Index and search the listing under the keyword for the course title. *If the title cannot be found under one keyword, search all other possible keywords.*

C. *Identify ACE ID number.* When the title or military course numnber has been located, note the corresponding ACE ID number. This number refers to the course exhibit's location in the *Guide*. The two-letter prefix refers to the specific service, i.e., NV = Navy. ACE ID numbers are presented in numeric sequence. (See question 2 in Questions and Answers.)

Step 4

Match the course-identifying information with the corresponding data in the course exhibit.

Course-identifying information includes the official military title, military course number, length of course, dates of attendance, location, etc., and is provided by the applicant on the Request for Course Recommendation form. When the course exhibit consists of multiple versions, determine which version applies to the applicant's course by considering exhibit dates and course length. It is important to match all items. (See questions 6, 7, 12, 13 and 14 in Questions and Answers.)

Step 5

Read the course description.

Consideration should be given not only to the amount of credit and to the subject area, but also to the course objectives, or learning outcomes, and instruction which are part of the course exhibit. These portions of the exhibit outline the course content and scope and also provide essential information about the nature of the course. This information will help you determine the appropriate placement of credit for each individual student within the requirements and programs at your school. (See questions 10 and 15 in Questions and Answers.)

Step 6

Award credit as appropriate.

Users are free to modify the credit recommendations in accordance with institutional policy and the educational goals of each individual applicant. (See questions 12, 23, 24, 25, 26, 27, 28 and 29 in Questions and Answers.)

Step 7

When assistance is required, contact The Center for Adult Learning and Educational Credentials.

Whenever problems arise and assistance is desired, you may submit a properly completed Request for Course Recommendation form (Questions 5, 6, 7 and 9) to:

The Center for Adult Learning and Educational
Credentials
American Council on Education
One Dupont Circle
Washington, DC 20036–1193
ATTN: Military Evaluations
(202) 939-9470

Sample Course Exhibit

ID Number. A number assigned by ACE to identify each course

NV-1715-1439

Course Version Numbers and Titles. Version 1 is the more recent. If course has only one version, version number is omitted throughout exhibit.

1. Avionics Technician, Class A1
2. Avionics Technician, Class A1

Military Course Number. The number assigned to the course by the military. Listed by version.

Course Number: C-100-2013.

Location. By version. The service school, military installation, state.

Location: Air Technical Training Center, Millington, TN.

Length. By version. The length of the course in weeks, with contact hours in parentheses.

Length: *Version 1:* 26 weeks (1040 hours). *Version 2:* 23 weeks (884 hours).

Exhibit Dates. By version. The start and end dates, by month and year. Date of course materials when the course was first evaluated and, if applicable, when it was eliminated. "Present" denotes publication cutoff for this edition of the *Guide* (6/90).

Exhibit Dates: *Version 1:* 4/89–Present. *Version 2:* 10/86–3/89.

Learning Outcomes. Competencies students acquire during the course. Older courses have *objectives.* (See question 8 in Questions and Answers.)

Learning Outcomes: *Version 1:* Upon completion of the course, the student will be able to maintain, troubleshoot and operate, under medium supervision, solid state devices, radar systems, electrical and electronic systems. *Version 2:* Upon completion of the course, the student will be able to operate, maintain and troubleshoot communication radar and electrical and electronic systems.

Instruction. Description of instruction, including teaching methods, facilities, equipment, major subject areas covered.

Instruction: *Version 1:* Lecture and practical excercises in mathematics in computer, electrical, electronic, communication and radar systems. Lecture and laboratories in the fundamentals of amplitude and frequency modulated communication systems, study of AM and FM receiver circuits, use of test equipment . . . *Version 2:* Lectures and laboratories in mathematics, computer, electrical, electronic, communication, and radar systems. Included are the fundamentals of amplitude and frequency modulation, receiver circuits, use of test equipment, troubleshooting . . .

Credit Recommendation. By version. Given in four categories: vocational certificate, lower-division baccalaureate/associate degree, upper-division baccalaureate, and graduate degree. Expressed in semester hours. (See Appendix A for detailed explanation of credit categories.)

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in shop mathematics (9/89); in the lower-division baccalaureate/associate degree category, 6 semester hours in communications electronics, 4 in computer organization, 4 in microprocessors, 4 in computer systems troubleshooting and maintenance, and 3 in radar systems (9/89). *Version 2:* In the vocational certificate category, 3 semester hours in shop mathematics (9/89); in the lower-division baccalaureate/associate degree category, 6 semester hours in communication electronics, 4 in computer organization, 4 in electronic systems troubleshooting and maintenance, and 4 in computer systems troubleshooting and maintenance (9/89).

Evaluation Date. Date when the credit recommendation was established. Month and year are given in parentheses following each recommendation.

Important: The appropriate course version can be found by using the course title and number, its length, exhibit dates, and location.

How to Find and Use Navy Occupation Exhibits

This volume contains exhibits for Navy occupations evaluated through June 30, 1990.

The following instructions provide a step-by-step procedure for finding and using exhibits for Navy general rates, ratings, warrant officer and limited duty officer specialties. If you are unfamiliar with the Navy enlisted and officer systems—how they are structured and how occupational proficiency is demonstrated—you should read Appendix A. Additional information is provided in the Questions and Answers section.

Step 1

Have the applicant submit official documentation to you.

For NAVY enlisted personnel, occupational history is recorded in NAVPERS 1070/604, Navy Occupation/Training and Awards History. Navy men and women sometimes refer to this form as "the page 4" of the service record. Item 1 lists the sailor's Navy Enlisted Classification (NEC) codes (primary code and secondary code), and the effective date of the NEC. Item 8 contains the following relevant information: the general rate or rating from which advanced or changed, the new general rate or rating, and the effective date of the advancement or change.

As an alternative, Navy enlisted persons may submit DD Form 295, Application for the Evaluation of Educational Experiences During Military Service or Application for the Evaluation of Learning Experiences During Military Service when it includes the necessary occupational information. The April 1975 version of the form, which was not designed to document general rate and rating proficiency, is acceptable when the section Major Service Jobs or Billets includes the following information: (1) the general rate or rating designation, (2) the general rate or rating title, and (3) the date of advancement. The June 1979 and November 1986 versions have a section entitled "Military Occupational History." A person still in active or reserve service may request that DD Form 295 be completed by designated personnel and certified by the personnel officer at the activity maintaining custody of the person's military record.

DD Form 214, Armed Forces of the United States Report of Transfer or Discharge, is also acceptable for documentation. However, it does not contain the occupational history, which you may need.

For warrant officers and limited duty officers refer to NAVPERS 601-4, Navy Occupation/Training and Awards History. Check for the officer designation. Section 5 lists training courses completed and NECs held. Fitness Reports, an objective appraisal of performance by the commanding officer, should also be used.

Navy records must be requested by the individual. Records may be obtained as follows:

Active-duty Navy men and women. Either the Navy unit to which they are assigned or the activity maintaining custody of their military record.

Navy Reservist (nondrilling) or retired personnel. The Naval Reserve Personnel Center (Code 41), 4400 Dauphine Street, New Orleans, Louisiana 70149.

Navy Veteran. The originals of the Navy Occupation/Training and Awards History form and the DD Form 214 are given to the veteran at time of discharge. If the veteran does not have them, duplicate copies may be obtained from General Services Administration, National Personnel Records Center (Military Personnel Records), 9700 Page Boulevard, St. Louis, Missouri 63132. The veteran may request service records by submitting U.S. Government Standard Form 180, which may be obtained from a state's veterans affairs office, the Veterans Administration, or the National Personnel Records Center.

Step 2

By referring to military records, verify each occupational specialty the person has successfully held.

A. Eligibility for the credit recommendation for enlisted general rates and ratings is easily determined. Advancement means that the person is automatically eligible for the general rate or rating recommendation; that is, to be advanced, the person had to demonstrate occupational proficiency by meeting all the requirements for advancement, including passing written and performance tests. (See questions 17, 18, 19 and 20 in Questions and Answers.)

Warrant officers and limited duty officers have normally progressed through the enlisted ranks and are technical specialists in their fields. Determine eligibility for the credit recommendation by consulting the individual's Fitness Report or NAVPERS 601-4.

B. Find the information necessary for locating the correct exhibit(s): occupational designations and the date of advancement to each. (See question 22 in Questions and Answers.)

Step 3

Find the appropriate exhibit in the Guide.

The exhibit can easily be found when the designation is known. Each exhibit is assigned an ACE ID number that has three components. The first component in a Navy rating exhibit is *NER*. This identifies the exhibit as one that pertains to Navy enlisted general rates and ratings. The second component consists of the general rate or rating designation, e.g., SN, QM or AME. The third component, a three-digit, sequentially assigned number, e.g., 001, uniquely identifies the exhibit. The exhibit ID numbers have either eight or nine characters, depending on the rating designation, e.g., NER-QM-001 and NER-AME-001.

The first component of a warrant officer exhibit is *NWO;* for limited duty officer, *LDO*. The second component consists of the four-digit designator, e.g., 641X, 741X. As with the enlisted exhibits, the third component is a three-digit number that uniquely identifies the exhibit. These exhibits have nine characters (NWO-741X-001, LDO-641X-001).

When the title of an occupational specialty is known, the exhibit ID number can be found by referring to the *Occupational Title Index*.

There may be more than one exhibit for some designators. Each time there is a new recommendation or another evaluation is pending, there is a new exhibit. For example, two exhibits appear for the rating AS. The ACE ID numbers for the two exhibits are NER-AS-001 and NER-AS-002. The oldest exhibit for a rating, the first to be evaluated, is assigned -001 as the last three characters. The last exhibit for a rating, the exhibit assigned the highest number, is the most recent. (See questions 22 and 23 in Questions and Answers.)

Step 4

Read the entire exhibit.

In order to apply a given recommendation to the student's program of study at your institution, you must first read the entire exhibit. Each item in the exhibit has been prepared to help you identify or interpret the recommendations. (See the sample exhibit.) Two items, "Career Pattern" and "Description," will be particularly helpful to you.

The descriptions, which are similar to learning outcome statements of postsecondary courses and programs of study, will provide you with essential information about the learning required for proficiency in the occupation. Comparing the "Description" with a description of the course or program of study that the student will pursue will help you

- determine how much of the recommended credit applies to the course or program of study at your institution;
- identify additional areas of possible credit;
- resolve problems with duplication of credit, when the applicant has applied for credit for more than one military learning experience;
- place the student at the appropriate point in the course sequence or program of study.

Step 5

Award credit as appropriate.

The credit recommendations are advisory. They are intended to assist in formally recognizing the learning of Navy men and women and veterans and in placing them in postsecondary programs of study, apprenticeship programs, and jobs. The recommendations may be modified.

When an applicant has applied for credit for more than one military learning experience, you may find that you will have to reduce the total amount of credit recommended to avoid granting duplicate credit. (See questions 24, 25 and 26 in Questions and Answers.)

You may also wish to increase the recommended credit to account for the learning that the applicant may have acquired in other military or nonmilitary settings. (See questions 27 and 28 in Questions and Answers.)

Step 6

When assistance is required, contact The Center for Adult Learning and Educational Credentials.

The Center operates an advisory service to assist education officials, apprenticeship and training officials, and employers in evaluating the learning experiences of military personnel. Publication of the *Guide* is part of that service. However, there are instances when additional assistance is needed.

When requesting an exhibit, complete the Request for Navy Occupation Exhibits form that appears at the back of this volume. *Use the form only to request recommendations for those that are listed as "Pending evaluation."* (See question 23 in Questions and Answers.)

When assistance in interpretation is needed and it appears that official military records will help staff members in responding to an inquiry, copies should be attached to the letter of inquiry. *Do not send original records.*

When an exhibit or assistance in interpretation is needed urgently, you may telephone The Center at (202) 939-9470. Whether inquiring by letter or telephone, you should always obtain information directly from The Center, not the applicant. (See question 9 in Questions and Answers.)

Inquiries concerning Navy occupation exhibits should be addressed to:

The Center for Adult Learning and
Educational Credentials
American Council on Education
One Dupont Circle
Washington, DC 20036-1193
ATTN: Military Evaluations Program

Sample Navy Rating Exhibit

ID Number. A code number assigned by ACE to identify each exhibit.

NER-YN-002

YEOMAN

Title. The official Navy title of the general rate or rating during the period of the exhibit dates.

YN3
YN2
YN1
YNC
YNCS
YNCM

General Rate/Rating Designation. The official Navy system of identifying occupations and their levels, listed in ascending order according to rate. (See question 17 in Questions and Answers for definitions of the Navy identifiers.)

Exhibit Dates. Start and end dates by month and year. The earliest start date is 6/71, the effective date of the Navy manual regulating the general rates and ratings that have been evaluated (start dates may be later than 6/71). The term "Present" indicates that the exhibit is current as of June 1990. "Pending evaluation" means that the general rate or rating is scheduled to be evaluated.

Exhibit Dates: 1/90–Present.

Occupational Field: 15 (Administration).

Occupational Field. Two-digit number and title designating a group of related ratings.

Career Pattern. Path of advancement. Shows prerequisite general rate and subsequent progression in a rating; the designation is provided for each rate, followed by the title and paygrade (in parentheses).

Career Pattern

SN: Seaman (E-3). *YN3:* Yeoman, Third Class (E-4). *YN2:* Yeoman, Second Class (E-5). *YN1:* Yeoman, First Class (E-6). *YNC:* Chief Yeoman (E-7). *YNCS:* Senior Chief Yeoman (E-8). *YNCM:* Master Chief Yeoman (E-9).

Description

Description. Summary applying to all rates and a separate description of the skills, competencies, and knowledge required for proficiency in each rate.

Summary: Performs general office clerical and administrative duties, including typewriting, office machine operations, office communications, filing and records maintenance. *YN3:* Maintains files; operates duplicating, adding, calculating, and copying machines; serves as paralegal counselor when a legalman is not available; types correspondence, reports, and other communications from rough draft (a straight-copy typing rate of at least 30 words per minute is required). *YN2:* Able to perform the duties required for YN3; organizes and monitors filing and records maintenance, retention, and disposal; maintains officer personnel records, routes correspondence; types records, correspondence, and reports (a straight-copy typing rate of at least 40 words per minute is required); sends, receives, and accounts for official and registered mail; advises personnel of benefits, types of duty, and resolution of personal problems. *YN1:* . . .

Recommendation. By rate. Only the recommendation for the *highest* rate held should be used; the recommendations should *not* be added.

Educational credit is expressed in semester hours and recommended in four categories: vocational certificate, lower-division baccalaureate/associate degree, upper-division baccalaureate, and graduate degree. (See Appendix A for category definitions.) The recommendation normally specifies the number of semester hours recommended and the appropriate subject area, program of study, or discipline in which the credit might be applied.

Recommendation, YN3

In the lower-division baccalaureate/associate degree category, 2 semester hours in typing, 1 in recordkeeping, 1 in clerical interpersonal communications, and 1 in military legal practices and procedures (3/90). . . .

Recommendation, YN2

In the lower-division baccalaureate/associate degree category, 2 semester hours in typing, 1 in recordkeeping, 2 in clerical interpersonal communications, and 1 in military legal practices and procedures (3/90).

Date of Evaluation. By month and year. Appears in parentheses following the recommendation for each rate.

Important: Read entire exhibit before awarding educational credit.

Sample Warrant Officer/Limited Duty Officer Exhibit

ID Number. A code number assigned by ACE to identify each exhibit. The first three digits for warrant officers are "NWO" and for limited duty officers "LDO."

Exhibit Dates. Start and end dates by month and year. The term "Present" indicates that the exhibit is current as of June 1990. "Pending evaluation" means that an evaluation is scheduled.

Career Pattern. Shows the various possible career paths for the warrant officer or LDO. Titles and designators are provided.

Description. The skills, competencies, and knowledge required for proficiency in the officer specialty.

Date of Evaluation. By month and year. Appears in parentheses following the recommendation for each occupation.

NWO-728X-001

ELECTRONICS TECHNICIAN (SUBMARINE)

728X

Exhibit Dates: 1/65–Present.

Career Pattern

May have progressed to Electronics Technician (Submarine) Warrant Officer from: Data Systems Technician (DS), Electronics Technician (ET), Electronics Warfare Technician (EW), Fire Control Technician (FT), Fire Control Technician, Ballistic Missile Fire Control (FTB), Fire Control Technician, Gun Fire Control (FTG), Fire Control Technician, Surface Missile Fire Control (FTM), Operations Specialist (OS), Ocean Systems Technician (OT), or Sonar Technician (ST).

Description

Serves as an officer technical specialist in the field of electronics; supervises those persons involved with the installation, operation, and maintenance of electronic systems; plans, organizes and manages the activities of technical personnel; provides leadership necessary to guide personnel and develop individual responsibility; provides technical expertise to lower level personnel; writes reports and provides advice about electronic systems.

Recommendation

In the lower-division baccalaureate/associate degree category, 1 semester hour in technical communications. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 for field experience in management, and 4 for field experience in electronics, for a total of 10 semester hours (1/84).

Important: Read entire exhibit before awarding educational credit or advanced standing in an apprentice training program.

Title. The official Navy title during the period of the exhibit dates.

Designation. The official Navy system of identifying warrant officers and limited duty officers. The fourth digit, X, may be a number from 0–9 (see Appendix F).

Recommendation. Educational credit is expressed in semester hours and recommended in four categories: vocational certificate, lower-division baccalaureate/associate degree, upper-division baccalaureate, and graduate degree. (See Appendix A for category definitions.) The recommendation normally specifies the number of semester hours recommended and the appropriate subject area, program of study, or discipline in which the credit might be applied.

Questions and Answers

This section is designed to answer questions that may arise about using the Guide and awarding credit.

1

An applicant at my institution has submitted a DD Form 214 that lists abbreviated course titles which I cannot decipher. The form does not contain enough information for me to find the courses in the *Guide*. What should I do?

Military records often provide insufficient information for civilian education officials to properly identify courses. For that reason, The Center has designed the Request for Course Recommendation form, which can be used to supplement records. Applicants for credit should be responsible for interpreting the information on their records and presenting the data in readable form. You may also use course completion certificates and other training records to verify entries on the DD Forms 214 and 295. It is recommended that you automatically require students to complete the Request for Course Recommendation form. Then, if you need help, authorize the form and submit it to The Center. *No abbreviations please.*

2

When an applicant submits information on a number of courses completed, I can usually find exhibits for only some of the courses in the *Guide*. Am I doing something wrong?

The course evaluations done by The Center probably represent about 60 percent of the total number of courses currently offered by the armed services. The remaining 40 percent cannot be evaluated for one reason or another. In general, courses evaluated and published in the *Guide* are those offered on a full-time basis. After 1981 The Center began evaluation of courses that are 45 academic hours in length. Prior to that time, courses evaluated were at least of two weeks duration; or, if less than two weeks in length, the courses had to include a minimum total of sixty contact hours of academic instruction. Before 1973 the minimum length requirement was three weeks or 90 contact hours. Another requirement for evaluation is that a course be formal as defined by the services, i.e., offered to meet servicewide training requirements and cited in the formal school listing for the service. This requirement generally excludes locally organized and command-level training programs, as well as courses offered on a one-time basis.

Few Navy correspondence courses have been evaluated. The Navy, with few exceptions, has not established proctored end-of-course examinations, one of The Center's criteria for reviewing correspondence courses.

You will find no courses conducted prior to 1954 listed in this guide. You must always submit a Request for Course Recommendation form to this office for assistance with courses taken from the 1940s through 1954. When in doubt about the availability of any evaluation for any service course, contact the Advisory Service by telephone or by submitting a Request for Course Recommendation form.

Keep in mind that the *Guide* is constantly being updated. New courses evaluated after the publication date may be found in the *Handbook* or you may submit a Request for Course Recommendation form.

3

I understand many military records were destroyed in a fire at the General Services Administration a number of years ago. What should I do if the applicant's military records were among those destroyed?

Many records were reclaimed or reconstructed and are now available. In addition, the applicant's copies of certificates may be used in lieu of records destroyed in the GSA fire.

4

May I submit a Request for Course Recommendation form that the student has filled out with information from the *Guide?*

A form filled out by a student who copies information from the *Guide* cannot be used by the Advisory Service staff for research purposes because that information only duplicates published data. One of the purposes of the Request for Course Recommendation form is to secure information about a course from the students, ideally through official records, but also from their personal knowledge or memory of the course. With this firsthand information, you may find the correct course exhibit in the *Guide*. If you cannot find it, you may send the request form to the Advisory Service.

The Center staff can then use this additional information to search its extensive files for matching information. When students attempt to identify a course taken years ago by extracting *current* titles or course numbers from the *Guide*, they may in fact be identifying a *similar* course but not the one they took. Therefore, a form filled out with material copied from the *Guide* can be misleading and can seriously handicap the research staff. *Only accurate and verified information is to be submitted.*

5

Who should send in the Request for Course Recommendation form?

The form should be completed by the applicant and authorized by you, the institution official or military representative. Credit recommendations will be forwarded to you only when you authorize us to do so. While we do provide credit recommendations to applicants upon receipt of their requests, we encourage them to apply through their schools. We do not normally send a credit recommendation to a college at the request of a student applicant or a military counselor.

6

Why is so much information needed on the Request for Course Recommendation form?

You cannot be sure that you have identified the correct exhibit in the *Guide* unless all the information on the form matches the corresponding items in the course exhibit. The course title, course number, name and location of the service school, and length of the course shown on the form should be identical to the information in the exhibit. In addition, the dates of attendance must fall within the exhibit dates. Credit recommendations are for *specific* courses; therefore, all items must be identical if a positive identification is to be made.

A complete and accurate form will also help the Advisory Service research the course.

7

What do I do when the information on the Request for Course Recommendation form does not exactly match the information in the course exhibit?

Send an authorized form to the Advisory Service. Send the form in yourself; do not give it to the student to submit. If just one item differs from that in the exhibit you have located (for example, "Length"), you should circle the item to bring it to the attention of the research staff. Send *copies* of military records only if you think they will provide useful additional information. If the staff cannot identify the course and supply a credit recommendation, you may still grant credit to the applicant by conducting your own assessment of the applicant's learning. (See question 28 for information about assessment techniques.)

8

I've come across a few exhibits with *Learning Outcomes* instead of *Objectives*. Why the change?

Institutions are increasingly using learning outcomes in their own course descriptions. To make it easier for institutional decision makers to compare competencies acquired in a military course to those competencies acquired in courses offered at their own institutions, the Military Evaluations Program adopted this new format in courses evaluated since 1987.

The Council on Postsecondary Accreditation (COPA) and its Committee on Recognition (the committee which recognizes the various accrediting bodies in this country) are placing more emphasis on the use of learning outcomes. The committee expects recognized accrediting bodies to apply COPA's provision regarding the use of learning outcomes and their assessment.

9

How long does it take to receive a response if I submit a properly completed request form?

About three weeks for most requests, longer for those requiring extensive research. Every effort will be made to respond as quickly as possible. If you wish, you may call in requests; be sure to have all pertinent information (see question 6) available to give to the staff person.

10

How can I get additional information about the courses in the *Guide*? Sometimes the descriptive material in the exhibit is not detailed enough for me to make a decision about granting credit. What do I do then?

With the exception of a few computer-taught or classified courses, The Center has the programs of instruction on file for most courses listed in the *Guide*. When necessary, The Center can provide the topic outline from the military syllabus; and when an entire program of instruction is needed, arrangements can be made to photocopy the complete syllabus. Please note that the credit recommendations are based on more information than that cited in the syllabus.

11

What are USAFI and DANTES? Can I grant credit for the courses and tests listed on an applicant's USAFI or DANTES military test reports?

USAFI was the United States Armed Forces Institute, which offered an extensive educational program to active-duty personnel. USAFI correspondence, seminar, and self-study courses, end-of-course tests, and Subject Standardized Tests (SSTs) were made available to service personnel worldwide until 1974, when USAFI was disestablished. Credit recommendations for USAFI courses and examinations may be found in the *Handbook to the Guide*. (See question 32.)

Subsequently, the Defense Activity for Non-Traditional Education Support (DANTES) was established in 1974, and that agency continued the development and administration of Subject Standardized Tests and other educational services. The Center continues to recommend credit for USAFI offerings and DANTES SSTs. Credit recommendations for DANTES SSTs can be found in the *Handbook to the Guide*. Detailed descriptions may be found in the *Guide to Educational Credit by Examination*, which can be purchased through ACE Publications.

In verifying completion of USAFI or DANTES courses or tests, the military test report should not be considered official. That report is given to all service personnel who have taken a course or test. To obtain official USAFI or DANTES transcripts, refer to the addresses provided in Appendix A, under "Other Recommendations."

12

What is the significance of the date which appears after each credit recommendation?

That date is called the "evaluation date" and represents the month and year the credit recommendation was established. Each time a course or occupation is evaluated, a date is provided to indicate when the course or occupation was last considered for a credit equivalency. The date tells you how recently a recommendation was established so that you can judge the currency of the credit recommended. This information is particularly useful in subject areas where "state of the art" is important in determining the applicability of credit. You can also use the evaluation date when your institution has established a "statute of limitations" for acceptance of transfer credit. The date is provided purely for your information; do not confuse the date with exhibit dates.

13

An applicant completed a course in 1973, but the *Guide* exhibit dates are 5/74 to Present. Should I grant credit based on the *Guide?*

The exhibit dates shown in the *Guide* indicate the time period for which The Center has information on the course. The course may have been offered for several years prior to the exhibit "start" date, but since the service branch did not submit information on the course during that time period, we are not able to backdate the exhibit to cover it. If you can be reasonably sure, from other information provided by the applicant (length, course content description), that their course was the same or similar to the course listed in the *Guide*, then you may want to grant credit based on the *Guide* recommendation. If the applicant's course was a number of weeks longer or shorter than the one covered in the *Guide* exhibit, you may be able to grant credit based on a comparison of the applicant's information with the descriptive information in the *Guide*. The Center encourages you to conduct your own assessment of courses for which no credit recommendation is available. (See question 28 for information about assessment techniques; for information on Navy rating exhibit dates, see questions 22 and 23.) Staff may be able to provide you with military formal school catalog course descriptions for periods of time outside the exhibit dates. This should help you determine whether you might apply the credit listed in the *Guide* exhibit based on your own comparison.

14

I found the correct exhibit in my 1990 *Guide*, but under "Credit Recommendation" it says "Pending evaluation." My student cannot wait for the 1992 *Guide* to find out what credit she might receive. What should I do in such a case?

Staff members regularly schedule site evaluations. We publish a list of military schools and occupations in the office newsletter so that you may be aware of the availability of recommendations. In addition, colleges and military counselors on The Center and military mailing lists should receive updates for the *Handbook to the Guide*. These updates contain credit recommendations for courses and occupations evaluated since the 1990 *Guide*. (See question 32.) When a course or occupation is listed as "Pending evaluation," and does not appear in the *Handbook*, you may call the office to find out if a credit recommendation is available or you may simply send in your authorized Request for Course Recommendation or Request for Navy occupations form. The *Guide* system is constantly growing as courses and occupations are added to the data base.

15

The Keyword Index is somewhat confusing. Can you offer some tips on locating courses by title?

You can generally locate an exhibit by searching in the *Keyword Index* under the main words of the title. Generic terms such as "Repair," "Technician," and "Officer" are not keywords.

Some keywords may consist of two words. For example, "Electronics Technician," "Aviation Electronics," and "Aviation Support" are keywords.

The computer's system of alphabetizing places abbreviations and acronyms at the end of a sequence. Numbers are arranged in the following manner:

Mk 1
Mk 1A
Mk 10
Mk 100
Mk 108
Mk 11
Mk 111
Mk 119
Mk 12

As you can see, Mk 12 appears *after* Mk 100. Letters alphabetize before numbers.

It is important to check under more than just one word if you cannot locate a course right away.

16

One of my students completed a formal military course but does not have a DD Form 295 or DD Form 214 because he was not on active-duty service. Can I grant credit for the course, and how can I verify that he actually completed the course?

We recommend that school officials use the DD 295 or DD 214 whenever it is available to verify successful completion of a service course. This suggestion is not intended to exclude those individuals who do not have access to the forms because the individuals were (1) on reserve status, (2) in the National Guard, or (3) civilians attending military courses. In such cases, we suggest that alternative forms of certification, such as course completion certificates or other acceptable records of training, be used to verify eligibility for credit.

Veterans may use *Request Pertaining to Military Records*, Standard form 180, available from Veterans Administration offices to obtain records of their military training.

17

How can I distinguish among the terms paygrade, general rate, rating, and rate?

A *paygrade* is a position from 1 to 9 on the Navy's pay scale for enlisted personnel; in referring to a paygrade, the letter E (enlisted) precedes the number (E–1, E–2, E–3, E–4, E–5, E–6, E–7, E–8, and E–9). A *general rate* is an apprenticeship that indicates eligibility for entrance into various ratings. A *rating* is an occupation composed of a number of related jobs. A *rate* is an identifying term or title associated with a given paygrade, for example, the rate petty officer third class for paygrade E–4. A rate may also be associated with a specific rating; for example, a petty officer third class (paygrade E–4) whose rating is Air Controlman will usually refer to his or her rate as "Air Controlman Third Class." Navy men and women usually refer to themselves by their rate. Refer to Appendix A for a description of the Navy Enlisted Rating structure.

18

Do all ratings provide paths of advancement and career development for paygrades E–4 through E–9?

Although most ratings begin at paygrade E–4 and terminate at paygrade E–9, there are some exceptions. For example, the Legalman rating consists of paygrades E–5 through E–9. In this case, a person progresses to paygrade E–5 from paygrade E–4 of the Yeoman rating. At the other end of the spectrum, some ratings are structured so that a person holding a rating which consists only of paygrade E–9 (e.g., Master Chief Constructionman) may have progressed from any one of several related ratings that terminate at paygrade E–8. This allows personnel who are assigned to ratings that are low in density and in which occupational content is similar to progress to higher levels and scopes of authority and responsibility. Paths of progression are provided in each exhibit in the "Career Pattern" section.

19

Should persons be granted credit for their Navy general rate (paygrade E–3) as well as rating (paygrades E–4—E–9)?

Yes. Anyone holding a rating is also eligible for the credit recommended in the general rate exhibit. Although the credit recommendations in the rating exhibits are cumulative (i.e., the credit for DP3 is included in DP2), the rating exhibits do not include the general rate recommendation. The item "Career Pattern" in the rating exhibit will indicate the general rate the individual held prior to progressing to the rating. The general rate exhibit should then be located (see Step 3 in "How to Find and Use General Rate and Rating Exhibits"), and the credit recommended considered in conjunction with the credit recommendation for the rating.

20

If the letters PNA (passed-but-not-advanced) appear in item 8 of NAVPERS 1070/604, Navy Occupation/Training and Awards History, or on DD Form 295, Application for the Evaluation of Educational [or Learning] Experiences During Military Service, should I grant the credit recommended for the rating the person holds or for the rating the person would have held if he or she had been advanced?

The latter. Passed-but-not-advanced means that the person has passed the required written and performance examinations and is qualified for advancement. However, time in service, time in rate, and awards received also contribute to a person's total advancement score, which is the basis used in determining who is selected to fill existing openings in a given rate. In other words, PNA persons have demonstrated their occupational proficiency but were not advanced because they had an insufficient number of points from sources other than examinations to compete successfully for the openings in a given rate.

21

A student has asked for credit for an NEC. What are NECs and have they been evaluated?

An NEC (Navy Enlisted Classification) identifies qualifications individuals acquire in addition to skills required in their rating. A majority of the NECs are narrow in scope and have not been evaluated. Several NECs, however, require individuals to work in them full time, rather than in their rating. The following NECs have been evaluated at this time: Career Recruiter, Classification Interviewer, Recruiter Canvasser, Command Career Information Retention Counselor/Coordinator, Certified Navy Drug and Alcoholism Counselor, and Instructor.

NECs are evaluated using the same procedures ACE has used for the evaluation of occupations: a team of subject-matter specialists from colleges and universities use written descriptions provided by the Navy, interview a number of persons holding the NEC, write a description of the on-the-job activities, and determine the credit recommendation. The exhibits appear on page 5-1.

22

If a person held an occupational specialty prior to the start date of the exhibit, can I still use the recommendation?

Probably not. You need to do some additional investigating to help you decide whether to accept or modify the recommendation. The start date established by The Center is based on how far back we can verify that the occupation was the same as it was when our evaluation team evaluated it. The verification is based on official documentation given to us by the Navy. We do not have the means to confirm that an occupation was the same before the start date, but you might. There are two steps you will need to follow in making your decision:

1. Ask the person to provide a copy of the Navy Regulation pertaining to occupational qualifications or standards that were in effect when he or she held the specialty. Use the qualifications or standards to identify the learning outcomes represented by the general rate or rating.

2. Determine how much credit may be granted to the person. (Remember that advancement connotes occupational proficiency.) A careful comparison of the description in the occupation exhibit and the qualifications or standards obtained in step one may reveal whether there was a substantive difference. If not, the credit recommendation in the exhibit may be used. If specific differences are identified, then the recommended credits may need to be modified accordingly. One approach to modifying the credit recommendation is to have faculty members in appropriate subject areas assess the person's learning. In assessing the learning for educational credit, they should identify the discrete learning outcomes achieved by the person and relate them to the educational objectives of their courses and programs of study. Equivalent credit should be granted when the person has demonstrated the achievement of the same learning outcomes for which the faculty members grant credit to their students. (See question 28 for information about assessment techniques.)

23

When a Navy occupation exhibit includes the statement "Pending evaluation," how will I know when the ACE recommendations will be available?

The abbreviated exhibit format was developed to inform you of the evaluation status of the occupations. Such exhibits include only the ACE ID number, the title, the designation(s), and the exhibit dates with the statement "Pending evaluation." When you encounter this statement, two things are certain: (1) the occupation is one that was in use as of the publication cut-off date of June 1990 and (2) that ACE plans to evaluate it. As recommendations become available, they will be announced in the office newsletter. Inquiries about the evaluation status of an occupation should be directed to the Advisory Service. (See Step 6 in How to Find and Use Navy Exhibits.)

24

Why is the number of credits recommended for the occupation I just looked up greater than the number recommended for the course that leads to it?

It is rare for the subject matter covered in a course to perfectly coincide with the learning represented by occupational proficiency. In most cases, there is quite a difference in scope: difference in the subject matter mastered by the learner and, when the subject matter is the same, a difference in the depth and breadth of the learning.

Usually the scope of a course is narrower than that of the job. Most Navy courses are designed to prepare Navy men and women to function on the job or to take on additional tasks. As such, the courses normally provide entry-level occupational skills and competencies. Occupational proficiency is predicated on the additional factor(s) of work experience and/or extensive self-instruction.

In awarding credit for related occupations and courses, you need to be aware of the likelihood of overlapping credit recommendations. The term "overlapping" means that at least part of the learning represented by demonstrated occupational proficiency is the same as that for the course; therefore, some of the credits recommended may duplicate each other. A suggested procedure for resolving duplication is given in the answer to question 25.

25

I have looked up the exhibits for several courses and occupations for one person. Several of the credit recommendations within a given credit category are in the same subject areas. How can I avoid granting too much or duplicate credit to this person?

In this instance, you have an example of overlapping credit recommendations. Awarding a simple total of the recommended credits could result in the award of more credit than the learning merits.

Credit recommendations may overlap between (1) related courses, (2) related occupations, and (3) related courses and occupations.

Course recommendations will overlap when the individual has participated in several military courses in the same subject area and at the same level. Recommendations (both credit and apprenticeship) for occupations will overlap when the individual has advanced to two or more specialties that require related qualifications and the performance of related or similar duties. Course recommendations and occupation recommendations will overlap when the individual has acquired his or her occupational proficiency, or a significant portion of it, through completion of one or more formal service school courses.

In all the instances cited, when the learning outcomes and courses or programs of study in which recommendations are made are the same or very similar, there is overlap, and you should modify the credit recommendations to avoid granting duplicate credit. To reconcile the overlap in the recommendations, compare the descriptions and recommendations and interview the applicant to obtain additional information. To determine how much credit may be awarded without duplication, use the following steps:

1. Identify the appropriate occupations held and/or formal courses completed by the individual from the official military records the individual provides.
2. Locate all pertinent and available occupation exhibits and/or course exhibits in the *Guide*.
3. Locate the appropriate occupation and course exhibits.
4. Read and compare all the descriptions.
5. On the basis of the person's program of study, identify the appropriate recommendations in each exhibit.
6. Read and compare all the pertinent recommendations. It may be helpful to list the amount of credit and the subject areas or programs of study of each recommendation.
7. If necessary, obtain additional information from the individual through interview or further assessment.
8. When the nature and extent of the individual's learning has been identified, refer to all pertinent recommendations and make decisions on how much credit may be awarded without duplication. Credit should be awarded as appropriate to the educational goals of the individual and the policies of the institution.

If you cannot determine whether duplication exists, write the Advisory Service.

26

When credit is recommended in more than one category, what should I do?

Credit has frequently been recommended in more than one category. One reason for multiple-category recommendations is that the scope of a given rating or course reflects learning in several subject fields at different levels of complexity. The learning outcomes acquired in a course or rating in one subject field may apply to courses normally included in lower-division baccalaureate/associate degree programs, while those in another subject field may apply to courses normally included in upper-division baccalaureate programs. Another reason for multiple-category recommendations is that learning in a given subject field can be applied to courses and programs of study encompassed by more than one of the categories. That is, learning in business, for example, may apply to the vocational certificate category and to the upper-division baccalaureate category. A thorough reading of the exhibit will help you to determine which category or catagories is the best for you to apply. You will need to read the exhibit and compare learning outcomes achieved and course objectives and content with those of your own institution.

In the first instance—learning in several subject fields—the recommended credits may be added as long as all the subjects are applicable to the student's program of study at your institution.

> *Example A:*
> In the lower-division baccalaureate/associate degree category, 1 semester hour in communication skills and 1 in principles of management. In the upper-division baccalaureate category, 3 semester hours in personnel management (6/75).

In Example A, up to 5 semester hours may be awarded if they apply to the student's program: 1 in communication skills, 1 in principles of management, and 3 in personnel management.

In the second instance—learning in a given subject field that is applied to two or more categories—the recommended credits probably should not be added. You will have to determine how they apply to the student's program of study at your institution.

Example B:

In the vocational certificate category, 15 semester hours in electricity or electronics. In the lower-division baccalaureate/associate degree category, 10 semester hours in electricity or electronics. In the upper-division baccalaureate category, 5 semester hours in electricity or electronics (6/75).

In Example B, to determine how many credits to award, compare the information in the exhibit description with the desired outcomes of electricity or electronics or related courses and programs of study at your institution. Award credit based on comparison of these outcomes.

In the third instance—a combination of Examples A and B—you may combine the credit categories when the subject areas are different, but should not add subject areas with the same titles.

Example C:

In the lower-division baccalaureate/associate degree category, 3 semester hours in typing and 3 in office management. In the upper-division baccalaureate category, 3 semester hours in office management and 2 for field experience in management (11/75).

The 3 semester hours in office management recommended in the lower-division baccalaureate/associate degree category and the 3 in office management recommended in the upper-division baccalaureate category should not be combined for a total of 6. Eight semester hours might be granted if they apply to the student's program: 3 in typing, 3 in office management, and 2 for field experience in management. The evaluators have described the course content, and using that description from the course exhibit, you must determine the appropriate application of the credit recommendation.

All three examples are from early evaluations. In recent evaluations, evaluators place the credit in a given subject area in the highest appropriate category. If credit is placed in more than one category, specific subjects will be cited. For example, if credit in the lower division is in personnel supervision, credit in the upper division might be in human resource management.

As a general rule, you should read the exhibit description and then award credit as it best applies to the student's program of study, as determined through academic counseling.

Credit may be applied to a student's program in various ways: (1) applied to the major to replace a required course, (2) applied as an optional course within the major, (3) applied as a general elective, (4) applied to meet basic degree requirements, or (5) applied to waive a prerequisite. Credit granted by a postsecondary institution will depend on institutional policies and degree requirements.

For additional help in this area, see the Model Policy on page xxxiii.

27

Do I have to grant credit *exactly* as it appears in the recommendation?

No. You are under no obligation to grant credit, although most colleges do recognize learning that occurs in a military setting. The use of ACE recommendations is the prerogative of education officials and employers. The recommendations are provided to assist you in assessing the applicability of a person's military learning experiences to his or her educational program or occupation. *You may modify the recommendations in accordance with your institution's policies and practices.*

You should keep in mind that the recommendations are advisory and are designed as a tool for use in giving due recognition to an individual for his or her learning experiences in the armed services. You should also keep in mind that the learning of some service personnel may exceed the skills, competencies, and knowledge evaluated for a specific course or occupation. In these cases, you may wish to conduct further assessment. (See question 28 for information about assessment techniques.)

28

May I conduct my own assessment of an applicant's learning?

Yes. In a sense, you are *always* conducting your own assessment, even when you use the recommendations in this book. The *Guide* is one of many tools you can use to assess what an applicant has learned and how that learning can be applied to a specific program of study at your institution. When you cannot find a recommendation in the *Guide* or cannot obtain one from the Advisory Service, we encourage you to use other means to assess what the person has learned.

There is a wide variety of assessment techniques that you can use, e.g., written examinations, oral examinations, faculty committee assessment, evaluation of materials supplied by the applicant, personal interviews, performance tests, and standardized examinations such as CLEP. A combination of several techniques will usually result in a reliable assessment of the person's learning.

You may learn more about assessment techniques through the publications of the Council for Adult and Experiential Learning (CAEL), formerly the Cooperative Assessment of Experiential Learning. Their publications may be purchased from CAEL, 223 West Jackson Blvd. Suite 510, Chicago, IL 60606 (312-922-5909).

The *ACE Guide Series* now comprises this *Guide* and companion volumes, *The National Guide to Educational Credit for Training Programs* (which lists recommendations for courses offered by business and industry, government agencies, professional and voluntary associations, and labor unions), and the *Guide to Educational Credit by Examination* (which provides descriptions and credit recommendations for nationally recognized testing programs). This *Guide* and the *National Guide* may be purchased through Macmillan Professional Books Division, Macmillan Publishing Co., Inc., 866 Third Avenue, New York, NY 10022 (800-257-5755). The *Guide to Educational Credit by Examination* may be purchased through the American Council on Education, Publications Department, One Dupont Circle, Washington, D.C. 20036-1193.

29

Should a two-year college use only lower-division credit recommendations? And, should a four-year college use only upper-division credit recommendations?

Not necessarily. Evaluators are instructed to be as general as possible. That is, they place a course recommendation in the category in which it is *generally* taught at most institutions. If your institution teaches a given course at a different level, you are encouraged to grant the credit at that level. Depending on the recommendation, the programs of study available at the institution, and the objectives of the student, all types of institutions can use any or *all* of the four categories used in the *Guide*, namely the vocational certificate category, the lower-division baccalaureate/associate degree category, the upper-division baccalaureate category, and the graduate degree category. Evaluators now place credit recommendations in the highest appropriate credit category. Please see "Categories of Credit" in Appendix A.

30

I am an employer. How will the *Guide* be useful to me?

You may find the exhibits helpful in identifying the skills and knowledge of veterans and placing them in jobs. The recommendations and descriptions enable you to compare a veteran's training and experience with the qualifications and requirements for jobs. The recommendations relate learning to postsecondary courses and curricula and, in some cases, to apprentice training programs.

31

We have received a transcript from a military service school listing semester credits and carrying the statement that the school is accredited by one of the six regional accrediting associations. How do we handle this?

At this time we know of no military schools that are accredited above the certificate level other than the following: Community College of the Air Force, which is accredited at the two-year community college level; Army Command and General Staff College at Fort Leavenworth, Kansas, which is accredited to grant an M.A. degree; Air Force Institute of Technology at Wright-Patterson Air Force Base, which is accredited through the doctoral level; Defense Intelligence College, Washington, DC, accredited to grant an M.A. degree; Naval Postgraduate School, Monterey, CA, accredited through the doctoral level; Uniformed Services University of the Health Sciences School of Medicine, Bethesda, MD accredited through the doctoral level; and the service academies.

We recommend that you handle the certificate-level credit listings in accordance with your institutional policy regarding certificate-level credit.

32

What is the *Handbook to the Guide to the Evaluation of Educational Experiences in the Armed Services?*

The *Handbook to the Guide* was designed to keep institutional and military representatives up to date on the activities of ACE and The Center as well as to provide credit recommendations for courses and occupations evaluated since the latest *Guide* was printed. Revisions are mailed to military education personnel and civilian institutions. Sections most likely to be revised are those on exams, other aids, and evaluation updates.

33

A Navy student I'm counseling has taken an Air Force course. It's not in Volume 4 of the *Guide*. What should I do?

Anyone attending an Air Force school or course can obtain a Community College of the Air Force (CCAF) transcript which documents that training if the school or course is recognized by CCAF for credit. The transcript may be used to request transfer of credit to another institution or otherwise document college credit, since non-not award credit for all Air Force courses, but only those regularly attended by Air Force enlisted personnel and taught by CCAF-affiliated schools.

A CCAF transcript may be obtained by sending a completed AF Form 2099 or a brief letter requesting transcript service to CCAF/RRRA, Maxwell Air Force Base, AL 36112-6655. A certificate of training must accompany the request. DD Form 214 is not acceptable. Specify the type of transcript (personal or official) and the address to which the transcript is to be mailed. Provide full name, social security number, and ensure that the person whose transcript is requested signs the request form. The transcripts are free. Official transcripts will be mailed only to institutions.

34

I've found exhibits for most enlisted occupations, but not for the Air Force and Marine Corps. How come?

The student may write to the Community College of the Air Force (CCAF) to obtain a transcript which will include credit for the AFSCs held, reported as internship. The student should write to CCAF/RRRA Office of the Registrar, Maxwell AFB, AL 36112.

Marine Corps MOS recommendations are included in the 1990 *Guide*. Recent evaluations have been conducted for MOS's in the aircraft maintenance and avionics occurpational fields. The exhibits begin on page 4–1 in volume 4. Refer to How to Find and Use Marine Corps MOS Exhibits and Appendix A (both in volume 4) for information on the Marine Corps MOS system.

If you are not already receiving the newsletter, write to the Editor, Update, The Center for Adult Learning and Educational Credentials, American Council on Education, One Dupont Circle, Washington, DC 20036–1193.

Awarding Credit for Extrainstitutional Learning

The following statement by the ACE Commission on Educational Credit and Credentials has been approved by the ACE Board of Directors and endorsed by the Council on Postsecondary Accreditation.

The American Council on Education recommends that postsecondary education institutions develop policies and procedures for measuring and awarding credit for learning attained outside their sponsorship.[1]

American society abounds in resources for learning at the postsecondary level. Public, private, and proprietary education institutions exercise the central but not exclusive responsibility for instruction and learning. Associations, business, government, industry, the military, and unions sponsor formal instruction. In addition, independent study and reading, work experiences, the mass media, and social interaction contribute to learning and competency.

Full and effective use of all educational resources is a worthy educational and social goal. Achieving this goal will depend to a large extent on providing equitable recognition for extrainstitutional learning:

- Educational credentials have a significant bearing on the economic, professional, and social status of the individual. Thus, social equity requires that equivalent learning, regardless of where and how it is achieved, be incorporated into the system of rewards for learning and competency.
- Recognition encourages learning and contributes to pedagogical effectiveness. Teaching students what they already know is both stultifying to them and wasteful of educational and personal resources.

Postsecondary education institutions legally authorized and accredited to award degrees and other educational credentials have a special responsibility to assess extrainstitutional learning as part of their credentialing function.

In the development of institutional policies and procedures, the American Council on Education recommends the following guidelines and resources.

Guidelines

1.

Reliable and valid evaluation of student achievement is the sine qua non in awarding credit. Experience, whether acquired at work, in social settings, in the library, at home, or in the formal classroom, is in itself an inadequate basis for awarding credit. Increased attention in choosing evaluation procedures and techniques and more thorough evaluation are necessary when learning has been attained without participation in a program of study prescribed by an educational institution and offered by its faculty.

2.

In determining whether it is appropriate to accept a student's extrainstitutional learning for credit, the governing considerations should be its applicability to the student's program of study, including graduation requirements, and the relationship of the learning to the institution's mission, curricula and standards for student achievement. Learning should be articulated, documented and measured in these terms.

3.

Institutions should evaluate extrainstitutional learning only in subject-matter fields in which they have or can arrange for faculty expertise or where they can rely on nationally validated examinations or other procedures for establishing credit equivalencies. Institutions should award credit in these areas only if the quality of learning meets their standards for student achievement. Normally, institutions should evaluate learning and award credit only in subject fields in which they offer courses or curricula. However, if the acquisition of college level learning outcomes has been demonstrated in an area not taught by the institution, but related to the student's program of study, an exception may and ought to be made.

4.

Institutions awarding credit for extrainstitutional learning should develop clearly stated policies regarding administrative responsibility, student eligibility, means of assessment, recording of results on transcripts, storage of documentation, student fees, and maximum number of credits allowable. Information on these and related institutional policies and procedures should be disseminated to students and faculty for maximum awareness and utilization.

5.

Institutional policy should include provision that the institution's policies and procedures for awarding credit for extrainstitutional learning should be subject to periodic reevaluation.

---

[1] "Extrainstitutional learning" is defined as learning that is attained outside the sponsorship of legally authorized and accredited postsecondary educational institutions. The term applies to learning acquired from work and life experiences, independent reading and study, the mass media, and participation in formal courses sponsored by associations, business, government, industry, the military, and unions.

Transfer and Award of Credit

The following set of guidelines was developed by the three national associations whose member institutions are directly involved in the transfer and award of academic credit—the American Association of Collegiate Registrars and Admissions Officers, the American Council on Education, and the Council on Postsecondary Accreditation. The need for such a statement came from an awareness of the growing complexity of transfer policies and practices, which have been brought about, in part, by the changing contours of postsecondary education. With increasing frequency, students are pursuing their education in a variety of institutional and extrainstitutional settings. Social equity and the intelligent use of resources require that validated learning be recognized wherever it takes place.

The statement is intended to serve as a guide for institutions developing or reviewing policies dealing with transfer and award of credit. The statement is under periodic review by the three associations, and reactions to it would, of course, be welcome. Comments may be directed to Henry Spille, Vice President, ACE, and Director, The Center for Adult Learning and Educational Credentials.

Robert H. Atwell, President

American Council on Education

This statement is directed to institutions of postsecondary education and others concerned with the transfer of academic credit among institutions and award of academic credit for extrainstitutional learning. Basic to this statement is the principle that each institution is responsible for determining its own policies and practices with regard to the transfer and award of credit. Institutions are encouraged to review their policies and practices periodically to assure that they accomplish the institutions' objectives and that they function in a manner that is fair and equitable to students. Any statements, this one or others referred to, should be used as guides, not as substitutes, for institutional policies and practices.

Transfer of credit is a concept that now involves transfer between dissimilar institutions and curricula and recognition of extrainstitutional learning, as well as transfer between institutions and curricula with similar characteristics. As their personal circumstances and educational objectives change, students seek to have their learning, wherever and however attained, recognized by institutions where they enroll for further study. It is important for reasons of social equity and educational effectiveness, as well as the wise use of resources, for all institutions to develop reasonable and definitive policies and procedures for acceptance of transfer credit. Such policies and procedures should provide maximum consideration for the individual student who has changed institutions or objectives. It is the receiving institution's responsibility to provide reasonable and definitive policies and procedures for determining a student's knowledge in required subject areas. All institutions have a responsibility to furnish transcripts and other documents necessary for a receiving institution to judge the quality and quantity of students' work. Institutions also have a responsibility to advise the students that the work **reflected** on the transcript **may or may not** be accepted by a receiving institution.

INTERINSTITUTIONAL TRANSFER OF CREDIT

Transfer of credit from one institution to another involves at least three considerations:

(1) the educational quality of the institution from which the student transfers

(2) the comparability of the nature, content, and level of credit earned to that offered by the receiving institution

(3) the appropriateness and applicability of the credit earned to the programs offered by the receiving institution, in light of the student's educational goals.

Accredited Institutions

Accreditation speaks primarily to the first of these considerations, serving as the basic indicator that an institution meets certain minimum standards. Users of accreditation are urged to give careful attention to the accreditation conferred by accrediting bodies recognized by the Council on Postsecondary Accreditation (COPA). COPA has a formal process of recognition which requires that all accrediting bodies so recognized must meet the same standards. Under these standards, COPA has recognized a number of accrediting bodies, including:

(1) regional accrediting commissions (which historically accredited the more traditional colleges and universities but which now accredit proprietary, vocational-technical, and single-purpose institutions as well)

(2) national accrediting bodies that accredit various kinds of specialized institutions

(3) certain professional organizations that accredit free-standing professional schools, in addition to programs within multipurpose institutions (COPA annually publishes a list of recognized accrediting bodies, as well as a directory of institutions accredited by these organizations).

Although accrediting agencies vary in the ways they are organized and in their statements of scope and mission, all accrediting bodies that meet COPA's standards for recognition function to assure that the institutions or programs they accredit have met generally accepted minimum standards for accreditation.

Accreditation affords reason for confidence in an institution's or a program's purposes, in the appropriateness of its resources and plans for carrying out these purposes, and in its effectiveness in accomplishing its goals, insofar as these things can be judged. Accreditation speaks to the probability, but does not guarantee, that students have met acceptable standards of educational accomplishment.

Comparability and Applicability

Comparability of the nature, content, and level of transfer credit and the appropriateness and applicability of the credit earned to programs offered by the receiving institution are as important in the evaluation process as the accreditation status of the institution at which the transfer credit was awarded. Since accreditation does not address these questions, this information must be obtained from catalogues and other materials and from direct contact between knowledgeable and experienced faculty and staff at both the receiving and sending institutions. When such considerations as comparability and appropriateness of credit are satisfied, however, the receiving institution should have reasonable confidence that students from accredited institutions are qualified to undertake the receiving institution's educational program.

Admissions and Degree Purposes

At some institutions there may be differences between the acceptance of credit for admission purposes and the applicability of credit for degree purposes. A receiving institution may accept previous work, place a credit value on it, and enter it on the transcript. However, that previous work, because of its nature and not its inherent quality, may be determined to have no applicability to a specific degree to be pursued by the student.

Institutions have a responsibility to make this distinction, and its implications, clear to students before they decide to enroll. This should be a matter of full disclosure, with the best interests of the student in mind. Institutions also should make every reasonable effort to reduce the gap between credits accepted and credits applied toward an educational credential.

Unaccredited Institutions

Institutions of postsecondary education that are not accredited by COPA-recognized accrediting bodies may lack that status for reasons unrelated to questions of quality. Such institutions, however, cannot provide a reliable, third-party assurance that they meet or exceed minimum standards. That being the case, students transferring from such institutions may encounter special problems in gaining acceptance and transferring credits to accredited institutions. Institutions admitting students from unaccredited institutions should take special steps to validate credits previously earned.

Foreign Institutions

In most cases, foreign institutions are chartered and authorized by their national governments, usually through a ministry of education. Although this policy provides for a standardization within a country, it does not produce useful information about comparability from one country to another. No other nation has a system comparable to voluntary accreditation. The Division of Higher Education of the United Nations Educational, Scientific, and Cultural Organization (UNESCO) is engaged in a project to develop international compacts for the acceptance of educational credentials. At the operational level, four organizations—the Council on International Educational Exchange (CIEE), the National Council on the Evaluation of Foreign Student Credentials (CEC), the National Association for Foreign Student Admissions (NAFSA), and the National Liaison Committee on Foreign Student Admissions (NLC)—often can assist institutions by distributing general guidelines on admission and placement of foreign students. Equivalency or placement recommendations are to be evaluated in terms of the programs and policies of the individual receiving institution.

VALIDATION OF EXTRAINSTITUTIONAL AND EXPERIENTIAL LEARNING FOR TRANSFER PURPOSES

Transfer-of-credit policies should encompass educational accomplishment attained in extrainstitutional settings as well as at accredited postsecondary institutions. In deciding on the award of credit for extrainstitutional learning, institutions will find the services of the American Council on Education's Center for Adult Learning and Educational Credentials helpful. One of The Center's functions is to operate and foster programs to determine credit equivalencies for various modes of extrainstitutional learning. The Center maintains evaluation programs for formally structured courses offered by the military, and civilian noncollegiate sponsors such as business, corporations, government agencies, and labor unions. Evaluation services are also available for examination programs, for occupations with validated job proficiency evaluation

systems, and for correspondence courses offered by schools accredited by the National Home Study Council. The results are published in a Guide series. Another resource is the General Education Development (GED) Testing Program, which provides a means for assessing high school equivalency.

For learning that has not been validated through the ACE formal credit recommendations process or through credit-by-examination programs, institutions are urged to explore the Council for Adult and Experiential Learning (CAEL) procedures and processes.

USES OF THIS STATEMENT

This statement has been endorsed by the three national associations most concerned with practices in the area of transfer and award of academic credit—the American Association of Collegiate Registrars and Admissions Officers, the American Council on Education, and the Council on Postsecondary Accreditation.

Institutions are encouraged to use this statement as a basis for discussions in developing or reviewing institutional policies with regard to transfer. If the statement reflects an institution's policies, that institution might want to use this publication to inform faculty, staff, and students.

It is recommended that accrediting bodies reflect the essential precepts of this statement in their criteria.

Approved by the Executive Committee, American Association of Collegiate Registrars and Admissions Officers
November 21, 1978 and reaffirmed in 1989.

Approved by the American Council on Education/Commission on Educational Credit and Credentials
December 5, 1978 and reaffirmed in 1989.

Approved by the COPA Board
October 10, 1978

Elements of a Model Policy on Awarding Credit for Extrainstitutional Learning

Extrainstitutional learning is defined as learning that is attained outside the sponsorship of legally authorized and accredited postsecondary education institutions. The term applies to learning acquired from work and life experiences, independent reading and study, the mass media, and participation in formal courses sponsored by associations, business, government, industry, the military and unions.

I. Example Statement of General Policy

Degree credit shall be awarded for postsecondary-level extrainstitutional learning. Such credit awards shall be made under protocols designed to assure that reliable and valid measures of learning outcomes are or have been applied.

Rationale

Adult students are demanding that their learning acquired in extrainstitutional settings be assessed and that appropriate degree-related credit be awarded. This is a reasonable request and also one in keeping with the national interest. Full and effective use of all educational resources is a worthy educational and social goal. Achieving this goal will depend to a large extent on providing equitable recognition for extrainstitutional learning.

American society abounds in resources for learning at the postsecondary level. Postsecondary education institutions legally authorized and accredited to award degrees and other educational credentials accordingly have a special responsibility to assess extrainstitutional learning as part of their credentialing function.

Educational credentials have a significant bearing on the economic, professional, and social status of the individual. It follows that social equity requires that equivalent learning regardless of where and how it is achieved be incorporated into the system of rewards for learning and competency. Recognition encourages learning and contributes to teaching effectiveness. Teaching students what they already know is both stultifying to them and wasteful of educational and personal resources.

Through reliable and valid assessment of extrainstitutional learning, more persons can be enabled to enter college and work successfully toward degrees and other academic goals. Many of these individuals are those who have been educationally disadvantaged in the past.

II. Example Policy for Administrative Responsibility

Responsibility for administering policies and procedures for awarding credit for extrainstitutional learning rests with the Academic Vice President (or other designated senior academic official).

Rationale

Awarding credit is an academic matter. Therefore, administrative responsibility for the policies and procedures pertaining to awarding credit for extrainstitutional learning should be assigned to the institution's senior academic official. Policy implementation and application may be delegated to other institutional officials such as deans, department chairpersons, and registrars. However, oversight of their policy implementation and application is performed by a senior academic official.

Example of Application of the Policy

The academic vice president delegates to the institutional registrar the responsibility for transcripting credit awarded on the basis of recommendations in the ACE Guides (the policy was approved through the institution's usual governance procedures) and provides the registrar with guidelines for performing this responsibility. Included in the guidelines are a series of steps to follow in determining how to apply the ACE credit recommended for a course whose title is not the same as the title of any course offered by the institution.

The ACE *Guide* recommends 3 semester hours in automotive maintenance, but the institution's courses are more specific and carry titles such as Tune-Up I, Auto Brakes, and Automatic Transmission I. In accordance with the guidelines, the registrar compares course descriptions in the institution's catalog with the course description in the *Guide*, finds that the learning outcomes acquired through Tune-Up I match very closely the learning outcomes acquired through the military's automotive maintenance course, and transcripts 3 semester hours in Tune-Up I.

III. Example Policy on Learning That Will Be Evaluated and Who Will Conduct the Evaluations

Extrainstitutional learning related to subject areas, courses and programs of study will be evaluated for registered students. Established institutional evaluation procedures will be followed, using one or more of the authorized publications and methods for effecting assessment. Students of any age may apply for credit for extrainstitutional learning at any time during a period of enrollment.

Rationale

The learning that is evaluated must be in subject areas in which faculty expertise is available or in which expertise can be arranged. This expertise is essential for conducting evaluations and making credit-award decisions. If subject-matter experts do not conduct the evaluations and make the decisions, the credibility of the activity is suspect.

While the great majority of students requesting credit for extrainstitutional learning will be of relatively mature years, it is possible that "young students" may have acquired learning in extrainstitutional settings. Providing a student can document the attainment of appropriate learning outcomes, he or she should receive credit regardless of age. While most applications for award of extrainstitutional learning credit will be received at the time of enrollment from new students, it is possible that students already enrolled may realize that they, too, have extrainstitutional learning experiences that might qualify for credit awards. It is also possible that enrolled students, especially those who are employed, will continue to learn in noncollegiate settings, and will want their learning assessed. Student initiatives with respect to extrainstitutional learning assessment shall not be limited or restricted to the initial term of enrollment.

Example of Application of the Policy

A 19-year old student has been enrolled at Local College for two years and is about to enter her junior year. At the time of enrollment, it did not occur to her that the foreign language requirement might be satisfied with a language other than one of those taught at the institution. This student's parents were refugees from Hungary who entered the United States in 1958. The Hungarian language is spoken in the home and the student speaks the language fluently. The student is able to document to the satisfaction of the institution's language faculty, through evaluation done by a person in the community fluent in Hungarian, that she is, indeed, proficient in Hungarian. She received 6 credits in Hungarian that satisfy the foreign language requirement for the bachelor's degree.

IV. Example Policy on Publications and Methods for Use in Awarding Credit for Extrainstitutional Learning

Nine publications and methods are permitted for use in awarding credit for extrainstitutional learning. These publications and methods are: (1) ACE *Guide to the Evaluation of Educational Experiences in the Armed Services*, (2) ACE *National Guide to Educational Credit for Training Programs*, (3) ACE *Guide to Educational Credit by Examination*, (4) New York Regents *Guide to Educational Programs in Noncollegiate Organizations*, (5) College Entrance Examination Board Advanced Placement Program (CEEB/AP), (6) department challenge examinations and/or faculty end-of-course examinations, (7) degree-relevant extrainstitutional learning credit awarded and transcripted by other accredited institutions, as well as that credit transcripted by ACE on the Army/ACE Registry Transcript System (AARTS) and the Registry of Credit Recommendations (ROCR), (8) subject-matter experts who are not members of the institution's faculty but who evaluate extrainstitutional learning at the faculty's request, and (9) individual portfolios using Council for Adult and Experiential Learning (CAEL) or other standardized guidelines.

In addition, advice on using other publications and methods for awarding credit for extrainstitutional learning may be sought from the American Council on Education.

Rationale

For nearly 50 years, the *Guide to the Evaluation of Educational Experiences in the Armed Services* has been the standard reference work for recognizing learning acquired in the military. More recently, the *National Guide to Educational Credit for Training Programs* and the *Guide to Educational Credit by Examination* have attained similar stature. ACE has worked cooperatively with the Department of Defense, the armed services, business, industry, labor unions, other organizations providing education and training, and test publishers, as well as with accredited colleges and universities in developing the credit recommendations presented in the *Guide* series. All recommendations carried are the result of careful and periodic review by evaluation teams that consist of university and college faculty members who are subject-matter experts. All evaluation teams work under policies and procedures approved by the ACE Commission on Educational Credit and Credentials and under protocols and supervision provided by the staff of the ACE Center for Adult Learning and Educational Credentials.

The policies and procedures used to develop the exhibits in the New York Regents *Guide to Educational Programs in Noncollegiate Organizations* are similar to those used by the American Council on Education.

The CEEB/AP program permits high school students to demonstrate the attainment of college-level learning outcomes; the important factor is that learning outcomes are attained, not where the learning took place (in a high school) or who taught the course (usually a high school teacher).

The practice of administering departmental or individual faculty member challenge examinations or end-of-course examinations is long-standing and permits the faculty members to make direct judgements about the equivalence of learning for specific courses.

Credit transcripted on the basis of extrainstitutional learning should be treated the same as that transcripted for courses; in both instances the faculty of the sending institution has attested to the student's attainment of required learning outcomes. Credit transcripted on ACE's Army/ACE Registry Transcript System (AARTS) and Registry of Credit Recommendations (ROCR) for the Army component of the Military Evaluations Program and participants in the Program on Noncollegiate Sponsored Instruction (PONSI) should also be treated as that transcripted for courses; in these instances, teams of fac-

ulty members from accredited colleges and universities have evaluated the learning and judged its equivalence to learning acquired on campuses.

Sometimes the expertise to evaluate extrainstitutional learning is not available on the faculty; in these instances, the faculty can designate an expert to conduct the evaluation. Criteria for selection of "outside" experts should be established.

The portfolio assessment guidelines promulgated by CAEL are widely accepted by faculty assessors and are considered exemplary. The portfolio provides a reliable method for evaluating learning outcomes acquired individually, as opposed to a set of learning outcomes acquired by large numbers of persons, such as through a course offered by the U.S. Army for soldiers.

Example of Application of the Policy

A student (soldier), upon entering Local College, provides an AARTS transcript that confirms completion of a course entitled "Advanced Geodetic Surveyor" at the Engineer School, Ft. Belvoir, Virginia, in October 1981, while holding the rank of sergeant in the U.S. Army. Information on the transcript and in the ACE *Guide to the Evaluation of Educational Experiences in the Armed Services* indicates that the soldier completed this course when it was taught at Ft. Belvoir between January 1977 and November 1983. Its objectives were to train warrant officers and senior noncommissioned officers in advanced geodetic survey techniques. The course was delivered by means of lectures and practical exercises in advanced geodetic surveying techniques including map compiling, vertical and horizontal control surveys, gravity, astronomic observations, and mathematics. The *Guide* recommends that a college or university award 6 semester hours in geodesy at the upper-division baccalaureate level; this recommendation also appears on the AARTS transcript. After review of this recommendation, Local College awards this student 6 semester hours of credit in geodesy toward completion of a planned major in mathematics.

V. Example Policy on Maximum Number of Credits That May Be Awarded for Extrainstitutional Learning

The maximum number of credits that may be awarded for extrainstitutional learning is three-fourths the number required for a degree.

Rationale

Most postsecondary education institutions have a requirement that stipulates that a minimum of one-fourth of the credits required for a degree must be earned in residence. The balance of the required credits could be awarded on the basis of extrainstitutional learning. However, the credits awarded for extrainstitutional learning and those earned in residence would have to satisfy all degree requirements before a degree could be awarded. In the absence of a residency requirement, all degree requirements conceivably could be met through extrainstitutional learning.

Example of Application of the Policy

John Smith is a newly registered student at Local College. He is a financial vice president of a major U.S. corporation, CPA, and licensed realtor; he is fluent in three foreign languages—German, French, and Spanish; he has published seven articles in domestic and foreign journals and has contributed chapters in two books on international economics; he is knowledgeable about foreign countries and cultures as a result of having lived abroad for eleven years; and he is proficient in computer programming (COBOL and FORTRAN).

On the basis of Mr. Smith's demonstrated knowledge, skills, and competencies, the faculty awarded him 106 credits. The college requires 124 credits for a degree and has a 24 credit residency requirement. Therefore, Mr. Smith must earn 24 credits in residence. What courses does he take to earn 24 credits? His academic advisers decided, and Mr. Smith concurred, that he lacked knowledge about the environment, a special focus and thrust of the college's general education requirement. He took courses to satisfy this requirement and was awarded a degree.

VI. Example Policy on Recording Credits Awarded for Extrainstitutional Learning on Transcripts

The credit awarded for extrainstitutional learning shall be transcripted in the same manner as credits awarded for course completions.

Rationale

The faculty members have either evaluated the learning or approved the other means by which credit can be awarded. They have verified that learning has occurred and is equivalent to the learning acquired in their courses and programs. Therefore, special notation or differentiation of courses and credits awarded on the basis of extrainstitutional learning is unnecessary.

Example of the Application of the Policy

Examples of the way in which Mr. Smith's credit was transcripted are:

Accounting 261 —Financial Information Systems—3 semester hours
Accounting 360 —Financial Reporting Theory and Practice—3 semester hours
Computer Science 251 —Principles of Programming—FORTRAN—4 semester hours
Computer Science 252 —Principles of Programming—COBOL—4 semester hours
German 101 —Elementary German—4 semester hours
German 201 —Intermediate German—4 semester hours
German 309 —Advanced Conversation—3 semester hours

VII. Example Policy on Retention of the Documentation of Extrainstitutional Learning

Documents used to verify the award of credit for extrainstitutional learning shall be retained for one calendar year.

Rationale

The length of time documentation for the credits awarded for extrainstitutional learning shall be retained should be consistent with the length of time documentation for credits awarded for classroom learning are retained. Consistency facilitates equitable handling of student documents and represents sound recordkeeping practices.

Example of Application of the Policy

Local College keeps students' final exams on file for one calendar year, after which they are shredded. Mr. Smith's documentation—copies of articles and chapters he authored, copies of his computer programs, notes and summaries of interviews faculty members had with him, etc.—were kept on file for one calendar year and were then shredded.

VIII. Student Fees for Assessing Extrainstitutional Learning

A fee for the assessment of extrainstitutional learning shall be charged.

Rationale

Assessing extrainstitutional learning, transcripting the credits awarded, etc., are valuable services to students. These services require faculty and staff time. Students should therefore pay a fee for these services just as they pay fees for other institutional services.

Example of Application of the Policy

The fee for assessing extrainstitutional learning and transcripting the results at Local College is based on its average hourly salaries for various faculty ranks (assistant professor, professor, etc.) and administrative positions plus the costs for benefits and administrative services which are computed as percentages of salaries. The average hourly salaries are multiplied by the amount of time spent in performing the evaluation and administrative functions, rounded up to the half-hour. The fee for assessing Mr. Smith's extrainstitutional learning and transcripting the results was $880.

IX. Example Policy on Oversight of the "Program"/Activity

An Oversight Committee, broadly representative of the institution's divisions/departments, shall be appointed (by the "program" administrator or through the institution's usual means of appointing committees). The major function of this committee is to review the credit award decisions to assure consistency across the institution.

Rationale

To protect the integrity and credibility of the activity, consistency is absolutely necessary. If either the faculty or the students perceive that credit awards are made capriciously, their confidence in the activity will be lost. When this occurs, the activity will no longer be viable.

Example Application of the Policy

The Oversight Committee detected that, when a faculty evaluation team for portfolio assessment was comprised of three specific faculty members, the credit awards seemed overly "generous." The Oversight Committee recommended to the administrator that these three faculty members not comprise a team. The administrator discussed the credit-award information with the three faculty members, and they agreed with the Oversight Committee's recommendation, which was then implemented.

X. Example Policy on "Program" Evaluation

The "program" for assessing extrainstitutional learning shall be evaluated on an annual basis by the academic vice-president or his designee(s).

Rationale

It is sound administrative practice to evaluate "programs" on a regular basis to determine if "program" objectives are being met. It is especially important to evaluate new "programs" so that problems are detected early on and changes can be made, if necessary. Evaluation should probably be done jointly by "program" staff and the staff of the Office of Institutional Research.

Example of Application of the Policy

At Local College, responsibility for "program" evaluation is assigned to the Office of Institutional Research, but the Office involves the "program" staff. "Program" evaluation includes but is not limited to, an indepth look at the academic performance of students who have received credit for extrainstitutional learning. Recent data showed that their overall performance, in terms of GPA, was higher than that of the student body as a whole; the average number of credits carried each semester was equivalent to the average number carried by the student body as a whole; they were enrolled in all academic departments of the college, etc. Credit awards were examined by age categories and by assessment instrument used. This information was useful to the college faculty and administrators in deciding to continue the "program."

Course Exhibits

NV

NV-0101-0001

Disease Vector and Pest Control Technology

Course Number: B-00-13; B-00-14; B-000-12; B-000-13.
Location: Disease Vector Control Center, Alameda, CA; Disease Vector Control Center, Jacksonville, FL.
Length: 4 weeks (146 hours).
Exhibit Dates: 4/62-5/69.
Objectives: To provide enlisted personnel with a working knowledge of disease vector and pest control.
Instruction: Lectures and practical experience in the basic principles of disease vector and pest control, including basic entomology, operation of various types of insecticide dispersal equipment, control of arthropods and pest vertebrates, effects of weather on pest control, effects of insecticides, and sanitation.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in community sanitation and entomology (2/74); in the upper-division baccalaureate category, 2 semester hours in community sanitation (12/68).

NV-0202-0001

Medical Illustration Technician, Class C
(Medical Illustration Technic)

Course Number: B-414-0010; B-414-10.
Location: National Naval Medical Center, Bethesda, MD.
Length: 26 weeks (888 hours).
Exhibit Dates: 1/57-12/71.
Objectives: To train personnel as medical illustrators.
Instruction: Lectures and practical exercises in medical illustration, including graphic arts, microscopic drawing, advanced anatomy, and surgical drawing.
Credit Recommendation: In the upper-division baccalaureate category, 4 semester hours in anatomy, and credit in medical illustration techniques on the basis of institutional evaluation (12/68).

NV-0326-0001

Navy Advanced Management

Course Number: P-00-3307.
Location: Defense Resources Management Center, Monterey, CA; Navy Management Systems Center, Norfolk, VA.
Length: 2 weeks (68 hours).
Exhibit Dates: 6/73-1/88.
Objectives: To acquaint officers with concepts and techniques of quantitative methods of management.
Instruction: Lectures, discussions, and simulations to cover functions of management; quantitative methods; risk and uncertainty; economic principles; model building; production analysis; sampling; planning, programming, and budgeting; and management information systems.
Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in quantitative methods (6/75).

NV-0326-0002

1. Navy Schools Management
2. School Administration, Class C1, Course "Golf"
3. School Administration, Class C1, Course "Golf"

Course Number: A-7B-0010; A-7B-0011; A-7B-0012; A-7B-010; A-7B-011; A-7B-012.
Location: *Version 1:* Air Technical Training Center, Memphis, TN; Service School Command, San Diego, CA; Service School Command, Great Lakes, IL. *Version 2:* Instructor/Leadership School, Great Lakes, IL; Instructor/Leadership School, San Diego, CA; Instructor/Leadership School, Norfolk, VA. *Version 3:* Instructor/Leadership School, Great Lakes, IL; Instructor/Leadership School, San Diego, CA; Instructor/Leadership School, Norfolk, VA.
Length: *Version 1:* 2 weeks (80 hours). *Version 2:* 2 weeks (60 hours). *Version 3:* 4 weeks (120 hours).
Exhibit Dates: *Version 1:* 1/75-1/88. *Version 2:* 7/70-12/74. *Version 3:* 11/55-6/70.
Objectives: To provide selected personnel with a working knowledge of management and communications principles necessary to manage a Navy school.
Instruction: *All Versions:* Lectures and practical experience in the principles and procedures of school management and administration. Course includes theory and techniques in management, supervision, and evaluation in school administration, including group guidance and in individual guidance and counseling. *Version 3:* Course consists of two phases; instructional procedures and administrative procedures.
Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 2 semester hours in principles of management (6/75). *Version 2:* In the upper-division baccalaureate category, 1 semester hour in principles of administration (7/74). *Version 3:* In the upper-division baccalaureate category, 2 semester hours in instructional methods (1/74).

NV-0326-0003

Organizational Effectiveness Specialist
(Human Resource Management Specialist)

Course Number: A-500-0045.
Location: Leadership and Organizational Effectiveness School, Millington, Memphis, TN.
Length: 12 weeks (480 hours).
Exhibit Dates: 4/83-Present.
Objectives: To provide graduates with the knowledge and skills necessary to select and apply organizational technologies as a consultant to the U.S. Navy.
Learning Outcomes: Upon completion of the course, the student will be able to: (1) analyze and diagnose organizational problems with attention to organizational culture, values, power, leadership, authority, decision-making, and group process; (2) conduct self-assessment in personal development (3) gather and analyze organizational data using selected (inferential and descriptive) statistics; (4) design and and present a data driven organization effectiveness implementation (5) understand and communicate systemic dimensions of complex organizations (6) design and plan organizational change.
Credit Recommendation: In the graduate degree category, 6 semester hours in organizational development and organizational effectiveness, 3 in practicum in organizational consulting (2/85).

NV-0326-0004

Organizational Effectiveness Advanced Consultant Course

Course Number: None.
Location: Leadership and Organizational Effectiveness School, Millington, TN.
Length: 2 weeks (80 hours).
Exhibit Dates: 12/84-Present.
Objectives: To provide participants with advanced conceptual and skill competence in organizational diagnosis and analysis.
Instruction: The course provides a brief overview of organization theory and addresses standard topics found in the study of organizational effectiveness including systems theory and models, marketing theory and strategy, strategic planning, organizational design and change, and confrontation and negotiation. The student is taught to function as an organizational consultant capable of designing organizational change strategies to enhance the an organization's effectiveness.
Credit Recommendation: In the graduate degree category, 2 semester hours in organizational diagnosis and change (4/85).

NV-0401-0001

Bachelor Quarters Management

Course Number: A-800-0021.
Location: Service School Command, San Diego, CA; Service School Command, Norfolk, VA.
Length: 3 weeks (110-0120 hours).
Exhibit Dates: 4/83-Present.
Learning Outcomes: Upon completion of the course,the student willhave a general knowledge of housekeeping, front office, personnel practices, and accounting in lodging operations.
Instruction: Includes lectures and performance exercises in room assignment, guest relations, personnel management, financial accounting and management, and budgeting.
Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in hotel (lodging) operations and/or rooms management (2/90).

NV-0401-0002

Public Quarter/Flag Operations

Course Number: A-800-0023.
Location: Service School Command, San Diego, CA.

Length: 1 weeks (40-45 hours).

Exhibit Dates: 8/85-Present.

Learning Outcomes: Upon completion of the course, the student will operate a small full service residential facility (bed and breakfast) executive residence.

Instruction: Lecture course emphasizing all aspects of an executive residence to include sevice procedures, equipment maintenance and operations, sanitation, etiquette security, and lodging.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in food service and lodging and management (2/90).

NV-0419-0001

Officers Embarkation (Basic)

Course Number: None.

Location: Naval Amphibious Base, Norfolk, VA.

Length: 4 weeks (139 hours).

Exhibit Dates: 9/66-1/88.

Objectives: To train military personnel to prepare and execute plans for amphibious operations.

Instruction: Lectures in the basic techniques of loading amphibious vehicles, preparation of loading plans, characteristics of amphibious ships, mechanized embarkation, data systems, automated amphibious support, and logistical considerations.

Credit Recommendation: In the vocational certificate category, 3 semester hours in water transportation (1/74).

NV-0419-0002

Staff Embarkation

Course Number: None.

Location: Naval Amphibious Base, Norfolk, VA.

Length: 3 weeks (102 hours).

Exhibit Dates: 9/66-1/88.

Objectives: To train military personnel to prepare and execute plans for amphibious operations.

Instruction: Lectures in the basic techniques of loading amphibious vehicles, preparation of loading plans, characteristics of amphibious ships, mechanized embarkation, data systems, automated amphibious support, and logistical considerations.

Credit Recommendation: In the vocational certificate category, 2 semester hours in water transportation (1/74).

NV-0419-0003

Enlisted Basic Amphibious Embarkation

(Enlisted Embarkation (Basic))

Course Number: G-551-4409.

Location: Naval Amphibious Base, Little Creek, Norfolk, VA.

Length: 4 weeks (139-140 hours).

Exhibit Dates: 9/66-1/88.

Objectives: To train military personnel to prepare and execute plans for amphibious operations.

Instruction: Lectures in the basic techniques of loading amphibious vehicles, preparation of loading plans, characteristics of amphibious ships, mechanized embarkation, data systems, automated amphibious support, and logistical considerations.

Credit Recommendation: In the vocational certificate category, 3 semester hours in water transportation (1/74).

NV-0419-0004

Embarkation for Amphibious Operations

Course Number: G-8B-4403; H-8B-3551.

Location: Naval Amphibious Base, Norfolk, VA; Naval Amphibious Base, San Diego, CA.

Length: 4 weeks (144 hours).

Exhibit Dates: 11/69-1/88.

Objectives: To train U.S. and allied military officers to operate as embarkation officers and combat cargo officers.

Instruction: Lectures in the theory of combat loading for amphibious operations, characteristics of amphibious vessels and vehicles, logistical considerations, and use of the mechanized embarkation data system.

Credit Recommendation: In the vocational certificate category, 3 semester hours in water transportation (1/74).

NV-0419-0005

Amphibious Transport/Cargo Ship Embarkation

Course Number: G-8B-4418; G-551-4418.

Location: Atlantic Naval Amphibious Base, Little Creek, VA.

Length: 2 weeks (65 hours).

Exhibit Dates: 8/72-1/88.

Objectives: To train personnel in the preparation and execution of plans for the combat loading of the LPA or LKA for an amphibious operation.

Instruction: Lectures and practical exercises on embarkation considerations; ship tour; techniques of combat load-planning; preparation of loading plans; logistic considerations.

Credit Recommendation: In the vocational certificate category, 1 semester hour in transportation or amphibious cargo handling (2/74).

NV-0419-0006

Introduction to Transportation Management

Course Number: None.

Location: Naval Supply Center, Oakland, CA.

Length: 2 weeks (65 hours).

Exhibit Dates: 4/71-1/88.

Objectives: To provide military and civilian personnel with the basic principles of distribution and traffic management.

Instruction: Lectures in aspects of the American transportation system; the fundamentals of traffic management; military transportation management; development of transportation regulations; classification, rates, and tariffs; carrier facilities, services, and equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in transportation management (1/74).

NV-0419-0007

Transportation and Storage of Hazardous Material

Course Number: A-8C-0023.

Location: Naval Supply Center, Oakland, CA.

Length: 2 weeks (64 hours).

Exhibit Dates: 6/71-1/88.

Objectives: To provide officers, civilians, and enlisted personnel with the knowledge and skills necessary to administer the storage and transportation of ammunition, explosives, and other hazardous material.

Instruction: Lectures in storage and transportation of hazardous materials, including military and commercial carrier operations; national, state, and local transportation regulations; traffic management and terminal service; airlift and sealift procedures; and organization and operation of a naval weapons station.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/74).

NV-0419-0008

1. Transportation Management
2. Freight Transportation and Traffic Management

Course Number: *All Versions:* A-8C-0017.

Location: Naval Supply Center, Oakland, CA.

Length: *Version 1:* 22 weeks (784 hours). *Version 2:* 22-38 weeks (733 hours).

Exhibit Dates: *Version 1:* 10/71-1/88. *Version 2:* 9/55-9/71.

Objectives: To train military officers and civilian personnel to operate as transportation managers.

Instruction: Lectures and practical experience in the fundamentals of transportation management, including warehouse operations management; marine terminal management; military traffic management; materials handling; hazardous materials transportation and storage; preservation and packaging; personal property shipments; shiploading and storage; transportation rules and regulations; classification, rates, and tariffs; rail, air, motor, and pipeline transportation; quantitative aspects of distribution management.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 6 semester hours in transportation management (1/74). *Version 2:* In the upper-division baccalaureate category, 10 semester hours in transportation operation and management (12/68).

NV-0419-0009

Transportation Management Advanced

Course Number: A-8C-0012.

Location: Naval Supply Center, Oakland, CA.

Length: 2 weeks (64 hours).

Exhibit Dates: 3/71-1/88.

Objectives: To provide military and civilian management personnel with advanced instruction in transportation and physical distribution management.

Instruction: An advanced seminar in the concepts and problems of physical distribution management, including the fundamentals of policy and regulation, federal and military transportation policy, procedures before regulatory agencies, the economics of transportation, labor relations, containerization, materials handling and warehousing, simulation flow process charting, queuing theory, and transportation inventory modeling.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in transportation management (1/74).

NV-0419-0010

Intermediate Transportation Management

Course Number: A-8C-0014.

Location: Naval Supply Center, Oakland, CA.

Length: 2 weeks (64 hours).

Exhibit Dates: 4/71-5/75.

Objectives: To train officers to operate as transportation managers at the intermediate level.

Instruction: Lectures in the legal and economic aspects of highway transportation management; freight classification, rates, and tariffs; handling and shipping of hazardous materials; warehouse operation; carrier modes and services; military traffic management; case study preparation and presentation; current developments in motor transportation.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in transportation management (1/74).

NV-0419-0011

PERSONAL PROPERTY TRAFFIC MANAGEMENT

Course Number: A-8C-0022.

Location: Naval Supply Center, Oakland, CA.

Length: 2 weeks (70 hours).

Exhibit Dates: 3/71-1/88.

Objectives: To train officer, civilian, and enlisted personnel to ship household goods and other personal property.

Instruction: Lectures and practical exercises in personal property traffic management, including station orders, entitlements, entitlements under permanent and temporary change-of-station orders, management, personal property shipment methods, comprehensive personal property problems, standard military transportation and movement procedures, claims procedures and investigations, and tours.

Credit Recommendation: In the vocational certificate category, 2 semester hours in traffic management, household and personal property (6/74).

NV-0419-0012

MARINE TERMINAL MANAGEMENT

Course Number: A-8C-0011.

Location: Naval Supply Center, Oakland, CA.

Length: 2 weeks (64 hours).

Exhibit Dates: 3/71-1/88.

Objectives: To train selected enlisted personnel to operate and manage ocean terminals.

Instruction: Lectures and practical exercises in the operation and management of ocean terminals. Course includes marine terminal operations and management, handling of cargo through the terminal, stevedoring and stevedoring contracts, cargo space allocation, stevedoring and terminal cost estimating, and regulations.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in water transportation (7/74).

NV-0419-0013

AIR TRAFFIC MANAGEMENT

Course Number: A-8C-0024.

Location: Naval Supply Center, Oakland, CA.

Length: 2 weeks (64 hours).

Exhibit Dates: 3/71-4/76.

Objectives: To train officers, civilians, and senior enlisted personnel to manage air traffic operations.

Instruction: Lectures and practical exercises in air traffic management. Course includes the roles and missions of military and commercial carriers, air carrier management, operations and regulations, military air transportation, flight and terminal equipment, and effective utilization of air transportation.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in air traffic management (7/74).

NV-0419-0014

INTRODUCTION TO TRAFFIC AND TERMINAL MANAGEMENT

Course Number: None.

Location: Freight Transportation School, Oakland, CA.

Length: 4 weeks (120 hours).

Exhibit Dates: 9/55-12/68.

Objectives: To train personnel in the fundamentals of transportation, traffic, and terminal management.

Instruction: Lectures and practical exercises in the fundamentals of transportation, traffic, and terminal management, including transportation logistics; economics of transportation; bills of lading; commercial and government air shipments; cargo ships; port terminal facilities; ocean shipping; duties of traffic manager; principles of shiploading; duties of marine terminal superintendent; motor carrier operations; materials-handling methods and equipment; preservation, packaging, packing, and marking of shipments; railroad facilities; mobile support; Navy carrier selection and routing policy; harbors and ports; U.S. Customs procedures; classification of rail and motor freight; state regulations; freight claims and procedures; railroad claim and damage prevention; and shipment of household effects.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in traffic operations (8/74); in the upper-division baccalaureate category, 3 semester hours in traffic operations (12/68).

NV-0504-0001

INFORMATION OFFICER

Course Number: None.

Location: Journalists School, Great Lakes, IL.

Length: 4-5 weeks (120-150 hours).

Exhibit Dates: 8/54-12/62.

Objectives: To familiarize officers with the field of public relations so that they may carry out assignments of prime responsibility in the Navy's information program.

Instruction: Lectures and practical exercises in public relations and communication, civil and community relations, newswriting, media and media relations, and information programs. The course includes case studies and practical problems.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in journalism (6/76).

NV-0504-0002

RECRUITERS JOURNALISM, CLASS C-1

Course Number: Not available.

Location: Journalist School, Great Lakes, IL.

Length: 4 weeks (120 hours).

Exhibit Dates: 1/58-12/68.

Objectives: To train enlisted personnel to promote the armed services.

Instruction: Lectures and practical exercises in promotion techniques and use of media. Course includes study of community-military relations and publicity techniques (including news writing, radio and television production, camera use, film processing and picture printing).

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in journalism (12/68).

NV-0504-0003

JOURNALISTS, CLASS A

Course Number: Not available.

Location: Journalist Class A School, Great Lakes, IL.

Length: 12 weeks (360 hours).

Exhibit Dates: 12/56-12/68.

Objectives: To train enlisted personnel as print news writers, editors, photographers and broadcast news writers.

Instruction: Lectures and practical exercises in writing, photography, and editing, including grammar, journalism fundamentals, news writing (including lead and novelty leads, story organization, captions, features, interview write-ups, advance and follow-up, editorials and copyreading), page layout and design, camera use, film developing and picture printing, radio and television (including background, production techniques, writing, and announcing), and public relations.

Credit Recommendation: In the upper-division baccalaureate category, 4 semester hours in journalism (12/68).

NV-0504-0004

JOURNALISTS, CLASS B

Course Number: Not available.

Location: Journalist Class B School, Great Lakes, IL.

Length: 8 weeks (240 hours).

Exhibit Dates: 6/61-12/68.

Objectives: To train journalists as public information assistants.

Instruction: Lectures and practical exercises in duties of public information assistants, including basic photography, writing of news and feature stories for print and electronic media, editing, radio and television production, photo story preparation, and public relations (including community relations).

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in journalism (7/74); in the upper-division baccalaureate category, 3 semester hours in journalism (12/68).

NV-0505-0001

VERDIN INTEGRATED SUBMARINE AUTOMATED BROADCAST PROCESSING SYSTEM (ISABPS) SHORE COMMUNICATIONS SYSTEM OPERATOR

Course Number: A-260-0035.

Location: Fleet Training Center, Norfolk, VA.

Length: 3 weeks (120 hours).

Exhibit Dates: 5/80-Present.

Objectives: To train enlisted personnel to operate an automated submarine broadcast system.

Instruction: Lectures and practical exercises in the operation of the AN/URC-62 digital data system, AN/FRQ-87(V) data processing system and the peripheral equipments in LF/VLF broadcast operations, including the various modes and different conditions, the procedures for handling operating failures and operating malfunctions of the above mentioned equipment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in broadcast system operations (9/83); in the lower-division baccalaureate/associate degree category, 1 semester hour in broadcast system operations (9/83).

NV-0505-0002

AN/SYQ-7(V)3 NAVAL MODULATED
AUTOMATED COMMUNICATIONS
SYSTEM OPERATOR

Course Number: A-260-0037.

Location: Fleet Training Center, Norfolk, VA; Fleet Training Center, San Diego, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 9/82-Present.

Objectives: To train personnel to properly operate a particular modular automated communications system.

Instruction: Lectures and practical exercises in system activation including program loading and normal and contingency operating procedures of the AN/SYQ-7(V)3 modular automated communications system.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronic equipment operation for broadcast communications (9/83); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronic equipment operation for broadcast communications (9/83).

NV-0602-0001

RIVERINE/COASTAL ADVISOR TRAINING

Course Number: H-00-1001; H-000-1001.

Location: Inshore Operations Training Center, Mare Island, CA.

Length: 17 weeks (881-921 hours).

Exhibit Dates: 4/70-1/88.

Objectives: To train officers and enlisted personnel to advise in all phases of riverine and coastal warfare units in the Republic of Vietnam.

Instruction: Lectures and practical exercises on overseas internal defense and development, including counterinsurgency, survival, medical indoctrination, weapons, engineering, maintenance, and repair, electronic equipment, communications, riverine/coastal warfare and craft, advanced tactical training, and Vietnamese language.

Credit Recommendation: In the upper-division baccalaureate category, credit in Vietnamese language on the basis of institutional evaluation (12/68).

NV-0701-0001

MAXILLOFACIAL DENTAL LABORATORY
TECHNICIAN, CLASS C
(Dental Technician, Maxillofacial Prosthetic)
(Dental Technician, Maxillofacial Prosthetic, Class C)

Course Number: B-331-0018; B-331-18.

Location: National Naval Medical Center, Bethesda, MD.

Length: 26 weeks (960 hours).

Exhibit Dates: 1/75-Present.

Objectives: To provide dental laboratory technicians with knowledge and skills in both clinical and laboratory procedures in the area of maxillofacial prosthetics.

Learning Outcomes: Upon completion of the course, the student will be able to: assist the maxillofacial prosthodontist in impression making for intraoral and extraoral prostheses; fabricate intraoral and extraoral maxillofacial prostheses to include auricular, nasal, orbital, combination facial, implant and somato prostheses; fabricate ocular prostheses to include impression making, eye painting,and processing and; fabricate surgical and theraputic prostheses.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in impression making and mold making, 5 in ocular prostheses, 5 in extraoral prostheses and 5 in intraoral, therapeutic and implant prostheses (2/84).

NV-0701-0002

DENTAL OFFICER INDOCTRINATION

Course Number: None.

Location: Naval Schools Command, Newport, RI.

Length: 4 weeks (133 hours).

Exhibit Dates: 6/70-1/88.

Objectives: To provide dental officers with orientation training in essential naval subjects.

Instruction: Lectures and practical exercises in administrative and operational organization; fundamental skills in shipboard operations; procedures of damage control afloat; obligations and responsibilities of naval officers; and defensive driving.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/74).

NV-0701-0003

DENTAL LABORATORY TECHNOLOGY
ADVANCED, CLASS C
(Dental Technician, Prosthetic, Advanced, Class B)
(Dental Technician, Advanced Prosthetic, Class B)

Course Number: B-331-0017; B-331-17.

Location: Naval Medical Center, San Diego, CA; Naval Medical Center, Bethesda, MD.

Length: 24 weeks (960 hours).

Exhibit Dates: *Version 1:* 6/75-12/84. *Version 2:* 6/55-5/75.

Objectives: To train military personnel to perform advanced laboratory techniques and to develop supervisory and managerial skills.

Instruction: For this course after 12/84 seeNV-0701-0011. *Version 1:* Includes construction of complete dentures, removable partial dentures, fixed partial dentures (dental metal crowns, inlays and bridges) and fabrication of dental ceramic prostheses. Additionally, administrative and management essentials, dental laboratory supervision, fiscal and supply functions, and mass casualty management and treatment are also included. *Version 2:* Lectures in the fundamentals of teaching dental technology, including English and speech, personnel management, laboratory and office management, dental facilities administration, fixed and removable partial dentures, and casualty care.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in advanced partial dentures, 3 in advanced fixed partial dentures, 2 in advanced complete dentures, 1 in head and neck anatomy, 4 in advanced fixed partial denture laboratory, 4 in advanced dental ceramics, 3 in advanced partial denture laboratory and 3 in advanced denture laboratory (6/83). *Version 2:* Credit is not recommended because of the limited technical nature of the course (2/74).

NV-0701-0004

DENTAL TECHNICIAN RESEARCH
ASSISTANT, CLASS C

Course Number: B-331-19; B-331-20.

Location: Dental School, Bethesda, MD; Dental Research Institute, Great Lakes, IL.

Length: 52 weeks (1950 hours).

Exhibit Dates: 1/65-6/70.

Objectives: To provide instruction in the basic skills and knowledge of dental research procedures.

Instruction: Lectures and practical exercises in administration, experimental pathology, microbiology, biochemistry, microphotography, experimental surgery, and experimental animal care.

Credit Recommendation: Credit in dental laboratory technology on the basic of institutional evaluation (12/68).

NV-0701-0005

DENTAL ADMINISTRATIVE TECHNICIAN,
CLASS C
(Dental Technician, General, Advanced, Class B)
(Class B General Dental Technician School)
(General Dental Technician School, Class B)
(General Dental Technician Advanced, Class B)

Course Number: B-330-0011; B-330-11.

Location: National Naval Medical Center, San Diego, CA; National Naval Medical Center, Bethesda, MD.

Length: 24 weeks (900 hours).

Exhibit Dates: *Version 1:* 10/81-12/89. *Version 2:* 6/55-9/81.

Objectives: To provide dental technicians with training in the administrative aspects of dental assisting.

Instruction: For this course after 12/89 see NV-0701-00134. Lectures and practical exercises in the administrative aspects of dental assisting, including communication skills, personnel management, office management, dental facilities administration, financial management, principles of accounting, and use of office machines.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 5 semester hours in advanced office and administrative procedures (6/83). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in typing (2/74); in the upper-division baccalaureate category, credit in typing and accounting procedures on the basis of institutional evaluation (12/68).

NV-0701-0006

1. DENTAL ASSISTANT, BASIC, CLASS A
2. DENTAL TECHNICIAN, BASIC, CLASS A
3. CLASS A GENERAL DENTAL
TECHNICIAN SCHOOL
(Dental Technician, General, Class A)

Course Number: *Version 1:* B-330-0010. *Version 2:* B-330-10. *Version 3:* None.

Location: *Version 1:* Naval School of Dental Assisting and Technology, San Diego, CA. *Version 2:* Dental Technician's School, San Diego, CA. *Version 3:* National Naval Medical Center, Bethesda, MD.

Length: *Version 1:* 12-13 weeks (480-520 hours). *Version 2:* 12 weeks (480 hours). *Version 3:* 16 weeks (557-600 hours).

Exhibit Dates: *Version 1:* 10/80-12/89. *Version 2:* 12/67-9/80. *Version 3:* 3/61-11/67.

Objectives: To train enlisted personnel to assist dental officers and to qualify for the dental technician rating.

Instruction: For this course after 12/89 see NV-0701-0012. *Version 1:* Lecture, individualized instruction and clinical experience in basic dental sciences, preventive dentistry, dental emergencies, general casualty care, radiography, and dental chairside assisting including specialities. *Version 2:*

Lectures and practical experience in basic sciences, preventive dentistry, casualty care, dental administration, radiography, and dental assisting. *Version 3:* Lectures and practical experience in basic sciences, preventive dentistry, casualty care, dental administration, radiography, and dental assisting.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in basic dental sciences, 3 in chairside assisting, 3 in radiology, 2 in office procedures, and 2 in emergency medical treatment (6/83). *Version 2:* In the vocational certificate category, 4 semester hours in dental assisting on the basis of institutional evaluation (2/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in dental assisting on the basis of institutional evaluation (2/74). *Version 3:* In the vocational certificate category, 5 semester hours in dental assisting on the basis of institutional evaluation (2/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in dental assisting on the basis of institutional evaluation (2/74).

NV-0701-0007

Dental Laboratory Technology
Basic, Class C
(Dental Technician, Prosthetic, Class C)
(Dental Technician, Prosthetic (Class C))
(Dental Prosthetic Technician School, Class C)

Course Number: B-331-0016; B-331-16.

Location: Naval Dental Center, San Diego, CA; Naval Dental Center, Great Lakes, IL; Naval Dental Center, Bainbridge, MD.

Length: 24 weeks (960 hours).

Exhibit Dates: *Version 1:* 6/75-3/85. *Version 2:* 6/55-5/75.

Objectives: To provide enlisted personnel with the basic knowledge and skills to fabricate dental prosthetic appliances.

Instruction: For this course after 3/85 see NV-0701-0010. *Version 1:* Instruction in basic prosthetic procedures and fundamentals including knowledge of basic oral anatomy and physiology, dental materials and prosthetic clerical procedures, construction of complete dentures and denture repair, reconstruction and relining, fabrication of removal partial dentures and an introduction to the fundamentals of fixed partial dentures (crown and bridge procedures). *Version 2:* Lectures and practical experience in the basic principles of denture work, including applied anatomy; dental laboratory procedures; mounting and setting of teeth; construction of casts from impressions; construction of base plates, bite rims, and occlusal planes; and processing, finishing, and polishing.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in complete dentures, 1 in removable partial dentures, 1 in crown and bridge work, 2 in first aid/CPR, 14 in complete dentures laboratory and 1 in crown and bridge laboratory (6/83). *Version 2:* In the vocational certificate category, 4 semester hours in basic denture work on the basis of institutional evaluation (2/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in basic denture work on the basis of institutional evaluation (2/74); in the upper-division baccalaureate category, 2 semester hours in basic denture work on the basis of institutional evaluation (2/74).

NV-0701-0009

Class B General Dental Technician
(Dental Technician, Advanced General, Class B)

Course Number: None.

Location: National Medical Center, Bethesda, MD.

Length: 24 weeks (900 hours).

Exhibit Dates: 3/61-10/70.

Objectives: To train enlisted personnel to perform the duties of a dental assistant, with emphasis on office management procedures.

Instruction: Lectures and practical experience in dental office management, including typing, accounting, dental records and reports, clinical supervision, first aid for mass casualties, and administrative procedures.

Credit Recommendation: In the vocational certificate category, 4 semester hours in dental assisting on the basis of institutional evaluation (2/74).

NV-0701-0010

Dental Laboratory Technology Basic
Class C

Course Number: B-331-0016.

Location: School of Dental Assisting and Technology, San Diego, CA.

Length: 24 weeks (840 hours).

Exhibit Dates: 4/85-Present.

Learning Outcomes: Upon completion of the course the student will be able to fabricate basic dental prosthetic appliances.

Instruction: Lecture, discussion, and clinical practice in complete dentures, removable partial dentures, and fixed partial dentures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 10 semester hours in complete dentures, 7 in removable partial dentures and 4 in fixed partial dentures (7/90).

NV-0701-0011

Dental Laboratory Technology
Advanced Class C

Course Number: B-331-0017.

Location: School of Dental Assisting, San Diego, CA.

Length: 24 weeks (840 hours).

Exhibit Dates: 1/85-Present.

Learning Outcomes: Upon completion of the course the student will be able to perform advanced dental fabrication techniques and demonstrate managerial skills.

Instruction: Lecture, Discussion, and clinical practice in advanced complete, removable partial, and fixed partial denture techniques and dental laboratory management.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in advanced complete denture techniques, 5 in advanced removable partial decture techniques, 14 in fixed partial denture techniques, and 1 in dental laboratory management (7/90).

NV-0701-0012

Dental Assistant Basic Class A

Course Number: B-330-0010.

Location: School of Dental Assisting and Technology, San Diego, CA.

Length: 12 weeks (479 hours).

Exhibit Dates: 1/90-Present.

Learning Outcomes: Upon completion of the course the student will be able to assist the dentist at the chairside; perform tasks in dental radiology; carry out office procedures; and be proficient in emergency medical treatment.

Instruction: Lectures, individualized instruction and clinical experience in basic dental sciences, preventive dentistry, dental emergency, general casualty care, radiography, and chairside assisting.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in basic dental sciences, 3 in chairside assisting, 2 in dental radiology, 2 in office procedures, and 2 in emergency medical treatment (7/90).

NV-0701-0013

Dental Administrative Technician
Class C

Course Number: B-330-0011.

Location: School of Dental Assisting and Technology, San Diego, CA.

Length: 24 weeks (840 hours).

Exhibit Dates: 1/90-Present.

Learning Outcomes: Upon completion of the course the student will be able to carry out administrative aspects od dental assisting.

Instruction: Lectures and practical exercises on the administrative aspects of dental assisting, including communications skills, personnel management, office management, dental facilities administration, financial management, principles of accounting, and the use of office machines.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 5 semester hours in advanced office and administrative procedures (7/90).

NV-0702-0001

Tissue Culture Technician, Class C
(Tissue Culture Technic)

Course Number: B-311-14.

Location: National Naval Medical Center, Bethesda, MD.

Length: 16 weeks (640 hours).

Exhibit Dates: 12/63-12/68.

Objectives: To train enlisted personnel as research assistants in tissue culture biological research.

Instruction: Lectures and practical exercises in tissue culture research assisting, including basic biology and chemistry; preparing, maintaining, and transferring cells; nutrient fluids preparation; short- and long-term tissue culture; replicate culture technique; photomicroscopy; and laboratory apparatus usage and maintenance.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in histology, 2 in medical laboratory technology, 9 in tissue culture technology, and credit in histologic technology on the basis of institutional evaluation (2/74).

NV-0702-0002

Medical Technology Technician,
Class C
(Medical Technology)
(Medical Technologist Technician, Class C)

Course Number: B-311-24; B-311-0025.

Location: Naval Hospital, Bethesda, MD; Naval Hospital, Great Lakes, IL.

Length: 50-52 weeks (2392 hours).

Exhibit Dates: 3/72-1/88.

Objectives: To train medical technicians to perform and supervise advanced laboratory procedures in all phases of laboratory operations.

Instruction: Lectures and clinical application of diagnostic microbiology, parasitology, mycology, serology, hematology, microscopy, chemistry, quality control, blood banking, pathology techniques, automated procedures, histochemistry, urinalysis, and instrumentation, including analyzers, flame photometers, osmometers, gas chromatographs, electrophoresis apparatus, and sequential multiple analyzers.

Credit Recommendation: In the upper-division baccalaureate category, 15 semester hours in microbiology (including bacteriology, parasitology, and mycology), 10 in hematology, 5 in clinical microscopy and venipuncture, 8 in serology and blood banking, 12 in clinical chemistry, 3 in pathology and histology, and additional credit toward MLT or MT on the basis of national proficiency examination (2/74).

NV-0702-0003

Medical Laboratory Technician Advanced
(Clinical Laboratory Technician, Class C)
(Blood Bank and Clinical Laboratory Technic)

Course Number: B-311-0018; B-311-18; B-311-19.

Location: Health Sciences Education and Training Command, Bethesda, MD; School of Health Sciences, San Diego, CA.

Length: *Version 1:* 52 weeks (2087 hours). *Version 2:* 52 weeks (2087 hours). *Version 3:* 52-60 weeks (2625 hours).

Exhibit Dates: *Version 1:* 9/82-12/89. *Version 2:* 1/76-8/82. *Version 3:* 1/54-12/76.

Objectives: To train personnel to perform advanced laboratory procedures and to assist in all phases of blood bank operations.

Instruction: For this course after 12/89 see NV-0702-0012. *All Versions:* Lectures in bacteriology, serology and blood banking, hematology, parasitology; blood and clinical chemistry, urinalysis and venipuncture techniques. *Version 1:* Includes general chemistry, microbiology, and immunology. *Version 3:* Includes histopathology.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 6 semester hours in microbiology, 3 in serology/immunology, 6 in blood banking, 6 in hematology, 3 in parasitology, 4 in general chemistry, 6 in clinical chemistry, 2 in urinalysis and 14 in clinical practice (6/83). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in urinalysis techniques, 3 in parasitology and 1 in laboratory organization (9/77); in the upper-division baccalaureate category, 12 semester hours in blood banking and serology, 6 in clinical chemistry, 6 in microbiology, and 6 in hematology (9/77). *Version 3:* In the lower-division baccalaureate/associate degree category, 12 semester hours in bacteriology and blood chemistry, 7 in hematology, 12 in serology and blood banking, 7 in pathology and histology, 6 in clinical microscopy and venapuncture, and additional credit towards MLT or MT on the basis of national proficiency examination (2/74); in the upper-division baccalaureate category, 12 semester hours in bacteriology and blood chemistry (12/68).

NV-0702-0004

Urological Technician
(Urologic Technician, Class C)
(Urologic Technic)
(Urological Technician, Class C)
(Urological Technic)

Course Number: B-300-0025; B-300-25; B-300-26; B-300-27; B-300-28.

Location: National Naval Medical Center, Bethesda, MD; Naval Hospital, Oakland, CA; School of Health Science Detachment, Portsmouth, VA; School of Health Science, San Diego, CA.

Length: 26 weeks (1040 hours).

Exhibit Dates: *Version 1:* 10/82-4/89. *Version 2:* 1/55-9/82.

Objectives: To train technicians to assist medical officers in the examination and treatment of urological patients.

Instruction: For this course after 4/89 see NV-0702-0011. *All Versions:* Lectures in anatomy, physiology, urological operating room techniques, cytoscopic room techniques, and urological-radiologic procedures.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in anatomy and physiology, 3 in operating room technology, 2 in radiography, 2 in clinical urology theory, and 7 in clinical applications (6/83). *Version 2:* In the lower-division baccalaureate/associate degree category, 4 semester hours in urological anatomy and physiology, 15 in operating room techniques (urology), 15 in urological radiology, 5 in clinical laboratory (urology), 13 in clinical urology and endoscopic urology, and 3 in records management, for a total of 55 semester hours (8/77).

NV-0702-0005

Tissue Bank Technician, Class C
(Tissue Bank Technic)

Course Number: Not available.

Location: National Naval Medical Center, Bethesda, MD.

Length: *Version 1:* 26 weeks (1040 hours). *Version 2:* 12 weeks (480 hours).

Exhibit Dates: *Version 1:* 12/63-12/68. *Version 2:* 1/54-11/63.

Objectives: To train enlisted personnel to be tissue bank technicians.

Instruction: Lectures on administration, anatomy, physiology, histology, bacteriology, chemistry, genetics, and grafting principles; and lectures and practical exercises in tissue bank preservation and tissue culture.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 8 semester hours in biological science, 12 in tissue culture or histology (2/74). *Version 2:* In the upper-division baccalaureate category, 4 semester hours in biological science, 6 in tissue culture or histology (2/74).

NV-0702-0006

Clinical Chemistry Technician, Class C
(Clinical Chemistry Technic)

Course Number: B-311-15.

Location: National Naval Medical Center, Bethesda, MD.

Length: 12 weeks (480 hours).

Exhibit Dates: 12/63-1/88.

Objectives: To train enlisted personnel to conduct quantitative and qualitative analytical tests on medical laboratory samples.

Instruction: Lectures and practical exercises in mathematics of analytical chemistry, quantitative analysis, instrumentation, organic chemistry, enzyme chemistry, steroid chemistry, toxicology, and preparation of standards and solutions.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 5 semester hours in medical laboratory technology or chemistry (2/74); in the upper-division baccalaureate category, credit in chemistry on the basis of institutional evaluation (12/68).

NV-0702-0008

Clinical Laboratory Assistant Technic

Course Number: B-311-10; B-311-11; B-311-12; B-311-13.

Location: Naval School, San Diego, CA; Naval School, St. Albans, NY; Naval School, Portsmouth, VA; Naval School, Great Lakes, IL; Naval School, Oakland, CA.

Length: 12 weeks (480 hours).

Exhibit Dates: 7/64-1/88.

Objectives: To train enlisted personnel in basic medical laboratory procedures.

Instruction: Lectures and practical exercises in basic medical laboratory procedures, including bacteriology, hematology, blood processing, serology, biochemistry, urinalysis, pathology, and parasitology.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in biology, 2 in chemistry, 2 in bacteriology (7/74).

NV-0702-0009

Cytology Technician
(Cytotechnologist)

Course Number: B-311-0036.

Location: *All Versions:* National Naval Medical Center, Bethesda, MD; *Version 2:* School of Health Sciences, San Diego, CA.

Length: 52 weeks (1938 hours).

Exhibit Dates: *Version 1:* 3/83-Present. *Version 2:* 11/72-2/83.

Objectives: To train individuals to prepare, examine, and evaluate slide presentations of cellular materials for diagnostic purposes.

Instruction: *All Versions:* Lectures, laboratory and clinical practice covering cytology specimen preparation including techniques for collection fixation and preparation of materials; examination and evaluation of cellular materials obtained from a variety of tissue sites and diagnostic determinations.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in orientation to cytotechnology, 3 in cellular and human development, 14 in female genital tract, 5 in respiratory tract, 2 in serous body cavities, 2 in cerebrospinal fluids, 2 in oral cavity and gastrointestinal tract, 2 in cytology of the breast, 2 in urinary tract, 2 in fine needle aspiration cytology, 2 in cytopreparatory techniques and 10 in clinical rotation (2/84). *Version 2:* In the lower-division baccalaureate/associate degree category, 4 semester hours in histologic techniques (slide preparation) (8/77); in the upper-division baccalaureate category, 26 semester hours in diagnosis and evaluation of cellular material (8/77).

NV-0702-0010

Transplantation Technician Training

Course Number: B-322-0015.

Location: School of Health Sciences, Bethesda, MD.

Length: 34-35 weeks (1360-1400 hours).

Exhibit Dates: 10/83-Present.

Objectives: To provide enlisted personnel with the basic knowledge required to assist with the clinical transplantation of organs and tissues.

Instruction: Lectures and laboratory instruction in tissue banking, transplantation surgery, blood component support and hemodialysis. Graduates will function as part of a transplantation team and perform specialized skills in tissue procurement, storage and care of experimental animals.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in tissue banking, 2 renal dialysis, 3 in anatomy and physiology, 2 in chemistry, 2 in tissue culture, 2 in microbiology, 3 in blood component therapy, 2 in experimental surgery, 4 in basic immunology, 3 in bone marrow transplant and 12 hours in clinical practicum (2/84).

NV-0702-0011

Urology Technician

Course Number: B-300-0025.

Location: School of Health Sciences, Portsmouth, VA; School of Health Sciences, San Diego, CA.

Length: 26 weeks (1040 hours).

Exhibit Dates: 5/89–Present.

Learning Outcomes: Upon completion of the course the student will assist the urologist in examination, medical, and surgical treatment of urology patients.

Instruction: Lectures in anatomy, physiology, urology operating room techniques, cytoscopic room techniques, and urology-radiologic procedures. Course includes 7 units from the operating room technician course.

Credit Recommendation: @ LOW 2 semester hours in anatomy and physiology, 3 in urology surgical procedures, 2 in radiography, 2 in clinical urology, 1 in clinical practice, 1 in introduction to operating room techniques, 1 in introduction to environmental control in the operating room, 2 in surgical supplies and equipment, 1 in operating room circulator activities, 1 in scrub technician activities, and 3 in advanced surgical/anatomy procedures (7/90).

NV-0702-0012

Medical Laboratory Technician, Advanced

Course Number: B-311-0018.

Location: School of Health Sciences, San Diego, CA; School of Health Sciences, Bethesda, MD.

Length: 52 weeks (1948 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course the student will be able to perform basic and advanced medical laboratory procedures; process blood donors; and perform techniques of blood banking.

Instruction: Lectures, laboratories, and clinical rotation in urinalysis, hematology, clinical chemistry, clinical microbiology, parasitology, serology, and blood banking.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in urinalysis, 8 in hematology, 4 in general chemistry, 6 in clinical chemistry, 4 in parsitology, 3 in serology, 8 in microbiology, 8 in blood bank, and 16 in clinical rotation (7/90).

NV-0703-0001

1. Obstetrics/Gynecology (OB/GYN) Nurse Practitioner
2. Obstetrics/Gynecology (OB/GYN) Nurse Clinician

Course Number: *Version 1:* B-6F-0012. *Version 2:* B-6F-012; B-6F-12.

Location: *Version 1:* Regional Medical Center, Portsmouth, VA. *Version 2:* Selected Naval Hospitals, United States.

Length: *Version 1:* 36–39 weeks (1440–1500 hours). *Version 2:* 24–26 weeks (1040–1100 hours).

Exhibit Dates: *Version 1:* 2/75–1/88. *Version 2:* 11/72–1/75.

Objectives: To train nurse corps officers to assist physicians in obstetrical and gynecological ambulatory health care.

Instruction: Lectures and clinical practice in endocrinology, obstetrics, gynecology, oncology, neonatology, embryology, pharmacology, psychosexual counseling, radiology, medical and legal aspects of obstetrics and gynecology, family planning counseling and techniques.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 1 semester hour in embryology, 2 in anatomy and physiology, 8 in obstetrics, 3 in gynecology, 1 in neonatology, 2 in oncology, and 18 in clinical experience and practice in obstetrics and gynecology (6/77). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in endocrinology, 3 in anatomy and physiology, 8 in obstetrics, 5 in gynecology, 1 in oncology, and 13 in clinical experience and practice in obstetrics and gynecology (6/77).

NV-0703-0002

Operating Room Technic and Management

Course Number: None.

Location: Long Beach Hospital, Long Beach, CA.

Length: 26 weeks (1040 hours).

Exhibit Dates: 8/72–1/88.

Objectives: To prepare nurses as surgical assistants and operating room supervisors.

Instruction: Lectures and clinical experience in surgical environment; sterilization, disinfection, and antiseptics; management of surgical supplies, instruments, and equipment; management techniques in the operating room; and standards and controls in the operating room.

Credit Recommendation: Insufficient data for evaluation (2/74).

NV-0703-0003

Neuropsychiatry Technician, Class C
(Neuropsychiatry Technic)

Course Number: B-302-45; B-302-46; B-302-47.

Location: National Naval Medical Center, Bethesda, MD; Naval Hospital, Oakland, CA; Naval Hospital, Philadelphia, PA.

Length: 16 weeks (640 hours).

Exhibit Dates: 1/57–12/68.

Objectives: To train enlisted personnel to assist in the care and treatment of neuropsychiatric patients.

Instruction: Lectures in neuropsychiatric problems; practical training in first aid, including injuries of mental patients; ward service; clinical experience; special therapies; and general psychiatric nursing.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in psychology, 8 in psychiatric nursing or first aid, 2 in mental health assisting, additional credit in psychiatric nursing on the basis of institutional evaluation (2/74).

NV-0703-0004

Operating Room Technician, Class C
(Operating Room Technic)

Course Number: B-301-0033; B-301-30; B-301-33; B-301-34; B-301-36; B-301-38.

Location: National Naval Medical Center, Bethesda, MD; Naval Regional Medical Center, Oakland, CA; School of Health Sciences Detachment, Portsmouth, VA; School of Health Sciences, San Diego, CA; Naval Hospital, Chelsea, MA; Naval Hospital, Great Lakes, IL.

Length: 26 weeks (960–1040 hours).

Exhibit Dates: *Version 1:* 4/82–4/89. *Version 2:* 3/76–3/82. *Version 3:* 1/54–2/76.

Objectives: To train personnel in the preparation and maintenance of operating rooms for surgery and participation in surgical procedures.

Instruction: For this course after 4/89 see NV-0703-0007. *All Versions:* Lectures and practical clinical experience in preparing supplies and instruments for sterilization, operating room techniques, surgical procedures and supply management. *Version 1:* Topics include anatomy and physiology and medico-legal ethical responsibilities. *Version 2:* Topics include splint techniques and operating room nursing principles. *Version 3:* Topics include splint techniques and operating room nursing principles.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in anatomy and physiology, 3 in operating room technology and 10 in clinical applications of operating room technology (6/83). *Version 2:* In the vocational certificate category, 3 semester hours in operating room techniques and 16 in clinical application of operating room techniques (8/77). *Version 3:* In the upper-division baccalaureate category, 2 semester hours in biology, 1 in medical laboratory technology, 8 in operating room nursing and procedures, 2 in clinical administration, additional credit in operating room nursing and procedures on the basis of institutional evaluation (2/74).

NV-0703-0005

1. Hospital Corpsman, Basic
2. Hospital Corpsman, Basic
3. Basic Hospital Corps School, Class A
   (Hospital Corpsman, Class A)
4. Basic Hospital Corps School, Class A
5. Basic Hospital Corps School, Class A
6. Basic Hospital Corps School, Class A

Course Number: B-300-0010; B-300-10; B-300-11.

Location: Hospital Corps School, Great Lakes, IL; School of Health Sciences, San Diego, CA.

Length: *Version 1:* 10–12 weeks (400–480 hours). *Version 2:* 10 weeks (400 hours). *Version 3:* 14 weeks (560 hours). *Version 4:* 16 weeks (640 hours). *Version 5:* 12-16 weeks (480–640 hours). *Version 6:* 20 weeks (860 hours).

Exhibit Dates: *Version 1:* 1/80–12/88. *Version 2:* 7/74–12/79. *Version 3:* 3/72–6/74. *Version 4:* 3/72–6/74. *Version 5:* 1/57–2/72. *Version 6:* 1/54–12/56.

Objectives: To train enlisted personnel in the basic principles and techniques of patient care and first aid procedures.

Instruction: For this course after 12/88 see NV-0703-0008. *All Versions:* Lectures and clinical experience in anatomy and physiology; first aid and minor surgery; hygiene and sanitation; pharmacology; toxicology; medical laboratory and patient-care techniques and principles; nuclear, biological, and chemical safety; and trauma management and treatment. *Version 1:* Course includes very limited clinical training. *Version 2:* 10-week course includes limited clinical training.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester

hours in anatomy and physiology, 6 in patient care procedures, 3 in emergency care and 1 in drug therapy (6/83). *Version 2:* In the vocational certificate category, 2 semester hours in health and hygiene, 3 in nursing techniques, and 2 in emergency medical techniques (9/77). *Version 3:* In the upper-division baccalaureate category, 3 semester hours in anatomy and physiology, 2 in health and hygiene, 2 in pharmacology, 7 in nursing techniques (2/74). *Version 4:* In the upper-division baccalaureate category, 3 semester hours in anatomy and physiology, 2 in health and hygiene, 2 in pharmacology, 8 in nursing techniques (2/74). *Version 5:* In the lower-division baccalaureate/associate degree category, 3 semester hours in anatomy and physiology, 2 in health and hygiene, 2 in pharmacology, 8 in nursing techniques (2/97); in the upper-division baccalaureate category, 3 semester hours in anatomy and physiology, 2 in hygiene (12/68). *Version 6:* In the lower-division baccalaureate/associate degree category, 3 semester hours in anatomy and physiology, 2 in health and hygiene, 8 in nursing techniques, 3 in medical laboratory technology (2/74); in the upper-division baccalaureate category, 3 semester hours in anatomy and physiology, 2 in hygiene (12/68).

NV-0703-0007

OPERATING ROOM TECHNICIAN CLASS C

Course Number: B-301-0033.

Location: School of Health Sciences, Bethesda, MD; School of Health Sciences, Portsmouth, VA; School of Health Sciences, San Diego, CA; School of Health Sciences, Oakland, CA.

Length: 26–27 weeks (1056 hours).

Exhibit Dates: 5/89–Present.

Learning Outcomes: Upon completion of the course the student will be able to prepare and maintain operating rooms for surgery; assist with surgical procedures; and maintain an appropriate operating room environment.

Instruction: Lectures, discussions, and clinical experience in operating room preparation and techniques, environmental control, activities of the operating room circulator and scrub technician and advanced surgical anatomy/operative procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 in introduction to operating room techniques, 1 in environmental control in the operating room, 2 in surgical supplies and equipment, 1 in activities of the operating room circulator, 1 in activities of the scrub technician, 3 in advanced surgical anatomy/operative procedures, 1 in preclinical orientation and evaluation, and 15 in clinical rotation (7/90).

NV-0703-0008

HOSPITAL CORPSMAN

Course Number: B-300-0010.

Location: Hospital Corps School, Great Lakes, IL; School of Health Sciences, San Diego, CA.

Length: 14 weeks (470 hours).

Exhibit Dates: 1/89–Present.

Learning Outcomes: Upon completion of the course the student will be able to perform as an entry-level provider of basic and emergency patient care.

Instruction: Lectures in anatomy and physiology, first aid and minor surgery, hygiene and sanitation, pharmacology, toxicology, medical laboratory and patient care techniques and principles, nuclear, biological, and chemical safety, and trauma management and treatment. Course includes very limited clinical training.

Credit Recommendation: In the vocational certificate category, 4 semester hours in emergency care, 7 in basic patient care procedures, and 1 in pharmacology; in the lower-division baccalaureate/associate degree category, 3 semester hours in anatomy and physiology (7/90).

NV-0704-0001

1. ORTHOPEDIC APPLIANCE TECHNICIAN, CLASS C
   (Orthopedic Appliance Technic)
2. ORTHOPEDIC APPLIANCE TECHNICIAN, CLASS C
   (Orthopedic Appliance Technic)
   (Orthopedic Appliance Mechanics)

Course Number: B-304-52.

Location: Naval Hospital, Oakland, CA.

Length: *Version 1:* 26 weeks (1040 hours). *Version 2:* 52 weeks (1920 hours).

Exhibit Dates: *Version 1:* 11/67–12/68. *Version 2:* 1/55–10/67.

Objectives: To train personnel in the fitting of braces, splint supports, artificial limbs, and other orthopedic appliances.

Instruction: Lectures and practical exercises in anatomy and physiology, prosthetic training and fitting, plastic and plastic construction, above-knee construction, below-knee construction, arm, leather, foot, orthopedic brace construction, painting, and finishing.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 6 semester hours in orthopedic appliance technology on the basis of institutional evaluation, 2 in machine tools, 2 in industrial arts (12/68). *Version 2:* In the upper-division baccalaureate category, 9 semester hours in orthopedic appliance technology on the basis of institutional evaluation, 3 in anatomy and physiology, 3 in machine tools, 3 in industrial arts (12/68).

NV-0704-0002

1. PHYSICAL AND OCCUPATIONAL THERAPY TECHNICIAN, PHASES I AND II
2. PHYSICAL AND OCCUPATIONAL THERAPY TECHNICIAN, CLASS C
   (Physical and Occupational Therapy Technic)
3. PHYSICAL THERAPY TECHNICIAN, CLASS C
   (Physical Therapy Technic)
4. PHYSICAL THERAPY TECHNICIAN, CLASS C
   (Physical Therapy Technic)

Course Number: *All Versions:* B-303-0050; B-303-0051; B-303-50. *Version 3:* B-303-51. *Version 4:* B-303-51.

Location: (Phase I) U.S. Army Academy of Health Sciences, Ft. Sam Houston, TX; (Phase II) School of Health Sciences, San Diego, CA; National Naval Medical Center, Bethesda, MD; School of Health Sciences, San Diego, CA.

Length: *Version 1:* (Phase I) 28 weeks (1120 hours); (Phase II) 16 weeks (640 hours). *Version 2:* 28 weeks (1120 hours). *Version 3:* 21 weeks (714 hours). *Version 4:* 26 weeks (880 hours).

Exhibit Dates: *Version 1:* 10/76–1/88. *Version 2:* 3/72–9/76. *Version 3:* 11/67–2/72. *Version 4:* 1/55–10/67.

Objectives: To train enlisted personnel to perform duties as physical and occupational therapy assistants.

Instruction: *All Versions:* Lectures and clinical exercises in anatomy; physiology; physics; psychology and psychiatry; principles of rehabilitation; massage; electrotherapy; radiation therapy; and neurology, hydrotherapy and therapeutic exercise. *Version 1:* Phase I consists of didactic portions of the Army Physical Therapy Specialist and Occupational Therapy Specialist courses at Ft. Sam Houston, TX. Phase II consists of clinical experience in physical and occupational therapy. *Version 2:* Lectures and practical exercises in techniques pf occupational therapy, including leather work, weaving, woodwork, design, color, handprinting, and ceramics.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 6 semester hours in anatomy and physiology, 3 in general psychology, 13 in physical therapy principles and procedures, and 12 in occupational therapy techniques, for completion of phase I plus 8 semester hours in clinical application of physical therapy techniques and 8 in clinical application of occupational therapy techniques for completion of Phase II for a total of 50 semester hours (9/77); in the upper-division baccalaureate category, credit in anatomy, physiology, and physical and occupational therapy on the basis of institutional evaluation (9/77). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in anatomy, 1 in physiology, 2 in physical science, 2 in psychology, and 4 in applied art, or credit in physical therapy assisting, physical therapy, occupational therapy assisting, or occupational therapy on the basis of institutional evaluation (2/74). *Version 3:* In the upper-division baccalaureate category, 2 semester hours in anatomy, 1 in physiology, and 3 in physical science, or credit in physical therapy assisting, physical therapy, occupational therapy assisting, or occupational therapy on the basis of institutional evaluation (2/74). *Version 4:* In the upper-division baccalaureate category, 2 semester hours in anatomy, 1 in physiology, and 3 in physical science, or credit in physical therapy assisting, physical therapy, occupational therapy assisting, or occupational therapy on the basis of institutional evaluation (2/74).

NV-0704-0003

OCCUPATIONAL THERAPY TECHNICIAN, CLASS C
(Occupational Therapy Technic)

Course Number: B-303-48; B-303-49.

Location: *Version 1:* National Naval Medical Center, Bethesda, MD. *Version 2:* Naval Hospital, San Diego, CA.

Length: *Version 1:* 21 weeks (714 hours). *Version 2:* 26 weeks (880 hours).

Exhibit Dates: *Version 1:* 10/67–1/72. *Version 2:* 12/63–9/67.

Objectives: To train enlisted personnel to apply occupational therapy techniques in the treatment of orthopedic, neuropsychiatric, medical, and surgical patients.

Instruction: Lectures and clinical practice in physiology; physics; psychology and psychiatry; principles of occupational therapy; and craft instruction, including textile painting, leatherwork, ceramics, metalwork, weaving, woodwork, and minor crafts.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in anatomy, 1 in physiology, 1 in physics, 2 in psychology, 6 in applied arts, and credit in occupational therapy on the basis of institutional evaluation (2/74).

NV-0705-0001

SUBMARINE MEDICAL OFFICER
(CANDIDATES)

Course Number: B-6A-22.

Location: Submarine Medical Center, Groton, CT.

Length: 19 weeks (650 hours).

Exhibit Dates: 9/72-1/88.

Objectives: To provide physicians with advanced specialized training in the administration of medical services to naval submarine personnel.

Instruction: Lectures on radiological physics; personnel dosimetry, including radiation protection standards; radiobiology; safety principles of nuclear reactors; health physics; radiological health administration; lectures and practical exercises in diving medicine; scuba familiarization; submarine medicine; specialized instruction in medical testing.

Credit Recommendation: Baccalaureate credit is not recommended because of the prerequisites and the professional nature of the course (6/75).

NV-0705-0002

1. CLINICAL NUCLEAR MEDICINE TECHNIQUE
2. CLINICAL NUCLEAR MEDICINE TECHNICIAN
   (Clinical Nuclear Medicine Technique)
3. RADIOACTIVE ISOTOPE TECHNICIAN, CLASS C
   (Radioactive Isotope Technic)

Course Number: B-311-0016; B-311-16; B-311-17.

Location: *Version 1:* Phase I, National Naval Medical Center, Bethesda, MD; *Version 1:* Phase II, Naval Medical Center, Oakland, CA. Naval School of Health Sciences, Bethesda, MD; Naval School of Health Sciences, San Diego, CA; Naval School of Health Sciences, Portsmouth, VA. *Version 2:* National Naval Medical Center, Bethesda, MD. *Version 3:* Naval Hospital, San Diego, CA.

Length: *Version 1:* phase I, 16 weeks; phase II, 36 weeks (2020 hours). *Version 2:* 16 weeks (551 hours). *Version 3:* 24 weeks (960 hours).

Exhibit Dates: *Version 1:* 5/80-Present. *Version 2:* 3/72-4/80. *Version 3:* 1/58-2/72.

Objectives: To train personnel to utilize radioactive materials for nuclear medical diagnostic purposes.

Instruction: *All Versions:* Lectures on mathematics, general chemistry, nuclear physics, radiation safety, radiochemistry, clinical practice,and laboratory procedures. *Version 1:* Includes radiopharmaceuticals.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 4 semester hours in mathematics, 2 in chemistry, 2 in nuclear physics, 2 in radio-pharmaceuticals, 2 in radiologic safety, 5 in radiation instrumentation, 4 in nuclear medicine procedures, 2 in imaging procedures, 2 in radiobiology for phase I; 24 semester hours in clinical practice for phase II (2/84). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in algebra, 6 in physics, 6 in physiology, and 3 in hematology (7/74). *Version 3:* In the lower-division baccalaureate/associate degree category, 4 semester hours in general chemistry, 3 in mathematics, 8 in radioisotope technology, 4 in physical science, and additional credit in radioisotope technology on the basis of institutional evaluation (2/74); in the upper-division baccalaureate category, 3 semester hours in general chemistry (12/68).

NV-0705-0003

1. X-RAY TECHNICIAN
2. X-RAY TECHNICIAN
3. X-RAY TECHNIQUE
   (X-Ray Technician, Class C)
   (X-Ray Technic)

Course Number: B-313-0026; B-313-26; B-313-27; B-313-28; B-313-29; B-313-30; B-313-31; B-313-32; B-313-33; B-313-34.

Location: *All Versions:* School of Health Sciences Detachment, Portsmouth, VA; School of Health Sciences, San Diego, CA. *Version 2:* Naval Hospital, St. Albans, NY; Naval Hospital, Bethesda, MD; Naval Hospital, Cp. Pendleton, CA; Naval Hospital, Chelsea, MA; Naval Hospital, Great Lakes, IL; Naval Hospital, Oakland, CA; Naval Hospital, Philadelphia, PA.

Length: *Version 1:* 52 weeks (2203 hours). *Version 2:* 52 weeks (1140 hours). *Version 3:* 52 weeks (1080-2087 hours).

Exhibit Dates: *Version 1:* 12/82-12/87. *Version 2:* 9/72-11/82. *Version 3:* 1/54-8/72.

Objectives: To train technicians to operate medical x-ray equipment, to produce and process diagnostic radiographs, and to assist in fluoroscopic examinations.

Instruction: For this course after 12/87 see NV-0705-0007. *All Versions:* Lectures on mathematics and electricity; clinical application of radiologic and fluoroscopic techniques; photodosimetry and radiation safety; film, screen, and darkroom procedures. *Version 1:* Includes physics. *Version 2:* Includes radiation therapy. *Version 3:* Includes radiation therapy.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in mathematics, 14 in anatomy and positioning, 5 in radiologic physics, 2 in radiation biology, 3 in introductory radiologic techniques, 1 in alternate imaging systems, 3 in ultrasound, 1 in radiation safety, and 1 in radiologic pathology (6/83). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in mathematics, 8 in anatomy, 8 in radiation physics and electronics, 8 in radiologic techniques, 3 in radiation safety, 3 in radiation biology, 3 in nuclear medicine technology, 3 in special procedures, 3 in darkroom techniques and 1 in ethics for a total of 43 semester hours (8/77). *Version 3:* In the upper-division baccalaureate category, 12 semester hours in radiologic technology, 2 in radiation therapy, 3 in physical science and mathematics, and additional credit in radiologic technology on the basis of institutional evaluation (2/74).

NV-0705-0004

1. NUCLEAR MEDICINE TECHNICIAN, SURFACE
2. NUCLEAR MEDICINE TECHNICIAN
   (Nuclear Medicine Technic)

Course Number: B-322-0010.

Location: Submarine Medical Center, Groton, CT.

Length: *Version 1:* 8 weeks (320 hours). *Version 2:* 12 weeks (355-398 hours).

Exhibit Dates: *Version 1:* 5/82-Present. *Version 2:* 1/63-4/82.

Objectives: To train enlisted personnel in radiation monitoring and surveys.

Instruction: *Version 1.* Lectures and practical exercises in the following areas: radiation fundamentals, radiation safety, radiation biology, radiation health physics, and radiation health administration. *Version 2:* Lectures and practical exercises in radiation monitoring and surveys, including radiological administration, mathematics, physics, reactor plant technology, radiobiology, and dosimetry.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in radiation fundamentals, 1 in radiation safety, 2 in radiation biology, 3 in radiation health physics and 3 in radiation health administration (6/83). *Version 2:* In the upper-division baccalaureate category, 6 semester hours in algebra, 6 in physics, and credit in nuclear medical technology, radiology, occupational safety and health on the basis of institutional evaluation (7/74).

NV-0705-0005

SUBMARINE TENDER RADIOLOGICAL CONTROLS (ENLISTED)

Course Number: F-000-034.

Location: Submarine School, Groton, CT.

Length: 5 weeks (150 hours).

Exhibit Dates: 9/72-1/88.

Objectives: To train enlisted personnel in submarine tender radiological control theory.

Instruction: Lectures and practical exercises in submarine tender radiological control theory, including types of radiation; units of radiation and radioactivity; radiation detection and shielding; airborne radioactivity surveys; contamination control; decontamination; submarine tender nuclear support facilities and systems; counting statistics and applications; and radiological work practices.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in radiology (12/68).

NV-0705-0006

BASIC X-RAY TECHNICIAN

Course Number: B-313-0025.

Location: Naval Regional Medical Center, Oakland, CA.

Length: 12 weeks (480 hours).

Exhibit Dates: 1/81-Present.

Objectives: To instruct enlisted personnel in the knowledge and skills required to operate basic diagnostic medical x-ray and film processing equipment and other routine medical and administrative procedures.

Instruction: Lectures and clinical experience in darkroom procedures, radiographic positioning, radiation safety, radiographic technique and anatomy.

Credit Recommendation: In the vocational certificate category, 2 semester hours in anatomy, 2 in radiographic techniques, 2 in radiographic positioning, 1 in darkroom procedures and 6 in clinical practice (5/90).

NV-0705-0007

ADVANCED X-RAY TECHNICIAN

Course Number: B-313-0026.

Location: School of Health Sciences, Portsmouth, VA; School of Health Sciences, San Diego, CA.

Length: 52 weeks (1902 hours).

Exhibit Dates: 1/88-Present.

Learning Outcomes: Upon completion of the course the student will perform as an x-ray technician who will become ARRT board eligible upon completion of 4,000 procedures in clinical practice.

Instruction: Lectures, laboratories, and/or simulated practice in mathematics, anatomy, positioning, radiologic physics, radiography, ethics, darkroom procedures, radiation biology, alternate imaging, radiation safety, radiologic pathology, ultrasound imaging, computer literacy, and quality assurance.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in survey of mathematics, 6 in radiologic physics, 3 in radiographic techniques, 1 in medical ethics, 2 in darkroom procedures, 2 in alternate imaging, 1 in radiation safety, 2 in radiologic pathology, 6 in ultrasonography, 16 in anatomy and and positioning, and 1 in quality assurance (7/90).

NV-0706-0001

Optician (General) Technician, Class C

Course Number: B-300-20.
Location: National Naval Medical Center, Bethesda, MD.
Length: 24-40 weeks (960 hours).
Exhibit Dates: 1/63-7/70.
Objectives: To train personnel in the fitting, adjusting and dispensing of spectacles.
Instruction: Lectures and practical application of ocular anatomy and physical and geometric optics.
Credit Recommendation: In the upper-division baccalaureate category, 18 semester hours in optical technology (2/74).

NV-0706-0002

Optician Technician, Class C
(Optician Laboratory Technician, Class C)
(Optician Technic Laboratory)

Course Number: *All Versions:* B-311-0023. *Version 2:* B-311-23.
Location: *Version 1:* Ophthalmic Support and Training Activity, Yorktown, VA. *Version 2:* Ophthalmic Support and Training Activity, Williamsburg, VA; Ophthalmic Support and Training Activity, Yorktown, VA. *Version 3:* National Naval Medical Center, Bethesda, MD.
Length: *Version 1:* 24 weeks (847 hours). *Version 2:* 26 weeks (1040 hours). *Version 3:* 7 weeks (280 hours).
Exhibit Dates: *Version 1:* 1/83-5/89. *Version 2:* 3/72-12/82. *Version 3:* 1/63-2/72.
Objectives: To train enlisted personnel to fabricate lenses and to maintain and repair surfacing laboratory equipment.
Instruction: For this course after 5/89 see NV-0706-0005. *Version 1:* Lectures and practical exercises in the principles of optics, ocular anatomy and physiological optics, spectacle fabrication and dispensing, mechanical optics, physical and geometric optics, clinical management and repair and maintenance of laboratory equipment. *Version 2:* Lectures and practical exercises in the principles of optics, ocular anatomy and physiological optics, spectacle fabrication and dispensing, mechanical optics, physical and geometric optics, clinical management, and repair and maintenance of laboratory equipment. *Version 3:* Lectures and practical exercises in the theory and principles of surface grinding of unifocal and multifocal lenses; laboratory procedures for unifocal and multifocal lens production; layout, blocking, marking, roughing, grinding, and polishing of spheres, spherocylinders and prisms; manufacture of safety lenses; and maintenance and repair of surfacing-laboratory equipment.
Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in optical anatomy, 1 in geometrical optics, 2 in optical mathematics, 2 in ophthalmic design, 5 in mechanical optics, 5 in spectacle fabrication, 2 in equipment repair/maintenance, 3 in ophthalmic dispensing, 2 in clinical practice (2/84). *Version 2:* In the upper-division baccalaureate category, 20 semester hours in optical technology (2/74). *Version 3:* In the upper-division baccalaureate category, 6 semester hours in optical technology (2/74).

NV-0706-0003

Ocular Technician

Course Number: B-300-0020.
Location: School of Health Sciences, San Diego, CA; National Naval Medical Center, Bethesda, MD.
Length: *Version 1:* 8 weeks (300 hours). *Version 2:* 12 weeks (480 hours).
Exhibit Dates: *Version 1:* 11/82-10/88. *Version 2:* 8/75-10/82.
Objectives: To train personnel to assist an ophthalmologist in treating diseases of the eye.
Instruction: For this course after 10/88 see NV-0706-0006. *All Versions:* Lectures and clinical education in ocular anatomy and physiology; pharmaceuticals and their administration; and visual testing and visual fields. *Version 1:* Topics include signs and symptoms of eye pathology. *Version 2:* Topics include signs, symptomology and eye pathology.The student also learns to assist the optometrist.
Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in ocular anatomy and physiology, 1 in ocular pharmacology, 2 in ophthalmic optics and 5 in clinical application (6/83). *Version 2:* In the vocational certificate category, 1 semest hour in mathematics (arithmetic) (8/77); the lower-division baccalaureate/associate degree category, 2 semester hours in ocular anatomy and physiology, 1 in pharmacy administration (eye medications), and 10 in ophthalmic assisting (8/77).

NV-0706-0004

Advanced Ocular Technician

Course Number: B-300-0021.
Location: Naval School of Health Sciences, San Diego, CA.
Length: 16 weeks (640 hours).
Exhibit Dates: 11/82-10/88.
Objectives: To train personnel to assist opthalmologists in surgery and other treatment procedures and to assist opthalmologists and optometrists in specialized diagnostic procedures.
Instruction: For this course after 10/88 see NV-0706-0006. Lectures and clinical education in ophthalmic surgical assisting and other specialized diagnostic and therapeutic procedures.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in operating room technology, 4 in ophthalmic surgical assisting and 6 in clinical applications (6/83).

NV-0706-0005

Optician Class C

Course Number: B-311-0023.
Location: Ophthalmic Support and Training Center, Yorktown, VA.
Length: 26 weeks (1040 hours).
Exhibit Dates: 6/89-Present.
Learning Outcomes: Upon completion of the course the student will be able to fabricate lenses; maintain and repair surfacing laboratory equipment; screen for common diseases and disorders of the eye; and perform selected clinical procedures.
Instruction: Methods of instruction include lectures, discussions, and clinical practice in the physics of diseases and disorders of the visual system, administration of ocular pharmaceutical agents, geometrical optics, optical math, ophthalmic lens design, mechanical optics, spectacle fabrication, equipment repair and maintenance, clinical procedures, ophthalmic dispensing and administration and clinical management.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in physics, 3 in diseases and disorders of the visual system, 1 in the administration of ophthalmic pharmacological agents, 1 in geometric optics, 2 in optical mathematics, 3 in ophthalmic lens design, 3 in mechanical optics, 3 in spectacle fabrication, 3 in equipment repair and maintenance, 1 in clinical procedures, 2 in ophthalmic dispensing, and 1 in administrative course and clinical management (7/90).

NV-0706-0006

Ocular Technician

Course Number: B-300-0021.
Location: School of Health Sciences, San Diego, CA.
Length: 22 weeks (888 hours).
Exhibit Dates: 11/88-Present.
Learning Outcomes: Upon completion of the course the student will assist an ophthalmologist in the diagnosis and medical and surgical treatment of eye diseases and disorders.
Instruction: Lectures, discussions, and clinical practice in diseases and disorders of the visual system, ocular medicine, ophthalmic optics, visual testing procedures, and clinical management. Also includes operating room preparation and techniques, operating room environmental control, surgical supplies and equipment, activities of the operating room circulator and scrub technician, and advanced surgical anatomy/operative procedures.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 5 semester hours in diseases and disorders of the visual system, 2 in ocular medicine, 1 in ophthalmic optics, 2 in visual testing procedures, 1 in ophthalmic surgical equipment, 2 in clinical practice, 1 in introduction to operating room techniques, 1 in introduction to environmental control in the operating room, 2 in surgical supplies and equipment, 1 in activities of the operating room circulator, 1 in activities of the scrub technician, and 3 in advanced surgical anatomy/operative procedures (7/90).

NV-0707-0001

1. Preventive Medicine Technician
2. Preventive Medicine Technician, Class C
   (Preventive Medicine Technic)
3. Environmental Sanitation Technic

Course Number: B-322-0012; B-322-12.
Location: Naval Hospital, Oakland, CA.
Length: *Version 1:* 26 weeks (1000 hours). *Version 2:* 20-22 weeks (640-880 hours). *Version 3:* 20 weeks (640 hours).
Exhibit Dates: *Version 1:* 3/83-11/88. *Version 2:* 11/63-5/75. *Version 3:* 2/56-10/63.
Objectives: To train enlisted personnel to assist medical officers in epidemiological and sanitation work.
Instruction: For this course after 11/88 see NV-0707-0002. *All Versions:* Lectures and practical exercises in bacteriology, immunology, mathematics, statistics, epidemiology, entomology, and environmental sanitation. *Version 1:* Topics include parasitology; occupational safety and health; pest control; food sanitation technology; water,

wastewater and solid waste management, and public health administration.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 4 semester hours in public health bacteriology, 3 in water, wastewater and solid waste management, 2 in mathematics, 3 in occupational safety and health, 1 in biostatistics, 1 in community sanitation, 3 in parasitology, 5 in food sanitation technology, 5 in epidemiology of infectious diseases, 2 in health care facility sanitation, 2 in oral communication, 1 in chemical, biological and radiological defense, 8 in medical entomology and pest control and 1 in public health administration (6/83). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in speech and communications or general business, 2 in bacteriology, 2 in microbiology, 2 in statistics, 6 in environmental sanitation (2/74). *Version 3:* In the lower-division baccalaureate/associate degree category, 2 semester hours in speech and communications or general business, 2 in bacteriology, 2 in microbiology, 2 in statistics, 6 in environmental sanitation (2/74); in the upper-division baccalaureate category, 3 semester hours in community sanitation, 8 in pathogenic bacteriology (12/68).

NV-0707-0002

PREVENTIVE MEDICINE TECHNICIAN CLASS C

Course Number: B-322-0012.

Location: School of Health Sciences, Oakland, CA.

Length: 26 weeks (1040 hours).

Exhibit Dates: 12/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to use basic disease prevention measures and promote public health using techniques in occupational safety and health, environmental microbology, medical entomology, and pest control.

Instruction: Lectures and practical exercises in microbiology, immunology, mathematics, statistics, epidemiology, and environmental sanitation.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in public health microbiology, 3 in water/waste water management, 5 in occupational safety and health, 1 in biostatistics, 3 in medical parasitology, 5 in food saniation technology, 5 in epidemiology and communicable diease control, 2 in health care facility sanitation, 2 in lesson development and presentation, 1 in chemical, biological, and radiological medical defense, 8 in medical entomology and pest control, 3 in public health administration, 2 in habitability and related service areas, 2 in mathematics, and 2 in operational saniation (7/90).

NV-0709-0001

1. NUCLEAR SUBMARINE MEDICINE TECHNICIAN
2. NUCLEAR SUBMARINE MEDICINE TECHNIQUE
3. NUCLEAR SUBMARINE MEDICINE TECHNICIAN, CLASS C
   (Nuclear Submarine Medicine Technic)
4. SUBMARINE MEDICINE TECHNICIAN, CLASS C
   (Submarine Medicine Technic)

Course Number: B-300-0012; B-300-012; B-300-12.

Location: Health Sciences Education and Training Center, New London, CT.

Length: *Version 1:* 15 weeks (600 hours). *Version 2:* 30 weeks (1041–1050 hours). *Version 3:* 30 weeks (900–1047 hours). *Version 4:* 20 weeks (365 hours).

Exhibit Dates: *Version 1:* 5/82–Present. *Version 2:* 1/76–4/82. *Version 3:* 1/66–12/75. *Version 4:* 1/55–12/65.

Objectives: To train hospital corpsmen to serve on submarines independent of a medical officer.

Instruction: *Version 1:* This course is a combination of a three-week Basic Submarine course, an eight-week Radiation Health course and a four-week Submarine Medicine course. The main emphasis of the course is in the following areas: radiation fundamentals, radiation safety, radiation biology, radiation physics, radiation health administration and advanced corpsman skills as adapted to the nuclear submarine environment. *Version 2:* This course is a combination of the 12-week Nuclear Medicine Technician course, the 10 week Submarine Medicine Technician course and the 8 week Basic Enlisted Submarine course. Lectures and practical exercises in mathematics, radiological physics, photodosimetry, nuclear reactor safety, nuclear weapons safety, radiobiology, health physics, radiation administration, toxicology, anatomy and physiology, surgery, preventive medicine, diving medicine, and medical diagnosis and treatment. *Version 3:* This course is a combination of the 12-week Nuclear Medicine Technician course, the 10-week Submarine Medicine Technician course, and the 8-week Basic Enlisted Submarine course. Lectures and practical exercises in mathematics, radiological physics, photodosimetry, nuclear reactor safety, nuclear weapons safety, radiobiology, health physics, radiation administration, toxicology, first aid/minor surgery, preventive medicine, diving medicine, and medical diagnosis and treatment. *Version 4:* This course includes the 12-week Submarine Medicine Technician course and the 8-week Basic Enlisted Submarine course. Lectures and practical exercises are in medical diagnostic and treatment procedures, anatomy, physiology, pharmaceutical and laboratory procedures, minor surgery, first aid and hygiene, and sanitation.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in radiation fundamentals, 1 in radiation safety, 2 in radiation biology, 3 in radiation health physics, 3 in radiation health administration, 3 in nuclear submarine medical procedures (6/83). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in mathematics, 3 in radiation health administration, 1 in radiological fundamentals, 2 in radiation biology, 1 in nuclear weapons safety, 3 in health physics, 2 in clinical laboratory, 3 in medical administration, 3 in anatomy and physiology, 2 in atmosphere control, 3 in preventive medicine, 10 in medical diagnosis and treatment and 4 in management of medical and surgical emergencies (6/83). *Version 3:* In the lower-division baccalaureate/associate degree category, 60 semester hours in physician assisting, medical assisting, environmental health, diving medicine, diagnostics, and preventive medicine not to include general education requirements and taking into consideration the completion of mandatory prerequisites: (16 week) Hospital Corpsman, Class A School, (20 week) Hospital Corps Advanced School, and two years required experience in between. Students who do not meet those prerequisites may be granted 6 semester hours in basic mathematics and slide rule as applied to health physics and 6 semester hours in physics (7/74). *Version 4:* In the lower-division baccalaureate/associate degree category, 3 semester hours in first aid and hygiene, 3 in nursing, 3 in medical laboratory technology, 12 in health care science, and additional credit on the basis of institutional evaluation (2/74).

NV-0709-0003

AEROSPACE MEDICINE TECHNICIAN

(Aerospace Medical Technician, Class C)
(Aviation Medicine Technician, Class C)
(Aviation Medicine Technic)

Course Number: B-300-0017; B-300-17.

Location: Aerospace Medical Institute, Pensacola, FL.

Length: *Version 1:* 10 weeks (350 hours). *Version 2:* 12–16 weeks (480–640 hours). *Version 3:* 12–16 weeks (480–640 hours).

Exhibit Dates: *Version 1:* 1/79–Present. *Version 2:* 1/70–12/78. *Version 3:* 6/63–12/69.

Objectives: To train selected hospital corpsmen in aerospace medicine.

Instruction: Lectures and practical exercises in anatomy and physiology; circulatory and respiratory systems; aviation physiology; psychology; emergency medical procedures; aviation safety and investigation; ophthalmology; and clinical laboratory practice in physical examinations.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in anatomy and physiology, 1 in optometry, 1 in administrative procedures, 4 in health record administration, 1 clinical procedures, and 1 in first aid (4/85). *Version 2:* In the lower-division baccalaureate/associate degree category, 15 semester hours in anatomy and physiology plus additional credit based on institutional evaluation (2/74); in the upper-division baccalaureate category, 2 semester hours in anatomy and physiology, additional credit in first aid on the basis of institutional evaluation (9/71). *Version 3:* In the upper-division baccalaureate category, 2 semester hours in anatomy and physiology, 2 in typing, 4 in aviation medicine technology, and additional credit on the basis of institutional evaluation (2/74).

NV-0709-0004

AEROSPACE PHYSIOLOGY TECHNICIAN

Course Number: B-322-0011; B-322-11.

Location: Naval Aerospace Medical Institute, Pensacola, FL.

Length: *Version 1:* 6 weeks (240 hours). *Version 2:* 12–16 weeks (480–640 hours).

Exhibit Dates: *Version 1:* 10/83–Present. *Version 2:* 6/63–12/76

Objectives: To train enlisted personnel to assist in the indoctrination of personnel in aerospace physiology.

Instruction: *Version 1:* Lectures and laboratory experiences in the procedures for inside instructors and observers in hypobaric chambers, the aeromedical aspects of flight, visual problems and spatial orientation in aviation, Naval aviation personal protective and life support equipment, emergency egress systems, aeromedical aspects of ejection, operation and maintenance of aerospace physiology training devices and basic instructor techniques. *Version 2:* Lectures on advanced anatomy of the ear, nose, throat, sinuses, and the circulatory and respiratory systems; orientation in low-pressure chambers; effects of aviation environment upon the circulatory and respiratory systems; practical exercises in ejection seat training devices; instructor training; and acceleration survival and night-vision testing.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 6 semester hours in aerospace physiology and aviation environment procedures (5/85). *Version 2:* In the lower-division baccalaureate/associate degree category, 15 semester hours in aerospace physiology or flight surgery assistance, and additional credit on the basis of institutional evaluation (2/74); in the upper-division baccalaureate category, 4 semester hours in aerospace physiology or flight surgery assistance, and additional credit on the basis of institutional evaluation (2/74).

NV-0709-0005

SPECIAL OPERATIONS TECHNICIAN
(Special Operations Technic)

Course Number: A-431-0021.

Location: Underwater Swimmers School, Key West, FL.

Length: 8 weeks (95 hours).

Exhibit Dates: 12/63-1/88.

Objectives: To provide the hospital corpsmen with an understanding of the effects of pressure on the human body and the treatment of divers' diseases and injuries.

Instruction: Self-paced lectures and practical exercises in diving physics, underwater physiology, accident prevention, use of compression chambers, and decompression and treatment tables.

Credit Recommendation: In the upper-division baccalaureate category, credit in diving medicine on the basis of institutional evaluation (2/74).

NV-0709-0006

CARDIOPULMONARY TECHNICIAN, CLASS C
(Cardiopulmonary Technic)

Course Number: B-300-0018; B-300-18; B-300-19.

Location: National Naval Medical Center, Bethesda, MD; School of Health Sciences, San Diego, CA.

Length: *Version 1:* 52 weeks (2036 hours). *Version 2:* 52 weeks (2036 hours). *Version 3:* 39 weeks (1560 hours). *Version 4:* 26 weeks (1039 hours).

Exhibit Dates: *Version 1:* 2/81-3/89. *Version 2:* 11/67-1/81. *Version 3:* 12/63-10/67. *Version 4:* 3/60-11/63.

Objectives: To provide enlisted personnel with the knowledge and skills necessary to perform as cardiopulmonary technical assistants.

Instruction: For this course after 3/89 see NV-0709-0018. *All Versions:* Lectures and practical exercises in basic cardiopulmonary technical assisting, including anatomy and physiology, physics, electrocardiograph monitoring, pulmonary function procedures, cardiac catheterization procedures, surgical techniques, x-ray techniques, and operation and maintenance of cardiopulmonary machines. *Version 1:* Includes chemistry.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 5 semester hours in cardio-vascular anatomy and physiology, 5 in pulmonary anatomy and physiology, 2 in introductory mathematics, 2 in chemistry, 6 in non-invasive techniques, 3 in invasive techniques, 4 in radiography, 3 in gas analysis, 4 in respiratory therapy, and 6 in cardiopulmonary laboratory techniques (a practicum is included in each of the above areas) (6/83). *Version 2:* In the vocational certificate category, 2 semester hours in mathematics (arithmetic) and 2 in operating room techniques (8/77); in the lower-division baccalaureate/associate degree category, 1 semester hour in pulmonary anatomy, 2 in cardiac anatomy, 3 in pulmonary physiology, 3 in cardiac physiology, 3 in biomedical electronics, 12 in cardiopulmonary instrumentation, 5 in clinical chemistry, 12 in non-invasive cardiology techniques, and 6 in invasive cardiology techniques, for a total of 47 semester hours (8/77). *Version 3:* In the upper-division baccalaureate category, 2 semester hours in anatomy or physiology, 2 in physics, 2 in mathematics, 5 in clinical chemistry, and credit in cardiopulmonary or respiratory technology on the basis of institutional evaluation (2/74). *Version 4:* In the upper-division baccalaureate category, 2 semester hours in mathematics, 5 in clinical chemistry, and credit in cardiopulmonary or respiratory technology on the basis of institutional evaluation (2/74).

NV-0709-0008

1. ADVANCED HOSPITAL CORPS
   (Advanced Hospital Corpsman)
2. ADVANCED HOSPITAL CORPSMAN
   (Independent Duty Technician)
3. MEDICAL SERVICES TECHNICIAN, CLASS C
   (Medical Services Technic)
4. ADVANCED HOSPITAL CORPS TECHNICIAN, CLASS B
   (Hospital Corpsman, Advanced)

Course Number: *All Versions:* B-300-15; B-300-16. *Version 1:* B-300-0019. *Version 2:* B-300-0016; B-300-0019.

Location: School of Health Sciences, San Diego, CA; Naval Hospital, Portsmouth, VA.

Length: *Version 1:* 46 weeks (1840 hours). *Version 2:* 40 weeks (1600 hours). *Version 3:* 36 weeks (1350 hours). *Version 4:* 20-26 weeks (800-1040 hours).

Exhibit Dates: *Version 1:* 11/81-12/88. *Version 2:* 4/76-10/81. *Version 3:* 3/72-3/76. *Version 4:* 1/55-2/72.

Objectives: To provide medical service technicians with advanced training in the principles and techniques of medical treatment, including patient care, first aid and emergency procedures, preventive medicine, industrial safety, and administrative duties.

Instruction: For this course after 12/88 see NV-0709-0019. Lectures and clinical experiences in advanced medical and surgical conditions, diagnostics and treatment procedures, material media and toxicology, pharmacology, preventive medicine and industrial safety, nuclear and biological defense, fiscal management, effective speaking, effective teaching methods, personnel management, anatomy and physiology. *Version 1:* Does not include material media, effective speaking, and teaching methods.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 4 semester hours in anatomy and physiology, 3 in physical diagnosis, 3 in clinical pathology, 4 in pharmacology, 3 in health education (including drugs and alcohol), 8 in management of medical/surgical conditions I, 8 in management of medical/surgical conditions II, 3 in radiation health, 5 in preventive medicine, 2 in health records, and 5 in clinical practice (6/83). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in anatomy and physiology, 5 in pharmacology and toxicology, 3 in laboratory techniques, 3 in food and water sanitation, 2 in environmental sanitation, 3 in introduction to patient care, 16 in manifestation of diseases, 10 in clinical application, and 3 in health systems administration, for a total of 48 semester hours (8/77). *Version 3:* In the upper-division baccalaureate category, 2 semester hours in anatomy and physiology, 2 in first aid, 3 in pharmacology, 1 in clinical laboratory, 7 in business administration, 3 in English, 2 in psychology, and additional credit in nursing or physician assisting on the basis of institutional evaluation (2/74). *Version 4:* In the lower-division baccalaureate/associate degree category, 2 semester hours in hygiene, sanitation, and first aid, 5 in nursing, 2 in pharmacology, and 2 in medical laboratory technology (2/74); in the upper-division baccalaureate category, 4 semester hours in hygiene, sanitation, and first aid, and 2 in anatomy and physiology (2/68).

NV-0709-0009

OTOLARYNGOLOGY TECHNICIAN
(Eye, Ear, Nose and Throat Technician, Class C)

Course Number: B-300-0024; B-300-21; B-300-24; B-300-22; B-300-23.

Location: *All Versions:* National Naval Medical Center, Bethesda, MD; School of Health Sciences, San Diego, CA. *Version 2:* Naval Hospital, Oakland, CA; Naval Hospital, Philadelphia, PA.

Length: *Version 1:* 16 weeks (587 hours). *Version 2:* 16 weeks (587 hours). *Version 3:* 26 weeks (1040 hours).

Exhibit Dates: *Version 1:* 4/82-12/88. *Version 2:* 5/74-3/82. *Version 3:* 12/60-4/74.

Objectives: To train personnel to assist medical officers in the care and treatment of patients for ear, nose, and throat conditions.

Instruction: For this course after 12/88 see NV-0709-0016. *All Versions:* Lectures and clinical experiences on the medical and surgical conditions of ear, nose and throat; emergency and operating room procedures specific to those conditions and basic audiometry. *Version 2:* Topics also include care and conditions of the eye.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in anatomy and physiology, 2 in otolaryngology procedures and techniques and 8 in clinical applications (6/83). *Version 2:* In the vocational certificate category, 4 semester hours in otolaryngology operating room techniques (8/77); in the lower-division baccalaureate/associate degree category, 2 semester hours in otolaryngology anatomy, 1 in otolaryngology physiology, 9 in audiology and audiometry, and 6 in diagnostic and therapeutic techniques (8/77). *Version 3:* In the upper-division baccalaureate category, 12 semester hours in health care technology, 3 in nursing, 3 in anatomy and physiology, and additional credit in health care technology on the basis of institutional evaluation (2/74).

NV-0709-0010

1. ELECTROCARDIOGRAPHY TECHNICIAN, CLASS C
   (Electrocardiography Technique)
2. ELECTROCARDIOGRAPHY AND BASAL METABOLISM TECHNICIAN, CLASS C
   (Electrocardiography and Basal Metabolism Technic)

Course Number: B-311-20; B-311-21; B-311-22.

Location: Naval Hospital, Bethesda, MD; Naval Hospital, Portsmouth, VA; Naval Hospital, San Diego, CA.

Length: *Version 1:* 8 weeks (320 hours). *Version 2:* 16 weeks (640 hours).

Exhibit Dates: *Version 1:* 3/72–1/88. *Version 2:* 9/55–2/72.

Objectives: To train enlisted personnel to assist medical officers in electrocardiograph and basal metabolism examinations.

Instruction: Lectures on physiology of circulation, techniques of electrocardiography, principles of metabolism and clinical application of tests, and basal metabolism machines.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 6 semester hours in electrocardiographic technology, additional credit on the basis of institutional evaluation (2/74). *Version 2:* In the upper-division baccalaureate category, 12 semester hours in anatomy and physiology, or electrocardiographic and respiratory technology, and additional credit on the basis of institutional evaluation (2/74).

NV-0709-0011

Electroencephalography Technician, Class C
(Electroencephalography Technic)

Course Number: *Version 1:* B-302-0043. *Version 2:* B-302-0043. *Version 3:* B-302-40; B-302-43; B-302-41; B-302-42; B-302-44..

Location: *All Versions:* National Naval Medical Center, Bethesda, MD. *Version 3:* Naval Hospital, San Diego, CA; Naval Hospital, St. Albans, NY; Naval Hospital, Bethesda, MD; Naval Hospital, Chelsea, MA; Naval Hospital, Oakland, CA.

Length: *Version 1:* 26 weeks (1024 hours). *Version 2:* 26 weeks (1024 hours). *Version 3:* 16 weeks (640 hours).

Exhibit Dates: *Version 1:* 5/83–Present. *Version 2:* 4/75–4/83. *Version 3:* 1/55–3/75.

Objectives: To train personnel in electroencephalographic technology.

Instruction: *All Versions:* Lectures and clinical application of patient-interviewing and -handling approaches, structure and function of nervous system, clinical neurology, basic electricity and electronics, EEG instrumentation, and clinical electroencephalography. *Version 3:* Includes psychiatry, medicine and neurosurgery.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in neuroanatomy and physiology, 3 in neuropathophysiology, 3 in instrumentation, 3 in wave patterns and 9 in clinical practice (2/84). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in neuroanatomy, 2 in neurophysiology, 2 in neuropathophysiology, 3 in EEG electronics, 2 in EEG technique and interpretation and 14 in clinical practice (2/84). *Version 3:* Insufficient data for evaluation (2/74).

NV-0709-0012

Physician's Assistant

Course Number: B-300-0031.

Location: Naval School of Health Sciences, San Diego, CA. Naval School of Health Sciences, Portsmouth, VA.

Length: 52–60 weeks (2080–2400 hours).

Exhibit Dates: 1/79–Present.

Objectives: To provide experienced personnel with the technical knowledge and skills to assist physicians in evaluation, primary care and disposition of patients.

Instruction: Lectures and clinical rotations aimed at developing student abilities to perform complete historical and physical examinations, order and interpret routine radiographic studies, perform minor surgery, provide emergency health care, exercise a degree of independent decisionmaking judgement in treatment and therapy procedures, all under the supervision of a medical officer. The program includes course work in basic and clinical health sciences.

Credit Recommendation: In the upper-division baccalaureate category, 6 semester hours in anatomy and physiology, 3 in biochemistry, 2 in microbiology, 4 in pharmacology, 1 in musculoskeletal/orthopedics, 1 in cardiovascular, 1 in genitourinary and renal, 1 in infectious diseases, 1 in gastrointestinal medicine, 1 in otolaryngology, 1 in pediatrics, 1 pulmonary medicine, 1 in clinical pathological carrelation (CPC), 1 in radiology, 1 in electrocardiography, 2 in emergency medicine and surgical procedures, 2 in human behavior (psychiatry), 4 in clinical assessment (physical diagnosis), 1 in issues in health care, 3 in medical electives (neurology, endocrinology, hematology, oncology, dermatology, obstetrics/gynecology, ophthalmology, substance abuse and communication processes), and 10 in clinical rotations (4/85).

NV-0709-0013

Dermatology Technician, Class C
(Dermatology Technic)

Course Number: B-300-0029; B-300-29.

Location: Naval School of Health Sciences, San Diego,CA; Naval Health Sciences Education and Training Command, Bethesda, MD. *Version 2:* Naval Hospital, Philadelphia, PA.

Length: *Version 1:* 12 weeks (480 hours). *Version 2:* 16–20 weeks (640 hours).

Exhibit Dates: *Version 1:* 9/80–12/88. *Version 2:* 12/57–8/80.

Objectives: To train enlisted personnel to assist medical officers in the care of patients with skin disorders.

Instruction: For this course after 12/89 see NV-0709-0017. Lectures and laboratories in dermatology assisting, including basic laboratory techniques; basic bacteriology, serology, hematology, pathology, mycology, and parasitology; common dermatoses diagnosis; medical records and reports; operating room techniques; and special dermatologic treatment procedures.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in medical laboratory techniques, 2 in basic dermatology and 7 in clinical applications (6/83). *Version 2:* In the upper-division baccalaureate category, 4 semester hours in epidemiology, 2 in medical laboratory technology, 12 in dermatology technology on the basis of institutional evaluation (2/74).

NV-0709-0015

Field Medical Service Technic, Enlisted
(Field Medical Service Technician)
(Field Medical Service Officer)

Course Number: B-300-13; B-300-14.

Location: Field Medical Service School, Cp. Lejeune, NC; Field Medical Service School, Cp. Pendleton, CA.

Length: 3–7 weeks (120–280 hours).

Exhibit Dates: *Version 1:* 6/77–3/87. *Version 2:* 1/55–5/77.

Objectives: To train medical personnel in combat survival and field medical and dental practices.

Instruction: *All Versions:* Lectures and practical exercises in combat survival and field medical practices. Course includes physical conditioning, the corpsman in the field, field emergency procedures, medical supply in the field, and preventive medicine. *Version 2:* Includes instruction in field dental practices.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in field emergency care and 1 in field preventive medicine (6/83). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in first aid (7/74).

NV-0709-0016

Otolaryngology Technician Class C

Course Number: B-300-0024.

Location: School of Health Sciences, San Diego, CA.

Length: 22 weeks (880 hours).

Exhibit Dates: 1/89–Present.

Learning Outcomes: Upon completion of the course the student will be able to assist physicians in the medical and surgical care and treatment of patients for ear, nose and throat conditions by demonstrating proficiency in operating room techniques, audiological diagnostic testing and clinical skills.

Instruction: Lectures, laboratory practice, surgical, audiological, and clinical rotation with clinical experiences in medical and surgical procedures of ear, nose and throat. Course contains 7 units of the operating room technican course.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in anatomy and physiology, 2 in otolaryngology procedures/techniques, 8 in clinical practice, 1 in introduction to operating room techniques, 1 in introduction to environmental control in the operating room, 2 in surgical supplies and equipment, 1 in operating room circulator activities, 1 in scrub technician activities, and 3 in advanced surgical/anatomy procedures (7/90).

NV-0709-0017

Dermatology Technician Class C

Course Number: B-300-0029.

Location: School of Health Sciences, San Diego, CA.

Length: 12 weeks (480 hours).

Exhibit Dates: 1/90–Present.

Learning Outcomes: Upon completion of the course the student will be able to assist a physician in diagnosing and treating all types of skin diseases and demonstrate proficiency in specific diagnostic methods and procedures.

Instruction: Lectures and laboratories in dermatology assisting, including basic laboratory techniques, basic bacteriology, serology, hematology, pathology, mycology, and parasitology, common dermatoses diagnosis, medical records and reports, operating room techniques, and special treatment procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in medical laboratory techniques, 2 in basic dermatology, and 8 in clinical practice (7/90).

NV-0709-0018

Cardiopulmonary Technician Class C

Course Number: B-300-0018.

Location: School of Health Sciences, Bethesda, MD; School of Health Sciences, San Diego, CA.

Length: 52 weeks (2112 hours).

Exhibit Dates: 4/89–Present.

Learning Outcomes: Upon completion of the course the student will be able to perform noninvasive cardiology, pulmonary function testing, critical care life support, and assist the physician in cardiac catheterization.

Instruction: Lectures, laboratories, and clinical practice in anatomy, cross sectional anatomy, physiology, electrocardiography, pharmacology, respiratory care, blood gas analysis, cardiac catheterization, hemodynamic monitoring, cardiopulmonary radiography, echocardiography, pulmonary function testing, invasive cardiovascular techniques, and ventilatory support.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 in cardiovascular anatomy and physiology, 3 in pulmonary anatomy and physiology, 3 in radiography, 3 in pharmacology, 4 in mechanical ventilation, 3 in blood gas analysis 6 in pulmonary function, 4 in critical care, 8 in cardiology and 12 in cardiac catheterization (7/90).

NV-0709-0019

ADVANCED HOSPITAL CORPSMAN CLASS C

Course Number: B-300-0019.

Location: School of Health Sciences, Portsmouth, VA; School of Health Sciences, San Diego, CA.

Length: 46 weeks (1840 hours).

Exhibit Dates: 1/89–Present.

Learning Outcomes: Upon completion of the course the student will perform minor surgery, diagnostic and basic clinical laboratory procedures, emergency care, industrial hygiene and safety, health education services, and related resource dissemination.

Instruction: Lecture, laboratory, and clinical practice in medical and surgical topics, including record management, materials management, education and teaching methods, alcohol and drug abuse, communicable diseases, pest control and sanitation, industrial hygiene and safety, radiation safety and health, anatomy and physiology, physical assessment, pharmacology, clinical laboratory, dental procedures, basic cardiac life support, basic trauma life support, and appropriate standards of care in diagnosis, triage, and treatment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 in anatomy and physiology, 4 in clinical laboratory procedures, 2 in dental procedures, 2 in medical records; in the upper-division baccalaureate category, 4 in physical assessment, 4 in pharmaco-therapetics, 4 in clinical pathology, 8 in clinical practice, 2 in sanitation and hygiene, 2 in prevention and safety, 3 in radiation health, and 10 in clinical management of medical and surgical conditions (7/90).

NV-0799-0001

NAVAL SCHOOL OF HOSPITAL ADMINISTRATION

Course Number: None.

Location: National Naval Medical Center, Bethesda, MD.

Length: 32–40 weeks (940–1337 hours).

Exhibit Dates: 4/57–12/68.

Objectives: To provide advanced instruction in the theory and practice of hospital administration for Medical Service Corps officers.

Instruction: Instruction includes accounting, business mathematics, English, fundamentals of instruction, office management, speech, financial management, food service management, law, maintenance management, personnel management, principles of organization, records management, security management, special services management, and supply management.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in general business (6/75); in the upper-division baccalaureate category, 11 semester hours in general business (6/75).

NV-0799-0002

NAVY ALCOHOL SAFETY ACTION PROGRAM (NASAP)

Course Number: None.

Location: Various Naval Training Centers, USA; NASAP Detachment, Subic Bay, Philippines; NASAP Detachment, Rota, Spain; NASAP Detachment, Naples, Italy; NASAP Detachment, Yokosuka, Japan; NASAP Detachment, Okinawa, Japan; NASAP Detachment, Sasebo, Japan; NASAP Command Sponsored Office, U.S.S. Saratoga; NASAP Command Sponsored Office, U.S.S. Howard Gilmore; NASAP Command Sponsored Office, Holy Loch, Scotland; NASAP Command Sponsored Office, U.S.S. Forrestal.

Length: 1–6 weeks (36 hours).

Exhibit Dates: *Version 1:* 9/80–6/83. *Version 2:* 9/74–8/80.

Objectives: To provide instruction on alcoholism, including early identification techniques and preventive alternatives.

Instruction: Through group discussions, lectures, role playing, and media presentations, the following primary topics are covered: an introduction to the severity of alcohol problems with particular emphasis on the drinking driver; a review of Navy regulations on the subject; medical aspects of alcohol and its physical and mental effects; legal implications of driving while intoxicated; symptoms and phases of alcohol use and abuse, attitudes and values related to both alcohol and a drinking problem; support available from other organizations and agencies; the effects of alcohol abuse on family members and friends; and the exploration of the supervisor's job in supporting the Navy Alcohol Prevention Program.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in alcohol/drug education (2/84). *Version 2:* In the lower-division baccalaureate/associate degree category, 1 semester hour in alcohol abuse studies (10/78).

NV-0799-0003

PHARMACY TECHNICIAN
(Pharmacy Technician, Class C)
(Pharmacy Technic)

Course Number: *Version 1:* B-312-0025. *Version 2:* B-312-0025. *Version 3:* B-312-24; B-312-25. *Version 4:* B-312-24; B-312-25.

Location: School of Health Sciences, San Diego, CA; School of Health Sciences Detachment, Portsmouth, VA.

Length: *Version 1:* 23 weeks (805 hours). *Version 2:* 23 weeks (805 hours). *Version 3:* 36 weeks (1360 hours). *Version 4:* 32 weeks (1200 hours).

Exhibit Dates: *Version 1:* 11/82–8/86. *Version 2:* 9/75–10/82. *Version 3:* 3/72–8/75. *Version 4:* 1/61–2/72.

Objectives: To train technicians to assist medical and pharmacy officers in the compounding and dispensing of pharmaceutical preparations.

Instruction: For this course after 8/86 see NV-0799-0008. *All Versions:* Lectures in principles of pharmacy, pharmaceutical calculations; inorganic, organic, and pharmaceutical chemistry; basic pharmacology, drug interaction and toxicology; practical experience in compounding and dispensing pharmacy, and pharmacy administration.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in pharmaceutical chemistry, 5 in pharmaceutical mathematics, 5 in principles of pharmacy, 2 in intravenous additives, 2 in pharmacy management and computer applications, 14 in pharmacology and toxicology and 3 in dispensing laboratory practice (6/83). *Version 2:* In the lower-division baccalaureate/associate degree category, 5 semester hours in principles of pharmacy, 5 in pharmaceutical mathematics, 3 in chemistry, 18 in pharmacology, 1 in pharmacy management, 5 in dispensing and 1 in intravenous admixtures, for a total of 38 semester hours (8/77). *Version 3:* In the upper-division baccalaureate category, 2 semester hours in pharmaceutical mathematics, 2 in inorganic chemistry, 3 in organic chemistry, 2 in principles of pharmacy, 4 in compounding and dispensing pharmacy, 1 in pharmacy orientation, 1 in typing, 5 in basic pharmacology and toxicology, 1 in pharmacy administration (2/7 *Version 4:* In the lower-division baccalaureate/associate degree category, 2 semester hours in pharmaceutical mathematics, 2 in inorganic chemistry, 3 in organic chemistry, 2 in principles of pharmacy, 4 in compounding and dispensing pharmacy, 1 in pharmacy orientation, 1 in typing, 5 in basic pharmacology and toxicology, 1 in pharmacy administration (2/74); in the upper-division baccalaureate category, 5 semester hours in pharmaceutical mathematics, 2 in laboratory techniques (12/68).

NV-0799-0004

DRUG ABUSE EDUCATION SPECIALIST

Course Number: A-000-0053.

Location: Training Center, San Diego, CA.

Length: 5 weeks (200 hours).

Exhibit Dates: 10/73–12/82.

Objectives: To provide instruction in the development, implementation, evaluation, and revision of command drug and alcohol education and action programs.

Instruction: Lectures, discussions, and practical exercises in organization and administration of drug abuse education programs, including history of abuse, behavioral patterns, problem identification, and rehabilitation techniques. Methods of instruction include communications techniques such as group therapy and role playing.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in health sciences (8/87).

NV-0799-0005

DRUG AND ALCOHOL PROGRAM ADVISOR

Course Number: A-000-0055.

Location: Training Center, San Diego, CA; Training Center, Charleston, SC; Training Center, Pearl Harbor, HI; Training Center, Rota, Spain; Training Center, Norfolk, VA; Training Center, Treasure Island, CA.

Length: 2 weeks (55 hours).

Exhibit Dates: 9/74–1/88.

Objectives: To train command designated officers and senior petty officers to perform as drug and alcohol program advisors.

Instruction: Lectures and discussions of policies concerning drugs and alcohol; physiological and psychological effects; planning and administering prevention programs; identifying, utilizing, and understanding resources both internal and external to the Navy.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in health sciences (6/75).

NV-0799-0006

Navy Drug Safety Action Program (NDSAP)

Course Number: None.

Location: Various Naval Training Centers, U.S.A.

Length: 2 weeks (36 hours).

Exhibit Dates: 8/81-6/83.

Objectives: To provide individuals with the opportunity to learn about drug effects and to examine their values and attitudes concerning the use and abuse of all mood altering drugs.

Instruction: Lectures and group discussions designed to provide (1) basic facts on drugs (2) educational experiences for individual development (3) intrapersonal experiences aimed at self-awareness (4) practical solutions for every day drug problems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in drug education (2/84).

NV-0799-0007

Navy Substance Abuse Prevention Program

(Navy Alcohol/Drug Safety Action Program (NASAP/NDSAP))

Course Number: None.

Location: Various Naval Training Facilities, Worldwide.

Length: 1-2 weeks (36 hours).

Exhibit Dates: 7/83-Present.

Objectives: To provide instruction on alcoholism and drug abuse with emphasis on personal health and responsibility.

Instruction: Discussions focusing on the implications of alcohol/drug use and abuse, values clarification, decision making, stress management and coping, and personal responsibility for lifestyle choices.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in substance abuse prevention and health promotion (7/87).

NV-0799-0008

Pharmacy Technician Class C

Course Number: B-312-0025.

Location: School of Health Sciences, Portsmouth, VA; School of Health Sciences, San Diego, CA.

Length: 23 weeks (815 hours).

Exhibit Dates: 9/86-Present.

Learning Outcomes: Upon completion of the course the student will be able to assist physicians and pharmacists in the compounding, calculation, dispensing, and administration of pharmacological preparations.

Instruction: Lectures, discussions, and clinical practice in the conpounding, pharmacology, administration, calculation, and dispensing of a variety of preparations.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in compounding, 12 in pharmacology, 3 in pharmacy administration, 4 in sterile products, 2 in clinical rotations, 3 in dispensing, 3 in computer/typing applications, and 6 in pharmaceutical calculations (7/90).

NV-0801-0001

Nuclear, Biological and Chemical (NBC) Defense (Shipboard)

Course Number: J-2G-420; J-780-420.

Location: Fleet Training Center, Norfolk, VA.

Length: 2 weeks (70 hours).

Exhibit Dates: 1/71-1/88.

Objectives: To train personnel in hazard detection and decontamination of personnel and material.

Instruction: Lectures and practical exercises in nuclear, biological, and chemical defense afloat, including nature of nuclear radiation, ionization and its effects, fleet radiation detection and measuring equipment, effects of nuclear detonations and minimizing measures, radioactive contamination and decontamination procedures, accidental detonation of nuclear ordnance containing plutonium, and chemical and biological agents, features, effects, defense, and countermeasures.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-0801-0002

Staff Disaster Preparedness Officer

Course Number: A-7K-0011.

Location: Naval Training Unit, Ft. McClellan, AL.

Length: 6 weeks (124 hours).

Exhibit Dates: 1/72-1/88.

Objectives: To train personnel in nuclear, biological, and chemical defense and accident control.

Instruction: Lectures and practical exercises in disaster preparedness, including biological agents, effects, and defense; biological agent dissemination; biological decontamination; chemical agents, effects, and defense; introduction to chemical warfare; CW dissemination; foreign CB capabilities; decontamination of chemical agents; nuclear weapons and effects; atomic and nuclear principles; characteristics and attentuation of ionizing radiation; and effects of ionizing radiation on personnel.

Credit Recommendation: In the vocational certificate category, 3 semester hours in civil defense, 3 in medical technology (5/74).

NV-0801-0003

Disaster Recovery Training I and II

Course Number: None.

Location: Naval Construction Battalion Center, Port Hueneme, CA; Naval Construction Battalion Center, Davisville, RI; Naval Construction Battalion Center, Gulfport, MS.

Length: 4 weeks.

Exhibit Dates: 6/66-12/68.

Objectives: To train personnel to cope with the effects of a disaster.

Instruction: Lectures and practical exercises on disaster control, including fundamentals of nuclear energy, effects of nuclear weapons, fallout, biological and chemical warfare, nuclear accidents, protective equipment, communications, radiac instruments, biological sampling, chemical detection, radiological surveys and decontamination, biological and chemical decontamination, and first aid.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (12/68).

NV-0801-0004

Nuclear, Biological and Chemical (NBC) Defense for Petty Officers

Course Number: Not available.

Location: *Version 1:* Damage Control Training Center, Philadelphia, PA. *Version 2:* Damage Control School, Treasure Island, CA.

Length: 3 weeks (90 hours).

Exhibit Dates: 5/68-1/88.

Objectives: To train personnel to perform as advanced damage controlmen strikers.

Instruction: Lectures and practical exercises in nuclear, biological, and chemical defense afloat, including classification, detection, and decontamination of BW/CW agents and nuclear radiation; operation and maintenance of radiac equipment, maintenance of protective clothing and masks; training of personnel in monitoring and decontamination procedures for repair parties; nuclear warfare defense; and NBC warfare defense organization.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-0801-0005

Nuclear, Biological and Chemical (NBC) Defense Ashore (Nuclear, Biological and Chemical (NBC) Warfare Defense Ashore)

Course Number: A-7K-011.

Location: Army Chemical School, Ft. McClellan, AL; Schools Command, Treasure Island, CA.

Length: 6 weeks (168-185 hours).

Exhibit Dates: 4/66-1/88.

Objectives: To train officers to perform as disaster control officers for shore establishments.

Instruction: Lectures and practical exercises in disaster control procedures, including organization; nuclear, biological, and chemical agents and effects; nuclear, biological, and chemical warfare defense and accident control; disaster control operation; radiological detection; and decontamination.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (12/68).

NV-0801-0006

Administration, Training and Advisor (ATA)

(Drug Abuse Program Officers)

Course Number: S-501-0001.

Location: Various Naval Training Centers, USA and overseas.

Length: 2 weeks (72 hours).

Exhibit Dates: *Version 1:* 8/83-12/86. *Version 2:* 4/72-7/83.

Objectives: To train selected enlisted personnel to perform as drug abuse program officers.

Instruction: *Version 1:* Lectures, small group discussions and role playing covering such topics as administration and management, alcoholism treatment resources, basic interviewing and listening skills, presentation skills and basic information concerning the effects of alcohol abuse. *Version 2:* Lectures and practical exercises in the duties of a drug abuse program officer. Course includes identification, education, rehabilitation programs, philosophies, methods, and agencies.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in alcohol abuse prevention (8/87). *Version 2:* In the upper-division baccalaureate category, 1 semester hour in health education (7/74).

NV-0801-0007

Navy Drug Abuse Counselor

Course Number: None.

Location: Drug Rehabilitation Center, Miramar, San Diego, CA; Naval Station, Jacksonville, FL.

Length: 8-10 weeks (400-500 hours).

Exhibit Dates: 5/72-12/84.

Objectives: To train para-professional drug abuse counselors in screening and referral, identification and counseling of substance abusers.

Instruction: After 1984 see NV-0801-0011. Lectures, seminars, group growth experiences, observation and supervised practicum covering interviewing, evaluating, counseling, referring, recommending, process-calling and progress note writing; basic psychology and selected aspects of sociology and physiology.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in introduction to abnormal behavior, 2 in counseling theory and practice, 2 in theories of personality, 2 in managerial skills, and 1 in principles of alcohol abuse, for a total of 12 semester hours (11/77); in the upper-division baccalaureate category, 3 semester hours in group process theory and practice, 2 in psychopharmacology and 3 in practicum (11/77).

NV-0801-0008

Alcoholism Treatment Specialist (ATS)

Course Number: None.

Location: Naval Alcohol Rehabilitation Center, San Diego, CA.

Length: 10-12 weeks (347-448 hours).

Exhibit Dates: 7/75-12/85.

Objectives: To train alcoholism treatment specialists for in-field services in the treatment of alcoholism.

Instruction: Methods of instruction include directed class instruction, group problem solving, structured exercises, practicum, audio-visuals, simulation, role playing, psychodrama, and application. Curriculum areas cover dynamics of human behavior; group processes; introduction to, organization and administration of, and practicum and clinical methods of counseling; social psychology and problems in contemporary society related to substance abuse.

Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in general psychology, 3 in counseling, 2 in theories of personality and group process, 3 in practicum, 1 in alcohol/drug abuse, and 2 in managerial skills, for a total of 12 semester hours (8/87).

NV-0801-0009

Operational Water Chemistry and Radiological Controls

Course Number: L-4H-0027.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Submarine School, Groton, CT; Fleet Ballistic Submarine Training Center, Charleston, SC; Guided Missile School Detachment, Norfolk, VA.

Length: 2 weeks (73 hours).

Exhibit Dates: 2/83-Present.

Objectives: To provide training in nuclear propulsion plantwater chemistry and radiological controls with emphasis on the evaluation and solution of operational plant problems.

Instruction: Course covers operational water chemistry control, operational radiological control, and casualty procedures and radiological problems encountered and proposed actions.

Credit Recommendation: In the vocational certificate category, 1 semester hours in chemical technology laboratory (11/85).

NV-0801-0010

Aftercare Program Management

Course Number: S-501-0001.

Location: Naval Training Center, Norfolk, VA; Naval Training Center, Rota, Spain; Naval Training Center, Yokosuka, Japan; Naval Training Center, New London, CT; Naval Training Center, Jacksonville, FL; Naval Training Center, Pearl Harbor, HI; Naval Training Center, Philadelphia, PA; Naval Training Center, Washington D.C.; Naval Drug Rehabilitation Center, San Diego, CA.

Length: 2 weeks (70 hours).

Exhibit Dates: 9/85-Present.

Learning Outcomes: Upon completion of the course, the student will be able to assist recovering substance abusers in the process of conforming to aftercare prescription protocols; participate in the conducting of substance abuse education programs; and provide minimal support services to family members.

Instruction: Course introduces student to beginning skills in substance abuse, communication, data management, interviewing and case management.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to substance abuse counseling (7/87).

NV-0801-0011

Navy Drug and Alcohol Counselor School

Course Number: S-501-0002.

Location: Naval Drug Rehabilitation Center, San Diego, CA.

Length: 10-11 weeks (400-440 hours).

Exhibit Dates: 1/85-Present.

Learning Outcomes: Upon completion of the course, the student will be able to screen and evaluate personnel with substance abuse problems and determine appropriate treatment program; conduct counseling sessions; and assist in the management of substance abuse programs.

Instruction: Methods of instruction include lecture, demonstration, video review and group process. Topics include group development, counseling, behavior modification, substance abuse, child/spousal abuse, abnormal psychology, and applied practicum.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to psychology; in the upper-division baccalaureate category, 3 semester hours in abnormal psychology, 3 in counseling theory and practice, 3 in group process-theory and practice, and 3 in substance abuse counseling (7/87).

NV-0802-0001

Atomic, Biological and Chemical (ABC) Defense for Shipboard Instructors

Course Number: None.

Location: Damage Control Training Center, Treasure Island, CA.

Length: 3 weeks (104 hours).

Exhibit Dates: 1/62-12/68.

Objectives: To train enlisted personnel to assist officers in organizing and conducting training programs in shipboard defense.

Instruction: Lectures in instructor training and in nuclear, biological, and chemical warfare defense afloat.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in occupational safety (1/74).

NV-0802-0002

Nuclear Weapons Disposal Advanced Refresher

Course Number: A-4E-0024.

Location: Explosive Ordnance Disposal School, Indian Head, MD.

Length: 2 weeks (67 hours).

Exhibit Dates: 10/72-1/88.

Objectives: To train advanced personnel in the procedures of nuclear ordnance disposal.

Instruction: Lectures and practical exercises in nuclear disposal procedures. Topics include nuclear weapon identification, principles of operation, location of safety devices and components, and packaging and labeling operations for contaminated material and nuclear components.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-0802-0003

Surface Explosive Ordnance Disposal (EOD) Advanced Refresher

Course Number: A-4E-0025; A-431-0015.

Location: Explosive Ordnance Disposal School, Indian Head, MD.

Length: 3 weeks (165 hours).

Exhibit Dates: 10/70-1/88.

Objectives: To train qualified explosive ordnance disposal personnel in new methods, new equipment, and advanced disposal procedures and safety precautions in explosive ordnance disposal operations.

Instruction: Lectures and practical exercises in explosive ordnance disposal procedures and operations. Topics include explosive hazards, fuses, munitions, and the effects, precautionary measures, and disposal of nuclear and other explosive materials.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-0802-0004

Radiographic Safety Officer

Course Number: A-4G-0018.

Location: Welding Class C School, San Diego, CA.

Length: 2 weeks (65 hours).

Exhibit Dates: 2/68-1/88.

Objectives: To train personnel to perform as radiographic safety officers and to supervise radiographers.

Instruction: Lectures and practical exercises in fundamentals of radiography, including applications to industrial radiography; interaction of radiation with matter; mathematics related to radiography; variation of dose-rate with distance; source identity; radiation control, detection, and measurement; principles of radiation detection; AEC rules and regulations; duties of radiographic safety officers; standards for protection against radiation; and familiarization with nondestructive testing.

Credit Recommendation: In the vocational certificate category, 4 semester hours in radiation measurement and nondestructive testing (5/74); in the upper-division baccalaureate category, 2 semester hours in radiation measurement and nondestructive testing (5/74).

NV-0802-0005

CVS/MAUW Shop Nuclear Weapons Technical

Course Number: J-644-0914; J-4E-9142; J-644-9142.

Location: Nuclear Weapons Training Group, Atlantic, Norfolk, VA.

Length: 2 weeks (65 hours).

Exhibit Dates: 7/71-1/88.

Objectives: To train enlisted and officer personnel in special administrative, technical and operational procedures in CVS or MAUW shops with a nuclear weapons capability.

Instruction: Lectures and practical exercises on procedures specific to a CVS or MAUW shop with a nuclear weapons capability, including the effect of nuclear weapons, hazards associated with nuclear weapons, security of classified matter and nuclear weapons, couriers and guards, administrative aspects, weapons familiarization and component description, delivery considerations, inspections and test criteria, CNO-promulgated nuclear weapons system safety rules.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-0802-0006

Nuclear Weapons Technical (CVA)

Course Number: J-4E-9122; J-644-9122.

Location: Nuclear Weapons Training Group, Atlantic, Norfolk, VA.

Length: 2 weeks (115 hours).

Exhibit Dates: 3/73-1/88.

Objectives: To train W-Division personnel in the special administrative, technical, and operational procedures specific to CVA shops with a nuclear weapons capability.

Instruction: Lectures and practical exercises on administrative and technical operations connected with the nuclear weapons capability of CVA shops, including the effects of nuclear weapons; responsibilities; nuclear physics fundamentals; nuclear weapons safety; hazards associated with nuclear weapons; radiation detection instruments; reliability of nuclear weapons; weapons modernization; technical reports; B43; B57; B28; B6l; stockpile reports; and security of nuclear weapons.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-0802-0007

Nuclear Weapons Disposal

Course Number: A-431-0013.

Location: Explosive Ordnance Disposal School, Indian Head, MD.

Length: 6 weeks (232 hours).

Exhibit Dates: 9/72-1/88.

Objectives: To train officers and enlisted personnel in nuclear ordnance disposal procedures.

Instruction: Lectures and practical exercises in nuclear ordnance disposal procedures, including weapon identification, elementary principles of operation, location of safety devices and components, radiation hazards and packaging, and personnel decontamination operations.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-0802-0008

Atomic, Biological and Chemical
(ABC) Warfare Defense Afloat

Course Number: Not available.

Location: *Version 1:* Damage Control Training Center, Philadelphia, PA. *Version 2:* Schools Command, Treasure Island, CA.

Length: 5 weeks (173-174 hours).

Exhibit Dates: 12/59-12/68.

Objectives: To train officers in atomic, biological, and chemical warfare defense afloat.

Instruction: Lectures and practical exercises on ABC warfare defense afloat, including atomic, biological, and chemical warfare effects on personnel, ships and equipment; methods used to reduce or negate these effects; casualty minimization; requirements of shipboard ABC-damage control; radiological detection; nuclear weapon accidents; protection and decontamination; disaster recovery; shipboard organization; and anti-personnel biological warfare.

Credit Recommendation: Credit is not recommended because of the specialized nature of the course (12/68).

NV-0802-0009

CVA/CVS Air Launched Weapons
Supervisor
(CVA/CVS Air Launched Weapons)

Course Number: C-646-3103.

Location: Air Maintenance Training Detachment, Jacksonville, FL; Air Maintenance Training Detachment, Norfolk, VA; Air Maintenance Training Detachment, Mayport, FL; Air Maintenance Training Detachment, North Island, CA; Air Maintenance Training Detachment, Alameda, CA.

Length: 3-4 weeks (120-160 hours).

Exhibit Dates: 8/67-1/88.

Objectives: To train personnel in the complete sequence of air launched weapons handling.

Instruction: Lectures and practical exercises in procedures and safety precautions in receiving, inspection, strikedown, stowage, breakout, assembly, fuzing, and reporting and recording of air-launched weapons. Topics include ammunition, pyrotechnics, aircraft munitions, and guided missiles.

Credit Recommendation: In the vocational certificate category, 3 semester hours in explosives (5/74).

NV-0802-0010

Fallout Shelter Analysis

Course Number: A-4A-0015.

Location: Civil Engineer Corps Officers School, Port Hueneme, CA.

Length: 2 weeks (74 hours).

Exhibit Dates: 5/72-1/88.

Objectives: To provide personnel with an understanding of the strategic nuclear threat and the rationale and importance of a fallout shelter system.

Instruction: Lectures and practical exercises in nuclear energy and the effects of nuclear weapons, fallout radiation shielding, computer applications, and shelter planning and utilization.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (5/74).

NV-0803-0001

Amphibious Reconnaissance

Course Number: G-2E-4610; G-010-4610; H-2E-3923; H-010-3923.

Location: Landing Force Training Command, Norfolk, VA; Naval Amphibious Base, San Diego, CA.

Length: 3-4 weeks (181-191 hours).

Exhibit Dates: 9/69-1/88.

Objectives: To train officers and enlisted personnel to conduct amphibious reconnaissance patrols.

Instruction: Lectures in map reading, scouting and patrolling techniques, hydrography, and underwater skills with emphasis on physical conditioning and swimming.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in physical education and swimming on the basis of institutional evaluation (5/74).

NV-0803-0002

1. Advanced Naval Parachutist, Class C1
2. Advanced Naval Parachutist, NP-II Class C

(Naval Parachutist, Advanced, Class C)

Course Number: C-602-2021.

Location: Air Technical Training Center, Lakehurst, NJ.

Length: *Version 1:* Self-paced 3 weeks (120 hours). *Version 2:* 2 weeks (80 hours).

Exhibit Dates: *Version 1:* 5/74-1/88. *Version 2:* 5/69-4/74.

Objectives: To provide selected Navy and Marine Corps personnel with knowledge and skills to accomplish delayed stable fall parachute descents utilizing advanced glide surface parachutes and high-altitude oxygen equipment.

Instruction: Lectures and practical exercises to include advanced parachute theory, equipment and parachute operations, precision target accuracy, extended delayed opening descents, safety check of parachutist equipment, and emergency actions.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (7/74).

NV-0902-0001

Management of Marine Corps Clubs

Course Number: S-8E-0013.

Location: Special Services Administrative Activity, Patuxent River, MD.

Length: 4 weeks (140 hours).

Exhibit Dates: 1/77-Present.

Objectives: To train enlisted personnel, civilians and officers to manage officers, NCO, and enlisted clubs.

Instruction: Instruction includes lectures, audio-visual presentations, and practical exercises designed to develop managerial skills needed to successfully operate a Marine Corps club. Included are club regulations, accounting, and cost controls and personnel procedures.

Credit Recommendation: In the vocational certificate category, 4 semester hours in food and beverage management (7/79); In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to institutional management (7/79).

NV-0902-0002

Recreation Management

Course Number: S-8E-0015.

Location: Special Services Administrative Activity, Patuxent River, MD.

Length: 4 weeks (140 hours).

Exhibit Dates: 1/77–Present.

Objectives: To train Navy, Marine, and civilian personnel to manage Navy/Marine recreational programs and facilities.

Instruction: Instruction includes lectures and practical exercises in the management of recreational facilities and programs. Course includes development of management and administrative abilities in relationship to recreational facilities, personnel management, financial management, accounting, and resource management.

Credit Recommendation: In the vocational certificate category, 3 semester hours in recreational facilities management (7/79); In the lower-division baccalaureate/associate degree category, 2 semester hours in introduction to business management (7/79).

NV-1002-0001

BUILDER—TOOL AND EQUIPMENT MAINTENANCE (BU "C")

Course Number: A-712-0010.

Location: Construction Training Center, Gulfport, MS; Construction Training Center, Port Hueneme, CA; Construction School, Davisville, RI.

Length: 10–12 weeks (320–360 hours).

Exhibit Dates: 1/72–1/88.

Objectives: To train personnel to maintain, recondition, and repair tools and machinery.

Instruction: Lectures and practical exercises in preventive maintenance, reconditioning and repair of all types of carpenter shop machinery including: all powered hand tools for the builder construction trade; non-powered edged and non-edged hand tools for the construction trade; woodworking and sawmill sharpening equipment; two-man saw mill; splice band; saw blades; and sanding and drive belts, coordinate stocking and procurement.

Credit Recommendation: In the vocational certificate category, 5 semester hours in industrial arts/tool and equipment repair (7/76); in the lower-division baccalaureate/associate degree category, 3 semester hours in industrial arts/tool and equipment repair (7/76).

NV-1107-0001

STRATEGIC WEAPONS SYSTEM (SWS) ELECTRONIC MATHEMATICS

Course Number: A-121-0482.

Location: Naval Guided Missiles School, Dam Neck, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/80–Present.

Objectives: To provide naval personnel with basic technical mathematics skills needed to perform required duties.

Instruction: Lectures and practical exercises in technical mathematics including whole numbers, fractions, decimals, signed numbers, exponents, roots, radicals, ratios, proportion, percentage, algebraic formula, use of non-programmable calculators, trigonometric functions, Pythagorean theorem, Cartesian coordinates, vectors, complex numbers, plane vectors, vector algebra and algebraic expressions.

Credit Recommendation: In the vocational certificate category, 3 semester hours in technical mathematics (11/83); in the lower-division baccalaureate/associate degree category, 2 semester hours in technical mathematics (11/83).

NV-1107-0002

SHIP'S INERTIAL NAVIGATION SYSTEM (SINS) THEORY AND ANALYSIS

Course Number: A-193-0370.

Location: Submarine School, Groton/New London, CT; Submarine Training Facility, Charleston, SC; Trident Training Facility, Bangor, WA.

Length: 1-2 weeks (55-56 hours).

Exhibit Dates: 12/86–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate a ship's inertial navigation system.

Instruction: Lectures and practical exercises on the subject matter.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (10/89).

NV-1115-0001

INTERMEDIATE MAINTENANCE LEVEL DATA ANALYSIS, CLASS C

Course Number: None.

Location: Naval School, Norfolk, VA; Naval School, San Diego, CA.

Length: 3 weeks (102 hours).

Exhibit Dates: 6/69–1/88.

Objectives: To train officers and enlisted personnel to apply statistical analysis to data collection in accounting and maintenance systems.

Instruction: Lectures in basic applied statistical analysis, including mathematics review, frequency distribution, dispersion, confidence estimation, trends, control charts, man-hour accounting, and computer equipment usage.

Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in introductory statistics (2/74).

NV-1115-0002

MANAGEMENT ANALYSIS, CLASS C
(Management Analysis, Class O)

Course Number: C-7E-2010.

Location: Air Technical Training Center, Memphis, TN; Air Technical Training Center, Millington,TN.

Length: *Version 1:* 3–4 weeks (120 hours). *Version 2:* 6 weeks (240 hours). *Version 3:* 6 weeks (240 hours).

Exhibit Dates: *Version 1:* 4/78–12/84. *Version 2:* 5/72–3/78. *Version 3:* 9/68–4/72.

Objectives: To provide naval officers experienced in maintenance management with training in statistical analysis and managerial data analysis.

Instruction: *All Versions:* Lectures and laboratory in statistical methods, inference, data presentation, and management concepts and problems.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in basic statistics (2/81). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in basic statistics (6/75). *Version 3:* In the lower-division baccalaureate/associate degree category, 3 semester hours in basic statistics (2/74); in the upper-division baccalaureate category, 3 semester hours in managerial statistics (12/68).

NV-1205-0001

MUSIC, CLASS A, BASIC
(Basic Course (Class A))
(Naval School of Music, Class A, Basic)
(Bandsman Basic (Army))
(Band Instrumentalist (Army))

Course Number: A-450-0010; 450-F1.

Location: School of Music, Little Creek, Norfolk, VA.

Length: *Version 1:* 23 weeks (416-602 hours). *Version 2:* 24–36 weeks (618 hours).

Exhibit Dates: *Version 1:* 1/79–Present. *Version 2:* 5/68–12/78.

Objectives: To provide Navy musicians with essential performance skills and with basic knowledge of theory, harmony, and ear training for purposes of instrumental technique improvement.

Instruction: *All Versions:* Fundamental notation; directions for performance and dance band devices; elementary phrase and triad construction; transposition and instruments; dance band notation reading; marching signal recognition; tuning, ensemble, and sight reading; marching position and drills; elements of music: aural and written rhythms and tonal relationships; transposing; self-study discipline and private instruction; indoctrination in history, structure, and procedures of Navy school. *Version 2:* Includes simple four-part writing.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in elementary theory/harmony (excluding four part writing), 1 in ear training/sight singing, 2 in jazz theory/ improvisation, 2-4 in applied performance (individual instruction) (2/79); in the upper-division baccalaureate category, 2 semester hours in performing ensembles (2/79) *Version 2:* In the lower-division baccalaureate/associate degree category, 6 semester hours in music ensemble, 6 in music theory, 4 in applied music (2/74).

NV-1205-0002

MUSIC ADVANCED, CLASS C-7
(Assistant Bandleader)
(Music, Class B, Advanced)
(Advanced Course Class B)
(Naval School of Music, Class B, Advanced)

Course Number: *Version 1:* A-450-0014. *Version 2:* A-450-0011.

Location: School of Music, Little Creek, Norfolk, VA; School of Music, Amphibious Base, Norfolk, VA.

Length: *Version 1:* 40 weeks (1200 hours). *Version 2:* 52 weeks (2080 hours).

Exhibit Dates: *Version 1:* 1/78–Present. *Version 2:* 1/68–12/77.

Objectives: To train student bandleaders to plan and prepare a Navy unit band for any of its wide variety of commitments, to conduct with skill any engagement performed by a Navy unit band, to effectively administer a Navy unit band, to plan and conduct an effective in-service training program, to apply the correct procedures for supplying a Navy unit band with instruments and accessories, to arrange music for a band and its components, to perform basic fundamentals on all band instruments, and to make minor repairs on all band instruments; and to provide the student bandleader with training in the theories, principles, and mechanics of conducting, the importance and methods of good band administration, the techniques of arranging, and the theories of advanced harmony.

Instruction: *Version 1:* The course comprises block courses in Band Administration, including instruction in band locations and leader billet allowance, organization and instrumentation, regulations, instrument supply, and personnel records; basic repair of wind instruments; Advanced Band Management, including personnel and public relation; Advanced Band Administration, covering rules for ceremonies, reviews, parades, and presentations; Instrument Class, covering performance on percussion, woodwind, and brass instruments; Drum Majoring, covering baton and instrument positioning, and general principles of marching bands; Advanced Arranging, including instruction on notation, melodic and harmonic analysis, instrumentation, principles of scoring and styles, and project completion and analysis; Advanced Ear Training, including instruction in aural recognition, sight-singing of diatonic melodies, scale fingerings, basic keyboard harmony, and solfeggio, melodic and harmonic dictation; Advanced Harmony, covering a review of basic harmony, secondary dominants, chromatically altered chords, and advanced modulation; Advanced Dance Band Rehearsal Techniques, including performance devices, rehearsal techniques, materials, physical setup and transportation, and dance band literature; Advanced Conducting, including rehearsal psychology, choral and accompaniment techniques, complex beat patterns, showmanship, and practical experience conducting from a full score; Rehearsal Planning and Techniques practical application of conducting skills during daily rehearsals; Advanced Leadership and Speech, covering basic leadership skills, public speaking, and military subjects; and Dance Band Rehearsal Techniques, including practical application of all rehearsal techniques. *Version 2:* The course comprises twenty blocks: Band Administration, including instruction in band locations and leader billet allowance, organization and instrumentation, regulations, instrument supply, and personnel records; Advanced Music Survey, covering a complete history of Western music; Advanced Maintenance and Repair, covering repair of wind and string bass instruments; Advanced Band Management, including personnel and public relations; Advanced Band Administration, covering rules for ceremonies, reviews, parades, and presentations; Advanced Form and Analysis, covering phrase, cadence, period and part-form analysis, as well as rondo, sonata, and irregular-form analysis; Advanced Instrument Class, covering performance on percussion, woodwind, and brass instruments; Advanced Music Survey, including a survey of band literature and current trends in popular music; Advanced Drum Majoring, covering baton and instrument positioning, and general principles of marching bands; Advanced Arranging, including instruction on notation, melodic and harmonic analysis, instrumentation, principles of scoring and styles, and project completion and analysis; Advanced Ear Training, including instruction in aural recognition, sight-singing of diatonic melodies, scale fingerings, basic keyboard harmony, and solfeggio, melodic and harmonic dictation; Advanced Harmony, covering a review of basic harmony, secondary dominants, chromatically altered chords, and advanced modulation; Advanced Dance Band Rehearsal Techniques, including performance devices, rehearsal techniques, materials, physical setup and transportation, and dance band literature; Advanced Counterpoint, including species, canonic, three-voice, and invertible counterpoint and fugue; Advanced Conducting II, including rehearsal psychology, choral and accompaniment techniques, complex beat patterns, showmanship, and practical experience conducting from a full score; Conducting I, including basic beat patterns, musical terms and musical markings; Practical Conducting, covering rehearsal planning and techniques; Advanced Conducting III and IV, including advanced band literature and conducting techniques, and practical application of conducting skills during daily rehearsals; Advanced Leadership and Speech, covering basic leadership skills, public speaking, and military subjects; and Dance Band Rehearsal Techniques, including practical application of all rehearsal techniques.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 4 semester hours in advanced theory/harmony/ear training, 1 in elementary class piano, 1 in instrument techniques (brass, woodwind and percussion) (2/79); in the upper-division baccalaureate category, 4 semester hours in advanced arranging, 4 in advanced conducting, 3 in dance band techniques, 3 in band management as an elective, 2 in public speaking, 3 in personnel managment as an elective (2/79); in the graduate degree category, 2 semester hours in advanced conducting based on institutional evaluation (2/79). *Version 2:* In the lower-division baccalaureate/associate degree category, 1 semester hour in music survey, in the upper-division baccalaureate category, semester hour in maintenance of musical instruments, 15 in music theory, 2 in music performance, 1 in music education, 2 in music ensemble, 2 in basic conducting, 6 in advanced conducting (4/74).

NV-1205-0003

MUSIC INTERMEDIATE, CLASS C-1
(Music Intermediate, Class C)
(Music, Class C, Refresher)
(Naval School of Music, Class C, Refresher)
(Refresher Course (Class C))
(Band Group Leader (Army))

Course Number: A-450-0012; 450-F2.

Location: School of Music, Little Creek, Norfolk, VA.

Length: *Version 1:* 23 weeks (960 hours). *Version 2:* 24 weeks (960 hours).

Exhibit Dates: *Version 1:* 8/75–Present. *Version 2:* 2/70–7/75.

Objectives: To advance performance skills and to provide student musicians with a refresher course in the proper care of musical instruments, development of effective approaches to tone production and techniques, knowledge of written and sounding ranges of all instruments of the band, transposition of melodies for all instruments of the band, basic mechanics of transcribing and scoring for military marching and dance bands, performance of baton signals and positions, methods of aligning and maneuvering marching bands on fields, techniques of conducting beat patterns at varying dynamic levels, and basic knowledge of music theory, harmony, and sight singing; and to prepare student musicians for leadership of concert, marching, or dance bands.

Instruction: *Version 1:* The course comprises block courses in Individual Instrument Instruction and Individual Practice, including instruction designed to fit the capabilities of each student and technical instruction in embouchure formation, breathing, attack and release, tone, intonation, articulation, flexibility, instrumental and dynamic range, rudiments, and sight reading; Theory, Harmony, Ear Training, covering a review of music theory and analysis, four-part writing, figured bass for dealing with triad inversions, dominant 7th chords, secondary triads, chord progressions, non-harmonic tones, diatonic 7th, higher dominant dischords, simple modulation, and secondary dominant chords; Instrumentation, covering the unique properties and scoring problems of each instrument of the band through discussion of theoretical practice, part and score analysis, and simple scoring for small groups of instruments; Arranging, covering scoring for woodwind choirs, brass choirs, marching bands, and dance bands; Drum Majoring, including baton signals and their use in marching formations; Conducting, including basic beat patterns, preparatory beats, tempo changes, and honors music; Leadership, including principles of leadership, command responsibilities, and special functions of petty officers; Concert Band, including rehearsals of standard and current publications for military and concert bands; Dance Band, including rehearsals of standard and current publications for dance bands. *Version 2:* The course comprises ten blocks: Indoctrination, including instruction in the proper care and maintenance of all musical equipment; Individual Instrumentation Instruction and Individual Practice, including individual instruction designed to fit the capabilities of each student and technical instruction in embouchure formation, breathing, attack and release, tone, intonation, dealing with triad inversions, dominant 7th chords, second triads, chord progressions, non-harmonic tones, diatonic 7th, higher dominant dischords, simple modulation, and secondary dominant chords; Instrumentation, covering the unique properties and scoring problems of each instrument of the band through discussion of theoretical practice, part and score analysis, and simple scoring for small groups of instruments; Arranging, covering scoring for woodwind choirs, brass choirs, marching bands, and dance bands; Drum Majoring, including baton signals and their use in marching formations; Conducting, including basic beat patterns, preparatory beats, tempo changes, and honors music; Leadership, including principles of leadership, command responsibilities, and special functions of petty officers; Concert Band, including rehearsals of standard and current publications for military and concert bands; Dance Band, including rehearsals of standard and current publications for dance bands.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 8 semester hours in intermediate theory/harmony/ear training, 2 in applied music (individual instruction on principle instrument), 1 in applied music: woodwind, percussion or brass (secondary instrument), 2–4 in concert performing ensembles, 2 in marching band (2/79); in the upper-division baccalaureate category, 2–3 semester hours in instrumental arranging, 1 in elementary conducting (2/79). *Version 2:* In the lower-division baccalaureate/associate degree category, 8 semester hours in music theory, 6 in music performance, and an additional 3 to 6 semester hours in music performance on the basis of performance audition (4/74).

NV-1303-0001

1. MACHINIST'S MATE, CLASS A1 (600 PSI)
2. MACHINIST'S MATE, (600 PSI) CLASS A1
3. MACHINIST'S MATES, CLASS A
4. MACHINIST'S MATE, CLASS A

Course Number: A-651-0082; A-651-0015.

Location: Service Schools Command, Great Lakes, IL.

Length: *Version 1:* Self-paced 4 weeks (160 hours). *Version 2:* Self-paced 6–8 weeks (336–380 hours). *Version 3:* 11–15 weeks

(455 hours). *Version 4:* 12 weeks (365 hours).

Exhibit Dates: *Version 1:* 9/77-Present. *Version 2:* 1/75-8/77. *Version 3:* 2/68-12/74. *Version 4:* 5/63-1/68.

Objectives: To train personnel in the basic operation of high pressure steam plants and associated equipment.

Instruction: *All Versions:* Lectures and practical exercises in the duties of machinist's mates, class A, including refrigeration, auxiliary plant operation, lubrication, and propulsion systems. *Version 1:* Self-paced instruction includes steam turbines, turbo-generators and duties of watch standing. *Version 2:* Self-paced instruction includes nomenclature, operation, systems diagrams, and maintenance of the 600 PSI propulsion system and supporting auxiliary equipment. *Version 3:* Topics include pump maintenance, and pneumatics and hydraulics. Algebra, thermodynamics, trigonometry, and chemistry covered in nuclear option; and refrigeration, distillation, and auxiliary plant operation covered in conventional option. *Version 4:* Topics include basic information; mathematics review and blueprint reading; tools, instruments, and materials; basic principles of steam engineering; temperature and pressure measuring instruments; heating, ventilation, and insulation; valves, pipes, tubing, and fittings; pumps and accessories; principal piping systems; logs, records, sound-powered telephones, and circuits; damage control and survival at sea; and distilling plants.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in steam plant orientation (1/82); in the lower-division baccalaureate/associate degree category, 1 semester hour in steam plant orientation (1/82). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours as a technical elective in automotive or mechanical programs and 6 in steam plant systems maintenance or related programs (9/77). *Version 3:* In the vocational certificate category, 8 semester hours as a technical elective in mechanical maintenance, in the lower-division baccalaureate/associate degree category, 6 semester hours as a technical elective in mechanical maintenance, and 3 additional semester hours in science for students completing the nuclear option (7/74). *Version 4:* In the vocational certificate category, 8 semester hours as a technical elective in mechanical maintenance (7/74); in the lower-division baccalaureate/associate degree category, 6 semester hours as a technical elective in mechanical maintenance (7/74).

NV-1303-0002

MACHINIST'S MATE CLASS A1 (1200 PSI)

Course Number: A-651-0053; A-651-0015.

Location: Service School Command, Great Lakes, Il.

Length: *Version 1:* 9 weeks (277 hours) *Version 2:* Self-paced 6-8 weeks (336-380 hours) *Version 3:* Self-paced 6-8 weeks (336-380 hours).

Exhibit Dates: *Version 1:* 7/85-Present. *Version 2:* 9/77-6/85. *Version 3:* 1/75-8/77.

Objectives: To train personnel in the operation of a steam propulsion plant.

Instruction: *Version 1:* Lectures and practical exercises in the principles, operation and maintenance of a high pressure steam propulsion plant including boilers, combustion theory, steam systems, water chemistry, lubricating oil systems, electrical systems and firefighting systems. *Version 2:* Lectures and practical exercises in the operation of a steam propulsion plant including firefighting systems, major components such as pumps, piping, condensers, turbines reduction gearing, lube systems, service and air control systems and auxiliary systems. *Version 3:* Self-paced instruction including nomenclature, operation, systems diagrams and maintenance of the 1200 PSI systems including lubrication and propulsion systems.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in basic marine engineering or 3 in power plant fundamentals (1/86). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours as a technical elective in systems operations or related programs (1/82). *Version 3:* In the lower-division baccalaureate/associate degree category, 2 semester hours as a technical elective in automotive or mechanical programs and 6 in steam plant systems maintenance or related programs (1/82).

NV-1304-0001

INTRODUCTION TO OCEAN ENGINEERING

Course Number: A-4A-0025.

Location: Naval School Civil Engineer Corps Officers, Port Hueneme, CA.

Length: 2 weeks (60 hours).

Exhibit Dates: 7/70-1/88.

Objectives: To provide students with a general knowledge of ocean engineering.

Instruction: Lectures in problems and techniques of ocean engineering, including physical and geological oceanography, legal aspects, and diving.

Credit Recommendation: In the vocational certificate category, 2 semester hours in ocean engineering (12/73); in the lower-division baccalaureate/associate degree category, 2 semester hours in oceanography (12/73); in the upper-division baccalaureate category, 2 semester hours in marine science (12/73).

NV-1304-0002

AIR OCEAN ENVIRONMENT COURSE, CLASS C

Course Number: None.

Location: Air Technical Training Center, Lakehurst, NJ.

Length: 4-7 weeks (160-280 hours).

Exhibit Dates: 2/65-1/88.

Objectives: To provide enlisted personnel with a basic understanding of the physics and chemistry of oceans, and the principles of underwater sound.

Instruction: Lectures and practical experiences in the fundamentals of underwater acoustics, physical oceanography, observational equipment and procedure, and environmental analysis and prediction.

Credit Recommendation: In the vocational certificate category, 6 semester hours in marine sciences (12/73); in the lower-division baccalaureate/associate degree category, 6 semester hours in oceanography (12/73); in the upper-division baccalaureate category, 6 semester hours in ocean engineering (12/73).

NV-1304-0003

AVIATION ANTISUBMARINE WARFARE (AASW) FOR NAVAL FLIGHT OFFICERS, P3C

Course Number: E-2D-0072; E-2D-072.

Location: Fleet Aviation Specialized Operational Training Group, Pacific, Moffett Field, CA.

Length: 2-3 weeks (82-105 hours).

Exhibit Dates: 9/72-1/88.

Objectives: To train naval flight officers to operate in equipped VP squadrons and to teach tactics and weaponry of antisubmarine warfare.

Instruction: Lectures in the procedures for antisubmarine warfare, including oceanography, underwater acoustics, AASW tactical procedures, AASW sensors and associated equipment, current electronic warfare concepts and requirements, and mission procedures. Includes mathematical treatment of acoustic and oceanographic principles.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in oceanography (4/74); in the upper-division baccalaureate category, 2 semester hours in oceanography (4/74).

NV-1304-0004

AEROGRAPHER'S MATE, CLASS A

Course Number: C-420-2010.

Location: Air Technical Training Center, Lakehurst, NJ.

Length: 14-18 weeks (510-717 hours).

Exhibit Dates: 3/56-1/88.

Objectives: To train enlisted personnel to perform as aerographer's mates.

Instruction: Lectures and practical exercises in meteorology, including matter, heat, humidity, and the atmosphere; surface observations of temperature, psychrometric, wind, pressure, precipitation, and sky conditions; upper-air observations; synoptic codes; oceanography; instrumentation, charts, logs; weather map analysis; and basic typing.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in weather forecasting or meteorology (5/74).

NV-1304-0005

AEROGRAPHER'S MATE, CLASS B

Course Number: *Version 1:* C-420-2011. *Version 2:* C-420-11.

Location: Air Technical Training Center, Lakehurst, NJ.

Length: *Version 1:* 18 weeks (583 hours). *Version 2:* 22-26 weeks (800-1033 hours).

Exhibit Dates: *Version 1:* 8/73-1/88. *Version 2:* 2/56-7/73.

Objectives: To train aerographer's mates in meteorology, air observation, and supervision and preparation of weather and oceanographic forecasts.

Instruction: *All Versions:* Lectures and practical exercises in meteorology, air observation, supervision and preparation of weather and oceanographic forecasts including various chart analyses, satellite meteorology, instruments, oceanography, map analysis, and forecasting under various conditions. *Version 2:* Includes atmospheric conditions, tropical meteorology, numerical weather prediction, management, mathematics, and physics applicable to meteorology, and flight observation.

Credit Recommendation: *Version 1:* In the vocational certificate category, 12 semester hours in weather forecasting or meteorology (5/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in weather forecasting or meteorology (5/74); in the upper-division baccalaureate category, 3 semester hours in weather forecasting or meteorology (5/74). *Version 2:* In the vocational certificate category, 12 semester hours in weather forecasting or meteorology (5/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in weather forecasting or meteorology (5/74); in the upper-division baccalaureate category, 6 semester hours in weather forecasting or meteorology (12/68).

NV-1304-0006

Meteorological Satellite, Class C

Course Number: Not available.
Location: Air Technical Training Center, Lakehurst, NJ.
Length: 4 weeks (140 hours).
Exhibit Dates: 8/66–12/68.
Objectives: To train aerographer's mates in the operation and use of meteorological satellites.
Instruction: Lectures and practical exercises in the operation of automatic picture transmission terminal ground equipment and the interpretation and application of the received data, including equipment and procedure, operational satellite system, data acquisition and gridding, operation of APT terminal ground equipment, extraction and use of APT data, synoptic application, and operational use of APT equipment.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (6/74).

NV-1304-0007

Ocean Systems Technician Equipment Maintenance

Course Number: A-130-0241.
Location: Fleet Anti-Submarine Warfare Training Center, Atlantic, Norfolk, VA.
Length: 23 weeks (920 hours).
Exhibit Dates: 1/81–Present.
Objectives: To train personnel in the operation, theory, maintenance and troubleshooting of a variety of computer subsystems and peripherals.
Learning Outcomes: Upon completion of this course, the student will be able to: (1) perform diagnostic testing and repair of computer systems, (2) test and repair computer peripherals including terminals, disk drives, printers and multiplexers, (3) perform routine maintenance on computers and peripherals.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in computer system troubleshooting, maintenance and repair, 3 in computer peripheral devices (8/83).

NV-1304-0008

Ocean Systems Operational Procedures Officer

Course Number: S-2G-0405.
Location: Readiness Training Facility, Virginia Beach, VA.
Length: 4 weeks (160 hours).
Exhibit Dates: 1/89–Present.
Learning Outcomes: Upon completion of the course the student will be able to oversee the integrated undersea surveillance system.
Instruction: Lectures and practical exercises on topics specific to the surveillance system including communications, data and signal processing equipment interface, and watch coordination. Only units 1, 5, and 6 were evaluated; the remainder of the course is classified.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/90).

NV-1304-0009

Ocean Systems Operational Procedures Enlisted

Course Number: S-210-0400.
Location: Readiness Training Facility, Virginia Beach, VA.
Length: 4 weeks (160 hours).
Exhibit Dates: 1/89–Present.
Learning Outcomes: Upon completion of the course the student will be able to operate a specific undersea suveillance system.
Instruction: Lectures and practical exercises related to the operation of the undersea surveillance system. Topics include signal flow, operations, message receipt and routing, and plot and status board operations. Only units 1, 5, and 6 were evaluated; the remainder of the course is classified.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/90).

NV-1304-0010

Ocean Systems Advanced Acoustics

Course Number: S-210-0401.
Location: Readiness Training Facility, Virginia Beach, VA.
Length: 14 weeks (560 hours).
Exhibit Dates: 5/87–Present.
Learning Outcomes: Upon completion of the course the student will be able to tactically deploy signal and data processing equipment and apply basic mathematical models (logarithms and Fourier series) to the analysis of sound wave propagation in sea water.
Instruction: Lectures and practical exercises in mathematics, basic oceanography, equipment signal flow, automated data processing, and acoustic signal analysis. Topics include statistical means, standard deviation, Fourier series, characteristics of sea water, and sound wave propagation in sea water. Only units 1-3 were evaluated. The remaining units were classified.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in technical mathematics; in the upper-division baccalaureate category, 3 semester hours in ocean acoustics (3/90).

NV-1401-0001

Disbursing Clerk (Pay Records Maintenance) Class C

Course Number: A-542-0012.
Location: Naval School Command, Norfolk, VA.
Length: 2 weeks (60 hours).
Exhibit Dates: 11/71–1/82.
Objectives: To provide enlisted personnel with the knowledge and skills involved in the maintenance of pay records.
Instruction: For this course after 1/82 see NV-1401-0004. Lectures and practical exercises in the use of the calculator; computation of pay; items of pay and allowances; types of deductions and collections; and corrections, opening, closing, and transmittal of pay records.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in clerical procedures (2/74).

NV-1401-0002

Disbursing Clerks, Class A

Course Number: A-542-0011.
Location: *Version 1:* Naval Technical Training Center, Meridian, MS; *Version 2:* Naval Schools Command, Newport, RI; Naval Schools, Supply, San Diego, CA.
Length: *Version 1:* Self-paced 8 weeks (318 hours). *Version 2:* 9–11 weeks (330–360 hours).
Exhibit Dates: *Version 1:* 1/82–Present. *Version 2:* 12/59–12/68.
Objectives: To train enlisted personnel to perform the duties of naval disbursing clerks.
Instruction: *All Versions:* Lectures and practical experience in basic naval funds disbursement procedures; accounting; pay and allowances; insurance, income tax, and savings deposits; vouchers; public funds; and typing and correspondence.
Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 6 semester hours in clerical finance, 3 in typing (6/84). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in clerical finance and credit in typing on the basis of institutional evaluation (12/68).

NV-1401-0003

Automated Supply and Accounting Systems Afloat (AN/UYK-5(V))

Course Number: A-8B-0019.
Location: Supply Corps School, Athens, GA.
Length: 2 weeks (65 hours).
Exhibit Dates: 7/72–12/81.
Objectives: To train supply officers in automated supply systems afloat.
Instruction: Lectures and practical exercises in automated supply systems afloat, including systems operation, automatic data processing functions not related to supply and accounting, and resources utilization.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (7/74).

NV-1401-0004

Joint Uniform Military Pay System (JUMPS) Pay Entitlements and Procedures

Course Number: A-542-0012.
Location: Fleet Training Center, Norfolk, VA; Service School Command, San Diego, CA.
Length: 2 weeks (80 hours).
Exhibit Dates: 2/82–Present.
Objectives: Upon completion of the course the student will be able to maintain military pay records to include leave and earnings statements, personnel financial records, and pay entitlements.
Instruction: Lectures and performance tests including the filling-out and maintaining of pay forms and transfers.
Credit Recommendation: Credit is not recommended because of the military specific nature of the course (12/89).

NV-1401-0005

Senior Disbursing Clerk (DK) Enlisted Refresher

Course Number: A-542-0015.
Location: Fleet Training Center, Norfolk, VA; Service School Command, San Diego, CA.
Length: 5 weeks (240 hours).
Exhibit Dates: 4/84–Present.
Learning Outcomes: Upon completion of the course the student will perform duties of a disbursing clerk in processing travel and payments, disbursing military pay and allowances, processing financial returns, and maintaining the cashbook.

Instruction: Classroom lectures, discussions, workbook exercises, quizzes, and a final exam on the following topics: organization of the Navy pay and accounting system including the supporting publications, public vouchers, foreign currency conversion, financial returns, automated military pay disbursing system, military leave, and travel payments and allowances.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in accounting procedures (military pay and allowances) (12/89).

NV-1402-0001

DATA PROCESSING TECHNICIAN, CLASS C, SYSTEMS ANALYSIS AND DESIGN
(Data Processing Systems Analysis, Class C)

Course Number: A-532-0019; A-532-019.
Location: Service School Command, San Diego, CA.
Length: 4 weeks (110-114 hours).
Exhibit Dates: 12/68-1/88.
Objectives: To provide experienced programmers with basic training in systems analysis and design.
Instruction: Lectures and practical experience in data processing systems analysis, including data communication concepts; data gathering and data analysis; system requirements specification; system design fundamentals; technical and economic feasibility study, manpower planning; system documentation; conversion, evaluation, and maintenance planning; and program evaluation and review techniques.
Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in business systems analysis (2/74).

NV-1402-0002

1. AN/USQ-20 BASIC PROGRAMMING
2. NAVAL TACTICAL DATA SYSTEM (NTDS) BASIC PROGRAMMER (OPERATIONAL)

Course Number: K-2G-1020.
Location: Fleet Anti-Air Warfare Training Center, San Diego, CA.
Length: *Version 1:* 8 weeks (233 hours). *Version 2:* 7 weeks (210 hours).
Exhibit Dates: *Version 1:* 4/68-1/88. *Version 2:* 9/64-3/68.
Objectives: To train personnel in the basic principles of programming and operating the NTDS unit computer.
Instruction: Practical application of principles of programming, basics of digital computers, flowcharting, unit computer assembler programming techniques.
Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 5 semester hours in computer programming (2/74); in the upper-division baccalaureate category, 4 semester hours in computer programming (12/68). *Version 2:* In the upper-division baccalaureate category, 4 semester hours in computer programming (12/68).

NV-1402-0003

NAVAL TACTICAL DATA SYSTEMS (NTDS)—DATA COLLECTION AND DISPLAY (BASIC ENLISTED)

Course Number: J-2G-352; J-221-352.
Location: Fleet Combat Directions Systems Training Center Atlantic, Dam Neck, VA.
Length: 3 weeks (105 hours).
Exhibit Dates: 1/73-1/88.
Objectives: To provide enlisted personnel with the fundamental knowledge and skills to perform data input functions.
Instruction: Operational experience in NTDS data links and communication procedures, data input console and program functions, and data display equipment.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/74).

NV-1402-0004

NAVAL TACTICAL DATA SYSTEMS (NTDS) INTERMEDIATE PROGRAMMER COURSE (CS-1)

Course Number: K-2G-1026.
Location: Fleet Anti-Air Warfare Training Center, San Diego, CA.
Length: 3 weeks (86-90 hours).
Exhibit Dates: 3/66-1/88.
Objectives: To teach military or civilian personnel with previous programming experience the use of CS-1 compiling system language.
Instruction: Lectures and practical exercises on principles and concepts, programming techniques, and data design operations.
Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in computer programming (2/74).

NV-1402-0005

NAVAL TACTICAL DATA SYSTEM (NTDS)—DATA UTILIZATION—BASIC
(NTDS Data Utilization)

Course Number: J-2G-0093; K-2G-0038; K-2G-3532; J-221-3532; J-2G-353; J-221-353.
Location: Fleet Combat Training Center Pacific, San Diego, CA; Fleet Combat Training Center Atlantic, Dam Neck, Virginia Beach, VA.
Length: 3 weeks (105 hours).
Exhibit Dates: 2/73-1/88.
Objectives: To provide officers and senior enlisted personnel with fundamental knowledge and skills as related to the overall operation of the Naval Tactical Data System, stressing performance on the data user console.
Instruction: Lectures and practical exercises in NTDS fundamentals; data display equipment; data input console functions; data user console functions; data links and communications procedures; operational program functions; related equipment/systems.
Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (6/86).

NV-1402-0006

NAVAL TACTICAL DATA SYSTEMS (NTDS) DATA UTILIZATION
(Naval Tactical Data Systems (NTDS) Evaluator/Supervisor)

Course Number: K-2G-1010.
Location: Fleet Anti-Air Warfare Training Center, San Diego, CA.
Length: 3-4 weeks (104-136 hours).
Exhibit Dates: 12/68-1/88.
Objectives: To train personnel in the operation of the naval technical data system.
Instruction: Introduction to digital computers; block diagramming; data processing equipment; input, user, and system functions; and operational mock-up.
Credit Recommendation: In the upper-division baccalaureate category, credit in computer principles on the basis of institutional evaluation (12/68).

NV-1402-0007

IBM SYSTEM 360 COMPUTER SYSTEM PROGRAMMING (COBOL LANGUAGE), CLASS C

Course Number: A-532-0015.
Location: Data Processing Technician Class C School, San Diego, CA.
Length: 4 weeks (102 hours).
Exhibit Dates: 7/71-1/88.
Objectives: To teach data processing technicians the concepts and techniques of coding programs in COBOL.
Instruction: Lectures and practical exercises in drawing program flow charts, COBOL language, program structures, and debugging programs.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in computer programming (2/74).

NV-1402-0008

FLEET DATA PROCESSING OFFICERS TRAINING

Course Number: A-8B-0016.
Location: Naval Supply Corps School, Athens, GA.
Length: 3-4 weeks (120-180 hours).
Exhibit Dates: *Version 1:* 6/83-Present. *Version 2:* 1/72-5/83.
Objectives: To train officers in ADP operations management, analysis, and programming.
Learning Outcomes: Upon completion of the course, the student will be able to: (1) match computer concepts with appropriate computer terminology, (2) develop a flowchart of at least 25 symbols, (3) write a computer program using the BASIC language, (4) manage a computer center including managing resources, supervising personnel and providing services to users. *Version 2:* Lectures and practical exercises in operations management, flow charting, design of programs, and computer language (COBOL).
Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to data processing (7/83). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in data processing principles (2/74).

NV-1402-0009

CMS-2 PROGRAMMING (CP-642 A&B/USQ-20)

Course Number: J-7E-3772; J-532-3772.
Location: Fleet Anti-Air Warfare Training Center, Dam Neck, VA.
Length: 4 weeks (140 hours).
Exhibit Dates: 12/71-Present.
Objectives: To train experienced computer programmers to use the CMS-2 compiling system for automatic programming on CP-642 A&B/USQ-20 computers.
Instruction: Lectures and practical exercises in CMS-2 compiler language and operations; CS-1, CMS-2 differences and similarities; and automatic data processing programming.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in computer programming (2/74).

NV-1402-0010

DD-963 NAVAL TACTICAL DATA SYSTEMS (NTDS) DATA INPUT

Course Number: J-221-0075; K-221-0075.

Location: Fleet Combat Training Center, Dam Neck, VA; Fleet Combat Training Center, Pacific, San Diego, CA.
Length: 2-3 weeks (70-105 hours).
Exhibit Dates: 9/77-Present.
Objectives: To train selected enlisted personnel in the skills related to the data collection area of the DD963 Naval Tactical Data System.
Instruction: Classroom lectures and laboratory exercises in NTDS equipment, input functions, user functions, data links, and mock-up/chalk talk.
Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (6/86).

NV-1402-0011

Digital Fundamentals
(Computer Basics Class C Electronics)

Course Number: None.
Location: Electronics Technician School, Great Lakes, IL.
Length: 8 weeks (240 hours).
Exhibit Dates: 10/62-1/78.
Objectives: To train personnel in computer basics.
Instruction: Lectures and practical exercises in digital, analog, and hybrid computer fundamentals and concepts, including fundamentals of digital computers and data processing techniques, number systems, programming, Boolean algebra, arithmetic operations, control, magnetics, semiconductor logic, analog computer fundamentals, analog components and mathematical applications, analog mechanization, hybrid computer fundamentals, conversion techniques, digital differential analyzer, and algebra.
Credit Recommendation: In the vocational certificate category, 2 in switching circuits, 2 in analog circuits (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in data processing principles, 1 in switching circuits, 1 in analog circuits (4/74); in the upper-division baccalaureate category, 3 semester hours in computing science (12/68).

NV-1402-0012

Digital and Analog Computer
Fundamentals
(Computer Basics Class C Electronics)

Course Number: None.
Location: Electronics Technician School, Great Lakes, IL.
Length: 14 weeks (420 hours).
Exhibit Dates: 10/62-12/68.
Objectives: To train personnel in computer basics.
Instruction: Lectures and practical exercises in digital, analog, and hybrid computer fundamentals and concepts, including fundamentals of digital computers and data processing techniques, number systems, programming, Boolean algebra, arithmetic operations, control, magnetics, semiconductor logic, analog computer fundamentals, analog components and mathematical applications, analog mechanization, algebra, hybrid computer fundamentals, conversion techniques, and digital differential analyzer.
Credit Recommendation: In the vocational certificate category, 3 in switching circuits, 2 in analog circuits (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in data processing principles, 2 in switching circuits, 1 in analog circuits (4/74); in the upper-division baccalaureate category, 5 semester hours in computing science (12/68).

NV-1402-0013

Digital, Analog, and Hybrid
Computer Fundamentals
(Computer Basics Class C Electronics)

Course Number: None.
Location: Electronics Technician School, Great Lakes, IL.
Length: 16 weeks (480 hours).
Exhibit Dates: 10/62-12/68.
Objectives: To train personnel in computer basics.
Instruction: Lectures and practical exercises in digital, analog, and hybrid computer fundamentals and concepts, including fundamentals of digital computers and data processing techniques, number systems, programming, Boolean algebra, arithmetic operations, control, magnetics, semiconductors, logic, analog computer fundamentals, analog components and mathematical applications, algebra, analog mechanization, hybrid computer fundamentals, conversion techniques, and digital differential analyzer.
Credit Recommendation: In the vocational certificate category, In the vocational certificate category, 2 semester hours in analog circuits (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in data processing principles, 2 in switching circuits and 1 in analog circuits (4/74); in the upper-division baccalaureate category, 6 semester hours in computing science (12/68).

NV-1402-0014

Computer Programming Orientation

Course Number: K-2G-1021.
Location: Fleet Anti-Air Warfare Training Center, San Diego, CA.
Length: 4 weeks (120 hours).
Exhibit Dates: 10/65-12/68.
Objectives: To teach military, civilian, and contractor personnel the basic principles of programming the NTDS digital computer, the CS-1 compiling system, and the concepts of modular programming.
Instruction: Lectures on the basics of digital computers; principles of programming; NTDS unit computer; principles of operation and programming techniques; compiling language (CS-1); modular programming.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer programming (2/74); in the upper-division baccalaureate category, 2 semester hours in computer management (12/68).

NV-1402-0015

Basic Programming Orientation for
Middle Management

Course Number: K-532-0001.
Location: Fleet Anti-Air Warfare Training Center, San Diego, CA.
Length: 2 weeks (56 hours).
Exhibit Dates: 11/71-1/88.
Objectives: To train management personnel in the basic principles of digital computer programming in machine code, direct code, and source language, and in the operational characteristics of the NTDS format computer.
Instruction: Lectures and practical exercises in orientation to programming; arithmetic of programming; programming techniques; program languages and methods of use; equipment; and practical programming.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in computer programming (2/74).

NV-1402-0016

CP-967/UYK Computer Maintenance
(Electronics Technician, Class
C1)

Course Number: A-150-0081.
Location: Service School Command, San Diego, CA.
Length: 6 weeks (180 hours).
Exhibit Dates: 10/70-1/88.
Objectives: To train electronics technicians familiar with digital principles to maintain and repair the 3-M System's CP-967/UYK computer and be able to operate the system in all modes.
Instruction: Lectures and practical exercises on operation of computer, preventive maintenance, troubleshooting, replacement of malfunctioning components, and circuitry of components.
Credit Recommendation: In the vocational certificate category, 4 semester hours in digital computer maintenance (11/77); in the lower-division baccalaureate/associate degree category, 2 semester hours in digital computer maintenance (11/77).

NV-1402-0017

CMS-2 Compiler Language
Programming

Course Number: K-532-0003.
Location: Fleet Anti-Air Warfare Training Center, San Diego, CA.
Length: 5 weeks (150 hours).
Exhibit Dates: 11/72-1/88.
Objectives: To train military and civilian personnel to write, execute, and interpret computer programs in assembler- and compiler-level languages.
Instruction: Lectures on assembly and compiler languages, and practical programming procedures and practices.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in computer programming (2/74).

NV-1402-0018

Data Analysis Class C1
(Data Analysis, Class C)
(Aviation Maintenance Data Analysis,
Class C)

Course Number: *Version 1:* C-516-2011. *Version 2:* None. *Version 3:* None.
Location: Air Technical Training Center, Memphis, TN; Air Technical Training Center, Millington, TN.
Length: *Version 1:* 4-6 weeks (174-200 hours). *Version 2:* 6 weeks (232 hours). *Version 3:* 7 weeks (272-280 hours).
Exhibit Dates: *Version 1:* 2/75-Present. *Version 2:* 4/70-1/75. *Version 3:* 9/64-3/70.
Objectives: To train enlisted personnel and officers in the field of maintenance data analysis.
Instruction: *All Versions:* Lectures on graphic presentations, data documentations, descriptive and inferential statistics, control charts, work measurement, linear correlation, and analytical projection. *Version 2:* Includes lectures on maintenance data documentations, data extraction, algebra and time series. *Version 3:* Includes lectures on maintenance data documentations, data extraction, algebra and time series.
Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in business statistics (9/89). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in business statistics (2/74). *Version 3:* In the upper-division baccalaure-

ate category, 4 semester hours in managerial statistics (12/68).

NV-1402-0019

Computer Programming AN/USQ-20 Machine Language - Basic

(AN/USQ-20 Machine Language Programming)

Course Number: J-532-0002; K-532-0002.

Location: Fleet Anti-Air Warfare Training Center, San Diego, CA; Fleet Combat Training Center, Dam Neck, Virginia Beach, VA.

Length: 5 weeks (142-175 hours).

Exhibit Dates: *Version 1:* 1/84-Present. *Version 2:* 11/72-12/83.

Objectives: To train military and civilian personnel to write, execute, and interpret computer programs written in either mnemonic or machine-formatted coding.

Instruction: *Version 1:* This is an entry level programming course designed to expose students to the fundamentals of machine language programming. Lectures and laboratory exercises in the arithmetic of computers, programming techniques and machine instruction for a 30-bit word AN/USQ-20 computer. *Version 2:* Lectures and practical exercises in arithmetic of computers; programming techniques; machine instruction for CP-642B, CMS-2 direct codes; hardware; practical programming.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in machine language programming (9/84). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in computer programming (2/74).

NV-1402-0020

DD-963 Basic Circuit Concepts for Gas Turbine Controls, Class C1

Course Number: A-652-0134.

Location: Service School Command, Great Lakes, IL.

Length: 2-3 weeks (90-106 hours).

Exhibit Dates: *Version 1:* 2/82-8/87. *Version 2:* 1/77-1/82.

Objectives: To provide a basic understanding of devices and logic circuit operations for computer control systems.

Instruction: For this course after 8/87 see NV-1715-1294. *Version 1:* Lectures and practical exercises in devices and logic circuit operations for computer control systems including base conversion, TTL and RDL, logic gates and basic digital circuits. *Version 2:* Major areas of instruction include external circuit analysis to identify analog computer systems components, interpretation of basic logic circuit diagrams in terms of Boolean expressions and Veitch diagrams, testing and troubleshooting basic logic circuits and combinations.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in computer logic (10/83). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in computer logic (1/82).

NV-1402-0021

Basic Programming Concepts, Class C

Course Number: A-532-0012.

Location: Data Processing Technician Class C School, San Diego, CA.

Length: 3 weeks (110 hours).

Exhibit Dates: 7/71-1/88.

Objectives: To train enlisted personnel in the general concepts of digital computers and flow charting.

Instruction: Lectures and practical exercises in data representation, central processing unit design, input/output, and introduction to software, flow charting, and program documentation.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in digital computer concepts (3/72).

NV-1402-0022

Data Processing Technician, Class A

Course Number: *Version 1:* A-531-0016. *Version 2:* A-531-016.

Location: Service School Command, San Diego, CA; Service School Command, Bainbridge, MD.

Length: *Version 1:* 12 weeks (360 hours). *Version 2:* 12-16 weeks (360-380 hours).

Exhibit Dates: *Version 1:* 2/71-1/86. *Version 2:* 1/68-1/71.

Objectives: To train enlisted personnel in the operation of electric accounting machines and AN/UYK-5(v) computers.

Instruction: Lectures and operating experience in data processing equipment, including card punch, sorter, interpreter, reproducing punch, collator, accounting machine, and digital computers.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 4 semester hours in electrical laboratory (2/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (12/68). *Version 2:* In the upper-division baccalaureate category, 4 semester hours in unit record and computer operation (12/68).

NV-1402-0023

Naval Tactical Data System (NTDS) (Data Utilization)

(DD-963 Naval Tactical Data System (NTDS) Data Utilization)

Course Number: J-2G-0074; K-2G-0074.

Location: Fleet Combat Training Center, Atlantic, Dam Neck, VA; Fleet Combat Training Center, Pacific, San Diego, CA.

Length: 2-3 weeks (70-105 hours).

Exhibit Dates: 8/77-Present.

Objectives: To train officers and senior petty officers in the current operating procedures, capabilities, and limitations of the DD963 Naval Tactical Data System.

Instruction: Classroom lectures and laboratory exercises in NTDS equipment, user function, input functions, data links, and mock-up/chalk talk. Includes functional capabilities and front panel controls of the tactical data system and subsystems such as I/O console, monitors, decoders, weapon control panel, and data links. Proper operating procedures are stressed along with the interaction with and responsibilities of other weapon control personnel.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (6/86).

NV-1402-0024

Central Navigation Computer (CNC) (Processor II)

Course Number: A-193-0337; A-193-0248; F-193-090.

Location: *All Versions:* FBM Submarine Training Center, Charleston, SC. *Version 1:* Submarine School Groton, New London, CT.

Length: 3 weeks (90-119 hours).

Exhibit Dates: *Version 1:* 1/75-Present. *Version 2:* 11/72-12/74.

Objectives: To train navigation electronics technicians to understand and perform advanced maintenance on the CP-890 (CNC) digital computer instruction set implementation logic.

Instruction: *All Versions:* Lectures and practical exercises in circuitry timing considerations and logic analysis on the CP-890 (CNC) computer, including breakpoint feature, keyboard/keyset communication, monitor clock, memory lockout and executive mode features. Logical implementation of interrupts, jumps, program faults, shift instructions, repeat, multiply, divide, square root, and floating-point instructions is also included. *Version 1:* Laboratory exercises include implementation of malfunctions, fault isolation and repair procedures. *Version 2:* Course is highly specialized; however, many of the concepts studied also apply to commercial computers.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 2 semester hours in computer organization (instruction set implementation)(3/81). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in computers or computer science (3/74).

NV-1402-0025

Computer CP-890A, B/UYK Processor Maintenance I

(Central Navigation Computer (Processor I))

Course Number: A-193-0336; A-193-0247; F-193-089.

Location: Trident Training Facility, Bangor Bremerton, WA; FBM Submarine Training Center, Charleston, SC; Naval Submarine School Groton, New London, CT.

Length: *Version 1:* 3 weeks (114 hours). *Version 2:* 2 weeks (60 hours).

Exhibit Dates: *Version 1:* 1/75-6/83. *Version 2:* 11/72-12/74.

Objectives: To train navigation electronics technicians to understand, maintain and repair digital navigation computers, processors and memories.

Instruction: For this course after 6/83 see NV-1402-0141. *All Versions:* Lectures and practical exercises in functional operation and circuit analysis of computer power circuitry; functional operation and logic analysis of timing and control, main memory, and NDRO memory circuits; timing considerations and logic analysis of a processor, indirect sequences, and all read-and-store class instructions. *Version 1:* The laboratory exercises include operational and self test features, interpretation of malfunctions and fault isolation and repair procedures. *Version 2:* The course is highly specialized; knowledge acquired by student is applicable only to special-purpose military computers.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 2 semester hours in computer organization (CPU and memory) (3/81). *Version 2:* Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1402-0026

Central Navigation Computer (CNC) (Input/Output)

Course Number: A-193-0249; F-193-091.

Location: FBM Submarine Training Center, Charleston, SC; Naval Submarine School Groton, New London, CT.

Length: 3 weeks (90 hours).

Exhibit Dates: 11/72-Present.

Objectives: To train navigation electronics technicians to understand and maintain CP-890/UYK digital navigation computers input/output sections.

Instruction: Lectures and practical exercises in functions of the CNC input/output controllers and the function of all input/output circuits; essential events and their timing relationships for all input/output operations; and logic circuits for input/output instruction executions. Laboratory exercises cover operational and self-test features, interpretation of malfunctions, fault isolation and repair procedures.

Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in computer organization (I/O Channels)(3/81).

NV-1402-0027

DIGITAL PRINCIPLES AND TECHNIQUES (ELECTRONICS TECHNICIAN, CLASS C1)

Course Number: A-100-0019; A-100-0021.

Location: Service School Command, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: Self-paced 2-5 weeks (168-200 hours).

Exhibit Dates: 7/70-1/88.

Objectives: To provide enlisted personnel with training in digital computer fundamentals.

Instruction: Lectures and practical exercises in computer block diagrams; number systems; binary, octal, and hexidecimal arithmetic; Boolean algebra; logic equation simplification; digital counters and registers; input/output devices; storage devices; and Bi-Tran-Six programming.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in digital principles and techniques and 1 in logic laboratory (11/77).

NV-1402-0028

AN/UYK-5(V) (3-M SYSTEM) OPERATOR, CLASS C

Course Number: A-531-011.

Location: Naval Training Center, San Diego, CA.

Length: 3-6 weeks (90-180 hours).

Exhibit Dates: 12/68-1/88.

Objectives: To train data processing technicians to operate AN/UYK-5(V) computer systems.

Instruction: Lectures and practical exercises in computer concepts, number systems, machine language instruction, system operation, and maintenance procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in computer operation on the basis of institutional evaluation (12/68).

NV-1402-0029

IOIC MAINTENANCE OFFICER

Course Number: D-7E-010.

Location: Reconnaissance Attack Squadron Three, Albany, GA.

Length: 6 weeks (240 hours).

Exhibit Dates: 5/69-1/88.

Objectives: To train warrant officers who have backgrounds in digital data systems and electronic data processing to operate and administer the Integrated Operational Intelligence Center (IOIC) and to supervise the maintenance of associated equipment.

Instruction: Lectures and practical exercises in the function, operation, and supervision of the Integrated Operational Intelligence Center, including IOIS systems cross-training, maintenance administration, basic computer concepts, software and basic EDP equipment operation, functions of data systems technicians, and fleet operational briefings.

Credit Recommendation: In the vocational certificate category, 1 semester hour in data processing (4/74); in the lower-division baccalaureate/associate degree category, credit in data processing on the basis of institutional evaluation (4/74).

NV-1402-0030

UNIVAC 1218/418/490-CP-789/UYK-5(V) SYSTEM PROGRAMMING COURSE (COBOL LANGUAGE), CLASS C

Course Number: A-532-0014; A-7E-0014.

Location: Data Processing Technician, Class C School, San Diego, CA.

Length: 4 weeks (96 hours).

Exhibit Dates: 6/71-1/88.

Objectives: To train data processing technicians in program coding concepts and techniques in COBOL for the AN/UYK-5(V) computer system.

Instruction: Lectures and practical exercises in COBOL history, basic elements, program structure and divisions, verbs, and tape programming; data descriptions; procedural verbs; table handling; special tape functions; and programming applications.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in computer programming (4/74).

NV-1402-0031

PROGRAMMING, NAVAL TACTICAL DATA SYSTEMS (NTDS) OPERATIONAL (OFFICER AND ENLISTED)

Course Number: J-532-0375; J-7E-3752; J-532-3752.

Location: Fleet Combat Training Center, Dam Neck, VA.

Length: 3 weeks (105-120 hours).

Exhibit Dates: *Version 1:* 7/82-Present. *Version 2:* 10/72-6/82.

Objectives: To train experienced programmers in modulator programming techniques.

Instruction: *Version 1:* Lectures and laboratory exercises in the historical development of the navy tactical data system network including modular program formats to interface with the network covering proper data format, data sealing procedures, message structure and I/O procedures. Two thirds of the course is devoted to practical exercises using the CMS-2(Q) compiler language. *Version 2:* Lectures in data design, message handling, automatic sealing, coding rules and documentation, and practical exercises in data design setups, programming, debugging techniques, and module documenting.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 1 semester hour in compiler language programming (9/84). *Version 2:* In the upper-division baccalaureate category, 1 semester hour in computer programming (4/74).

NV-1402-0032

NAVAL TACTICAL DATA SYSTEM (NTDS) EVALUATOR/SUPERVISOR (USER) CLASS O/C

Course Number: Not available.

Location: Air Technical Training Center, Glynco, GA.

Length: 3 weeks (112 hours).

Exhibit Dates: 5/71-12/75.

Objectives: To train officer and enlisted personnel in Naval Tactical Data System (NTDS) operations.

Instruction: Lectures and laboratories in NTDS familiarization; digital computers and programming; system equipment operation; input functions and user functions; mockup training simulation exercises in input, user, and mock warfare; and related systems and functions, including on-line and off-line programming and airborne tactical data system operation.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (4/74).

NV-1402-0033

PROGRAMMING, DIGITAL COMPUTER CP-642A&B/USQ-20 (MACHINE LANGUAGE AND CS-1 ASSEMBLY LANGUAGE)

Course Number: J-7E-3762; J-532-3762.

Location: Fleet Anti-Air Warfare Training Center, Dam Neck, VA.

Length: 7 weeks (175 hours).

Exhibit Dates: 12/71-1/72.

Objectives: To train officers and enlisted personnel in digital computer programming and NTDS unit computer operational characteristics.

Instruction: Lectures and practical exercises in digital computer programming and operational characteristics, including octal and binary numbering systems, Boolean algebra, programming concepts and techniques, machine language, assembly programming, digital computer operation, external equipment communications, debugging and testing procedures, and practical programming applications.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in computer programming (4/74).

NV-1402-0034

1. DATA BASE MANAGEMENT—LCC AMPHIBIOUS SUPPORT INFORMATION SYSTEM LANGUAGE—OPERATOR (LCC Amphibious Support Information System Operator)
2. AMPHIBIOUS SUPPORT INFORMATION SYSTEM OPERATOR

Course Number: *Version 1:* K-221-0042; K-000-0042. *Version 2:* K-221-1012.

Location: Fleet Anti Air Warfare Training Center, San Diego, CA.

Length: *Version 1:* 2 weeks (62 hours). *Version 2:* 3 weeks (88 hours).

Exhibit Dates: *Version 1:* 2/75-1/88. *Version 2:* 7/72-1/75.

Objectives: To train personnel to operate and supervise display information systems.

Instruction: Lectures in amphibious support information system operation, block-diagram analysis, data base generation, message structure, QUEST language, command and control mockup demonstrations, and system control operator functions.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in data processing principles (6/77). *Version 2:* In the upper-division baccalaureate category, 1 semester hour in data processing principles (4/74).

NV-1402-0035

STORAGE AND RETRIEVAL DATA

PROCESSING (DP) OPERATOR AND PROGRAMMER
(IOIC Storage and Retrieval Operator/Officer Course)

Course Number: D-150-017.

Location: Naval Intelligence Processing System Training Facility, Albany, GA; Reconnaissance Attack Squadron Three, Albany, GA.

Length: 10-11 weeks (385-400 hours).

Exhibit Dates: 1/69-1/88.

Objectives: To train data processing technicians in data base storage, retrieval, and manipulation, and associated equipment utilization.

Instruction: Lectures and practical exercises in computer programs and control panel wiring, electronic data processing equipment operation, electrical accounting machines, file maintenance procedures, basic intelligence and data base, CSDS operations and programming, photographic interpretation and equipment operation, NAR programs, and information retrieval and library maintenance subsystems operation.

Credit Recommendation: In the upper-division baccalaureate category, 4 semester hours in data processing principles (4/74).

NV-1402-0036

AIRBORNE TACTICAL DATA SYSTEM OPERATIONS, CLASS O

Course Number: Not available.

Location: Naval Air Technical Training Center, Glynco, GA.

Length: 12-19 weeks (480-744 hours).

Exhibit Dates: 10/65-12/75.

Objectives: To train officers to operate the airborne tactical data system.

Instruction: Lectures and practical exercises in the operation of the airborne tactical data system, including data link systems, aircraft systems, system sensors, operational systems, operator and team training, and airborne training.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (4/74).

NV-1402-0037

NAVAL TACTICAL DATA SYSTEM OPERATIONS, CLASS O

Course Number: C-2G-2018.

Location: Naval Air Technical Training Center, Glynco, GA.

Length: *Version 1:* 4-13 weeks (160-508 hours); *Version 2:* 6 weeks (228 hours).

Exhibit Dates: *Version 1:* 3/69-12/75. *Version 2:* 8/66-2/69.

Objectives: To train officers to operate the Naval Tactical Data System Shipboard Combat Information Center.

Instruction: *All Versions:* Lectures and practical exercises in the operation of the Naval Tactical Data System Shipboard Combat Information Center, including number systems, computer theory; tactics and anti-air warfare; data system display consoles, universal introducers, auxiliary readouts, data links, system-monitoring panel, and associated equipment. *Version 2:* Includes an introduction to computer programming, integrated operations devices, computer instructions, and use of peripheral equipment.

Credit Recommendation: *Version 1:* Credit is not recommended because of the military-specific nature of the course (4/74). *Version 2:* In the lower-division baccalaureate/associate degree category, 1 semester hour in computer principles (4/74); in the upper-division baccalaureate category, 2 semester hours in computer principles (12/68).

NV-1402-0038

BASIC COMPUTER THEORY
(Computer Theory, Basic)

Course Number: A-100-0032.

Location: Naval Submarine School, New London, CT.

Length: Self-paced average 2-3 weeks (60-90 hours).

Exhibit Dates: 9/72-1/88.

Objectives: To present basic computer and digital concepts to individuals who have no prior knowledge in this area.

Instruction: Self-paced multimedia instruction in digital fundamentals and programming, logic gates, symbols, truth tables, Boolean algebra, Venn diagrams, and tracing of logic levels in a circuit. Electronic circuits that produce ATL, TTL, ECL, and MOS logic gates are pictured and functionally described. Number systems and flip-flop operations are presented. Registers, counters, adder/subtractor circuits are shown and their operation and use described. Computer timing concepts and data storage techniques are presented. Basic computer operation and programming concepts, including flow charting and programming a 6-bit computer in machine language, are given. Because there is no laboratory, the course is most suitable for computer science students.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer science (9/77).

NV-1402-0039

NAVIGATION TECHNICIAN TYPE I SSN-593 CLASS
(Mk 2 Mod 1 Ship's Inertial Navigation System (SINS) Maintenance)

Course Number: A-193-0035; F-193-019.

Location: Submarine School, Groton, New London, CT.

Length: 19 weeks (570 hours).

Exhibit Dates: *Version 1:* 1/79-Present. *Version 2:* 1/70-12/78.

Objectives: To train electronics technicians to operate, monitor, evaluate, and maintain the Mk 2 Mod 1 Ship's Inertial Navigation System (SINS).

Instruction: *Version 1:* This is now a pipeline course composed of the following three components: Loran AN/WRN-5 Combined Maintenance (A-193-0054) NV-1715-0913, MK 2 Mod 1 Ships Inertial Navigation System (SINS) Combined Maintenance (A-193-0355) NV-1402-0039 and a one week course which did not meet our minimum length requirement for evaluation. *Version 2:* Lectures and practical exercises in digital computer fundamentals, Verdan computer operation and maintenance, basic inertial theory, and SINS operation and maintenance.

Credit Recommendation: *Version 1:* Please refer to the individual exhibits as noted above for our credit recommendations (3/81). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in data processing principles (3/74).

NV-1402-0040

P-3C CP-901/ASQ-114 COMPUTER ORGANIZATIONAL MAINTENANCE

Course Number: C-102-3578.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.

Length: 8 weeks (320 hours).

Exhibit Dates: 3/71-1/88.

Objectives: To train avionics personnel to program and maintain P-3C CP-901/ASQ-114 digital computers.

Instruction: Lectures and practical exercises in CP-901/ASQ-114 P-3C digital computer programming and maintenance, including theory of operation and troubleshooting procedures; basic computer description and repertoire of instructions; and assembler language, including arithmetic, logical, and control commands.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in computer programming (4/74).

NV-1402-0041

DATA SYSTEMS TECHNICIAN (SHIPBOARD TACTICAL DATA SYSTEMS OFFICER AND SENIOR TECHNICIAN MAINTENANCE) CLASS C
(Data Systems Technician (Shipboard Tactical Data Systems Senior Technician) Class C)
(Shipboard Tactical Data Systems Maintenance)
(Tactical Data Systems Maintenance Officer/Program Officer)

Course Number: A-150-0069; A-4B-0023.

Location: Schools Command, Mare Island, CA.

Length: 26 weeks (780 hours).

Exhibit Dates: 1/70-1/88.

Objectives: To train data systems technicians to test, evaluate, and maintain tactical data systems.

Instruction: Lectures and practical exercises in basic programming; Naval Tactical Data System (NTDS) computers; peripheral equipment, data link equipment, and programmed tests; operational program analysis; data processing systems; and administrative procedures, including records and reports and safety precautions.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1402-0042

TACTICAL DATA SYSTEMS ANALYSIS

Course Number: K-2G-0008.

Location: Fleet Anti-Air Warfare Training Center, San Diego, CA.

Length: 3 weeks (93 hours).

Exhibit Dates: 10/72-1/88.

Objectives: To train officers and civilian personnel in applied tactical data systems concepts.

Instruction: Lectures in tactical data systems design and development; real-time introduction; combat directive systems; documentation standards; functional specifications; intercomputer communications, scheduling queues, and simulation; hardware and software; NTDS modular structures; data design; message formats, common routines, tables, library and compiling features; program execution time; and equipment routines and interrupts.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in data processing principles (3/74).

NV-1402-0043

CVA IOIC STORAGE AND RETRIEVAL OFFICER

Course Number: D-3A-012.

Location: Naval Intelligence Processing System Training Facility, Albany, GA.
Length: 8 weeks (280 hours).
Exhibit Dates: 9/71–1/88.
Objectives: To train officers as storage and retrieval officers in the integrated operational intelligence center.
Instruction: Lectures in storage and retrieval area functions and relationship within the integrated operational intelligence center (IOIC); procedures and computer software developed for the storage, maintenance, and query of automated data files; basic data processing; intelligence data base; photographic equipment; CSDS operations and programming; and IOIC management.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in data processing principles (4/74).

NV-1402-0044

RA-5C AN/ASB-12 Verdan and Digital Test Equipment Intermediate Maintenance

(A-5A RA-5C AN/ASB-12 Verdan and Digital Test Equipment)

Course Number: C-111-3742.
Location: Air Maintenance Training Detachment, Albany, GA; Air Maintenance Training Detachment, Sanford, FL.
Length: 10 weeks (400 hours).
Exhibit Dates: 1/64–1/88.
Objectives: To train enlisted personnel with previous technical training to modify, troubleshoot, and maintain the digital computer portion of the AN/ASB-12 bomb directing set.
Instruction: Lectures and practical exercises in the maintenance of the AN/ASB-12 Verdan and digital test equipment, including digital techniques, numbering systems, digital logic circuits, Boolean algebra, Verdan computer, universal section, shop test equipment familiarization, general-purpose section, DDA section, Verdan inputs/outputs, digital test equipment, and Verdan testing.
Credit Recommendation: In the vocational certificate category, 8 semester hours in digital computer principles (6/74); in the lower-division baccalaureate/associate degree category, 5 semester hours in digital computer principles (6/74); in the upper-division baccalaureate category, 3 semester hours in digital computer principles (12/68).

NV-1402-0045

Storekeeper, Class C (Uniform Automated Procedures for Tenders and Repair Ships)

Course Number: A-551-0050; A-551-0051; A-551-0052; A-551-0053.
Location: Storekeeper Class C School, Norfolk, VA; Storekeeper Class C School, Port Hueneme, CA; Storekeeper Class C School, San Diego, CA; Storekeeper Class C School, Newport, RI.
Length: 3 weeks (90 hours).
Exhibit Dates: 11/71–1/88.
Objectives: To train enlisted personnel to operate the Uniform U-1500 computer supply and fiscal system.
Instruction: Lectures and practical exercises in Uniform U-1500 computer supply and fiscal system operation, including tape and card files, transactions and record document identifiers, card formats, data processing, reports and returns, and returns analysis.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/74).

NV-1402-0046

Computer Programming AN/UYK-7 CMS-2 (Y) Compiler Language Basic

(AN/UYK-7 CMS-2 (Y) Compiler Language Programming)

Course Number: J-7E-0331; K-7E-0043; K-532-0043.
Location: Fleet Combat Training Center, Dam Neck, VA; Fleet Combat Direction Systems Training Center, San Diego, CA.
Length: 4–6 weeks (140–173 hours).
Exhibit Dates: 7/74–Present.
Objectives: To train students to write, execute, and interpret computer programs using the AN/USQ-7 CMS-2 (Y) programming language.
Instruction: Lectures, homework, and practical exercises in introduction to computers and programming; AN/UYK-7 hardware familiarization; AN/UYK-7 machine code, direct code, and the Ultra assembler language; and AN/UYK-7 CMS-2 (Y) compiler language.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in compiler language programming (9/84).

NV-1402-0047

SSN Central Computer Complex System Level Maintenance and Software

(Central Computer Complex Combined Maintenance and Software)

Course Number: A-150-0144.
Location: Submarine School, New London, CT; Submarine Training Center, Pacific, Pearl Harbor, HI.
Length: 7 weeks (210 hours).
Exhibit Dates: 1/72–1/88.
Objectives: To present the systems approach to maintenance of a computer system.
Instruction: Course includes anaylsis of system programs used to operate and diagnose the computer system. (This is a combination course, consisting of A-150-0105 and A-150-0104-1 plus an additional week of laboratory work on troubleshooting and fault isolation.) Course provides familiarization training in programming and analysis necessary to maintain the Central Computer Complex utilizing data flow and overall subsystem interfacing for fault isolation at a system level.
Credit Recommendation: In the vocational certificate category, 2 semester hours in computer technology (9/77).

NV-1402-0048

Cryptologic Systems Software

Course Number: A-532-0028.
Location: Naval Security Group Activity, Skaggs Island, Sonoma, CA.
Length: 12 weeks (360 hours).
Exhibit Dates: 4/79–Present.
Objectives: To train personnel to operate and program a PDP-11 computer by developing programming skills in FORTRAN, the MACRO-11 assembly languages, and the RSX-11M operating system.
Instruction: The course, which is divided into four areas, includes an introductory section in computer science including number systems, arithmetic operations, computer architecture, peripheral devices, inter-unit communications, logic flow charts and computer languages. The second section is a complete FORTRAN programming course on language syntax, the third section covers PDP-11 assembly language and the last section of the course covers PDP-11 operating systems. 207 hours are devoted to developing programming language skill and computer operating techniques.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer operating systems-PDP-11, 3 in introduction to data processing, 3 in FORTRAN programming and 3 in assembly language programming PDP-11 (7/80).

NV-1402-0049

Cryptologic Technician (R) AN/GYK-3 CP-813 and AN/UYK-3 CP-771 HFDF Computer Programmer

Course Number: A-532-0010.
Location: Naval Security Group Activity, Skaggs Island, Sonoma, CA.
Length: 16–24 weeks (480–720 hours).
Exhibit Dates: 1/62–Present.
Objectives: The course is designed to provide computer programming training in machine language coding, assembly and compiler languages.
Instruction: Course instruction includes review of numbering systems conversion techniques, flow charting and arithmetic operations, inter-unit communications, functions of peripheral and storage devices with addressing techniques, machine language and assembler programming techniques and applications using prepared and self-written MACRO routines (subset of ALGOL).
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in introduction to data processing and 3 in introduction to computer applications (7/80).

NV-1402-0050

Digital Control Computer Missile Interface Fire Control System (FCS) Mk 88 MOD 1

Course Number: A-121-0291.
Location: Fleet Ballistic Missile Center, Charleston, SC; Naval Submarine School, Groton, New London, CT.
Length: 2 weeks (80 hours).
Exhibit Dates: 1/76–7/81.
Objectives: To train technical personnel in the functional operation, theory and maintenance of a digital control computer interface to a missile system.
Instruction: For this course after 7/81 see NV-1402-0147. Lectures and practical exercises in the theory and functional operation of a digital computer interface including digital inputs and parallel to serial converters.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in digital computer interface logic (3/81).

NV-1402-0051

Mk 2 Mod 1/1A Ship's Inertial Navigation System (SINS) Combined Maintenance

Course Number: A-193-0355.
Location: Naval Submarine School, Groton, New London, CT.
Length: 15 weeks (600 hours).
Exhibit Dates: 1/79–Present.
Objectives: To train electronics technicians to operate, monitor, evaluate and maintain a ship's inertial navigation system.
Instruction: Lectures and practical exercises in the theory, operation, maintenance and repair of an inertial navigation system

and its related mechnical, electrical and component equipment. The course includes synchro, servo, and gyro fundamentals, basic inertial theory, power distribution through relay switch circuits, operation of and signal flow through a reader and data processing computer. Review of logic gates, flip-flops, arithmetic circuits, and memory disks as used in the computer are studied to aid in the understanding of fault isolation, maintenance and repair procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in computer operation (3/81); in the lower-division baccalaureate/associate degree category, 3 semester hours in electrical, mechanical and digital systems (3/81).

NV-1402-0052

Ship's Inertial Navigation System (SINS) Mk 3 Mod 4 Combined Maintenance

Course Number: A-193-0356.

Location: Naval Submarine School, Groton, New London, CT.

Length: 20 weeks (800 hours).

Exhibit Dates: 1/73–Present.

Objectives: To provide electronic technicians with the knowledge and skills necessary to operate and maintain a digital computer-based inertial navigation system.

Instruction: Classroom and laboratory instruction covering the application of digital computers in navigation, digital logic circuits and computer math, processor organization with drum and core memories, computer programming and peripheral interfaces. Synchros, gyros and fundamental inertial theory is covered as well as computer maintenance and repair.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in digital logic fundamentals (with laboratory), 2 in machine language instruction and test loops, 2 in computer maintenance and repair laboratory (3/81); in the upper-division baccalaureate category, 2 semester hours in computer organization (3/81).

NV-1402-0053

Digital-to-Digital Converter Advanced Training

Course Number: A-193-0252.

Location: Fleet Ballistic Missile Submarine Training Center, Charleston, SC; Naval Submarine School, Groton, New London, CT.

Length: 2 weeks (72 hours).

Exhibit Dates: 4/77–2/84.

Objectives: To teach qualified technicians to service a digital-to-digital converter.

Instruction: For this course after 2/84 see NV-1402-0146. Classroom and laboratory instruction in the functional operation and characteristics of the D/D converter, including serial-to-parallel buffer and digital-to-analog buffer. Half of the course time is devoted to diagnostic test, maintenance and isolation procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in digital equipment maintenance laboratory (3/81).

NV-1402-0054

AN/USM-449 (V) Intermediate Maintenance

Course Number: C-198-3018.

Location: Naval Air Station, Moffett Field, CA; Naval Air Station, Jacksonville, FL.

Length: 16 weeks (640 hours).

Exhibit Dates: 1/79–Present.

Objectives: To provide experienced technicians with the knowledge and theory to operate, program, troubleshoot and repair electronic systems using the AN/USM-449 (V) computer controlled automatic test set.

Instruction: Lectures, demonstrations and practical exercises in computer organization, programming (using machine and the ATLAS and DETOL languages) interfacing, analyzing circuits, and operation. Programming and interfacing at the peripheral test equipment level for both analog and digital devices is emphasized as well as fault identification in tested systems and the computer.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer organization and functions, 3 in computer system interface and operation, 2 in computer laboratory (7/81).

NV-1402-0055

P-3A/B TAC/NAV MOD Organizational Maintenance

Course Number: C-102-3569.

Location: Naval Air Station, Moffett Field, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 4/77–Present.

Objectives: To provide maintenance personnel with training in system operation, troubleshooting and component replacement for navigational equipment AN/ASN-124.

Instruction: Lectures and practical exercises in the basic operation of the AN/ASN-124 and AN/AQA-7(V)5 systems including signal processing, analog to digital conversions; system operation and function of subsystems inertial navigation, omega navigation, and power distribution; operational checks including built-in digital computer self-test checks.

Credit Recommendation: In the vocational certificate category, 3 semester hours in operation and repair of analog/digital systems (7/81).

NV-1402-0056

AN/USM-449 (V) Intermediate Operator

Course Number: C-198-3017.

Location: Naval Air Station, Jacksonville, FL; Naval Air Station, Moffett Field, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 11/80–Present.

Objectives: To prepare technicians to operate and program, under limited supervision, the AN/USM-449 (V) test set.

Instruction: Lectures and laboratory exercises in the control and operating procedures for the test set which performs computer controlled testing of analog and digital systems including procedures for loading, editing and running programs and programming techniques using the DETOL language, program structure, instruction format, operations and expressions, error codes and interfacing of the computer to tested systems.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/81).

NV-1402-0057

Digital Fundamentals

Course Number: C-000-3178.

Location: Naval Air Station, Cecil Field, FL; Naval Air Station, Oceana, VA; Naval Air Station, Jacksonville, FL; Naval Air Station, El Toro, CA; Naval Air Station, Beaufort, SC; Naval Air Station, Miramar, CA.

Length: 2 weeks (76 hours).

Exhibit Dates: 7/80–Present.

Objectives: To introduce the concepts of basic digital circuits, number systems and basic logic devices.

Instruction: Lectures cover basic computer concepts, binary, octal and hexidecimal number systems, base conversion, basic logic gates, multivibrators, registers, counters, program concepts and flow charts.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in introduction to electronic digital circuits or 1 semester hour in basic digital concepts for electrical engineering majors (3/82).

NV-1402-0058

Aegis Fire Control System (FCS) Mk 99/ORTS Mk 1 Operation and Maintenance

Course Number: A-104-0192.

Location: Naval Systems Department, Moorestown, NJ.

Length: 24 weeks (960 hours).

Exhibit Dates: 12/82–12/85.

Objectives: To train technicians to operate and perform maintenance tasks on various fire control systems.

Instruction: For this course after 12/85 see NV-1715-1304. Lectures and practical exercises in the operation and maintenance of the computers controlling a weapons sytem and the operation of a diagnostic computer system including system and equipment function, theory of operation, instruction set, interfaces and computer programs, preventive maintenance, corrective maintenance, fault isolation and fault detection. A review of the radar system supplying data to the computers is included.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in computer system analysis/testing/interfacing and 3 in computer maintenance, troubleshooting and repair (7/83).

NV-1402-0059

Aegis Computer Fundamentals

Course Number: A-150-0240.

Location: Naval Systems Department, Moorestown, NJ.

Length: 5-6 weeks (200-240 hours).

Exhibit Dates: 1/82–11/85.

Objectives: To train personnel on microprocessor and mini-computer architecture, programming, operation and maintenance.

Instruction: For this course after 11/85 see NV-1402-0120. The Heathkit 'Introduction to Microprocessors' home study course, a 36-hour self-paced course with modified laboratory experiments and more extensive student testing than provided by the package, is used as an introduction to this course. It is followed by a review of logic gates, Boolean algebra, DeMorgan's Theorem, flip-flops, registers, multiplexers, decoders, comparators, ALU and IC memories. The student is introduced to a 16-bit mini-computer which uses TTL logic and core memory; internal architecture including CPU, timing, memory, I/O interfaces; practical exercises on assembly language programming, operation and organization level maintenance using a maintenance console as a diagnostic aid and the operation and maintenance of an I/O console and magnetic tape unit.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in microcomputer architecture and programming (7/83).

NV-1402-0060

Aegis Computer System Operation and Maintenance

Course Number: A-150-0239.

Location: Naval Systems Department, Moorestown, NJ.

Length: 22 weeks (880 hours).

Exhibit Dates: 12/82–12/85.

Objectives: To train experienced personnel to maintain the computer control and signal processing equipment for a radar system.

Instruction: For this course after 12/85 see NV-1402-0121. An indepth systems level course on the operations and maintenance of a computer system used to control complex phase array radar equipment. Topics include the function of each software program, how to load these programs and how to operate the system; system architecture and detailed data flow paths; preventive maintenance and troubleshooting to the card level. Prior knowledge of digital logic, computers, and assembly langauge is assumed.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in computer systems and operation, 3 in computer maintenance, troubleshooting and repair (7/83).

NV-1402-0061

Trident 1 Backfit MT Tender Technician

Course Number: A-121-0320.

Location: Guided Missiles School, Dam Neck, VA.

Length: 20 weeks (602 hours).

Exhibit Dates: 4/83–1/89.

Objectives: To train electronic technicians in the theory and maintenance of the Trident 1 backfit missile system.

Instruction: Lectures and practical exercises in the theory and maintenance of a fleet ballistic missile weapon systems including the missile handling system, digital missile tactical readiness test set, control systems, tape readers, teletype, hydraulics and missile handling equipment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in digital troubleshooting (11/83); in the lower-division baccalaureate/associate degree category, 3 semester hours in advanced digital circuitry (11/83).

NV-1402-0062

AN/SYR-1 Weapons Direction System (WDS) Mk 14 Maintenance

Course Number: A-150-0230.

Location: Naval Guided Missiles School, Dam Neck, VA; Combat Systems Technical School Command, Mare Island, CA.

Length: 17 weeks (600 hours).

Exhibit Dates: 11/82–Present.

Objectives: To train qualified personnel in the operation and repair of the WDS Mk 14 system and its subsystems.

Instruction: Lectures and practical exercises in the operation, maintenance and repair of the SYR-1 system and related subsystems including number conversions (digital to octal to binary), binary and octal additions, subtraction and complementing procedures, logic functions (AND, OR, XOR, NAND and NOR) and digital flowcharting; programming including addressing (8 bit and 16 bit), formatting, transfer procedures, registers, loop instructions, sub routine calls, indirect addressing, I/O instructions (series and parallel); magtape fundamentals including loading, tape systems, formatting and maintenance procedures; operating instructions, and maintenance and repair procedures using standard electronic equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in logic systems, 3 in computer systems and 5 in electronic systems troubleshooting (11/83).

NV-1402-0063

AN/GYK-22 (BITMAN) Maintenance

Course Number: A-102-0115.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 6 weeks (237 hours).

Exhibit Dates: 10/81–Present.

Objectives: To provide personnel with training in order to perform preventive and corrective maintenance in the BITMAN computer system.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) write and run simple maintenance programs on digital computer systems (2) trace the operations of the various subgroups (control, memory, I/O and peripherals) (3) troubleshoot to the component level by using system trouble indications and test equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer system maintenance (1/84).

NV-1402-0064

Cryptologic Maintenance Technician Electronic Technology

Course Number: A-102-0234.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 16 weeks (640 hours).

Exhibit Dates: 9/79–Present.

Objectives: To provide technicians with the necessary fundamentals of transistor vacuum tube electronics in order to maintain and repair electronic warfare systems.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) be familiar with the theory and operation of diodes and bipolar and unipolar transistors (2) be familiar with the theory and operation of power supplies, amplifiers, oscillators, detectors, discriminators and other signal receiver components (3) be able to troubleshoot and identify failed components through use of multimeters and oscilloscopes (4) convert between, and perform, arithmetic operations on decimal, hexadecimal, BCD, excess-3, binary and octal numbers (5) use integrated circuits to construct and analyze logic circuits such as adders, subtractors, decoders, encoders, counters, and registers (6) understand the function and architecture of basic computer units i.e. control, ALV, memory and I/O (7) write elementary machine language programs for the MC6800 microprocessor (8) understand memory mapped I/O and simple interfacing exercises (9) understand the operation of video display circuitry (clipping, clamping, multivibrators, sawtooth generators and blocking oscillators).

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic devices, 2 in electronic communications, 4 in digital logic and microprocessing, 1 in video display (6/87).

NV-1402-0065

Cryptologic Technician Communications–Communications Systems Operations, Control and Management

Course Number: A-260-0029.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 19 weeks (753 hours).

Exhibit Dates: 11/79–Present.

Objectives: To provide personnel with knowledge and skills in communication systems, operations, control and management.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) comprehend an extensive communication system including radio receiver and transmitter teletype machine, land lines, satellites and digital computers (2) understand the technical basics of radio communications, including modulation, multiplexing, and normal tests and adjustments (3) operate a digital computer including data and program entry from console keyboard or tape/deck drives, (4) interpret error messages and follow appropriate diagnostic procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in communications survey, 1 in computer operation (1/84).

NV-1402-0066

Cryptologic Technician (Technical) ELINT Operator

Course Number: A-231-0028.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 12 weeks (480 hours).

Exhibit Dates: 9/83–Present.

Objectives: To provide the student with the knowledge and skill necessary to operate data collection equipment and to evaluate and disseminate the appropriate information.

Learning Outcomes: Upon completion of the program, the student will be able to: (1) intercept 80% of available signals and measure such things as radio frequency, pulse duration, pulse repetition frequency and line of bearing (2) compute radar characteristics such as minimum range, maximum unambiguous range and beam width.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/87).

NV-1402-0067

Cryptologic Technician M–OUTBOARD Maintenance

Course Number: A-102-0208.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 29 weeks (1177 hours).

Exhibit Dates: 11/82–Present.

Objectives: To provide training for preventive and corrective maintenance on a specialized piece of equipment.

Learning Outcomes: Upon completion of the course, the student will be able to: (1)

perform maintenance, per appropriate manuals, on equipment in the OUTBOARD suite, including the AN/SLR-16, AN/SLR-19, AN/UYQ-23 and associated units (2) comprehend digital computer basics including functions of a microprocessor.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in survey of microprocessor systems, 3 in electronic systems troubleshooting and maintenance (1/84).

NV-1402-0068

CRYPTOLOGIC TECHNICIAN M, WIDEBAND SYSTEM MAINTENANCE

Course Number: A-102-0230.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 26 weeks (1024 hours).

Exhibit Dates: 1/82–Present.

Objectives: To provide technicians with training in preventive and corrective maintenance on a computer controlled wideband receiver signal processor.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) have a knowledge and understanding of a signal digitizer and processor, memory, translator/recorder, display power supplies and a maintenance philosophy of a computerized wideband radio signal processor (2) be able to perform maintenance and troubleshooting, to the component level, using basic knowledge of digital/computer principles and specific knowledge of system operation and subsystems.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in computer controlled digital operating systems (6/87).

NV-1402-0069

CRYPTOLOGIC TECHNICIAN M, UNIVERSAL CRYPTOLOGIC PROCESSOR MAINTENANCE

Course Number: A-102-0290.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 5 weeks (200 hours).

Exhibit Dates: 11/81–Present.

Objectives: To provide technicians with entry level knowledge of PDP-11 digital computer required for entry into specialized DEC equipment maintenance courses.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) understand the architecture, instructions, addressing, timing and operation of the PDP 11-35/40 computer system including control unit, core memory, memory management and interfacing (2) be able to troubleshoot down to the component level using system diagnostics, digital test equipment and standard test equipment.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in PDP-11 35/40 system maintenance and troubleshooting (7/87).

NV-1402-0070

CRYPTOLOGIC TECHNICIAN M UNIVERSAL CRYPTOLOGIC PROCESSOR WIDEBAND SUBSYSTEM MAINTENANCE, CLASS C

Course Number: A-102-0291.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 7 weeks (280 hours).

Exhibit Dates: 6/81–Present.

Objectives: To provide technicians with training in preventive and corrective maintenance on the PDP 11 35/40 and associated equipment used in the wideband radio receiving system.

Learning Outcomes: Upon completion of the course, the student will: (1) have a knowledge and understanding of the operation of a PDP 11-34 computer system including extended instruction set, floating point option, core memory, bootstrap loader, asynchronous interface, DEC writer, DMA, interprocessor link, bug repeater, disk system and system diagnostic (2) be able to maintain, troubleshoot and repair the computer, to the component level, using knowledge of system instructions, addressing, timing, architecture and using system diagnostics, digital test equipment and standard test equipment.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in digital computer system maintenance and troubleshooting (6/87).

NV-1402-0071

CRYPTOLOGIC TECHNICIAN O, CLASS A

Course Number: A-260-0030.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 9 weeks (360 hours).

Exhibit Dates: 9/79–Present.

Objectives: To provide technicians with the essential knowledge and skills necessary to perform at the apprentice level in radio printer commmunications.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) type up to 35 wpm at 95% accuracy and read teletypewriter tape at 50 wpm (2) extract, format, transmit and route messages in accordance with appropriate Navy cryptographic and other operating procedures (3) operate various cryptographic communication equipment including teletypewriters.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in basic typing skills (7/87).

NV-1402-0072

DIGITAL TRAINING

Course Number: A-102-0235.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 4 weeks (140 hours).

Exhibit Dates: 9/78–Present.

Objectives: To provide students with knowledge of the fundamentals of digital logic and microprocessors.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) convert between, and perform, arithmetic operations on decimal, hexadecimal, BCD, excess-3, binary and octal numbers (2) use integrated circuits to construct and analyze logic circuits such as adders, subtractors, decoders encoders, counters and registers (3) understand the function and architecture of basic computer units, i.e. control, ALV, memory and I/O (4) write elementary machine language programs for the MC6800 microprocessor (5) understand memory mapped I/O and simple interfacing exercises.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in digital logic and microprocessors (7/87).

NV-1402-0073

ELECTRONIC WARFARE TECHNICIAN

Course Number: A-102-0214.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 8 weeks (260 hours).

Exhibit Dates: 9/78–Present.

Objectives: To provide the technician training in timing of display circuits, transmission lines, antennas and fundamentals of digital logic and microprocessors.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) understand the operation of video display circuitry (clipping, clamping, multivibrators, sawtooth generators, blocking oscillators) (2) understand antenna systems and RF transmission lines (3) understand operation antenna servo systems (motors, op amps, mag amps) (4) convert between, and perform, arithemetic operations on decimal, hexadecimal, BCD, excess-3, binary and octal numbers (5) use integrated circuits to construct and analyze logic circuits such as adders, subtractors, decoders, encoders, counters and registers (6) understand the function and architecture of basic computer units i.e. control, ALV, memory and I/O (7) write elementary machine language programs for the MC6800 microprocessor (8) understand memory mapped I/O and simple interfacing exercises.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in video display, 2 in antenna systems, 4 in digital logic and microprocessors (7/87).

NV-1402-0074

ELECTRONIC WARFARE TECHNICIAN AN/SLQ-17 EQUIPMENT OPERATIONS

Course Number: A-102-0212.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 2 weeks (80 hours).

Exhibit Dates: 3/83–Present.

Objectives: To teach the operation of a specific piece of military equipment.

Learning Outcomes: Upon completion of the course, the student will be able to perform the following activities as they pertain to the AN/SLQ-17: (1) perform system initialization and power control (2) data augmentation (3) intercept procession (4) response processing (5) environment review and management (6) system and status monitoring.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/87).

NV-1402-0075

ELECTRONIC WARFARE TECHNICIAN AN/SLQ-32(V2) ELECTRONIC SURVEILLANCE MEASURES (ESM) MAINTENANCE

Course Number: A-102-0215.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 11 weeks (440 hours).

Exhibit Dates: 8/83–Present.

Objectives: To provide training for preventive and corrective maintenance of specific military equipment.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) comprehend complex electronic signal processing systems which include analog and digital signals with digital computer controls (2) troubleshoot equipment malfunctions to the component level (3) utilize test equipment such as oscilloscopes, signal generator and frequency meters for alignment and troubleshooting.

Credit Recommendation: In the lower-division baccalaureate/associate degree cate-

gory, 3 semester hours in digital system troubleshooting (7/87).

NV-1402-0076

Submarine Electronic Technician Electronic Warfare Technology

Course Number: A-102-0224.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 20 weeks (800 hours).

Exhibit Dates: 9/78–Present.

Objectives: To provide technicians with fundamentals of transistor/vacuum tube electronics necessary to maintain and repair electronic warfare systems.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) be familiar with the theory and operation of diodes and bipolar and unipolar transistors (2) be familiar with the theory and operation of power supplies, amplifiers, oscillators, detectors, discriminators and other signal receiver components (3) be able to troubleshoot and identify failed components through use of multimeters, function generators, oscilloscopes and power meters (4) convert between, and perform arithemetic operations on decimal, hexadecimal, BCD, excess-3, binary and octal numbers (5) use integrated circuits to construct and analyze logic circuits such as adders, subtractors, decoders, encoders, counters and registers (6) understand the function and architecture of basic computer units; i.e. control, ALV, memory and I/O (7) write elementary machine language programs for the MC6800 microprocessor (8) understand memory mapped I/O and simple interfacing exercises (9) understand the operation of video display circuitry (clipping, clamping, multivibrators, sawtooth generators, blocking oscillators) (10) understand antennae systems and RF transmission lines (11) understand operation antennae servo systems (motors, op amps, mag amps).

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic devices, 2 in electronic communications, 4 in digital logic and microprocessors, 2 in antenna systems and 1 in video displays (7/87).

NV-1402-0077

Tactical Electronic Warfare (EW) Support Measures STMAN/SSQ-80(V) Maintenance

Course Number: A-102-0285.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 5 weeks (200 hours).

Exhibit Dates: 1/82–9/86.

Objectives: To train personnel in preventive and corrective maintenance for specific military equipment.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) trace an analog signal and logic flow on a schematic diagram (2) troubleshoot to the module level using the guidelines found in appropriate terminal manuals. See exhibit NV-1715-1251 for the course after 1986.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in system troubleshooting, analog and digital (1/84).

NV-1402-0078

Trident Command and Control System (CCS) Advanced Level III

Course Number: A-150-0202.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 18 weeks (720 hours).

Exhibit Dates: 3/83–5/85.

Objectives: To prepare experienced computer operators/technicians to perform all corrective maintenance on a data processing system and monitoring subsystem.

Instruction: Lectures, demonstrations and laboratory work covering signals, signal flow, modes, input/outputs, coding, timing, sequencing, logic diagrams, circuits and registers, data formats, and power supplies for the: CPU, I/O controllers and adopters, and core and film memory; magnetic tape, paper tape and TTY subassemblies; signal data conversion and conditioning. The student troubleshoots the system, making use of system diagnostics, flow charts and knowledge of the system to identify problems down to the board and component level. After 5/85, see NV-1402-0134.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in data processing system hardware and machine code and 3 in data processing system maintenance (8/84) OR; in the upper-division baccalaureate category, 4 semester hours in data processing system maintenance (8/84).

NV-1402-0079

Computer CP-890A, B/UYK Input/Output Controller Maintenance

Course Number: A-193-0338.

Location: Fleet Ballistic Missile Training Center, Charleston, SC; Navy Submarine School, Groton, New London, CT; Trident Training Facility, Bangor, Bremerton, WA.

Length: 3 weeks (112 hours).

Exhibit Dates: 4/81–Present.

Objectives: To provide electronic technicians with knowledge and skills necessary to perform maintenance on a navigation computer.

Instruction: Lectures and laboratory exercises covering the functional descriptions of the computer input/output controller, master clock, timing chain and sequencer, master clear circuitry, real time clock and control memory operations, external function/output data operations, input data operations, external interupt operations and the computer input/output controller special operations. Slightly over one third of the course is spent in maintenance and troubleshooting laboratory.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in computer input/output operations and troubleshooting (8/84).

NV-1402-0080

Computer DP-890A and B/UYK Processor Maintenance II

Course Number: A-193-0337.

Location: Fleet Ballistic Missile Training Center, Charleston, SC; Navy Submarine School, Groton, New London, CT; Trident Training Facility, Bangor, Bremerton, WA.

Length: 3 weeks (120 hours).

Exhibit Dates: 8/80–Present.

Objectives: To provide electronics technicians with the knowledge and skills necessary to perform maintenance on a navigation computer.

Instruction: Lectures and laboratories covering the functional descriptions of the processor add-subtract, non-sequential, interrupt, repeat, shift, complex arithmetic, floating point operations and the processor replace instruction group. Approximately one third of course time is spent in laboratory work on corrective maintenance and troubleshooting.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in computer CPU theory and troubleshooting (8/84).

NV-1402-0081

Digital Interface Unit/Message Interface Unit (DIU/MIU)

Course Number: A-150-0215.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 3 weeks (120 hours).

Exhibit Dates: 7/84–Present.

Objectives: To train submarine radiomen to maintain a digital message interface unit.

Instruction: Lectures and practical exercises on the functional operation of a digital message interface unit. Half the course time is devoted to learning maintenance procedures and troubleshooting programmed faults in a laboratory setting.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in digital equipment troubleshooting laboratory (8/84).

NV-1402-0082

Magnetic Disk File (MDF) Theory and Electrical Maintenance

Course Number: A-121-0428.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 3 weeks (120 hours).

Exhibit Dates: 10/82–Present.

Objectives: To provide personnel training in the operation and maintenance of a disk file system.

Instruction: Lectures and laboratory exercises on the magnetic disk file system including the theory of operation, maintenance and repair.

Credit Recommendation: In the vocational certificate category, 2 semester hours in digital disk systems (8/84); in the lower-division baccalaureate/associate degree category, 1 semester hour in disk memory system laboratory (8/84).

NV-1402-0083

Launcher Control and Monitoring Equipment

(Missile Launcher Control and Monitoring Equipment)

Course Number: A-121-0469.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 4 weeks (116 hours).

Exhibit Dates: 9/83–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform preventive maintenance on the Trident Missille Launcher Pressurization System Control, Control and Monitoring Panel, and Ventilation Alarm and Monitoring Panel, describe the functional operation of the systems and explain the systematic fault isolation and the procedures required for disassembly, repair and reassembly of the VAMP, and CAMP.

Instruction: Lecture and laboratory exercises on systems operations, theory and troubleshooting. Troubleshooting makes use of computer aided diagnostics and troubleshooting flow charts to the board level including work on the pneumatic, hydraulic, and digital/computer components subsystems. The ability to use basic digital/computer theory and system knowledge is emphasized.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in digital systems troubleshooting (3/89).

NV-1402-0084

Trident Command and Control (CCS)
Operation and Maintenance
Conversion Level I

Course Number: A-150-0200.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 16 weeks (640 hours).

Exhibit Dates: 3/83-2/89.

Objectives: To prepare inexperienced technicians to qualify for operation and maintenance of a command and control system.

Instruction: Lectures and laboratory exercises in the functional operation of a data processing system, a digital data computer, a diskmemory set, an input/output console, a signal data converter and various sensors. For the course after 2/89, see exhibit NV-1402-0135.

Credit Recommendation: In the vocational certificate category, 3 semester hours in digital computer system operation, and 3 in digital signal processing (8/84).

NV-1402-0085

Trident Command and Control
System (CCS) Operation and
Maintenance Level II

Course Number: A-150-0201.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 13 weeks (520 hours).

Exhibit Dates: 12/83-Present.

Objectives: To prepare experienced data system technicians to operate and perform selected basic maintenance procedures on a command and control system.

Instruction: Lectures and practical exercises on the command and control system including terminology, types of signals, word formats, major components, controls, indicators, interface, power supplies, alignment/calibration. The course also includes system diagnostics and troubleshooting on a digital data computer, a disk memory set, an input/output console, a signal data converter, a multiplexer and a command and control system. Troubleshooting is to the board level.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in digital computer system maintenance (8/84).

NV-1402-0086

Trident Defensive Weapons
Subsystem/Command Subsystem
Level I

Course Number: A-130-0227.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 7 weeks (288 hours).

Exhibit Dates: 12/80-6/84.

Objectives: To provide inexperienced electronics technicians with the knowledge and skills necessary to operate and maintain, under supervision, a command and control system.

Instruction: Lectures and laboratory exercises in the basic theory, functions, operation and maintenance of a computer controlled system with multiple inputs and outputs.

Credit Recommendation: In the vocational certificate category, 4 semester hours in operation and maintenance of computer control systems (8/84).

NV-1402-0087

Trident Defensive Weapons
Subsystem/Command Subsystem
Level II

Course Number: A-130-0228.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: *Version 1:* 11 weeks (363 hours). *Version 2:* 8 weeks (323 hours).

Exhibit Dates: *Version 1:* 8/84-Present. *Version 2:* 12/80-7/84.

Objectives: To prepare electronics technicians to perform preventive/corrective maintenance procedures on a computer control system.

Instruction: *Version 1:* See NV-1402-0126 (A-150-0251), NV-1402-0127 (A-150-0216), NV-1402-0128 (A-150-0252), NV-1715-1326 (A-130-0232). This is a pipeline course. *Version 2:* Lectures and laboratory exercises in the theory, operation and troubleshooting of: a) CRT graphics/display including analog, digital, character generation, raster and rector graphics, memory, refresh, timing, computer interface and CRT deflection; b) bi-directional data transfer and signal interfacing between control processor and external systems, including basic operation of the external systems.

Credit Recommendation: *Version 1:* See NV-1402-0126 (A-150-0251), NV-1402-0127 (A-150-0216), NV-1715-1326 (A-130-0232), NV-1402-0128 (A-150-0252). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in computer-display systems, 1 in computer control/interfacing techniques (8/84).

NV-1402-0088

Trident Defensive Weapons
Subsystem/Command Subsystem
Level III

Course Number: A-130-0229.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: *Version 1:* 5 weeks (124 hours). *Version 2:* 4 weeks (142 hours).

Exhibit Dates: *Version 1:* 9/84-Present. *Version 2:* 12/80-8/84.

Objectives: To prepare experienced electronics technicians to operate and maintain a defensive weapons system.

Instruction: *Version 1:* See NV-1402-0124 (A-130-0233) and NV-1402-0125 (A-130-0231). This is a pipeline course. *Version 2:* Lectures and laboratory exercises in the theory, operation, and troubleshooting of computer controlled digital/analog peripheral equipment. Troubleshooting involves fault isolation down to the board and component level.

Credit Recommendation: *Version 1:* See NV-1402-0124 (A-130-0233) and NV-1402-0125 (A-130-0231) (2/89). *Version 2:* In the lower-division baccalaureate/associate degree category, 1 semester hour in computer control applications, 1 in digital troubleshooting laboratory (8/84).

NV-1402-0089

Missile Test and Readiness Equipment
Mk 7 Mod 4 Advanced Circuitry
(Missile Test and Rediness Equipment
(MTRE) MK7 Mod 4 Advanced
Theory and Maintenance)

Course Number: A-121-0492.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 4 weeks (119 hours).

Exhibit Dates: 6/82-Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe the basic operation of each of the six functional areas of the Mk-7 Missile test and readiness equipment (MTRE), describe the electromechanical operation of the six functional areas to include basic logic, tape format, signal flow and response evaluation, perform mechanical alignment and adjustment utilizing special tools and test equipment.

Instruction: Lectures and laboratory exercises in the functional operation, to the block diagram level, of specialized missile equipment. Topics include power supplies, display and panel controls, system verification tests, paper tape input and printer operation and maintenance.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in digital equipment maintenance (8/84).

NV-1402-0090

Antisubmarine Warfare (ASW)
Module Data Processing
Technician

Course Number: J-531-0373.

Location: Fleet Combat Training Center, Dam Neck, Virginia Beach, VA.

Length: 13 weeks (379 hours).

Exhibit Dates: 4/83-Present.

Objectives: To train data processing technicians in the theory, operation and maintenance of automated data processing equipment associated with an ASW system.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) use the following data processing equipment: magnetic tape storage units, high speed printer, disk storage units, teletypewriter, input/output operator console; (2) perform limited maintenance, by fault isolation, of problems through system symptom recognition and; (3) use diagnostic programs and system error messages for diagnosis of system faults. Maintenance is limited to operations procedures and determination of system/program faults.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in data processing (9/84).

NV-1402-0091

Antisubmarine Warfare (ASW)
Module Data Systems
Technician

Course Number: J-150-0372.

Location: Fleet Combat Training Center, Dam Neck, Virginia Beach, VA.

Length: 15 weeks (525 hours).

Exhibit Dates: 9/83-Present.

Objectives: To train personnel in the theory, operation and maintenance of the automatic data processing and display equipment associated with the ASW module.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) understand the functions of a magnetic tape and disk subsystem; (2) understand the functions of a video display subsystem; (3) perform planned and unplanned maintenance on the data processing system and subsystems; (4) trace electronic signals through all systems and; (5) document maintenance action.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in the operation, maintenance and repair of data processing equipment (9/84).

NV-1402-0092

Antisubmarine Warfare (ASW) Operations Center (ASWOC) Acoustic System

Course Number: J-102-0364.
Location: Fleet Combat Training Center, Dam Neck, Virginia Beach, VA.
Length: 14-17 weeks (490-650 hours).
Exhibit Dates: 1/82-Present.
Objectives: To train aviation ASW technicians to operate, maintain and repair the Fast Time Analyzer mainframe and peripheral computer equipment.
Learning Outcomes: Upon completion of the course, the student will be able to: (1) be familiar with the calibration procedures and use of basic test equipment; (2) understand the components, characteristics and operation of computer peripheral equipment including disk drives, tape drives, cassette tape disks, video terminals and printers; (3) interface between computers and between computers and peripheral equipment and; (4) operate, maintain, isolate faults and repair the Fast Time Analyzer mainframe and peripheral equipment.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer peripheral equipment, operation, maintenance and repair (9/84).

NV-1402-0093

Antisubmarine Warfare (ASW) Operations Center (ASWOC) Data Systems

Course Number: J-150-0366.
Location: Fleet Combat Training Center, Dam Neck, Virginia Beach, VA.
Length: 16 weeks (560 hours).
Exhibit Dates: 8/83-Present.
Objectives: To train personnel in the theory, operation and maintenance procedures for display and automatic data processing equipment associated with the ASW operations center.
Learning Outcomes: Upon completion of the course, the student will be able to: (1) understand the theory and operation of automatic data processing systems; (2) use basic test equipment and diagnostic procedures to isolate malfunctions in automatic data processing systems; (3) verify proper operation of the ASWOC data system and; (4) operate, maintain, isolate faults and repair ASWOC data systems.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in data system operation, maintenance and repair (9/84).

NV-1402-0094

Computer Programming USQ-20 Compiler Language - Basic

Course Number: J-7E-0330.
Location: Fleet Combat Training Center, Dam Neck, Virginia Beach, VA.
Length: 4 weeks (150 hours).
Exhibit Dates: 4/81-Present.
Objectives: To train personnel to write, execute and interpret computer programs written in the CMS-2 compiler language for a 30-bit word AN/USQ-20 computer.
Learning Outcomes: Upon completion of the course, the student will be able to: (1) understand the structure of the CMS-2 compiler language; (2) relate the compiler language instructions to machine code; (3) write programs and subroutines in the CMS-2 compiler language of an AN/USQ-20 computer and; (4) use debug statements and procedures to correct program faults.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in compiler language programming (9/84).

NV-1402-0095

Computer Programming AN/UYK-7 Assembler Language - Basic

Course Number: J-532-0063.
Location: Fleet Combat Training Center, Dam Neck, Virginia Beach, VA.
Length: 5 weeks (200 hours).
Exhibit Dates: 8/82-Present.
Objectives: To train personnel to write, execute and interpret computer programs written in the ULTRA/32 assembler language for a 32 bit word AN/UYK-7 computer.
Learning Outcomes: Upon completion of the course, the student will be able to: (1) understand programming procedures for the AN/UYK-7 computer; (2) understand the structure and use of the ULTRA/32 repetoire of instructions; (3) write practical programs in the ULTRA/32 assembly language and; (4) use the I/O instruction set and hardware to run and debug programs on the AN/UYK-7 computer.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in assembly language programming (9/84).

NV-1402-0096

Computer Programming AN/UYK-20 Assembler Language - Basic

Course Number: J-532-0064.
Location: Fleet Combat Training Center, Dam Neck, Virginia Beach, VA.
Length: 5 weeks (175 hours).
Exhibit Dates: 6/81-Present.
Objectives: To train personnel in the language repertoire of instructions to produce operating programs using a mini-computer.
Learning Outcomes: Upon completion of the course, the student will be able to: (1) understand programming procedures for the UYK-20 computer (2) understand the structure and use of the ULTRA-20 repertoire of instructions (3) write practical programs in the ULTRA/20 assembler language (4) use the I/O instruction set and hardware to run and debug programs on the AN/UYK-20 computer.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in assembler language programming (9/84).

NV-1402-0097

Digital Computer Microprocessor Basics

Course Number: A-100-0069.
Location: Submarine Training Center, Pacific, Pearl Harbor, HI.
Length: 2 weeks (70 hours).
Exhibit Dates: 10/82-Present.
Objectives: To train enlisted personnel in the fundamentals of digital logic and microprocessors.
Instruction: Course covers basic digital concepts, arithmetic techniques, digital codes, digital sequential circuits, analog/digital, digital/analog conversion, integrated circuits, microprocessor fundamentals.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in digital logic and microprocessor theory (11/85).

NV-1402-0098

SSN Central Computer Complex (CCC) Maintenance - Software

Course Number: L-150-0001.
Location: Submarine Training Center, Pacific, Pearl Harbor, HI.
Length: 3 weeks (116-120 hours).
Exhibit Dates: 11/85-Present.
Objectives: To provide training on central computer complex software and maintenance.
Instruction: Provide the programming and analysis background necessary to maintain the central computer complex utilizing data flow and overall subsystem interfacing for fault isolation at a system level.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to computer systems (11/85).

NV-1402-0099

Naval Intelligence Processing System (NIPS) System Maintenance

Course Number: D-150-0119; J-150-0988.
Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA; Naval Intelligence Processing System Training Facility, Key West, FL.
Length: 38 weeks (1465-1520 hours).
Exhibit Dates: 7/85-Present.
Objectives: To qualify selected data systems technicians in the maintenance and repair of electronic data processing and intelligence display equipment.
Instruction: Lecture and laboratory in the theory of operation, corrective and preventive maintenance, and trouble-shooting procedures of the equipment that comprises the naval intelligence processing system (NIPS) and the interface and support equipment.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to computers, 3 in introduction to digital techniques, 1 in introduction to digital techniques laboratory, 3 in introduction to digital circuits, 2 in introduction to digital circuits laboratory, 3 in basic semiconductor circuits, 1 in basic semiconductor circuits laboratory, 4 in computer maintenance (1/86).

NV-1402-0100

Afloat Storage and Retrieval Operator

(Naval Intelligence Processing System (NIPS) Afloat Storage and Retrieval Operator)

Course Number: D-150-0002; J-150-0963.
Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA; Naval Air Station, Norfolk, VA; Naval Intelligence Processing System Training Facility, Key West, FL.
Length: 8 weeks (311-320 hours).
Exhibit Dates: 11/84-Present.
Objectives: To train data processing technicians in data base storage, retrieval, and use of associated equipment.
Instruction: Lectures and practical exercises in the operation of an intelligence processing computer, file maintenance procedures, basic intelligence and data bases, message processing systems, generation of output display formats, and the operation of

subsystems to receive, process, and display intelligence data.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in data processing principles (1/86).

NV-1402-0101

Landing Helo Auxiliary (LHA)
Intelligence Center (IC) Afloat
Automatic Data Processing
(ADP) Operator

Course Number: D-531-0120; J-531-0971.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA; Naval Intelligence Processing System Training Facility, Key West, FL.

Length: 7 weeks (280 hours).

Exhibit Dates: 1/83–Present.

Objectives: To train data processing technicians in data base storage, retrieval, and use of associated equipment.

Instruction: Lectures and practical exercises in the operation of an intelligence processing computer, file maintenance procedures, basic intelligence and data bases, message processing systems, and the operation of subsystems to receive, process, and display intelligence data.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in data processing principles (1/86).

NV-1402-0102

AN/TYQ-19(V), Marine Air-Ground
Intelligence System (MAGIS)
Intelligence Analysis Center
(IAC) Computer System,
Automatic Data Processing
(ADP) Communications Operator

Course Number: D-530-0101; J-530-0978.

Location Navy and Marine Corps Intelligence Training Center, Dam Neck, VA; Naval Intelligence Processing System Training Facility, Key West, FL.

Length: 5 weeks (200 hours).

Exhibit Dates: 6/85–Present.

Objectives: To train enlisted personnel to operate various types of automatic data processing equipment in support of an intelligence analyst center.

Instruction: Lectures and practical exercises in the start-up of computer equipment, communication integration of the equipment with external sources, operation of computer subsystems such as magnetic tape, disk packs, paper punch/reader, display units, file utilities, system files, and recovery procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in computer operations (1/86).

NV-1402-0103

AN/TYQ-19(V), Marine Air-Ground
Intelligence System (MAGIS)
Intelligence Analysis Center
(IAC) Computer System
Maintenance

Course Number: D-150-0130; J-150-0992.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA; Naval Intelligence Processing System Training Facility, Key West, FL.

Length: 10 weeks (400 hours).

Exhibit Dates: 6/85–Present.

Objectives: To Train selected personnel in the operation and maintenance of the AN/TYQ-19(V) computer system.

Instruction: Covers theory of operation and maintenance procedures of the components that comprise the AN/TYQ-19(V) system, and preventive and corrective maintenance procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer fundamentals, 3 in electronic communication systems (1/86).

NV-1402-0104

AN/TYQ-19(V), Marine Air-Ground
Intelligence System (MAGIS)
Intelligence Analysis Center
(IAC) Computer Intelligence
Analyst

Course Number: D-240-0101; J-240-0976.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA; Naval Intelligence Processing System Training Facility, Key West, FL.

Length: 5 weeks (200 hours).

Exhibit Dates: 6/85–Present.

Objectives: Provides the basic skills needed for the intelligence analyst to operate and utilize the marine air ground intelligence system (MAGIS).

Instruction: Lectures and practical exercise in the operation and usage of the equipment comprising the MAGIS system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in basic electronic data processing (1/86).

NV-1402-0105

Mk 152 Data

Course Number: A-113-0105.

Location: Naval Training Center, Great Lakes, IL.

Length: 27 weeks (1080 hours).

Exhibit Dates: 8/84–Present.

Objectives: Provide selected individuals having previous training in electronics and digital computer fundamentals, with the knowledge and skills required to maintain the Mk 152 Digital computer and associated control/displays panels and interfacing units.

Instruction: Lecture and laboratory exercises providing indepth study of a 16 bit computer system using RTL logic and core memory. Study includes computer control section, arithmetic section, logic, timing, language instructions and addressing and circuitry; maintenance, control and bootstrup, operation of core memory, access times, decoding; synchro/digital, digital/synchro other D/A and A/D conversions, multiplexing, timing, interfacting of different logic and signal levels; use of diagnostics and other procedures for troubleshooting down to the board and/or component level.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer architecture and inter-facing and 2 in computer maintenance and repair (1/86).

NV-1402-0106

AN/UYK-7(V) Data Maintenance
Class C-7

Course Number: A-113-0099.

Location: Naval Training Center, Great Lakes, IL; Fleet Training Center, San Diego, CA; FCTCL, Damneck, VA.

Length: 32 weeks (1280 hours).

Exhibit Dates: 3/85–Present.

Objectives: To provide selected students with the knowledge and skills to maintain a digital computer and its peripheral equipment.

Instruction: This is an indepth diagnostics and repair course on a 32- bit multiprocessor digital computer which uses the DTL logic logic family. Also included are instructions on trouble- shooting and repair of associated and peripheral equipment such as printer supplies, magnetic tape units, signal data transfer buffers, wide display systems, radar signal processors and C/O buffer systems. Extensive use of machine language instruction codes are used to isolate faults to the card or component level by interpreting front panel display and using an oscilloscope to verify the fault. Repairs are made to the card level.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in mini computer architecture and interface systems, and 2 in computer maintenance and repair (1/86).

NV-1402-0107

Universal Cryptologic Processor
Training Classic Bowsprit Sail
Maintenance

Course Number: A-102-0303.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 4–5 weeks (184 hours).

Exhibit Dates: 4/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform preventative and corrective maintenance on a minicomputer system and a microprocessor driven system and use diagnostics to troubleshoot the processors, printers, display terminals, other peripherals, controllers and interfaces to the modular level.

Instruction: Lectures, demonstrations, handouts, transparencies and lab exercises are used to teach the student how to service and maintain a minicomputer system including the processor and various peripherals and interfaces. Software and firmware diagnostics are used to teach the troubleshooting of all devices to the modular level.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in minicomputer system maintenance (7/87).

NV-1402-0108

Universal Cryptologic Processor
Training PDP-11/70 Maintenance

Course Number: A-102-0293.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 10 weeks (440 hours).

Exhibit Dates: 7/83–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform preventive and corrective maintenance on the PDP-11/70 minicomputer and its associated peripherals.

Instruction: Group-paced lecture, practical demonstrations and laboratory work with a PDP-11/70 minicomputer and software diagnostics routines.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in introduction to minicomputers and 4 in minicomputer maintenance (7/87).

NV 1402-0109

Radio Frequency Distribution
Maintenance C1

Course Number: A-102-0304.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 6 weeks (200 hours).

Exhibit Dates: 3/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform preventative and corrective maintenance procedure on the AN/FRD-10 radio frequency distribution network and associated equipment (CDAA, CU-1382F/FRR, MX-6240/41/42/43, and GO-31).

Instruction: Group-paced lectures using A/V aids, demonstrations and laboratory exercises are used to teach the student the preventative maintenance and corrective maintenance procedures for the RFDN (AN/FRD-10 and associated equipment).

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (7/87).

NV-1402-0110

Universal Cryptologic Processor Training (UNCRYPT) RSX-11M/VMS FORTRAN, Class C

Course Number: A-532-0033.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 12 weeks (480 hours).

Exhibit Dates: 4/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to use the operating system RSX-11M for file manipulation, data volume preparation, intrasystem communication and algorithm development. The student will be able to design, code and test FORTRAN-77 programs that will initialize, maintain, sort and print data bases.

Instruction: Lecture and supervised laboratory sessions are used to teach the student use of RSX-11M operating system and FORTRAN-77 computer language for the operation and control of data bases.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in FORTRAN programming, 2 in RSX-11 operating system, and 2 in data base management (7/87).

NV-1402-0111

Radio Frequency Switch Matrix System Maintenance C1

Course Number: A-102-0319.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 12 weeks (360 hours).

Exhibit Dates: 3/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to service and maintain the computerized system - radio frequency switch matrix. The student will know the theory of operation and maintenance practices of the LSI 11/23 computer and associated disk drives, video terminals and printers.

Instruction: Lectures using transparencies and a combination of demonstration and lab exercises are used to instruct the student in the theory of operation and maintenance procedures of the LSI 11/23 computer, peripherals and the RFSW equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in computer system maintenance (7/87).

NV-1402-0112

Universal Cryptologic Processor Training (UNCRYPT) High Frequency Direction Finding (HFDF) Maintenance

Course Number: CDP 063F; A-102-0292.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 7 weeks (216 hours).

Exhibit Dates: 10/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform board level preventive and corrective maintenance on PDP 11 equipment contained in direction finding subsystems of the AN/FSQ-117 wideband system using knowledge of system instructions, timing architecture and system diagnostics.

Instruction: Group-paced lecture, practical demonstrations and laboratory work using the PDP-11, disk drives, DEC writer printer and video terminal.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in minicomputer maintenance laboratory (7/87).

NV-1402-0113

Multi-User Special Intelligence Communications Maintenance

Course Number: A-102-0287.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 7 weeks (280 hours).

Exhibit Dates: 8/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform effective, corrective and preventive maintenance on a PDP 11/70 based system, including peripherals consisting of asychronous and synchronous multiplexers, microprocessor, floating point processor, video terminal, Dec Writer II, dual programmable clock, and 'ML11 Megaram' memory.

Instruction: Classroom instruction and laboratory exercises involving troubleshooting to the module level. Student is required, using open book, notes manual, etc., to determine status of peripherals, and faults, using self tests, computer diagnostics, register bits, base addresses, syndromes in RAM error identification, and knowledge of system functions and operations.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer system maintenance and repair (7/87).

NV-1402-0114

Gun Fire Control System (GFCS) Mk 86 Consoles and Data Group Equipment Maintenance

Course Number: A-113-0099.

Location: Fleet Training Center, San Diego, CA; Service School Command, Great Lakes, IL; Fleet Combat Training Center, Dam Neck, VA.

Length: 31 weeks (814 hours).

Exhibit Dates: 6/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate, maintain, troubleshoot, and repair a general purpose computer and peripherals and special purpose operator display consoles.

Instruction: Instruction includes an in-depth diagnostics and repair course on a 32-bit multiprocessor digital computer which uses the DTL logic family. Also included are instructions on troubleshooting and repair of associated and peripheral equipment such as printer supplies, magnetic tape units, signal data transfer buffers, wide display systems, radar signal processors and C/O buffer systems. Extensive use of machine language instruction codes are used to isolate faults to the card or component level by interpreting front panel display and using an oscilloscope to verify the fault. Repairs are made to the card level. For previous versions see NV-1402-0106.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in minicomputer architecture, 3 in computer systems troubleshooting, and 3 in electronic systems troubleshooting (7/87).

NV-1402-0115

Machinery Systems Console Maintenance

Course Number: A-623-0112.

Location: Service Schools Command, Great Lakes, IL.

Length: 27 weeks (1080 hours).

Exhibit Dates: 4/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to troubleshoot and perform scheduled preventive maintenance and corrective maintenance for shipboard propulsion engineering control consoles.

Instruction: Multimedia presentation and practical exercises designed to provide interior electrician's mates with the knowledge and skills to troubleshoot and maintain shipboard control consoles and automatic control systems. Topics covered: review of math, electronic test equipment, AC/DC electricity, solid state devices, operational amplifiers, digital logic, microprocessors, memory, sensors, AD/DA converters, elementary physics, basic pneumatics, multiplexing, introduction to propulsion plants, diesel propulsion plant operating systems, damage control systems, diesel-driven electrical generating systems, steam-driven electrical generating systems.

Credit Recommendation: In the vocational certificate category, 6 semester hours in computer control systems maintenance, 1 in electric power generation (6/88); in the lower-division baccalaureate/associate degree category, 4 semester hours in basic electricity/electronics, 3 in introduction to digital devices, and 3 in basic electronics laboratory (6/88).

NV-1402-0116

Computer/Microprocessor Fundamentals

Course Number: A-121-0546.

Location: Service Schools Command, Great Lakes, IL.

Length: 3 weeks (116–117 hours).

Exhibit Dates: 4/88–Present.

Learning Outcomes: Upon completion of the course, the student will be able to demonstrate understanding and application of number systems, digital codes, 6800 architecture, instruction set, addressing modes, memory tapes, basic algorithm development, address decoding, basic I/O interfacing and the 6821 PIA chip.

Instruction: Classroom instruction and laboratory exercises using Heathkit ETW 3400 Microprocessor training covering the following topics: instruction set, number systems, addressing modes, architecture, interfacing techniques.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in microprocessors (6/88).

NV-1402-0117

OCEAN SURVEILLANCE INFORMATION SYSTEM (OSIS) BASELINE UPGRADE COMPUTER USER

Course Number: J-243-0995.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA.

Length: 4 weeks (160 hours).

Exhibit Dates: 7/88–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate the Ocean Surveillance Information System (OSIS) Baseline Upgrade (OBU) computer.

Instruction: Lectures, discussions, visual aids, and extensive student practical exercises covering these topics: OBU functional capabilities; OBU system components; computational analysis; data base management; message processing; and simulated ocean surveillance scenarios.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in data processing and 1 in computer operations (7/88).

NV-1402-0118

PROTOTYPE OCEAN SURVEILLANCE TERMINAL USER

Course Number: J-243-0940.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA.

Length: 1 week (45 hours).

Exhibit Dates: 11/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate the Prototype Ocean Surveillance Terminal (POST) microcomputer system.

Instruction: Lectures, discussions, visual aids, and laboratory covering these topics: System reports; editing messages; correlating data; data base functions; analysis functions; plot configuration; and system configuration.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in microcomputer applications (7/88).

NV-1402-0119

OCEAN SURVEILLANCE INFORMATION SYSTEM (OSIS) BASELINE UPGRADE SYSTEM MANAGEMENT

Course Number: J-243-0991.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA.

Length: 9 weeks (368 hours).

Exhibit Dates: 10/88–Present.

Learning Outcomes: Upon completion of the course, the student will be able to manage the operation of the Ocean Surveillance Information System (OSIS) Baseline Upgrade (OBU).

Instruction: Lectures, discussions, visual aids, and extensive student practical exercises covering these topics: Introduction to Naval intelligence; OBU system capabilities; OBU system operational software programs; OBU system malfunctions; configuration and reconfiguration techniques; fault monitoring capabilities; maintenance coordination; security management, and data base management functions.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in data base management systems, 2 in data processing, and 2 in computer operations (7/88).

NV-1402-0120

AEGIS FUNDAMENTALS

Course Number: S-150-0240; A-150-0240.

Location: Aegis Training Center, Dahlgren, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 12/85–Present.

Learning Outcomes: Upon completion of the course the student will be able to understand the behavior of basic logic elements, such as gates, memory, encoders/decoders, analog-to-digital/ digital-to-analog conversion, and multiplexers; and comprehend concepts of digital computer organization and programming.

Instruction: For this course before 12/85 see NV-1402-0059. Course contains a brief overview of digital logic and computers.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hours in digital principles (12/88).

NV-1402-0121

FC-1114 COMBAT SYSTEM COMPUTER SYSTEM MAINTENANCE TECHNICIAN

Course Number: A-150-0239; S-150-0239.

Location: Aegis Training Center, Dahlgren, VA.

Length: 20 weeks (776 hours).

Exhibit Dates: 1/86–Present.

Learning Outcomes: Upon completion of the course the student will be familiar with the operational maintenance of a computer system used to control a complex phased-array radar system. Student will be able to perform preventive maintenance and troubleshoot to the circuit card level, load software and operate the system.

Instruction: An in-depth study of a system-level course on the operation and maintenance of computer control and signal processing equipment for a radar system. The course is approximately 50% lecture and 50% practical application.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in computer systems and organization and 4 in computer systems troubleshooting and maintenance (12/88).

NV-1402-0122

MAGNETIC DISK FILE THEORY AND MECHANICAL MAINTENANCE FCS MK MOD 0

Course Number: A-121-0429.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 2 weeks (49 hours).

Exhibit Dates: 6/82–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform all corrective maintenance on the magnetic disk file subsystem.

Instruction: Lecture and laboratory on the theory, operation, and maintenance of disk pack, mechanical drive, hydraulic actuator, and carriage assembly of a magnetic disk file subsystem. Instruction also included on special tools and test equipment to align, adjust, and calibrate the magnetic disk file subsystem.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in computer repair technology (2/89).

NV-1402-0123

TRIDENT DEFENSIVE WEAPONS SUBSYSTEM/COMMAND SUBSYSTEM (DWS/CS) LEVEL I

Course Number: A-130-0227.

Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.

Length: 11 weeks (322 hours).

Exhibit Dates: 7/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate and maintain, under supervision, a command and control system.

Instruction: Lectures and laboratory exercises in the basic theory, functions, operation and maintenance of a computer-controlled system with multiple inputs and outputs.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in the operation and maintenance of computer control system (2/89).

NV-1402-0124

MK 118 FIRE CONTROL SYSTEM ADVANCED MAINTENANCE

Course Number: A-130-0233.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 3 weeks (81 hours).

Exhibit Dates: 9/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate and maintain advanced maintenance procedures for the Mk 118 Fire Control System.

Instruction: Lectures and laboratory exercises in the theory, operation, and maintenance of power supplies, I/O control and test circuits of fire control systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in computer control applications laboratory (2/89).

NV-1402-0125

ADVANCED DEFENSIVE WEAPONS SUBSYSTEM COMMAND SUBSYSTEM OPERATOR

Course Number: A-130-0231.

Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.

Length: 2 weeks (52 hours).

Exhibit Dates: 5/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to qualify as a console operator by demonstrating the advanced operating procedures for the battle stations fire control party.

Instruction: Lectures and laboratory exercises on the theory, operation, and maintenance of defensive weapons subsystems. Topics include sonar displays, radar displays, and controls.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in computer control applications laboratory (2/89).

NV-1402-0126

DISPLAY CONSOLE OJ-326(V)/UYK AND DIGITAL DISPLAY INDICATOR IR-1181/UYK MAINTENANCE PHASE II

Course Number: A-150-0251.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 3 weeks (88 hours).

Exhibit Dates: 11/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform corrective maintenance of the memory and display functional areas of display console.

Instruction: Lectures and laboratory on the theory, operation, and maintenance of display consoles. Topics also covered on test equipment to perform alignment, adjustment, and calibration procedures on digital display indicators.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in digital systems (2/89).

NV-1402-0127

Display Console OJ-326(V) 1-4/UYK and Digital Display Indicator IP-1181/UYK Maintenance Phase I

Course Number: A-150-0216.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 4 weeks (105 hours).

Exhibit Dates: 9/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to provide corrective maintenance of power/cooling and interface functions of the display console.

Instruction: Lectures on the theory, operation, and maintenance of display console with topics on logic levels, memory size and accuracy, inputs and outputs, and data multiplexing.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in computer display systems (2/89).

NV-1402-0128

Display Console OJ-326(V)/UYK and Digital Display Indicator IP-1181/UYK Maintenance Phase III

Course Number: A-150-0252.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 2 weeks (48 hours).

Exhibit Dates: 1/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform corrective maintenance of the analog functions of a display console.

Instruction: Lecture and laboratory activities on the operation and maintenance of display console with coverage inputs, outputs, data multiplexing, and display controls.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in A/D and D/A conversions (2/89).

NV-1402-0129

Target Data Processing (TDP) Maintenance Class C

Course Number: J-130-0296.

Location: Fleet Anti-Submarine Training Center, Norfolk, VA.

Length: 19–20 weeks (790 hours).

Exhibit Dates: 7/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to troubleshoot and repair a specific computer and its peripherals.

Instruction: Lectures and practical exercises related to the theory of operation and troubleshooting procedures for a computer, magnetic tape unit, keyset, display, printer, and plotter.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer troubleshooting and maintenance and 2 in computer systems and organization (3/89).

NV-1402-0130

Automatic Data Processing Maintenance

Course Number: J-130-0298.

Location: Fleet Anti-Submarine Warfare Training Center, Norfolk, VA.

Length: 13–14 weeks (503 hours).

Exhibit Dates: 6/86–Present.

Learning Outcomes: Upon completion of the course the student will be able to troubleshoot and repair a specific computer system and its peripherals.

Instruction: Lectures and practical exercises related to the theory of operation and troubleshooting procedures for a computer, printer, disk drive, video display terminal, and multiplexer.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer systems and organization and 3 in computer systems troubleshooting and maintenance (3/89).

NV-1402-0131

Shipboard Non-Tactical Automatic Data Processing (ADP) Program II (SNAP II) AN/UYK-62(V) Maintenance

Course Number: A-150-0255.

Location: Fleet Training Center, Norfolk, VA; Service School Command, San Diego, CA.

Length: 3–4 weeks (145 hours).

Exhibit Dates: 1/89–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate and maintain specific shipboard data processing systems, including tape units, disk storage, keyboard, video terminal, printer, paper tape reader/punch, and power supply.

Instruction: Lecture and practical exercises in operation and corrective/preventive maintenance of data processing systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in computer systems troubleshooting and maintenance (3/89).

NV-1402-0132

Integrated Submarine Automated Broadcast Processing System

Course Number: A-101-0140.

Location: Fleet Training Center, Norfolk, VA.

Length: 15 weeks (597 hours).

Exhibit Dates: 11/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate and maintain the equipment in a submarine automated broadcast processing system.

Instruction: Lectures and practical exercises on operation, troubleshooting and repair of communications equipment and a computer system and its peripherals.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in computer systems and organization and 3 in computer systems troubleshooting and maintenance (3/89).

NV-1402-0133

AN/WSC-6(V) Operator

Course Number: A-260-0046.

Location: Fleet Training Center, Norfolk, VA.

Length: 3 weeks (120 hours).

Exhibit Dates: 10/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate a specific satellite communications set modem (data link).

Instruction: Lectures and practical exercises in operation of the communication set modem.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/89).

NV-1402-0134

Command and Control System (CCS) Advanced Level III

Course Number: A-150-0202.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 5 weeks (134 hours).

Exhibit Dates: 6/85–Present.

Learning Outcomes: Upon completion of the course, the trainee will be able to describe the types of signals, signal flow, inputs and output, coding, timing relationships, sequential operation, circuits and registers found in the Digital Data Computer CPU. Trainee will be able to perform standard and non standard operational test to support maintenance at the board level.

Instruction: Lecture and laboratory exercises on the following subsystems of the AN/UYK-7(V) Digital Data Computer: 1. Power supply 2. CPU 3. I/O Control Unit 4. Care Memeory Unit 5. Film Memeory Unit 6. Operator Control Unit.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer maintenance/operations (3/89).

NV-1402-0135

Trident Command and Control System Level One

Course Number: A-150-200.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 16 weeks (640 hours).

Exhibit Dates: 3/89–Present.

Learning Outcomes: Upon successful completion of this course the trainee will be able to state the purpose of the Trident Command and Control System, define the abbreviations, terms and symbols used with the CCS, describe all major and associated subsystems of the CCS and the location of each.

Instruction: Laboratory and lecture on the following subsystems that comprise the CCS: 1) Sonar, 2) Interior/Exterior Communications, 3) Ship Control, 4) Data Processing, 5) Passive RF Monitoring, 6) Defensive Weapon/Command Subsystem, 7) Tactical Navigation, and 8) Monitoring Subsystem.

Credit Recommendation: In the vocational certificate category, 3 semester hours in digital computer system operation, and 3 in digital signal processing (3/89).

NV-1402-0136

Trident Command and Control System Level 2

Course Number: A-150-0201.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 4 weeks (115 hours).

Exhibit Dates: 1/85–Present.

Learning Outcomes: Upon successful completion of this course the trainee will be able to define the abbreviations, terms and symbols used with the AN/UYK-7(V) to support basic corrective maintenance, describe all major and associated components of the Digital Data Computer (DDC), describe the organization, control and use of all technical docomentation necessary for basic corrective maintenance.

Instruction: Lecture and laboratory exercises on the following subsystems of the AN/UYK-7(V) Digital Data Computer: 1) Power Supply, 2 (Control Processor, 3) I/O Controller Unit, 4) Core Memory, 5) Film Memory Unit, and 6) Operator Control Unit.

Credit Recommendation: In the vocational certificate category, 3 semester hours in computer operations (3/89); in the lower-division baccalaureate/associate degree category, 3 semester hours in computer maintenance laboratory (3/89).

NV-1402-0137

Fire Control System Mk 98 Mod 0 Advanced Technician

Course Number: A-121-0525.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 2 weeks (80 hours).

Exhibit Dates: 4/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to define terms, abbreviations and symbols associated with the Mk 98 Fire Control System (FCS), perform operational/fault isolation and repair on the FCS, described and use special tools and test equipment required for resolder and wire wrap connections while on patrol.

Instruction: Lecture and laboratory exercise on the functional operation and mechanization of the following FCS Subsystems: 1. Power 2. Data Communications Processor 3. Master Clock and Timing 4. Keyboard and display 5. Printer 6. Data Conversion and 7. Magnetic taper.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in Data Acquisition laboratory (3/89).

NV-1402-0138

Digital-to-Digital Converter CV-2342 B/UYK Maintenance

Course Number: A-193-0339.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 2 weeks (76 hours).

Exhibit Dates: 2/83–Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe in detail all major and associated components of th the CV-2343B/UYK Digiatal to Digital Inverter. Describe in detail th physical interface(s) between the DID converter and all associated equipment. Perform all authorized fault isolation and repair procedures with respect to the CV-2342B/UYK DID Converter.

Instruction: Lecture and laboratory exercises in the theory and operation of DID converters supporting corrective maintenance procedures on the CV-2342B/UKY converter.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in digital systems maintenance laboratory (3/89).

NV-1402-0139

Flat Panel Display Terminal Maintenance

Course Number: A-193-0361.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 2 weeks (80 hours).

Exhibit Dates: 11/82–Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe the functional operation and procedures necessary to support corrective maintenance of the Flat Panel Display Terminal (FPDT). Perform all authorized fault isolation and repair procedures on the FPDT.

Instruction: Lecture and laboratory exercise supporting corrective maintenance procedures on the Flat Panel Display Terminal including detailed circuit analysis, inputs, outputs, and turning relationships of signals.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (3/89).

NV-1402-0140

Magnetic Disk File (MDF), Theory and Electrical Maintenance FLS Mk 98 Mod 0

Course Number: A-121-0428.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 3 weeks (79 hours).

Exhibit Dates: 3/89–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform preventive and authorized fault isolation/repair procedures on the Magnetic Disk file Subsystem (MDFSS).

Instruction: Lecture and Laboratory exercise in support of preventive and corrective maintenance of the Magnetic Disk File Subsystem.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (3/89).

NV-1402-0141

Computer CP-890 A&B/UYK Processor Maintenance 1

Course Number: A-193-0336.

Location: Submarine School, Groton/New London, CT; Submarine Training Facility, Charleston, SC; Trident Training Facility, Bangor, WA.

Length: 3 weeks (112 hours).

Exhibit Dates: 7/83–Present.

Learning Outcomes: Upon completion of the course the student will be able to work problems in Boolean algebra, work with memories, I/O devices, clock circuits, registers, and other components of a basic computer; operate associated power supplies, and perform maintenance on the equipment.

Instruction: Lectures and laboratories on the maintenance of digital computers.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer systems troubleshooting and maintenance (10/89).

NV-1402-0142

Radio Navigation Set AN/BRN-3B Data Processor Maintenance

Course Number: A-193-0260.

Location: Submarine School, Groton/New London, CT; Submarine Training Facility, Charleston, SC.

Length: 2 weeks (71 hours).

Exhibit Dates: 7/83–Present.

Learning Outcomes: Upon completion of the course the student will be able to troubleshoot, repair, and maintain a special purpose computer associated with a radio navigation set.

Instruction: Lectures and practical exercises on the maintenance of the equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in computer systems troubleshooting and maintenance (10/89).

NV-1402-0143

Digital Control Computer Peripheral Equipment Advanced Maintenance Fire Control System Mk 88 Mod 1

Course Number: A-121-0290.

Location: Submarine School, Groton/New London, CT; Submarine Training Facility, Charleston, SC.

Length: 2 weeks (80 hours.)

Exhibit Dates: 4/85–Present.

Learning Outcomes: Upon completion of the course the student will be able to perform diagnostic checks, operate, and maintain the keyboard/intercomputer link including printer and tape reader of a special purpose computer.

Instruction: Lectures and practical exercises on the computer and its peripherals.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in computer systems troubleshooting and maintenance (10/89).

NV-1402-0144

Combat Control Subsystems Mk 1 Mod 0 Pipeline Maintenance

Course Number: A-113-0132.

Location: Submarine School, Groton/New London, CT.

Length: 23 weeks (1272 hours).

Exhibit Dates: 2/89–Present.

Learning Outcomes: Upon completion of the course the student will be able to describe the component parts of the digital computer including arithmetic logic unit, address registers, disk processor, controllers and drivers, input/output circuits, data bit storage, buffers, and displays. Student is able to maintain, troubleshoot and repair a digital computer system including fault isolation and logic tests, and is able to align, adjust, and calibrate computer equipment.

Instruction: Lectures and practical exercises with emphasis on computer organization and maintenance.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer systems and organization and 3 in computer systems troubleshooting and maintenance (10/89).

NV-1402-0145

AN/UYK-20(V) Basic Maintenance

Course Number: A-150-0267.

Location: Submarine School, Groton/New London, CT.

Length: 2 weeks (79 hours).

Exhibit Dates: 8/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate, maintain, troubleshoot and repair basic data processing equipment using common and specialized test equipment.

Instruction: Lectures and practical exercises including signal flow, input/output devices, registers, processors, power supplies and test equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category,

gory, 2 semester hours in computer systems troubleshooting and maintenance (10/89).

NV-1402-0146

Digital to Digital Converter CV-2342/UYK Maintenance

Course Number: A-193-0252.

Location: Submarine School, Groton/New London, CT; Submarine Training Facility, Charleston, SC.

Length: 2 weeks (76 hours).

Exhibit Dates: 3/84–Present.

Learning Outcomes: Upon completion of the course the student will be able to troubleshoot, repair, and maintain a digital-to-digital converter.

Instruction: Lectures and laboratory exercises on the characteristics and maintenance of a digital-to-digital converter, including serial-to-parallel buffer and digital-to-analog buffer. Instruction provided on testing, isolating faults, and repairing the digital to digital converter.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic systems troubleshooting and maintenance (10/89).

NV-1402-0147

Digital Control Computer Missile Interface FCS Mk 88 Mod 1

Course Number: A-121-0291.

Location: Submarine Training Facility, Charleston, SC; Submarine School, Groton/New London, CT.

Length: 2-3 weeks (104 hours).

Exhibit Dates: 8/81–Present.

Objectives: Upon completion of the course the student will be able to operate, maintain, and troubleshoot the interface circuits for a digital control computer missile.

Instruction: Theory and practical exercises in the circuitry for operation and repair of the interface circuits of the system including digital inputs and parallel-to-serial converters.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic systems troubleshooting and maintenance (10/89).

NV-1402-0148

Digital Combat Systems Common Core

Course Number: A-113-0113.

Location: Submarine School, Groton/New London, CT.

Length: 18 weeks (604 hours).

Exhibit Dates: 12/85–Present.

Learning Outcomes: Upon completion of the course the student will be able to troubleshoot and repair an electronic control system and general purpose computer and describe general computer architecture and data and signal flow.

Instruction: Lectures and practical exercises in computer organization, troubleshooting and corrective maintenance.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer systems and organization, 3 in electronic systems troubleshooting and maintenance, and 3 in computer systems troubleshooting and maintenance (10/89).

NV-1402-0149

1. Shipboard Uniform Automated Data Processing System- Real Time Operations and Management
2. Shipboard Uniform Automated Data Processing System (SUADPS) 207/AV207

Course Number: A-551-0085.

Location: Fleet Training Center, Norfolk, VA; Service School Command, San Diego, CA.

Length: *Version 1:* 10 weeks (400 hours). *Version 2:* 4 weeks (160 hours).

Exhibit Dates: *Version 1:* 1/90–Present. *Version 2:* 9/83–12/89.

Learning Outcomes: *Version 1:* Upon completion of the course the student will be able to supervise and operate the processes associated with an on-line real-time computer system supporting all aspects of the shipboard function of maintenance, supply, financial, and personnel administration. *Version 2:* Upon completion of the course the student will be able to supervise and operate the processes associated with a batch-based minicomputer which handles the ship's support functions: supply, maintenance, financial, and personnel administration.

Instruction: *Version 1:* Lectures, demonstrations, assignments and examinations. Topics covered include system design, flow, element-level design and description and internal and external interfaces to support activity for procurement, material receipt, storage, disbursement, financial reporting, and reconciliation to higher level accounting systems. *Version 2:* Lectures, demostrations, assignments and examinations. Topics include processing inventory system activity for procurement, material receipt, storage, disbursement, inventory, parts master files, financial reports, and reconciliation to higher level accounting systems.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in automated data processing operations and 3 in automated data processing systems (12/89). *Version 2:* 3 semester hours in automated data processing systems (12/89).

NV-1402-0150

Shipboard Non-Tactical Automatic Data Processing (SNAP I) System Enlisted Supervisor/Operator

Course Number: A-532-0029.

Location: Fleet Training Center, Norfolk, VA; Service School Command, San Diego, CA.

Length: 3 weeks (116 hours).

Exhibit Dates: 11/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to supervise the operation of an automatic data processing system. This computer-based system is designed to provide for on-line, real-time interactive support of the ship's maintenance, supply, financial, and administrative functions.

Instruction: Methods of instruction use include lectures and practical exercises in the operation and use of the computer in the support functions of the ship. Topics include the supply system, computer hardware and software, computer operations, and operation of the various support subsystems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in automated data processing (12/89).

NV-1402-0151

Shipboard Non-Tactical Automatic Data Processing (SNAP) II System Coordinator

Course Number: A-551-0018.

Location: Fleet Training Center, Norfolk, VA; Service School Command, San Diego, CA; Fleet Training Group, Pearl Harbor, HI; Trident Training Center, Bangor, WA; Submarine School, Groton/New London, CT; Trident Training Facility, Kings Bay, GA; Fleet Mine Warfare Training Center, Charleston, SC.

Length: 2 weeks (80 hours).

Exhibit Dates: 3/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to supervise and operate a computer-based system designed to provide for on-line, real-time interactive support of the ship's maintenance, supply, financial, and administrative function.

Instruction: Methods of instruction include lectures and practical exercises in operation and use of the computer in the support functions of the ship. Topics covered include the supply system, the computer hardware and software, computer operations, and operation of the various support subsystems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in data processing operations (12/89).

NV-1402-0152

Shipboard Non-Tactical Automatic Data Processing (SNAP II) Storekeeper Afloat

Course Number: A-551-0093.

Location: Fleet Training Center, Norfolk, VA; Service School Command, San Diego, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 5/89–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate a specific nontactical minicomputer system. The student will be able to operate the computer to satisfy a diverse range of administrative and managerial support requirements.

Instruction: Classroom lectures, discussion, hands-on equipment exercises, in-class assignments, and examinations are the instructional methodologies. Topics include basic operation of a line printer, card reader, paper tape reader/punch, keyboard video display terminal; basic operation of the ship's nontactical computer system and the following subsystems: supply and financial management, supply control, inventory, requirements and requirement processing, receipt processing, material expenditures, integrated logistics management, and reports.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in computer operations and 3 in inventory control procedures (12/89).

NV-1402-0153

Shipboard Non-Tactical Automatic Data Processing (SNAP) 3-M Coordinator/Inspector

Course Number: J-500-0029.

Location: Fleet Training Center, Norfolk, VA; Fleet Training Center, San Diego, CA; Fleet Mine Warfare Training Center, Charleston, SC; Fleet Training Group, Pearl Harbor, HI; Submarine School, Groton/New London, CT; Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, WA.

Length: 2 weeks (80 hours).

Exhibit Dates: 3/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to apply the principles and solve the problems and resolve situations encountered in duties as a maintenance, material, management coordinator as applied to a specific minicomputer system. The student will operate the system and control maintenance inventory.

Instruction: Lectures, classroom discussions, exercises, equipment operation, and examinations. Topics include concepts of a planned maintenance system, computer operation, maintenance management, maintenance data accounting, and inventory control.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in computer operations and 1 in inventory control procedures (12/89).

NV-1402-0154

NAVAL AVIATION LOGISTICS DATA ANALYSIS (NALDA)

Course Number: None.

Location: Various locations, Continental U.S.

Length: 2 weeks (80 hours).

Exhibit Dates: 3/82–Present.

Learning Outcomes: Upon completion of the course the student will be able to describe general data base concepts and write commands and programs to extract data from the data base.

Instruction: Lectures and practical exercises focused on the query of a naval logistics data base. Topics include records, fields, keys, indexes, access time considerations, boolean algebra, and query methods.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in data base programming (6/90).

NV-1403-0001

NEUROPSYCHIATRIC CLERICAL TECHNIC

Course Number: Not available.

Location: Naval Hospital, Bethesda, MD.

Length: 16 weeks (640 hours).

Exhibit Dates: 1/63–12/68.

Objectives: To train enlisted personnel as neuropsychiatric clerical technicians.

Instruction: Lectures and practical exercises in neuropsychiatric terminology and nomenclature, special regulations, vital statistics, and consultation and clinical management.

Credit Recommendation: In the upper-division baccalaureate category, credit in medical record administration, social work, or hospital administration on the basis of institutional evaluation (7/74).

NV-1404-0001

POSTAL CLERK, CLASS A

Course Number: None.

Location: Service School Command, San Diego, CA; Service School Command, Bainbridge, MD.

Length: 3–5 weeks (90–150 hours).

Exhibit Dates: 9/62–1/88.

Objectives: To provide enlisted personnel with the technical training necessary to perform duties in the Naval postal service.

Instruction: Lectures and practical exercises in typing, operation of postal procedures; and on-the-job training in the operation of the Navy post office.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1404-0002

INTERNATIONAL MORSE CODE OPERATOR (Intermediate Morse Code Operator, Class C)

Course Number: A-580-0015; A-201-0021; A-201-0022; A-580-0019.

Location: Training Center, San Diego, CA; Radioman School, Bainbridge, MD.

Length: Self-paced 1–12 weeks (280–360 hours).

Exhibit Dates: 7/69–1/88.

Objectives: To train enlisted personnel to receive and transmit international Morse code.

Instruction: Lectures and practical exercises in receiving and transmitting international Morse code, radiotelegraph messages, prosign and operating signals, call signs and address groups, circuit operation, and distress communications.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/74).

NV-1404-0003

COMMUNICATION OFFICER FLEET (Communication Officer Afloat)

Course Number: A-4C-0010.

Location: Naval Education and Training Center, Newport, RI.

Length: 8–12 weeks (233–367 hours).

Exhibit Dates: 1/67–1/88.

Objectives: To train commissioned officers to perform as fleet communications officers.

Instruction: Lectures and practical exercises in fleet communications. Topics include communications procedures, equipment and systems, cryptographic operations, and registered publications systems. A limited amount of instruction is given in electronics in support of the primary goal and objective of the course.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (6/74).

NV-1404-0004

COMMUNICATIONS TECHNICIAN T AND R BASIC PREPARATORY, CLASS A

Course Number: A-230-011.

Location: Communications Training Center, Pensacola, FL.

Length: 10 weeks (350 hours).

Exhibit Dates: 9/69–1/88.

Objectives: To train enlisted personnel to perform as communications operators.

Instruction: Lectures and practical exercises in the duties of communications operators. Course includes Morse code reception (13 words/minute), intensive practice on touch-typing (25 words/minute), and the principles of communication and radio equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in typing (6/74).

NV-1404-0005

COMMUNICATIONS OFFICER (SHORT COURSE)

Course Number: Not available.

Location: Communication Officer School, Newport, RI.

Length: 8 weeks (246 hours).

Exhibit Dates: 7/57–12/68.

Objectives: To train officers in communications procedures.

Instruction: Lectures and practical exercises in communications procedures, including message preparation, message types and formats, communications systems, electronic communications equipment, administration procedures, broadcasts, circuits, watch requirements, special communications situations and conditions, electronic warfare, cryptography and special codes, postal services, commercial communications, and security and censoring procedures in communications.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (12/68).

NV-1404-0006

NAVAL AMPHIBIOUS COMMUNICATIONS

Course Number: H-4C-5215.

Location: Amphibious School, Coronado, CA.

Length: 2 weeks (74 hours).

Exhibit Dates: 3/72–1/88.

Objectives: To provide background and knowledge in communication practices, techniques, and requirements unique to amphibious operation.

Instruction: Lectures and practical exercises in communications, administration, amphibious concepts and organization, operations order, communication equipment and systems, and security.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/74).

NV-1404-0007

DYNALEC AUTOMATIC TELEPHONE SYSTEM MAINTENANCE, CLASS C1

Course Number: A-623-0047.

Location: Service School Command, Great Lakes, IL.

Length: 6 weeks (180 hours).

Exhibit Dates: 8/76–1/88.

Objectives: To train telephone system technicians in the operation, adjustment, and maintenance of the 100/150 line automatic dial telephone system.

Instruction: Instruction in subsystems related to an automatic dial telephone system including automatic switchboards, crossbar switching, manual switchboard, and troubleshooting and maintenance techniques for the telephone system.

Credit Recommendation: In the vocational certificate category, 3 semester hours in telephone system operation (9/77).

NV-1404-0008

RADIOMAN CLASS A SHORE DUTY

Course Number: A-202-0027.

Location: Service School Command, San Diego, CA.

Length: 2 weeks (56 hours).

Exhibit Dates: 2/82–Present.

Objectives: To train personnel in shore radio operating practices.

Instruction: Lectures and operating practice in shore radio communications including communication organization, message preparation, use of tape cutters, use of teletypes, video terminals and communications practice.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in typing (5/82).

NV-1404-0009

RADIOMAN CLASS A SEA DUTY

Course Number: A-202-0026.

Location: Service School Command, San Diego, CA.

Length: 3 weeks (112 hours).

Exhibit Dates: 2/81-Present.

Objectives: To train personnel in shipboard radio operating practice.

Instruction: Operating practice in shipboard radio communications including communications equipment orientation, patch panels, operations and communications practice.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in communication equipment operations laboratory (5/82).

NV-1404-0010

DYNALEC 200/700 LINE AUTOMATIC TELEPHONE MAINTENANCE

Course Number: A-623-0100.

Location: Service School Command, Great Lakes, IL.

Length: 10 weeks (400 hours).

Exhibit Dates: 3/83-Present.

Objectives: To train personnel in the theory of operation, repair and troubleshooting of an electronic automatic dial telephone system.

Instruction: Lectures and practical exercises in the theory and operation of an electronic automatic line telephone system including system operating procedures, calls and the switching matrix, dial tone, call completion, manual switchboard, cut-in, restricted line, ring generators, alarms and related power supplies.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic telephone systems, 1 in electronic system troubleshooting (10/83).

NV-1404-0011

SUBMARINE DIGITAL TELETYPE COMBINED MAINTENANCE

Course Number: A-101-0251.

Location: Submarine School, Groton/New London, CT; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 4 weeks (162 hours).

Exhibit Dates: 10/87-Present.

Learning Outcomes: Upon completion of the course the student will be able to describe the functions of components of radio teletype transceivers and operate, troubleshoot, and repair them.

Instruction: Lectures and practical exercises on the teletype equipment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in radio teletype operation and maintenance (10/89).

NV-1404-0012

ADVANCED INTERNATIONAL MORSE CODE OPERATOR

Course Number: F-201-0210.

Location: Submarine School, Groton/New London, CT; Fleet Mine Warfare Training Center, Charleston, SC; Trident Training Facility, Kings Bay, GA.

Length: 6 weeks (240 hours).

Exhibit Dates: 1/89-Present.

Learning Outcomes: Upon completion of the course the student will be able to transmit and receive international Morse Code.

Instruction: Lectures and practical exercises designed for student proficiency in Morse code.

Credit Recommendation: In the vocational certificate category, 3 semester hours in Morse code (10/89).

NV-1405-0001

SHIP'S SERVICEMAN CLASS A
(Ship's Servicemen Recordskeeper)

Course Number: A-823-0012; A-823-0010; A-823-0011.

Location: Naval Technical Training Center, Meridian, MS; Naval School, San Diego, CA; Naval School, Norfolk, VA.

Length: *Version 1:* 4 weeks (160 hours). *Version 2:* 3 weeks (90 hours).

Exhibit Dates: *Version 1:* 7/83-Present. *Version 2:* 12/71-6/83.

Objectives: To train enlisted personnel to perform as ship's store recordskeepers.

Instruction: *All Versions:* Lectures on procurement and receipt of ship's store stock, inventory control, and records and returns. *Version 1:* Emphasizes retailing skills for ship's store operation.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in introduction to retailing (6/84) *Version 2:* Credit is not recommended because of the military-specific nature of the course (2/74).

NV-1405-0002

STOREKEEPER SUPPLY AFLOAT (DEPENDENT DUTY) CLASS C

Course Number: A-551-0069; A-551-0070.

Location: Naval Schools Command, Norfolk, VA.

Length: 5 weeks (150 hours).

Exhibit Dates: 12/71-1/88.

Objectives: To train students to function as ship's storekeepers under the direction of supply corps officers.

Instruction: Lectures on supply department publications; administration of supply organization afloat; procedures for receiving, storing, procuring, and inventory; records and files; and preparation of reports.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/74).

NV-1405-0003

SHOP STORES PROCEDURES, CLASS C

Course Number: A-610-0012.

Location: Construction Training Center, Port Hueneme, CA.

Length: 4 weeks (120 hours).

Exhibit Dates: 11/65-1/88.

Objectives: To train enlisted personnel to serve as shop storesmen of supply items needed locally by construction battalions for current repair, maintenance, or general use.

Instruction: Lectures and practical exercises in federal supply catalogs; bureau of yards and docks catalogs and material; cross-reference systems; commercial catalogs and parts lists; identification of parts and materials; and shop store organization and administration.

Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in supply management (7/74).

NV-1405-0004

AVIATION STOREKEEPER, CLASS A

Course Number: C-551-2010.

Location: Naval Technical Training Center, Meridian, MS; Air Technical Training Center, Memphis, TN; Air Technical Training Center, Jacksonville, FL.

Length: Self-paced 7-11 weeks (255-480 hours).

Exhibit Dates: 10/57-Present.

Objectives: To train enlisted personnel to perform as entrance-level aviation storekeepers.

Instruction: Lectures and practical exercises in entrance-level aviation storekeeping, including operation of adding machines, calculators, and typewriters; finance and accounting procedures; materials handling and storage; correspondence; receipt and issue procedures; and item identification.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in typing, 2 in inventory supervision (6/84).

NV-1405-0005

NAVY PURCHASE

Course Number: Not available.

Location: Bureau of Supplies and Accounts, Washington, DC.

Length: 4 weeks (114 hours).

Exhibit Dates: 2/61-12/68.

Objectives: To train enlisted personnel to handle the duties of a purchaser of goods and services.

Instruction: Lectures in purchasing practices and procedures. Course includes formal advertising, negotiation, contract administration, office administration, and future trends in purchasing.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in purchasing (6/74); in the upper-division baccalaureate category, 2 semester hours in principles of procurement (12/68).

NV-1405-0006

LINE OFFICER SUPPLY (LOS)

Course Number: A-8B-0013.

Location: Mine Warfare School, Charleston, SC.

Length: 3 weeks (90 hours).

Exhibit Dates: 11/71-1/88.

Objectives: To train line officers to perform as supply officers aboard minesweepers.

Instruction: Lectures and practical exercises on inventory management, financial management, and food service management, including duties of naval supply officer, organization and functions of supply department aboard minesweeper, material identification and classification, coordinated shipboard allowance list, supply operations and assistance program, military standard requisitioning and issue procedures, purchase and receipt of materials and services, and organization and administration of food services.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in inventory management (6/74).

NV-1405-0007

MARINE AVIATION SUPPLY (MECHANIZED), CLASS C

Course Number: C-551-2012.

Location: *Version 1:* Naval Technical Training Center, Meridian, MS. *Version 2:* Air Technical Training Center, Memphis, TN.

Length: *Version 1:* 10 weeks (380 hours). *Version 2:* 4 weeks (240 hours).

Exhibit Dates: *Version 1:* 5/76-Present. *Version 2:* 9/71-4/76.

Objectives: To train enlisted personnel in the performance of aviation supply duties.

Instruction: *All Versions:* Lectures and practical exercises in the fundamentals of aviation supply support including introduction to aviation supply, documents, equipment, management, Shipboard Uniform Automated Data Processing System (SUADPS), functions of GASSC under SUADPS, systems output, DUADPS operating procedures within GASSC, group aviation supply support center in operation, and electronic accounting machine and communications equipment. *Version 1:* Includes instruction in computer-oriented aviation supply support. *Version 2:* Includes instruction in mechanized supply support.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in computer-oriented materials management (6/84). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in materials management (6/74).

NV-1405-0008

MARINE AVIATION SUPPLY, CLASS C

Course Number: Not available.

Location: *Version 1:* Air Technical Training Center, Memphis, TN. *Version 2:* Air Technical Training Center, Memphis, TN. *Version 3:* Air Technical Training Center, Jacksonville, FL.

Length: *Version 1:* 10 weeks (400 hours). *Version 2:* 10 weeks (384 hours). *Version 3:* 6 weeks (240 hours).

Exhibit Dates: *Version 1:* 8/70-1/88. *Version 2:* 11/65-7/70. *Version 3:* 10/57-10/65.

Objectives: To train enlisted personnel in aviation supply procedures.

Instruction: *All Versions:* Lectures and practical exercises in aviation supply procedures, including correspondence, typing, material classification and cataloguing, technical publications, allowance lists, requisitioning, stock records and transactions, supply organization, mechanized procedures, management reports, and procurement procedures.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in typing, 3 in property accounting (6/74). *Version 2:* In the lower-division baccalaureate/associate degree category, 1 semester hour in typing, 3 in property accounting (6/74); in the upper-division baccalaureate category, credit in typing and property accounting on the basis of institutional evaluation (12/68). *Version 3:* In the lower-division baccalaureate/associate degree category, 1 semester hour in typing, 2 in property accounting (6/74); in the upper-division baccalaureate category, credit in property accounting on the basis of institutional evaluation (12/68).

NV-1405-0009

JOINT AVIATION SUPPLY AND MAINTENANCE MATERIAL MANAGEMENT

Course Number: A-8B-0020.

Location: Naval Supply Corps School, Athens, GA.

Length: 3 weeks (105 hours).

Exhibit Dates: 8/72-Present.

Objectives: To train commissioned officers in aviation material management.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) define the most commonly used maintenance/material and supply terms, acronyms or abbreviations relating to naval aviation, (2) select from a list of those activities directly involved in aviation logistic support and match each with its specific functional maintenance and/or supply responsibility, (3) describe the principles and procedures for maintenance and utilization of aviation stock control and procurement records, files, regulations and directives in terms of their application to the supply activity, (4) select from a list of supply support procedures, timely issue of material, control of repairable components, preparation and flow of documentation and reconciliation of records and requirements, (5) describe the wholesale/retail concept for the management of system supply stock.

Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in inventory management (7/83).

NV-1405-0010

AVIATION ORDNANCE OFFICERS (MANAGEMENT), CLASS O (AOM(O))

Course Number: Not available.

Location: Air Technical Training Center, Jacksonville, FL.

Length: 4 weeks (160 hours).

Exhibit Dates: 9/66-1/88.

Objectives: To train limited-duty, line, and aviation ordnance officers in ordnance management.

Instruction: Lectures and practical exercises in the duties of aviation ordnance officers, including aviation ordnance management, supply, standard Navy maintenance and material management system, safety and security, procurement and control management, and maintenance data collection and processing.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in supply management (12/68).

NV-1405-0011

SUPPLY ASHORE REFRESHER

Course Number: A-8B-0025.

Location: Naval Supply Center, Oakland, CA.

Length: 2 weeks (64 hours).

Exhibit Dates: 7/71-1/88.

Objectives: To train reserve officers to operate and manage supply activities ashore.

Instruction: Lectures and practical exercises in the operation and management of supply activities ashore. Course includes supply ashore operations and management, supply procurement, inventory control and warehousing, financial management, and distribution management within the military system.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/74).

NV-1405-0012

SUPPLY CORPS OFFICER BASIC QUALIFICATION - AVIATION MANAGEMENT

Course Number: A-8B-0044.

Location: Naval Supply Corps School, Athens, GA.

Length: 5 weeks (145 hours).

Exhibit Dates: 4/81-Present.

Objectives: To train officers in the management of aviation supplies.

Instruction: Lectures and discussion in basic aviation supply maintenance and material management including aviation storage procedures, aeronautical supply distribution systems and the management of high priority requisitions.

Credit Recommendation: In the vocational certificate category, 3 semester hours in material management (7/83); in the lower-division baccalaureate/associate degree category, 1 semester hour in material management (7/83).

NV-1405-0013

1. STOREKEEPERS (REPAIR PARTS), CLASS C
2. STOREKEEPERS (REPAIR PARTS), CLASS C

(Supply Storekeepers (Repair Parts), Class C-1)

Course Number: Not available.

Location: Storekeepers Class C School, Newport, RI.

Length: *Version 1:* 3 weeks (90 hours). *Version 2:* 5 weeks (150 hours).

Exhibit Dates: *Version 1:* 12/66-12/68. *Version 2:* 8/60-11/66.

Objectives: To train enlisted personnel to be storekeepers.

Instruction: Lectures and practical exercises in storekeeping, including appropriations, accounting, supplies procurement, storage inventory control, ordnance supply system, yards and docks supply system, electronic supply system, and introduction to ships machinery and repair parts supply system.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in supply management (7/74). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in supply management (7/74).

NV-1405-0014

BASIC QUALIFICATION COURSE OF THE SUPPLY CORPS

Course Number: A-8B-0012.

Location: Supply Corps School, Athens, GA.

Length: *Version 1:* 24-28 weeks (1,032-1,204 hours). *Version 2:* 26 weeks (650 hours). *Version 3:* 26 weeks (650-780 hours).

Exhibit Dates: *Version 1:* 10/72-12/74. *Version 2:* 8/67-9/72. *Version 3:* 6/57-7/67.

Objectives: To qualify officers to assume the duties normally associated with supply and disbursing in the U.S. Navy.

Instruction: Course covers supply management, personnel management, food service operations, retail operations, disbursing afloat, and computer operations.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in supply management and 1 in personnel administration (7/74). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in supply management and 1 in personnel administration (7/74); in the upper-division baccalaureate category, 4 semester hours in supply management and 2 in personnel administration (12/68). *Version 3:* In the lower-division baccalaureate/associate degree category, 3 semester hours in supply management and 1 in personnel administration (7/74); in the upper-division baccalaureate category, 4 semester hours in supply management and 3 in personnel administration (12/68).

NV-1405-0015

BASIC QUALIFICATION COURSE OF THE SUPPLY CORPS

Course Number: A-8B-0012.

Location: Supply Corps School, Athens, GA.

Length: 14-16 weeks (400-560 hours).

Exhibit Dates: 6/57-12/74.

Objectives: To train selected officers to assume the duties normally associated with supply and disbursing officers in the U.S. Navy.

Instruction: Course covers supply management, personnel administration, food service, retail operations, disbursing afloat, and computer operations.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in personnel administration (7/74); in the upper-division baccalaureate category, 3 semester hours in supply management and 2 in personnel administration (12/68).

NV-1405-0016

BASIC QUALIFICATION COURSE OF THE SUPPLY CORPS

Course Number: A-8B-0012.

Location: Supply Corps School, Athens, GA.

Length: 10 weeks (350 hours).

Exhibit Dates: 8/67-12/74.

Objectives: To prepare newly commissioned women officers to assume supply and disbursing duties during a period of mobilization.

Instruction: Lectures and practical exercises in supply management, personnel administration, food service, retail operations, disbursing afloat, and computer operations.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in supply management and credit in personnel administration on the basis of institutional evaluation (12/68).

NV-1405-0017

STOREKEEPER SUPPLY AFLOAT (INDEPENDENT DUTY), CLASS C

(Storekeepers (Independent Duty), Class C)

Course Number: A-551-0010; A-551-0011.

Location: *All Versions:* School Command, Norfolk, VA; School Command, San Diego, CA; *Version 2:* School Command, Newport, RI.

Length: *Version 1:* 6 weeks (240 hours). *Version 2:* 5 weeks (150 hours).

Exhibit Dates: *Version 1:* 8/77-Present. *Version 2:* 4/64-7/77.

Objectives: To train selected enlisted personnel as storekeepers aboard ship.

Instruction: *All Versions:* Training in the use of technical and administrative publications, catalogs, and allowance lists; acquisition, control, and issue of stores; financial accounting, stores storage and security, requirements determination; stores management organization; pricing and profit policies; inventory procedures; food service sales, controls, and records.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in supply management, 1 in food service records management (5/84). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in supply management (8/74).

NV-1405-0018

CARRIER GASOLINE AND INERT GAS SYSTEMS, CLASS C

Course Number: Not available.

Location: Air Material Center, Philadelphia, PA.

Length: 6 weeks (240 hours).

Exhibit Dates: 9/56-12/68.

Objectives: To train personnel in the operation and maintenance of carrier gasoline and inert gas systems.

Instruction: Lectures and practical exercises in carrier gasoline system operation and maintenance; carrier inert gas system operation and maintenance; and high capacity aviation fuel system operation and maintenance. Course covers: receiving and dispensing bulk quantities of liquid and gaseous materials; measuring liquid flow; and operating principles of inert gas storage systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in materials handling (7/74).

NV-1405-0019

SUPPLY CORPS OFFICER-BASIC QUALIFICATION

Course Number: A-8B-0012.

Location: Navy Supply Corps School, Athens, GA.

Length: 26-27 weeks (720-810 hours).

Exhibit Dates: 5/77-Present.

Objectives: To qualify officers to assume duties normally associated with supply and disbursing in the Navy.

Learning Outcomes: Upon completion of the course the student will be able to: (1) describe the integrated supply system and follow materiel management procedures for requisitioning, receiving and inventory management, (2) determine pay entitlements for Naval personnel; determine the cash requirements and follow proper accounting procedures for operating a disbursing office, (3) follow the procedures for procurement, receipt, pricing and sales of merchandise for a retail operator, and know the procedures for proper accounting and cash control, (4) perform quantitative analysis to include constructing a random sample of sufficient size for the degree of accuracy desired, and the computation and use of standard statistical measures. Also, design the input and output segments of an information processing system for a given situation, (5) know the procedures for operating food service activities and be able to audit the required documentation, (6) identify the nature and causes of problems in leadership and personnel management, list alternative solutions and justify the selected course of action.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in retail management, 2 in food service management, 2 in introduction to statistical methods, 1 in materiels management, 1 in accounting (8/83); in the upper-division baccalaureate category, 3 semester hours in industrial management, industrial psychology, leadership development or a management elective (8/83).

NV-1405-0020

AVIATION STOREKEEPER ADVANCED TRAINING CLASS C

Course Number: C-551-2016.

Location: Fleet Training Center, Norfolk, VA; Service School Command, San Diego, CA.

Length: 3-4 weeks (120-160 hours).

Exhibit Dates: 11/79-Present.

Objectives: To provide aviation storekeepers with advanced training as related to repairables management.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) prepare material requisitions, daily status reports, budget reports, logs, transmittal reports; (2) maintain control records and status reports; (3) validate visual information control boards against status reports; (4) perform inventory and tool control actions, and accounting and budgeting activities; (5) manage all repairable items given required documentation and; (6) demonstrate knowledge of special procedures and standard supply procedure.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in material and/or property control recordkeeping (12/89).

NV-1405-0021

UNACCOMPANIED PERSONNEL HOUSING MANAGEMENT, CLASS C

Course Number: A-800-0021.

Location: Naval Air Technical Training Center, Millington, TN.

Length: 3 weeks (120 hours).

Exhibit Dates: 7/83-Present.

Objectives: To train mess management specialists to manage housing in accordance with Navy policies.

Learning Outcomes: Upon completion of the course, the student will be able to manage, supervise and administer an unaccompanied personnel housing billet including such functions as central assignment and records desk operations, funding and budgeting procedures, controlling supplies, maintenance and custodial requirements, recreation, vending, security and the inspection of facilities.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in property management (3/85).

NV-1405-0022

INTEGRATED SHIPBOARD MAINTENANCE SUPPORT

Course Number: J-500-0041.

Location: Fleet Training Center, Norfolk, VA; Service School Command, San Diego, CA.

Length: 1-2 weeks (64 hours).

Exhibit Dates: 4/88-Present.

Learning Outcomes: Upon completion of the course the student will be able to describe an inventory control and maintenance system including referencing inventory control lists and microfiche, requisitioning parts, inventory control of all parts for receipt, disbursement, and correction; and adjustment to the system for errors or parts list modification.

Instruction: Classroom instruction via lectures and projects including completion of appropriate inventory receipt, disbursement and adjustment forms, calculation of inventory allowance amounts based on usage, and accessing information from various parts manuals and microfiche.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (12/89).

NV-1405-0023

SHIP'S STORE AFLOAT RESALE OPERATION MANAGEMENT SYSTEM USER

Course Number: A-823-0017.

Location: Fleet Training Center, Norfolk, VA; Service School Command, San Diego, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 8/88-Present.

Learning Outcomes: Upon completion of the course the student will be able to describe the operation of the Ship's Store Afloat Resale Operation Management (ROM) system and be able to operate the system.

Instruction: Methods of instruction include lectures and laboratory exercises in which the computer is set up and inputs prepared and entered. Topics include computer operation and handling of items, payments and records in the system.

Credit Recommendation: In the vocational certificate category, 2 semester hours in supply procedures (12/89).

NV-1406-0001

INSTRUCTOR TRAINING, CLASS C
(Instructor Training School Class C)

Course Number: C-012-2010.

Location: Air Technical Training Center, Memphis, TN.

Length: 4-5 weeks (160-200 hours).

Exhibit Dates: 8/57-1/88.

Objectives: To train military personnel in the basic principles of teaching in order to qualify them as instructors.

Instruction: Lectures and practical experience in the basic principles of teaching, including lesson planning, teaching situations and methods, training aids, testing and grading, and supervised practice teaching.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in instructional methods (1/74); in the upper-division baccalaureate category, 2 semester hours in instructional methods (12/68).

NV-1406-0002

TRADEVMAN I (INSTRUCTOR) CLASS A

Course Number: None.

Location: Air Technical Training Center, Memphis, TN.

Length: 14 weeks (560 hours).

Exhibit Dates: 1/54-7/65.

Objectives: To train enlisted personnel to teach basic physics and electricity.

Instruction: Lectures and practical experience in the fundamentals of physics and electricity, special electrical devices, basic equipment, operational procedures for instrument flight, basic teaching principles, and supervised practice teaching.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in instructional methods, 3 in physical sciences, 3 in aviation (1/74); in the upper-division baccalaureate category, 2 semester hours in instructional methods, and credit in electricity on the basis of institutional evaluation (12/68).

NV-1406-0003

ACADEMIC INSTRUCTOR TRAINING

Course Number: Q-2A-0065.

Location: Naval Aviation Schools Command, Pensacola, FL.

Length: 4 weeks (159-163 hours).

Exhibit Dates: 8/64-10/69.

Objectives: To prepare officers to be academic instructors of aviation training.

Instruction: Lectures in educational principles and methods, tests and measurements, leadership training, communication skills, and programmed instruction.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in instructional methods (12/68).

NV-1406-0004

1. INSTRUCTOR, CLASS C (CAREER INFORMATION AND COUNSELING)
2. PERSONNELMAN, CLASS C (CAREER INFORMATION AND COUNSELING)

Course Number: *All Versions:* A-500-011; A-500-012.

Location: Naval School, San Diego, CA; Naval School, Norfolk, VA.

Length: 3 weeks (90 hours).

Exhibit Dates: *Version 1:* 6/70-12/88. *Version 2:* 3/56-5/70.

Objectives: To train petty officers to perform as career counselors.

Instruction: Lectures in Navy career opportunities and benefits, civilian career opportunities, interviewing and counseling techniques, administrative procedures, human relations, and public speaking.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 2 semester hours in counseling and personnel classification (1/74). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in counseling and personnel classification (1/74); in the upper-division baccalaureate category, 3 semester hours in personnel classification (12/68).

NV-1406-0005

INSTRUCTIONAL PROGRAMMERS (CLASS C)

Course Number: C-570-2010.

Location: Naval Air Technical Training Center, Millington, Memphis, TN.

Length: 3 weeks (104 hours).

Exhibit Dates: 4/67-12/68.

Objectives: To provide enlisted personnel with a working knowledge of the basic principles of program writing.

Instruction: Lectures and laboratory experiences in basic principles of programming, learning objectives, the programmed instructional process, editing, and supervised program writing.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in programmed instruction techniques (12/68).

NV-1406-0006

INDIVIDUALIZED INSTRUCTION TECHNIQUES
(Programmed Instruction Writer)
(Programmed Instruction Techniques)

Course Number: A-012-0036; A-570-0014; A-570-0015; A-570-0016.

Location: Naval Training School, Great Lakes, IL; Naval Training School, San Diego, CA; Naval Training School, Norfolk, VA; Naval Training School, Millington, TN.

Length: 3 weeks (90-120 hours).

Exhibit Dates: *Version 1:* 5/77-Present. *Version 2:* 11/63-4/77.

Objectives: To train military and civilian personnel in the development and use of programmed instructional materials.

Instruction: *Version 1:* Lectures and demonstrations introducing the student to the basic principles of programmed instruction emphasizing objectives, application, materials development and evaluation. *Version 2:* Lectures in basic principles of programmed instruction, task analysis, developing and writing training objectives, writing linear programs, and reviewing and editing.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in programmed instruction techniques (3/82). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in programmed instruction techniques (12/68).

NV-1406-0007

TELEVISION INSTRUCTORS

Course Number: A-012-0025.

Location: Naval School, Washington, DC.

Length: 2 weeks (80 hours).

Exhibit Dates: 6/65-1/88.

Objectives: To train instructors in the basic principles of television teaching.

Instruction: Lectures in application and contribution of closed-circuit television, television systems and characteristics, equipment and technical personnel requirements, methods and techniques of television teaching, and preparation and demonstration of practice television lessons.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in television instruction (12/68).

NV-1406-0008

INSTRUCTOR BASIC
(Instructor, Class 1, Course "Alfa")

Course Number: *Version 1:* A-012-0011; A-012-0012; A-012-0013. *Version 2:* None.

Location: Instructor Training School, Newport, RI; Instructor Training School, Great Lakes, IL; Instructor Training School, Memphis, TN; Instructor Training School, San Diego, CA; Instructor Training School, New London, CT; Instructor Training School, Norfolk, VA; Instructor Training School, Bangor, WA. Instructor Training School, Pearl Harbor, HI. Instructor Training School, Dam Neck, VA. Instructor Training School, Charleston, SC. Instructor Training School, Groton, CT. Instructor Training School, Millington, TN.

Length: *Version 1:* 3-5 weeks (100-150 hours). *Version 2:* 4 weeks (120 hours).

Exhibit Dates: *Version 1:* 1/69-1/87. *Version 2:* 1/54-12/68.

Objectives: To train enlisted personnel as Naval training instructors.

Instruction: For this course after 1/87 see NV-1406-0018. Lectures in counseling, methods and techniques of instruction, training aids, lesson planning, test construction, evaluation of students, and practice teaching under simulated conditions.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 4 semester hours in instructional methods (3/82). *Version 2:* In the lower-division baccalaureate/associate degree category, 4 semester hours in instructional methods (1/74); in the upper-division baccalaureate category, 2 semester hours in instructional methods (12/68).

NV-1406-0009

OFFICER INSTRUCTOR INDOCTRINATION

Course Number: F-00-0014.

Location: Naval Submarine School, Groton, New London, CT.

Length: 2 weeks (86 hours).

Exhibit Dates: 12/79-Present.

Objectives: To train selected officers as instructors for Naval training.

Instruction: Lectures and practical demonstrations in instructional methods. The course provides an overview of learning objectives, methods and techniques of teaching, use of media and evaluation techniques.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in methods of instruction (3/82).

NV-1406-0010

RECRUIT PROCUREMENT, CLASS C

Course Number: A-501-0010; A-501-0011; A-000-026; A-000-027.

Location: Personnel Men, Class C School, Bainbridge, MD; Personnel Men, Class C School, San Diego, CA.

Length: *Version 1:* 7 weeks (210 hours). *Version 2:* 6 weeks (175 hours). *Version 3:* 6 weeks (175 hours).

Exhibit Dates: *Version 1:* 6/66-1/88. *Version 2:* 10/63-5/66. *Version 3:* 5/54-9/63.

Objectives: To train selected noncommissioned officers for assignment to general recruiting duty.

Instruction: Lectures in administrative procedures; recruiting directives, techniques, methods, and approaches; interviewing and public speaking; fundamentals of typewriting; and techniques of fingerprinting.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in public speaking and additional credit in typing on the basis of institutional evaluation (6/75). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in typing, 2 in communication skills, 2 in personnel procurement (2/74); in the upper-division baccalaureate category, credit in oral and written communication on the basis of institutional evaluation (12/68). *Version 3:* In the lower-division baccalaureate/associate degree category, 2 semester hours in public speaking, 2 in personnel procurement (2/74); in the upper-division baccalaureate category, credit in oral and written communication on the basis of institutional evaluation (12/68).

NV-1406-0011

SUPERVISION AND MANAGEMENT, CLASS C

Course Number: C-012-2011.

Location: Air Technical Training Center, Memphis, TN.

Length: 2 weeks (80 hours).

Exhibit Dates: 6/67-12/73.

Objectives: To provide training supervisors with basic instruction in the principles and techniques of supervision and in the methods used to improve and evaluate training and instruction.

Instruction: Lectures in the basic principles and techniques of supervision and in basic instruction-evaluation methods, including a survey of learning processes, programmed instruction, conference leadership, fundamentals of instructional supervision, management functions, and observation and counseling of trainees.

Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in training or supervision (2/74).

NV-1406-0012

1. MANAGEMENT ENGINEERING
2. WORK STUDY ANALYST
   (Fleet Work Study)

Course Number: S-500-0029; A-500-029; A-7C-015.

Location: Manpower and Material Analysis Center, Atlantic, Norfolk, VA.

Length: *Version 1:* 8 weeks (256 hours). *Version 2:* 6 weeks (173 hours).

Exhibit Dates: *Version 1:* 3/73-1/88. *Version 2:* 1/70-2/73.

Objectives: To train officer, enlisted, and civilian personnel in method study and work measurement.

Instruction: Lectures and practical exercises on method study and work measurement, including introduction to work and method study; process charting; introduction to the critical examination sheet, pert and network scheduling, operational sequence diagrams, and work measurement; time study; rating; activity sampling; synthesis data and analytical estimating; multiple-activity charting; and methods-time measurement.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in work study analysis (6/75). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in work study analysis (6/74).

NV-1406-0013

SHIPBOARD INSTRUCTOR

Course Number: A-012-0023.

Location: Fleet Training Center, Pearl Harbor, HI. Fleet Training Center, Norfolk, VA. Naval Submarine School, Groton, New London, CT.

Length: 2 weeks (65 hours).

Exhibit Dates: 6/81-Present.

Objectives: To train fleet personnel in instructional methods and use of materials for Naval training.

Instruction: Lectures and practical exercises in instructional techniques including use of instructional media materials, learning objectives and evaluation of student performance.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in methods and materials of instruction (3/82).

NV-1406-0014

CURRICULUM DEVELOPMENT FOR SUBMARINE SYSTEMS TRAINING PROGRAM (AND INTRODUCTION TO SUBMARINE SYSTEMS TRAINING PROGRAM)

Course Number: A-012-0044; A-012-0038.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Submarine School, Groton, CT; Service School Command, Great Lakes, IL: Guided Missile School, Dam Neck, VA; Service School Command, San Diego, CA; Naval Air Training Center, Memphis, TN; Submarine Training Facility, San Diego, CA; Trident Training Facility, Bangor, Bremerton ,WA; Fleet Ballistic Missile Submarine School, Charleston, SC.

Length: 1-3 weeks (16-82 hours).

Exhibit Dates: 2/84-Present.

Objectives: To provide the instructor with all the information needed to prepare for, and instruct in, the topics which have been assigned; upon successful completion of this course, the trainer will be able to apply the principles, rules, and concepts to solve specific problems associated with the submarine systems training program.

Instruction: This course is conducted through lecture and laboratory; it presents instruction in the preparation of instructor lesson plans, overhead transparencies, and other teaching aids. The trainee will be able to state the purpose of a task analysis and task inventory. Credit is recommended for A-012-0038 (Introduction to Submarine Systems Training Program) only when it is taken in conjunction with A-012-0044 (Curriculum Development for Submarine Systems Training Program).

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in methods of education for A-012-0044 (Curriculum Development for Submarine Systems Training) and, for those students completing A-012-0038 (Introduction to Submarine Systems Training Program), an additional 1 semester hour in methods of education. Credit may be granted (2 semester hours in methods of education) for A-012-0044 alone, but credit is not recommended for students completing only A-012-0038 (7/85).

NV-1406-0015

PERSONNEL MEN SCHOOL, CLASS C-1, ENLISTED CLASSIFICATION

Course Number: Not available.

Location: Personnelman Class C School, San Diego, CA.

Length: 4 weeks (120 hours).

Exhibit Dates: 10/56-12/68.

Objectives: To train enlisted personnel to be personnel administrators.

Instruction: Lectures and practical exercises in personnel administration, including naval classification system, interviewing principles, testing and evaluating work experiences, communications, naval occupational analysis, and organizational planning and work simplification.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in personnel administration (12/68).

NV-1406-0016

NAVY RECRUITING ORIENTATION
(Recruiter Canvasser)

Course Number: None.

Location: Navy Recruiting Orientation Unit, Orlando, FL.

Length: 5 weeks (180 hours).

Exhibit Dates: 1/79-Present.

Objectives: To prepare the student to enter the sales field with a thorough knowledge of the fundamentals of selling.

Instruction: Lectures, discussion and role-playing activities in the fundamentals of selling including the standard procedures of community research, prospect qualifying, product and/or service information and closing a sale. Visuals and audio visuals are used extensively in presentation.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in salesmanship (3/83).

NV-1406-0018

1. INTERVIEWING AND CLASSIFICATION
2. PERSONNELMAN, CLASS C-1, INTERVIEWING AND CLASSIFICATION

Course Number: *All Versions:* A-500-0013.

Location: Personnelman Class C School, San Diego, CA.

Length: *Version 1:* 8 weeks (240 hours). *Version 2:* 8-10 weeks (240 hours).

Exhibit Dates: *Version 1:* 4/67-1/87. *Version 2:* 5/54-3/67.

Objectives: To provide enlisted naval personnel with the technical knowledge required to perform duties as job classifiers and interviewers.

Instruction: Course covers vocational counseling and testing, survey of occupational titles, recording work experience, public speaking, and interviewing techniques.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in job evaluation (7/74). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in job evaluation (7/74); in the upper-division baccalaureate category, 3 semester hours in personnel classification (12/68).

NV-1406-0019

Group-Paced Instructor

Course Number: A-012-0011.
Location: Naval installations, Worldwide.
Length: 4 weeks (128 hours).
Exhibit Dates: 2/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to deliver lectures employing effective questioning, chalkboard, and communications techniques; deliver instruction employing demonstrative strategies; operate an overhead projector and video cassette system; demonstrate knowledge of instructor guides, workbooks, computerized reporting systems, evaluation, and participant materials; and develop learning outcomes for a topic.

Instruction: Participants practice constructing and delivering instruction. Lectures provide procedures and general information which is then applied in the laboratory sessions. Emphasis is placed on the instructional strategies of lecture/demonstration. An overview is provided for administrative processes, evaluation, and counseling.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in training and development (instructional methods) (9/89).

NV-1406-0020

Command Career Counselor

Course Number: A-501-0011.
Location: Fleet Training Center, Norfolk, VA; Service School Command, San Diego, CA.
Length: 4 weeks (160 hours).
Exhibit Dates: 10/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to counsel personnel on all facets of career planning: assignments, advancement, retirement, and survivor benefits.

Instruction: Methods of instruction include lecture, laboratory exercises, and examinations. Topics covered include communication skills for the counselor, counseling methods and techniques, and the entire range of career issues. These issues include pay, health benefits, advancement opportunities, reassignment, survivor benefits and annuities, and educational benefits.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel counseling (12/89).

NV-1407-0001

Yeoman School, Class B
(Class B Yeoman School)

Course Number: None.
Location: Service Schools Command, Bainbridge, MD; Service Schools Command, San Diego, CA.
Length: 13–14 weeks (390–420 hours).
Exhibit Dates: 9/56–12/68.

Objectives: To train enlisted personnel to meet the professional qualifications for advancement to yeoman first class and chief yeoman.

Instruction: Practical exercises in typing, shorthand, personnel accounting, and secretarial practice.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in typing, 6 in shorthand (3/74).

NV-1407-0002

Legal Clerk and Court Reporting

Course Number: A-512-010.
Location: Naval Justice School, Newport, RI.
Length: 5–7 weeks (170–239 hours).
Exhibit Dates: 1/69–1/88.

Objectives: To provide enlisted personnel with training in court reporting and legal clerkship.

Instruction: Practical experience in military justice documentation and recording, closed-microphone court reporting, and transcription.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/74).

NV-1407-0003

Stenography, Class C

Course Number: Not available.
Location: Yeoman Class C School, Bainbridge, MD.
Length: 6 weeks (210 hours).
Exhibit Dates: 1/61–12/68.

Objectives: To train petty officers in high-speed shorthand and touch-typing.

Instruction: Lectures and practical exercises in stenography and typewriting, including vocabulary and speed exercises in Gregg shorthand, high-speed dictation, oral and written transcription, oral reporting equipment, mechanics of English, and typing.

Credit Recommendation: In the vocational certificate category, 6 semester hours in stenography and typing (7/74); in the lower-division baccalaureate/associate degree category, credit in stenography and typing on the basis of institutional examination (12/68).

NV-1408-0001

Disbursing Clerk Financial Returns
(Disbursing Clerk Financial Returns Class C)
(Disbursing Clerk, Class C (Financial Returns))

Course Number: A-542-0014.
Location: Fleet Training Center, Norfolk, VA; Service School Command, San Diego, CA.
Length: 2 weeks (60–80 hours).
Exhibit Dates: 11/71–Present.

Objectives: To train rated and nonrated disbursing clerks to prepare Navy and DoD reports and financial returns.

Instruction: Lectures and practical exercises in the preparation of collection and disbursement vouchers; reports of disbursement and collections; foreign currency reports; and deposit schedules.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (12/89).

NV-1408-0002

Disbursing Clerk Travel Payments
(Disbursing Clerk, Class C (Travel Payments))

Course Number: A-542-0013.
Location: Service School Command, San Diego, CA; Fleet Training Center, Norfolk, VA.
Length: 2 weeks (60–80 hours).
Exhibit Dates: 11/71–Present.

Objectives: To train disbursing clerks to master the intricacies of the Navy travel payment procedures.

Instruction: Lectures on travel regulations, orders, and vouchers; travel advance and allowance; dependent travel entitlement; and dislocation allowance.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (12/89).

NV-1408-0004

Station Management Systems

Course Number: None.
Location: Naval Postgraduate School, Monterey, CA.
Length: 4 weeks (84 hours).
Exhibit Dates: 4/70–12/71.

Objectives: To train naval officers in the principles and methods of shore station management.

Instruction: Lectures in general management theory, quantitative reasoning, statistics, economics, systems analysis and cost analysis, and resources management systems implementation and operation.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in principles of management (12/68).

NV-1408-0005

Data Analysis (Ship's 3-M System)
Class C

Course Number: A-500-0017.
Location: Naval Schools Command, Norfolk, VA.
Length: 5 weeks (173 hours).
Exhibit Dates: 2/72–1/88.

Objectives: To train officers and petty officers to perform statistical analysis of machine generated data and to present their findings in a report designed to facilitate management decision making.

Instruction: Lectures in statistical analysis and its application to management organizations, including frequency, probability, and sampling distributions; hypothesis testing; dispersion; trend analysis; and linear correlation and regression.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in introductory statistics (2/74).

NV-1408-0006

Seabee Chief Petty Officer Management
(Group VIII E8/E9 Advanced Management)
(Group VIII E-6/E-7 Management)

Course Number: A-710-0016; A-710-0021.
Location: Civil Engineer Corps Officers School, Port Hueneme, CA.
Length: 6–7 weeks (167 hours).
Exhibit Dates: 5/72–1/88.

Objectives: To provide enlisted personnel with advanced training in naval engineering management and administration.

Instruction: Lectures on public works management principles, including facilities, utilities, personnel and housing; construction and labor/management relations; planning, scheduling and networking; military budgeting activities; and field exercises in construction project planning.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in construction management or technology (3/76).

NV-1408-0007

Management and Supervision of Naval Personnel

Course Number: K-012-2068; A-012-0028; A-012-0029; A-012-0030; C-012-2012.

Location: Fleet Training Group, Pearl Harbor, HI; Fleet Training Center, Norfolk, VA; Service School Command, Great Lakes, IL; Service School Command, San Diego, CA.

Length: 2 weeks (70 hours).

Exhibit Dates: 3/72-1/88.

Objectives: To provide petty officers and junior officers with a knowledge of modern management methods.

Instruction: Lectures on management of communications processes, motivation and human behavior, personnel management, and leadership.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in principles of supervision or management (6/75).

NV-1408-0008

Instructor, Class C-1 Administration and Counseling

Course Number: A-7C-013; A-7C-014.

Location: Instructor Class C-1 School, Norfolk, VA; Instructor Class C-1 School, San Diego, CA.

Length: 2 weeks (60 hours).

Exhibit Dates: 7/71-1/88.

Objectives: To train officers to manage shipboard operations.

Instruction: Lectures in human relations, counseling techniques, personnel management, personal financial management, drug abuse counseling, and responsibilities of division management personnel.

Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in personnel administration (2/74).

NV-1408-0009

Construction Contract Administration and Management

(Contract Administration—Accelerated)

Course Number: A-4A-0032.

Location: Civil Engineer Corps Officers' School, Port Hueneme, CA.

Length: 2 weeks (66 hours).

Exhibit Dates: 2/74-1/88.

Objectives: To prepare officers to perform as assistant resident officer in charge or independent officer in charge of construction or for staff officer positions in contract administration in the engineering field division of Naval facilities.

Instruction: Subjects emphasize the formation and daily administration of typical construction contracts. Topics include Naval facilities contract organization, pertinent laws and regulations, plans and specifications, the construction industry, contract types, formal advertising/competitive bidding and negotiated procurement; government/contractor relations, contractor quality control, correspondence preparation, contract general clauses, payment, changes, government estimate preparation, and negotiation techniques. Methods of instruction include lectures, workshops, seminars, case study discussions, and student role playing.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in contract administration (7/78).

NV-1408-0010

Commissary Store Management

Course Number: A-8B-0029.

Location: Navy Supply Corps School, Athens, GA.

Length: 4 weeks (120 hours).

Exhibit Dates: 7/80-Present.

Objectives: To train officers in the management of a commissary.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) determine the inventory and stock levels to be maintained, (2) establish a display that will successfully promote a given product, (3) describe the financial records to be maintained by a retail store and know the procedures for completing these records, (4) complete the necessary forms for ordering, receiving and warehousing goods to be sold in order that a sufficient stock level be maintained, (5) describe sanitation regulations and safety rules essential in the operation of a retail food store.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in retail management (7/83).

NV-1408-0011

Warrant Officer Indoctrination

(Surface Warrant Officer Indoctrination)

Course Number: A-00-0047.

Location: Officer Indoctrination School, Newport, RI.

Length: 5-7 weeks (163-245 hours).

Exhibit Dates: 2/72-12/73.

Objectives: To instruct the newly appointed, surface-designated warrant officer in the responsibilities of his role as an officer.

Instruction: Lectures and practical exercises in the duties of a surface-designated warrant officer, including military law, management unit objectives, orientation and indoctrination, tactical objectives, technological objectives, management by objective, division organization, aids to navigation, and BUTTERCUP drill.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in administration or management (5/74).

NV-1408-0012

Engineering Aid, Class C, Planning and Estimating

(EA "C" Planning and Estimating)

(Planning and Estimating Construction Group Ratings, Class C)

Course Number: A-412-0012.

Location: Construction Training Center, Port Hueneme, CA; Construction Training Center, Gulfport, MS; Construction School, Davisville, RI.

Length: 8 weeks (240-243 hours).

Exhibit Dates: 10/64-1/88.

Objectives: To train petty officers to plan and estimate construction projects.

Instruction: Lectures and practical exercises in mathematics, blueprint reading, specifications, resource publications, drafting, estimating procedures, estimating various trades, material procurement, and project planning and scheduling.

Credit Recommendation: In the vocational certificate category, 8 semester hours in planning and estimating construction projects (7/76); in the lower-division baccalaureate/associate degree category, 4 semester hours in planning and estimating construction projects (7/76); in the upper-division baccalaureate category, 3 semester hours in planning and estimating construction projects (7/76).

NV-1408-0013

Civil Engineer Corps Officer Basic—Contract Administration Specialty

Course Number: *All Versions:* A-4A-0010; A-4A-0012. *Version 2:* A-4A-010.

Location: Civil Engineer Corps Officer's School, Port Hueneme, CA.

Length: *Version 1:* 8 weeks (250 hours). *Version 2:* 7-9 weeks (238-270 hours).

Exhibit Dates: *Version 1:* 7/75-1/88. *Version 2:* 6/61-6/75.

Objectives: To train officers to perform contract administration duties in the Civil Engineer Corps.

Instruction: *Version 1:* Lectures in Naval financial management, budgeting, fund control, financing for public works activities, facilities management, public works administration, labor relations, disaster control, principles of management, project planning, scheduling, and resource planning. Also included are lectures and workshops in contracts administration including procedures, documents, field administration and construction management. *Version 2:* Lectures in contract administration, including fundamentals of finance management, principles of budgeting, fund control, financing for activity public works, facilities management, finance problems, public works administration, transportation management, introduction to contracts and labor, contract procedure and labor law enforcement, disaster control engineering, and contract specifications and field administration.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 2 semester hours in principles of management, administration, and organization, and 3 in contract administration or construction management (3/76). *Version 2:* In the upper-division baccalaureate category, 4 semester hours in business organization and management, 2 in contract administration (12/68).

NV-1408-0014

Civil Engineer Corps Officer Basic—Public Works Management Specialty

Course Number: *All Versions:* A-4A-0010; A-4A-0011. *Version 2:* A-4A-010.

Location: Civil Engineer Corps Officer's School, Port Hueneme, CA.

Length: *Version 1:* 8 weeks (250 hours). *Version 2:* 8-9 weeks (245-270 hours).

Exhibit Dates: *Version 1:* 7/75-1/88. *Version 2:* 6/61-6/75.

Objectives: To train officers to perform public works management duties in the Civil Engineer Corps.

Instruction: *Version 1:* Lectures in Naval financial management, budgeting, fund control, financing for public works activities, facilities management, public work administration, labor relations, disaster control, principles of management, project planning, scheduling, and resource planning. Also included are lectures and workshops in facilities management, including financial, maintenance, and equipment management, utilities and energy management, housing, and special topics including an extensive simulation exercise. *Version 2:* Lectures in public works management, including fundamentals of financial management, principles of budgeting, financing for activity public works, fund control, facilities management, and finance problems; maintenance, utilities, and transportation management; and introduction to contract and labor, contract procedures, specifications, and administration.

engineering management, and industrial relations.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 2 semester hours in principles of management, administration, and organization, and 3 in public works administration or facilities management (3/76). *Version 2:* In the upper-division baccalaureate category, 4 semester hours in business organization and management, 2 in public works engineering (12/68).

NV-1408-0015

Civil Engineer Corps Officer Basic—Naval Construction Battalion Operations Specialty

Course Number: *All Versions:* A-4A-0010; A-4A-0013. *Version 2:* A-4A-010.

Location: Civil Engineer Corps Officer's School, Port Hueneme, CA.

Length: *Version 1:* 8 weeks (250 hours). *Version 2:* 8-11 weeks (233-394 hours).

Exhibit Dates: *Version 1:* 7/75-1/88. *Version 2:* 6/61-6/75.

Objectives: To train officers to perform construction administration duties in the Civil Engineer Corps.

Instruction: *Version 1:* Lectures in Naval financial management, budgeting, fund control, financing for public works activities, facilities management, public works administration, labor relations, disaster control, principles of management, project planning, scheduling, and resource planning. Also included are lectures and workshops in planning, directing, and controlling construction activities, including concern for labor, materials, equipment, scheduling, and materials control, with emphasis on leadership. *Version 2:* Lectures in construction administration, including fundamentals of financial management, principles of budgeting, financing for activity public works, control of funds, facilities management, finance problems, construction battalion development and organization, and mobile construction battalion administration, personnel, operations and logistics, and engineering management.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 2 semester hours in principles of management, administration, and organization, and 3 in construction project management (3/76). *Version 2:* In the upper-division baccalaureate category, 4 semester hours in business organization and management, 2 in construction engineering (12/68).

NV-1408-0016

Personnelman, Class C, Naval Management Analysis

Course Number: Not available.

Location: Personnelman, Class C School, San Diego, CA.

Length: 4 weeks (120 hours).

Exhibit Dates: 7/65-12/68.

Objectives: To train personnel in naval management analysis.

Instruction: Lectures and practical exercises in the technical elements of recruiting, classification and interviewing, enlisted classification, management analysis, and career information and counseling, including introduction to manpower utilization, naval occupational analysis, work simplification and improvement, management/manpower survey methods, navy shipboard manpower surveys, reports and written communication, and source data automation.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in management and manpower analysis (12/68).

NV-1408-0017

Shore Facilities Planning

Course Number: A-4A-0017.

Location: Naval Construction Battalion Center, Port Hueneme, CA.

Length: 2 weeks (63 hours).

Exhibit Dates: 2/64-12/68.

Objectives: To train personnel in shore facilities planning and administration.

Instruction: Lectures and practical exercises in shore facilities planning and administration, including environmental enhancement, financing facilities projects, military construction program, capital resources management, influence of nuclear weapons on facilities planning and design, organization, planning and operations, planning considerations and criteria, and applications.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (6/74).

NV-1408-0018

Methods Engineering

Course Number: None.

Location: Bureau of Supplies and Accounts, Washington, DC.

Length: 7 weeks (280 hours).

Exhibit Dates: 8/59-12/68.

Objectives: To provide officers and civilian personnel with training in modern industrial engineering techniques.

Instruction: Lectures and practical exercises in process charting, motion study, operational analysis, layout study, methods-time measurement, work sampling, and engineered time standards.

Credit Recommendation: In the upper-division baccalaureate category, 4 semester hours in methods engineering (2/74).

NV-1408-0019

Aviation Storekeeper, Class B

Course Number: Not available.

Location: Air Technical Training Center, Memphis, TN.

Length: 10 weeks (400 hours).

Exhibit Dates: 9/71-1/88.

Objectives: To train enlisted personnel to be aviation storekeepers.

Instruction: Lectures and practical exercises in supervision fundamentals, personnel administration, procurement office administration, correspondence and filing, automatic data processing, inventory management, aviation accounting and finance, and aviation maintenance.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in office administration (7/74); in the upper-division baccalaureate category, 3 semester hours in office administration (7/74).

NV-1408-0020

Chaplain School Advanced

Course Number: A-5G-0011.

Location: Naval Education and Training Center, Newport, RI.

Length: 37-39 weeks (859-1246 hours).

Exhibit Dates: 4/72-6/84.

Objectives: To train senior chaplains to perform supervisory and managerial roles.

Instruction: Lectures and practical exercises in the supervisory and managerial responsibilities of chaplains in the armed services. Course includes managerial behavior, organizational behavior, styles of management, supervisory skills, organizational analysis, current theological trends, oral communication, religious education, pastoral counseling, and contemporary ministry.

Credit Recommendation: In the upper-division baccalaureate category, 15 semester hours in managerial behavior, 10 in organizational behavior, 2 in speech communication, 16 in theology (8/74).

NV-1408-0021

Medical Administrative Technician, Class C

(Medical Administrative Technician, Dental, Class C)

(Medical Administrative Technic)

(Medical Administrative Technic, Dental)

Course Number: B-513-0010; B-513-0011; B-513-0012; B-513-0013.

Location: Hospital Corps School, San Diego, CA; Naval Hospital, Portsmouth, VA.

Length: 30-42 weeks (1,125-1,319 hours).

Exhibit Dates: 6/55-12/71.

Objectives: To train personnel to prepare, maintain, and account for medical supplies, equipment, and staff and patient personnel records.

Instruction: Lectures and practical exercises in personnel management, leadership, clerical procedures, food service, business English composition, effective speaking, office management, accounting principles, and material management.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in personnel management, 3 in typing, 3 in business English, 3 in office management, 3 in speech, and 3 in principles of accounting (7/74); in the upper-division baccalaureate category, 15 semester hours in institutional management, and credit in typing, speech and instructional methods on the basis of institutional evaluation (12/68).

NV-1408-0022

Basic Submarine Officer

(Submarine Officer Basic)

Course Number: F-00-014; A-2E-0028.

Location: Submarine School, Groton, CT.

Length: 24 weeks (936-938 hours).

Exhibit Dates: 1/66-1/88.

Objectives: To qualify selected officers and enlisted personnel for the designation, "Qualified in Submarines."

Instruction: Lectures and practical exercises to teach the student the duties and responsibilities of an officer of the deck of a submarine; the principles and procedures of submerged ship control so that he will be able to perform as a diving officer; navigation; submarine damage control; principles of submarine design, construction, and operation; weapons; fire control maintenance; FBM weapon systems; submarine tactics; and engineering.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours as an elective in management (8/74); in the upper-division baccalaureate category, 2 semester hours in naval engineering and 2 in engineering management (12/68).

NV-1408-0023

Navy Exchange Management

Course Number: A-8F-010.

Location: Naval Supply School, Athens, GA; U.S. Navy Ship's Store Office, Brooklyn, NY.

Length: 5-6 weeks (100-154 hours).

Exhibit Dates: *Version 1:* 7/80-Present. *Version 2:* 1/69-6/80.

Objectives: To train officers in the management of Navy exchanges.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) describe the management responsibilities of a retail store manager, including duties related to personnel, (2) list procedural steps for ordering, receiving and warehousing merchandise for a retail operation, (3) establish a display that will promote a given product, (4) describe financial and accounting responsibilities essential for the operation of a retail business and give examples of various daily records which are kept. *Version 2:* Lectures and practical exercises in principles of personnel, retailing and services management, retail display, accounting, and financial methods.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in retail management (7/83). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in business management (2/74).

NV-1408-0024

Marine Corps Aviation Supply Officer Qualification

Course Number: A-8B-0031.

Location: Navy Supply Corps School, Athens, GA.

Length: 15 weeks (505 hours).

Exhibit Dates: 1/79-Present.

Objectives: To provide the basic officer with the skills required to be a supply officer within the Marine aircraft group.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) determine the stores account, type of material and inventory manager of any item when provided with the cognizance symbol, (2) apply problem analysis theory to a given problem situation, (3) identify appropriate statistical measures and perform the related calculations necessary to problem analysis, (4) use a program flowchart to process test data through a system, (5) define the most commonly used aviation maintenance/supply terms, acronyms or abbreviations relating to naval aviation, (6) select from a list all required local support procedures for repairables including communication of requirements, timely issue of material, control of repairable components, preparation and flow of documentation and reconciliation of records and requirements, (7) identify the uses of Automated Data Processing System for supply management.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in materials management, 2 in introduction to statistical methods (7/83).

NV-1408-0025

Uniform Automated Data Processing (ADP) System-Stock Points

Course Number: A-8B-0027.

Location: Naval Supply Corps School, Athens, GA; Various worldwide locations.

Length: 3 weeks (85 hours).

Exhibit Dates: 12/78-Present.

Objectives: To provide the student with a knowledge of the supply and financial environment within which a stock point manager operates.

Instruction: Topics include the overall supply and financial organizational structure; the documentation and file maintenance for the automatic data processing system; the use of the system for inventory control; and related financial accounting.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in supply management or elective credit (7/83).

NV-1408-0026

Supply Indoctrination for Line Officers

Course Number: A-8B-0045.

Location: Naval Supply Corps School, Athens, GA.

Length: 5 weeks (150 hours).

Exhibit Dates: 9/82-Present.

Objectives: To familiarize line officers with the broad areas of Naval supply encountered at their respective commands.

Instruction: Topics include disbursing, material management, food service management afloat, and management of a retail ship's store.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in materials management, 1 in food service management (7/83).

NV-1408-0027

Navy Exchange/Commissary Store Middle Management, Class C

Course Number: A-823-0016.

Location: Naval Technical Training Center, Meridian, MS.

Length: 4 weeks (145 hours).

Exhibit Dates: 10/80-Present.

Objectives: To provide the student with the knowledge and skills to be able to manage a commissary store or Navy exchange.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) perform administrative duties required in operating commissary stores including procurement and receiving/warehousing; (2) manage floor sales, meat and produce departments, cash collections and inventory systems; (3) apply navy regulations as required in the performance of the above duties and; (4) plan and implement promotional merchandising techniques.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in introduction to marketing and retailing operations (6/84).

NV-1408-0028

Yeoman Flagwriter, Class C

Course Number: A-511-0015.

Location: Naval Technical Training Center, Meridian, MS.

Length: 15 weeks (596 hours).

Exhibit Dates: 1/81-Present.

Objectives: To provide intensive training to experienced yeoman personnel to take shorthand dictation.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) take shorthand dictation at 80-100 words per minute; (2) demonstrate a high level of English grammar usage and; (3) demonstrate skill in social and naval protocol.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, for those students holding NEC 2514, 6 semester hours in shorthand; for those students holding NEC 2512, 3 semester hours in shorthand and for both groups of students, 2 semester hours in business English (6/84).

NV-1408-0029

Limited Duty Officer (LDO) and Chief Warrant Officer (CWO) Indoctrination Training

Course Number: Q-9B-0023.

Location: Naval Air Station, Pensacola, FL.

Length: 4 weeks (153 hours).

Exhibit Dates: 5/82-Present.

Objectives: To train the newly commissioned limited duty officers and chief warrant officers in the communication and administrative skills, leadership, military law and customs necessary to be an effective naval officer.

Instruction: Lectures and practical exercises in written communication, oral communication, naval correspondence, naval administration, military law, military customs, naval history subjects and role of the U.S. Navy.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in business/technical communications (3/86).

NV-1408-0030

Automated Telecommunications Systems Technician, Class C7

Course Number: A-260-0045.

Location: Naval Technical Training Center, Corry Station, Pensacola, FL.

Length: 12 weeks (480 hours).

Exhibit Dates: 1/86-Present.

Learning Outcomes: Upon successful completion of the course, the student will be able to operate/supervise an automatic central office telecommunications system.

Instruction: Group paced lectures, practical demonstration and laboratory work. Subjects covered include: introduction to computer systems, peripherals and interfacing; message handling, routing, origination, correcting, retrieval, tracing and journalling; software files, halts and aborts, and contingency procedures; and administrative details.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in telecommunications office systems management (7/87).

NV-1408-0031

Ship's Store Afloat Resale Operation Management (ROM) System Supervisor

Course Number: A-823-0015.

Location: Fleet Training Center, Norfolk, Va; Service School Command, San Diego, CA.

Length: 5 weeks (200 hours).

Exhibit Dates: 8/88-Present.

Learning Outcomes: Upon completion of the course the student will be able to describe the functions associated with a retail operation including stock control, ordering, receiving, return to stock, return to vendor etc.; and assume responsibility for other auxiliary retail enterprises such as barber shop and laundry.

Instruction: Classroom lecture, laboratory exercises, and examinations develop an understanding of the retail process including operation of computer equipment for inventory control, cash register equipment, space planning and security, customer service, cash control and staffing, preparation of balance sheet and profit and loss statements.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in retail operations and management (12/89).

NV-1408-0032

CHAPLAIN SCHOOL ADVANCED COURSE

Course Number: P-00-4300.

Location: Naval Chaplain School, Newport, RI.

Length: 39 weeks, (975 weeks).

Exhibit Dates: 7/84–Present.

Learning Outcomes: Upon completion of the advanced course curriculum, experienced, mid-career chaplain will be prepared to assume staff and supervisory functions in the Chaplain Corps. Specific competencies will be: understanding the management of large, complex organizations; strengthening communications skills; learning the principles of effective personnel management; developing leadership skills; and developing skills in strategic planning and management of programs.

Instruction: Lecture, discussions, case studies, simulations, directed reading, independent research, and multi-media student presentations in the supervisory and managerial responsibilities of chaplains in the sea services. Curriculum includes studies in communications, ethics, ministry/pastoral case, organizational psychology, management, planning and administration, and religion and society.

Credit Recommendation: In the graduate degree category, 3 semester hours in communications, 3 in ethics, 3 in ministry/pastoral care, 3 in organizational psychology, 3 in management, 3 in planning and administration, and 3 in religion and society (3/89).

NV-1409-0001

PERSONNELMAN, CLASS A

Course Number: A-500-0014; A-500-0015; A-500-0026.

Location: Service School Command, Bainbridge, MD; Service School Command, San Diego, CA; Naval Training Center, Orlando, FL; Naval Training Center, Meridian, MS.

Length: *Version 1:* Self-paced 7 weeks (303 hours). *Version 2:* Self-paced 6–8 weeks (240–320 hours). *Version 3:* 10 weeks (400 hours).

Exhibit Dates: *Version 1:* 9/78–Present. *Version 2:* 8/69–8/78. *Version 3:* 10/55–7/69.

Objectives: To train enlisted personnel as personnel strikers.

Instruction: *All Versions:* Lectures and practical exercises in correspondence, typing, filing, manpower utilization and personnel testing. NOTE: Instruction is self-paced beginning 1975. Typing instruction is provided only for students who enter the course as nonqualified typists. Emphasis is on manual records and forms.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in typing, 2 in business communications (6/84). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in typing for students entering the course as nonqualified typists (3/74). *Version 3:* In the lower-division baccalaureate/associate degree category, 2 semester hours in typing (3/74) and 2 in personnel administration (3/74).

NV-1409-0002

YEOMAN, CLASS A

Course Number: A-510-0012.

Location: Naval School, Bainbridge, MD; Naval School, Meridian, MS; Naval School, San Diego, CA; Naval School, Orlando, FL.

Length: *Version 1:* Self-paced 7 weeks (280 hours). *Version 2:* Self-paced 6–8 weeks (180–240 hours). *Version 3:* 5–8 weeks (150-240 hours).

Exhibit Dates: *Version 1:* 11/77–Present. *Version 2:* 8/69–10/77. *Version 3:* 7/56–7/69.

Objectives: To train enlisted personnel to perform as yeomen.

Instruction: *All Versions:* Lectures and practical exercises in the duties of a yeoman striker, including fundamentals of typewriting, advanced typewriting, office etiquette and efficiency, publications, classified material, filing, correspondance, personnel accounting, officer records, captain's office, executive officer's office, enlisted service record, shipboard department offices and associated records, and legal records and procedures. NOTE: Instruction is self-paced beginning 1975. Instruction in typing is provided for students who enter the course as nonqualified typists. Emphasis is on manual records and forms.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in business communications, 2 in typing (6/84). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in typing for students entering course as nonqualified typists (6/74). *Version 3:* In the lower-division baccalaureate/associate degree category, 2 semester hours in typing and 2 in office administration (6/74).

NV-1409-0003

AVIATION MAINTENANCE
ADMINISTRATIONMAN, CLASS A
(Aviation Maintenance Administration, Class A)

Course Number: C-555-2010; C-516-2010.

Location: *All Versions:* Air Technical Training Center, Meridian, MS. *Version 2:* Air Technical Training Center, Memphis, TN; Air Technical Training Center, Millington, TN.

Length: *Version 1:* 5 weeks (193 hours). *Version 2:* 6–8 weeks (240-304 hours).

Exhibit Dates: *Version 1:* 9/82–Present. *Version 2:* 5/66–8/82.

Objectives: To provide enlisted Navy and Marine Corps personnel with training in clerical and administrative procedures.

Instruction: *All Versions:* Lectures and practical exercises in office procedures, aeronautical publications, naval maintenance and materiel management systems, aircraft and equipment accounting, aircraft logs and records, and maintenance administration.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in typing, 2 in clerical recordkeeping (6/84). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in typing (2/74).

NV-1409-0004

AIRBORNE COMMUNICATOR

Course Number: E-201-0010; E-201-10.

Location: Fleet Aviation Specialized Operational Training Group, Pacific, Moffett Field, CA.

Length: 2 weeks (70 hours).

Exhibit Dates: 8/72–1/88.

Objectives: To train personnel to perform as airborne communicators.

Instruction: Lectures and practical exercises in airborne communications, including message format and drafting, standard naval communication procedures, naval communications publications, emergency communication procedures, radio telephone procedures, airborne teletype operation and procedures, fleet air broadcast procedures, encoding/decoding, authentication procedures, teletype preflight message and operating procedures, and relay procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in typing on the basis of institutional evaluation (6/74).

NV-1409-0005

MARINE AVIATION SUPPLY (MANUAL),
CLASS C

Course Number: C-551-2011.

Location: Air Technical Training Center, Memphis, TN.

Length: 6 weeks (240 hours).

Exhibit Dates: 3/72–1/88.

Objectives: To train personnel in aviation supply.

Instruction: Lectures and practical exercises on marine aviation supply including fundamentals of the squadron material control unit, typing and correspondence, item identification and management codes, material identification, allowance lists, procurement, fundamentals of the group supply department, organization of group supply, functions of the SRS and CCS/SSS, and aviation supply in operation.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in typing (6/74).

NV-1409-0006

STOREKEEPER, CLASS A

Course Number: A-551-0014.

Location: *Version 1:* Naval Technical Training Center Meridian, MS. *Version 2:* Storekeeper, Class A School, Newport, RI; Storekeeper, Class A School, San Diego, CA.

Length: *Version 1:* Self-paced 6 weeks (240 hours). *Version 2:* 12 weeks (360 hours).

Exhibit Dates: *Version 1:* 11/76–Present. *Version 2:* 7/56–12/68.

Objectives: To train enlisted personnel to be storekeepers.

Instruction: *Version 1:* This self-paced course includes the following subject areas: typing, stock records and files, receipt and issue of materials, transfer and shipping of materials, inventory control, correspondence, and customer service. *Version 2:* Lectures and practical exercises in typing and processing naval storeroom records.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in typing, 3 in supply management and 1 in human relations (6/84). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in typing (7/74).

NV-1409-0007

COMMUNICATIONS YEOMAN, CLASS A

Course Number: A-580-013.

Location: Communications Yeoman, Class A School, Norfolk, VA; Radioman, Class A School, Bainbridge, MD.

Length: 6 weeks (178-179 hours).

Exhibit Dates: 7/64-12/68.

Objectives: To train enlisted personnel to perform clerical, voice operator, and teletypewriter operator duties.

Instruction: Lectures and practical exercises in the performance of clerical, voice operator, and teletypewriter operator duties, including defense communication systems, Navy communication, communication security, equipment, teletypewriter procedure, voice procedure, maintenance and material management, and communication watch standing.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in typing on the basis of institutional evaluation (12/68).

NV-1409-0008

MARINE AVIATION OPERATIONS CLERICAL, CLASS C

Course Number: C-517-2010.

Location: Air Technical Training Center, Memphis, TN.

Length: *Version 1:* 5-6 weeks (188-240 hours). *Version 2:* 6 weeks (240 hours).

Exhibit Dates: *Version 1:* 5/68-1/88. *Version 2:* 4/64-4/68.

Objectives: To train enlisted personnel as aviation operations clerks.

Instruction: *All Versions:* Lectures and practical exercises in aviation operations, including airfield operations, squadron operations, office methods, and operational tasks. *Version 2:* Topics include basic typing, flight records and reports, aviator's individual flight log, records and reports, aviation pay records and reports, security of classified information, aircraft mishap reporting procedures, organization and standards of an airfield, flight information planning publications, NOTAMS, weather sequence reports, aircraft clearance, standard directives system, operation and care of office machines, reproduction of directives, and correspondence.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in typing (7/74). *Version 2:* In the lower-division baccalaureate/associate degree category, credit in typing on the basis of institutional evaluation (12/68).

NV-1511-0001

COUNTERINSURGENCY/SELF-PROTECTION/SERE

Course Number: H-00-5222; H-000-5222.

Location: Amphibious School, San Diego, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train enlisted personnel in Pacific area country orientation, survival, weapons, and counterinsurgency operations.

Instruction: Lectures and practical exercises in the history of insurgent movements; counterinsurgency fundamentals; communist ideology, organization, and goals; guerilla and counterguerilla operations; psychological operations, area cultures, and political orientations; basic language training; field techniques and tactics; and weapons training.

Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in political science (5/74).

NV-1511-0002

1. COLLEGE OF NAVAL WARFARE
2. SCHOOL OF NAVAL WARFARE
3. SCHOOL OF NAVAL WARFARE (Naval Warfare Course)
4. NAVAL WARFARE COURSE

Course Number: P-00-1101.

Location: Naval War College, Newport, RI.

Length: *Version 1:* 43 weeks. *Version 2:* 43 weeks. *Version 3:* 43 weeks. *Version 4:* 43-86 weeks.

Exhibit Dates: *Version 1:* 8/72-1/88. *Version 2:* 8/69-7/72. *Version 3:* 8/58-7/69. *Version 4:* 8/54-7/58.

Objectives: To develop understanding in the science of naval warfare, international relations, and interservice operations, with emphasis on applications to future naval warfare, in order to prepare officers for higher command positions.

Instruction: *Version 1:* Lectures, seminars, and extensive reading and writing in the science of naval warfare, international relations, and interservice operations, including applications to future naval warfare, strategy, economics, nineteenth- and twentieth-century diplomatic history, political science, management and business administration, and tactics. *Version 2:* Lectures, readings, and student research in the science of naval warfare, international relations, and interservice operations, including sea power and maritime strategy and their relationship to the political, economic, social, and military factors affecting national security; international affairs, including international law, organizations, and relations; and the planning and conduct of naval, joint, and combined operations, including management procedures. *Version 3:* Lectures, readings, and student research in the science of naval warfare, international relations and interservice operations, including orientation to armed services and State Department organization; fundamentals of logical analysis; fundamentals of warfare and maritime strategy; international law and its relation to command functions; strategy study, including international relations, factors influencing U.S. national objectives and policy, relations between the U.S. and the free world, the U.S.S.R. and the Soviet bloc, and U.S. and U.S.S.R. interests, objectives, and basic undertakings; organization and interrelationship of offices, departments, and agencies involved in formulation and implementation of national security policy; strategic planning study, including joint strategic, operational, intelligence and logistic planning at various command levels, national military strategy and war plans, contingency concepts of operation under conditions of cold, limited, and general war; naval warfare study, including military planning processes and major weapon systems (both existing and planned), the integrated use and national support of weapon systems in all services, and global strategy; and counterinsurgency, including history of insurgency, causes and effects of successful and unsuccessful insurgent movements, factors influencing conditions where insurgency is a problem, and policies and programs of U.S. governmental agencies charged with assisting underdeveloped areas of the world. *Version 4:* Lectures, readings, and student research in the fundamentals of warfare, international relations, and interservice operations, including applications to future naval warfare. The course is offered in two parts, each one academic year in length. Instruction in the first year includes introduction to the current world situation, nuclear weapons orientation, international relations, operational planning, weapons and weapons systems, logistic support systems, communications systems, concepts for the integrated employment of elements of naval power, the nature of strategy, planning and solution of operational problems at various levels, and characteristics of major strategic areas. Instruction in the second year includes introduction to the current world situation, nuclear weapons orientation, factors affecting areas of the world, planning systems and problems of various levels of command, varied aspects of sea power and national interests, and national policy.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 15 semester hours in the areas of management and business administration within the Defense Economics and Decision Making curriculum; and in the Tactics curriculum, credit is not recommended because of the military-specific nature of the course (8/74); in the graduate degree category, 9 semester hours in the combined areas of economics, nineteenth- and twentieth-century diplomatic history, political science, and international relations, all within the Strategy curriculum, 12 semester hours in the areas of management and business administration within the Defense Economics and Decision Making curriculum, and in the Tactics curriculum, credit is not recommended because of the military-specific nature of the course (3/76). It is recommended that the Naval War College grade of 'Superior' be accepted as equivalent to the grades A or B for the purpose of credit assignment in the graduate category. For other students, acceptance of credit should be contingent upon institutional evaluation. Recommendations of credit are maximum figures. The amount actually accepted for transfer depends upon the applicant's future academic goals and regulations of the admitting institution on transfer credit. *Version 2:* In the upper-division baccalaureate category, 30 semester hours; a suggested assignment of credit is as follows: 6 semester hours in international relations, 3 in international law, 3 in evolution of strategic theory (advanced military history), 3 in introductory economics, 3 in management, 3 in study of sea power, 3 in study of military strategy, 3 as an elective, 3 in research training (8/74); in the graduate degree category, 6 semester hours in international relations and law, 2 in evolution of strategic theory (advanced military history), 2 in economics, 2 in management, 0-6 in research training thesis (8/74). It is recommended that the Naval War College grade of 'Superior' be accepted as equivalent to the grades A or B for the purpose of credit assignment in the graduate category. For other students, acceptance of credit should be contingent upon institutional evaluation. Credit granted for theses should be contingent upon the graduate school's evaluation of the research paper. Recommendations of credit are maximum figures. The amount actually accepted for transfer depends upon the applicant's future academic goals and the regulations of the admitting institution on transfer credit. *Version 3:* In the upper-division baccalaureate category, 9 semester hours in business administration, 6 in political science—including international relations—and credit in international law on the basis of institutional evaluation (12/68). *Version 4:* In the upper-division baccalaureate category, for each year, 9 semester hours in business organization and management, and additional credit in political science and international law on the basis of institutional evaluation (12/68). NOTE: During this period, the Naval Warfare course was offered in two parts, each one academic year in length. Personnel could take either one or both years of the course.

NV-1511-0003

1. College of Naval Command and Staff
2. School of Naval Command and Staff
3. School of Naval Command and Staff

(Command and Staff)

Course Number: P-00-1201.

Location: Naval War College, Newport, RI.

Length: 43 weeks.

Exhibit Dates: *Version 1:* 8/73–1/88. *Version 2:* 8/69–7/73. *Version 3:* 8/54–7/69.

Objectives: To develop understanding in the fundamentals of warfare, international relations, and interservice operations in order to prepare officers for higher command positions.

Instruction: *Version 1:* Lectures, seminars, and extensive reading and writing in the science of naval warfare, international relations, and interservice operations, including applications to future naval warfare, strategy, economics, nineteenth- and twentieth-century diplomatic history, political science, management and business administration, and tactics. *Version 2:* Lectures, readings, and student research and discussions in the science of naval warfare, international relations, and interservice operations, including international relations and law, evolution of strategic theory (advanced military history), economics, military and naval decision-making and planning procedures, tactics, management, and political, legal, social, and economic factors influencing naval operations and policy decisions. *Version 3:* Lectures, readings, and student research and discussions in the fundamentals of naval warfare, international relations, and interservice operations, including fundamentals of logical analysis and group procedures, international law and its effects upon the military establishment; national strategy, including factors influencing national objectives and policies of both the U.S. and the U.S.S.R., alliance systems of both major powers, international organizations and strategic areas of interest, and national security policy for both major powers; counterinsurgency, including history of insurgency, causes and effects of successful and unsuccessful insurgent movements, and policies and programs of preventing and/or countering insurgency; fundamentals of warfare and maritime strategy, including their relation to national security; strategic planning study, including joint strategic, operational, intelligence and logistic planning at various command levels, war planning and contingency concepts of operation for military strategy under conditions of cold, limited, and general war; naval warfare study, including organization and planning for support of operations by naval and marine forces, limitations of the forces and their use in integrated operations on the national level, major weapons systems (both existing and planned), doctrines and concepts of operations, determination of force requirements, and factors influencing conduct of operations in selected geographical areas; and global strategy.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 9 semester hours in the combined areas of economics, nineteenth- and twentieth-century diplomatic history, political science, and international relations, all within the Strategy curriculum; 15 semester hours in the areas of management and business administration within the Defense Economics and Decision Making curriculum; and in the Tactics curriculum, credit is not recommended because of the military-specific nature of the course (8/74). Students complete all cirricula; in the graduate degree category, 9 semester hours in the combined areas of economics, nineteenth- and twentieth-century diplomatic history, political science, and international relations, all within the Strategy curriculum; 12 semester hours in the areas of management and business administration within the Defense Economics and Decision Making curriculum; and in the Tactics curriculum, credit is not recommended because of the military-specific nature of the course (3/76). Students complete all curricula. It is recommended that the Naval War College grade of 'Superior' be accepted as equivalent to the grades A or B for the purpose of credit assignment in the graduate category. For other students, acceptance of credit should be contingent upon institutional evaluation. Recommendations of credit are maximum figures. The amount actually accepted for transfer depends upon the applicant's future academic goals and regulations of the admitting institution on transfer credit. *Version 2:* In the upper-division baccalaureate category, 21 semester hours (A suggested assignment of credit is as follows: 6 semester hours in international relations and law, 3 in evolution of strategic theory or advanced military history, 3 in introductory economics, 3 in management, 3 as an elective, and 3 in research training) (8/74); in the graduate degree category, 4 semester hours in international relations and law, 2 in evolution of strategic theory (advanced military history), 2 in economics, 2 in management, 0–6 in research training and thesis (8/74). It is recommended that the Naval War College grade of 'Superior' be accepted as equivalent to the grades A or B for the purpose of credit assignment in the graduate category. For other students, acceptance of credit should be contingent upon institutional evaluation. Credit granted for thesis should be contingent upon the graduate school's evaluation of the research paper. Recommendations of credit are maximum figures. The amount actually accepted for transfer depends upon the applicant's future academic goals and the regulations of the admitting institution on transfer credit. *Version 3:* In the upper-division baccalaureate category, 9 semester hours in business administration, and credit in international law and political science—including international relations—on the basis of institutional evaluation (12/68).

NV-1511-0004

Naval War College Correspondence Course in Strategy and Policy

Course Number: None.

Location: Through the Center for Continuing Education, Newport, RI.

Length: *Version 1:* 249 hours. *Version 2:* 300 hours.

Exhibit Dates: *Version 1:* 9/77–12/85. *Version 2:* 9/73–8/77.

Objectives: To develop the understanding, insight, and analytical abilities of the student regarding the uses of national power and resources in relations among nations.

Instruction: *All Versions:* The course involves questions of international politics, civilian-military relations, the uses of military forces, the development of national strategies and concepts of national interest, diplomacy, etc. The method used in the course is the intensive study of selected historical periods, events, and the writings of key theorists. The course is built around a series of case studies ranging over time from the Peloponnesian War to World War II and beyond and involves an interdisciplinary approach. The basic materials used are historical, but there are major components that represent international relations, political science, diplomatic history, and, to some degree, economics. For each of the seven topics or blocks of work, the student is assigned a core set of readings and a list of recommended supplementary materials. Required reading for Version 1 totals at least 3700 pages for the course. On the basis of a study of these, the student prepares one or more analytical papers on a topic or topics chosen from a prescribed list. The basic instructional technique is a detailed three or four page critique of each essay prepared by a member of the faculty. By the completion of the Version 1 course, each student will have written between 45 and 90 pages for submission. An integrative examination is given as the final exercise in the course. *Version 2:* Reading required totals at least 6000 pages for the course. Students will write between 200 and 250 pages.

Credit Recommendation: *Version 1:* In the graduate degree category, 6 semester hours in a combination of history, international relations, and political science (to be apportioned by the receiving institution) for students completing the course with a grade of B or higher (5/78). *Version 2:* In the graduate degree category, 9 semester hours in a combination of history, international relations, and political science (to be determined by the receiving institution) for those students completing the course with a grade of B or higher (3/76).

NV-1511-0005

Naval War College Correspondence Course in Defense Economics and Decision Making

Course Number: None.

Location: Through the Center for Continuing Education, Newport, RI.

Length: *Version 1:* 270 hours. *Version 2:* 300 hours.

Exhibit Dates: *Version 1:* 11/77–6/87. *Version 2:* 1/74–10/77.

Objectives: To further the students' awareness of the importance of the scarcity of resources as a constraint upon the allocation of these resources among competing uses, both public and private. Stress is placed upon the analytical techniques available for decision making in a context of scarcity with attention to the strengths and limitations of technical analysis.

Instruction: *All Versions:* The course is divided into five major parts embracing microeconomic analysis and the analytical techniques useful in decision making; the behavioral problems that must be considered in the decision-making process; and the management principles and techniques useful in decision making in the public and private sectors. Assigned readings for Version 1 exceed 1900 pages; additional recommended readings are considerably more. Students are required to submit a number of written reports which are critiqued by the faculty in detail. Written submissions for component parts of this Version 1 course total approximately 150 pages. An integrative examination is given as the final exercise in the course. *Version 2:* Required readings exceed 3000 pages; written submissions range between 200 and 250 pages.

Credit Recommendation: *Version 1:* In the graduate degree category, 2 semester hours in quantitative economic analysis, 2 in behavorial analysis in decision making, and 2 in management principles, public and private, for those students completing the course with a grade of B or higher (5/78). *Version 2:* In the graduate degree category, 3 semester hours in quantitative economic analysis, 2 in behavioral analysis in decision making, and 3 in management principles, public and private, for those students completing the course with a grade of B or higher (3/76).

NV-1511-0006

Defense Economics and Decision Making Off-Campus Graduate Seminar

Course Number: None.

Location: Naval War College Off-Campus Location, Pensacola, FL; Naval War College Off-Campus Location, Corpus Christi, TX; Naval War College Off-Campus Location, Norfolk, VA; Naval War College Off-Campus Location, San Diego, CA: Naval War College Off-Campus Location, U. S. Naval Academy, Annapolis, MD: Naval War College Off-Campus Location, Washington, DC.

Length: 40 weeks (92 resident hours).

Exhibit Dates: 9/76–1/88.

Objectives: This course is designed to further the students' awareness of the scarcity of resources as a constraint upon the allocation of these resources among competing uses, both public and private. Stress is placed upon the analytical techniques available for decision making in a context of scarcity with attention to the strengths and limitations of technical analysis.

Instruction: The course embraces microeconomic analysis and the analytical techniques useful in decision making; the behavioral problems involved in the decision-making process; and the management principles and techniques useful in decision making in the public and private sectors. There are 40 weekly seminar meetings; one mid-term and a final examination; oral reports; and 5 written reports. Assigned readings exceed 2300 pages; additional recommended readings are considerably more. Examinations and papers are read by the seminar instructors and by the faculty at the Naval War College.

Credit Recommendation: In the graduate degree category, it is recommended that the following graduate credit be given for the following components of this course graded B or better: Quantitative Economic Analysis (3 semester hours); Behavioral Analysis in Decision Making (2 semester hours); Management Principles, Public and Private (3 semester hours) (3/77).

NV-1511-0007

Strategy and Policy Off-Campus Graduate Seminar

Course Number: None.

Location: Naval War College Off-Campus Location, Pensacola, Fl; Naval War College Off-Campus Location, Corpus Christi, TX; Naval War College Off-Campus Location, Norfolk, VA; Naval War College Off-Campus Location, San Diego, CA; Naval War College Off-Campus Location, U.S. Naval Academy, Annapolis, MD; Naval War College Off-Campus Location, Washington, DC.

Length: Once weekly for 38 weeks (76 hours).

Exhibit Dates: 9/74–1/88.

Objectives: To develop the understanding, insight, and analytical abilities of the student regarding the uses of national power and resources in relations among nations.

Instruction: The seminar program is offered on a once-weekly basis. The course involves questions of international politics, civilian-military relations, the uses of military forces,the development of national strategies and concepts of national interest, diplomacy, etc. The method used is the intensive study of selected historical periods, events, and the writings of key theorists. The course is built around a series of case studies ranging over time from the Peloponnesian War to World War II and beyond. The course involves an interdisciplinary approach. The basic materials used are historical, but there are major components that represent international relations, political science, diplomatic history and, to some degree, economics. For each of the seven topics or blocks of work the student is assigned a core set of readings and a list of recommended supplementary materials. The student is evaluated on formal oral presentations, two examinations and seven required papers which generally average a total of 50 pages.

Credit Recommendation: In the graduate degree category, 2 semester hours in history, 2 in international relations, and 2 in political science for students completing the course with a grade of B or higher (4/76).

NV-1511-0008

Defense Economics and Decision Making Self-Administered Seminar (Naval War College)

Course Number: None.

Location: Naval War College Nonresident Location Jacksonville, FL. Naval War College Nonresident Location Norfolk, VA.

Length: 32 weeks (64 hours).

Exhibit Dates: 9/77–1/80.

Objectives: To further the students'awareness of the importance of the scarcity of resources as a constraint upon the allocation of these resources among competing uses, both public and private. Stress is placed upon the analytical techniques available for decision making in a context of scarcity with attention to the strengths and limitations of technical analysis.

Instruction: The self-administered seminar (SAS) is administered by the students themselves without an instructor present. Close faculty supervision is provided, however, through faculty staff visits, guest lectures, the use of audio and audio- visual tapes of lectures at the Naval War College, by telephone with college faculty as well as the defense economics and decision making seminar instructor in Washington, D.C. being available for consultation, and through the use of conference telephone calls wherein college faculty can provide guidance and respond to questions during the actual seminar meetings. The course is divided into five major parts embracing microeconomic analysis and the analytic techniques useful in decision making; the behavioral problems that must be considered in the decision making process; and the management principles and techniques useful in decision making in the public and private sectors. Assigned readings exceed 1879 pages; additional recommended readings are considerably more. Students are required to submit a number of written reports which are critiqued by the faculty. Written submissions for component parts of this course range between 46 and 73 pages. An integrative examination is given as the final exercise in the course.

Credit Recommendation: In the graduate degree category, 2 semester hours in quantitative economic analysis, 2 in behavioral analysis in decision making and 2 in management principles, public and private for students completing the course with a grade of B or higher. (5/78).

NV-1511-0009

Strategy and Policy Self-Administered Seminar (Naval War College)

Course Number: None.

Location: Naval War College Nonresident Location, Jacksonville,FL; Naval War College Nonresident Location, Norfolk, VA.

Length: 32 weeks (64 hours).

Exhibit Dates: 9/77–1/80.

Objectives: To develop the understanding, insight, and analytical abilities of the student regarding the uses of national power and resources in relations among nations.

Instruction: The self-administered seminar (SAS) is administered by the students themselves without an instructor present. Close faculty supervision is provided, however, through faculty staff visits, guest lectures, the use of audio and audio-visual tapes of lectures at the Naval War College, by telephone with College faculty as well as the Strategy and Policy seminar instructor in Washington, D.C. being available for consultation, and through the use of conference telephone calls wherein College faculty can provide guidance and respond to questions during the actual seminar meetings. The course involves questions of international politics, civilian-military relations, the uses of military forces, the development of national strategies and concepts of national interest, diplomacy, etc. The method used is the intensive study of selected historical periods, events, and the writings of key theorists. The course is built around a series of case studies ranging over time from the Peloponnesian War to World War II and beyond. The course involves an interdisciplinary approach. The basic materials used are historical, but there are major components that represent international relations, political science, diplomatic history and, to some degree, economics. For each of the seven topics or blocks of work, the student is assigned a core set of readings and a list of recommended supplementary materials. Required reading totals at least 4500 pages for the course. On the basis of a study of these, the student prepares 5 five-to-ten page analytical papers on topics chosen from a prescribed list. The basic instructional technique is a detailed three-or-four-page critique of each essay prepared by a member of the faculty. Students are also required to give three ten or fifteen minute oral critiques of essays written by other seminar members. An integrative examination is given as the final exercise in the course.

Credit Recommendation: In the graduate degree category, 6 semester hours in a combination of history, international relations, and political science (to be apportioned by the receiving institution) for students completing the course with a grade of B or higher (5/78).

NV-1511-0010

NAVAL WAR COLLEGE CORRESPONDENCE COURSE IN NATIONAL SECURITY DECISION MAKING

Course Number: None.
Location: Naval War College, Newport, RI.
Length: Maximum 52 weeks.
Exhibit Dates: 7/87–Present.
Learning Outcomes: Upon completion of the course, the student will be able to utilize analytical skills with respect to decisions involving complex, resource-constrained national security issues. They will develop competence in major behavioral and management control techniques that influence national security.
Instruction: The course is divided into three units: the force planning component focuses on themes valuable in selecting military forces for the future; the defense analysis segment emphasizes the decision process for dealing with complex problems of resource allocation within the Department of Defense; and the policy making and implementation unit treats political organizational and behavioral phenomena relevant to national security decision making. Written responses to guidance questions related to the readings are utilized. Extensive critical evaluation by the faculty of the written work is provided. A proctored final examination is administered.
Credit Recommendation: In the graduate degree category, 3 semester hours in national security planning or defense analysis or policy making and implementation (9/87).

NV-1511-0011

NAVAL WAR COLLEGE CORRESPONDENCE COURSE IN STRATEGY AND POLICY

Course Number: None.
Location: Naval War College, Newport, RI.
Length: Maximum 52 weeks.
Exhibit Dates: 1/86–Present.
Learning Outcomes: Upon completion of the course, the student will have the analytical skills to deal systematically with broad strategic questions at a high level of generality and abstraction. Closely related to this objective, the course will provide the students with a broad historical perspective on strategic questions against which to view and analyze contemporary issues. Throughout, the student will be introduced to the ambiguities in the process of framing grand strategy.
Instruction: Instruction in this course involves heavy reading in the basic professional literature in the areas of military history, international relations, and strategy, focusing upon a series of about seven case studies. The student prepares one or more analytical papers on a topic pertaining to the case study; a detailed three to four page critique is prepared by a member of the faculty. A final, three-hour, closed-book written examination is administered in a proctored environment.
Credit Recommendation: In the graduate degree category, 3 semester hours in history, international relations, or military studies (9/87).

NV-1511-0012

STRATEGY AND POLICY (COLLEGE OF NAVAL WARFARE/NAVAL COMMAND COLLEGE)

Course Number: None.
Location: Naval War College, Newport, RI.
Length: 14 weeks (126 hours).
Exhibit Dates: 11/87–Present.
Learning Outcomes: Upon completion of the course, the junior and senior student officers will have the analytical skills to deal systematically with broad strategic questions at a high level of generality and abstraction. Closely related to this objective, the course will make students aware of the broad range of considerations which such strategic thinking entails: economics, geographic, cultural, political, resource, etc., and their complex interrelationships. In addition, the course will provide for the students a broad historical perspective on strategic questions and strategic thinking, against which to view and analyze contemporary issues of this sort. Throughout, the students will be introduced to the ambiguities in the process of framing grand strategy.
Instruction: Instruction in the course involves extensive inhouse as well as external lectures, contact-heavy faculty student relations, directed and simulated seminar discussion, and heavy reading in the basic professional literature in the areas of military history, international relations, and strategy, all based upon approximately a dozen case studies. Emphasis is placed upon the relationships between a nation's political interests and goals, and the way military force has been deployed to serve those interests and goals, major themes include service coordination, the role of allies, policy-strategy match, military-civil relations, force-strategy match, and nonmilitary factors that affect national policy making.
Credit Recommendation: In the graduate degree category, 3 semester hours in history, 3 in international relations, and 3 in military studies (9/87).

NV-1511-0013

STRATEGY AND POLICY (COLLEGE OF NAVAL COMMAND AND STAFF)

Course Number: None.
Location: Naval War College, Newport, RI.
Length: 12 weeks (108 hours).
Exhibit Dates: 8/87–Present.
Learning Outcomes: Upon completion of the course, the junior/senior student officers will have the analytical skills to deal systematically with broad strategic questions at a high level of generality and abstraction. Closely related to this objective, the course will make students aware of the broad range of considerations which such strategic thinking entails: economic, geographic, cultural, political, resource, etc., and their complex interrelationships. In addition, the course will provide for the students a broad historical perspective on strategic questions and strategic thinking, against which to view and analyze contemporary issues of this sort. Throughout, the students will be introduced to the ambiquities in the process of framing grand strategy.
Instruction: Instruction in this course involves extensive inhouse as well as external lectures, contact-heavy faculty student relations, directed and stimulated seminar discussion, and heavy reading in the basic professional literature in the areas of military history, international relations, and strategy, all based upon approximately a dozen case studies. Emphasis is placed upon the relationships between a nation's political interests and goals, and the way military force has been deployed to serve those interests and goals; major themes include service coordination, the role of allies, policy-strategy match, military-civil relations, force-strategy match, and nonmilitary factors that affect national policy making.
Credit Recommendation: In the graduate degree category, 3 semester hours in history, 3 in international relations, and 3 in military studies (9/87).

NV-1511-0014

NATIONAL SECURITY DECISION MAKING FOR COLLEGE OF NAVAL WARFARE AND NAVAL COMMAND COLLEGE

Course Number: None.
Location: Naval War College, Newport, RI.
Length: 13 weeks (156–157 hours).
Exhibit Dates: 8/87–Present.
Learning Outcomes: Upon completion of the course, the student will be able to utilize multi-disciplinary tools of analysis in decision making and implementation situations. The student will be trained to deal with complex issues within the national security arena. Skills in areas such as resource allocation, force planning and management control will be developed.
Instruction: The course is divided into three units: the force planning component focuses on themes valuable in selecting military forces for the future; the defense analysis segment emphasizes the decision process for dealing with complex problems of resource allocation within the Department of Defense; and the policy making and implemenation unit treats political, organizational and behavioral phenomena relevant to national security decision making. Lectures, seminars, extensive reading and case preparation are the primary learning methods, oral and written reports are required. Final examinations follow the completion of each unit.
Credit Recommendation: In the graduate degree category, 3 semester hours in national security planning, 3 in defense analysis, and 2 in policy making and implementation (9/87).

NV-1511-0015

NATIONAL SECURITY DECISION MAKING FOR COLLEGE OF NAVAL COMMAND AND STAFF

Course Number: None.
Location: Naval War College, Newport, RI.
Length: 13 weeks (146–147 hours).
Exhibit Dates: 3/87–Present.
Learning Outcomes: Upon completion of the course, the student will be able to utilize multi-disciplinary tools of analysis in decision making and implementation situations. The student will be trained to deal with complex issues within the national security arena. Skills in areas such as resource allocation, force planning and management control will be developed.
Instruction: The course is divided into three units: the force planning component focuses on themes valuable in selecting military forces for the future, the defense analysis segment emphasizes the decision process for dealing with complex problems of resource allocation within the Department of Defense, and the policy making and implementation unit treats political, organizational and behavioral phenomena relevant to national security decision making. Lectures, seminars, extensive reading and case preparation are the primary learning methods. Oral and written reports are required. Final examinations follow the completion of each unit.

Credit Recommendation: In the graduate degree category, 3 semester hours in national security planning, 3 in defense analysis, and 2 in policy making and implementation (9/87).

NV-1511-0016

Basic Intelligence Training Subjects

Course Number: J-3A-0950.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA. Fleet Intelligence Training Center, Pacific, San Diego, CA.

Length: 2 weeks (77 hours).

Exhibit Dates: 3/84–Present.

Learning Outcomes: Upon completion of the course the student will be able to read maps and charts, understand introductory electronic warfare and basic operations of the Soviet military.

Instruction: Lectures, exams, laboratory experience, and group exercises in briefing, use of maps and charts, electronic warfare, intelligence collection and photography, Soviet military studies, and Third World characteristics.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in introduction to Soviet studies (12/87).

NV-1511-0017

Intelligence Specialist Class A

Course Number: J-242-0010.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA.

Length: 11 weeks (434 hours).

Exhibit Dates: 7/86–Present.

Learning Outcomes: Upon completion of the course the student will be able to analyze intelligence reports; interpret national estimates; read, interpret and prepare maps and charts; perform basic data processing; assess technical means of gathering intelligence; and interpret aerial photographs.

Instruction: Lectures, examinations, laboratory experience, use of basic library and related sources of intelligence information.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to Soviet studies and 3 in introduction to geopolitics (12/87).

NV-1511-0018

Marine Air Ground Task Force
Intelligence Officer

Course Number: G-243-4210.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA.

Length: 11 weeks (366 hours).

Exhibit Dates: 3/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to utilize the current data base of combat intelligence information; manage the intelligence collection effort; manage the intelligence section; advise superior officers in intelligence aspects of unit operations; manage intelligence training; function as a target intelligence officer; serve as a unit assistant security manager; supervise unit counterintelligence effort and the administration of the intelligence section; understand the operation of intelligence gathering and interpretation, prepare national estimates, and apply geopolitical concepts.

Instruction: Lectures, examinations, laboratory, and field activities that provide instruction in: Fleet Marine Force organization; Naval Intelligence Processing System; Marine Air-Ground Intelligence System; intelligence reports and documents; intelligence collection agencies; amphibious intelligence planning and targeting; counterintelligence; electronic warfare support measures; Tactical Exploitation of National Capabilities planning; and tasking documents and management principles. Includes a command post exercise during which students participate as members of the intelligence section of a landing force being employed in an amphibious assault.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in Soviet studies and 3 in management problems (12/87).

NV-1511-0019

Marine Air/Ground Task Force
Intelligence Specialist Entry

Course Number: J-243-4207.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA.

Length: 8 weeks (401 hours).

Exhibit Dates: 7/86–Present.

Learning Outcomes: Upon completion of the course the student will be able to utilize current data base of combat intelligence information; assist in the management of intelligence collection; assist in the processing of intelligence information; assist in the use of intelligence information for identifying targets; assist in the management of the administration of an intelligence unit; analyze intelligence reports; interpret national estimates; and read and interpret maps.

Instruction: Lectures, examinations, laboratory, and field activities that provide instruction in: map reading; collection, production and dissemination of intelligence; intelligence activities during each phase of an amphibious operation; organization of the Fleet Marine Force; intelligence sources and documents; order of battle; beach and helicopter landing zone intelligence; security; naval communications procedures; reconnaissance agencies; and basic correspondence and filing techniques. Includes a command post exercise during which students participate as members of the intelligence section of a Marine Air/Ground Task Force being employed in an amphibious assault.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to Soviet studies and 3 in introduction to technical communications (12/87).

NV-1511-0020

Marine Air/Ground Task Force
Intelligence Specialist
Intermediate

Course Number: J-243-4208.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA.

Length: 10 weeks (388 hours).

Exhibit Dates: 3/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to utilize current data base of combat intelligence information; assist and participate in the management of the intelligence collection effort, intelligence training, administration of the intelligence section, intelligence personnel and career development program; understand the operation of intelligence gathering and interpretation; prepare national estimates, and apply basic geopolitical concepts.

Instruction: Lectures, examinations, laboratory, and field activities that provide instruction in: Fleet Marine Force and Marine Air-Ground Task Force organization; Naval Intelligence Processing System; Marine Air Ground Intelligence System; intelligence publications, documents and records; intelligence collection agencies; intelligence planning; target intelligence; counterintelligence; electronic warfare; intelligence collection planning at the national levels; intelligence collection management principles; and security education and training. Includes a command post exercise during which students participate as members of the intelligence section of a landing force.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in Soviet studies and 3 in management problems (12/87).

NV-1511-0021

Shipboard Intelligence Analyst

Course Number: J-243-0969.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA. Fleet Intelligence Training Center, Pacific, San Diego, CA.

Length: 3 weeks (109 hours).

Exhibit Dates: 11/86–Present.

Learning Outcomes: Upon completion of the course the student will be able to identify foreign ships (naval and merchant marine), conduct briefings about sightings and the threat they may pose, maintain a library, and relate immediate circumstances to larger threat considerations.

Instruction: Lectures and practical exercises in conducting briefings; effectively using library resources; Soviet, East Europe, Cuban, and Iranian naval and merchant ships and their relationship to the general threat posed; and specific identification of foreign ships.

Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in Soviet studies (12/87).

NV-1511-0022

Naval Intelligence Officer

Course Number: J-3A-0010.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA.

Length: 21 weeks (827 hours).

Exhibit Dates: 7/86–Present.

Learning Outcomes: Upon completion of the course the student will be able to solve intelligence problems, prepare and present intelligence briefings, and function effectively as a member of an intelligence team.

Instruction: Through lecture, laboratory, and practical exercises, the junior Navy officer will review security and intelligence operations; apply basic map reading and image interpretation skills; study U.S. and enemy weapons; understand mission planning; and apply special intelligence techniques.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in geopolitics and 3 in Soviet studies (12/87).

NV-1511-0023

Basic Reserve Intelligence Training -
Enlisted

Course Number: J-242-0010.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA.

Length: 12 weeks (456 hours).

Exhibit Dates: 4/88–Present.

Learning Outcomes: Upon completion of the course, the student will be able to analyze intelligence reports; interpret national estimates; read, interpret, and prepare maps and charts; perform basic data processing; assess technical means of gathering intelligence; and interpret aerial photographs.

Instruction: Lectures, examinations, laboratory experience, and use of basic library and related sources of intelligence information.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in introduction to Soviet studies (7/88).

NV-1511-0024

OPERATIONAL INTELLIGENCE ANALYSIS

Course Number: J-243-0972.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA.

Length: 5 weeks (193 hours).

Exhibit Dates: 10/86–Present.

Learning Outcomes: Upon completion of the course the student will be able to identify foreign ships and their operational characteristics and other friendly naval merchant ships; conduct briefings about sightings and the threat that they pose; maintain a technical data base; relate in immediate circumstances to the larger threat considerations.

Instruction: Instruction consists of lectures, visual aids, student briefings, and extensive practical exercises encompassing: operational intelligence sensor systems, U.S. and foreign weapons systems performance and capabilities; U.S., Soviet, and Third World maritime warfare missions, operations, tactics, and command and control; operational intelligence briefings; preparing operational intelligence summary and advisory reports; security procedures; principles of operational intelligence analysis and reporting and message drafting.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in a physical science elective and 1 in technical communications (12/87).

NV-1511-0025

STRATEGY AND POLICY NONRESIDENT SEMINAR

Course Number: None.

Location: Annapolis, MD; Corpus Christi, TX; Dahlgren, VA; Newport, RI; Norfolk, VA; Patuxent, MD; Pensacola, FL; San Diego, CA; San Francisco, CA; Seattle, WA; Washington, D.C.; White Oak, MD.

Length: 36 weeks (72 hours).

Exhibit Dates: 3/88–Present.

Learning Outcomes: Upon completion of the course the student will have the analytical skills to deal systematically with broad strategic questions. Closely related to this objective, the course will make the students aware of the complexity as well as ambiguity of the broad range of course directions which such strategic thinking entails. In addition, the course will provide for the students a broad historical perspective on strategic questions and thinking against which to view and analyze contemporary issues of this sort.

Instruction: Instruction in the course involves one lecture per case study, a simulated seminar discussion, and extensive reading in the basic professional literature in the areas of military history, international relations, and strategy, all based upon about nine case studies. Five papers (5–10 pages each), three critiques and two, 2-hour examinations are assigned.

Credit Recommendation: In the graduate degree category, 2 semester hours in history, 2 in international relations, and 2 in military studies (3/88).

NV-1511-0026

NATIONAL SECURITY DECISION MAKING NONRESIDENT SEMINAR

Course Number: None.

Location: Annapolis, MD; Corpus Christi, TX; Dahlgren, VA; Newport, RI; Norfolk, VA; Patuxent, MD; Pensacola, FL; San Diego, CA; San Francisco, CA; Seattle, WA; Washington, D.C.; White Oak, MD.

Length: 36 weeks (90 hours).

Exhibit Dates: 3/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to utilized multi-disciplinary tools of analysis in decision making and implementation situations. They will be trained to deal with complex issues within the national security arena. Skills in areas such as resource allocation, force planning and management control will be developed.

Instruction: The course is divided into three units: the force planning component focuses on themes valuable in selecting military forces for the future; the defense analysis segment emphasizes the decision process for dealing with complex problems of resource allocation within the Department of Defense; and the policy making and implementation units political, organizational and behavioral phenomena relevant to national security decision making. Lectures, seminars, extensive reading and case preparation are the primary learning methods. Mid-term and final examinations are required.

Credit Recommendation: In the graduate degree category, 3 semester hours in national security planning and defense analysis and 2 in policy-making and implementation (3/88).

NV-1511-0027

BASIC NAVY OPERATIONAL INTELLIGENCE

Course Number: J-3A-0030.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 7/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to understand the fundamentals of operational intelligence and the ocean surveillance information system.

Instruction: Instruction includes lectures, readings, field trips, and a substantial practical exercise. Topics include fleet intelligence operation, messages and reports, electronic warfare, defense analysis, and Soviet naval command, control, and communications.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in Soviet studies (7/88).

NV-1511-0028

MARINE AIR-GROUND TASK FORCE COUNTERINTELLIGENCE

Course Number: J-244-0944.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA.

Length: 14–15 weeks (608 hours).

Exhibit Dates: 5/88–Present.

Learning Outcomes: Upon completion of the course, the student will be able to function as a member of a counterintelligence team at the headquarters level.

Instruction: Includes classroom instruction, self-paced texts and practical exercises in the field. Major topics include national, Department of Defense, and Marine Corps intelligence assets, applications of counterintelligence, terrorism, tactical functions, security services, communications, human intelligence operations and interrogation techniques. The 14–15 weeks of training includes weekends.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of investigation, 3 in security techniques, 3 in technical communications, 3 in interviewing and interrogations, and 3 in legal principles (7/88); in the upper-division baccalaureate category, 3 semester hour in political science (major foreign powers) and 3–6 in physical security practicum on the basis of institutional evaluation (7/88).

NV-1511-0029

MARINE AIR-GROUND TASK FORCE INTELLIGENCE OFFICER RESERVE (PHASES 1 AND 2)

Course Number: J-3A-4334; J-3A-4214.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA.

Length: 4 weeks (160 hours).

Exhibit Dates: 6/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to analyze and interpret intelligence reports, use military intelligence libraries and sources of information, employ and understand the vocabulary of intelligence, handle classified materials properly, and apply basic concepts of military strategy.

Instruction: Instruction includes lectures, practical exercises, presentation of an oral briefing, participation in a team project, and course examinations. Topics include a description of the intelligence community, intelligence definitions, preparing and interpreting intelligence estimates, using maps, terrorism, geographical factors in intelligence operations, targeting, and considerations of personal security.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in political science (national security) and 1 in an advanced physical geography elective (7/88).

NV-1511-0030

MARINE AIR GROUND TASK FORCE INTELLIGENCE SPECIALIST RESERVE (PHASES 1 AND 2)

Course Number: J-243-4213 (Phase 1); J-243-4223 (Phase 2).

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA.

Length: 4 weeks (160 hours).

Exhibit Dates: 6/79–Present.

Learning Outcomes: Upon completion of the course, the student will be able to analyze and interpret intelligence reports; use military intelligence libraries and sources of information; and handle classified materials properly.

Instruction: Lectures, practical exercises, presentation of an oral briefing, team projects, and examinations covering the intelligence community, the use of maps, the study of terrorism, and analysis of geographical factors in intelligence operations.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in political science (introduction to national security) and 1 in a physical geography elective (7/88).

NV-1511-0031

Intelligence Officer Refresher

Course Number: J-3A-0952.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 8/78-Present.

Learning Outcomes: Upon completion of the course, the student will be able to deal with general national security considerations and the basics of geopolitics and naval strategy, and understand major characteristics of sensors and electronic intelligence.

Instruction: Lectures, readings, and exams in maritime strategy, geographic areas of naval operations, methods and types of electronic intelligence (ELINT).

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in political science (national security) and 1 in an advanced physical geography elective (7/88).

NV-1511-0032

Intelligence Specialist Class A - Operational Intelligence Reserve (Phases 1 and 2)

Course Number: J-242-2014.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA.

Length: 2-3 weeks (96 hours).

Exhibit Dates: 9/89-Present.

Learning Outcomes: Upon completion of the course, the student will be able to deal with general national security considerations and the basics of electromagnetic radiation, types of intelligence gathering techniques, and sensor characteristics analysis.

Instruction: Lectures, discussion, examinations, and practical exercises covering the following topics: Sensor characteristics; principles of electronic intelligence; automated intelligence data processing and data bases; U.S. and foreign naval strategic forces; intelligence reporting and communications.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in political science (introduction to national security) and 1 in technical communications (7/88).

NV-1511-0033

Naval Intelligence Mid-Career

Course Number: J-3A-0998.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA.

Length: 2-3 weeks (88-99 hours).

Exhibit Dates: 2/88-Present.

Learning Outcomes: Upon completion of the course, the student will be able to judge high-level intelligence and national security questions, including evaluation of the Soviet Union in particular, and analyze U.S. maritime strategy and multi-dimensional aspects of command, control, communications, and intelligence.

Instruction: Lectures by major figures in the U.S. intelligence community and experienced practitioners of U.S. Naval Intelligence, as well as required readings and extensive class discussion. Topics include: How U.S. naval strategy supports U.S. policy; capabilities and strategy of the Soviet Navy; changing political developments in the Soviet Union; questions of security and counterintelligence; terrorism; managing resources; and practical shipboard applications of broad general intelligence guidelines.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in political science (national security) (7/88).

NV-1511-0034

Naval Staff College

Course Number: None.

Location: Naval War College, Newport, RI.

Length: 23 weeks (460 hours).

Exhibit Dates: 1/84-Present.

Learning Outcomes: Upon completion of the course, the student will be able to understand fundamentals of foreign policy and military (naval) strategy; principles of managing a defense organization; methods for optimizing employment or naval forces in peacetime and general conventional war deployments; how to make sound defense-related decisions.

Instruction: Lectures, discussion sections, case studies, gaming, a research paper, written examinations. Topics covered are: policy and strategy, employment of naval forces, international law and ocean affairs, and national security decision making.

Credit Recommendation: In the graduate degree category, 3 semester hours in military studies, 3 in history, and 2 in management decision making/defense analysis OR 6 semester hours in military studies and 2 in management decision making/defense analysis (8/88).

NV-1512-0001

Intercultural Relations—Race Relations Specialist Training

Course Number: A-00-0117.

Location: Naval Amphibious School, San Diego, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 7/72-1/88.

Objectives: To train race relations specialists.

Instruction: Lectures and practical exercises in race relations. Course includes classroom presentations, discussions, field projects, and practical exercises which enable the student to demonstrate his ability to facilitate discussions on racial issues.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in human relations or basic psychology (8/74).

NV-1512-0002

High Impact Personnel Overseas Duty Training

(Intercultural Relations—Overseas Duty Training)

Course Number: A-00-0115.

Location: Naval Amphibious School, Coronado, San Diego, CA; Naval Amphibious School, Little Creek, Norfolk, VA.

Length: 3 weeks (120 hours).

Exhibit Dates: 7/72-1/88.

Objectives: To train enlisted personnel to fulfill diplomatic missions overseas.

Instruction: Lectures and practical exercises in diplomatic missions overseas. Course includes frameworks for analysis of cultures, knowledge of specific cultures, intercultural communications skills, cultural value and ideology, and dynamics of change.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in human relations or basic psychology (8/74).

NV-1512-0003

Intercultural Relations—Facilitator Training

Course Number: A-SK-0011.

Location: Naval Amphibious School, San Diego, CA.

Length: 18 weeks (720 hours).

Exhibit Dates: 7/72-1/88.

Objectives: To train enlisted personnel to facilitate intercultural relations programs.

Instruction: Lectures and practical exercises in intercultural programs. Course includes leadership skills, team building processes, cultural awareness, course familiarization, communications skills, dynamics of change, and supervised teaching.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in human relations or basic psychology. In the upper-division baccalaureate category, 3 semester hours in group dynamics, and, on the basis of institutional evaluation, 6 in supervised teaching (8/74).

NV-1512-0004

Intercultural Relations—Human Resources Development

Course Number: A-00-0116.

Location: Naval Amphibious School, San Diego, CA.

Length: 5 weeks (200 hours).

Exhibit Dates: 7/72-1/88.

Objectives: To train enlisted personnel in intercultural training.

Instruction: Lectures and practical exercises in intercultural training. Course includes leadership skills, administrative concerns, cultural awareness, communications skills, project management, and dynamics of change.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in human relations or basic psychology; in the upper-division baccalaureate category, 1 semester hour in speech communications, and 5 in management training or group dynamics (8/74).

NV-1512-0005

Human Resource Management Specialist

Course Number: A-7C-0019.

Location: Human Resource Management School, Naval Air Station, Memphis, Millington, TN.

Length: 12 weeks (400 hours).

Exhibit Dates: 6/75-3/83.

Objectives: To prepare students in the application of interventive techniques to assist organizations in a more effective use of human resources.

Instruction: The course utilizes lectures, simulations, role playing and field experiences (practica). The first six weeks cover a system overview which includes the human resource management support system, communications, group dynamics, racism, sexism awareness, and drug and alcohol awareness. The second six weeks cover instructional systems design and facilitation techniques, data guided development, equal opportunity, the Overseas Diplomacy Mission Element (ODME), and drug and alcohol action programs.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in introductory sociology/social work and 2 in methods in education (6/77); in the upper-division baccalaureate category, 2 semester hours in principles of management and 2 in advanced level sociology/social work (6/77); in the graduate degree category, 1 semester hour in psychology/social work and 3 in survey research methods (6/77).

NV-1512-0006

Human Resource Management
Instructor

Course Number: A-7C-0019.
Location: Human Resource Management School, Naval Air Station, Memphis, Millington, TN.
Length: 12 weeks (400 hours).
Exhibit Dates: 6/75-1/88.
Objectives: To prepare students to be instructors with a knowledge and understanding of learning, course development, instructional techniques and evaluation in the field of human resource management.
Instruction: The course utilizes lecture, simulation, role play and field experiences (practica). The first six weeks cover a system overview which includes the human resource management support system, communications, group dynamics, racism, sexism awareness, and drug and alcohol awareness. The second six weeks consist of course design/redesign and evaluation, dynamics of learning, and applied teaching techniques.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in introductory sociology/social work and 1 in methods in education (6/77); in the upper-division baccalaureate category, 2 semester hours in principles of management and 4 in education (6/77); in the graduate degree category, 1 semester hour in psychology/social work (6/77).

NV-1513-0001

Naval Staff Advisor

Course Number: A-011-0012; A-011-0013.
Location: Naval Amphibious School, San Diego, CA.
Length: 20-61 weeks.
Exhibit Dates: 11/72-12/76.
Objectives: To train enlisted personnel to advise Vietnamese on staff organization and procedures.
Instruction: Lectures and practical exercises in human response training; group dynamics; human relations and behavior; language training, and cultural, ethnic, and economic value systems of U.S.A. and Southeast Asia.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in introduction to psychology or human relations, 3 in social sciences (7/74).

NV-1513-0002

Naval Advisor

Course Number: A-2G-0019.
Location: Amphibious School, San Diego, CA.
Length: 15 weeks (507 hours).
Exhibit Dates: 11/72-12/76.
Objectives: To train enlisted personnel to serve in advisory positions in Vietnam.
Instruction: Lectures and practical exercises in the duties and responsibilities of an advisor in Vietnam. Course includes human response training course (group dynamics, human relations, and human behavior); cultural, ethnic, and economic value system of Southeast Asia; and language training.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to psychology or human relations, 3 in social science, and credit in basic Vietnamese on the basis of institutional evaluation (7/74).

NV-1513-0003

Intercultural Relations—Vietnam
Advisor Training

Course Number: A-2G-0020.
Location: Naval Amphibious School, San Diego, CA.
Length: 6 weeks (198 hours).
Exhibit Dates: 7/72-12/76.
Objectives: To train enlisted personnel to function effectively as advisors in the Republic of Vietnam.
Instruction: Lectures and practical exercises in the duties and responsibilities of an advisor in Vietnam. Course includes administration concerns and procedures, self-awareness and interpersonal and intergroup relations, personal and group values, nature of prejudice, management, culture, Vietnamese culture, personal action programs, and materials, equipment, and publications.
Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in human relations or group dynamics (7/74).

NV-1513-0004

Chaplain School Basic

Course Number: A-5G-0010.
Location: Naval Education and Training Center, Newport, RI.
Length: 8 weeks (280 hours).
Exhibit Dates: 4/72-1/88.
Objectives: To train chaplains to serve the personal religious needs of military personnel.
Instruction: Lectures and practical exercises in the duties of a chaplain in the military. Course includes supervision, guidance, and counseling; drug abuse; discipline; minority group advisement; human growth and development; counseling techniques; group processes and interactions; and leadership skills.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in guidance and counseling, 3 in group dynamics (8/74).

NV-1601-0001

Compressed Gases Cryogenerator
Maintenance, Class C

Course Number: A-750-0012.
Location: Compressed Gases Class C School, Portsmouth, VA.
Length: 3 weeks (100 hours).
Exhibit Dates: 7/72-1/88.
Objectives: To train personnel to operate and maintain the mechanical portions of the Model 'B' cryogenerator.
Instruction: Lectures and practical exercises on the operation and maintenance of the mechanical portion of the model 'B' nitrogen cryogenerator, including the system and component data; theory of operation and process familiarization of the model 'B' cryogenerator; description, function, and principles of operation of components and systems; corrective maintenance, tracing leaks; critical parts and tolerances; and electrical and mechanical troubleshooting.
Credit Recommendation: In the vocational certificate category, 2 semester hours as an elective in mechanical technology (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour as an elective in mechanical technology (6/74).

NV-1601-0002

Electrolytic Oxygen Generator 7L16

Course Number: F-652-015.
Location: Submarine School, Groton, New London, CT.
Length: 3 weeks (90 hours).
Exhibit Dates: 11/67-5/80.
Objectives: To train enginemen and machinist mates in the maintenance of the 7L16 oxygen generator.
Instruction: Lectures and practical exercises in the operation and maintenance of the 7L16 electrolytic oxygen generator, including maintenance and material management system, introduction to the electrolytic generator, familiarization with the installed oxygen generator, familiarization with electrolytic cell, flow diagram, pneumatic controls, operating procedures, practical operation and maintenance, annunciation panel and read-out drawer, familiarization with gas analyzers, and purge procedures.
Credit Recommendation: In the vocational certificate category, certificate in mechanical technology (6/74).

NV-1601-0003

Engineering Aid, Class A1 (EA "A")

Course Number: A-412-0010; A-412-0013.
Location: Construction Training Center, Port Hueneme, CA; Construction Training Center, Gulfport, MS; Construction School, Davisville, RI.
Length: 11-16 weeks (347-437 hours).
Exhibit Dates: 1/63-1/88.
Objectives: To train enlisted personnel to be engineering aides.
Instruction: Lectures and practical exercises in concrete, and soil quality control tests; drafting construction drawings; completing topographic and engineering surveys; and mathematical problem solving associated with surveys.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 9 semester hours in civil engineering aid (7/76); in the upper-division baccalaureate category, 3 semester hours in drafting, and 3 in construction survey (7/76).

NV-1601-0004

Equipment Operators, Water Well
Drilling and Development,
Class C
(EO "C" Water Well Drilling and Development)

Course Number: A-730-0014; A-730-014; A-730-0015; A-730-015; A-730-0016; A-730-016.
Location: Construction Training Center, Port Hueneme, CA; Construction Training Center, Gulfport, MS; Construction School, Davisville, RI.
Length: 4 weeks (120 hours).
Exhibit Dates: 11/65-1/88.
Objectives: To train enlisted personnel in water well drilling and development operations.
Instruction: Lectures and practical exercises in water well drilling and development, including ground water supply, safety precautions in well drilling, rotary drilling machines, drilling machines maintenance, air operated drills, pumps, testing wells for yield and drawdown, and testing for residual chlorine.
Credit Recommendation: In the vocational certificate category, 2 semester hours in water well drilling (7/76).

NV-1601-0005

Oxygen Generator (Mechanical)

Course Number: L-652-012.

Location: Fleet Submarine Training Facility, Pearl Harbor, HI.

Length: 3-4 weeks (93 hours).

Exhibit Dates: 10/66-1/88.

Objectives: To train enlisted personnel to operate and maintain oxygen generation equipment.

Instruction: Lectures and practical exercises in the operation of an oxygen generation system. Course includes electrolytic cell, valve nomenclature, nitrogen system, distilled water system, oxygen system, cooling system, gas analyzer systems, annunciator panel, pneumatic system and controls, pneumatic control calibration, operating and purge procedures, spotting troubles, maintenance and clean-up, generator pressure test, introduction to the electrical system, and generator operation and troubleshooting.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in chemical technology elective (5/74).

NV-1601-0006

Oxygen Generator Mechanical Model 6L16 (Enlisted)

Course Number: F-652-044.

Location: Submarine School, Groton, CT.

Length: 4 weeks (120 hours).

Exhibit Dates: 5/68-1/88.

Objectives: To train enlisted personnel to maintain and operate the 6L16 electrolytic oxygen generator under normal and emergency conditions.

Instruction: Lectures and practical exercises on the operation and maintenance of the 6L16 electrolytic oxygen generator. Course includes function of flow systems and electronic control systems, normal and emergency operations, basic hydraulic principles, valves transducers, hydraulic flow components, electrolytic cell, calibration, preventive maintenance, check-out and test procedure, safety precautions, and system troubleshooting.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour as an elective in chemical technology (5/74).

NV-1601-0007

Oxygen Equipment Class C

Course Number: Not available.

Location: Air Technical Training Unit, Lakehurst, NJ.

Length: 14 weeks (560 hours).

Exhibit Dates: 4/56-12/68.

Objectives: To train personnel in the maintenance, testing, and repair of oxygen equipment.

Instruction: Lectures and practical exercises in the maintenance, testing, and repair of the aircraft oxygen equipment, including regulators, full-pressure units, oxygen regulator test stand, pressure breathing regulators, liquid oxygen test stands and conversion units, and ready-room and flight-line procedures.

Credit Recommendation: In the vocational certificate category, 5 semester hours in oxygen equipment (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in aeronautical technology (5/74).

NV-1601-0008

Electrolytic Oxygen Generator Operators

Course Number: A-652-0057.

Location: Submarine Training Center, Pearl Harbor, HI.

Length: 2 weeks (60 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train personnel to operate and maintain the 6L16 oxygen generator.

Instruction: Lectures and practical exercises in the maintenance and operation of the 6L16 oxygen generator, including detailed analysis and troubleshooting of all mechanical components, purging of the oxygen generator, valve nomenclature, cell construction and insulation, cell jumpering and electrolyte refill of cell, basic flow path, transducers, electrical systems and annunciation panel, start-up, normal operation, and shut-downs, cleaning and degreasing, and gas analyzers.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (5/74).

NV-1601-0009

6L16 Oxygen Generator Technician

Course Number: A-623-0034; F-623-044.

Location: Submarine School, Groton, CT.

Length: 6 weeks (180 hours).

Exhibit Dates: 3/70-12/79.

Objectives: To train personnel to perform as 6L16 oxygen generator technicians.

Instruction: Lectures and practical exercises in the maintenance and troubleshooting of the 6L16 oxygen generator, including maintenance and material management system; electrolysis and the electrolytic cell; functional analysis of flow systems and the electrical control system; electrolysis power supply description, analysis, operation, calibration, and troubleshooting; electronic control system power supplies and description; pressure controller circuit analysis; gas analyzer; and system troubleshooting and maintenance.

Credit Recommendation: In the vocational certificate category, 2 semester hours as an elective in chemical technology (5/74); in the lower-division baccalaureate/associate degree category, 1 semester hour as an elective in chemical technology (5/74).

NV-1601-0010

Compressed Gases, Class C, High Pressure Oxygen-Nitrogen Plant

(Cryogenics, Class C)

(Compressed Gases, Class C)

Course Number: A-750-0010.

Location: Norfolk Naval Shipyard, Portsmouth, VA.

Length: 14 weeks (436-452 hours).

Exhibit Dates: 10/61-1/88.

Objectives: To train enlisted personnel to operate and maintain high-pressure liquid oxygen/nitrogen generating plants and associated equipment.

Instruction: Lectures and practical exercises in the operation and maintenance of high-pressure liquid oxygen/nitrogen generating plants and associated equipment, including physics and chemistry of cryogenics, air liquification, cryogenic storage, transfer and handling equipment, high-pressure air compressors and vacuum pumps, refrigeration, recondenser components and repair, and operation of specific generating plant equipment.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1601-0011

Torpedoes Mk 14 Mod 5 and Mk 16 Mod 8 Intermediate Maintenance

Course Number: A-123-0132; K-123-592.

Location: Service Schools Command, Orlando, FL; Fleet Training Group, Pearl Harbor, HI.

Length: 15 weeks (420-450 hours).

Exhibit Dates: 2/68-1/78.

Objectives: To train torpedomen and strikers to operate and maintain the Mk 16 torpedoes and associated test equipment.

Instruction: Lectures and practical exercises in the operation and maintenance of Mk 16 torpedoes and associated test equipment, including functional operations, overhaul and repair, disassembly and assembly, and maintenance and preservation.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in industrial or mechanical technology (8/74).

NV-1601-0012

Self-Noise Determination and Classification

Course Number: F-210-013.

Location: Submarine School, Groton, CT.

Length: 2 weeks (60 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train enlisted personnel in submarine noise reduction, mechanical vibration and measurement, and use of sound measurement equipment.

Instruction: Lectures and practical exercises in submarine noise reduction, mechanical vibration and measurement, and use of sound measurement equipment. Course includes fundamentals of sound, mathematics, flow noise and damping, noise surveys, balancing, and use of installed equipment for noise monitoring.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in noise control or sound control (8/74).

NV-1601-0013

Engineering Control and Surveillance System Operator, Class C1

Course Number: A-652-0074.

Location: Service School Command, Great Lakes, IL.

Length: 4 weeks (160 hours).

Exhibit Dates: 12/76-1/88.

Objectives: To provide technical knowledge and skills in the performance of duties and supervision of personnel involved in the operation of engineering control and surveillance systems of the DD963 class destroyer.

Instruction: Areas of instruction include a working knowledge of the operation and maintenance of the following systems: electrical plant control equipment, propulsion and auxiliary machinery control equipment, propulsion and auxiliary machinery information systems equipment, propulsion local operating equipment and central information system equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in maintenance of engineering instrumentation or mechanical control systems (9/77).

NV-1601-0014

Engineering Control and Surveillance System Maintenance, Class C1

Course Number: A-652-0075.

Location: Service School Command, Great Lakes, IL.

Length: 10-12 weeks (400-480 hours).

Exhibit Dates: 1/77-1/88.

Objectives: To train qualified electricians in the duties and supervision of the engineering control and surveillance systems of the DD963 class destroyer.

Instruction: Areas of instruction cover the following systems: electrical plant control equipment, propulsion and auxiliary machinery control equipment, propulsion local operating equipment, propulsion and auxiliary machinery information system equipment and ship's control equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer operations and 5 in an electrical technology elective (9/77).

NV-1601-0015

DD-963 Centralized Damage Control/Fuel Control System Operator
(DD-963 Centralized Damage Control Console Operator, Class C1)

Course Number: A-652-0079.

Location: Service School Command, Great Lakes, IL.

Length: 2 weeks (80 hours).

Exhibit Dates: 2/77-Present.

Objectives: To train enlisted personnel to operate the damage control/fuel control consoles for the DD963 class destroyer.

Instruction: Areas of instruction include the following subsystems: hazard detection panel, fire-main control panel, fuel oil fill and transfer panel, JP-5 control panel, fuel oil and JP-5 local control panels.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (10/83).

NV-1601-0016

DD-963 Centralized Damage Control System Console Maintenance, Class C1

Course Number: A-652-0081.

Location: Service School Command, Great Lakes, IL.

Length: 3 weeks (120 hours).

Exhibit Dates: 5/77-10/79.

Objectives: To train personnel to operate and maintain the damage control/fuel control console for the DD963 class destroyer.

Instruction: Areas of instruction include energizing, lining up, securing, monitoring, recognizing and acknowledging simulated fault and hazard conditions.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in instrumentation or systems controls (9/77).

NV-1601-0017

SSM Automatic Degaussing Equipment Maintenance for the DD-963
(SSM Degaussing System for DD-963 Class Destroyer, Class C1)

Course Number: A-690-0022.

Location: Service School Command, Great Lakes, IL.

Length: 2 weeks (60 hours).

Exhibit Dates: 4/76-Present.

Objectives: To train personnel to operate and maintain the degaussing system.

Instruction: Instruction in the theory of degaussing, the operation of the degaussing control systems, adjustment, maintenance and troubleshooting associated electrical equipment related to the degaussing systems for ships.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (10/83).

NV-1601-0018

Oxygen Generator 6L16 Operator
(Treadwell Oxygen Generator Operation/Maintenance 6L16)
(Oxygen Generator Operator 6L16)

Course Number: A-652-0050.

Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA; Naval Submarine Training Center, Pearl Harbor, HI; Naval Submarine Training Center, San Diego, CA; Naval Submarine Training Center, Groton, CT; Naval Submarine Training Center, New London, CT.

Length: 3 weeks (115-120 hours).

Exhibit Dates: 2/80-Present.

Objectives: To provide students with the essential knowledge necessary to operate, repair and maintain the 7L16 oxygen generator.

Instruction: Lectures and practical exercises in the theory and actual operation, maintenance and troubleshooting of the oxygen generator and its various systems.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (10/89).

NV-1601-0019

Oxygen Generator Operator/Mechanical Technician

Course Number: A-652-0051.

Location: Fleet Ballistic Missile Submarine Training Center, Charleston, SC; Naval Submarine Training Center, Pearl Harbor, HI; Naval Submarine School, Groton, CT; Naval Submarine School, New London, CT.

Length: 3 weeks (109 hours).

Exhibit Dates: 6/80-Present.

Objectives: To train enlisted personnel to operate, maintain and repair the 7L16 oxygen generator.

Instruction: Lectures and practical exercises in the operation, repair and troubleshooting of the 7L16 generator including the theory of liquid and gas systems, functions of all pneumatic control system components and the use of dial indicators, torque wrenches and gas calibration equipment.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (6/81).

NV-1601-0020

Engineering Principles and Practices

Course Number: A-651-0066.

Location: Fleet Training Center, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: 2 weeks (57 hours).

Exhibit Dates: 8/80-Present.

Objectives: To train personnel to perform maintenance on basic mechanical components.

Instruction: Lectures and practical exercises in maintenance of basic mechanical components including sensing instruments, mechanical fasteners and locking devices, static and dynamic fluid seals, lubrication, bearings and flexible couplings.

Credit Recommendation: In the vocational certificate category, 2 semester hours in mechanical systems maintenance (5/82); in the lower-division baccalaureate/associate degree category, 1 semester hour in mechanical systems laboratory (5/82).

NV-1601-0021

Air Compressors and Compressed Air Systems Component Maintenance

Course Number: A-651-0070.

Location: Fleet Training Center, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: 3 weeks (93 hours).

Exhibit Dates: 8/80-8/86.

Objectives: To train personnel in the maintenance of air compressors and compressed air systems.

Instruction: For this course after 8/86 see NV-1601-0029. Lectures and practical exercises in the maintenance of air compressors and compressed air systems including low and high pressure compressors, air dryers/dehydrators, maintenance principles and record keeping and spare part procurement.

Credit Recommendation: In the vocational certificate category, 3 semester hours in machinery repair (5/82); in the lower-division baccalaureate/associate degree category, 1 semester hour in mechancial systems laboratory (5/82).

NV-1601-0022

Boiler Water/Feed Water Test and Treatment Instructor Certification

Course Number: A-651-0103.

Location: Surface Warfare Officers School Command, Newport, RI.

Length: 4 weeks (160 hours).

Exhibit Dates: 11/79-Present.

Objectives: To prepare officer and enlisted naval personnel in boiler water testing and treatment.

Instruction: Classroom instruction and practical exercises in boiler water conditioning including: basic mathematics, algebra exponents, scientific notation, logarithms and proportions; water chemistry including atomic structure, the periodic table, equations, stoichiometry, acid-base reactions, PH concept, electrolysis, chemical testing and corrosion control in Idle 8 operational high pressure steam generators.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in basic mathematics and 2 in basic chemistry (11/82).

NV-1601-0023

FFG-7 PCO/PXO Gas Turbine Engineering

Course Number: A-4H-0061.

Location: Surface Warfare Officers School Command, Newport, RI.

Length: 2 weeks (68 hours).

Exhibit Dates: 3/79-Present

Objectives: To provide prospective commanding and executive officers with an overall knowledge of the FFG-7 ship's engineering system including administrative and managerial duties.

Instruction: The course is technical in content and deals specifically with marine gas turbine plant engineering. Major topics include the unique-power train and its control system, the generation distribution and control system of the ship's electrical plant; auxiliary systems and their respective controls and monitoring requirements. Additionally, related managerial and administrative responsibilities are reviewed.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in maintenance management (11/82).

NV-1601-0024

DD-963 PCO/PXO GAS TURBINE ENGINEERING

Course Number: A-4H-0043.
Location: Surface Warfare Officers School Command, Newport, RI.
Length: 2-3 weeks (72-80 hours).
Exhibit Dates: 10/77-Present.
Objectives: To provide prospective commanding and executive officers with a general knowledge of the engineering system installed in a DD963 destroyer including administrative and managerial responsibilities.
Instruction: The course gives the officer a general overview of the marine gas turbine plant including the power train and its control system, the generation distribution and control system of the ship's electrical plant and the auxiliary system. In addition, administrative and managerial responsibilities are covered.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in maintenance management (11/82).

NV-1601-0025

DD-963 SHIP SERVICE GAS TURBINE GENERATOR SET OPERATOR AND WASTE HEAT BOILER OPERATOR

Course Number: A-652-0225.
Location: Service School Command, Great Lakes, IL.
Length: 2 weeks (80 hours).
Exhibit Dates: 4/81-Present.
Objectives: To train personnel in the operation of the Model 104 gas turbine generator set and waste water heater.
Instruction: Lectures and practical exercises on the operation of the gas turbine including turbine assembly, coaling systems, intake, exhaust, reduction gears, ignition systems, starting systems, fuel systems, fire fighting detectors and waste heat boiler system and operation.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in gas turbine theory and operation, 1 in gas turbine operation laboratory (10/83).

NV-1601-0026

FFG-7 CLASS DEGAUSSING SYSTEM MAINTENANCE

Course Number: A-690-0078.
Location: Service School Command, Great Lakes, IL.
Length: 2 weeks (80 hours).
Exhibit Dates: 6/83-Present.
Objectives: To train personnel to operate and maintain a degaussing system.
Instruction: Lectures and laboratory exercises in the theory of degaussing, the operation of the degaussing control systems, and adjustment, maintenance and troubleshooting of the electrical equipment related to the degaussing system.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (10/83).

NV-1601-0027

MAIN ENGINE AND LUBE OIL PURIFIER

Course Number: A-651-0078.
Location: Fleet Training Center, Norfolk, VA; Fleet Training Center, San Diego, CA.
Length: 1-2 weeks (76 hours).
Exhibit Dates: 9/87-Present.
Learning Outcomes: Upon completion of the course the student will be able to disassemble, inspect, and measure steam turbines and lube oil purifiers.
Instruction: Classroom and practical instruction on steam turbines and lube oil purifiers. Includes selection of parts and procedures for procurement of replacement parts.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour lecture and 1 semester hour laboratory in manufacturing processes (3/89).

NV-1601-0028

VAPOR COMPRESSION DISTILLER MAINTENANCE AND OPERATION

Course Number: J-651-0488.
Location: Fleet Training Center, Norfolk, VA; Fleet Training Center, San Diego, CA.
Length: 2 weeks (80 hours).
Exhibit Dates: 1/87-Present.
Learning Outcomes: Upon completion of the course the student will be able to operate, test, service, and repair vapor compression distillers.
Instruction: Classroom and practical instruction on vapor compression distillers.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour lecture and 1 semester hour laboratory in distillation mechanical systems (3/89).

NV-1601-0029

AIR COMPRESSOR AND COMPRESSED AIR SYSTEM COMPONENT MAINTENANCE

Course Number: A-651-0070.
Location: Fleet Training Center, Norfolk, VA; Fleet Training Center, San Diego, CA.
Length: 2-3 weeks (100 hours).
Exhibit Dates: 9/86-Present.
Learning Outcomes: Upon completion of the course the student will be able to operate and maintain air compressor systems.
Instruction: Classroom and practical instruction in the operation and maintenance of air compressors and compressed air systems including low and high pressure compressors, air dryers/dehydrators and maintenance principles.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour lecture and 1 semester hour laboratory in mechanical compressor systems (3/89).

NV-1601-0030

I/R HIGH PRESSURE AIR COMPRESSOR COMBINED MAINTENANCE

Course Number: A-652-0100.
Location: Submarine School, Groton/New London, CT; Submarine Training Center, Charleston, SC.
Length: 1-2 weeks (52 hours).
Exhibit Dates: 9/84-Present.
Learning Outcomes: Upon completion of the course the student will be able to describe the theory, operation, maintenance of high pressure air compressors and to perform maintenance and repair procedures.
Instruction: Lectures and laboratory instruction on high pressure air compressors.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour lecture and 1 semester hour laboratory in mechanical systems (air compressors) (10/89).

NV-1606-0001

INTELLIGENCE ADVISOR VIETNAM

Course Number: A-3A-0023.
Location: Naval Amphibious School, Coronado, San Diego, CA.
Length: 2 weeks (87 hours).
Exhibit Dates: 5/72-12/76.
Objectives: To train intelligence officers as operators and advisors in Vietnam by providing thorough study of intelligence processes, functions, and skills.
Instruction: Study of U.S. and Vietnamese intelligence organizations; specialized intelligence activities.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (2/74).

NV-1606-0002

IOIC SUPERVISOR

Course Number: D-3A-013.
Location: Reconnaissance Attack Squadron Three, Albany, GA.
Length: 5 weeks (200 hours).
Exhibit Dates: 5/69-1/88.
Objectives: To train the student in the processing of electronically acquired intelligence information.
Instruction: Electronic data processing methods; photographic processing; storage; programming; compatible interfacing; maintenance procedure.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic data processing, 3 in basic photography (2/74).

NV-1606-0003

INTELLIGENCE OFFICER, VIETNAM

(Naval Field Intelligence Officer, Vietnam)

Course Number: H-3A-5516.
Location: Amphibious School, Coronado, San Diego, CA.
Length: 13 weeks (811 hours).
Exhibit Dates: 4/67-12/76.
Objectives: To provide commissioned officers with functional training in the organizational development of intelligence communities, with emphasis on the Vietnamese community, language, and culture.
Instruction: Political history of Southeast Asia; comparative religions and cultures; intelligence methods; Vietnamese language; geopolitical concepts.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in Far Eastern language and literature, 3 in political science (2/74).

NV-1606-0004

AMPHIBIOUS INTELLIGENCE STAFF OFFICER

Course Number: H-3A-5515.
Location: Naval Amphibious School, San Diego, CA.
Length: 2 weeks (80 hours).
Exhibit Dates: 1/70-3/71.
Objectives: To train commissioned and warrant officers in amphibious intelligence operations, concepts, and principles.
Instruction: Collection, processing, and dissemination of intelligence; intelligence briefing techniques; counterinsurgency

methods and principles; communications theory; principles of counterintelligence.

Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in information and communications, 1 in business administration (2/74).

NV-1606-0005

Marine Enlisted Basic Combat Intelligence

Course Number: G-243-4212.

Location: Amphibious School, Little Creek, VA.

Length: 2 weeks (60 hours).

Exhibit Dates: 1/70-1/88.

Objectives: To train enlisted Marines in basic amphibious combat intelligence functions and procedures.

Instruction: Map and aerial photograph reading, counterintelligence, and reconnaissance methods; beach studies; battalion organization; collection, production, and dissemination of information and military intelligence data.

Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in photomapping, 1 in industrial security, 1 in public administration (2/74).

NV-1606-0006

Intelligence Man (Air/Ground)

Course Number: H-243-3167.

Location: Naval Amphibious Base, San Diego, CA.

Length: 3 weeks (100 hours).

Exhibit Dates: 11/71-1/88.

Objectives: To train enlisted personnel for intelligence duty as assistants in the collection of military material in combat situations.

Instruction: Map instruction; collection, production, and dissemination of intelligence; organizational methods; naval communications procedures; automated intelligence, basic correspondence and filing techniques; combat situations analysis and information collection and reporting.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in topography on the basis of institutional evaluation (2/74).

NV-1606-0007

1. Basic Underwater Demolition/SEAL Training
   (Basic Underwater Demolition/Seal Team Training)
2. Underwater Demolition Training (Officer)
   (Underwater Demolition Training (Enlisted))
3. Underwater Demolition Training

Course Number: *Version 1:* A-4E-0047; A-431-0024; H-2E-5311; H-431-5311. *Version 2:* G-2E-6244; G-431-6244. *Version 3:* H-2E-5311; H-431-5311.

Location: Amphibious School, San Diego, CA; Amphibious School, Norfolk, VA.

Length: *Version 1:* 20-23 weeks (1223 hours). *Version 2:* 16 weeks (961 hours). *Version 3:* 18 weeks (1082 hours).

Exhibit Dates: *Version 1:* 7/69-1/88. *Version 2:* 4/68-6/69. *Version 3:* 9/66-3/68.

Objectives: To train officers and enlisted personnel in the principles and physics of scuba diving.

Instruction: Basics of scuba diving and proper use of scuba diving apparatus.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in marine science technology (12/73). *Version 2:* Credit is not recommended because of the military-specific nature of the course (12/73). *Version 3:* Credit is not recommended because of the military-specific nature of the course (12/68).

NV-1606-0008

Diver First Class

Course Number: A-433-0025; A-433-018.

Location: Naval Diving and Salvage Training Center, Panama City, FL; Diving and Salvage School, Washington, DC.

Length: 14-26 weeks (465-858 hours).

Exhibit Dates: *Version 1:* 1/83-Present. *Version 2:* 10/66-12/82

Objectives: To train enlisted personnel in advanced diving, salvage, and rescue operations.

Instruction: *Version 1:* Lectures and practical experience in advanced deep air and mixed gas surface supplied diving, use of hyperbaric chambers, submarine rescue, underwater cutting and welding salvage techniques, administration, supervision and certification of diving systems and a review of diving physics and medicine. *Version 2:* Lectures and practical experience in advanced ship salvage and submarine rescue methods, helium-oxygen techniques, scuba techniques, underwater welding, and a review of diving physics.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 6 semester hours in advanced diving technology (4/83); in the upper-division baccalaureate category, 1 semester hour in diving supervision and administration (4/83). *Version 2:* In the lower-division baccalaureate/associate degree category, 6 semester hours in marine science or oceanography (12/73); in the upper-division baccalaureate category, 3 semester hours in ocean engineering (12/73).

NV-1606-0009

Deep Sea Helium-Oxygen Diving Officer

Course Number: A-4N-0014.

Location: Naval Diving and Salvage Training Center, Panama City, FL; Diving and Salvage School, Washington, DC.

Length: *Version 1:* 9 weeks (368 hours) *Version 2:* 7 weeks (224 hours).

Exhibit Dates: *Version 1:* 1/83-Present. *Version 2:* 12/68-12/82.

Objectives: To train diving officers in the use of helium-oxygen deep diving techniques.

Instruction: *All Versions:* Lectures and practical experience in principles and problems of deep diving and use of helium-oxygen mixtures. *Version 1:* Includes the use of the submarine rescue chamber and an orientation to experimental diving.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in advanced diving technology (4/83); in the upper-division baccalaureate category, 1 semester hour in diving supervision and administration (4/83). *Version 2:* Credit is not recommended because of the limited technical nature of the course (12/73).

NV-1606-0010

Navy Diver Second Class
(EOD Diver Candidates)

Course Number: A-433-0022.

Location: *Version 1:* Naval Diving and Salvage Training Center, Panama City, FL; Naval Amphibious School, Coronado, CA; Harbor Clearance Unit Two, Little Creek, VA; Fleet Training Center-Pacific, Pearl Harbor, HI. *Version 2:* Naval School, Key West, FL; Naval School, Norfolk, VA; Naval School, San Diego, CA; Naval School, Guam, Marianas Island; Naval School, Pearl Harbor, HI; Naval School, Subic Bay, RPI.

Length: *Version 1:* 12 weeks (488 hours). *Version 2:* 7-10 weeks (230-365 hours).

Exhibit Dates: *Version 1:* 6/80-Present. *Version 2:* 1/62-5/80.

Objectives: To train enlisted personnel in the basic aspects of scuba diving and underwater practices.

Instruction: *Version 1:* Lectures and practical exercises in the physics and medical aspects of diving, open circuit SCUBA, surface supplied air, underwater power tools, welding and related practices. *Version 2:* Lectures and practical experience in the physics and medical aspects of diving, swimming and underwater swimming, buoyant ascent training, underwater search and inspection, communications, photography, demolition, use and maintenance of deep sea and lightweight diving equipment, and methods of underwater cutting.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in marine diving technology (4/83); in the lower-division baccalaureate/associate degree category, 3 semester hours in marine diving technology (4/83); in the upper-division baccalaureate category, 1 semester hour in marine diving physiology (4/83). *Version 2:* In the lower-division baccalaureate/associate degree category, 4 semester hours in ocean engineering (1/74).

NV-1606-0011

Scuba Diver

Course Number: A-433-0023.

Location: Naval School, New London, CT; Naval School, Pearl Harbor, HI; Naval Amphibious School, Coronado, CA; Naval School Explosive Ordnance Disposal, Indian Head, MD; Mobile Diving Salvage Unit Two, Little Creek, VA; Naval Diving and Salvage Training Center, Panama City, FL; Naval School, San Diego, CA; Naval School, Key West, FL.

Length: *Version 1:* 5 weeks (200 hours). *Version 2:* 4 weeks (125-145 hours).

Exhibit Dates: *Version 1:* 1/83-Present. *Version 2:* 1/62-12/82.

Objectives: To train enlisted personnel in the basic aspects of scuba diving and underwater operations.

Instruction: *Version 1:* Lectures and practical experiences in the physics and medical aspects of diving, decompression theory, open-circuit theory, maintenance and repair, underwater hull inspection, underwater mechanical work techniques, escape training techniques and diving administration. *Version 2:* Lectures and practical experience in the physics and medical aspects of diving; swimming and underwater swimming; buoyant ascent training; underwater search and inspection; communications; photography; demolition; use, maintenance, and repair of deep sea and lightweight diving equipment; methods of underwater cutting and repair.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in marine technology (4/83); in the lower-division baccalaureate/associate degree category, 2 semester hours in scuba diving (4/83). *Version 2:* In the vocational certificate category, 4 semester hours in marine science technology (1/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in ocean engineering (1/74).

NV-1606-0012

Closed and Semiclosed Scuba

Course Number: None.
Location: Naval School, Key West, FL.
Length: 4 weeks (125 hours).
Exhibit Dates: 1/62–12/68.
Objectives: To train enlisted personnel in all aspects of mixed-gas scuba diving and underwater practices.
Instruction: Lectures and practical experience in mixed-gas scuba diving, diving medicine and physics, equipment use and maintenance, and underwater search and inspection.
Credit Recommendation: In the vocational certificate category, 4 semester hours in marine science technology (1/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in ocean engineering (1/74).

NV-1606-0013

Underwater Photographer/Scuba Diver

Course Number: None.
Location: Naval School, Key West, FL.
Length: 5 weeks (138 hours).
Exhibit Dates: 1/62–12/68.
Objectives: To train enlisted personnel in the basic principles of scuba diving and underwater photography.
Instruction: Lectures and practical experience in the physics and medical aspects of diving; swimming and underwater swimming; buoyant ascent training; underwater search and inspection; communications; demolition; underwater photography, including the use of still and motion picture cameras, processing, and problems.
Credit Recommendation: In the vocational certificate category, 3 semester hours in marine science technology (1/74).

NV-1606-0014

Medical Deep Sea Diving Technician
(Medical Deep Sea Diving Technic)
(Deep Sea Divers)

Course Number: A-433-0020.
Location: Naval Diving and Salvage Training Center, Panama City, FL; Deep Sea Divers School, Washington, DC.
Length: *All Versions:* 21–26 weeks (735–960 hours).
Exhibit Dates: *Version 1:* 1/83–Present. *Version 2:* 6/57–12/82.
Objectives: To train hospital personnel in the physiological effects of diving, and in diving techniques.
Instruction: *Version 1:* Lectures and practical exercises in diving physics and physiology as applied to the treatment of compressed-gas illness, including deep air, mixed gas and salvage surface supported diving. *Version 2:* Lectures and practical experience in diving physics and physiology as applied to the treatment of compressed-gas illness, accident prevention, mixed-gas diving, and the use of decompression and treatment tables.
Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in marine diving technology (4/83); in the lower-division baccalaureate/associate degree category, 3 semester hours in marine diving technology and 4 in advanced diving technology (4/83); in the upper-division baccalaureate category, 1 semester hour in marine diving physiology and 2 in medical diving physiology (4/83). Please Note: This course is comprised of two courses: Navy Diver, 2nd Class (NV-1606-0010) and Medical Technician. We have included the credit recommendation for Navy Diver, 2nd Class in this exhibit. *Version 2:* In the vocational certificate category, 6 semester hours in paramedical programs or ocean engineering (12/73); in the lower-division baccalaureate/associate degree category, 6 semester hours in marine science technology (12/73); in the upper-division baccalaureate category, 4 semester hours in marine sciences (12/73).

NV-1606-0015

Ship Salvage Diving Officer

Course Number: A-4N-0011.
Location: Naval Diving and Salvage Training Center, Panama City, FL; Diving and Salvage School, Washington, DC.
Length: *Version 1:* 18–19 weeks (700 hours). *Version 2:* 14 weeks (445 hours).
Exhibit Dates: *Version 1:* 1/80–1/83. *Version 2:* 11/68–12/79.
Objectives: To train officers in the use of diving equipment and to provide the training to perform salvage diving operations.
Instruction: *All Versions:* Diving with deep-sea, light-weight, and Scuba equipment; diving physiology and first aid; and underwater engineering as applied to salvage operations.
Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in marine diving technology and 2 in marine salvage technology (4/83); in the upper-division baccalaureate category, 2 semester hours in diving supervision and administration and 1 in marine diving physiology (4/83). *Version 2:* In the lower-division baccalaureate/associate degree category, 6 semester hours in ocean engineering (12/73); in the upper-division baccalaureate category, 4 semester hours in ocean engineering (12/73).

NV-1606-0016

Master Diver Evaluation
(Master Diver Qualification)

Course Number: A-433-0019; A-433-019.
Location: Naval Diving and Salvage Training Center, Panama City, FL; Deep Sea Divers School, Washington, DC.
Length: 5 weeks (160 hours).
Exhibit Dates: *Version 1:* 1/83–Present. *Version 2:* 3/69–12/82.
Objectives: To prepare experienced divers to meet the eligibility requirements for the title, Master Diver.
Instruction: *All Versions:* Lectures and practical experience as refresher training in diving equipment, techniques, and safety, with emphasis on supervisory training.
Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in diving technology (4/83); in the upper-division baccalaureate category, 2 semester hours in diving administration and supervision (4/83). *Version 2:* In the vocational certificate category, 4 semester hours in marine sciences (12/73); in the lower-division baccalaureate/associate degree category, 4 semester hours in oceanography (12/73); in the upper-division baccalaureate category, 3 semester hours in marine engineering (12/73).

NV-1606-0017

Medical Department Diving Officers

Course Number: A-6N-0010; A-6A-0010.
Location: Naval Diving and Salvage Training Center, Panama City, FL; Diving and Salvage School, Washington, DC.
Length: 8–9 weeks (256–360 hours).
Exhibit Dates: *Version 1:* 1/83–Present. *Version 2:* 7/69–12/82.
Objectives: To provide medical officers with instruction in diving techniques with the emphasis on the physiological aspects of diving.
Instruction: *All Versions:* Familiarization with deep sea, lightweight, and helium diving; operational use of SCUBA; limited training in underwater mechanics, and diving techniques with emphasis on the physiological aspects of diving.
Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in SCUBA diving (4/83); in the upper-division baccalaureate category, 4 semester hours in hyperbaric physiology (4/83). *Version 2:* Baccalaureate credit is not recommended because course participation is limited to medical doctors (6/75).

NV-1606-0018

Basic Prop Flight Instructor

Course Number: Q-2A-0060.
Location: Naval Air Station, Corpus Christi, TX.
Length: 3 weeks (117 hours).
Exhibit Dates: 7/73–1/88.
Objectives: To train pilots as flight instructors for basic prop aircraft.
Instruction: Lectures and in-flight training in teaching prop-aircraft flight procedures, including the synthetic instrument trainer, instrument simulator, radio instrument simulator, safety procedures, night flight procedures, and aircraft preflight and takeoff procedures.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (2/74).

NV-1606-0019

Flight Instructor Training

Course Number: None.
Location: Naval Aviation Schools Command, Pensacola, FL.
Length: *Version 1:* 2 weeks (71–78 hours). *Version 2:* 3 weeks (90 hours).
Exhibit Dates: *Version 1:* 8/68–10/69. *Version 2:* 8/66–7/68.
Objectives: To train qualified pilots to be instructor pilots.
Instruction: Lectures include the basic principles of education, orientation for the instructor pilot, applied aerodynamics, safety procedures, oral communications, and leadership training.
Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in aerodynamics, 1 in education (2/74). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in aerodynamics, 1 in education (2/74).

NV-1606-0020

Prospective Prop Flight Instructor

(Prospective ME (Prop) Flight Instructor (TS-2A Type Aircraft))
(Prospective Antisubmarine Warfare (ASW) Flight Instructor (S-2 Type Aircraft))

Course Number: Q-2A-0061.
Location: Air Advanced Training Command, Corpus Christi, TX.
Length: 9 weeks (67-94 hours).
Exhibit Dates: 5/63-1/88.
Objectives: To train pilots as flight instructors for prop aircraft.
Instruction: Lectures in flight rules and regulations, instrument navigation, aerodynamics, meteorology, operational navigation, in-flight procedures, takeoff and landing techniques, emergency procedures, aircraft engine familiarization, and military tactics.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (2/74).

NV-1606-0021

Prospective TA-4J Flight Instructor

Course Number: Not available.
Location: Naval Air Station, Corpus Christi, TX.
Length: 10 weeks (73 hours).
Exhibit Dates: 1/70-1/88.
Objectives: To train pilots as flight instructors for the TA-4J aircraft.
Instruction: Flight training, including instrument navigation, operational navigation, and air-to-ground and air-to-air weapons; and lectures and practical exercises in flight rules and regulations, aerodynamics, and engineering.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in training as an instructor pilot (2/74).

NV-1606-0022

RA-5C Aircraft Familiarization (Pilot/RAN)

(RA-5C Aircraft Familiarization)

Course Number: C-2A-3742.
Location: Air Maintenance Training Detachment, Albany, GA; Air Maintenance Training Detachment, Sanford, FL.
Length: 2 weeks (77-84 hours).
Exhibit Dates: 2/67-1/88.
Objectives: To provide pilots and reconnaissance attack navigators with training in the operation of RA-5C aircraft and systems.
Instruction: Lectures and practical exercises in RA-5C aircraft and systems functions and operation, including electrical, hydraulic, power plant, fuel, and flight control systems operation; and air data computer, master flight reference, approach power compensator, survival, and environmental systems functions and operating procedures.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft familiarization (3/74).

NV-1606-0023

Basic Jet Navigation, Class O

Course Number: None.
Location: Air Technical Training Center, Glynco, GA.
Length: 4 weeks (160 hours).
Exhibit Dates: 7/66-12/68.
Objectives: To train naval flight officers in basic jet aircraft navigation.
Instruction: Lectures in jet aircraft navigation theory; aircraft equipment; flight safety and survival; flight planning; dead-reckoning, low-level, and radar navigation; and practical experience in navigation operations.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in navigation (2/74); in the upper-division baccalaureate category, credit in navigation on the basis of institutional evaluation (12/68).

NV-1606-0024

Command Intelligence Officer (CIO)

Course Number: K-3A-5005.
Location: Fleet Intelligence Training Center, Pacific, San Diego, CA.
Length: 2 weeks (68 hours).
Exhibit Dates: 10/73-1/88.
Objectives: To provide basic instruction in the specific functions and responsibilities of the collateral duty command intelligence officer.
Instruction: Instruction includes collection and dissemination of intelligence information and recognition and capabilities of foreign weapon systems. Methods involve classroom lectures and briefings on intelligence aids and techniques and practical exercises on organizing, preparing, and presenting intelligence briefs.
Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (6/75).

NV-1606-0025

TA-4J Advanced Jet

Course Number: None.
Location: Naval Air Station, Corpus Christi, TX.
Length: 20 weeks (115-129 hours).
Exhibit Dates: 2/70-1/88.
Objectives: To qualify student aviators as jet pilots.
Instruction: Flight training and lectures and practical exercises in aerodynamics, engineering, flight regulations, navigation, and meteorology.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in flight experience, 6 in theory of flight (2/74).

NV-1606-0026

SSBN Navigation Officer

Course Number: A-2G-0011.
Location: Guided Missiles School, Dam Neck, VA.
Length: 10 weeks (362 hours).
Exhibit Dates: 11/72-12/80.
Objectives: To train officers to manage the operation of the navigation subsystem of the fleet ballistic missile weapons system.
Instruction: Lectures and practical exercises in the management of the navigational subsystem of the fleet ballistic missile weapons system, including administrative procedures, inertial theory and principles of SINS operation, navigation subsystem equipment operation and calibration procedures, calibration theory, and conventional navigation and piloting.
Credit Recommendation: Insufficient data for evaluation (3/74).

NV-1606-0027

Rawin-Radiosonde Set Operator, Class C

Course Number: C-420-2013.
Location: Air Technical Training Center, Lakehurst, NJ.
Length: 6-7 weeks (240-279 hours).
Exhibit Dates: 4/65-1/88.
Objectives: To train enlisted personnel to operate radiosonde and rawinsonde upper-air equipment.
Instruction: Lectures and practical exercise in radiosonde and rawinsonde upper-air equipment operation, upper-air data evaluation, winds-aloft computation, radiosonde recorders preventive maintenance and calibration procedures, flight preparation and launching of radiosonde equipment, radiosonde transmitter principles, and meteorological data evaluation procedures.
Credit Recommendation: In the upper-division baccalaureate category, credit in weather forecasting techniques on the basis of institutional evaluation (4/74).

NV-1606-0028

Aviation Antisubmarine Warfare (AASW) for First Tour Pilots, P-3C

Course Number: E-2D-070.
Location: Fleet Aviation Specialized Operational Training Group, Pacific, Moffett Field, CA.
Length: 3 weeks (91 hours).
Exhibit Dates: 8/72-1/88.
Objectives: To train pilots in air anti-submarine warfare in P3C (land-based ASW) aircraft.
Instruction: Lectures and practical exercises in air anti-submarine warfare in P3C (land-based ASW) aircraft. Topics include oceanography and underwater acoustics, tactical maneuvering of aircraft engaged in ASW, AASW sensors and related equipment, and electronic warfare concepts.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-1606-0029

Rawin Set Operator, Class C

Course Number: Not available.
Location: Air Technical Training Unit, Lakehurst, NJ.
Length: 5 weeks (200 hours).
Exhibit Dates: 3/55-12/68.
Objectives: To train aerographer's mates and enlisted personnel with radiosonde experience to operate and maintain aerometeorological equipment and to evaluate meteorological data.
Instruction: Lectures and practical exercises in radiosonde data evaluation, rawin set theory and associated equipment operation, preflight ground equipment check, radiosonde assembly launching procedures, and data evaluation.
Credit Recommendation: In the upper-division baccalaureate category, credit in weather forecasting techniques on the basis of institutional evaluation (12/68).

NV-1606-0030

Photographic Intelligenceman (PT)

(Photographic Interpretation/Radar Target Analysis)

Course Number: A-242-0010.
Location: Intelligence School, Washington, DC.
Length: 14-16 weeks (420-480 hours).
Exhibit Dates: 8/57-12/68.
Objectives: To train enlisted personnel in air intelligence, photographic interpretation, and radar target analysis.
Instruction: Lectures and practical exercises in photography and photographic interpretation, charts, metrics, target analysis,

radar and radar target analysis, and operational and intelligence planning.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in photographic interpretation (5/74); in the upper-division baccalaureate category, 4 semester hours in photographic interpretation (5/74).

NV-1606-0031

Advanced Navigation Training (Student Naval Flight Officer)

Course Number: Q-2D-0023.

Location: Aviation Training Center, Pensacola, FL.

Length: 9 weeks (311 hours).

Exhibit Dates: 3/73-1/88.

Objectives: To train personnel in advanced navigation.

Instruction: Lectures and practical exercises in advanced navigation, including emergency, day-flight, night-flight, patrol-flight and extended-flight procedures; briefs, debriefs, and flight planning; celestial navigation; advanced navigation techniques; synthetic navigation training; and electronic navigation systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in navigation (6/74).

NV-1606-0032

Advanced Navigation Training (Postgraduate Naval Aviator)

Course Number: None.

Location: Aviation Training Center, Pensacola, FL.

Length: 6 weeks (178 hours).

Exhibit Dates: 3/73-1/88.

Objectives: To train personnel in advanced navigation.

Instruction: Lectures and practical exercises in advanced navigation, including emergency, day-flight, night-flight, patrol-flight and extended-flight procedures; briefs; debriefs; flight planning; celestial navigation; advanced navigation techniques; synthetic navigation training; and electronic navigation systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in navigation (6/74).

NV-1606-0033

Advanced Navigation Training (Postgraduate Coast Guard Aviator)

Course Number: None.

Location: Aviation Training Center, Pensacola, FL.

Length: 8 weeks (261 hours).

Exhibit Dates: 3/73-1/88.

Objectives: To train personnel in advanced navigation.

Instruction: Lectures and practical exercises in advanced navigation, including emergency, day-flight, patrol-flight, and extended-flight procedures; briefs, debriefs, and flight planning; celestial navigation; advanced navigation techniques; synthetic navigation training; and electronic navigation systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in navigation (6/74).

NV-1606-0034

Pilots C-121 Simulator and Advanced Flight

Course Number: D-2B-012.

Location: Oceanographic Air Survey Unit, Patuxent River, MD.

Length: 6 weeks (180 hours).

Exhibit Dates: 12/66-12/68.

Objectives: To train prospective C-121 pilots and plane commanders in ground and flight techniques.

Instruction: Lectures and practical exercises in C-121 ground and flight techniques, including use of the operational flight simulator and normal and emergency flight procedures and instruments.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (12/68).

NV-1606-0035

Pilots C-121 Simulator and Basic Flight

Course Number: D-2B-013.

Location: Oceanographic Air Survey Unit, Patuxent River, MD.

Length: 3 weeks (90 hours).

Exhibit Dates: 12/66-12/68.

Objectives: To train prospective C-121 pilots in basic C-121 ground and flight procedures.

Instruction: Lectures and practical exercises in basic C-121 ground and flight procedures, including use of the C-121 operational flight simulator, ground handling characteristics, and normal and emergency flight procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (12/68).

NV-1606-0036

Fleet Replacement Radar Navigator (Bombardier Navigator)

Course Number: Not available.

Location: Naval Air Station, Whidbey Island, WA.

Length: 16-20 weeks (552-698 hours).

Exhibit Dates: 1/63-1/88.

Objectives: To train commissioned officers as fleet replacement radar navigators.

Instruction: Lectures and practical exercises in the duties of fleet replacement radar navigators. Course includes radar navigation, communications, navigation equipment, celestial navigation, sextant usage, flight patterns, and electronic warfare.

Credit Recommendation: In the vocational certificate category, 8 semester hours in navigation (7/74); in the upper-division baccalaureate category, 5 semester hours in navigation (12/68).

NV-1606-0037

Prospective Phase I CV (Jet) (TF/AF-9J) Tactical Flight Instructor

Course Number: Not available.

Location: Air Advanced Training Command, Corpus Christi, TX.

Length: 10 weeks (129 hours).

Exhibit Dates: 8/63-12/68.

Objectives: To train pilots as tactical flight instructors in TF/AF-9J aircraft.

Instruction: Lectures and practical exercises in the duties of a tactical flight instructor. Course includes instruments, navigation, formation, night operations, weapons, and carrier qualifications.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/74).

NV-1606-0038

Prospective Advanced Navigation Flight Instructor

Course Number: Q-2D-0064.

Location: Air Advanced Training Command, Corpus Christi, TX.

Length: 11-16 weeks (95-151 hours).

Exhibit Dates: 9/63-12/68.

Objectives: To train naval aviators and observers as flight instructors.

Instruction: Lectures and practical exercises in flight instructor training, including navigation training, instruments familiarization, flight training, flight rules and regulations, meteorology, engineering, and synthetic instrument training.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/74).

NV-1606-0039

Prospective TF/TAF-9J Flight Instructor

Course Number: Not available.

Location: Naval Air Station, Corpus Christi, TX.

Length: 10 weeks (167-190 hours).

Exhibit Dates: 5/69-1/88.

Objectives: To train flight instructors in TF/TAF-9J aircraft.

Instruction: Lectures and practical exercises in TF/TAF-9J aircraft, including basic instruments, instrument navigation, formation, night flight, operational navigation, air-to-ground weapons, tactics, and carrier qualification.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/74).

NV-1606-0040

Prospective VA (Prop) Tactical Flight Instructor

Course Number: Not available.

Location: Air Advanced Training Command, Corpus Christi, TX.

Length: 12 weeks (267 hours).

Exhibit Dates: 1/65-12/68.

Objectives: To train flight instructors in VA (Prop) tactical flight training.

Instruction: Lectures and practical exercises in VA (Prop) flight training, including formation, tactics, weapons, and navigation on the T-28 and A-1H aircraft.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/74).

NV-1606-0041

Prospective Phase II CV (Jet) (F11A) Tactical Flight Instructor

Course Number: Not available.

Location: Air Advanced Training Command, Corpus Christi, TX.

Length: 10 weeks (72 hours).

Exhibit Dates: 12/63-12/68.

Objectives: To train flight instructors in F9J/F11A jet aircraft.

Instruction: Lectures and practical exercises in flight procedures for F9J/F11A aircraft, including formation, tactics, air-to-air weapons, ground-controlled intercept procedures, night flying, instrumentation, and high-altitude navigation.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/74).

NV-1606-0042

Flight Instructor Indoctrination
Group

Course Number: Not available.

Location: Air Basic Training Command, Pensacola, FL.

Length: 3 weeks (91 hours).

Exhibit Dates: 7/64–12/68.

Objectives: To train aviators as flight instructors.

Instruction: Lectures and practical exercises in flight instruction procedures, including instructional methods, learning principles, testing methods and score interpretation, flight psychology, counseling, oral communications; and applied aerodynamics (basic physics, various theories and equations, spins and stalls, helicopter flight, jet engine theory and components, reciprocating engines, various curves, take-off and landing problems, stability, and control systems).

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in instructional methods (12/68).

NV-1606-0043

P-3C Tactical Coordinator Positional
Training for Naval Flight
Officers

Course Number: E-2D-0075.

Location: Fleet Aviation Specialized Operational Training Group, Pacific, Moffett Field, CA.

Length: 2 weeks (70 hours).

Exhibit Dates: 10/72–1/88.

Objectives: To provide P3C flight officers with tactical training in antisubmarine warfare.

Instruction: Lectures and practical exercises on P3C aircraft tactical coordinator positional training, including armament/ordnance hardware; flight station review, TACCO station hardware and software; TACCO station familiarization, recovery, tactical navigation, steering/splash points, audio control, sensor processing, initialization, and multipurpose display; switch functions; specific laboratory; and practice trainer brief and debrief.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/74).

NV-1606-0044

1. Naval Flight Officer Training
   (Flight, Academic, Flight
   Support)
2. Naval Flight Officer Training
   (Flight, Academic, Flight
   Support)
3. Basic Naval Aviation Officer
4. Basic Naval Aviation Officer
5. Aviation Limited Duty Officer
   (LDO) Indoctrination

Course Number: *All Versions:* Not available.

Location: Air Station, Pensacola, FL.

Length: *Version 1:* 18–20 weeks (587–619 hours). *Version 2:* 16 weeks (640 hours). *Version 3:* 16 weeks (640 hours). *Version 4:* 8 weeks (195–236 hours). *Version 5:* 8 weeks (320 hours).

Exhibit Dates: *Version 1:* 7/72–1/88. *Version 2:* 9/67–6/72. *Version 3:* 7/64–8/67. *Version 4:* 6/61–6/64. *Version 5:* 1/61–5/61.

Objectives: To provide personnel with naval flight training.

Instruction: *All Versions:* Lectures and practical exercises in naval flight training, including aircraft orientation, electronic systems, navigation, and fleet orientation. *Version 1:* Topics include avionics, navigation, operations, ground simulation, programmed instruction, flight, and NATOPS and safety. *Version 2:* Topics include technical fundamentals branch, electricity, electronics, radar fundamentals, computer systems, electronic warfare, advanced systems, navigation branch, flight preparation navigation, airways navigation, dead-reckoning navigation, training device problems, fleet air operations, and air intelligence and recognition. *Version 3:* Topics include electricity and electronics, radar fundamentals, computer systems, aircraft communications, air intelligence and recognition, advanced systems and ASW devices, navigation procedures, meteorology, and flight support. *Version 4:* Topics include navigation, communications, special weapons recognition, fleet operations, air intelligence, and aviation electronics familiarization. *Version 5:* Topics include finance, fleet and tactical organization, personnel administration and organization, and aviation organization.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in navigation on the basis of institutional evaluation (7/74). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in navigation on the basis of institutional evaluation (7/74); in the upper-division baccalaureate category, 4 semester hours in navigation (12/68). *Version 3:* In the lower-division baccalaureate/associate degree category, 2 semester hours in electronics on the basis of institutional evaluation (7/74); in the upper-division baccalaureate category, 3 semester hours in navigation, 1 in communications (12/68). *Version 4:* In the upper-division baccalaureate category, 1 semester hour in navigation, 1 in communications (12/68). *Version 5:* In the upper-division baccalaureate category, 3 semester hours in naval science (12/68).

NV-1606-0045

Navigation Flight Training, Naval
Aviator and Naval Flight
Officer
(Navigation Flight Training, Pilot and
Naval Aviation Officer (Navigator))

Course Number: None.

Location: Air Advanced Training Command, Corpus Christi, TX.

Length: 3–4 weeks (55–80 hours).

Exhibit Dates: 5/63–1/88.

Objectives: To train pilots and flight officers to perform the duties of aerial navigators.

Instruction: Lectures and practical exercises in the duties of an aerial navigator. Course includes radio navigation, celestial navigation, dead reckoning, plotting, antisubmarine warfare navigation, radar navigation, and flight planning.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in navigation (8/74).

NV-1606-0046

1. Flight Preparation, Naval
   Aviation Cadet and Aviation
   Officer Candidate
   (Pre-flight, Naval Aviation Cadets and
   Aviation Officer Candidates)
2. Pre-flight, Naval Aviation Cadets
   and Aviation Officer Candidates

Course Number: *All Versions:* None.

Location: Air Basic Training Command, Pensacola, FL.

Length: 14–16 weeks (543–582 hours).

Exhibit Dates: *Version 1:* 1/63–1/68. *Version 2:* 1/56–12/62.

Objectives: To train enlisted personnel in aviation and aircraft fundamentals.

Instruction: *All Versions:* Lectures and practical exercises in aviation and aircraft fundamentals, including mathematics, physics, night vision, elementary physiology, human behavior fundamentals, leadership training, naval history, military justice, physical fitness, survival training, and principles of flight. *Version 2:* Instruction includes navigation, air intelligence, and personnel administration.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in navigation, 1 in aeronautics (8/74). *Version 2:* In the lower-division baccalaureate/associate degree category, 1 semester hour in navigation (8/74).

NV-1606-0047

1. Flight Systems
   (Flight Preparation, Officer)
   (Pre-flight, Officer)
2. Pre-flight, Officer

Course Number: *All Versions:* None.

Location: Air Basic Training Command, Pensacola, FL.

Length: 4–10 weeks (130–375 hours).

Exhibit Dates: *Version 1:* 1/63–1/88. *Version 2:* 1/56–12/62.

Objectives: To train personnel in aviation and aircraft fundamentals.

Instruction: *All Versions:* Lectures and practical exercises in aviation and aircraft fundamentals, including mathematics, physics, night vision, elementary physiology, human behavior fundamentals, leadership training, naval history, military justice, physical fitness, survival training, and principles of flight. *Version 2:* Instruction includes navigation, air intelligence, and personnel administration.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in navigation, 1 in aeronautics (8/74). *Version 2:* In the lower-division baccalaureate/associate degree category, 1 semester hour in navigation (8/74).

NV-1606-0048

Primary Phase, Basic Pilot Training

Course Number: None.

Location: Air Basic Training Command, Pensacola, FL.

Length: 8–9 weeks (42–56 hours).

Exhibit Dates: 1/60–1/88.

Objectives: To train basic aviators to fly T-34 aircraft.

Instruction: Lectures and practical exercises in T-34 aircraft flight training, including basic pilot training, maneuvers, flight rules, aerobatics, stalls, spins, and emergency procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in aeronautics (8/74).

NV-1606-0049

Basic Phase, Pilot Training

Course Number: None.

Location: Air Basic Training Command, Pensacola, FL.

Length: 23–32 weeks (232–794 hours).

Exhibit Dates: *Version 1:* 1/60–1/88. *Version 2:* 1/54–12/59.

Objectives: To train personnel who have completed primary pilot training to fly high-performance aircraft.

Instruction: Lectures and practical exercises in high-performance aircraft flight training, including flight maneuvers, basic instrument flight, radio navigation, formation flight, aerodynamics, communications, aircraft systems, flight rules, meteorology, navigation, and weapons system.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in aeronautics, 2 in navigation, 1 in communications, 1 in aeroengineering (8/74). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in aeronautics, 2 in navigation, 1 in communications, 1 in aeroengineering (8/74).

NV-1606-0050

Advanced Phase, Pilot Training

Course Number: None.

Location: Air Advanced Training Command, Corpus Christi, TX.

Length: 10-23 weeks (223-953 hours).

Exhibit Dates: 1/54-1/88.

Objectives: To train pilots to be fully qualified fleet pilots.

Instruction: Lectures and practical exercises in engineering, flight tactics, advanced navigation, weapons and warfare, instrument flight, aerodynamics, meteorology, and combat operations.

Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in aeronautics, 1 in navigation, 1 in aeroengineering (8/74).

NV-1606-0051

Aviation Fleet Preparatory Course I and II, Class P

Course Number: Not available.

Location: Air Technical Training Center, Memphis, TN.

Length: 4-6 weeks (193-240 hours).

Exhibit Dates: 8/70-1/88.

Objectives: To provide enlisted personnel with training in fleet aviation operations.

Instruction: Lectures and practical exercises in aviation operations, including organization and familiarization; aircraft squadrons; aircraft carriers; air department division; survival and emergency equipment; personnel and aircraft survival; fire fighting and crash rescue; handtools and hardware; aviation maintenance procedures; aircraft familiarization; basic aircraft systems; aircraft handling; and aircraft maintenance.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/74).

NV-1606-0052

Radiosonde Set Operator, Class C

Course Number: Not available.

Location: Air Technical Training Unit, Lakehurst, NJ.

Length: 3 weeks (120 hours).

Exhibit Dates: 7/56-12/68.

Objectives: To train aerographer's mates and enlisted personnel to operate and maintain balloon-carried radiosonde transmitters and to interpret meteorological data.

Instruction: Lectures in radiosonde ground equipment components operation, alignment, and calibration procedures; flight equipment principles of operation, maintenance, alignment, and calibration; aerological data evaluation; and in-flight, release, and data-forwarding procedures.

Credit Recommendation: In the upper-division baccalaureate category, credit in weather forecasting techniques on the basis of institutional evaluation (12/68).

NV-1606-0053

E-1B Aircraft Pilot Training

Course Number: D-2B-0016.

Location: Carrier Airborne Early Warning Training Squadron 120, Norfolk, VA.

Length: 16 weeks (160 hours).

Exhibit Dates: 2/74-1/88.

Objectives: To train aviators to pilot the E-1B aircraft.

Instruction: Lectures and flight exercises in formation flying, instrument familiarization, and carrier operations.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (6/75).

NV-1606-0054

E-2B Aircraft Pilot Training

Course Number: D-2B-0015.

Location: Carrier Airborne Early Warning Training Squadron 120, Norfolk, VA.

Length: 16 weeks (425 hours).

Exhibit Dates: 2/74-1/88.

Objectives: To train aviators to pilot the E-2B aircraft.

Instruction: Lectures and flight exercises in formation flying, instrument familiarization, and carrier operations.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (6/75).

NV-1606-0055

Reserve Air Intelligence (RAI)

Course Number: J-3A-0955; K-3A-5011; K-3A-527.

Location: Fleet Intelligence Training Center, Pacific, San Diego, CA.

Length: 2 weeks (100 hours).

Exhibit Dates: 7/71-1/88.

Objectives: To provide reserve officers with training in the fundamentals of air intelligence.

Instruction: Specialized training and practical exercises in the air intelligence environment; identification of foreign weapon systems; methods of collecting and reporting intelligence data; and related topics such as electronic warfare, aerial maps, etc.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/75).

NV-1606-0056

Reserve Basic Intelligence Training Subjects (BITCS)

Course Number: K-3A-5010; K-3A-526.

Location: Fleet Intelligence Training Center, Pacific, San Diego, CA.

Length: 2 weeks (68 hours).

Exhibit Dates: 7/71-1/88.

Objectives: To provide entry-level training to commissioned or reserve officers in the area of intelligence.

Instruction: Instruction includes discussions on the intelligence environment; intelligence methods; photographic intelligence, including imagery interpretation; and other related topics such as security, naval messages, operation plans and orders, and electronics countermeasures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in intelligence or public security (6/75).

NV-1606-0057

S-3A Copilot Avionics

Course Number: E-2A-1718; E-2A-0018.

Location: Fleet Aviation Specialized Operational Training Group, North Island, CA.

Length: 6 weeks (187 hours).

Exhibit Dates: 5/74-1/88.

Objectives: To prepare copilots for S-3A mission training in the replacement squadron (VS-41).

Instruction: Lectures and practical exercises in navigation systems, communications, and electronic surveillance measures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (6/75).

NV-1606-0058

Aviation Fleet Preparatory Course I and II

Course Number: Not available.

Location: Air Technical Training Center, Memphis, TN.

Length: 4-6 weeks (193-240 hours).

Exhibit Dates: 8/70-1/88.

Objectives: To provide enlisted personnel with training in fleet aviation operations.

Instruction: Lectures and practical exercises in aviation operations, including organization and familiarization; aircraft squadrons; aircraft carriers; air department divisions; survival and emergency equipment; personnel and aircraft survival; fire fighting and crash rescue; handtools and hardware; aviation maintenance procedures; aircraft familiarization; basic aircraft systems; aircraft handling; and aircraft maintenance.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/74).

NV-1606-0059

Amphibious Staff Intelligence Officer (ASIO)

Course Number: K-3A-5006.

Location: Fleet Intelligence Training Center, Pacific, San Diego, CA.

Length: 2 weeks (68 hours).

Exhibit Dates: 1/73-1/88.

Objectives: To provide training in amphibious operations and amphibious staff intelligence functions.

Instruction: Topics include amphibious orientation, with emphasis on an overall view of composition and organization; intelligence planning and characteristics of the area of amphibious operations.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (6/75).

NV-1606-0060

Operations Specialist, Class A1

Course Number: A-221-0011.

Location: Fleet Combat Training Center, Dam Neck, VA; Service School Command, Great Lakes, IL.

Length: 12-17 weeks (480 hours).

Exhibit Dates: 11/72-Present.

Objectives: To train personnel to perform duties required in a combat information center.

Instruction: Lectures and practical exercises in procedures used in message communications, radar navigation, radar course plotting, and vector plotting in the operation of radar systems and data interpretation.

Credit Recommendation: In the vocational certificate category, 2 semester hours in navigation practices and 1 in navigation laboratory (9/84).

NV-1606-0061

Airborne Systems

Course Number: None.
Location: Test Pilot School, Patuxent River, MD.
Length: 48 weeks (442-476 hours).
Exhibit Dates: 1/75-Present.
Objectives: To train experienced pilots, Naval Flight Officers, and engineers to become qualified engineering test pilots, test flight officers, and test project engineers.
Instruction: Classroom lectures, assignments, examinations, airborne demonstrations, and flight projects including aircraft performance, aerodynamics, propulsion, stability and control, flight testing, and airborne systems. Prerequisites include college physics or mechanics and mathematics through algebra and differential calculus.
Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in aircraft performance, 2 in introductory aerodynamics, 3 in jet propulsion, 3 in stability and control, 3 in flight testing, and 3 in airborne systems, for a total of 16 hours (7/79).

NV-1606-0062

Fixed Wing Flight Mechanics

Course Number: None.
Location: Test Pilot School, Patuxent River, MD.
Length: 48 weeks (429-434 hours).
Exhibit Dates: 1/73-Present.
Objectives: To train experienced aviators and engineers to become qualified engineering test pilots and test project engineers.
Instruction: Classroom lectures, assignments, examinations, airborne demonstrations, and test flying assignments including performance, aerodynamics, propulsion, stability and control, flight testing and airborne systems. Prerequisites include college physics or mechanics and mathematics through algebra and differential calculus.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in aircraft performance, 2 in introductory aerodynamics, 3 in jet propulsion, 3 in stability and control, and 4 in flight testing, for a total of 15 hours (7/79).

NV-1606-0063

Rotary Wing Flight Mechanics

Course Number: None.
Location: Test Pilot School, Patuxent River, MD.
Length: 48 weeks (439-445 hours).
Exhibit Dates: 1/73-Present.
Objectives: To train experienced aviators and engineers to become qualified engineering test pilots and test project engineers.
Instruction: Classroom lectures, assignments, examinations, airborne demonstrations, and test flying assignments, including aircraft performance, aerodynamics, propulsion, stability and control, flight testing, and airborne systems. Prerequisites include college physics or mechanics and mathematics through algebra and differential calculus.
Credit Recommendation: In the upper-division baccalaureate category, 4 semester hours in aircraft performance, 1 in introductory aerodynamics, 3 in jet propulsion, 3 in stability and control, and 4 in flight testing, for a total of 15 hours (7/79).

NV-1606-0064

Basic Diving Officer

Course Number: A-4N-0024.
Location: Naval Diving and Salvage Training Center, Panama City, FL.
Length: 13 weeks (488 hours).
Exhibit Dates: 1/83-Present.
Objectives: To train officer personnel to manage and perform operational diving duties requiring SCUBA or surface-supplied diving equipment.
Instruction: Lectures and practical exercises in operational diving knowledge including diving physics and medicine, advanced hyperbaric medicine, inspection and maintenance of open-circuit SCUBA equipment, dive planning, use of underwater power tools, Mk 12 diving equipment, underwater work techniques, underwater cutting and welding, salvage/diving administration and salvage demolition procedures.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in marine diving technology (4/83); in the upper-division baccalaureate category, 1 semester hour in diving supervision and administration and 1 in marine diving physiology (4/83).

NV-1606-0065

Ship Salvage Diving Officer

Course Number: A-4N-0026.
Location: Naval Diving and Salvage Training Center, Panama City, FL.
Length: 6 weeks (240 hours).
Exhibit Dates: 1/83-Present.
Objectives: To provide officers with the training necessary to perform salvage diving operations and the associated administrative procedures.
Instruction: Lectures and practical exercises in engineering calculations such as stability studies and buoyancy computations, and applications of underwater engineering as applied to salvage diving operations.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in marine salvage technology (4/83); in the upper-division baccalaureate category, 1 semester hour in diving supervision and administration (4/83).

NV-1606-0066

VQ/VAQ/VMAQ Pilot and EA-3B Navigator Electronic Warfare (EW) Officer

Course Number: C-2D-3815.
Location: Naval Technical Training Center, Corry Station, Pensacola, FL.
Length: 5 weeks (200 hours).
Exhibit Dates: 1/83-Present.
Objectives: To provide the student with the basic skills and background knowledge required to begin operational training for mission commander or navigator.
Learning Outcomes: Upon completion of the course, the student will be able to: (1) create an area order of battle from appropriate publications and message traffic (2) determine threat envelopes from reported signal activity by associating signal to system to threat to weapon range and altitude data (3) relay an assessment of the environment in accordance with the communication plan (4) adjust missing plan for the actual environment to accomplish the basic ESM and ECM objectives.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/87).

NV-1606-0067

Strike Warfare Operational Intelligence (OPINTEL) Analyst

Course Number: D-150-0015; J-150-0962.
Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA. Naval Air Station, Norfolk, VA; Naval Intelligence Processing System Training Facility, Key West, FL.
Length: 5 weeks (200 hrs).
Exhibit Dates: 10/84-Present.
Objectives: To provide the student with a comprehensive understanding of the capabilities and use of Naval intelligence processing aboard ships.
Instruction: Qualifies students to operate and utilize a variety of computerized assisted intelligence equipment, to evaluate and disseminate information, and to utilize and maintain intelligence resources.
Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (1/86).

NV-1606-0068

Senior Afloat Intelligence Officer

Course Number: D-3A-0113; J-3A-0956.
Location: Naval Air Station, Norfolk, VA; Naval Intelligence Processing System Training Facility, Key West, FL.
Length: 2 weeks (76 hours).
Exhibit Dates: 7/84-1/87.
Objectives: To acquaint officers with the role of the naval intelligence processing system intelligence center, and the equipment and personnel required to complete all tasks.
Instruction: Introduces and reviews electronic data processing, photo interpretation equipment, products, and procedures, photographic processing and equipment, electronic and photographic maintenance, supply and logistics functions.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (1/86).

NV-1606-0069

Junior Afloat Intelligence Officer

Course Number: D-3A-0110; J-3A-0961.
Location: Naval Air Station, Norfolk, VA; Naval Intelligence Processing System Training Facility, Key West, FL.
Length: 5 weeks (175 hours).
Exhibit Dates: 7/84-1/87.
Objectives: Provides officers with a comprehensive understanding of the Naval Intelligence Processing System, (NIPS) with emphasis on tactical reconnaissance and the function and operation of computer storage and retrieval.
Instruction: Topics include management of various aspects of intelligence gathering, storage, and retrevial using computers, and methods and procedures to share this information with other data bases, products, and individuals.
Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (1/86).

NV-1606-0070

Landing Helo Auxiliary (LHA)/CVN Afloat Intelligence Specialist

(Landing Helo Auxiliary (LHA) Afloat Intelligence Specialist)

Course Number: D-243-0120; J-243-0968.
Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA; Naval Air Station, Norfolk, VA; Naval In-

telligence Processing System Training Facility, Key West, FL.

Length: 5-7 weeks (184-280 hours).

Exhibit Dates: 6/83-Present.

Objectives: To provide the student with a comprehensive understanding of the capabilities of the naval intelligence processing system aboard small ships.

Instruction: Topics include basic instruction necessary to operate and utilize a variety of electronic and computer assisted intelligence resources.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications (1/86).

NV-1606-0071

AIR NAVIGATION BY CORRESPONDENCE

Course Number: NAV AIR 00-80V-49; AFM-51-40.

Location: Development Center, Pensacola, FL.

Length: Maximum 40 weeks.

Exhibit Dates: 3/83-Present.

Objectives: To provide personnel with a working knowledge and skills needed to navigate in the air worldwide and within the air space of the United States.

Instruction: Course provides instruction in maps and charts, dead reckoning, lines of position, fixes, navaids, radar, time, altitude and true azimuth computation, star identification, plotting, sextants and errors of observation, grid navigation, overwater aids, low level, celestial advanced navigation and systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in air navigation (11/86).

NV-1606-0072

BASIC SHIPBOARD INTELLIGENCE

Course Number: J-243-0981.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 7/86-Present.

Learning Outcomes: Upon completion of the course, the student will be able to fulfill needs in basic planning, collecting, processing, and disseminating intelligence data under limited supervision.

Instruction: This is a fundamental lecture survey course on basic intelligence, designed for officers and enlisted personnel.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (12/87).

NV-1606-0073

INTELLIGENCE SPECIALIST CLASS A OPERATIONAL INTELLIGENCE

Course Number: J-242-0994.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA.

Length: 5 weeks (191 hours).

Exhibit Dates: 9/86-Present.

Learning Outcomes: Upon completion of the course the student will be able to assist naval intelligence officer in operational assignments ashore and afloat.

Instruction: Fundamental intelligence training through lecture and practical exercises covering: organizing, processing, safeguarding information; image interpretation; remote sensing; report writing; naval warfare; administration; correspondence preparation; and briefing fundamentals and research.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications (12/87).

NV-1606-0074

IMAGERY INTERPRETATION (IIC)

Course Number: J-3A-0954.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 4/88-Present.

Learning Outcomes: Upon completion of the course, the student will be able to understand the fundamentals of basic imagery intelligence, reconnaissance systems, mission planning, and interpretation of resulting imagery.

Instruction: Lectures and extensive student practical exercises in the following areas: Aerial imagery; mensuration; imagery interpretation and plotting; map reading; report writing; and physical security of imagery interpretation.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (7/88).

NV-1606-0075

INTELLIGENCE SPECIALIST A - RESERVE (ISA-RES)

Course Number: J-242-0030.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 4/88-Present.

Learning Outcomes: Upon completion of the course, the student will be able to understand the fundamentals of basic imagery intelligence, reconnaissance systems, mission planning, and interpretation of the resulting imagery.

Instruction: Instruction is offered through lectures and extensive student practical exercises. Topics include aerial imagery, mensuration, imagery interpretation and plotting, map reading, report writing, and physical security of imagery interpretation.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/88).

NV-1701-0001

P-3 AIR CONDITIONING, PRESSURIZATION AND UTILITIES SYSTEMS ORGANIZATIONAL MAINTENANCE

Course Number: C-603-3532.

Location: *All Versions:* Air Maintenance Training Detachment, Moffett Field, CA. *Version 1:* Air Maintenance Training Detachment, Jacksonville, FL. *Version 2:* Air Maintenance Training Detachment, Patuxent River, MD.

Length: 2 weeks (64-80 hours).

Exhibit Dates: *Version 1:* 10/80-Present. *Version 2:* 9/70-9/80.

Objectives: To train enlisted personnel to service and maintain aircraft air-conditioning, pressurization, and utility systems.

Instruction: Lectures and practical exercises in the maintenance of aircraft air-conditioning, pressurization, and utility systems. Topics include aircraft air conditioning with high-pressure air and components and ground air conditioning and ventilation.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in aircraft air conditioning (7/81). *Version 2:* In the vocational certificate category, 2 semester hours in aircraft air conditioning (6/74).

NV-1701-0002

LITHIUM BROMIDE AIR CONDITIONING PLANT OPERATOR

(Lithium Bromide Air Conditioning)

Course Number: A-720-0028; F-652-041.

Location: *Version 1:* Submarine Training Center, Pacific, Pearl Harbor, HI; Fleet Ballistic Submarine Training Center, Charleston, SC; Submarine Training School, Groton, CT. *Version 2:* Fleet Ballistic Missile Submarine Training Center, Charleston, SC; Submarine School, Groton, CT.

Length: 1-2 weeks (24-60 hours).

Exhibit Dates: *Version 1:* 11/85-Present. *Version 2:* 11/72-10/85.

Objectives: To train enlisted personnel to perform basic maintenance procedures on a lithium bromide air-conditioning unit.

Instruction: Lectures and practical exercises in the operation and maintenance of lithium bromide absorption systems. Course includes a study of the construction and operation of components, leak testing, purge system operation, and preventive maintenance.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in air conditioning theory and operation (lithium bromide) (11/85). *Version 2:* In the vocational certificate category, 1 semester hour in operation and maintenance of a lithium bromide air-conditioning unit (5/74).

NV-1701-0003

E-2B AND C-2A ENVIRONMENTAL SYSTEMS ORGANIZATIONAL MAINTENANCE

(E-2A Environmental Systems Organizational Maintenance)

Course Number: C-602-3472.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 2 weeks (60-75 hours).

Exhibit Dates: 1/69-1/88.

Objectives: To train enlisted personnel to operate and maintain aircraft air-conditioning systems.

Instruction: Lectures and practical exercises in the maintenance of aircraft environmental systems.

Credit Recommendation: In the vocational certificate category, 1 semester hour in aircraft air conditioning (5/74).

NV-1701-0004

R-11 CENTRIFUGAL 110 TON AIR CONDITIONING COMBINED MAINTENANCE

(110 Ton R11 Centrifugal Air Conditioning Unit (York))

Course Number: A-652-0111; F-652-032.

Location: Submarine School, Groton, New London, CT; Fleet Ballistic Missile Submarine Training Center, Charleston, SC; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2 weeks (60 hours).

Exhibit Dates: 4/72-Present.

Objectives: To train enlisted personnel to operate and perform mechanical maintenance on a centrifugal refrigeration system.

Instruction: Lectures and practical exercises in the maintenance of a centrifugal refrigeration system. Topics include centrifugal compressor and capacity control mechanism construction and operation, and the maintenance procedures involved in the use of the air-purging system.

Credit Recommendation: In the vocational certificate category, 2 semester hours in mechanical maintenance of a centrifugal refrigeration unit (6/81).

NV-1701-0005

Air Conditioning and Refrigeration Operation and Maintenance
(Air Conditioning and Refrigeration, Class C)
(Air Conditioning and Refrigeration, Class C-1)

Course Number: A-720-010; A-720-011.

Location: Service School Command, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: *Version 1:* 7-8 weeks (280-300 hours). *Version 2:* 8 weeks (240-247 hours).

Exhibit Dates: *Version 1:* 8/76-Present. *Version 2:* 7/58-7/76.

Objectives: To train enlisted personnel to operate, test, maintain, and repair air-conditioning and refrigeration equipment and systems.

Instruction: *All Versions:* Lectures and practical exercises in the operation, testing, maintenance, and repair of air-conditioning and refrigeration equipment and systems, including refrigeration unit components, accessories, and controls; refrigeration fundamentals; electrical systems in refrigeration; compressors and condensers; air-cooled equipment; water coolers; ice makers; refrigeration and air-conditioning plant operations; ventilation and air purification. *Version 1:* Includes basic thermodynamic nomenclature. *Version 2:* Includes basic mathematics, psychrometrics and their application.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in basic refrigeration and air conditioning and 2 in refrigeration and air conditioning laboratory (3/89). *Version 2:* In the vocational certificate category, 20 semester hours in basic refrigeration (6/74); in the lower-division baccalaureate/associate degree category, 8 semester hours in basic refrigeration (6/74).

NV-1701-0006

Centrifugal Air Conditioning Plant Operation and Maintenance, Class C1
(Centrifugal Air Conditioning Plant Operation and Maintenance)

Course Number: A-720-0025.

Location: Service School Command, San Diego, CA; Development and Training Center, San Diego, CA.

Length: 2 weeks (60-80 hours).

Exhibit Dates: *Version 1:* 1/80-12/87. *Version 2:* 9/73-12/79.

Objectives: To train personnel to operate and maintain centrifugal refrigeration and air conditioning equipment.

Instruction: For this course after 12/87 see NV-1701-0006. Classroom and practical instruction in the operational characteristics and procedures for centrifugal refrigeration systems, including operation, adjustment, control, and service/repair of centrifugal units and accessory centrifugal equipment.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in centrifugal refrigeration plant operation and maintenance (5/82). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in plant operation and maintenance (6/75).

NV-1701-0007

Lithium Bromide Plant Maintenance

Course Number: A-652-0224.

Location: Fleet Ballistic Missile Center, Charleston, SC; Naval Submarine Training Center, Pearl Harbor, HI; Naval Submarine School, Groton, CT; Naval Submarine School, New London, CT.

Length: 2 weeks (78 hours).

Exhibit Dates: 11/80-6/86.

Objectives: To train enlisted personnel to operate, test and maintain lithium bromide air conditioning units.

Instruction: For this course after 6/86 see NV-1730-0010. Lectures and practical exercises in the operation, performance testing, and maintenance of lithium bromide air conditioning systems including the study of system components, component interfaces, operating criteria, leak testing, purge system operation and preventive maintenance.

Credit Recommendation: In the vocational certificate category, 2 semester hours in operation and maintenance of air conditioning units (6/81).

NV-1701-0008

Aviation Support Equipment Mobile Air Conditioning Intermediate Maintenance

Course Number: C-602-3241.

Location: Naval Air Station, Jacksonville, FL; Naval Air Station, North Island, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 8/79-Present.

Objectives: To train maintenance personnel to maintain and operate a mobile air conditioning unit.

Instruction: Lectures and practical exercises in the maintenance, troubleshooting and operation of a mobile air conditioning unit including electrical system analysis, refrigerant analysis, fault troubleshooting, operational checks and removal and replacement procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in air conditioning (3/82).

NV-1701-0009

R-114 Air Conditioning System York 150 Ton

Course Number: A-652-0229.

Location: Submarine School, Groton, CT; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2 weeks (46 hours).

Exhibit Dates: 10/80-Present.

Objectives: Upon successful completion of this course the student will possess the knowledge and skill required to properly operate and perform required repairs and preventive maintenance on the York 150 ton centrifugal air conditioning plant.

Instruction: This course provides lecture and laboratory instruction in basic refrigeration theory, as well as the operation and maintenance of an air conditioning system at the component level.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in air conditioning (11/85).

NV-1701-0010

Submarine Ships Stores Refrigeration R-12 Combined Maintenance

Course Number: A-652-0204.

Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.

Length: 1 week (45 hours).

Exhibit Dates: 9/84-Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform all operational procedures with supervision on an R-12 refrigeration system, and troubleshoot and repair refrigeration system faults.

Instruction: Lecture and laboratory exercises in the construction, theory of operation, and maintenance of an R-12 refrigeration system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in refrigeration technology (2/89). The credits listed here do not duplicate those listed for NV-1701-0011.

NV-1701-0011

Trident Refrigeration Systems Supervisor

Course Number: A-652-0265.

Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.

Length: 1 week (44 hours).

Exhibit Dates: 6/85-Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate, troubleshoot, and maintain hermetically sealed refrigeration units, and troubleshoot and maintain R-12 refrigeration systems.

Instruction: Lecture and laboratory exercises in the (advanced) theory of R-12 refrigeration systems and construction, operation, and maintenance of hermetically sealed refrigeration units.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in refrigeration technology (2/89). The credit listed does not duplicate that listed for exhibit NV-1701-0010.

NV-1701-0012

R-114 York 200 Ton Air Conditioning Technician

Course Number: A-652-0205.

Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.

Length: 2 weeks (80 hours).

Exhibit Dates: 10/84-Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform operational procedures on R-114 A/C systems, preventive maintenance on R-114 A/C systems, and troubleshoot and repair R-114 A/C systems faults.

Instruction: Lecture and laboratory exercises on function, operation and maintenance of R-114 A/C systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in air conditioning technology laboratory (2/89).

NV-1701-0013

Centrifugal Air Conditioning System Operation and Maintenance

Course Number: A-720-0025.

Location: Fleet Training Center, Norfolk, VA; Fleet Training Center, San Diego, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/88-Present.

Learning Outcomes: Upon completion of the course the student will be able to operate, lubricate, disassemble, and maintain a centrifugal air conditioning system.

Instruction: Lectures and practical exercises on the subject matter.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour lecture and 1 semester hour laboratory in air conditioning and refrigeration (3/89).

NV-1702-0001

Cascadex 100 Pound Washer/Extractor Maintenance, Class C

Course Number: A-690-0017.

Location: Technical Training Command, San Diego, CA.

Length: 2 weeks (60 hours).

Exhibit Dates: 4/72–1/88.

Objectives: To train personnel to perform corrective maintenance on the Cascadex 100-pound combination washing and extracting machine.

Instruction: Lectures and practical exercises on the maintenance and repair of the assemblies and systems of the Cascadex 100-pound combination washing and extracting machine, including a general description of the washing and extracting machine, manual operation of the washer/extractor, formula card programming, formula operation of the washer/extractor, electrical controls, description of the fill and drain circuit, and electrical troubleshooting.

Credit Recommendation: In the vocational certificate category, 1 semester hour in appliance repair (5/74).

NV-1703-0001

Construction Mechanic/Automotive Electrical Maintenance, Class C

(CM"C" Automotive Electrical Maintenance)

Course Number: A-610-0026.

Location: Construction Training Center, Gulfport, MS; Construction Training Center, Port Hueneme, CA.

Length: 5 weeks (150 hours).

Exhibit Dates: 1/72–1/88.

Objectives: To train enlisted personnel to maintain and repair automotive and construction equipment electrical systems.

Instruction: Lectures and practical exercises in the maintenance and repair of automotive and construction equipment electrical systems, including electrical fundamentals, electrical test equipment, storage battery operation, cranking motors and switches, ignition systems, direct current charging systems, semiconductors, and alternating-current charging systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in automobile electricity (7/76).

NV-1703-0002

Enginemen, Gas Turbine Engines, Class C

Course Number: Not available.

Location: Engineman School, Great Lakes, IL.

Length: 7–8 weeks (215–250 hours).

Exhibit Dates: 6/63–12/68.

Objectives: To train enginemen to supervise turbine engine operators.

Instruction: Lectures and practical exercises in basic gas turbine engine principles, operation, and construction; component systems; and specific gas turbine engines operation, adjustment, troubleshooting, components, and accessories.

Credit Recommendation: In the vocational certificate category, 6 semester hours in gas turbines (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in mechanical or automotive technology (5/74).

NV-1703-0003

Construction Mechanic/Automatic Transmissions, Class C

(CM"C" Auto Trans)

Course Number: A-610-0021.

Location: Construction Training Center, Gulfport, MS; Construction Training Center, Port Hueneme, CA.

Length: *Version 1:* 8 weeks (240 hours). *Version 2:* 5 weeks (160 hours).

Exhibit Dates: *Version 1:* 12/69–1/88. *Version 2:* 4/65–11/69.

Objectives: To train enlisted personnel to test, adjust, and repair automatic transmissions on automotive and construction equipment.

Instruction: *All Versions:* Lectures and practical exercises in hydraulics, torque converters, planetary gear systems, and automatic transmission control systems theory and principles; theory, operation, disassembly, inspection, repair, assembly, and troubleshooting of powerglide, Ford C-4 Cruise-O-Matic, Allison torqmatic, and International-Hough torque converters and powershift transmissions. *Version 2:* Instruction includes Fordomatic two-speed, hydramatic dual range, Allison MT series, and Caterpillar powershift transmissions.

Credit Recommendation: *Version 1:* In the vocational certificate category, 8 semester hours in automotive or heavy equipment (7/76); in the lower-division baccalaureate/associate degree category, 6 semester hours in automotive or heavy equipment (7/76). *Version 2:* In the vocational certificate category, 5 semester hours in automotive or heavy equipment (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in automotive or heavy equipment (5/74).

NV-1703-0004

General Motors Engines (16-278A)

Course Number: F-652-018.

Location: Submarine School, Groton, CT.

Length: 2 weeks (60 hours).

Exhibit Dates: 11/72–1/88.

Objectives: To train enlisted personnel to repair and maintain General Motors Engines.

Instruction: Lectures and practical exercises in the repair and maintenance of General Motors engines, including major engine components and systems; camshafts, timing gears and engine timing procedures; disassembly, cleaning, inspection, reassembly, and testing of the air blower, cylinder unit, governor and unit injector.

Credit Recommendation: In the vocational certificate category, 2 semester hours in automotive repair (5/74).

NV-1703-0005

Introduction to Diesel Engines and Associated Systems

(Mine Warfare Engineman Basic)

(Engineman Basic)

Course Number: J-652-0474; A-652-0038.

Location: Mine Warfare School, Charleston, SC.

Length: 2–3 weeks (60–90 hours).

Exhibit Dates: *Version 1:* 1/80–Present. *Version 2:* 11/71–12/79.

Objectives: To train petty officers in diesel engine theory as it relates to the operation and maintenance of diesel engines and associated systems.

Instruction: *All Versions:* Lectures and demonstrations in diesel operation and construction, precision measurements, fuel properties, fuel systems, intake and exhaust systems, and piping and valves. *Version 1:* Includes concepts in the physical sciences and mathematics as they relate to various systems and components.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in automotive, heavy equipment, diesel or mechanical technology (11/81). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in automotive technology and heavy equipment (7/74);

NV-1703-0006

Aviation Support Equipment Gasoline Engine Intermediate Maintenance

Course Number: C-602-3214.

Location: Air Maintenance Training Detachment, Jacksonville, FL; Air Maintenance Training Detachment, North Island, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 5/71–1/88.

Objectives: To train enlisted personnel to maintain gasoline engines.

Instruction: Lectures and practical exercises in gasoline engine maintenance, including principles of internal-combustion engines; engine disassembly, inspection, repair, and reassembly; and repair of engine-related subsystems.

Credit Recommendation: In the vocational certificate category, 4 semester hours in engine repair laboratory (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in engine repair laboratory (7/74).

NV-1703-0007

LST 1182 Propulsion Technician, Class C1

Course Number: A-652-0054.

Location: Service School Command, Great Lakes, IL.

Length: *Version 1:* 9 weeks (350 hours). *Version 2:* 7 weeks (270 hours).

Exhibit Dates: *Version 1:* 3/80–Present. *Version 2:* 6/77–2/80.

Objectives: To train personnel to operate and maintain the propulsion systems (ALCO 251-C) installed in the 1182 LST.

Instruction: This course is a combination of A-652-0055, LST 1179-1182 Class Controllable Pitch Propeller and Propulsion Control System (NV-1710-0023) and A-652-0056, ALCO 251-C Diesel Engine (NV-1712-0010). Topics cover the operation, troubleshooting and maintenance of the specified equipment. *Version 1:* Includes the addition of course A-652-0019, Basic Engineman Class C1 (NV-1712-0015).

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 4 semester hours in diesel technology and 2 as electives in automotive/mechanical technology (1/82). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in diesel technology and 2 as electives in automative/mechanical technology (9/77).

NV-1703-0008

LM2500 GAS TURBINE MODULE MAINTENANCE, CLASS C1

Course Number: A-652-0072.

Location: Service School Command, Great Lakes, IL.

Length: 5 weeks (187 hours).

Exhibit Dates: 1/76-6/81.

Objectives: To train personnel in the maintenance of the LM2500 gas turbine.

Instruction: Areas of instruction include the LM2500 gas turbine assembly, fuel speed governing systems, lubrication system, electrical system integration, starting system, airflow fundamentals, maintenance and safety practices, servicing, troubleshooting, installing and aligning turbines.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in automotive/mechanical technology (9/77).

NV-1703-0009

MODEL 104 GAS TURBINE GENERATOR SET MAINTENANCE

(Ship's Service Gas Turbine Generator Module (Allison 501) Maintenance, Class C1)

Course Number: A-652-0076.

Location: Service School Command, Great Lakes, IL.

Length: 3-5 weeks (120-200 hours).

Exhibit Dates: 12/76-Present.

Objectives: To provide specific instruction in gas turbine engine operation, inspection and maintenance related to the DD963 class destroyer.

Instruction: Areas of instruction include gas turbine engine operation, construction, cooling, lubrication, trouble identification, inspection and maintenance; gear reduction; generator operation and control; and use of specific inspection equipment and procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in gas turbine engine inspection, operation and maintenance (1/82).

NV-1703-0010

AVIATION SUPPORT EQUIPMENT AUTOMATIC TRANSMISSION INTERMEDIATE MAINTENANCE

Course Number: C-602-3236.

Location: Naval Air Station, Jacksonville, FL; Naval Air Station, North Island, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 11/74-Present.

Objectives: To train enlisted personnel in aviation support equipment operation, repairs and training on automatic transmissions.

Instruction: Lectures and laboratory exercises in the operation, troubleshooting, and component repair of automatic transmissions using tools, test equipment and technical manuals related to particular transmission systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in automotive maintenance on the basis of institutional evaluation (3/82).

NV-1703-0011

GROUND SUPPORT EQUIPMENT GTC-85 INTERMEDIATE MAINTENANCE

Course Number: C-602-3211.

Location: Naval Air Station, Jacksonville, FL; Naval Air Station, North Island, CA.

Length: 2 weeks (72 hours).

Exhibit Dates: 1/77-Present.

Objectives: To train maintenance personnel in repair and maintenance procedures of a ground support GTC-85 turbine engine.

Instruction: Lecture and practical exercises in the maintenance and overhaul of a turbine engine including break down accessories, oil systems, electrical systems, fuel systems, air systems, removal and repair of said systems and replacement of equipment using the manufacturers maintenance manuals, special tools and safety procedures.

Credit Recommendation: In the vocational certificate category, 1 semester hour in ground operational equipment maintenance (3/82).

NV-1703-0012

FFG-7 CENTRAL CONTROL STATION OPERATION, CLASS C1

Course Number: A-652-0156.

Location: Service School Command, Great Lakes, IL.

Length: 3 weeks (120 hours).

Exhibit Dates: 5/79-Present.

Objectives: To provide personnel with the knowledge required to operate, under limited supervision, a FFG-7 class ship's central control station equipment.

Instruction: Lectures and practical experience in the operation of the central control station equipment of a gas turbine unit, including operation of the propulsion control console, the propulsion local operating panel, the electric control console and the auxiliary control console.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (1/82).

NV-1703-0013

LM2500 ENGINE CHANGEOUT

Course Number: A-652-0072.

Location: Service School Command, Great Lakes, IL.

Length: 2-3 weeks (80 hours).

Exhibit Dates: 7/81-Present.

Objectives: To provide personnel with the skills necessary to changeout major components of the LM2500 gas turbine engine.

Instruction: Lectures and laboratory exercises on the changeout procedures for components, accessories and major assemblies of the LM2500 gas turbine.

Credit Recommendation: In the vocational certificate category, 1 semester hour in gas turbine maintenance laboratory (10/83).

NV-1703-0014

AVIATION MACHINIST'S MATE CLASS A (S-3A) POWER PLANT SYSTEMS

Course Number: C-601-3860.

Location: Naval Air Station, North Island, San Diego, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 4/83-Present.

Objectives: To provide enlisted personnel with a basic knowledge of turbine engine theory, operation, maintenance and safety.

Learning Outcomes: Upon completion of the course, the student will be able to: (1) solve basic math, fluid power and hydraulic problems; (2) understand basic theory and operation of a turbine engine; (3) select and use proper hand tools associated with inspection and disassembly of turbine engines and; (4) understand documentation and supply logistics.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in basic mathematics, 1 in basic physics, and 1 in basic turbine engine theory (4/85).

NV-1703-0015

AVIATION SUPPORT EQUIPMENT A/S32A-33 AIRCRAFT TOWING TRACTOR INTERMEDIATE MAINTENANCE

Course Number: C-602-3229.

Location: Naval Air Station, North Island, San Diego, CA; Naval Air Station, Jacksonville, Fl.

Length: 2 weeks (80 hours).

Exhibit Dates: 11/83-Present.

Objectives: To train enlisted personnel in the operation and maintenance of an aircraft towing tractor.

Learning Outcomes: Upon completion of the course, the the student will be able to identify, troubleshoot, and maintain an engine and its associated systems, main and auxiliary hydraulic systems and the electrical lifting linkage of the A/S-32A-33 aircraft towing tractor.

Credit Recommendation: In the vocational certificate category, 1 semester hour in automotive repair (4/85).

NV-1703-0016

AVIATION SUPPORT EQUIPMENT A/S 32P-16 FIRE FIGHTING TRUCK INTERMEDIATE MAINTENANCE

Course Number: C-602-3242.

Location: Naval Air Station, North Island, San Diego, CA; Naval Air Station, Jacksonville, Fl.

Length: 3 weeks (120 hours).

Exhibit Dates: 9/83-Present.

Objectives: To train enlisted personnel in the maintenance, troubleshooting and repair of a fire fighting truck.

Learning Outcomes: Upon completion of the course, the student will be able to operate, maintain and repair the following systems: electrical, including the master switch, and fire fighting electrical system; hydraulic, including the fire pump drive and assembly; and firefighting systems including the check and reset valve and L-W pump rating.

Credit Recommendation: In the vocational certificate category, 2 semester hours in automotive repair and maintenance (4/85).

NV-1703-0017

AVIATION SUPPORT EQUIPMENT LHA-1 PALLET TRANSPORTER INTERMEDIATE MAINTENANCE

Course Number: C-602-3239.

Location: Naval Air Station, North Island, San Diego, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 2/79-Present.

Objectives: To train enlisted personnel to operate, troubleshoot and repair a pallet transporter.

Learning Outcomes: Upon completion of the course, the student will be able to understand the capabilities of the equipment and be able to repair, maintain and troubleshoot the following: the engine, the hydraulics system, the electrical system, steering and axle, the brakes and the auxiliary equipment of the LHA-1 pallet transporter.

Credit Recommendation: In the vocational certificate category, 1 semester hour in automobile repair (4/85).

NV-1704-0001

Air Intercept Control, Class O

Course Number: C-2D-2014.

Location: Air Technical Training Center, Glynco, GA.

Length: 6-7 weeks (240-264 hours).

Exhibit Dates: 3/65-1/88.

Objectives: To provide commissioned officer, noncommissioned officer, and enlisted radar personnel with training in air intercept control.

Instruction: Lectures and practical exercises in air intercept control procedures, communications, and equipment use.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/74).

NV-1704-0002

Air Intercept Controller

Course Number: K-2G-0007; K-2G-362.

Location: Fleet Anti-Air Warfare Training Center, San Diego, CA.

Length: 4-5 weeks (116-158 hours).

Exhibit Dates: 6/67-1/88.

Objectives: To train officers and enlisted personnel to control fleet interceptor aircraft in airborne combat situations.

Instruction: Lectures and practical demonstrations in fleet interceptor aircraft operations, including air weapons systems, navigation aids, communications procedures and vocabulary, radar indicator equipment, search and rescue procedures, and intercept control methods and techniques.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/74).

NV-1704-0003

Air Traffic Control Officers, Class C2

(Air Traffic Control Officers, Class O)

Course Number: C-2G-2014.

Location: Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN. Air Technical Training Center, Glynco, GA.

Length: *Version 1:* 6 weeks (230 hours). *Version 2:* 9-10 weeks (360-392 hours).

Exhibit Dates: *Version 1:* 1/81-1/84. *Version 2:* 8/66-12/80.

Objectives: To train officers to perform as air traffic controllers and control center officers.

Instruction: *All Versions:* Lectures and practical exercises in navigational aids, FAA regulations, air traffic control radar procedures, air traffic control terminal procedures, instrument procedures, and aviation meteorology. *Version 1:* Instruction includes basic drafting procedures.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in air traffic control, 2 in basic drafting (2/81). *Version 2:* In the lower-division baccalaureate/associate degree category, 6 semester hours in air traffic control (3/74).

NV-1704-0004

Air Traffic Controller Class A1

(Air Traffic Control Class A)

(Air Traffic Controller Class A)

(Air Controlman, Class A)

Course Number: C-222-2010.

Location: *Version 1:* Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN. *Version 2:* Air Technical Training Center, Olathe, KS; Air Technical Training Center, Glynco, GA.

Length: 10-16 weeks (400-640 hours).

Exhibit Dates: *Version 1:* 2/75-Present. *Version 2:* 3/66-1/75.

Objectives: To qualify enlisted personnel for FAA certification in control tower operations.

Instruction: Lectures and practical exercises in basic air navigation and navigational aids; aviation meteorology; airport traffic control; and air traffic rules and regulations, communication procedures, and radar use.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 9 semester hours in air traffic control or 5 semester hours in private pilot ground school (9/89). *Version 2:* In the lower-division baccalaureate/associate degree category, 6 semester hours in air traffic control (3/74).

NV-1704-0005

Air Intercept Controller Supervisor

Course Number: K-2G-363.

Location: Fleet Anti-Air Warfare Training Center, San Diego, CA.

Length: 3 weeks (108-117 hours).

Exhibit Dates: 6/67-1/88.

Objectives: To train air intercept controllers to instruct and supervise personnel in intercept control procedures.

Instruction: Lectures and practical exercises in intercept procedures and functions, supervisory techniques, emergency procedures, and interceptors and associated equipment usage.

Credit Recommendation: In the vocational certificate category, 1 semester hour in air traffic control; in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (6/74).

NV-1704-0006

SH-3 Automatic Stabilization Equipment Organizational Maintenance

Course Number: C-602-3399.

Location: Naval Air Station, North Island, CA; Naval Air Station, Jacksonville, FL.

Length: 3 weeks (120 hours).

Exhibit Dates: 11/81-Present.

Objectives: To provide personnel with sufficient knowledge of the theory of operation of a SH-3 helicopter's automatic stabilization equipment to perform, under close supervision, organizational level maintenance.

Instruction: Instruction and practical exercises in the operation of the SH-3 helicopter's stabilization equipment including the operation and testing of the power destribution system, the operation and testing of the yaw, pitch and roll systems and the troubleshooting procedures for the systems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in helicopter maintenance (3/82).

NV-1704-0007

Air Controlman, Class B

Course Number: None.

Location: *Version 1:* Air Technical Training Center, Glynco, GA. *Version 2:* Air Technical Training Center, Olathe, KS.

Length: *Version 1:* 9-11 weeks (372-456 hours). *Version 2:* 16 weeks (640 hours).

Exhibit Dates: *Version 1:* 10/65-1/88. *Version 2:* 9/54-9/65.

Objectives: To provide control tower operators with advanced training in air traffic control and in personnel management.

Instruction: Lectures and practical exercises in advanced air traffic control techniques and procedures; instrument approaches; air navigation; meteorology; and organizational, personnel, and administrative management.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in supervision and management, 1 in air navigation, 15 in air traffic contol, 1 in aviation meteorology (3/74). *Version 2:* credit is not recommended—course material obsolete (3/74).

NV-1704-0008

Air Controlman T (Tower), Class A

Course Number: None.

Location: Air Technical Training Unit, Olathe, KS.

Length: 10 weeks (400 hours).

Exhibit Dates: 6/56-2/66.

Objectives: To provide enlisted personnel with the knowledge and skills necessary to qualify for FAA certification as air traffic control tower operators.

Instruction: Lectures and practical exercises in air traffic control, aerial meteorology, control tower communications, aircraft characteristics, and FAA regulations.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in aviation meteorology, 4 in air navigation, 18 in air traffic control (3/74); in the upper-division baccalaureate category, credit in air control tower operations on the basis of institutional evaluation (12/68).

NV-1704-0009

Air Controlman W (Early Warning), Class A

Course Number: None.

Location: Naval Air Station, Glynco, GA.

Length: 12 weeks (480 hours).

Exhibit Dates: 11/56-2/66.

Objectives: To train enlisted personnel in air traffic control and radar surveillance techniques.

Instruction: Lectures and practical exercises in air traffic control and radar surveillance techniques, including air navigation, electronic fundamentals applicable to radar operations, and communications techniques.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 9 semester hours in electronics, 12 in air traffic control, 2 in navigation (3/74); in the upper-division baccalaureate category, credit in air control tower operations on the basis of institutional evaluation (12/68).

NV-1704-0010

Air Controlman (Radar), Class A

Course Number: None.

Location: Air Technical Training Unit, Olathe, KS.

Length: 4 weeks (160 hours).

Exhibit Dates: 6/56-2/66.

Objectives: To provide enlisted personnel with training in radar operations applicable to air traffic control.

Instruction: Lectures and practical exercises in air traffic control fundamentals, air navigation, air traffic communications, aircraft characteristics, and radar theory and applications to air traffic control.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in air navigation, 3 in air traffic control (3/74).

NV-1704-0011

AIR CONTROL, CLASS O

Course Number: None.

Location: Naval Air Station, Glynco, GA.

Length: 5 weeks (200 hours).

Exhibit Dates: 11/56-12/68.

Objectives: To provide chief petty officers and officer personnel with training in all phases of air control.

Instruction: Lectures and practical exercises in anti-submarine air operations, offensive and defensive aircraft operations, jet aircraft familiarization, air control data collection equipment usage, and basic air control procedures and techniques.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/74).

NV-1704-0012

CARRIER AIR TRAFFIC CONTROL CENTER
CONTROLLER CLASS C/O

Course Number: C-2G-2016.

Location: Air Technical Training Center, Glynco, GA.

Length: 3-6 weeks (160-264 hours).

Exhibit Dates: 3/65-1/88.

Objectives: To provide officers and air controlmen with training in carrier air traffic control center operations.

Instruction: Lectures and practical exercises in carrier air traffic control center equipment and operating procedures, carrier controlled approach, and Naval Tactical Data System (NTDS) console training.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (12/68).

NV-1704-0013

A-7E HYDRAULIC, PNEUMATIC AND
AIRFRAME SYSTEMS
ORGANIZATIONAL MAINTENANCE
(A-7E Hydraulic and Pneumatic Systems Organizational Maintenance)

Course Number: C-602-3793.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL.

Length: *Version 1:* 3 weeks (120 hours). *Version 2:* 4 weeks (160 hours).

Exhibit Dates: *Version 1:* 1/81-Present. *Version 2:* 9/72-12/80.

Objectives: To train maintenance personnel in the operation, maintenance and servicing procedures applicable to A-7E aircraft control systems.

Instruction: Practical experience in troubleshooting, maintenance and servicing of structures, and hydraulic, pneumatic, primary flight control and auxiliary systems.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in hydraulic and pneumatic systems laboratory (3/82). *Version 2:* In the lower-division baccalaureate/associate degree category, credit in hydraulic and pneumatic systems on the basis of institutional evaluation (3/74).

NV-1704-0014

KC-130F T-56-A-16 ENGINE
INTERMEDIATE
MAINTENANCE/COMPLETE ENGINE
REPAIR

Course Number: C-601-3507.

Location: Air Maintenance Training Detachment, El Toro, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 6/71-1/88.

Objectives: To train fleet personnel in the maintenance of KC-130F aircraft engines.

Instruction: Practical experience in planned maintenance systems, general specifications of engines, and disassembly, cleaning, and engine inspection and preservation.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in aircraft engine maintenance on the basis of institutional evaluation (3/74).

NV-1704-0015

A-4 AUTOMATIC FLIGHT CONTROL SYSTEM
INTERMEDIATE MAINTENANCE

Course Number: C-602-3735.

Location: Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Beaufort, SC.

Length: 2 weeks (80 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train enlisted personnel to maintain the A-4 aircraft's flight control systems.

Instruction: Practical experience in troubleshooting, circuit analysis, testing, publications procedures, and intermediate maintenance.

Credit Recommendation: In the vocational certificate category, 3 semester hours in maintenance electronics (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in maintenance electronics (12/68).

NV-1704-0016

TF30-P-8/408 ENGINE INTERMEDIATE
MAINTENANCE/COMPLETE ENGINE
REPAIR
(TF30-P-8 Intermediate Maintenance/Complete Engine Repair)

Course Number: C-601-3132.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL.

Length: 4 weeks (160 hours).

Exhibit Dates: 7/68-Present.

Objectives: To provide maintenance personnel with instruction in TF30-P-8/408 aircraft engine maintenance.

Instruction: Lectures and practical exercises in TF30-P-8/408 aircraft engine maintenance, including engine components inspection and repair; engine systems operation; and engine assembly, disassembly, and testing procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in turbine engine laboratory (3/82); in the lower-division baccalaureate/associate degree category, 2 semester hours in turbine engine laboratory (3/82).

NV-1704-0017

P-3 T56-A-10W ENGINE AND RELATED
SYSTEMS MAINTENANCE, NO. 56

Course Number: Not available.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.

Length: 5 weeks (200 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To provide maintenance personnel with training in P-3 aircraft power plant and related systems maintenance.

Instruction: Lectures and practical exercises in P-3 aircraft power plant and related systems maintenance, including engine organizational and intermediate maintenance procedures, operating principles, and theory; propeller and related systems maintenance, installation, inspection, and repair.

Credit Recommendation: In the vocational certificate category, 3 semester hours in power plant organizational maintenance; in the lower-division baccalaureate/associate degree category, 1 semester hour in power plant organizational maintenance, 1 in power plant intermediate maintenance (3/74).

NV-1704-0018

UH-1E T53-L-11 ENGINE
ORGANIZATIONAL MAINTENANCE

Course Number: C-601-3341.

Location: Air Maintenance Training Detachment, Cp. Pendleton, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 3/70-1/88.

Objectives: To train maintenance personnel to maintain and repair T53-L-11 aircraft turbine engine systems.

Instruction: Lectures and practical exercises in T53-L-11 turbine engine system operation and maintenance, including inspection, line-servicing, troubleshooting, testing, adjusting, and repairing all engine systems and components.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in T53-L-11 turbine engine organizational maintenance on the basis of institutional evaluation (3/74).

NV-1704-0019

P-3 T56-A-10/14 ENGINE AND RELATED
SYSTEMS ORGANIZATIONAL
MAINTENANCE
(P-3 T-56-A-14 Engine and Related Systems Maintenance)

Course Number: C-601-3533.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA; , Air Maintenance Training Detachment, Jacksonville, FL.

Length: 4-5 weeks (158-200 hours).

Exhibit Dates: *Version 1:* 5/70-Present. *Version 2:* 1/68-4/70.

Objectives: To train maintenance personnel to repair P-3 aircraft power plants and related systems.

Instruction: Lectures and practical exercises in P-3 aircraft power plant and related systems maintenance, including T56-A-14 power plant system maintenance and service, engine diagnosis and troubleshooting, jet engine theory, test equipment operation, and propeller and related systems operation.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in general turboshaft engines and related systems maintenance. Additional credit may be granted on the basis of institutional evaluation (7/81). *Version 2:* In the lower-division baccalaureate/associate degree category, credit in T56-A-14 engines and related systems maintenance on the basis of institutional evaluation (3/74).

NV-1704-0020

T58-GE-8F ENGINE INTERMEDIATE
MAINTENANCE/COMPLETE ENGINE
REPAIR

Course Number: Not available.

Location: Air Maintenance Training Detachment, Key West, FL; Air Maintenance Training Detachment, New River, NC; Air Maintenance Training Detachment, Santa

Anna, CA; Air Maintenance Training Detachment, Imperial Beach, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 3/71–1/88.

Objectives: To train maintenance personnel to maintain and repair T58-GE-8F turbine engines.

Instruction: Lectures and practical exercises in T58-GE-8F maintenance, including engine systems repair and testing; engine construction familiarization; special tools operation; and engine inspection, disassembly, complete repair, and reassembly.

Credit Recommendation: In the vocational certificate category, 2 semester hours in turbine engine laboratory (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in turbine engine laboratory (3/74).

NV-1704-0021

T58-GE-8B ENGINE INTERMEDIATE MAINTENANCE/COMPLETE ENGINE REPAIR

Course Number: C-601-3133.

Location: Air Maintenance Training Detachment, New River, NC; Air Maintenance Training Detachment, Imperial Beach, CA; Air Maintenance Training Detachment, Quonset Point, RI; Air Maintenance Training Detachment, Lakehurst, NJ.

Length: 2 weeks (80 hours).

Exhibit Dates: 11/71–1/88.

Objectives: To train maintenance personnel to repair T58-GE-8B turbine engines.

Instruction: Lectures and practical exercises in T58-GE-8B intermediate maintenance, including engine systems familiarization, and engine inspection, disassembly, testing, repair, and reassembly techniques and procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in turbine engine laboratory (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in turbine engine laboratory (3/74).

NV-1704-0022

A-6A AUTOMATIC FLIGHT CONTROL SYSTEM ORGANIZATIONAL MAINTENANCE

Course Number: None.

Location: Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Whidbey Island, WA.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To train maintenance personnel to maintain, test, and troubleshoot the A-6A automatic flight control system at the organizational maintenance level.

Instruction: Lectures and practical exercises in A-6A automatic flight control system organizational maintenance, including air data computer operation, general aircraft familiarization, introduction to automatic flight, automatic flight control actuators and signal flow location and functional operation, interlocks and line equipment check-out procedures, and system testing and troubleshooting.

Credit Recommendation: In the vocational certificate category, 2 semester hours in automatic flight control maintenance (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in automatic flight control maintenance (3/74).

NV-1704-0023

A-4E/F/TA-4F AIRCRAFT MECHANIC ORGANIZATIONAL MAINTENANCE

Course Number: C-600-3719.

Location: Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Beaufort, SC.

Length: 2 weeks (80 hours).

Exhibit Dates: 4/73–1/88.

Objectives: To train fleet maintenance personnel in A-4E/F/TA-4F aircraft organizational maintenance.

Instruction: Lectures and practical exercises in A-4E/F/TA-4F aircraft maintenance, including aircraft systems familiarization; component replacement procedures; support equipment use; and systems operation, inspection, maintenance, and troubleshooting.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft organizational maintenance (3/74).

NV-1704-0024

J52-P408 ENGINE INTERMEDIATE MAINTENANCE/COMPLETE ENGINE REPAIR

Course Number: C-601-3138.

Location: Air Maintenance Training Detachment, Beaufort, SC; Air Maintenance Training Detachment, Whidbey Island, WA.

Length: 3 weeks (120 hours).

Exhibit Dates: 4/73–1/88.

Objectives: To train fleet maintenance personnel to maintain and repair J52-P408 turbine engines.

Instruction: Lectures and practical exercises in turbine engine systems and inspection, disassembly, cleaning, repair, reassembly, and testing of all engine systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in J52-P408 turbine engine maintenance and repair on the basis of institutional evaluation (3/74).

NV-1704-0025

UH-1E T-53-L-11 ENGINE INTERMEDIATE MAINTENANCE/COMPLETE ENGINE REPAIR

Course Number: None.

Location: Air Maintenance Training Detachment, Cp. Pendleton, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 8/70–1/88.

Objectives: To train enlisted personnel to repair T53-L-ll shaft turbine engines.

Instruction: Lectures and practical exercises in engine disassembly, reassembly, inspection, and repair, and use of special tools.

Credit Recommendation: In the vocational certificate category, 2 semester hours in turbine engine familiarization laboratory (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in turbine engine familiarization laboratory (3/74).

NV-1704-0026

J85-GE-4 ENGINE INTERMEDIATE MAINTENANCE/COMPLETE ENGINE REPAIR

Course Number: None.

Location: Air Maintenance Training Detachment, Meridian, MS.

Length: 3 weeks (120 hours).

Exhibit Dates: 7/69–1/88.

Objectives: To train aviation maintenance personnel to maintain and repair J85-GE-4 engine systems.

Instruction: Lectures and practical exercises in J85-GE-4 engine systems, and support equipment familiarization; components; servicing; replacement; engine dismantling; and engine assembly.

Credit Recommendation: In the vocational certificate category, 3 semester hours in turbine engine familiarization laboratory (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in turbine engine familiarization laboratory (3/74).

NV-1704-0027

T-58 ENGINES FIRST DEGREE INTERMEDIATE MAINTENANCE T58-GE-10 ENGINE INTERMEDIATE MAINTENANCE/COMPLETE ENGINE REPAIR

Course Number: C-601-3131.

Location: Air Maintenance Training Detachment, North Island, San Diego, CA; Air Maintenance Training Detachment, Norfolk, VA; Air Maintenance Training Detachment, Jacksonville, FL; Air Maintenance Training Detachment, Imperial Beach, CA; Air Maintenance Training Detachment, Quonset Point, RI; Air Maintenance Training Detachment, Santa Ana, CA; Air Maintenance Training Detachment, New River, NC.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/73–Present.

Objectives: To train maintenance personnel to maintain and repair T58-GE-10 engines.

Instruction: Practical training in the intermediate maintenance, disassembly, inspection, replacement, assembly, and testing of aircraft turbine engines.

Credit Recommendation: In the vocational certificate category, 2 semester hours in turbine engine laboratory (4/85); in the lower-division baccalaureate/associate degree category, 1 semester hour in turbine engine laboratory (4/85).

NV-1704-0028

GROUND SUPPORT EQUIPMENT TOW TRACTOR CHARGING, STARTING AND IGNITION SYSTEMS INTERMEDIATE MAINTENANCE

Course Number: C-602-3238.

Location: Naval Air Station, Jacksonville, FL; Naval Air Station, North Island, CA.

Length: 3 weeks (104 hours).

Exhibit Dates: 9/77–Present.

Objectives: To provide training in maintenance, troubleshooting and repair of internal combustion engine starting, charging and ignition systems.

Instruction: Lectures and practical exercises in the maintenance and repair of internal combustion engine charging, starting and ignition systems including battery analysis; basic theory; analysis, troubleshooting and repair of generators, regulators alternators, starters and ignition systems using special test equipment such as a dwell meter, growler, and oscilloscope.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in automotive or aircraft electrical systems and 1 in automotive or aircraft electrical laboratory for nonelectrical engineering students (3/82).

NV-1704-0029

T56-A-8/8A Engine and Aeroproducts A6441FN-248 Propeller Intermediate Maintenance

(T56-A-8/8A Engine and A6441FN-248 Propeller)

Course Number: C-601-3134; C-601-74.

Location: *Version 1:* Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, Jacksonville, FL. *Version 2:* Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, North Island, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: *Version 1:* 12/74–1/88. *Version 2:* 4/68–11/74.

Objectives: To provide maintenance personnel with the knowledge and skill to perform intermediate maintenance on turboprop engine and propeller systems of E2/C2 type aircraft.

Instruction: *All Versions:* Lectures and practical exercises in intermediate levels of maintenance including engine disassembly/reassembly; propeller and propeller systems maintenance and rigging using E2/C2 type aircraft as training aids. *Version 1:* This version does not include instruction regarding propellers.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in aviation maintenance technology or power mechanics. Additional credit may be granted on the basis of institutional evaluation (7/81). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in advanced airframe/powerplant technician training (6/75).

NV-1704-0030

F/RF-4B/J Hydraulic Organizational Maintenance

Course Number: C-602-3837.

Location: Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Cherry Point, NC.

Length: 3 weeks (120 hours).

Exhibit Dates: 5/71–1/88.

Objectives: To train maintenance personnel in the servicing and maintenance of F/RF-4B/J aircraft hydraulic systems.

Instruction: Practical experience in maintenance and servicing of hydraulics and pneumatics, landing gear, and related systems; and utility, flight, and surface systems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in aircraft hydraulic and pneumatic systems (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft hydraulic and pneumatic systems (3/74).

NV-1704-0031

SH-3 Electrical Components Intermediate Maintenance

Course Number: C-602-3398.

Location: Naval Air Station, Jacksonville, FL; Naval Air Station, North Island, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 9/81–Present.

Objectives: To provide aviation electricians with the theory of operation and the maintenance procedures for the SH-3 helicopter electrical system and the automatic stabilization equipment to the intermediate repair level.

Instruction: Lectures and practical exercises in the operation and maintenance of a helicopter electrical system and automatic stabilization system including the voltage regulator supervisory panel, temperature controller, loading gear controls, altitude demodulator, ASE circuitry, and cyclic coupler analysis and adjustment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in helicopter system maintenance for non-electrical engineering students (3/82).

NV-1704-0032

CH-53 T-64-GE-413 Engine Intermediate Maintenance/Complete Engine Repair

Course Number: C-601-3444.

Location: Air Maintenance Training Detachment, Santa Ana, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 9/70–1/88.

Objectives: To provide maintenance personnel with the latest information on modifications, servicing procedures, and maintenance applicable to the CH-53 T-64-GE-413 engine.

Instruction: Lectures and practical exercises in engine familiarization, engine maintenance and complete engine repair, and equipment and applicable maintenance procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in helicopter engine repair on the basis of institutional evaluation (3/74).

NV-1704-0033

TF30-P-6 Intermediate Maintenance/Complete Engine Repair

Course Number: None.

Location: Air Maintenance Training Detachment, Cecil Field, FL; Air Maintenance Training Detachment, Lemoore, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 7/68–1/88.

Objectives: To train maintenance personnel in the techniques, modifications, and complete engine repairs applicable to the TF30-P-6 power plant.

Instruction: Lectures and practical exercises in power plant sections, engine disassembly, engine assembly, and complete engine repairs.

Credit Recommendation: In the vocational certificate category, 3 semester hours in turbine engine repair (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in turbine engine repair (3/74).

NV-1704-0034

E-1B MH-67 Automatic Flight Control System Intermediate Maintenance

Course Number: None.

Location: Air Maintenance Training Detachment, North Island, CA; Air Maintenance Training Detachment, Norfolk, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 9/68–1/88.

Objectives: To train maintenance personnel in the procedures for maintaining, repairing, and functionally testing the MH-67 automatic flight control system.

Instruction: Lectures and practical exercises in MH-67 autopilots, intermediate maintenance of components and circuitry, testing, and troubleshooting.

Credit Recommendation: In the vocational certificate category, 2 semester hours in autopilot electronics familiarization laboratory (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in autopilot electronics familiarization laboratory (3/74).

NV-1704-0035

A-4 Automatic Flight Control System Organizational Maintenance

Course Number: C-602-3724.

Location: Air Maintenance Training Detachment, Kingsville, TX; Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Beaufort, SC.

Length: 2 weeks (80 hours).

Exhibit Dates: 2/72–1/88.

Objectives: To train enlisted personnel to repair the automatic flight control system of the A-4 aircraft.

Instruction: Lectures and practical exercises including the theory of operations of automatic flight control system components and control circuits, line testing, and troubleshooting procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in A-4 automatic flight control system organizational maintenance on the basis of institutional evaluation (2/74).

NV-1704-0036

E-2A Flight Technician Organizational Level Maintenance, No. 4

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 8 weeks (320 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To train radar operators in the utilization of equipment to assess performance, isolate faults, and perform in-flight adjustments and maintenance on radar systems.

Instruction: Lectures and practical exercises in radar detection subsystems, navigation subsystems, communication subsystems, and control and display subsystems of E-2A aircraft.

Credit Recommendation: In the vocational certificate category, 5 semester hours in in-flight maintenance (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in in-flight maintenance (3/74).

NV-1704-0037

J60-P-3A/6 Engine Intermediate Maintenance/Complete Engine Repair

Course Number: Not available.

Location: Air Maintenance Training Detachment, Meridian, MS.

Length: 2 weeks (64 hours).

Exhibit Dates: 1/71–1/88.

Objectives: To provide maintenance personnel with instruction in complete engine repair procedures for the J60-P-3A/6 engine.

Instruction: Lectures and practical exercises in basic engine and systems familiarization; engine inspection repair procedures, including disassembly, inspection, and assembly techniques; and care of inactive engines.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in jet engine intermediate maintenance/repair on the basis of institutional evaluation (3/74).

NV-1704-0038

RA-5C Avionics Officers/Supervisors Familiarization

Course Number: None.
Location: Air Maintenance Training Detachment, Sanford, FL.
Length: 2 weeks (80 hours).
Exhibit Dates: 11/72-1/88.
Objectives: To train senior noncommissioned officers in the various avionics systems associated with the RA-5C weapons system.
Instruction: Lectures and practical exercises in location, general operating characteristics, and maintenance requirements for RA-5C electrical and indicating systems; flight and instrumentation electronics; fire control systems; electronics and electronic countermeasures systems; and reconnaissance systems.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in avionics/electronics familiarization on the basis of institutional evaluation (3/74).

NV-1704-0039

P-3 Aircraft Familiarization, No. 2
(P-3 Aircraft Familiarization (Pilots))

Course Number: C-2A-3531.
Location: Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, Patuxent River, MD.
Length: 3 weeks (112 hours).
Exhibit Dates: 1/68-1/88.
Objectives: To familiarize pilots with the operation and systems function of multiengine turboprop aircraft.
Instruction: Lectures and practical experience in power plant, airframes, furnishings, electrical and emergency systems.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft familiarization (3/74).

NV-1704-0040

1. RA-5C Survival and Environmental Systems Organizational Maintenance
2. RA-5C Survival and Environmental Systems

Course Number: None.
Location: *Version 1:* Air Maintenance Training Detachment, Albany, GA. *Version 2:* Air Maintenance Training Detachment, Sanford, FL.
Length: *Version 1:* 4 weeks (160 hours). *Version 2:* 5 weeks (200 hours).
Exhibit Dates: *Version 1:* 3/71-1/88. *Version 2:* 1/68-2/71.
Objectives: To train maintenance personnel to maintain and repair RA-5C survival and environmental systems.
Instruction: Practical experience in operation, maintenance, and servicing of RA-5C canopy, ejection seat, oxygen and heating/ventilating systems.
Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in survival and environmental systems maintenance (3/74). *Version 2:* In the vocational certificate category, 2 semester hours in survival and environmental systems maintenance (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in survival and environmental systems maintenance (3/74).

NV-1704-0041

RA-5C Structures and Hydraulic Subsystems Organizational Maintenance
(RA-5C Structures and Hydraulic Subsystems)

Course Number: None.
Location: Air Maintenance Training Detachment, Albany, GA; Air Maintenance Training Detachment, Sanford, FL.
Length: 5-7 weeks (200-280 hours).
Exhibit Dates: 1/68-1/88.
Objectives: To train maintenance personnel to inspect and repair RA-5C aircraft structures and hydraulic systems.
Instruction: Practical training in inspection, troubleshooting, and repair of RA-5C structures and hydraulic power, landing gear, arresting gear, wing, tail, folding, pneumatic power, and lift control systems.
Credit Recommendation: In the vocational certificate category, 2 semester hours in RA-5C structures and hydraulic system maintenance (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in RA-5C structures and hydraulic system maintenance (3/74).

NV-1704-0042

Aviation Boatswain's Mate E (Aircraft Launch and Recovery Equipment), Class A
(Aviation Boatswain's Mate E (Equipments), Class A)

Course Number: C-680-2012.
Location: Air Technical Training Center, Lakehurst, NJ; Air Technical Training Center, Philadelphia, PA.
Length: 10 weeks (380-384 hours).
Exhibit Dates: 6/65-1/88.
Objectives: To train enlisted personnel in the operation of aircraft launch and recovery equipment aboard aircraft carriers.
Instruction: Lectures and practical exercises in aviation fundamentals, aircraft carrier fire fighting, hydropneumatic catapults, and arresting gear, barrier, and optical systems.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/74).

NV-1704-0043

UH-1E Airframe and Related Systems Organizational Maintenance
(UH-1E Airframe and Related Systems Intermediate Maintenance)

Course Number: C-600-3341.
Location: Air Maintenance Training Detachment, Ellyson Field, FL; Air Maintenance Training Detachment, Cp. Pendleton, CA.
Length: 2-4 weeks (80-160 hours).
Exhibit Dates: 1/68-1/88.
Objectives: To train enlisted personnel in the operation, inspection, and repair of airframe and related systems of the UH-1E aircraft.
Instruction: Practical training in maintenance and repair of airframe, landing gear, power train, flight control, rotor, hydraulic and utility systems, and design, construction, furnishings and assembly of utility systems.
Credit Recommendation: In the vocational certificate category, 1 semester hour in aircraft specialized familiarization (3/74).

NV-1704-0044

Target Drone, Class C

Course Number: None.
Location: Air Technical Training Unit, El Centro, CA.
Length: 9 weeks (360 hours).
Exhibit Dates: 1/55-12/68.
Objectives: To train enlisted personnel in the operation, maintenance, overhaul, and repair of drone aircraft.
Instruction: Practical experience in flight operations, safety procedures, power plant and electronic maintenance, and fueling.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/74).

NV-1704-0045

RA-5C Power Plants and Related Systems Organizational Maintenance
(RA-5C Power Plants and Related Systems)

Course Number: C-601-3741.
Location: Air Maintenance Training Detachment, Albany, GA; Air Maintenance Training Detachment, Sanford, FL.
Length: 3-4 weeks (120-160 hours).
Exhibit Dates: 1/68-1/88.
Objectives: To train fleet maintenance personnel to inspect, test, and repair RA-5C power plants and related systems.
Instruction: Lectures and practical exercises in the basic J-79 engine, aircraft fuel systems, power plants and component systems; inspections, tests, rigging procedures, and maintenance of RA-5C power plants and systems.
Credit Recommendation: In the vocational certificate category, 2 semester hours in power plant systems maintenance (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in power plant systems maintenance (3/74).

NV-1704-0046

Douglas Model D-704 and Sargent-Fletcher Model 31-300 Air Refueling Stores Organizational Maintenance

Course Number: C-602-3013.
Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Beaufort, SC.
Length: 3 weeks (120 hours).
Exhibit Dates: 7/70-Present.
Objectives: To train maintenance personnel to maintain and repair Douglas and Sargent-Fletcher air refueling stores.
Instruction: Lectures and practical exercises in inspection, disassembly, cleaning, repair, and reassembly of the Douglas Model D-704 and Sargent-Fletcher Model 31-300 air refueling stores systems, components, and equipment.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in air refueling stores maintenance on the basis of institutional evaluation (3/82).

NV-1704-0047

SH-3 Airframes and Hydraulic Systems Organizational Maintenance

Course Number: C-602-3396.

Location: *Version 1:* Air Maintenance Training Detachment, Jacksonville, FL; Air Maintenance Training Detachment, North Island, CA. Air Maintenance Training Detachment, Quonset Point, RI; *Version 2:* Air Maintenance Training Detachment, Imperial Beach, CA.

Length: 3 weeks (109-144 hours).

Exhibit Dates: *Version 1:* 12/79-Present. *Version 2:* 1/73-11/79.

Objectives: To train maintenance personnel to maintain and repair SH-3 helicopter airframe and hydraulic systems.

Instruction: *All Versions:* Lectures and practical exercises in removal, replacement, adjustment, and testing of components, and troubleshooting and repair of airframe and hydraulic systems. *Version 1:* Includes trimming and alignment of track blades.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in hydraulics, assembly and rigging (3/82). *Version 2:* In the vocational certificate category, 3 semester hours in airframe and hydraulic maintenance (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in airframe and hydraulic maintenance (3/74).

NV-1704-0048

P-3 Flight Engineers System
(P-3 Flight Engineer System, No. 6)

Course Number: C-050-3531.

Location: Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Jacksonville, FL.

Length: 5 weeks (200 hours).

Exhibit Dates: *Version 1:* 9/70-Present. *Version 2:* 1/68-8/70.

Objectives: To train flight crews in P-3 system and subsystem operations, in-flight maintenance, and procedures.

Instruction: Lectures and practical exercises in aircraft and electrical systems; power plant and related systems; hydraulic, structure, and pressurization systems; radio and navigation aids; autopilot; and emergency systems.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 4 semester hours in engineering. Additional credit may be granted on the basis of institutional evaluation (7/81). *Version 2:* In the lower-division baccalaureate/associate degree category, credit in P-3 flight engineering on the basis of institutional evaluation (3/74).

NV-1704-0049

H-53, T-64-GE-6/6A Intermediate Maintenance/Complete Engine Repair

Course Number: None.

Location: Air Maintenance Training Detachment, Santa Ana, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 7/68-1/88.

Objectives: To train maintenance personnel to maintain and repair T-64-GE-6 engines at the intermediate level.

Instruction: Lectures and practical exercises in engine familiarization, including torque, compressor, combustion, turbine, and exhaust frame accessory sections; engine related systems, including air flow utilization, lubrication, fuel system, and electrical systems; and engine maintenance and repair.

Credit Recommendation: In the vocational certificate category, 2 semester hours in intermediate maintenance/complete engine repair (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in intermediate maintenance/complete engine repair (3/74).

NV-1704-0050

P-3 Hydraulics and Flight Controls System Maintenance, No. 10

Course Number: Not available.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train maintenance personnel to maintain and repair P-3 aircraft hydraulic and flight control systems at the intermediate and organizational levels.

Instruction: Lectures and practical exercises in diagnosis, troubleshooting, maintenance, and servicing of the P-3 hydraulic power, auxiliary power, landing gear systems, nosewheel steering, brake systems, primary flight controls, flap systems, and tab booster and rudder boost systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in P-3 hydraulic and flight control system maintenance on the basis of institutional evaluation (3/74).

NV-1704-0051

QH-50C Airframe and Related Systems Intermediate Maintenance

Course Number: None.

Location: Air Maintenance Training Detachment, Dam Neck, VA; Air Maintenance Training Detachment, North Island, CA.

Length: 3 weeks (128 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train maintenance personnel to maintain and repair QH-50C airframes and related systems.

Instruction: Lectures and practical exercises in QH-50C aircraft maintenance, including airframe and engine familiarization; avionics and target control; handling and special support equipment maintenance; and airframe, power plant, and related systems inspection, maintenance, repair, and troubleshooting procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in aircraft maintenance on the basis of institutional evaluation (3/74).

NV-1704-0052

QH-50D Airframe, Power Plant and Related Systems Organizational Maintenance
(QH-50D Airframe and Related System Intermediate Maintenance)

Course Number: None.

Location: Air Maintenance Training Detachment, Dam Neck, VA; Air Maintenance Training Detachment, North Island, CA.

Length: 3 weeks (128-136 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train maintenance personnel to maintain and repair QH-50D drone airframes and related systems.

Instruction: Lectures and practical exercises in theory of flight, QH-50D helicopter fundamentals, DASH weapon system operation, aviation publications and forms familiarization, deck handling and special support equipment operation and maintenance, safety procedures, and QH-50D aircraft airframe and engine maintenance.

Credit Recommendation: In the vocational certificate category, 2 semester hours in airframe and related systems maintenance (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in airframe and related systems maintenance (3/74).

NV-1704-0053

P-3 Second Mechanics Systems

Course Number: C-601-3534.

Location: Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, Patuxent River, MD.

Length: 5 weeks (200 hours).

Exhibit Dates: 2/73-1/88.

Objectives: To train P-3 flight crew second mechanics to repair and service aircraft systems and subsystems.

Instruction: Lectures and practical exercises in electrical and related systems, power plant and related systems, and airframe systems of the P-3 aircraft.

Credit Recommendation: In the vocational certificate category, 3 semester hours in airframe and power plant systems (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in airframe and power plant systems (3/74).

NV-1704-0054

E-2A Aircraft Familiarization (Pilots)

Course Number: C-00-3471.

Location: Air Maintenance Training Detachment, San Diego, CA.

Length: 2 weeks (72 hours).

Exhibit Dates: 7/71-1/88.

Objectives: To familiarize pilots and prospective pilots with the E-2A aircraft, and the function and operation of its systems.

Instruction: Lectures on, and practical exercises with, E-2A aircraft, including power plant and related systems, and airframe, hydraulics, environmental, and avionic systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in light aircraft familiarization (2/74).

NV-1704-0055

J79-GE-8/10 Engine Intermediate Maintenance
(J79-GE-8/10 Intermediate Maintenance)

Course Number: C-601-3129.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Cherry Point, NC.

Length: 3 weeks (120 hours).

Exhibit Dates: 12/67-1/88.

Objectives: To train technicians to repair J-79 turbine engines.

Instruction: Practical experience in disassembly, repair, assembly, and testing of J-7[illegible] turbine engines.

Credit Recommendation: In the vocational certificate category, 3 semester hours in turbine engine repair (2/74); in the lower-division baccalaureate/associate degree category-ry, 2 semester hours in turbine engine repair (2/74).

NV-1704-0056

F-4B/J AIRFRAME AND HYDRAULIC SYSTEMS ORGANIZATIONAL MAINTENANCE

(F-4B/J Airframe and Hydraulic Systems Maintenance)

Course Number: C-602-3807.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Cherry Point, NC.

Length: 3-4 weeks (120-136 hours).

Exhibit Dates: 10/67-1/88.

Objectives: To train maintenance personnel to repair F-4B/J aircraft.

Instruction: Lectures and practical exercises in F-4B/J maintenance procedures, including airframe construction, corrosion control, hydraulic and high-pressure pneumatic systems maintenance, and utility hydraulic subsystems and primary surface controls maintenance.

Credit Recommendation: In the vocational certificate category, 2 semester hours in airframe and hydraulic systems maintenance (2/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in airframe and hydraulic systems maintenance (2/74).

NV-1704-0057

UH-2C AIRFRAMES, HYDRAULIC, FLIGHT CONTROLS AND ROTOR SYSTEMS ORGANIZATIONAL MAINTENANCE

Course Number: C-602-3386.

Location: Air Maintenance Training Detachment, Imperial Beach, CA.

Length: 2 weeks (64 hours).

Exhibit Dates: 8/71-1/88.

Objectives: To train maintenance personnel in the operation, maintenance, and servicing of UH-2C aircraft subsystems.

Instruction: Lectures and practical exercises in functional and operational theory of UH-2C airframes, hydraulics, flight control and rotor systems; and troubleshooting.

Credit Recommendation: In the vocational certificate category, 2 semester hours in aircraft maintenance (2/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft maintenance (2/74).

NV-1704-0058

HH-2D/SH-2D AIRFRAMES, HYDRAULIC, FLIGHT CONTROLS, AND ROTOR SYSTEMS ORGANIZATIONAL MAINTENANCE

Course Number: C-602-3393.

Location: Air Maintenance Training Detachment, Lakehurst, NJ; Air Maintenance Training Detachment, Imperial Beach, CA.

Length: 2 weeks (72 hours).

Exhibit Dates: 3/73-1/88.

Objectives: To train enlisted personnel to operate, maintain, and service HH-2D/SH-2D airframe, hydraulic, and flight control systems.

Instruction: Troubleshooting, repairing, and servicing of HH-2D/SH-2D systems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in helicopter systems maintenance and repair (2/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in helicopter systems maintenance and repair (2/74).

NV-1704-0059

BASIC HELICOPTER, CLASS A

(Basic Helicopter, Class C)

Course Number: C-600-2010.

Location: Air Technical Training Center, Memphis, TN.

Length: 5-8 weeks (197-312 hours).

Exhibit Dates: 10/65-5/83.

Objectives: To train selected Navy and Marine Corps enlisted personnel to repair helicopters.

Instruction: Lectures and practical experience in basic helicopter flight, turboshaft power plant and transmission, flight control systems, preflight and postflight inspections, troubleshooting, safety regulations, single- and tandem-rotor helicopters.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in basic helicopter theory and maintenance (2/81).

NV-1704-0060

CH-46A ROTORS AND RELATED SYSTEMS MAINTENANCE

Course Number: None.

Location: Air Maintenance Training Detachment, Jacksonville, NC; Air Maintenance Training Detachment, Santa Ana, CA.

Length: 3 weeks (112 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train maintenance personnel in the mechanics of rotor systems.

Instruction: Lectures and practical exercises in organizational maintenance, troubleshooting, flight control, and maintenance of utility systems and components.

Credit Recommendation: In the vocational certificate category, 2 semester hours in rotor systems maintenance (2/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in rotor systems maintenance (2/74).

NV-1704-0061

UH2-A/B POWER PLANT, TRANSMISSION, FUEL, ROTOR AND RELATED SYSTEMS MAINTENANCE

Course Number: None.

Location: Air Maintenance Training Detachment, Lakehurst, NJ; Air Maintenance Training Detachment, Ream Field, CA.

Length: 3 weeks (104 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To provide maintenance personnel with training in the latest servicing and repair procedures for T-58 helicopters.

Instruction: Lectures and practical exercises in the maintenance of helicopter power plant, transmission, fuel, rotor, and related systems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in rotorcraft turbine engine maintenance and repair (2/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in rotorcraft turbine engine maintenance and repair (2/74).

NV-1704-0062

H-53 ROTOR AND RELATED SYSTEMS ORGANIZATIONAL MAINTENANCE

Course Number: C-601-3441.

Location: Air Maintenance Training Detachment, Santa Ana, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train enlisted personnel to repair the H-53 rotor system and its components.

Instruction: Lectures and practical exercises in rotor system management and maintenance management.

Credit Recommendation: In the vocational certificate category, 3 semester hours in helicopter organizational maintenance (2/74).

NV-1704-0063

H-53 HYDRAULIC SYSTEMS ORGANIZATIONAL MAINTENANCE

Course Number: None.

Location: Air Maintenance Training Detachment, Santa Ana, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train maintenance personnel in the latest maintenance and service procedures for H-53 hydraulic systems.

Instruction: Lectures and practical exercises in the fundamentals of operation and maintenance of the basic hydraulic, utility hydraulic, flight control hydraulic, rotor brake, rotor damper, cargo winch, and engine start systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in CH-53 hydraulic system organizational maintenance on the basis of institutional evaluation (2/74).

NV-1704-0064

UH34D AIRFRAME, HYDRAULICS AND FLIGHT CONTROLS

Course Number: None.

Location: Air Maintenance Training Detachment, Santa Ana, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train maintenance personnel to repair and service UH34D helicopter airframe, hydraulics, and flight control systems.

Instruction: Lectures and practical exercises in the maintenance, repair, and troubleshooting of air frame structure and power-transmission, hydraulic, and flight control systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in aircraft, hydraulic, and flight control system maintenance on the basis of institutional evaluation (2/74).

NV-1704-0065

A-4M AIRCRAFT MECHANICS

Course Number: C-600-3718.

Location: Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Beaufort, SC.

Length: 2 weeks (80 hours).

Exhibit Dates: 3/72-1/88.

Objectives: To train aircraft maintenance personnel to perform organizational maintenance on the A-4M aircraft.

Instruction: Lectures and practical exercises in the maintenance of A-4M aircraft, including airframe systems, power plants and related systems; engine trim and inspection procedures.

Credit Recommendation: In the vocational certificate category, 1 semester hour in basic aircraft maintenance (2/74).

NV-1704-0066

S-2D/E AIRFRAMES AND HYDRAULICS SYSTEMS MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA; Air Maintenance Training Detachment, Key West, FL.

Length: 2 weeks (80 hours).

Exhibit Dates: 4/67-1/88.

Objectives: To provide maintenance personnel with instruction on the maintenance of S-2D/E airframes and hydraulics systems.

Instruction: Lectures and practical exercises on the operation of hydraulic power units, alighting gear, hydraulically operated flight controls, accessory systems, maintenance of airframes, and inspection procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in airframe and hydraulic fundamentals laboratory (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in airframe and hydraulic fundamentals laboratory (3/74).

NV-1704-0067

P-3 FLIGHT ENGINEERS OPERATIONAL MAINTENANCE, NO. 5

Course Number: Not available.

Location: Air Maintenance Training Detachment, Patuxent River, MD.

Length: 5 weeks (200 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train flight crewmen in total systems and subsystems operation and in-flight maintenance procedures.

Instruction: Practical experience in operation and maintenance of electrical, autopilot, navigational, airframe structures, hydraulic, flight control, air conditioning and pressurization, utility, power plant, armament, and electronic systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in P-3 flight engineering on the basis of institutional evaluation (3/74).

NV-1704-0068

1. AVIATION ELECTRICIAN'S MATE, CLASS A
2. AVIATION ELECTRICIAN'S MATE, CLASS A
3. AVIATION ELECTRICIAN'S MATE, CLASS A
   (Aviation Electrician's Mate I (Instrument), Class A)
4. AVIATION ELECTRICIAN'S MATE I (INSTRUMENT), CLASS A
   (Aviation Electrician Conversion)

Course Number: C-602-2012.

Location: Air Technical Training Center, Memphis, TN; Air Technical Training Center, Jacksonville, FL.

Length: *Version 1:* 9-12 weeks (356 hours). *Version 2:* 15-16 weeks (478 hours). *Version 3:* 22 weeks (872-880 hours). *Version 4:* 15 weeks (600 hours).

Exhibit Dates: *Version 1:* 2/76-11/88. *Version 2:* 4/74-1/76. *Version 3:* 9/59-3/74. *Version 4:* 4/57-8/59.

Objectives: To train enlisted personnel in the maintenance of aircraft instruments and electrical systems.

Instruction: For this course after 11/88 see NV-1714-0051. *All Versions:* Lectures and practical exercises in DC and AC circuits, vacuum tubes, rectifiers, filters, amplifiers, basic test instruments, electrical indicating systems, fuel quantity systems, compasses, automatic pilots, instrument checks and troubleshooting. *Version 3:* Includes basic mathematics, hand tools for circuit fabrication, synchros, basic transistor theory, computer fundamentals, AC voltage regulators, AC power distribution, inverters, ignition systems, and auxiliary power plants.

Credit Recommendation: *Version 1:* In the vocational certificate category, 7 semester hours in aircraft electrical/instrumentation systems (2/81); in the lower-division baccalaureate/associate degree category, 2 semester hours in basic electronics (2/81). *Version 2:* In the vocational certificate category, 5 semester hours in electronics or electrical circuit theory and 2 in electronics laboratory (6/75); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics or electrical circuit theory (6/75); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics or electrical circuit theory, 1 in electronics laboratory (6/75); in the upper-division baccalaureate category, 1 semester hour in electronics laboratory for non-engineering students (6/75). *Version 3:* In the vocational certificate category, 12 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74). *Version 4:* In the vocational certificate category, 9 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

NV-1704-0069

RA-5C ELECTRICAL AND INDICATING SYSTEMS ORGANIZATIONAL MAINTENANCE

Course Number: C-602-3745.

Location: Air Maintenance Training Detachment, Albany, GA.

Length: 4 weeks (160 hours).

Exhibit Dates: 7/69-Present.

Objectives: To train maintenance personnel to repair aircraft electrical and indicating systems.

Instruction: Lectures and practical exercises in the organizational maintenance of aircraft electrical and indicating systems, including electrical power systems, lighting and radome fold systems, engine instruments and control systems, and hydraulic and pneumatic power systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory (3/74).

NV-1704-0070

AVIATION ELECTRICIAN'S MATE M (ELECTRICIAN), CLASS A
(Aviation Electrician Conversion)

Course Number: None.

Location: Air Technical Training Center, Jacksonville, FL.

Length: *Version 1:* 22 weeks (880 hours). *Version 2:* 15-19 weeks (600-732 hours).

Exhibit Dates: *Version 1:* 1/59-12/68. *Version 2:* 4/57-12/58.

Objectives: To train enlisted personnel to inspect, test, and repair aircraft instruments, and electrical systems.

Instruction: *All Versions:* Lectures and practical exercises in fundamentals of AC and DC circuits, vacuum tubes, rectifiers, filters, amplifiers, basic test instruments, DC and AC machinery and systems, electrical tests and troubleshooting, electrical components, wiring diagrams, and lighting circuits. *Version 1:* Includes airman training, basic math and physics, and hand tools and soldering.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in electricity (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity for electronics majors, 4 for nonmajors (3/74); in the upper-division baccalaureate category, 3 semester hours in electricity, and credit in electrical laboratory on the basis of institutional examination (12/68). *Version 2:* In the vocational certificate category, 9 semester hours in electricity (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity for electronics majors, 6 for nonmajors (3/74); in the upper-division baccalaureate category, 3 semester hours in electricity, and credit in electrical laboratory on the basis of institutional evaluation (12/68).

NV-1704-0071

KC-130F ELECTRICAL SYSTEMS ORGANIZATIONAL MAINTENANCE
(KC-130F Electrical Systems and Circuits Maintenance)

Course Number: Not available.

Location: Air Maintenance Training Detachment, El Toro, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train maintenance personnel to maintain and operate the KC-130F aircraft's electrical and instrument systems.

Instruction: Lectures and practical exercises in the maintenance of electrical and instrument systems applicable to the KC-130F aircraft, including AC and DC power distribution, electrical system, utility circuits, components, power plant and propeller circuits, and troubleshooting.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electrical systems (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical systems (3/74).

NV-1704-0072

P-3 ELECTRICAL COMPONENTS INTERMEDIATE MAINTENANCE
(P-3 Electrical Systems Intermediate Maintenance)

Course Number: C-102-3560.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, Jacksonville, FL.

Length: *Version 1:* 5 weeks (200 hours). *Version 2:* 4 weeks (160 hours).

Exhibit Dates: *Version 1:* 3/81-Present. *Version 2:* 3/73-2/81.

Objectives: To train enlisted personnel to maintain, operate, and service P-3 aircraft electrical systems at the intermediate level.

Instruction: *Version 1:* Lectures and practical exercises in the maintenance of the P-3 aircraft electrical systems including lighting, the propeller syncrophasing system, generators, voltage regulators, signal light controls, AOA and TAS indicators and troubleshooting with an oscilloscope. *Version 2:* Lectures and practical exercises in the maintenance of the P-3 aircraft electrical systems, including, lighting, indicators, propeller synchrophasing system, generators, voltage regulators, oscilloscope, and controls.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in avionics (7/81); in the lower-division baccalaureate/associate degree category, 1 semester hour in avionics technology or electronics technology (7/81). *Version 2:* In the vocational certificate category, 3 semester hours in electricity (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory (3/74).

NV-1704-0073

P-3 Electrical System Organizational Maintenance

(P-3 Electrical System Maintenance, No. 12)

Course Number: Not available.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.

Length: 4-5 weeks (160-200 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train enlisted personnel to operate, maintain, and service aircraft electrical systems.

Instruction: Lectures and practical exercises in aircraft electrical systems operation, maintenance, and servicing, including power supplies, power distribution, lighting, starters, hydraulic controls, instruments, and flight controls circuit analysis and maintenance procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electricity (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory (3/74).

NV-1704-0074

F-4J Communication, Navigation, Identification (CNI) Line Troubleshooting Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Cherry Point, NC.

Length: 6 weeks (160 hours).

Exhibit Dates: 8/70-Present.

Objectives: To train maintenance personnel to perform line maintenance on F-4J CNI systems.

Instruction: Lectures and laboratories in system familiarization, communications, navigation systems, use of associated test equipment, and line maintenance.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1704-0075

RA-5C Communication, Navigation, Identification (CNI) and DECM Organizational Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Sanford, FL.

Length: 3 weeks (120 hours).

Exhibit Dates: 9/68-1/88.

Objectives: To train fleet maintenance personnel to maintain CNI and DECM systems and related test sets.

Instruction: Lectures and practical exercises in communication, navigation, and identification systems familiarization; CNI organizational maintenance; and DECM organizational maintenance.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1704-0076

F-4B Communication, Navigation, Identification (CNI) Line Troubleshooting Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Cherry Point, NC.

Length: 4 weeks (160 hours).

Exhibit Dates: 3/71-1/88.

Objectives: To train maintenance personnel to operate and maintain the F-4B CNI line systems.

Instruction: Lectures and practical exercises in the operation and maintenance of the F-4B CNI line systems, including block-diagram analysis, components, power supply, transceiver, navigation set components and navigational computer, basic IFF/SIF theory, associated transponder and altimeter sets, introduction to line maintenance applications, and system check-out.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1704-0077

CH-46A Electrical and Instrument Systems

Course Number: Not available.

Location: Air Maintenance Training Detachment, Jacksonville, NC; Air Maintenance Training Detachment, Santa Ana, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train maintenance personnel to operate and maintain the CH-46A electrical and instrument systems.

Instruction: Lectures and practical exercises in the operation and maintenance of the CH-46A electrical and instrument systems, including main generating system, auxiliary and DC systems of electrical power supply, starting and control systems, utility electric systems (light, fire extinguisher, wipers, pedal, heating and ventilation, brake, hydraulic, and ice protection), and instruments and indication systems analyses.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1704-0078

A-6A Maintenance Supervisors Familiarization

Course Number: C-000-3763.

Location: Air Maintenance Training Detachment, Dam Neck, VA; Air Maintenance Training Detachment, Whidbey Island, WA.

Length: 2 weeks (80 hours).

Exhibit Dates: 8/70-1/88.

Objectives: To familiarize supervisory personnel with the systems of the A-6A aircraft.

Instruction: Lectures and practical exercises in the operation of the A-6A aircraft, including system familiarization, analysis of hydraulic power and distribution, power plant and fuel systems, environmental system, general avionics systems, and navigational and attack systems; and planned maintenance techniques.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1704-0079

A-7A/B Electrical and Instrument Systems Organizational Maintenance

(A-7 Electrical and Instrument Systems Organizational Maintenance)

Course Number: C-602-3781.

Location: Air Maintenance Training Detachment, Cecil Field, Fl. *Version 2:* Air Maintenance Training Detachment, Lemoore, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: *Version 1:* 4/75-Present. *Version 2:* 1/71-3/75.

Objectives: To train maintenance personnel to maintain and operate the electrical and instrument systems of the A-7 aircraft.

Instruction: Lectures and practical exercises in the maintenance and operation of the electrical and instrument systems of the A-7 aircraft, including power supply and distribution, engine and related circuitry, aircraft fuel circuits, electrically controlled hydraulic systems, lighting circuits, approach-attitude indication and compensation, air data computer, and instrumentation.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in aviation electricity, 1 in electrical laboratory for non-electrical engineering students (3/82). *Version 2:* In the vocational certificate category, 3 semester hours in electricity, 1 in electrical laboratory (4/74).

NV-1704-0080

A-7E Electrical and Instrument Systems Organizational Maintenance

Course Number: C-602-3791.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL.

Length: 2 weeks (80 hours).

Exhibit Dates: *Version 1:* 5/76-Present. *Version 2:* 7/70-4/76.

Objectives: To train maintenance personnel to operate and maintain the electrical and instrument systems of the A-7E aircraft.

Instruction: Lectures in aircraft power distribution and electrical power supplies, aircraft instrument and lighting systems, electrohydraulic and utility systems, and power plant related systems.

Credit Recommendation: *Version 1:* Credit is not recommended because of the limited, specialized nature of the course (3/82). *Version 2:* In the vocational certificate category, 3 semester hours in electricity, 1 in electrical laboratory (4/74).

NV-1704-0081

E-2A Aviation Electrician Organizational Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 4/68-1/88.

Objectives: To train aviation electricians to troubleshoot, repair, and maintain the electrical systems of E-2A aircraft.

Instruction: Lectures and practical exercises in the troubleshooting, repair, and maintenance of the electrical systems of E-2A aircraft, including AC and DC power distribution systems, motors and generators, limited electronic circuit theory, utility and environmental systems, flight control systems, engine electric systems, automatic flight control system operation, pitch feel system, maximum rudder system, air data computer, and compass and inertial navigation systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electricity or electronics, and additional credit in electricity or electronics on the basis of institutional evaluation (4/74).

NV-1704-0082

SP-2H SYSTEMS FAMILIARIZATION, PLANE CAPTAINS

Course Number: Not available.

Location: Air Maintenance Training Detachment, Jacksonville, FL.

Length: 5 weeks (192 hours).

Exhibit Dates: 2/68-1/88.

Objectives: To train plane captains to operate SP-2H aircraft systems.

Instruction: Lectures and practical exercises in the operation of SP-2H aircraft systems, including DC electrical distribution system, power plants and related systems assemblies and components, engine analysis of specific equipment, hydraulics and airframes, flight control, AC systems, engine starter and fire detection, propeller control system, and armament systems operation.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory (4/74).

NV-1704-0083

SH-3A ELECTRICAL SYSTEMS MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, Ream Field, CA; Air Maintenance Training Detachment, Key West, FL.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train maintenance personnel to maintain and service the electrical systems of the SH-3A helicopter.

Instruction: Lectures and practical exercises in the maintenance of the electrical systems of the SH-3A helicopter, including AC and DC power systems components and analysis, power plant systems, hydraulic systems, blade fold system, fuel systems, utility systems, and miscellaneous systems operation and testing.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory (4/74).

NV-1704-0084

A-7A/B ARMAMENT SYSTEM ORGANIZATIONAL MAINTENANCE (A-7 Armament Systems Maintenance)

Course Number: C-646-3781.

Location: Air Maintenance Training Detachment, Cecil Field, FL; Air Maintenance Training Detachment, Lemoore, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 4/68-1/79.

Objectives: To train maintenance personnel to operate and maintain the A-7 armament system.

Instruction: Lectures and practical exercises in the operation and maintenance of the A-7 armament system, including fuselage stations, mechanical and electrical instruction, wing pylons and associated equipment assembly and installation, armament systems control and sequencing, electrical fuzing system, internal gun system components, and testing procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1704-0085

A-6A ENVIRONMENTAL, ESCAPE AND SURVIVAL SYSTEMS ORGANIZATIONAL MAINTENANCE

Course Number: C-602-3763.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.

Length: 3 weeks (120 hours).

Exhibit Dates: 3/68-1/88.

Objectives: To train maintenance personnel to operate and maintain the environmental, escape, and survival systems of the A-6A aircraft.

Instruction: Lectures and practical exercises in general aircraft familiarization; inspections, trouble shooting procedures, and maintenance of escape and survival systems, environmental control systems, and oxygen systems; and use of special tools and ground support equipment.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1704-0086

S-2D/E ELECTRICAL AND INSTRUMENTS MAINTENANCE, NO. 6

Course Number: Not available.

Location: Air Maintenance Training Detachment, Key West, FL; Air Maintenance Training Detachment, North Island, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/70-1/88.

Objectives: To train maintenance personnel to maintain and operate electrical and instrument systems of S-2D/E equipment.

Instruction: Lectures and practical exercises in the maintenance and operation of electrical and instrument systems of S-2D/E equipment, including components, operation, and troubleshooting of power supply, engine controls and accessories, structural control, heating and de-icing, fuel control, and light and instrument systems.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electrical laboratory (4/74).

NV-1704-0087

AVIATION STRUCTURAL MECHANIC H (HYDRAULICS), CLASS B

Course Number: C-602-2018.

Location: Air Technical Training Center, Memphis, Millington, TN.

Length: 12-13 weeks (488-504 hours).

Exhibit Dates: 10/65-1/88.

Objectives: To train personnel to perform as aviation hydraulic systems mechanics.

Instruction: Lectures and practical exercises in aircraft repair, including utilization and interpretation of schematic drawings, fundamentals of electricity, technical publications, maintenance management, inspection procedures, corrosion control, aircraft hydraulics, and related maintenance.

Credit Recommendation: In the vocational certificate category, 10 semester hours in aircraft hydraulic systems mechanics (6/75); in the lower-division baccalaureate/associate degree category, 5 semester hours in aircraft hydraulic systems mechanics (6/75).

NV-1704-0088

A-6A ELECTRICAL SYSTEMS MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Whidbey Island, WA.

Length: 5 weeks (200 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train maintenance personnel with knowledge of transistors to test, troubleshoot and repair electrical and instrument systems of A-6A aircraft.

Instruction: Lectures and practical exercises in the testing, troubleshooting and repair of electrical and instrument systems of A-6A aircraft, including description, operation and components of AC power supply and control, AC/DC power distribution, emergency electrical power, constant speed drive/starter and engine control, fuel, auxiliary instrument, lighting, and remote indication compass systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical or electronics laboratory (4/74).

NV-1704-0089

P-3C INTEGRATED ELECTRICAL SYSTEMS ORGANIZATIONAL MAINTENANCE

Course Number: C-602-3571.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, Jacksonville, FL.

Length: 7-8 weeks (280-320 hours).

Exhibit Dates: 11/72-Present.

Objectives: To train maintenance personnel who are familiar with P-3 aircraft systems to inspect, operate, repair, and replace the assemblies and units of the P-3C electrical systems, ASN-84 inertial navigational system, and ASW-31 autopilot.

Instruction: Lectures and practical exercises in the inspection, operation, repair, and replacement of the assemblies and units of the P-3C electrical systems, ASN-84 inertial navigation system, and ASW-31 autopilot, including electrical power, lighting, and engine controls; fuel, oil, propeller, and fire detection systems; instruments, hydraulics; landing gear; ice control systems and miscellaneous circuits; and specific equipment description and component analysis.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electrical laboratory (7/81).

NV-1704-0090

UH-2C Electrical System
Organizational Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Imperial Beach, CA.

Length: 2-3 weeks (80-120 hours).

Exhibit Dates: 8/68-1/88.

Objectives: To train maintenance personnel to maintain and service electrical systems and components of UH-2 helicopters.

Instruction: Lectures and practical exercises in the maintenance of electrical systems and components of UH-2 helicopters, including components and operation of DC and AC power supply, lighting systems, power plant systems, utility system, and engine and flight instruments; and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electrical laboratory (4/74).

NV-1704-0091

UH-2A/B Electrical System
Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Ream Field, CA; Air Maintenance Training Detachment, Lakehurst, NJ.

Length: 3 weeks (100-104 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train fleet maintenance personnel who have aviation electrical experience and knowledge of transistors to operate and maintain the electrical components of the UH-2A/B helicopter.

Instruction: Lectures and practical exercises in the operation and maintenance of the electrical components of the UH-2A/B helicopter, including AC and DC power supply, lighting systems, related power plant systems components and troubleshooting, utility systems operation, engine and flight instruments, and miscellaneous systems analyses.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electrical laboratory (4/74).

NV-1704-0092

F-4B Electrical Systems
Organizational Maintenance
(F-4B Aircraft Electrical System Organizational Maintenance)

Course Number: C-602-3808.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Cherry Point, NC.

Length: 7-8 weeks (280-320 hours).

Exhibit Dates: 10/67-1/88.

Objectives: To train enlisted personnel to operate and maintain F-4B aircraft electrical systems.

Instruction: Lectures and practical exercises in the operation and maintenance of F-4B aircraft electrical systems, including functional analysis, systems integration, analysis and components of the automatic flight control system, air data computer set, loft bomb release computer set, power-generating system, approach power compensator system, fuel system, and test equipment for electrical and instrument systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electricity, 1 in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory (4/74).

NV-1704-0093

E-2A Electrical and Instruments
Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train aviation electricians to troubleshoot, repair, and maintain E-2A aircraft electrical and instrument systems.

Instruction: Lectures and practical exercises in the troubleshooting, repair, and maintenance of the electrical and instrument systems incorporated in E-2A aircraft, including AC and DC power systems; utility, environmental, instruments, and miscellaneous systems components and operation; flight controls and related systems; and engine electrical and related systems and subsystems.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electrical laboratory (4/74).

NV-1704-0094

F-4J Electrical Systems
Organizational Maintenance
(F-4J Aircraft Electrical System Organizational Maintenance)

Course Number: C-602-3815.

Location: Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Cherry Point, NC; Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Cherry Point, NC.

Length: 7-9 weeks (280-376 hours).

Exhibit Dates: 10/67-1/88.

Objectives: To train enlisted personnel to maintain the electrical systems in the F-4J aircraft.

Instruction: Lectures and practical exercises in the maintenance of the electrical systems in the F-4J aircraft, including functional analysis, operation, systems integration and planned maintenance procedures on the electrical and instrument systems, automatic flight control system, air data computer set, vertical flight reference set, attitude reference bombing computer set, power generating system, approach power compensator system, and data link system.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1704-0095

OV-10A Electrical Systems
Organizational Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Cp. Pendleton, CA.

Length: 2 weeks (64 hours).

Exhibit Dates: 8/68-1/88.

Objectives: To train maintenance personnel to operate, troubleshoot, and maintain electrical systems of the OV-10A aircraft.

Instruction: Lectures and practical exercises in the operation, troubleshooting, and maintenance of the electrical systems of the OV-10A aircraft, including DC and AC power systems (sources and distribution), lighting systems, instrumentation, power plant electrical systems, hydraulic and control surface systems, and miscellaneous electrical systems.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1704-0096

SH-3 Automatic Stabilization
Equipment Organizational
Maintenance

Course Number: C-601-3398.

Location: Air Maintenance Training Detachment, Key West, FL; Air Maintenance Training Detachment, Imperial Beach, CA; Air Maintenance Training Detachment, Quonset Point, RI.

Length: 3 weeks (104-120 hours).

Exhibit Dates: 9/69-1/88.

Objectives: To train maintenance personnel to maintain the SH-3 helicopter's automatic stabilization equipment.

Instruction: Lectures and practical exercises in the maintenance of the SH-3 helicopter's automatic stabilization equipment, including flight theory, flight controls, primary and auxiliary hydraulic systems and servos, power control, pitch channel (signal path, vertical gyros, monitor panel, lag-amplifier, and line test set), yaw channel and synchronizer, collective channel, hover indicator, cyclic and collective coupler system and components, and troubleshooting and test procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory (4/74).

NV-1704-0097

A-6/KA-6D Electrical Power Systems
Intermediate Maintenance

Course Number: C-602-3762.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.

Length: 2 weeks (64 hours).

Exhibit Dates: 3/73-1/88.

Objectives: To train maintenance personnel to test and repair the electrical power generating system of the A-6A/KA-6D aircraft.

Instruction: Lectures and practical exercises in the testing and repair of the electrical power generating system of the A-6A/KA-6D aircraft, including review of electrical theory, operation of AC power supply and control system components, emergency electrical power system, and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory (4/74).

NV-1704-0098

A-4E Bombing System AN/AJB-3A and
Remote Standby Indicator
System (Organizational)

Course Number: C-602-0050.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Beaufort, SC.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/70-1/88.

Objectives: To train maintenance personnel who are familiar with A-4 systems and transistor fundamentals to operate and maintain the AN/AJB-3A bombing system and the remote standby attitude-indicating systems.

Instruction: Lectures and practical exercises in the operation and maintenance of the AN/AJB-3A bombing system and the remote standby attitude-indicating systems, including operation of the displacement gyroscope, attitude-direction indicator, compass adapter, bomb release computer, and power supply; system analysis (circuits and channels), boresighting and compass swinging, line testing and troubleshooting procedures, and operation and testing of the remote standby indicating system.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1704-0099

RA-5C Electrical and Indicating
Systems (Intermediate
Maintenance)

Course Number: Not available.

Location: Air Maintenance Training Detachment, Sanford, FL.

Length: 6 weeks (240 hours).

Exhibit Dates: 9/67-1/88.

Objectives: To train maintenance personnel who are familiar with RA-5C aircraft systems to operate and maintain the RA-5C electrical and indicating systems at the intermediate level.

Instruction: Lectures and practical exercises in the operation and maintenance of the RA-5C aircraft electrical and indicating systems, including power control; generators; transformers; DC power supply; emergency power; lighting and radome fold system components; engine instruments and control systems; fuel, hydraulic, and pneumatic power systems; heating and vent operation; and pressurization and air-conditioning systems.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory (4/74).

NV-1704-0100

A-6A Electrical Systems
Organizational Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.

Length: 6 weeks (240 hours).

Exhibit Dates: 2/70-1/88.

Objectives: To train maintenance personnel who have backgrounds in basic transistors to maintain, test, and troubleshoot the A-6A electrical, instrument, and automatic flight control systems.

Instruction: Lectures and practical exercises in the maintenance, testing, and troubleshooting of the A-6A electrical, instrument, and automatic flight control systems, including power supply and control system components and operation (AC and DC systems), fuel management and indicating system; auxiliary systems components, operation and testing; aircraft instrument, environmental control, and compass systems; automatic flight principles, air data computer block diagram and operation, signal flow, interlocks and check-out procedures, and use of test equipment.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory (4/74).

NV-1704-0101

P-3A/B Integrated Electrical System
Organizational Maintenance
(P-3 Integrated Electrical System Organizational Maintenance)

Course Number: C-602-3535.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, Jacksonville, FL.

Length: 6-7 weeks (264-280 hours).

Exhibit Dates: *Version 1:* 6/81-Present. *Version 2:* 11/72-5/81.

Objectives: To train maintenance personnel who are familiar with P-3 aircraft systems and transistor fundamentals to operate, test, and maintain the P-3 integrated electrical system.

Instruction: Lectures and practical exercises in the operation, testing, and maintenance of the P-3 integrated electrical system, including power generation and distribution, control panel, automatic flight control system, attitude-heading reference system, navigational computer operation, instruments and hydraulics, fuel, oil, and propeller systems, and troubleshooting procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in electrical laboratory (7/81). *Version 2:* In the vocational certificate category, 4 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory (4/74).

NV-1704-0102

A-4M Electrical Systems
Organizational Maintenance

Course Number: C-602-3737.

Location: Air Maintenance Training Detachment, Beaufort, SC.

Length: 7 weeks (280 hours).

Exhibit Dates: 10/72-1/88.

Objectives: To train maintenance personnel to test and maintain the A-4M aircraft.

Instruction: Lectures and practical exercises in the testing and maintenance of the A-4M aircraft, including electrical and instrument systems, automatic flight control system components and theory of operation, navigational computer components and theory of operation, electrical power system, utility circuits, and troubleshooting procedures.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (4/74).

NV-1704-0103

OV-10A Flight Control and
Hydraulic Systems
Organizational Maintenance

Course Number: C-602-3521.

Location: Air Maintenance Training Detachment, Cp. Pendleton, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 2/69-1/88.

Objectives: To train maintenance personnel to operate, troubleshoot, and maintain the flight control and hydraulic systems of specific equipment.

Instruction: Lectures and practical exercises in the operation, troubleshooting, and maintenance of the flight control and hydraulic systems of specific equipment, including various control systems operation and rigging, hydraulic power control, wheel brake system, and aircraft corrosion control.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (4/74).

NV-1704-0104

F/RF-4B Aircraft Electrical Systems
Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, El Toro, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train maintenance personnel to operate, test, and repair F-4 aircraft electrical systems.

Instruction: Lectures and practical exercises in the operation, testing, and repair of F-4 aircraft electrical systems, including AC and DC electrical generation systems, power control, circuit analysis, flight controls, fuel and oxygen quantity gauging systems, air induction system, test equipment, and troubleshooting techniques.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory (4/74).

NV-1704-0105

AH-1J Electrical Organizational
Maintenance

Course Number: C-602-3353.

Location: Air Maintenance Training Detachment, Cp. Pendleton, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train maintenance personnel to repair, check, and maintain the AH-1J electrical system.

Instruction: Lectures and practical exercises in the operation and maintenance of the AH-1J electrical system, including DC electrical systems, AC power supply, fuel system and instruments, warning and detection circuits, lighting circuits, and environmental control system.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory (4/74).

NV-1704-0106

F-4B/J Egress and Environmental
Control Systems Organizational
Maintenance
(F-4B/J Egress and Environmental Control Systems Maintenance)

Course Number: C-602-3806.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Cherry Point, NC.

Length: 2 weeks (96 hours).

Exhibit Dates: 10/67-1/88.

Objectives: To train maintenance personnel to maintain and service the egress and environmental control systems of the F-4B/J aircraft at the intermediate level.

Instruction: Lectures and practical exercises in the maintenance of the egress and environmental control systems of the F-

4B/J aircraft, including corrosion control, specific ejection equipment, components and operation of the basic pneumatic and canopy system, equipment installation, bleed air systems, pressurization and air-conditioning systems components and operation, and troubleshooting procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1704-0107

SP-2E Systems Familiarization, Plane Captains

Course Number: Not available.

Location: Air Maintenance Training Detachment, Jacksonville, FL.

Length: 5 weeks (192 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To train plane captains to operate the SP-2E aircraft systems.

Instruction: Lectures and practical exercises in the operation of the SP-2E aircraft systems, including power plants and related systems breakdowns, hydraulics and airframes, power systems and components, flight control systems, electrical systems (including AC and DC power distribution and generator systems), propeller operation, aircraft instrumentation, armament system, and troubleshooting techniques.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory (4/74).

NV-1704-0108

A-6A Electrical Systems Intermediate Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.

Length: 4 weeks (160 hours).

Exhibit Dates: 3/70–1/88.

Objectives: To train maintenance personnel who have had previous training in transistor fundamentals to test, troubleshoot, and repair electrical and instrument systems of the A-6A aircraft at the intermediate level.

Instruction: Lectures and practical exercises in the testing, troubleshooting, and repair of the electrical and instrument systems of the A-6A aircraft, including electrical power systems, auxiliary electrical systems, constant speed drive/starter system operation, MA-1 compass system, and approach power compensator system operation and components.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electrical laboratory (4/74).

NV-1704-0109

Aviation Support Equipment GTCP-100 and Enclosures Intermediate Maintenance

(Aviation Support Equipment GTCP-100 Engine Intermediate Maintenance)

Course Number: C-602-3212.

Location: Air Maintenance Training Detachment, Jacksonville, FL; Air Maintenance Training Detachment, North Island, CA.

Length: 2–3 weeks (80–120 hours).

Exhibit Dates: *Version 1:* 7/73–Present. *Version 2:* 9/70–6/73.

Objectives: To train aviation support technicians to maintain GTCP-100 engines.

Instruction: *All Versions:* Lectures and practical exercises in GTCP-100 engine maintenance, including engine description, cold-section theory, hot-section theory, lubrication system, electrical system, fuel system, air control system, and test equipment operation. *Version 1:* Includes disassembly, inspection and repair of the GTCP-100 engine.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in ground operational equipment (3/82); in the lower-division baccalaureate/associate degree category, 1 semester hour in electricity/electrical laboratory (3/82). *Version 2:* Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1704-0111

Aviation Support Equipment Technician, Class A (Electrical Specialty)

Course Number: C-602-2019.

Location: Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN.

Length: *Version 1:* 7–10 weeks (304 hours). *Version 2:* 9–12 weeks (376–496 hours). *Version 3:* 11–12 weeks (437–464 hours).

Exhibit Dates: *Version 1:* 6/75–7/89. *Version 2:* 1/70–5/75. *Version 3:* 5/66–12/69.

Objectives: To train enlisted personnel to maintain and repair aircraft support equipment.

Instruction: *All Versions:* Lectures and practical exercises in aircraft support equipment maintenance and repair, including aviation support equipment introduction, electrical and electronic fundamentals, generator and motor fundamentals, and electrical maintenance on aircraft support vehicles. *Version 1:* Instruction includes air-conditioning systems maintenance. *Version 2:* Instruction includes air-conditioning systems maintenance.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in troubleshooting electrical control systems (2/81). *Version 2:* In the vocational certificate category, 6 semester hours in aircraft support, 4 in aircraft support equipment maintenance (4/74). *Version 3:* In the vocational certificate category, 1 semester hour in physics, 2 in electricity or electronics, 4 in aircraft support equipment maintenance (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electromechanical technology (4/74).

NV-1704-0112

Aviation Support Equipment Technician, Class A (Hydraulic Specialty)

Course Number: Not available.

Location: Air Technical Training Center, Memphis, TN.

Length: 9–12 weeks (376–464 hours).

Exhibit Dates: 5/66–1/88.

Objectives: To train enlisted personnel as aviation support equipment technicians.

Instruction: Lectures and practical exercises in aviation support equipment operation and maintenance, reciprocating engines and associated equipment, tune-up and inspection techniques, diesel engines and related auxiliary equipment, and compressor operation.

Credit Recommendation: In the vocational certificate category, 6 semester hours in aircraft support (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in aeronautical technology, 3 in mechanical technology (5/74).

NV-1704-0113

Aviation Support Equipment Technician, Class A (Mechanical Speciality)

Course Number: Not available.

Location: Air Technical Training Center, Memphis, TN.

Length: 9–12 weeks (376–464 hours).

Exhibit Dates: 5/66–2/77.

Objectives: To train enlisted personnel to maintain aviation support equipment.

Instruction: Lectures and practical exercises in aviation support equipment maintenance and administration, including chassis maintenance and metal repair; frames, axles, and similar components; metal working; welding and painting; fluidic systems and brake systems maintenance; and pneumatic and cryogenic systems maintenance.

Credit Recommendation: In the vocational certificate category, 6 semester hours in aircraft support (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in aeronautical technology, 3 as an elective in mechanical technology (5/74).

NV-1704-0114

SH-3 Electrical Systems Organizational Maintenance

(SH-3A/D Electrical Systems Organizational Maintenance)

Course Number: C-602-3397.

Location: Air Maintenance Training Detachment, Jacksonville, FL; Air Maintenance Training Detachment, North Island, CA; Air Maintenance Training Detachment, Quonset Point, RI; Air Maintenance Training Detachment, Imperial Beach, CA.

Length: 4–5 weeks (144–160 hours).

Exhibit Dates: *Version 1:* 9/81–Present. *Version 2:* 8/71–8/81.

Objectives: To train maintenance personnel to maintain the electrical systems of SH-3 helicopters.

Instruction: Lectures and practical exercises in the maintenance and repair of the electrical systems of SH-3 helicopters, including power supply system, power plant/main gearbox and related systems, miscellaneous and utility systems, rotor-actuating systems, fuselage fuel system, vertical-gyro operation, hydraulic systems, and automatic bladefold system.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in electricity and electrical laboratory (3/82). *Version 2:* In the vocational certificate category, 2 semester hours in electricity and electrical laboratory (6/74); in the upper-division baccalaureate category, credit in electricity and electrical laboratory on the basis of institutional evaluation (6/74).

NV-1704-0115

Air Intercept Control (Requalification), Class O/C

Course Number: C-2G-2022; C-221-2013.

Location: Air Technical Training Center, Glynco, GA.

Length: 2 weeks (80 hours).

Exhibit Dates: 7/71–1/88.

Objectives: To requalify line officers and senior radarmen as air intercept controllers.

Instruction: Lectures and practical exercises in air intercept control procedures and techniques, including R/T procedures and brevity code, intercept theory, TACAN and broadcast control intercepts, Mk 10 IFF, SIF and AIMS system, lead collision intercept, local operating procedures, SAR, air control system, airborne weapons systems, forward quarter conversion intercept, lead pursuit intercept, actual air control, lead collision reattack intercept, and pattern intercepts.

Credit Recommendation: In the vocational certificate category, 6 semester hours in air traffic control (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in air traffic control (6/74).

NV-1704-0116

Aviation Structural Mechanic E (Safety Equipment) Class C7
(Aviation Structural Mechanic E (Safety Equipment), Class B)

Course Number: C-602-2016.

Location: Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN.

Length: 10-14 weeks (404-420 hours).

Exhibit Dates: 10/65-12/84.

Objectives: To train personnel to perform as aviation safety equipment mechanics.

Instruction: Lectures and practical exercises in aircraft repair, including utilization and interpretation of schematic drawings, fundamentals of electricity; technical publications, maintenance management, inspection procedures, corrosion control, aircraft pressurization, air conditioning, and associated systems; oxygen, fire extinguishing, and life raft release systems; and egress systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in aircraft safety equipment mechanics (2/81).

NV-1704-0117

Air Intercept Control (Supervisor), Class C/O

Course Number: C-2G-2021.

Location: Air Technical Training Center, Glynco, GA.

Length: 4 weeks (160 hours).

Exhibit Dates: 6/71-1/88.

Objectives: To train line officers and radarmen as air intercept controllers.

Instruction: Lectures and practical exercises in air intercept control procedures and techniques, including air intercept control procedures and communications, aircraft operations and weapons systems, practical application of air intercept control procedures, synthetic air intercept control, actual air intercept control, supervision and instruction of air intercept controllers.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/74).

NV-1704-0118

A-6 Plane Captain

Course Number: C-600-3761.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 8/71-1/88.

Objectives: To train enlisted personnel to inspect, service, and maintain A-6 aircraft.

Instruction: Lectures and practical exercises in maintenance and operation of A-6 aircraft. Course includes power plant and aircraft systems; electrical, hydraulic, and flight control systems, and armament systems.

Credit Recommendation: In the vocational certificate category, 4 semester hours in aviation maintenance (6/74).

NV-1704-0119

J52-P6A/8A Engine Intermediate Maintenance/Complete Engine Repair

Course Number: Not available.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Kingsville, TX; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Cherry Point, NC.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/71-1/88.

Objectives: To train fleet maintenance personnel in J52 intermediate maintenance and complete engine repair.

Instruction: Lectures and practical exercises on J52 intermediate maintenance, including basic engine familiarization; engine disassembly, inspection and repair; assembly; testing; repair and preparation for storage; engine component systems; and cleaning and inspection methods.

Credit Recommendation: In the vocational certificate category, 4 semester hours in turbine engine maintenance (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in turbine engine maintenance (6/74).

NV-1704-0120

F-8 Airframes/Hydraulic Systems Organizational Maintenance

Course Number: C-602-3855.

Location: Air Maintenance Training Detachment, Miramar, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 7/69-1/88.

Objectives: To train structural mechanics to perform organizational maintenance on the F-8 aircraft's structures, hydraulic systems, and related equipment.

Instruction: Lectures and practical exercises in the organizational maintenance of the F-8 aircraft's structure, hydraulic systems, and related equipment, including airframes maintenance; maintenance manuals; aircraft description; structural materials used in F-8 construction; corrosion control; power control hydraulic and surface control systems; and utility hydraulic and pneumatic systems.

Credit Recommendation: In the vocational certificate category, 6 semester hours in aircraft hydraulic systems maintenance (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in aircraft hydraulic systems maintenance (6/74).

NV-1704-0121

C-2A Aircraft Familiarization (Pilots)

Course Number: C-00-3491.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 2 weeks (64 hours).

Exhibit Dates: 2/73-1/88.

Objectives: To familiarize aircraft pilots with the C-2A aircraft.

Instruction: Lectures and practical exercises on the C-2A aircraft, including power plant and related systems; airframe, hydraulic, and environmental systems; flight controls; electrical systems; and avionics systems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in aircraft familiarization (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft familiarization (6/74).

NV-1704-0122

F/RF-4B Structures and Hydraulics Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, El Toro, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 3/68-1/88.

Objectives: To train maintenance personnel to maintain and repair the structures and hydraulic systems of the F/RF-4B aircraft at the organizational and intermediate maintenance levels.

Instruction: Lectures and practical exercises in the servicing and maintenance of the structures and hydraulic systems of the F/RF-4B aircraft, including aircraft systems familiarization; corrosion control; pneumatics, hydraulics, and structures; landing gear and related systems; miscellaneous utility hydraulic subsystems; and flight and surface control systems.

Credit Recommendation: In the vocational certificate category, 4 semester hours in structures and hydraulic maintenance (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in structures and hydraulic maintenance (6/74).

NV-1704-0123

T-41-A-2 Engine Intermediate Maintenance/Complete Engine Repair
(TF41-A-2 Engine Intermediate Maintenance/Complete Engine Repair)

Course Number: C-601-3136.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL.

Length: 4 weeks (160 hours).

Exhibit Dates: 8/71-Present.

Objectives: To train fleet maintenance personnel to maintain and repair a specific engine.

Instruction: Lectures and practical exercises in TF41-A-2 engine intermediate maintenance, including engine familiarization, systems, and horizontal maintenance; vertical engine disassembly; inspections, disassembly, and assembly of subassemblies; and vertical engine assembly, final test, and preparation for service and storage.

Credit Recommendation: In the vocational certificate category, 6 semester hours in intermediate engine maintenance (3/82); in the lower-division baccalaureate/associate degree category, 3 semester hours in intermediate engine maintenance (3/82).

NV-1704-0124

SH-3 Airframe and Hydraulic Systems Maintenance

Course Number: D-603-0570.

Location: Air Maintenance Training Detachment, Key West, FL; Air Maintenance Training Detachment, Ream Field, CA.

Length: 4 weeks (120 hours).

Exhibit Dates: 11/67-1/88.

Objectives: To train personnel in SH-3 airframe and hydraulic systems maintenance.

Instruction: Lectures and practical exercises in SH-3 airframe and hydraulic systems maintenance, including SH-3 familiarization, utility hydraulic system, flight controls, auxiliary hydraulic system, preventive maintenance and ground handling, and corrosion control.

Credit Recommendation: In the vocational certificate category, 4 semester hours in helicopter hydraulic system maintenance (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in helicoper hydraulic system maintenance (6/74).

NV-1704-0125

KC-130F T-56-A-7 Turboprop Engine and Related Systems Organizational Maintenance
(KC-130F T-56-A-7 Turboprop Engine and Related Systems Maintenance)

Course Number: Not available.

Location: Air Maintenance Training Detachment, El Toro, CA.

Length: 2 weeks (96 hours).

Exhibit Dates: 6/66-1/88.

Objectives: To train maintenance personnel to repair T-56 turboprop engines and related systems.

Instruction: Lectures and practical exercises in the latest maintenance techniques, modifications, operation of systems, and servicing procedures applicable to the T-56 and related systems of the GV-1 aircraft, including T-56 turboprop engine and related systems, theory, basic power plant, gas turbine compressor, and electrical control circuit of the GTC.

Credit Recommendation: In the vocational certificate category, 2 semester hours in turboprop engine familiarization (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in turboprop engine familiarization (6/74).

NV-1704-0126

F-4B/J Maintenance Supervisor Familiarization

Course Number: C-000-3807.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Cherry Point, NC.

Length: 2 weeks (72-80 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To familiarize fleet- and shore-based maintenance supervisors with the F-4B/J aircraft and related systems.

Instruction: Lectures and practical exercises on the F-4B/J aircraft and related systems, including airframe, hydraulic, pneumatic, egress and environmental control systems; missile control systems and related safety information; CNI, ECM, fuel, power plant, and related systems; electrical systems; missile and armament control systems; and introduction to air launched weapons.

Credit Recommendation: In the vocational certificate category, 2 semester hours in aircraft and systems maintenance (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft and systems maintenance (6/74).

NV-1704-0127

C-2A Power Plant and Related Systems Organizational Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 3 weeks (120-128 hours).

Exhibit Dates: 11/67-1/88.

Objectives: To train enlisted personnel to maintain and repair C2A power plants and related systems.

Instruction: Lectures and practical exercises in the organizational maintenance of the C2A power plant and related systems, including the T-56-A-8/8A engine; functions, operation, and maintenance of the C2A fuel system; and the A6441FN-248 propeller system and components.

Credit Recommendation: In the vocational certificate category, 4 semester hours in aircraft and propeller maintenance (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in aircraft and propeller maintenance (6/74).

NV-1704-0128

Aviation Structural Mechanic (Hydraulic) Class A1
(Aviation Structural Mechanic H (Hydraulics), Class A)

Course Number: C-602-2017.

Location: Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN.

Length: 7-10 weeks (280-400 hours).

Exhibit Dates: 5/56-Present.

Objectives: To train maintenance technicians to repair aircraft hydraulic structural systems.

Instruction: Lectures and practical exercises in aircraft hydraulic structural systems repair, including hydraulic principles, tubes and fittings, flexible hose and fittings, power system components, brakes, struts, shimmy dampers, valves, actuators, publications and forms.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in hydraulics structural repair (9/89).

NV-1704-0129

A-6A Hydraulics and Flight Controls Organizational Maintenance
(A-6 Hydraulics, Flight Control and Structures Organizational Level Maintenance)

Course Number: Not available.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.

Length: 3-4 weeks (120-160 hours).

Exhibit Dates: 3/68-1/88.

Objectives: To train maintenance personnel to maintain and repair hydraulic and flight control systems of the A-6A aircraft.

Instruction: Lectures and practical exercises in the operation and maintenance of the hydraulic and flight control system of the A-6A aircraft, including the requirements for daily, preflight, postflight, and periodic inspections and maintenance techniques; removal, installation, and troubleshooting of major components required for organizational maintenance, including aircraft familiarization; hydraulic, flight control, alighting gear and related systems; and ground handling.

Credit Recommendation: In the vocational certificate category, 6 semester hours in systems maintenance (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in systems maintenance (6/74).

NV-1704-0130

Aviation Structural Mechanic E (Safety Equipment), Class A

Course Number: C-602-2015.

Location: Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN.

Length: 9-11 weeks (348-368 hours).

Exhibit Dates: 9/65-9/86.

Objectives: To train enlisted personnel to perform as aviation structural mechanics.

Instruction: For this course after 9/86 see NV-1704-0325. Lectures and practical exercises in the functions of aviation structural mechanics, including fundamentals, familiarization, schematic interpretation, application of the maintenance and material management system, gaseous oxygen systems, typical aircraft system, liquid oxygen systems, aircraft pressurization and air-conditioning systems, operations and line maintenance, egress systems, and auxiliary bleed air systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in aircraft safety equipment mechanics (2/81).

NV-1704-0131

Marine Mechanical School, Class P

Course Number: Not available.

Location: Air Technical Training Center, Jacksonville, FL.

Length: 6 weeks (240 hours).

Exhibit Dates: 3/70-1/88.

Objectives: To train personnel in basic mechanical maintenance techniques.

Instruction: Lectures and practical exercises in mechanical maintenance, including aviation qualifications, aviation personnel survival, Marine aviation orientation, aircraft familiarization, general administration, aeronautical publications, basic manual skills, aircraft hardware, general mathematics, physics, and electricity.

Credit Recommendation: In the vocational certificate category, 3 semester hours in basic aircraft mechanical shop (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic aircraft mechanical shop (6/74).

NV-1704-0132

Aviation Structural Mechanic (Structures) Class A1
(Aviation Structural Mechanic S (Structures), Class A)

Course Number: C-603-2010.

Location: Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN.

Length: *Version 1:* 8-11 weeks (320-368 hours). *Version 2:* 9 weeks (360 hours). *Version 3:* 12 weeks (480 hours).

Exhibit Dates: *Version 1:* 7/69-Present. *Version 2:* 9/65-6/69. *Version 3:* 7/56-8/65.

Objectives: To train enlisted Navy and Marine Corps personnel with previous technical experience to perform as aviation structural mechanics S (structures), third class.

Instruction: Lectures and practical exercises in the duties of aviation structural mechanic S (structures), third class, including fundamentals, aircraft structural repair, welding, nonmetallic materials, airframes and operational maintenance, and aircraft sheet metal.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 6 semester hours in aircraft structures shop (9/89). *Version 2:* In the vocational certificate category, 7 semester hours in aircraft structures shop (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in aircraft structures shop (6/74). *Version 3:* In the vocational certificate category, 8 semester hours in aircraft structures shop (6/74); in the lower-division baccalaureate/associate degree category, 5 semester hours in aircraft structures shop (6/74).

NV-1704-0133

H-53 Automatic Flight Control System Organizational Maintenance

Course Number: C-602-3443.

Location: Air Maintenance Training Detachment, Santa Ana, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 5/70–1/88.

Objectives: To train maintenance personnel to maintain the H-53 automatic flight control system at the organizational maintenance level.

Instruction: Lectures and practical exercises in the organizational maintenance of the H-53 automatic flight control system, including AFCS maintenance, hydraulic control, stick trim system, power distribution and relay sequence, attitude-indicating system, block-diagram analysis, and line maintenance procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in flight control system maintenance (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in flight control system maintenance (6/74).

NV-1704-0134

SH-3A Power Plants and Related Systems Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Ream Field, CA; Air Maintenance Training Detachment, Key West, FL.

Length: 3 weeks (120 hours).

Exhibit Dates: 11/67–12/68.

Objectives: To train maintenance personnel to maintain and repair SH-3A helicopter power plants and related systems.

Instruction: Lectures and practical exercises on SH-3A power plants and related systems maintenance, including general information; familiarization; T58 engine; construction; systems; engine-related systems; engine installation; operation and maintenance; fuel system; main gear box; rotary rudder drive; rotor-actuating mechanisms; main rotor head assembly; and rotary rudder assembly.

Credit Recommendation: In the vocational certificate category, 2 semester hours in power plant maintenance laboratory (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in power plant maintenance laboratory (6/74).

NV-1704-0135

A-7B/TA-7C Power Plant and Related Systems Organizational Maintenance

(A-7A/B TF30-P-6/408 Power Plants and Related Systems Organizational Maintenance)

(A-7A/B Power Plant and Related Systems Organizational Maintenance)

Course Number: C-601-3781.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL.

Length: 2 weeks (72-80 hours).

Exhibit Dates: 10/70–Present.

Objectives: To train experienced maintenance personnel in the maintenance, operation, and servicing of A-7A/B power plants and related systems.

Instruction: Lectures and practical exercises in A-7A/B power plants and related systems organizational maintenance, including aircraft fuel systems, engine construction and systems, and propulsion system maintenance.

Credit Recommendation: In the vocational certificate category, 2 semester hours in power plant systems maintenance (3/82); in the lower-division baccalaureate/associate degree category, 1 semester hour in power plant systems maintenance (3/82).

NV-1704-0136

H-46 Stabilization Systems Intermediate Maintenance

Course Number: C-601-3417.

Location: Air Maintenance Training Detachment, New River, NC; Air Maintenance Training Detachment, Santa Ana, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 10/70–1/88.

Objectives: To train experienced maintenance personnel in maintenance and servicing of H-46 stabilization systems at the intermediate level.

Instruction: Lectures and practical exercises in intermediate maintenance and servicing of H-46 stabilization systems, including stability augmentation system; automatic stabilization equipment; automatic speed trim system; and complete intermediate maintenance, troubleshooting, testing and repair.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electrical and electromechanical systems (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical and electromechanical systems (6/74).

NV-1704-0137

OV-10A T-76-G-10/12 Engine Intermediate/Complete Engine Repair Maintenance

Course Number: C-601-3522.

Location: Air Maintenance Training Detachment, New River, NC; Air Maintenance Training Detachment, Cp. Pendleton, CA.

Length: 3 weeks (136 hours).

Exhibit Dates: 8/69–1/88.

Objectives: To train experienced personnel to repair the T76-G-10/12 engine.

Instruction: Lectures and practical exercises on the T76-G-10/12 engine, including intermediate/complete engine repair, engine systems, power management, propeller maintenance, torque-sensing system, engine anti-icing system, fuel system, electrical system, propeller disassembly and assembly, propeller balancing, and inspection and testing.

Credit Recommendation: In the vocational certificate category, 4 semester hours in turboprop engine and propeller maintenance (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in turboprop engine and propeller maintenance (6/74).

NV-1704-0138

Aviation Support Equipment Technician Hydraulics and Structures, Class A

Course Number: C-602-2023.

Location: Air Technical Training Center, Memphis, TN; Air Technical Training Center, Millington, TN.

Length: 9 weeks (313-376 hours).

Exhibit Dates: 1/71–11/80.

Objectives: To train enlisted personnel with previous technical experience to perform as aviation support equipment technicians (hydraulics and structures).

Instruction: Lectures and practical exercises in aviation support equipment maintenance (hydraulics and structures), including publications and maintenance organization, aviation support equipment fundamentals, materials, troubleshooting, chassis and brake maintenance, metalwork skills, welding, corrosion control, maintenance of fluidic systems, servicing equipment, and line maintenance.

Credit Recommendation: In the vocational certificate category, 4 semester hours in chassis and metalworking shop, 3 in hydraulics and liquified-gas laboratory (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in chassis and metalworking shop, 2 in hydraulics and liquified-gas laboratory (6/74).

NV-1704-0139

SH-3 Power Plants and Related Systems Organizational Maintenance

(SH-3D/H Power Plants and Related Systems Organizational Maintenance Course)

Course Number: C-601-3399.

Location: Air Maintenance Training Detachment, North Island, San Diego, CA; Air Maintenance Training Detachment, Jacksonville, FL; Air Maintenance Training Detachment, Quonset Point, RI; Air Maintenance Training Detachment, Imperial Beach, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/73–Present.

Objectives: To train maintenance personnel to maintain SH-3D and SH-3H aircraft power plants and related systems, including scheduled and unscheduled inspections; system servicing, repair, troubleshooting, and schematic analysis; and specific support equipment.

Instruction: Lectures and practical exercises in maintenance of SH-3D and SH-3H aircraft power plants and related systems. Topics include general information and theory of helicopter flight, power plant systems, rotors and related systems, inspections, and functional testing.

Credit Recommendation: In the vocational certificate category, 2 semester hours in power plant organizational maintenance (4/85); in the lower-division baccalaureate/associate degree category, 1 semester hour in power plant organizational maintenance (4/85).

NV-1704-0140

A-7E POWER PLANT AND RELATED SYSTEMS ORGANIZATIONAL MAINTENANCE

Course Number: C-601-3782.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL.

Length: *Version 1:* 3 weeks (103 hours). *Version 2:* 4 weeks (144-180 hours).

Exhibit Dates: *Version 1:* 12/78-Present. *Version 2:* 9/72-11/78.

Objectives: To train enlisted personnel to maintain and repair the A-7E power plant and related systems.

Instruction: Lectures and practical exercises in the maintenance, operation, and servicing of the A-7E power plant and related systems; use of tools and special maintenance and test equipment related to organizational maintenance, including aircraft fuel system, engine description and systems, propulsion system maintenance, operating maintenance, and practical training.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in power plant organizational maintenance (3/82). *Version 2:* In the vocational certificate category, 3 semester hours in power plant organizational maintenance (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in power plant organizational maintenance (6/74).

NV-1704-0141

UH-2C, HH-2C AND HH-2D POWER PLANTS AND RELATED SYSTEMS ORGANIZATIONAL MAINTENANCE

Course Number: C-601-3386.

Location: Air Maintenance Training Detachment, Imperial Beach, CA.

Length: 3 weeks (96 hours).

Exhibit Dates: 2/73-1/88.

Objectives: To train maintenance personnel to maintain helicopter power plants and related systems.

Instruction: Lectures and practical exercises in maintenance of UH-2C, HH-2C and HH-2D power plants and related systems. Topics include familiarization with power plants and related systems; removal, inspection, and installation of power plants; and organizational maintenance of transmissions and drive shafts.

Credit Recommendation: In the vocational certificate category, 2 semester hours in helicopter power plant laboratory (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in helicopter power plant laboratory (6/74).

NV-1704-0142

AIRCRAFT MAINTENANCE OFFICERS, CLASS O

Course Number: C-4D-2010.

Location: Air Technical Training Center, Memphis, TN; Air Technical Training Center, Millington, TN.

Length: *Version 1:* 12-16 weeks (480 hours). *Version 2:* 16 weeks (634-640 hours). *Version 3:* 16 weeks (640 hours). *Version 4:* 12 weeks (480 hours).

Exhibit Dates: *Version 1:* 8/77-Present. *Version 2:* 2/70-7/77. *Version 3:* 6/65-1/70. *Version 4:* 1/57-5/65.

Objectives: To train prospective squadron maintenance officers to organize, supervise and administer aircraft maintenance departments.

Instruction: *All Versions:* Lectures and practical exercises on organization, supervision and administration of aircraft maintenance departments, including avionics equipment and systems, maintenance and material management administration, airframe equipment and systems, publications, and maintenance organization management. *Version 4:* Topics include armament equipment and systems.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in statistics, 2 in introduction to data processing, 2 in industrial safety, 3 in introduction to management, 2 in supervisional management, 1 in office procedures and 1 in quality control (2/81). *Version 2:* In the vocational certificate category, 12 semester hours in aircraft maintenance management, 12 in aircraft systems (6/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in aircraft maintenance management, 6 in aircraft systems (6/74); in the upper-division baccalaureate category, 3 semester hours in aircraft maintenance management (6/74). *Version 3:* In the vocational certificate category, 12 semester hours in maintenance management, 12 in electricity, electronics, or electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in maintenance management (6/74), 3 in electricity, electronics, or electrical laboratory (12/68); in the upper-division baccalaureate category, 3 semester hours in maintenance management (6/74). *Version 4:* In the vocational certificate category, 8 semester hours in maintenance management, 8 in electricity, electronics, or electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in maintenance management (6/74), 3 in electricity, electronics, or electrical laboratory (12/68); in the upper-division baccalaureate category, 2 semester hours in maintenance management (6/74).

NV-1704-0143

C-2A HYDRAULICS/AIRFRAMES SYSTEM ORGANIZATIONAL MAINTENANCE
(C-2A Hydraulics/Airframes System Maintenance)

Course Number: C-602-3494.

Location: Naval Air Station, Miramar, CA; Air Maintenance Training Detachment, North Island, CA.

Length: 3-4 weeks (109-120 hours).

Exhibit Dates: 9/67-1/88.

Objectives: To train maintenance personnel to maintain C-2A hydraulic and airframe systems at the organizational level.

Instruction: Lectures and practical exercises in maintenance of C-2A hydraulic and airframe systems. Course includes flight- and combined-systems power sections and power control systems, utility systems, alighting gear, flight controls and structures operation, line maintenance, troubleshooting, servicing, and ground handling.

Credit Recommendation: In the vocational certificate category, 4 semester hours in aircraft systems maintenance (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in aircraft systems maintenance (6/74).

NV-1704-0144

SH-3A POWER PLANTS AND RELATED SYSTEMS MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, Key West, FL; Air Maintenance Training Detachment, Ream Field, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 11/67-1/88.

Objectives: To train maintenance personnel in SH-3A power plants and related systems organizational maintenance.

Instruction: Lectures and practical exercises in the maintenance of SH-3A power plants and related systems. Topics include familiarization with power plants and systems, details of T58 engines, engine-related systems, transmissions, and rotor-actuating mechanisms.

Credit Recommendation: In the vocational certificate category, 2 semester hours in power plant organizational maintenance (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in power plant organizational maintenance (6/74).

NV-1704-0145

AVIATION SUPPORT EQUIPMENT TECHNICIAN MECHANICAL, CLASS A

Course Number: C-602-2024.

Location: Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN.

Length: 9 weeks (313-376 hours).

Exhibit Dates: 1/71-11/80.

Objectives: To train ground service support technicians to maintain various types of ground support equipment.

Instruction: Lectures and practical exercises in the maintenance of ground support equipment. Topics include technical publications and directives; records and reports; theory of operation of and principles applicable to fluid, heat and electricity; safety precautions; hand tools; shop equipment and test equipment; fuels and lubricants; corrosion control; servicing; inspections; and gasoline, diesel and turbine engine maintenance.

Credit Recommendation: In the vocational certificate category, 8 semester hours in aviation ground support equipment maintenance (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in aviation ground support equipment maintenance (6/74).

NV-1704-0146

SH-3A/G POWER PLANTS AND RELATED SYSTEMS ORGANIZATIONAL LEVEL MAINTENANCE

Course Number: C-601-3396.

Location: Air Maintenance Training Detachment, Quonset Point, RI; Air Maintenance Training Detachment, Imperial Beach, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/73-1/88.

Objectives: To train enlisted personnel to maintain SH-3A/G aircraft power plants and related systems.

Instruction: Lectures and practical exercises in the troubleshooting, maintenance, and repair of the SH-3A/G aircraft power plant and related systems. Course includes general information and theory of helicopter flight, power plant systems, rotors and related systems, inspection requirements, and functional testing.

Credit Recommendation: In the vocational certificate category, 2 semester hours in power plant organizational maintenance (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in power plant organizational maintenance (6/74).

NV-1704-0147

H-53 Helicopter Maintenance

Course Number: C-601-3445.

Location: Air Maintenance Training Detachment, Santa Ana, CA; Air Maintenance Training Detachment, Cherry Point, NC.

Length: 2 weeks (80 hours).

Exhibit Dates: 5/72-1/88.

Objectives: To train maintenance technicians to maintain H-53 helicopters.

Instruction: Lectures and practical exercises in the maintenance of H-53 helicopters, including rotors and related systems, power plant, auxiliary power plant, and fuel systems maintenance.

Credit Recommendation: In the vocational certificate category, 2 semester hours in helicopter maintenance fundamentals (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in helicopter maintenance fundamentals (6/74).

NV-1704-0148

Aviation Machinist's Mate (AD) Class A1

(Aviation Machinist's Mate J (Jet Engine), Class A)

(Aviation Machinist's Mate J (Turbo-Jet), (Class A))

Course Number: C-601-2010.

Location: Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN.

Length: *Version 1:* 5 weeks (180 hours). *Version 2:* 7-8 weeks (264-304 hours).

Exhibit Dates: *Version 1:* 3/77-6/88. *Version 2:* 5/56-2/77.

Objectives: To train enlisted personnel with previous technical experience to perform as jet engine mechanics.

Instruction: For this course after 6/88 see NV-1704-0324. Lectures and practical exercises in jet engine repair, including AD rating and training, jet propulsion principles, power plant familiarization (general), typical axial-flow power plant, centrifugal-flow power plant familiarization, periodic inspections, power plant replacement, jet aircraft line operations, and fuel systems.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in theory of turbine (jet) engines (2/81). *Version 2:* In the vocational certificate category, 4 semester hours in theory of turbine (jet) engines (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in theory of turbine (jet) engines (6/74).

NV-1704-0149

Aviation Machinist's Mate R (Reciprocating), Class A

Course Number: *Version 1:* C-601-2012. *Version 2:* Not available.

Location: Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN.

Length: *Version 1:* 7-8 weeks (309-336 hours). *Version 2:* 9 weeks (344 hours).

Exhibit Dates: *Version 1:* 9/65-8/79. *Version 2:* 12/56-8/65.

Objectives: To train enlisted personnel with previous technical experience to repair reciprocating-engine aircraft.

Instruction: Lectures and practical exercises in reciprocating-engine repair, including fundamentals, power plants and line operations, power plant accessories, line operations and power plant maintenance, fuel metering, ignition, propellers, periodic inspections, and troubleshooting.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in basic reciprocating-engine overhaul (6/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in basic reciprocating-engine overhaul (6/74). *Version 2:* In the vocational certificate category, 8 semester hours in basic reciprocating-engine overhaul (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in advanced reciprocating-engine overhaul (6/74).

NV-1704-0150

T-53-L-13 Engine Intermediate Maintenance/Complete Engine Repair

Course Number: C-601-3343.

Location: Air Maintenance Training Detachment, Ellyson Field, FL.

Length: 2 weeks (80 hours).

Exhibit Dates: 3/73-1/88.

Objectives: To train maintenance personnel in the intermediate maintenance and complete engine repair of the T53-L-13 shaft-turbine engine.

Instruction: Lectures and practical exercises on the intermediate maintenance and complete engine repair of the T53-L-13 shaft-turbine engine, including engine disassembly and inspection; engine repair and reassembly; repair and installation of inlet guide vane and compressor; and gas producer and accessory repair and installation.

Credit Recommendation: In the vocational certificate category, 2 semester hours in aircraft turbine engine maintenance (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft turbine engine maintenance (6/74).

NV-1704-0151

E-2A Power Plant and Related Systems Organizational Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 3 weeks (120-128 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train enlisted personnel to maintain and operate turboprop engines and related systems, including fuel and propeller systems and components.

Instruction: Lectures and practical exercises in operation and maintenance of turboprop engines. Course includes power plant organizational maintenance, troubleshooting, repair, component replacement and specific test equipment use.

Credit Recommendation: In the vocational certificate category, 2 semester hours in turboprop organizational maintenance (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in turboprop organizational maintenance (6/74).

NV-1704-0152

E-2A Power Plant and Related Systems Maintenance No. 8

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 5 weeks (200 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train enlisted personnel in the maintenance of turboprop engines, including fuel systems, propeller systems, electrical systems, and components.

Instruction: Lectures and practical exercises in maintenance of turboprop engines and related systems. Topics include intermediate and organizational maintenance on power plant and related systems; troubleshooting, repair, and replacement of equipment; and test equipment utilization.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electrical laboratory, 4 in turboprop power plant laboratory (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory, 3 in turboprop power plant laboratory (6/74).

NV-1704-0153

AH-1J Powertrain and Rotors Organizational Maintenance

Course Number: C-600-3351.

Location: Air Maintenance Training Detachment, Cp. Pendleton, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/72-1/88.

Objectives: To train maintenance personnel to locate, operate, troubleshoot, and maintain the helicopter power trains and rotor systems.

Instruction: Lectures and practical exercises in maintenance, operation, and servicing of helicopter power trains and rotor systems of AH-1J helicopters. Course includes information on nomenclature, location, operation, removal, inspection, and installation of components.

Credit Recommendation: In the vocational certificate category, 2 semester hours in organizational maintenance (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in organizational maintenance (6/74).

NV-1704-0154

H-46 Rotors and Related Systems Organizational Maintenance Course

Course Number: Not available.

Location: Air Maintenance Training Detachment, New River, NC; Air Maintenance Training Detachment, Santa Ana, CA.

Length: 3 weeks (112 hours).

Exhibit Dates: 6/68-1/88.

Objectives: To train maintenance personnel to maintain the rotors and related systems of the H-46 helicopter.

Instruction: Lectures of practical exercises in the maintenance of the rotor, drive, flight control, and utility systems of the H-46 helicopter, including drive system and rotor system maintenance, flight control system maintenance, and utility systems.

Credit Recommendation: In the vocational certificate category, 4 semester hours in rotorcraft systems maintenance (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in rotorcraft systems maintenance (6/74).

NV-1704-0155

E-2A Hydraulics/Airframes Systems Organizational Maintenance

(E-2A Hydraulics/Airframes System Maintenance)

Course Number: Not available.

Location: Naval Air Station, Miramar, CA; Air Maintenance Training Detachment, North Island, CA.

Length: 3-4 weeks (107-120 hours).

Exhibit Dates: 10/67-1/88.

Objectives: To train personnel in E-2A hydraulics/airframes system maintenance.

Instruction: Lectures and practical exercises on the latest maintenance procedures for organizational maintenance on the E-2A hydraulics, alighting gear, and airframes systems, including flight and combined-system power sections, flight control systems, utility systems, alighting gear, longitudinal control system, directional controls, lateral controls, flap and aileron droop system, rigging, ground handling, and structures.

Credit Recommendation: In the vocational certificate category, 4 semester hours in hydraulic/airframe systems maintenance (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in hydraulic/airframe systems maintenance (6/74).

NV-1704-0156

1. Aircraft Maintenance Nondestructive Inspection School, Class C
2. Aircraft Maintenance Nondestructive Inspection School, Class C
   (Aircraft Maintenance Radiography School, Class C)

Course Number: C-603-3191.

Location: Air Technical Training Center, Jacksonville, FL.

Length: *Version 1:* 9 weeks (360 hours). *Version 2:* 8 weeks (312-320 hours).

Exhibit Dates: *Version 1:* 11/69-1/88. *Version 2:* 11/65-10/69.

Objectives: To train military and federal civil service personnel in aircraft maintenance radiography, nondestructive aircraft maintenance inspection, and eddy current and ultrasonic procedures and interpretation.

Instruction: Lectures and practical exercises in aircraft maintenance radiography and maintenance nondestructive inspection, including radiography and related subjects, radiographic equipment, film processing, laboratory and aircraft line radiography, and ultrasonic and eddy current inspection.

Credit Recommendation: *Version 1:* In the vocational certificate category, 14 semester hours in aircraft maintenance nondestructive inspection (6/74); in the lower-division baccalaureate/associate degree category, 7 semester hours in aircraft maintenance nondestructive inspection (6/74). *Version 2:* In the vocational certificate category, 12 semester hours in aircraft maintenance nondestructive inspection (6/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in aircraft maintenance nondestructive inspection (6/74).

NV-1704-0157

1. Enlisted Basic Aviation Training
   (Aviation Fundamentals Class AP)
2. Aviation Mechanical Fundamentals, Class P
   (Aviation Mechanical Fundamentals, Class A)

Course Number: *Version 1:* C-000-2010. *Version 2:* Not available.

Location: Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN.

Length: *Version 1:* Self-paced 2 weeks (65 hours). *Version 2:* 3-4 weeks (120-160 hours).

Exhibit Dates: *Version 1:* 1/78-10/88. *Version 2:* 9/65-12/77.

Objectives: To train personnel in aviation mechanical fundamentals.

Instruction: *Version 1:* Self-paced instruction with practical exercises in aviation mechanical fundamentals, including general information, use of hand tools, torquing, safetying aircraft hardware and general mathematics. *Version 2:* Lectures and practical exercises in aviation mechanical fundamentals, including general information, hand tools and aircraft hardware, general mathematics, physics, electricity, magnetic theory, and parallel circuits.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft fundamentals or maintenance technician (2/81). *Version 2:* In the vocational certificate category, 2 semester hours in aircraft fundamentals (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft fundamentals (6/74).

NV-1704-0158

Aviation Machinist's Mate R (Reciprocating), Class B

Course Number: C-601-2013.

Location: Air Technical Training Center, Memphis, TN.

Length: 13-14 weeks (540-576 hours).

Exhibit Dates: 6/66-12/84.

Objectives: To provide aviation machinist's mates with advanced training in reciprocating-engine repair.

Instruction: Lectures and practical exercises on aircraft reciprocating power plants and related systems, including aircraft maintenance program, reciprocating power plants, ignition, fuel metering, propellers, material control, maintenance management, quality control, magnetism, induction, circuit troubleshooting, supervision and maintenance, engine analyzers, and reversing hydromatic propeller and systems.

Credit Recommendation: In the vocational certificate category, 6 semester hours in maintenance management and reciprocating power plants (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in maintenance management and reciprocating power plants (6/74); in the upper-division baccalaureate category, 2 semester hours in maintenance management (12/68).

NV-1704-0159

1. Aviation Machinist's Mate J (Jet Engine), Class C7
2. Aviation Machinist's Mate J (Jet Engine), Class B

Course Number: C-601-2011.

Location: Air Technical Training School, Memphis, TN; Millington, TN, Memphis, TN.

Length: *Version 1:* 13-18 weeks (536-544 hours). *Version 2:* 13-14 weeks (536-544 hours).

Exhibit Dates: *Version 1:* 9/72-12/82. *Version 2:* 10/65-8/72.

Objectives: To provide aviation machinist's mates with advanced training in jet engine maintenance.

Instruction: *All Versions:* Lectures and practical exercises in the maintenance of aircraft turbine-type power plants and related systems, including advanced power plant fundamentals and auxiliary equipment, advanced turbojet power plants, advanced turbofan power plant, advanced turboprop power plant, naval aircraft maintenance program, J57 power plant, T56 power plant, and J79 power plant orientation. *Version 1:* Includes basic electricity.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in turbine engine maintenance and 1 in basic electricity (2/81); in the upper-division baccalaureate category, 2 semester hours in maintenance management (2/81). *Version 2:* In the vocational certificate category, 8 semester hours in turbine engine maintenance management (6/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in turbine engine maintenance management (6/74); in the upper-division baccalaureate category, 2 semester hours in maintenance management (12/68).

NV-1704-0160

P-3 Ordnance Systems Organizational Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, Patuxent River, MD.

Length: 2 weeks (80 hours).

Exhibit Dates: 6/70-1/88.

Objectives: To train maintenance personnel to maintain and service P-3 aircraft armament systems.

Instruction: Lectures and practical exercises in maintenance of P-3 aircraft armament systems. Course includes bomb bay and wing stores systems, pneumatic systems, launcher systems, sonobuoy systems, underwater sound signal systems, photographic systems, jettison systems, intervalometer ordnance and rocket sight systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in ordnance systems technology (6/74).

NV-1704-0161

P-3 Hydraulics, Flight Control Systems and Structures Organizational Maintenance

Course Number: E-602-1030.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 8/70-1/88.

Objectives: To train maintenance personnel to service and maintain hydraulic systems, flight controls, and structures of P-3 aircraft.

Instruction: Lectures and practical exercises in maintenance of hydraulic systems, flight controls, and structures of P-3 aircraft. Course includes plumbing, power, auxiliary landing gear, brake, windshield wiper, flap, and primary control systems; booster assembly; A/C structures; and windows, doors and emergency exits.

Credit Recommendation: In the vocational certificate category, 2 semester hours in aircraft hydraulic systems (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft hydraulic systems (6/74).

NV-1704-0162

AH-1J Power Plant and Related Systems Organizational Maintenance

Course Number: C-601-3351.

Location: Air Maintenance Training Detachment, Cp. Pendleton, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 10/71-1/88.

Objectives: To train maintenance personnel to maintain AH-1J/T400 CP-400 power plant systems.

Instruction: Lectures and practical exercises in AH-1J/T400 CP-400 power plant systems maintenance. Course includes turbine engine removal and installation; engine alignment; engine control systems; rigging; and fuel and oil systems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in jet engine maintenance (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in jet engine maintenance (6/74).

NV-1704-0163

F-8 J57-P-16/20 INTERMEDIATE MAINTENANCE/COMPLETE ENGINE REPAIR

(F-8 J57-P-16/20 Intermediate Maintenance)

Course Number: Not available.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Jacksonville, FL.

Length: 3 weeks (112 hours).

Exhibit Dates: 3/68–1/88.

Objectives: To train fleet aircraft maintenance personnel in J57-P-16/20 intermediate maintenance and complete engine repair.

Instruction: Lectures and practical exercises in J57-P-16/20 intermediate maintenance and complete engine repair, including disassembly, cleaning, inspection, minor repair, engine testing and trimming procedures and techniques, and assembly.

Credit Recommendation: In the vocational certificate category, 2 semester hours in turbine engine maintenance (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in turbine engine maintenance (6/74).

NV-1704-0164

A-6A POWER PLANTS AND RELATED SYSTEMS ORGANIZATIONAL LEVEL MAINTENANCE

Course Number: E-601-0610.

Location: Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Whidbey Island, WA.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To train maintenance personnel in A-6A aircraft power plants and related systems organizational maintenance.

Instruction: Lectures and practical exercises in A-6A power plants and related systems organizational maintenance, including aircraft general description, periodic maintenance requirements program, power plants, engine operating limits and procedures, engine removal and installation, engine trim procedure, constant speed drive/starter unit familiarization, and fuel system.

Credit Recommendation: In the vocational certificate category, 2 semester hours in turbojet organizational maintenance (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in turbojet organizational maintenance (6/74).

NV-1704-0165

A-6 MAINTENANCE SUPERVISORS FAMILIARIZATION

Course Number: Not available.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To train supervisory personnel in the A6 weapons system.

Instruction: Lectures and practical exercises on the A6 weapons system, including A6 maintenance familiarization, hydraulic power and distribution, general electrical and electronics systems, A6 weapons system familiarization, general avionics equipment and maintenance, power plants and fuel systems, and environmental system.

Credit Recommendation: In the vocational certificate category, 2 semester hours in aircraft systems laboratory (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft systems laboratory (6/74).

NV-1704-0166

RA-5C ARMAMENT INTERMEDIATE MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, Sanford, FL.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To train enlisted personnel to maintain the RA-5C armament system and its components.

Instruction: Lectures and practical exercises in the maintenance of the RA-5C armament system and its components. Course includes controls and indicators, external pylons, electrical systems, delivery modes, and bomb control monitoring systems.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/74).

NV-1704-0167

A-6A ARMAMENT SYSTEMS ORGANIZATIONAL MAINTENANCE

Course Number: E-646-0640.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.

Length: 3-4 weeks (120-160 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To train maintenance personnel to maintain and operate A-6A armament systems.

Instruction: Lectures and practical exercises in maintenance and operation of A-6A armament systems. Course includes the components and applicable support equipment for A-6A systems; inspection and safety procedures; shop repairs; adjustments; and test and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics laboratory (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (6/74).

NV-1704-0168

H-53 POWER PLANTS AND RELATED SYSTEMS ORGANIZATIONAL MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, Santa Ana, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 5/70–1/88.

Objectives: To train maintenance personnel to maintain T-64-GE-6/6A engines and engine systems, aircraft fuel systems, and T-62T-12 engines and engine systems at the organizational level.

Instruction: Lectures and practical exercises in maintenance of T-64-GE-6/6A engines and engine systems, aircraft fuel systems, and T-62T-12 engines and engine systems. Course includes overall system operation, system troubleshooting, and use of special support equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in power plant organizational maintenance (6/74).

NV-1704-0169

T-2C POWER PLANTS AND RELATED SYSTEMS MAINTENANCE

Course Number: C-601-3877; C-601-094.

Location: Air Maintenance Training Detachment, Meridian, MS.

Length: 2 weeks (80 hours).

Exhibit Dates: 9/70–1/88.

Objectives: To train maintenance personnel to maintain and repair T2C aircraft fuel systems and J85-GE-4 engines and related systems.

Instruction: Lectures and practical exercises in maintenance and repair of T2C aircraft fuel and related systems. Course includes inspection techniques, troubleshooting, engine limits and adjustments, and T2C system installation.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in power plant organizational maintenance (6/74).

NV-1704-0170

A-4(J52-P-6A/8A) POWER PLANT AND RELATED SYSTEMS ORGANIZATIONAL MAINTENANCE

Course Number: C-601-3717.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Beaufort, SC.

Length: 2 weeks (64 hours).

Exhibit Dates: 4/73–1/88.

Objectives: To train maintenance personnel to test, maintain, and repair the A-4 power plant and related systems.

Instruction: Lectures and practical exercises on the A-4 power plant and related systems, including power plant system, J52 engine description, power plant maintenance, aircraft fuel system, and engine maintenance and operation.

Credit Recommendation: In the vocational certificate category, 1 semester hour in power plant organizational maintenance (6/74).

NV-1704-0171

S-2D/E POWER PLANT AND RELATED SYSTEMS MAINTENANCE

Course Number: C-601-3611.

Location: Air Maintenance Training Detachment, Key West, FL; Air Maintenance Training Detachment, North Island, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 11/72–1/88.

Objectives: To train maintenance personnel to maintain the power plant and related systems of the S-2D/E aircraft at the intermediate and organizational maintenance levels.

Instruction: Lectures and practical exercises on the power plant and related systems of the S-2D/E aircraft at the intermediate and organizational maintenance levels, including R1820-82A aircraft engine; field maintenance and minor repair; engine change, removal, and installation; external oil system maintenance; propeller maintenance; fuel system; Bendix Stromberg carburetor; ignition system and field maintenance; and inspections and troubleshooting.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in power plant organizational maintenance (6/74).

NV-1704-0172

SH-2F POWER PLANTS, RELATED SYSTEMS AND ROTOR SYSTEMS ORGANIZATIONAL MAINTENANCE

(SH/HH-2D Power Plant and Related Systems Organizational Maintenance)

Course Number: C-601-3387.

Location: *Version 1:* Naval Air Station, North Island, San Diego, CA; Naval Air Station, Norfolk, VA. *Version 2:* Air Maintenance Training Detachment, Lakehurst, NJ; Air Maintenance Training Detachment, Imperial Beach, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: *Version 1:* 6/81–Present. *Version 2:* 4/73–5/81.

Objectives: To train maintenance personnel to maintain power plant, transmission and fuel systems at the organizational level.

Instruction: Lectures and practical exercises in power plant, transmission and fuel systems maintenance.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in power plant organizational maintenance (4/85). *Version 2:* In the vocational certificate category, 1 semester hour in power plant organizational maintenance (6/74).

NV-1704-0173

A-7E ARMAMENT SYSTEM ORGANIZATIONAL MAINTENANCE

Course Number: C-646-3787.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL.

Length: 2 weeks (64 hours).

Exhibit Dates: 3/71–Present.

Objectives: To train maintenance personnel to operate and maintain the A-7E armament system at the organizational level.

Instruction: Lectures and practical exercises in the maintenance and operation of the A-7E armament system. Course includes weapons release stations; release and control systems; and systems checks and circuit analysis, use of specific test equipment, and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electrical or electronic systems (3/82); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical or electronic systems (3/82).

NV-1704-0174

ENGINEMAN CLASS C, CONTROLLABLE PITCH PROPELLER

(Controllable Pitch Propeller, Class C)

Course Number: A-652-0028.

Location: Service School Command, Great Lakes, IL.

Length: 4 weeks (126 hours).

Exhibit Dates: 11/65–4/76.

Objectives: To train enginemen and petty officers third class and above to test, adjust, diagnose, and correct malfunctions in controllable-pitch propeller systems.

Instruction: Lectures and practical exercises in testing, diagnosing, and correcting controllable-pitch propeller systems. Course includes advanced principles of hydraulics; installation, adjustment and prestart checks; operation, maintenance, and troubleshooting controllable-pitch propeller systems; servomotor controls; electrohydraulic, electromechanical and pneumatic-hydraulic controls; principles of operation of pumps, valves, gages; and associated piping and tubing.

Credit Recommendation: In the vocational certificate category, 4 semester hours in mechanical technology (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in mechanical technology (6/74).

NV-1704-0175

UH-1N POWERTRAIN AND ROTORS ORGANIZATIONAL MAINTENANCE

Course Number: C-600-3355.

Location: Air Maintenance Training Detachment, Cp. Pendleton, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/73–1/88.

Objectives: To train personnel in the components and assemblies of power train/rotor systems.

Instruction: Lectures and practical exercises on the components and assemblies of power train/rotor systems, including nomenclature, location, operation, removal, and installation; organizational maintenance; rotor systems; mast and transmission assembly; drive shafts; gear boxes; and flight control systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in power train and rotor organizational maintenance (6/74).

NV-1704-0176

UH-2C POWER PLANTS, FUEL, TRANSMISSIONS AND RELATED SYSTEMS ORGANIZATIONAL MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, Imperial Beach, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 8/68–1/88.

Objectives: To train maintenance personnel to maintain, operate, and service the UH-2C T58-GE-8B power plant, fuel, transmission, and related systems at the organizational level.

Instruction: Lectures and practical exercises in the maintenance, operation, and servicing of the UH-2C T58-GE-8B power plant, fuel, transmission, and related systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in power plant organizational maintenance (6/74).

NV-1704-0177

AVIATION STRUCTURAL MECHANIC S (STRUCTURES), CLASS C7

(Aviation Structural Mechanic S (Structures, Class B)

Course Number: C-603-2011.

Location: Air Technical Training Center, Memphis, TN.

Length: 13–14 weeks (540–556 hours).

Exhibit Dates: 10/65–12/84.

Objectives: To train personnel to perform as aviation structural mechanics.

Instruction: Lectures and practical exercises in aviation structural repair, including introduction to electricity, circuits, and magnetism; orthographic and isometric drawings; sectional drawings; reading electrical system schematics; procurement of aircraft parts; maintenance and materiel control; introduction to aviation maintenance management; planned maintenance system; theory of corrosion and aircraft cleaning; aircraft rib repairs; and testing of metals.

Credit Recommendation: In the vocational certificate category, 10 semester hours in aircraft structures shop (6/74); in the lower-division baccalaureate/associate degree category, 5 semester hours in aircraft structures shop (6/74).

NV-1704-0178

C-121 ELECTRICAL SYSTEMS

Course Number: D-600-010.

Location: Oceanographic Air Survey Unit, Patuxent River, MD.

Length: 3 weeks (90 hours).

Exhibit Dates: 12/66–12/68.

Objectives: To train aviation electricians to troubleshoot and repair the electrical systems of C-121 aircraft.

Instruction: Lectures and practical exercises in the electrical systems of C-121 aircraft, including AC and DC power systems, air conditioning and pressurization, fuel and oil systems, miscellaneous systems, Hamilton Standard propeller system, and Sperry engine analyzer.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (12/68).

NV-1704-0179

C-121 ELECTRONIC SYSTEMS

Course Number: D-600-011.

Location: Oceanographic Air Survey Unit, Patuxent River, MD.

Length: 3 weeks (90 hours).

Exhibit Dates: 12/66–12/68.

Objectives: To train aviation electronics technicians in basic electronic components and systems in C-121 aircraft.

Instruction: Lectures and practical exercises in basic electronic components and systems in C-121 aircraft, including communication, navigation, and AN/APS-42 radar systems in the C-121J transport; communications, navigation, radar, IFF, and other associated equipment in EC-121K systems and special EC-121 electronics configurations.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (12/68).

NV-1704-0180

F-8 POWER PLANTS AND RELATED SYSTEMS

Course Number: E-601-1910.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Jacksonville, FL.

Length: 3 weeks (120 hours).

Exhibit Dates: 3/68–1/88.

Objectives: To train maintenance personnel to operate, service, and maintain F-8 power plants and related systems.

Instruction: Lectures and practical exercises in F-8 power plant and related systems operation, servicing, and maintenance, including fuel system components and location, venting and pressurization, aircraft refueling and defueling, and gaging operations; fuel cell removal and installation; power plants, principles of jet propulsion; compressor section, combustion, turbine exhaust, air system flow control and utilization, lubrication, constant speed drive, ignition, fuel pump, fuel control, and rigging and adjusting; engine removal and installation of afterburners, periodic inspections, preservation and depreservation, and corrosion control; aircraft checks; and pneumatic and starting systems.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/74).

NV-1704-0181

J52-P6/6A/8A INTERMEDIATE MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Cherry Point, NC.

Length: 3 weeks (120 hours).

Exhibit Dates: 10/67–1/88.

Objectives: To train enlisted personnel to maintain the J52 jet engine.

Instruction: Lectures and practical exercises in J52 jet engine maintenance and repair, including engine introduction; repair and replacement of engine components; cold section disassembly for complete repair activities; hot section disassembly; lubrication system; engine fuel system; electrical, ignition, and air systems cleaning, inspection and repair; and assembly, test, and installation procedures.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/74).

NV-1704-0182

F/RF-4B/J POWER PLANT AND RELATED SYSTEMS MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Cherry Point, NC.

Length: 3 weeks (104 hours).

Exhibit Dates: 3/68–1/88.

Objectives: To train maintenance personnel to maintain and service J-79-GE-8/10 power plant systems and F/RF-4B/J fuel systems.

Instruction: Lectures and practical exercises in J-79-GE-8/10 power plant systems and the F/RF-4B/J fuel systems maintenance, troubleshooting, and servicing, including personnel, aircraft, and equipment safety; system description and operation; fuel system maintenance; power plant, engine description, fuel system, nozzle system, ignition, lubrication, air induction, and forward cockpit; and aircraft and engine-related systems components description, maintenance, and trouble analysis.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/74).

NV-1704-0183

AIRCRAFT LAUNCH AND RECOVERY EQUIPMENT MAINTENANCE OFFICER (C-7/11 CATAPULT), CLASS O

Course Number: Not available.

Location: Air Technical Training Center, Lakehurst, NJ.

Length: 9 weeks (368 hours).

Exhibit Dates: 10/70–1/88.

Objectives: To train selected commissioned officers to operate, inspect, and maintain the C-7/11 catapults and Mark 7 arresting gear and barricades, and to familiarize the student with the visual landing aids (including the Fresnel lens optical landing system, manually operated visual landing aid system, and the pilot landing aid television system).

Instruction: Lectures and practical exercises in the operation, maintenance, and inspection of the C-7/11 catapults and Mark 7 arresting gear and barricades. Topics include fundamentals, description of aircraft launching equipment and aircraft recovery equipment, and aircraft launching and recovery procedures.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/74).

NV-1704-0184

AIRCRAFT LAUNCH AND RECOVERY EQUIPMENT, CLASS O

Course Number: C-2G-2010.

Location: Air Technical Training Center, Lakehurst, NJ.

Length: 3–4 weeks (120–160 hours).

Exhibit Dates: 10/70–1/88.

Objectives: To train officers in aircraft launch and recovery operations and procedures.

Instruction: Lectures and practical exercises in aircraft launch and recovery operations and procedures, including equipment familiarization, operations, aircraft launch and recovery equipment, catapults and arresting gear, steam catapults, and associated equipment, arresting gear, aircraft launch and recovery procedures, aircraft launching bulletins, launching procedures, recovery operations, and functions of V-2 division officer.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (7/74).

NV-1704-0185

A-4 INTEGRATED ELECTRICAL SYSTEMS ORGANIZATIONAL MAINTENANCE

Course Number: C-602-3728.

Location: Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Beaufort, SC.

Length: 6 weeks (248 hours).

Exhibit Dates: 2/73–1/88.

Objectives: To train enlisted personnel to maintain A-4 aircraft electrical systems.

Instruction: Lectures and practical exercises in the maintenance of A-4 aircraft electrical systems, including electrical and instrument systems, system integration, functional analysis, all-attitude and low-altitude bombing system, remote standby attitude indication system, automatic flight control system, navigational computer, and planned maintenance procedures.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory (4/74).

NV-1704-0186

AVIATION FUEL SYSTEMS, CLASS C

Course Number: C-821-2011.

Location: Air Technical Training Center, Lakehurst, NJ; Air Technical Training Center, Philadelphia, PA.

Length: 5 weeks (200 hours).

Exhibit Dates: 10/65–1/88.

Objectives: To train selected enlisted personnel to operate and maintain aviation fuel systems.

Instruction: Lectures and practical exercises in aviation fuel systems operation and maintenance, including fuel quality control and portable equipment, store-based refueling equipment, low-capacity gasoline system and inert-gas producer, and the JP-5 fuel system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in aviation technology (7/74).

NV-1704-0187

AIRCRAFT LAUNCH AND RECOVERY EQUIPMENT (C-13 AND C-13 MOD 1 CATAPULTS), CLASS C

(Aircraft Launch and Recovery Equipment (C-13 Catapult, Class C))

Course Number: C-680-2011.

Location: Air Technical Training Center, Lakehurst, NJ.

Length: 9 weeks (352 hours).

Exhibit Dates: 8/70–1/73.

Objectives: To train personnel in the operation, inspection, and maintenance of C-13 catapults and related equipment; Mark 7 Mods 1, 2, and 3 arresting gear and barricades; and shore-based arresting gear.

Instruction: Lectures and practical exercises in aircraft launch and recovery equipment (C-13 and C-13 Mod 1 catapults), class C, including basic information relating to catapult and arresting gear, specific aircraft launching equipment, basic information relative to all-steam catapults, steam system, launching engine system, retraction engine system, bridle-tensioning system, control system, associated equipment, bridle-arrestor system, and operation of catapult, aircraft recovery equipment, and shore-based arresting gear.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (7/74).

NV-1704-0188

F/RF-4B/J J79-GE-8/10 POWER PLANT ORGANIZATIONAL MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Cherry Point, NC.

Length: 2 weeks (96 hours).

Exhibit Dates: 7/71–1/88.

Objectives: To train maintenance personnel in the latest maintenance procedures required to maintain J79-GE-8/10 power plants of F/RF-4B/J aircraft at the organizational level.

Instruction: Lectures and practical exercises in J79-GE-8/10 power plant organizational maintenance, including aircraft familiarization, engine maintenance and inspection procedures, general safety, and publications.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/74).

NV-1704-0189

F-4B/J POWER GENERATING SYSTEM INTERMEDIATE MAINTENANCE

Course Number: C-602-3819.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Cherry

Point, NC; Air Maintenance Training Detachment, El Toro, CA.
Length: 2 weeks (64-75 hours).
Exhibit Dates: 3/70-1/88.
Objectives: To train maintenance personnel to service and maintain power-generating systems in the F-4 aircraft.
Instruction: Lectures and practical exercises in the service and maintenance of the power-generating systems in the F-4 aircraft. Course includes electric generators and related components, constant-speed drive systems repair, voltage regulators, and AC systems test procedures.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (7/74).

NV-1704-0190

A-7A/B Structures, Hydraulics and Pneumatic Systems Maintenance
(A-7A/B Hydraulic and Pneumatic Systems Organizational Maintenance)

Course Number: C-602-3785.
Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL.
Length: 3 weeks (120 hours).
Exhibit Dates: 3/71-Present.
Objectives: To train maintenance personnel to maintain and service A-7A/B structures and hydraulic, pneumatic, and primary and auxiliary flight control systems.
Instruction: Lectures and practical exercises in the maintenance and servicing of A-7A/B structures and hydraulic, pneumatic, and primary and auxiliary flight control systems. Course includes hydraulic and pneumatic principles, fuel cells, and hydraulic power control.
Credit Recommendation: In the vocational certificate category, 4 semester hours in hydraulic and pneumatic laboratory (3/82); in the lower-division baccalaureate/associate degree category, 2 semester hours in hydraulic and pneumatic laboratory (3/82).

NV-1704-0191

KC-130F Airframes and Hydraulics Organizational Maintenance

Course Number: Not available.
Location: Air Maintenance Training Detachment, El Toro, CA.
Length: 2 weeks (80 hours).
Exhibit Dates: 1/70-1/88.
Objectives: To train maintenance personnel to maintain and repair the KC-130F aircraft's airframe and hydraulic systems.
Instruction: Lectures and practical exercises in the maintenance and repair of the KC-130F aircraft's airframe and hydraulic systems, including structural repairs, flight controls, landing gear, and steering systems.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in aircraft structural repair and hydraulics (7/74).

NV-1704-0192

F/RF-4B/J Aircraft Mechanics Organizational Maintenance

Course Number: C-600-3831.
Location: Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Cherry Point, NC.
Length: 3 weeks (120 hours).
Exhibit Dates: 6/72-1/88.
Objectives: To train maintenance personnel to maintain F/RF-4B/J aircraft and J79-GE-8/10 engines at the organizational level.
Instruction: Lectures and practical exercises in the maintenance of R/RF-4B/J aircraft and J79-GE-8/10 engines, including electrical, armament, hydraulics and airframes, fuel and refuel, and pressurization and vent systems; survival equipment; fuel transfer; basic engine description; power plants and related systems; and inspection and installation procedures.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in aircraft maintenance (7/74).

NV-1704-0193

KC-130F Propeller Intermediate Maintenance

Course Number: Not available.
Location: Air Maintenance Training Detachment, El Toro, CA.
Length: 2 weeks (64 hours).
Exhibit Dates: 1/70-1/88.
Objectives: To train maintenance personnel to operate, test, maintain, and repair the propeller of the KC-130 aircraft.
Instruction: Lectures and practical exercises in the operation, testing, maintenance, and repair of the propeller of the KC-130 aircraft, including component assembly and disassembly for the Hamilton Standard 54-H-60 propeller, electrical control system, pressure and other testing procedures, and installation and adjustment procedures.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (7/74).

NV-1704-0194

H-46 Hydraulic System Organizational Maintenance

Course Number: C-602-3416.
Location: Air Maintenance Training Detachment, New River, NC; Air Maintenance Training Detachment, Santa Ana, CA.
Length: 2 weeks (64-80 hours).
Exhibit Dates: 8/70-1/88.
Objectives: To train maintenance personnel to maintain H-46 hydraulic systems.
Instruction: Lectures and practical exercises in the maintenance of H-46 hydraulic systems, including wheel brake, flight control, and utility hydraulic systems components and operation.
Credit Recommendation: In the vocational certificate category, 2 semester hours in aircraft hydraulics laboratory (6/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft hydraulics laboratory (6/75).

NV-1704-0195

E-1B Airframe and Hydraulic Systems Organizational Maintenance

Course Number: Not available.
Location: Air Maintenance Training Detachment, North Island, CA; Air Maintenance Training Detachment, Norfolk, VA.
Length: 2 weeks (80 hours).
Exhibit Dates: 10/68-1/88.
Objectives: To train maintenance personnel to operate and maintain the airframe and hydraulic systems of the E-1B aircraft.
Instruction: Lectures and practical exercises in the operation and maintenance of the airframe and hydraulic systems of the E-1B aircraft, including power system and sources, emergency hydraulic system, alighting gear components and systems, hydraulically operated flight controls and accessory systems, various flight controls and surfaces, airframe mechanisms, and inspection and troubleshooting procedures.
Credit Recommendation: In the vocational certificate category, 3 semester hours in hydraulic laboratory (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in hydraulic laboratory (7/74).

NV-1704-0196

Senior Officers Orientation
(Senior Officer Helicopter Training)

Course Number: Not available.
Location: Air Basic Training Command, Pensacola, FL.
Length: 5 weeks (58 hours).
Exhibit Dates: 7/64-12/68.
Objectives: To train senior officers in helicopter flight characteristics.
Instruction: Lectures and practical exercises in helicopter flight characteristics, including aerodynamics and flight characteristics of the H-33 helicopter; preflight inspection procedures; engine starting procedures; vertical takeoff; hovering; vertical landing; engine shutdown, postflight inspection; various maneuvers; and night training.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (7/74).

NV-1704-0197

Naval Aviation Observer (Controller), Class O

Course Number: Not available.
Location: Naval Air Station, Glynco, GA.
Length: 5 weeks (192 hours).
Exhibit Dates: 6/57-12/68.
Objectives: To train officers to be aviation observers with the airborne combat information center.
Instruction: Lectures and practical exercises in basic electronics, air navigation, airborne combat information center equipment usage, and combat information center tactics.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (7/74).

NV-1704-0198

A-3 S-5 Auto Pilot Maintenance

Course Number: C-602-3704.
Location: Air Maintenance Training Detachment, Whidbey Island, WA.
Length: 3 weeks (120 hours).
Exhibit Dates: 3/68-1/88.
Objectives: To train maintenance personnel to operate and maintain the S-5 autopilot.
Instruction: Lectures and practical exercises in S-5 autopilot operation and maintenance, including theory of operation, maintenance procedures, autopilot system familiarization, troubleshooting and field maintenance, and components description.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (7/74).

NV-1704-0199

Aviation Fuel Systems, Class C

Course Number: Not available.
Location: Air Technical Training Center, Lakehurst, NJ.
Length: 5 weeks (192 hours).
Exhibit Dates: 4/70-1/88.
Objectives: To train personnel to operate and maintain aviation fueling systems.
Instruction: Lectures and practical exercises in the operation and maintenance of

aviation fueling systems, including shore-based refueling equipment, fuel quality control and portable equipment, aviation gasoline/JP-5 fuel systems, operation of the aviation fuel systems, administrative and safety precautions, pumps and filters, and purifiers and fueling stations.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (7/74).

NV-1704-0200

Aircraft Launch and Recovery Equipment Maintenance Officer (C-13 Catapult), Class O

Course Number: Not available.

Location: Air Technical Training Center, Lakehurst, NJ.

Length: 9 weeks (368 hours).

Exhibit Dates: 10/70–1/88.

Objectives: To train selected officers to operate, inspect, and maintain the C-13 catapults and Mark 7 arresting gear and barricades.

Instruction: Lectures and practical exercises in the operation, inspection, and maintenance of the C-13 catapults and the Mark 7 arresting gear and barricades. Course includes the fundamentals of launch and recovery, aircraft launching and recovery equipment, and aircraft launching and recovery procedures.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (8/74).

NV-1704-0201

F/RF-4B J79-GE-8/8A Cold Section Repair

Course Number: Not available.

Location: Air Maintenance Training Detachment, El Toro, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 3/68–1/88.

Objectives: To train maintenance personnel in intermediate cold-section repair.

Instruction: Lectures and practical exercises in cold-section repair. Course includes inspection, disassembly, cleaning, minor repair, and assembly techniques and procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (8/74).

NV-1704-0202

F/RF-4B J79-GE-8/8A Hot Section and Related Systems Intermediate Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, El Toro, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 3/68–1/88.

Objectives: To train maintenance personnel to maintain the F/RF-4B J79-GE-8/8A hot section and related systems.

Instruction: Lectures and practical exercises in the maintenance of the F/RF-4B J79-GE-8/8A hot section and related systems. Course includes inspection, disassembly, cleaning, minor repair, and assembly techniques and procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (8/74).

NV-1704-0203

A-7E C-8185 Armament Station Control Unit Intermediate Maintenance

Course Number: C-646-3788.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL.

Length: 2 weeks (80 hours).

Exhibit Dates: 9/72–1/88.

Objectives: To train enlisted personnel to maintain equipment on C-8185 armament station control units.

Instruction: Lectures and practical exercises in the maintenance of equipment on C-8185 armament station control units, including inspection, disassembly, repair, troubleshooting, and reassembly techniques and procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (8/74).

NV-1704-0204

UH-1N Power Package Organizational Maintenance

Course Number: C-600-3357.

Location: Air Maintenance Training Detachment, Cp. Pendleton, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 10/72–1/88.

Objectives: To train fleet maintenance personnel to maintain the UH-1N power package.

Instruction: Lectures and practical exercises in the maintenance of the UH-1N power package. Course includes power package removal; installation and alignment; Hg control system; Nf control system; and the fuel and oil system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour as an elective in industrial or mechanical technology program (6/74).

NV-1704-0205

HH-2D/SH-2D Automatic Stabilization Equipment Intermediate Maintenance

Course Number: C-602-3391.

Location: Air Maintenance Training Detachment, Lakehurst, NJ; Air Maintenance Training Detachment, Imperial Beach, CA.

Length: 2 weeks (92 hours).

Exhibit Dates: 8/73–1/88.

Objectives: To train enlisted personnel to maintain and test the automatic stabilization equipment in HH-2D/SH-2D helicopters.

Instruction: Theoretical and practical training on gyro, accelerometer, synchro, amplifier, mod-demod, and synchronizer subsystems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in aircraft electronic maintenance laboratory (6/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft electronic maintenance laboratory (6/75).

NV-1704-0206

P-3 Structures, Hydraulic Power and Flight Controls Organizational Maintenance

Course Number: C-603-3531.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, Jacksonville, FL.

Length: 3–4 weeks (120 hours).

Exhibit Dates: 5/73–Present.

Objectives: To provide training in maintenance and servicing procedures for the hydraulics and flight control systems on P-3 aircraft.

Instruction: Theoretical and practical training in hydraulics, electro-mechanical units, flight control system operation, and assembly and rigging.

Credit Recommendation: In the vocational certificate category, 2 semester hours in aircraft hydraulic and general maintenance (7/81); in the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft hydraulic and general maintenance (7/81).

NV-1704-0207

UH-1N Electrical Systems Organizational Maintenance

Course Number: C-602-3354.

Location: Air Maintenance Training Detachment, Cp. Pendleton, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 9/73–1/88.

Objectives: To train enlisted personnel in the maintenance and repair of the UH-1N helicopter electrical system.

Instruction: Instruction in DC power distribution, AC power systems, batteries, wiring diagrams, and warning circuits.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft electrical maintenance (6/75).

NV-1704-0208

Aircrew Survival Equipmentman, Class C7

(Advanced Aircrew Survival Equipmentman)

(Aircrew Survival Equipmentman School, Class B)

Course Number: C-602-2011.

Location: Air Technical Training Center, Lakehurst, NJ.

Length: Self-paced 11–13 weeks (260–512 hours).

Exhibit Dates: 6/68–1/88.

Objectives: To provide personnel with the comprehensive theoretical, practical, and administrative background necessary to perform duties in operating squadrons.

Instruction: Lectures and practical exercises in aircraft maintenance and material management; major and minor repairs on sewing machines; liquid oxygen; rigid seat survival seats and oxygen systems test stands; oxygen regulators; and advanced parachutes.

Credit Recommendation: In the vocational certificate category, 5 semester hours in aerotechnology, and 1 in sewing machine repair and operation (5/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in industrial management and 3 in aerotechnology (5/74).

NV-1704-0209

F-14A Environmental/Escape System Specialist (Crew Leader) Organizational Maintenance

Course Number: C-602-3898.

Location: Air Maintenance Training Detachment, Miramar, CA.

Length: 4 weeks (175 hours).

Exhibit Dates: 9/73–1/88.

Objectives: To train technicians as supervisory personnel in the maintenance and operation of F-14 aircraft environmental/escape systems.

Instruction: Instruction in pneumatics, pressurization, air conditioning and refrigeration, high pressure air and liquid principles, liquid oxygen phenomena, and pressure suit operation.

Credit Recommendation: In the vocational certificate category, 3 semester hours in aircraft pressurization and air conditioning systems maintenance (6/75); in the lower-division baccalaureate/associate degree category, 2 semester hours in aircraft pressurization and air conditioning systems maintenance (6/75).

NV-1704-0210

F-14A ENVIRONMENTAL AND ESCAPE SYSTEMS TECHNICIAN (CREW MEMBER) ORGANIZATIONAL MAINTENANCE

Course Number: C-602-3899.

Location: Air Maintenance Training Detachment, Miramar, CA.

Length: 3-4 weeks (140 hours).

Exhibit Dates: 4/73-1/88.

Objectives: To train technicians in the maintenance and operation of F-14 aircraft environmental/escape systems.

Instruction: Instruction in pneumatics, pyrotechnic components, pressurization systems, air conditioning, liquid oxygen handling, and servicing.

Credit Recommendation: In the vocational certificate category, 2 semester hours in aircraft pressurization and air conditioning systems maintenance (6/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft pressurization and air conditioning systems maintenance (6/75).

NV-1704-0211

F-14A ORGANIZATIONAL MAINTENANCE SUPERVISOR'S FAMILIARIZATION

Course Number: C-000-3896.

Location: Air Maintenance Training Detachment, Miramar, CA.

Length: 2 weeks (70 hours).

Exhibit Dates: 8/73-1/88.

Objectives: To train supervisory personnel in the evaluation and assignment of maintenance tasks relating to the F-14 aircraft.

Instruction: Limited instruction on basic aircraft topics including electrical, hydraulic, flight control, power plant, avionics, and weapon control systems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in general aircraft maintenance (6/75).

NV-1704-0212

F-14A POWER PLANT AND RELATED SYSTEM ORGANIZATIONAL MAINTENANCE TECHNICIAN (CREW MEMBER)

Course Number: C-601-3896.

Location: Air Maintenance Training Detachment, Miramar, CA.

Length: 3 weeks (105 hours).

Exhibit Dates: 8/73-1/88.

Objectives: To train enlisted personnel to perform organizational level maintenance on the F-14 aircraft fuel system and power plant components.

Instruction: Instruction in fuel systems, including tanks, plumbing, pumps, vents, pressurization, electrical caution and warning systems; and in power plant topics including starting and ignition systems, lubrication, control rigging, and troubleshooting.

Credit Recommendation: In the vocational certificate category, 2 semester hours in aircraft fuel systems and turbine engine maintenance (6/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft fuel systems and turbine engine maintenance (6/75).

NV-1704-0213

FIRST TOUR PILOT P-3C COMMUNICATIONS OPERATOR

Course Number: D-2D-0011.

Location: Fleet Airborne Electronics Training Unit, Atlantic, Norfolk, VA.

Length: 2 weeks (67 hours).

Exhibit Dates: 4/68-1/88.

Objectives: To train first tour pilots to qualify as airborne communications operators.

Instruction: Classroom instruction in basic communications, message preparation, theory of radio wave propagation and antenna characteristics, and operation of aircraft communications systems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in communications (6/75).

NV-1704-0214

F-14 WEAPONS SYSTEM TECHNICIAN ORGANIZATIONAL MAINTENANCE

Course Number: C-112-3896.

Location: Air Maintenance Training Detachment, Miramar, CA.

Length: 6-7 weeks (259 hours).

Exhibit Dates: 11/73-1/88.

Objectives: To train enlisted personnel to maintain specific weapons systems on the F-14 aircraft.

Instruction: Instruction in system functional operation, checkout procedures, test equipment utilization, and safety procedures. Emphasis is placed on data processing, data links, transmitters, receivers, pulse techniques, and missile guidance fundamentals.

Credit Recommendation: In the vocational certificate category, 4 semester hours in aviation electronics laboratory (6/75); in the lower-division baccalaureate/associate degree category, 2 semester hours in aviation electronics laboratory (6/75).

NV-1704-0215

F-14A AIRFRAME AND HYDRAULIC SYSTEMS SPECIALIST (CREW LEADER) ORGANIZATIONAL MAINTENANCE

Course Number: C-602-3900.

Location: Air Maintenance Training Detachment, Miramar, CA.

Length: 3-4 weeks (140 hours).

Exhibit Dates: 9/73-1/88.

Objectives: To train personnel in the operation and maintenance of the F-14 aircraft hydraulic system and related subsystems.

Instruction: Instruction in hydraulic principles and equipment and specific training in systems peculiar to the F-14 aircraft.

Credit Recommendation: In the vocational certificate category, 2 semester hours in aircraft hydraulic systems maintenance (6/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft hydraulic systems maintenance (6/75).

NV-1704-0216

F-14A AIRFRAME AND HYDRAULIC SYSTEMS TECHNICIAN (CREW MEMBER) ORGANIZATIONAL MAINTENANCE

Course Number: C-602-3901.

Location: Air Maintenance Training Detachment, Miramar, CA.

Length: 3 weeks (122 hours).

Exhibit Dates: 7/73-1/88.

Objectives: To train enlisted personnel in the operation and maintenance of the F-14 hydraulic systems and related subsystems.

Instruction: Instruction in hydraulic system components; rigid and flexible hydraulic lines; fittings; detailed coverage of systems such as spoiler, radome, refueling probe, ram air door, and gun drive air inlet; and maintenance of landing gear and brake systems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in aircraft hydraulics maintenance (6/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft hydraulics maintenance (6/75).

NV-1704-0217

F-14A COMMUNICATIONS, NAVIGATION/DISPLAYS, ELECTRONIC WARFARE ORGANIZATIONAL MAINTENANCE TECHNICIAN

Course Number: C-102-3896.

Location: Air Maintenance Training Detachment, Miramar, CA.

Length: 5 weeks (196 hours).

Exhibit Dates: 11/73-1/88.

Objectives: To train enlisted personnel in the maintenance of the communications, navigation, and electronic warfare systems on the F-14 aircraft.

Instruction: Specialized instruction on radar beacon systems, UHF communications, navigation subsystems, and electronic warfare systems.

Credit Recommendation: In the vocational certificate category, 4 semester hours in aircraft electronic and navigation equipment maintenance (6/75); in the lower-division baccalaureate/associate degree category, 2 semester hours in aircraft electronic and navigation equipment maintenance (6/75).

NV-1704-0218

F-14A ELECTRICAL SYSTEMS TECHNICIAN (CREW MEMBER) ORGANIZATIONAL MAINTENANCE

Course Number: C-602-3897.

Location: Air Maintenance Training Detachment, Miramar, CA.

Length: 3-4 weeks (140 hours).

Exhibit Dates: 8/73-1/88.

Objectives: To train enlisted personnel in the maintenance of electrical systems on the F-14 aircraft.

Instruction: Lectures and practical exercises on applicable test equipment, publications, and safety procedures. Specific topics include circuit theory of power supply, lighting, safety, armament, and control assemblies.

Credit Recommendation: In the vocational certificate category, 3 semester hours in aircraft electrical repair and maintenance (6/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft electrical repair and maintenance (6/75).

NV-1704-0219

NAVAL FLIGHT OFFICER P-3C COMMUNICATIONS OPERATOR

Course Number: D-2D-0012.

Location: Fleet Airborne Electronics Training Unit, Atlantic, Norfolk, VA.

Length: 4 weeks (134 hours).

Exhibit Dates: 4/68-1/88.

Objectives: To train flight officers (non-pilots) to be airborne communications officers.

Instruction: Lectures and practical exercises in basic communications, teletype operation, message preparation, theory of radio wave propagation and antenna characteristics, and operation of aircraft communications systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in communications (6/75).

NV-1704-0220

Air Controlman-Carrier Air Traffic Control Center Utilization Operator

Course Number: K-222-0051.

Location: Fleet Combat Direction Systems Training Center, Pacific, San Diego, CA.

Length: 5 weeks (140 hours).

Exhibit Dates: 7/74-1/88.

Objectives: To train personnel to perform various aircraft operations duties aboard aircraft carriers.

Instruction: Lectures and practical exercises in aircraft carrier organization and administration; shipboard aircraft handling; and shipboard flight operations and associated electronic equipment, including IFF, radar, and TACAN.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/75).

NV-1704-0221

F-14 Armament Systems Maintenance Technician (Crew Member) Organizational Maintenance

Course Number: C-646-3896.

Location: Air Maintenance Training Detachment, Miramar, CA.

Length: 3 weeks (105 hours).

Exhibit Dates: 11/73-1/88.

Objectives: To train enlisted personnel in the loading, servicing, and maintenance of the F-14 weapons system.

Instruction: Practical exercises in weapons loading, safety procedures, and use of specialized equipment peculiar to the F-14 weapons system.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/75).

NV-1704-0222

EA-6B J-52-P-408 Power Plants and Related Systems Organizational Maintenance

Course Number: C-601-3762.

Location: Air Maintenance Training Detachment, Whidbey Island, WA.

Length: 2 weeks (80 hours).

Exhibit Dates: 8/73-1/88.

Objectives: To train enlisted personnel in the servicing and maintenance of the EA-6B aircraft power plants.

Instruction: Practical exercises using test-analyzing equipment, engine performance test criteria, and fuel system malfunction analysis.

Credit Recommendation: In the vocational certificate category, 2 semester hours in aircraft power plant maintenance (6/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft power plant maintenance (6/75).

NV-1704-0223

EA-6B Hydraulics and Flight Control Organizational Maintenance

Course Number: C-602-3779.

Location: Air Maintenance Training Detachment, Whidbey Island, WA.

Length: 2 weeks (80 hours).

Exhibit Dates: 11/73-1/88.

Objectives: To train enlisted personnel to maintain the hydraulic system on the EA-6B aircraft.

Instruction: Lectures and practical exercises in the maintenance of all hydraulic systems and components of the EA-6B aircraft including the use of test equipment and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in aircraft hydraulic systems maintenance (6/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft hydraulic systems maintenance (6/75).

NV-1704-0224

E-2B/C-2A Aviation Electrician Organizational Maintenance

Course Number: C-602-3479.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 4 weeks (118 hours).

Exhibit Dates: 5/73-1/88.

Objectives: To train enlisted personnel to maintain the electrical system on the E-2B/C-2A aircraft.

Instruction: Lectures and practical exercises in AC/DC power systems, de-icing, pressurization, air conditioning, and instrument and automatic flight control systems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in aircraft electrical maintenance (6/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft electrical maintenance (6/75).

NV-1704-0225

E-2B ATDS Operator (Naval Flight Officer)
(E-2B Airborne Tactical Data Systems Operator (Naval Flight Officer))

Course Number: D-2D-0016.

Location: Carrier Airborne Early Warning Training Squadron 120, Norfolk, VA.

Length: 16 weeks (173 hours).

Exhibit Dates: 2/74-1/88.

Objectives: To provide advanced training for flight officers (non-pilots) in the airborne tactical data system incorporated in the E-2B aircraft.

Instruction: Instruction includes ground training on weapon system operation and flight training in the utilization of the weapon system.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/75).

NV-1704-0226

E-2B Airborne Tactical Data Systems
(E-2B Naval Flight Officer)

Course Number: E-2D-0201.

Location: Carrier Airborne Early Warning Training Squadron 110, North Island, CA.

Length: 20-30 weeks.

Exhibit Dates: 1/73-1/88.

Objectives: To prepare flight officers (non-pilots) and student flight officers for duty in the E-2B airborne tactical data system.

Instruction: Student flight officers complete 10 weeks of air intercept control training and are designated as Air Intercept Controllers before entering the final 20 weeks of training. Classroom and flight training includes laboratory and exercise simulation in tactical data system operations, antisubmarine tactics, equipment operation, electronic theory, air intelligence, communications, and target identification and intercept.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electronics laboratory (6/75).

NV-1704-0227

E-1B Power Plants and Related Systems Organizational Maintenance

Course Number: C-601-3456; C-601-14.

Location: Air Maintenance Training Detachment, North Island, CA; Air Maintenance Training Detachment, Norfolk, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 12/68-1/88.

Objectives: To train enlisted personnel in the maintenance procedures for the R1820-82A reciprocating engine.

Instruction: Theory and practical exercises in maintenance techniques used on reciprocating engines, including removal and installation, operational checks, troubleshooting, and related systems (external oil, propeller, fuel, carburetor, ignition) maintenance.

Credit Recommendation: In the vocational certificate category, 2 semester hours in aircraft power plant and reciprocating engine maintenance (6/75); in the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft power plant and reciprocating engine maintenance (6/75).

NV-1704-0228

Avionics Repairman, Class C

Course Number: C-100-2014.

Location: Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN.

Length: 5 weeks (167 hours).

Exhibit Dates: 11/73-12/80.

Objectives: To provide basic avionics/electronics organizational maintenance training to selected Marine Corps personnel so that they may assume the duties of an Avionics Repairman in an Organizational Maintenance Activity (OMA).

Instruction: Lectures and practical exercises to include instruction in aircraft electronic systems, soldering, cable fabrication, test equipment, electrical systems, electrical/electronic components, electrical and electronic fundamentals, and procedures and techniques required to service and repair avionics systems.

Credit Recommendation: In the vocational certificate category, 4 semester hours in basic avionics/electronics (6/75).

NV-1704-0229

AN/AVM-11 (V) Head Up Display Test Set Intermediate Maintenance (A-7E)

Course Number: C-104-3784; C-150-3785.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL.

Length: *Version 1:* 12-13 weeks (480-520 hours). *Version 2:* 12 weeks (480 hours).
Exhibit Dates: *Version 1:* 10/78-Present. *Version 2:* 7/73-9/78.
Objectives: To provide instruction in the calibration, troubleshooting, repair and maintenance of a specific electronic test set.
Instruction: *Version 1:* Lectures and practical exercises in troubleshooting, circuit analysis and repair, maintenance and calibration of the AN/AVM-11 (V) HUD test set. Instruction covers power supply, magnetic tape unit, command bus and data transmission, display control and specific circuit troubleshooting analysis. *Version 2:* Lectures and practical exercises in troubleshooting, circuit analysis and repair, maintenance, and calibration of the AN/AVM-11 (V) HUD test set. Instruction covers service unit analysis, control unit analysis, line switch unit, and general and special purpose functional test units.
Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in electronic maintenance and 3 in electronic maintenance laboratory (3/82); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronic laboratory troubleshooting and 1 in electronic troubleshooting theory for non-electrical engineering majors (3/82). *Version 2:* In the vocational certificate category, 6 semester hours in advanced avionics maintenance (6/75).

NV-1704-0230

AN/ASH-20 (V) FLIGHT RECORDER-LOCATOR SYSTEM INTERMEDIATE MAINTENANCE

Course Number: C-102-3601.
Location: Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Jacksonville, FL.
Length: 3 weeks (104-120 hours).
Exhibit Dates: 9/73-Present.
Objectives: To provide instruction in the maintenance of flight recorder-locator systems to include analysis of the system, subsystems, and repairable components.
Instruction: Practical application of learned procedures for checkout, adjustment, troubleshooting, and repair of the flight recorder/locator system and circuits, including radio beacon, battery charger, signal data-sound recorder, digital/analog converters, encoders, and microphone amplifiers.
Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic flight recorder maintenance (7/81).

NV-1704-0231

F-4J AN/AWG-10 MISSILE CONTROL SYSTEM (ENLISTED) FAMILIARIZATION

Course Number: C-121-012.
Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Cherry Point, NC.
Length: 2 weeks (80 hours).
Exhibit Dates: 12/69-1/88.
Objectives: To provide enlisted personnel with familiarization with the F-4J missile control system.
Instruction: Lectures and practical exercises in the operation and testing of an aircraft missile control system.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (6/75).

NV-1704-0232

E-2B WEAPON SYSTEM TRAINER (WST)

Course Number: E-2D-0202.
Location: Carrier Airborne Early Warning Training Squadron 110, Miramar, CA.
Length: 5 weeks (152 hours).
Exhibit Dates: 1/70-1/88.
Objectives: To train personnel to utilize the full capabilities of the E-2B weapon system.
Instruction: Lectures and practical exercises in introduction to simulator; use of laboratory instruments including scope controls, data entry systems and intercept control displays; and interpretation of intercept and tracking displays.
Credit Recommendation: Credit is not recommended because of the military specific nature of the course (6/75).

NV-1704-0233

E-1B NAVAL FLIGHT OFFICER AND AIRCREWMAN

Course Number: D-2D-0017; D-221-0016.
Location: Carrier Airborne Early Warning Training Squadron 120, Norfolk, VA.
Length: 16 weeks (200 hours).
Exhibit Dates: 1/70-1/88.
Objectives: To train personnel to operate and maintain the APS-82 radar and associated systems and to perform any E-1B mission.
Instruction: Lectures and practical exercises to include E-1B avionics systems and general missions, and maintenance and troubleshooting procedures on specialized electronic systems.
Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics (6/75).

NV-1704-0234

1. AIRCREW SURVIVAL EQUIPMENTMAN, CLASS A1 (BASIC AIRCREW SURVIVAL EQUIPMENTMAN)
   (Aircrew Survival Equipmentman, Class A)
   (Parachute Rigger, Class A)
2. PARACHUTE RIGGER (MAINTENANCE), CLASS A

Course Number: *Version 1:* C-602-2010. *Version 2:* None.
Location: Air Technical Training Center, Lakehurst, NJ.
Length: *Version 1:* Self-paced 10-18 weeks (300 hours). *Version 2:* 7 weeks (280 hours).
Exhibit Dates: *Version 1:* 8/65-1/88. *Version 2:* 3/56-7/65.
Objectives: To provide the basic skills and knowledge necessary to maintain survival equipment and associated machinery.
Instruction: *All Versions:* Classroom instruction in the operation and maintenance of aircraft, oxygen, and carbon dioxide systems and survival equipment. *Version 1:* Topics include aviation fundamentals; basic and advanced parachute skills and techniques; and sewing machine and fabric work involving machine operation, fabric layout, and sewing projects.
Credit Recommendation: *Version 1:* In the vocational certificate category, 5 semester hours in aeronautical technology and 2 in sewing and machinery (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in aeronautical technology (5/74). *Version 2:* In the vocational certificate category, 3 semester hours in oxygen/carbon dioxide equipment and pressure suits (5/74).

NV-1704-0235

H-53 ELECTRICAL AND INSTRUMENT SYSTEMS ORGANIZATIONAL MAINTENANCE

Course Number: C-602-3444.
Location: Air Maintenance Training Detachment, Santa Ana, CA.
Length: 2 weeks (80 hours).
Exhibit Dates: 5/70-1/88.
Objectives: To provide instruction in the maintenance of electrical and instrument systems of the H-53 aircraft.
Instruction: Practical application of H-53 systems familiarization topics and transistor fundamentals in the operation, maintenance, and servicing of the aircraft electrical and instrument systems.
Credit Recommendation: In the vocational certificate category, 2 semester hours in aircraft electrical and instrument systems maintenance (6/75).

NV-1704-0236

H-53 ELECTRICAL AND INSTRUMENTS INTERMEDIATE MAINTENANCE

Course Number: C-602-3441.
Location: Air Maintenance Training Detachment, Santa Ana, CA.
Length: 2 weeks (80 hours).
Exhibit Dates: 5/70-1/88.
Objectives: To train personnel in the operating, servicing, and maintenance of the H-53 aircraft instruments system.
Instruction: Lectures and practical exercises in the application of transistor fundamentals to power systems, light systems, instruments, heaters, and controllers. Topics include block diagram description and troubleshooting.
Credit Recommendation: In the vocational certificate category, 2 semester hours in electrical and instrument maintenance (6/75).

NV-1704-0237

C-130 AIRCRAFT MECHANIC ORGANIZATIONAL MAINTENANCE

Course Number: C-600-3502.
Location: Air Maintenance Training Detachment, El Toro, CA.
Length: 4 weeks (160 hours).
Exhibit Dates: 8/73-1/88.
Objectives: To provide instruction in the organizational level maintenance of the Lockheed C-130 turbo-prop (heavy transport) aircraft.
Instruction: Classroom and practical instruction in the latest maintenance techniques, modifications and alterations, systems operation, and servicing of the aircraft.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in advanced aircraft maintenance and repair (6/75).

NV-1704-0238

AVIATION MACHINIST'S MATE H (HELICOPTER), CLASS A

Course Number: Not available.
Location: Air Technical Training Center, Memphis, TN.
Length: 12 weeks (464 hours).
Exhibit Dates: 10/56-12/68.
Objectives: To train selected Marine Corps personnel to maintain helicopters.

Instruction: Lectures and practical exercises in the maintenance and mechanics of helicopters, to include power plant and line operation principles; fuel metering, ignition, rotor transmission, and flight control familiarization, function, operation, replacement, inspection, and servicing.

Credit Recommendation: In the vocational certificate category, 18 semester hours in helicopter mechanics (6/74); in the lower-division baccalaureate/associate degree category, 9 semester hours in helicopter mechanics (6/74).

NV-1704-0239

Aviation Structural Mechanic, Class B

Course Number: None.

Location: Air Technical Training Center, Memphis, Millington, TN.

Length: 24-26 weeks (960-1040 hours).

Exhibit Dates: 9/57-9/65.

Objectives: To train personnel to perform as aviation structural mechanics.

Instruction: Lectures and practical exercises in fundamentals of mathematics and electricity, publications and reports, utilization and interpretation of schematic drawings, aircraft metals, welding, non-metallic materials, aircraft hydraulics, and airframes and operational maintenance.

Credit Recommendation: In the vocational certificate category, 18 semester hours in aircraft structural mechanics (6/76); in the lower-division baccalaureate/associate degree category, 9 semester hours in aircraft structural mechanics (6/76).

NV-1704-0240

A-6A, KA-6D, A-6E Electrical Systems Organizational Maintenance

Course Number: C-602-3766.

Location: Naval Air Maintenance Training Detachment, Whidbey Island, WA.; Naval Air Maintenance Training Detachment, Oceana, VA.

Length: 6 weeks (224 hours).

Exhibit Dates: 4/76-Present.

Objectives: To provide fleet maintenance personnel with instruction in the organization and maintenance of electrical instruments and automatic flight control equipment found on three types of naval aircraft.

Instruction: The student learns the operation of aircraft power supplies, fuel systems, auxiliary electrical systems, environmental controls, automatic flight controls to the block-diagram level for the purpose of maintaining and repairing the equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in aircraft maintenance (7/80).

NV-1704-0241

AN/ASW-15, AN/ASW-16, AN/ASW-39 Automatic Flight Control Systems Intermediate Maintenance

Course Number: C-602-3015.

Location: Naval Air Maintenance Training Detachment, Whidbey Island, WA.; Naval Air Maintenance Training Detachment, Oceana, VA.; Naval Air Maintenance Training Detachment, Miramar, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 4/75-Present.

Objectives: To train experienced personnel to maintain, test, and troubleshoot an aircraft automatic flight control system.

Instruction: Lectures and laboratory instruction in the operation and capabilities of each automatic flight control subsystem. The aircraft automatic flight control system is studied in order to perform corrective maintenance as required.

Credit Recommendation: In the vocational certificate category, 3 semester hours in aircraft systems maintenance (7/80).

NV-1704-0242

EA-6B Electrical Systems Organizational Maintenance

Course Number: C-602-3771.

Location: Naval Air Maintenance Training Detachment, Whidbey Island, WA.

Length: 3 weeks (128 hours).

Exhibit Dates: 1/73-Present.

Objectives: To provide trained personnel with instruction in the theory, operation, and maintenance of aviation electrical systems.

Instruction: Lectures and laboratory assignments in electrical, navigation, and environmental systems, including automatic flight control, fuel and auxiliary systems.

Credit Recommendation: In the vocational certificate category, 6 semester hours in aircraft maintenance (7/80); in the lower-division baccalaureate/associate degree category, 6 semester hours in aviation technology (7/80).

NV-1704-0243

Air Traffic Control Equipment Maintenance Interrogator Set AN/TPX-42A(V)5 Class C1

Course Number: C-103-2028.

Location: Naval Air Technical Training Center, Memphis, TN.

Length: 5 weeks (200 hours).

Exhibit Dates: 6/79-2/87.

Objectives: To train electronics technicians in the preventive and corrective maintenance of the AN/TPX-42A(V)5 Interrogator set.

Instruction: For this course after 2/87 see NV-1715-1433. Lectures and practical exercises in the operation, maintenance and troubleshooting of the AN/TPX-42A radar digital data processing and video presentation circuits and systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in the maintenance of digital data processing and video presentation (2/81).

NV-1704-0244

Terminal Radar Approach Control Class C1

(Radar Air Traffic Control Facility Operations Class C1)

Course Number: C-222-2011.

Location: Naval Air Technical Training Center, Memphis, TN.

Length: 6 weeks (240-276 hours).

Exhibit Dates: 4/78-Present.

Objectives: To train air traffic control personnel, Marine Corps and radar personnel in the use of radar equipment for instrument and visual approaches and departures.

Instruction: Lectures, laboratories and operational exercises in radar air traffic control including simulated surveillance control, instrument approach and departure systems and operation of complex computer data terminals and displays presenting information in graphic forms.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in air traffic control (9/89).

NV-1704-0245

Carrier Air Traffic Control Center Operations Class C1

Course Number: C-222-2012.

Location: Naval Air Techinical Training Center, Memphis, TN.

Length: 5-6 weeks (205-236 hours).

Exhibit Dates: 5/80-Present.

Objectives: To train personnel in air traffic control procedures aboard aircraft carriers.

Instruction: Lectures and practical exercises in specialized air traffic control systems utilized aboard aircraft carriers.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in military science (9/89).

NV-1704-0246

Aviation Support Equipment Technician (Mechanical) Class A

Course Number: C-602-2025.

Location: Naval Air Technical Training Center, Memphis, Millington, TN.

Length: *Version 1:* 17 weeks (680 hours). *Version 2:* 14-16 weeks (536-575 hours).

Exhibit Dates: *Version 1:* 3/84-7/89. *Version 2:* 3/77-2/84.

Objectives: To train enlisted personnel in the maintenance, operation and repair of aircraft support vehicles and equipment.

Instruction: *Version 1:* Lectures and laboratory instruction in the repair, overhaul and troubleshooting of gasoline and diesel engines, electrical systems and related hydraulic systems. Instruction and shop practices in gas and arc welding. *Version 2:* Lectures and laboratory experiences in the maintenance and repair of gasoline, diesel and turbine mechanical power units and related support systems and techniques such as welding, hydraulics and basic electricity.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in gasoline engines, 1 in diesel engines, 2 in basic electricity, 1 in basic hydraulic systems, 1 in oxyacetylene welding, 1 in electric-arc welding (2/85). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in automotive mechanics (gasoline), 1 in diesel engines, 1 turbine engines, 1 in welding, 1 in hydraulics and 1 in basic electricity (2/81).

NV-1704-0247

Submarine 3000 PSI Hydraulics Combined Maintenance

Course Number: A-652-0103.

Location: Fleet Ballistic Missile Center, Charleston, SC; Naval Submarine Training Center Pacific, Pearl Harbor, HI; Naval Submarine School, Groton, CT; Naval Submarine School, New London, CT.

Length: 2 weeks (80 hours).

Exhibit Dates: 11/80-Present.

Objectives: To train enlisted personnel to operate, service and maintain hydraulic systems.

Instruction: Lectures and practical demonstrations in the malfunction analysis and maintenance of hydraulic systems including description and interfacing of components, theory of operation, maintenance and servicing of hydraulic systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in mechanical or aviation technology (6/81).

NV-1704-0248

54H60-77 Propeller Intermediate Maintenance

Course Number: C-602-3536.

Location: Naval Air Station, Patuxent River, MD; Naval Air Station, Moffett Field, CA; Naval Air Station, Jacksonville, FL.

Length: 2 weeks (60 hours).

Exhibit Dates: 12/74–Present.

Objectives: To provide maintenance personnel with the knowledge and skills necessary to perform maintenance on the Hamilton Standard model 54H60-77 propeller and propeller controls.

Instruction: Lectures and practical exercises in the inspection, troubleshooting and test procedures of the Hamilton Standard model 54H60-77 propeller including disassembling, inspection, cleaning and reassembling of the propeller and propeller controls.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in maintenance and repair of hydromatic propellers (7/81).

NV-1704-0249

AD "A" (A7) Power Plant System

Course Number: C-601-3153.

Location: Naval Air Station, Cecil Field, FL; Naval Air Station, LeMoore, CA.

Length: 3 weeks (116 hours).

Exhibit Dates: 10/80–Present.

Objectives: Enlisted personnel are introduced to basic aviation maintenance and safety.

Instruction: An introductory course to familiarize newly indoctrinated personnel to basic math and physics, aircraft nomenclature and theory of flight, theory of jet propulsion and factors affecting thrust, aircraft hardware and basic hand tools, fuels, lube, and hydraulic fluid, aircraft corrosion, preservation and depreservation, gas turbine power plant fundamentals and the Naval Aviation Maintenance Program.

Credit Recommendation: In the vocational certificate category, 1 semester hour in introduction to aviation maintenance (3/82).

NV-1704-0250

A-7E Communication, Navigation, Identification and Countermeasures Organizational Maintenance

Course Number: C-102-3783.

Location: Naval Air Station, Cecil Field, FL; Naval Air Station, LeMoore, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 9/80–Present.

Objectives: To provide experienced avaiation electronics technicians with training in the maintenance of the communication, navigation, identification and countermeasures systems utilized in a A7E aircraft.

Instruction: Lectures in the operation, maintenance and repair of an A7E aircraft navigation, communication, and identification system including a specific UHF communication set (AN/ARC-159), a navigational set (AN/ARN-52), a radar altimeter set (AN/APN-194), a radar beacon and transponder set and electronic countermeasures equipment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in aviation electronics maintenance (3/82).

NV-1704-0251

A-7A/B AN/APQ-116 Radar Set Organizational Maintenance

Course Number: C-104-3781.

Location: Naval Air Station, Cecil Field, FL.

Length: 4 weeks (152 hours).

Exhibit Dates: 4/75–Present.

Objectives: To provide maintenance personnel with instruction in the theory of operation, servicing and maintenance procedures of the radar set AN/APQ-116.

Instruction: Lectures include the theory of operation, servicing and maintenance procedures for the AN/APQ-116 radar set. Practical exercises in the alignment and testing of the AN/APKQ-116 set including the antenna drive system, the power supply/ programmer, the receiver/transmitter, and the command computer.

Credit Recommendation: In the vocational certificate category, 1 semester hour in aviation electronics laboratory (3/82).

NV-1704-0252

A-7E Integrated Weapons Systems Technician Organizational Level Maintenance

Course Number: C-102-3795.

Location: Naval Air Station, Cecil Field, FL; Naval Air Station, LeMoore, CA.

Length: 6 weeks (220 hours).

Exhibit Dates: 1/81–Present.

Objectives: To train maintenance personnel in the operation, maintenance, troubleshooting and testing of an A-7E aircraft integrated weapons system.

Instruction: Lectures and practical experience in the operation and maintenance of the A-7E aircraft integrated weapon system, including block diagram analysis, equipment testing, troubleshooting and adjustment of a tactical computer system, an inertial navigation system and several onboard radar systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in aviation electronics for non-electrical engineering students (3/82).

NV-1704-0253

AN/AVQ-7A/B Head Up Display Set Intermediate Maintenance

Course Number: C-104-3783.

Location: Naval Air Station, Cecil Field, FL.

Length: 4 weeks (160 hours).

Exhibit Dates: 10/80–Present.

Objectives: To provide maintenance personnel with training in the maintenance and repair of a head-up display set (AN/AVQ-7A/B).

Instruction: Lectures in the theory, operation and maintenance of a head-up display set (AN/AVQ-7A/B), including the utilization of computer controlled diagnostic procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in aviation electronics maintenance laboratory (3/82).

NV-1704-0254

A-7E Weapons System Specialist Organizational Maintenance

Course Number: C-102-3799.

Location: Naval Air Station, Cecil Field, FL; Naval Air Station, LeMoore, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 9/77–Present.

Objectives: To train naval electronic technicians in the operation and maintenance of a specific integrated weapon system for the A-7E aircraft.

Instruction: Lectures and laboratory exercises in the operation and maintenance of the A-7E aircraft integrated weapon system, including block diagram analysis, equipment testing, troubleshooting and adjustment of sensory input systems, output/display systems, inertial navigation systems and special weapons systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic circuits theory for non-electrical engineering majors (3/82).

NV-1704-0255

Aviation Support Equipment Cryogenic Intermediate Maintenance

Course Number: C-602-3240.

Location: Naval Air Station, Jacksonville, FL; Naval Air Station, North Island, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 9/78–Present.

Objectives: To train maintenance personnel in servicing procedures on liquid and gaseous oxygen portable servicing trailers in accordance with applicable publications.

Instruction: Lectures and practical exercises in the troubleshooting, servicing and operation of an oxygen pressure regulator. Also included is the servicing of oxygen and nitrogen units (trailer), handling of liquid oxygen and the use of the proper tools, test equipment and publications to service the above mentioned equipment.

Credit Recommendation: In the vocational certificate category, 1 semester hour in aircraft servicing (3/82).

NV-1704-0256

Aviation Support Equipment SDID Aircraft Spotting Dolly Intermediate Maintenance

Course Number: C-602-3229.

Location: Naval Air Station, Jacksonville, FL; Naval Air Station, North Island, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 8/79–Present.

Objectives: To provide aviation support equipment operation and repair training on the AS 32A38 spotting dolly.

Instruction: Lectures and laboratory training in the operation, troubleshooting and repair of various mechanical systems, use of tools and test equipment, and technical manuals related to the SDID A/S 32-A-38 spotting dolly.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (3/82).

NV-1704-0257

Denison Electrical and Electronics Control Maintenance and Controls for Logic Elevators

Course Number: A-690-0029.

Location: Naval Technical Training Center, Treasure Island, San Francisco, CA.

Length: 5 weeks (200 hours).

Exhibit Dates: 10/76–Present.

Learning Outcomes: Upon completion of the course, the student will be able to analyze simple series/parallel circuits using OHMs and Kirchoffs Laws; troubleshoot the Cutler Hammer Logic Control Elevator

System down to the circuit board level; test, align, troubleshoot an make repairs on denison hydraulic systems in accordance with standard Navy procedures.

Instruction: Lectures and practical exercises in basic electricity, solid state devices, electronic circuitry, hydraulic theory and maintenance and troubleshooting of a specific piece of equipment.

Credit Recommendation: In the vocational certificate category, 6 semester hours in industrial technology laboratory (8/89).

NV-1704-0258

Cargo Weapons Elevator Maintenance

Course Number: A-690-0082.

Location: Naval Technical Training Center, Treasure Island, San Francisco, CA.

Length: 2 weeks (76 hours).

Exhibit Dates: 12/80–7/84.

Objectives: To train enlisted personnel to maintain, troubleshoot and repair cargo/weapon elevators mechanical, electrical and hydraulic systems with minimum supervision.

Instruction: Lectures and practical exercises in electrical, mechanical and hydraulic and safety devices (for personnel and equipment) used on ships elevators.

Credit Recommendation: In the vocational certificate category, 1 semester hour in component operation, repair and maintenance (11/81); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical or mechanical technology laboratory (11/81).

NV-1704-0259

ASROC Weapons Handling System Maintenance

Course Number: A-121-0490.

Location: Service School Command, Great Lakes, IL.

Length: 8 weeks (320 hours).

Exhibit Dates: 1/81–Present.

Objectives: To train personnel in the maintenance of the ASROC weapons handling system.

Instruction: Lectures and practical exercises in the operation and maintenance of power distribution systems, control and firing circuits, power drives, amplifiers, mechanical linkages and hydraulic systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electromechanical maintenance (1/82).

NV-1704-0260

FFG-7 Engineering System Maintenance Management, Mechanical, Class C1

Course Number: A-652-0153.

Location: Service School Command, Great Lakes, IL.

Length: 6 weeks (240 hours).

Exhibit Dates: 8/79–Present.

Objectives: To train senior enlisted personnel to manage the mechanical systems of the engineering plant on a FFG-7 class ship.

Instruction: Lectures and practical exercises pertaining to the level of maintenance and responsibility of modular changout, piece part repair, preventive and corrective maintenance and progressive overhaul of gas turbine power plants.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in power plant management (1/82).

NV-1704-0261

FFG-7 Fuel Systems, Mechanical, Class C1

Course Number: A-652-0165.

Location: Service School Command, Great Lakes, IL.

Length: 3 weeks (120 hours).

Exhibit Dates: 9/79–Present.

Objectives: To provide knowledge and skills necessary to operate and maintain the FFG-7 class fuel system and the JP-5 subsystem.

Instruction: Lectures and practical exercises in the operation and maintenance of the FFG-7 class fuel system and JP-5 subsystem. To perform required on-board testing of fuels and main propulsion lubricants, to identify and comply with off-ship testing requirements and procedures for submission of fuel and oil samples, to perform administrative duties relating to safe handling, storage and testing of fuels, to identify and comply with environmental protective directives and regulations concerning the overboard discharge of oil waste contaminents.

Credit Recommendation: In the vocational certificate category, 3 semester hours in fuel and lubricants handling systems (1/82).

NV-1704-0262

FFG-7 Introduction to Engineering Maintenance Management, Class C1

Course Number: A-652-0152.

Location: Service School Command, Great Lakes, IL.

Length: 3 weeks (105-120 hours).

Exhibit Dates: 5/79–Present.

Objectives: To provide skills necessary to understand and monitor power plant operations.

Instruction: Lectures and practical exercises to provide the skills necessary to monitor the operation of a power plant. Included are the use of technical manuals, maintenance concepts of gas turbine systems, support systems, diesel generator systems, power distribution and conversion equipment, air conditioning and refrigeration systems, seawater-freshwater systems, fuel systems, compressed air systems, mechanical handling systems, and environmental pollution control systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in basic power plant operation (10/83).

NV-1704-0263

Propulsion Engineering Basics, Class AP

Course Number: A-651-0010.

Location: Service School Command, Great Lakes, IL.

Length: *Version 1:* 4 weeks (176 hours). *Version 2:* Self-paced 3 weeks (120 hours).

Exhibit Dates: *Version 1:* 6/83–Present. *Version 2:* 1/75–5/83.

Objectives: To train personnel in basic propulsion auxiliary equipment.

Instruction: *All Versions:* Instruction and practical exercises in basic propulsion engineering including maintenance and introduction to auxiliary equipment such as pumps, heat exchangers, bearings, centrifugers, air compressors, valves, power transfer equipment and measuring devices. *Version 1:* Lectures and practical exercises in lubrication systems fire fighting equipment and proper watch standing procedures. *Version 2:* An individualized computer assisted course of instruction.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in power plant auxiliary equipment, 1 in equipment maintenance and 1 in power plant operation laboratory (10/83). *Version 2:* In the lower-division baccalaureate/associate degree category, 1 semester hour in power plant auxiliary equipment, 1 in equipment maintenance (1/82).

NV-1704-0264

Basic Hydraulic Systems and Components

Course Number: K-652-2146.

Location: Fleet Training Center, San Diego, CA.

Length: 3 weeks (90 hours).

Exhibit Dates: 3/82–Present.

Objectives: To train personnel in the basic theory of hydraulic systems and components.

Instruction: Lectures and practical exercises in the basic theory of static hydraulic systems and components including basic static fluid physics, reservoirs, filters, strainer, control valves, accumulators, packing seals, positive, non-positive and variable displacement pumps and hydraulic system troubleshooting.

Credit Recommendation: In the vocational certificate category, 3 semester hours in machinery hydraulics (5/82); in the lower-division baccalaureate/associate degree category, 2 semester hours in hydraulics (fluid static) (5/82).

NV-1704-0265

DD-963 Auxiliary Systems Technician

Course Number: K-652-2167.

Location: Fleet Training Center, San Diego, CA.

Length: 6 weeks (190 hours).

Exhibit Dates: 3/82–Present.

Objectives: To train personnel in the operation and maintenance of shipboard auxiliary systems.

Instruction: Classroom instruction and practical exercises in the operation and maintenance of shipboard auxiliary systems including submerged tube and flash type distilling plants for making fresh water, water testing and treatment, salinity alarms, thermodynamic nomenclature, hydraulic systems, modified vacuum incinerator sewage disposal system and vibration and noise analysis for preventive maintenance.

Credit Recommendation: In the vocational certificate category, 3 semester hours in machinery hydraulics, 2 in machinery maintenance (5/82); in the lower-division baccalaureate/associate degree category, 2 semester hours in hydraulics (fluid statics), 1 in mechanical systems laboratory or, in lieu of the above, 3 semester hours in marine auxiliary systems (5/82).

NV-1704-0266

Machinist's Mate Advanced Maintenance

Course Number: A-651-0063.

Location: Fleet Training Center, San Diego, CA.

Length: 15 weeks (517 hours).

Exhibit Dates: 8/80–8/87.

Objectives: To train personnel to perform preventive and corrective maintenance on steam propulsion and auxiliary machine systems.

Instruction: For this course after 8/87 see NV-1704-0319. Lectures and practical exercises in preventive and corrective maintenance including engineering maintenance administration, valve and steam trap maintenance, engineering maintenance principles, pump maintenance, auxiliary turbine maintenance, auxiliary machinery controls, governors and regulators, air compressors and compressed air systems, distilling plant, condenser and heat exchanger maintenance, ships service turbogenerator maintenance, main engine and lube purifier maintenance.

Credit Recommendation: In the vocational certificate category, 15 semester hours in high pressure steam plant machinery maintenance and repair (5/82); in the lower-division baccalaureate/associate degree category, 4 semester hours in high pressure steam plant machinery operation and maintenance (5/82).

NV-1704-0267

DD-963 Engineering Department Division Officer
(DD-963 Main Propulsion Assistant)

Course Number: A-4H-0055.

Location: Surface Warfare Officers School Command, Newport, RI.

Length: *Version 1:* 10 weeks (380 hours); *Version 2:* 6 weeks (157 hours).

Exhibit Dates: *Version 1:* 8/81–Present. *Version 2:* 5/80–7/81.

Objectives: To provide the engineering division officer with a knowledge of the engineering systems installed in the DD963 class destroyer.

Instruction: *All Versions:* The course emphasizes the gas turbine main propulsion, electrical and auxiliary systems as well as the administrative and management programs in effect on the DD-963. Main topic areas include the marine gas turbine and its power train, the gas turbine generator and electric systems, auxiliary systems and the control systems for the foregoing equipment. *Version 1:* Extensive casualty control training is done in the propulsion plant trainer.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in gas turbine systems(11/82); in the lower-division baccalaureate/associate degree category, 2 semester hours in gas turbine systems, 2 in maintenance management and 2 in marine engineering systems laboratory (11/82). *Version 2:* In the vocational certificate category, 4 semester hours in gas turbine systems (11/82); in the lower-division baccalaureate/associate degree category, 2 semester hours in gas turbine systems and 2 in maintenance management (11/82).

NV-1704-0268

FFG-7 Engineer Division Officer
(FFG-7 Main Propulsion Assistant)

Course Number: A-4H-0058.

Location: Surface Warfare Officers School Command, Newport, RI.

Length: *Version 1:* 5 weeks (198 hours). *Version 2:* 9 weeks (360 hours).

Exhibit Dates: *Version 1:* 1/83–Present. *Version 2:* 8/80–12/82.

Objectives: To provide the engineering division officer with a knowledge of the engineering systems installed in the FFG-7 class frigate.

Instruction: *All Versions:* The course emphasizes the operation and maintenance of gas turbine main propulsion and electrical and auxiliary systems found on the FFG-7 ship. Main topic areas include the marine gas turbine and its power train, the diesel generator and electrical systems, the auxiliary systems and the control systems for the foregoing equipment and systems. *Version 1:* Extensive casualty control training is provided in the propulsion plant trainer.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in gas turbine systems (11/82); in the lower-division baccalaureate/associate degree category, 2 semester hours in gas turbine systems, 2 in maintenance management and 2 in marine engineering systems laboratory (11/82). *Version 2:* In the vocational certificate category, 4 semester hours in gas turbine systems (11/82); in the lower-division baccalaureate/associate degree category, 2 semester hours in gas turbine systems and 2 in maintenance management (11/82).

NV-1704-0269

Basic Hydraulics

Course Number: A-652-0164.

Location: Service School Command, Great Lakes, IL.

Length: 2–4 weeks (80–145 hours).

Exhibit Dates: 9/80–Present.

Objectives: To train personnel in the operation and maintenance of hydraulic systems on the FFG-7 class ships.

Instruction: Lectures and practical exercises in the basic theory of static hydraulic systems and components including basic static fluid physics, reservoirs, filters, strainers, control valves, accumulators, packing seals, positive, non-positive and variable displacement pumps and hydraulic system troubleshooting.

Credit Recommendation: In the vocational certificate category, 3 semester hours in machinery hydraulics (1/86); in the lower-division baccalaureate/associate degree category, 1 semester hour in hydraulics (fluid statics) (1/86).

NV-1704-0270

FFG-7 Auxiliary Mechanical Subsystem Technician

Course Number: A-652-0233.

Location: Service School Command, Great Lakes, IL.

Length: 14 weeks (560 hours).

Exhibit Dates: 10/83–Present.

Objectives: To train personnel to operate and perform corrective and preventive maintenance on mechanical auxiliary subsystem components installed on a FFG-7 ship.

Instruction: This is a pipeline course consisting of the following courses: NV-1712-0015, NV-1715-1073, NV-1704-0269, NV-1712-0023 and NV-1704-0262.

Credit Recommendation: Please refer to the above listed exhibits for our credit recommendations.

NV-1704-0271

FFG-7 Auxiliary Mechanical System Technician

Course Number: A-652-0159.

Location: Service School Command, Great Lakes, IL.

Length: 2 weeks (72 hours).

Exhibit Dates: 2/81–Present.

Objectives: To train enginemen to operate and maintain certain auxiliary mechanical systems.

Instruction: Lectures and practical exercises that provide the knowledge and skills necessary to operate and maintain the mechanical components of the oil waste separator, the pallet elevator and auxiliary propulsion devices.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (10/83).

NV-1704-0272

Fundamental Hydraulic Component Maintenance

Course Number: J-651-0450.

Location: Fleet Training Center, Norfolk, VA.

Length: 3 weeks (120 hours).

Exhibit Dates: 7/82–Present.

Objectives: To train personnel in the basic theory of hydraulic systems and components.

Instruction: Lectures and practical exercises in the basic theory of static hydraulic systems and components including basic static fluid physics, reservoirs, filters, strainers, control valves, accumulators, packing seals, positive, non-positive and variable displacement pumps and hydraulic system troubleshooting.

Credit Recommendation: In the vocational certificate category, 3 semester hours in machinery hydraulics; in the lower-division baccalaureate/associate degree category, 2 semester hours in hydraulics (fluid static) (3/89).

NV-1704-0273

UH-1N Electrical/Instrument Systems Organizational Maintenance

Course Number: D-602-2050.

Location: Helicopter Combat Support Squadron Sixteen, Pensacola, FL.

Length: 3 weeks (120 hours).

Exhibit Dates: 4/80–Present.

Objectives: To train enlisted personnel in the maintenance and repair of the UH-1N helicopter electrical and instrument systems.

Instruction: Instruction in DC power distribution, AC power systems, batteries, wiring diagrams and warning circuits.

Credit Recommendation: In the vocational certificate category, 2 semester hours in aircraft electrical maintenance (3/84); in the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft electrical maintenance (3/84).

NV-1704-0274

UH-1N Communication/Navigation Systems Organizational Maintenance

Course Number: D-102-2020.

Location: Helicopter Combat Support Squadron, Pensacola, FL.

Length: 2 weeks (80 hours).

Exhibit Dates: 4/80–Present.

Objectives: To train fleet maintenance personnel to perform maintenance on communication and navigation systems.

Learning Outcomes: Upon completion of the course, the student will be able to install, operate, troubleshoot and adjust an avionics system aboard the UH-1N including ICS, VHF-FM, HF, UHF, TACAN, ADF, IFF and a radar altimeter.

Credit Recommendation: In the vocational certificate category, 2 semester hours in avionics equipment repair (3/84); in the lower-division baccalaureate/associate degree category, 1 semester hour in avionics (3/84).

NV-1704-0275

Trident Countermeasures O/M

Course Number: A-123-0179.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 3 weeks (104 hours).

Exhibit Dates: 1/84–Present.

Objectives: To prepare students to operate and maintain specialized electromechanical and hydraulic systems.

Instruction: Lectures and practical exercises in the operation and maintenance of a countermeasures system including applications of electromechanical, pneumatic and fluid equipment to a marine vessel simulator.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electromechanical and hydraulic system applications (8/84); in the lower-division baccalaureate/associate degree category, 1 semester hour in electromechanical and fluid equipment laboratory (8/84).

NV-1704-0276

Trident Defensive Weapons Ordnance Subsystem O/M

Course Number: A-123-0178.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 5 weeks (184 hours).

Exhibit Dates: 1/84–Present.

Objectives: To prepare students to operate and maintain torpedo and torpedo handling equipment.

Instruction: Lectures and practical exercises in torpedo system operation including applications of mechanical, pneumatic and fluid equipment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electromechanical systems applications (8/84), in the lower-division baccalaureate/associate degree category, 1 semester hour in electromechanical and fluid system applications laboratory (8/84).

NV-1704-0277

Trident Torpedoman's Mate Replacement

Course Number: A-123-0176.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 10 weeks (383 hours).

Exhibit Dates: 1/84–Present.

Objectives: To provide students with training in the operation and preventive and corrective maintenance of the mechanical and hydraulic portions of weapons systems.

Instruction: Lectures and practical exercises in in the operation and maintenance of mechanical, hydraulic and pneumatic systems included in the launching systems, marine vessel simulators, and Mk 48 torpedo.

Credit Recommendation: In the vocational certificate category, 4 semester hours in mechanical and hydraulic systems applications (8/84); in the lower-division baccalaureate/associate degree category, 2 semester hours in electromechanical and fluid systems application laboratory (8/84).

NV-1704-0278

EC-130 Airfame and Hydraulic Systems Maintenance

Course Number: D-602-0481.

Location: Naval Air Station, Patuxent River, MD.

Length: 5 weeks (200 hours).

Exhibit Dates: 11/83–Present.

Objectives: To provide personnel with the knowledge and skills necessary to maintain airframes and aircraft hydraulic systems.

Instruction: Lectures and laboratory applications in hydraulic systems, booster and auxiliary hydraulic systems, primary flight flight controls, wing flap and trim tab systems; main and nose wheel landing gear systems; brake and anti-skid systems.

Credit Recommendation: In the vocational certificate category, 4 semester hours in basic hydraulic components and aircraft familiarization (11/84); in the lower-division baccalaureate/associate degree category, 3 semester hours in basic hydraulics and systems (11/84).

NV-1704-0279

EC-130 Environmental Systems Maintenance

Course Number: D-602-0461.

Location: Naval Air Station, Patuxent River, MD.

Length: 3 weeks (120 hours).

Exhibit Dates: 11/83–Present.

Objectives: To provide personnel with the knowledge and skills to maintain an environmental system.

Instruction: Lectures and practical exercises in the operation and testing of the following: pneumatic anti-icing, fire extinguishing, oxygen systems and their descriptions. Inspection and prevention for corrosion and control as well as safety precautions are also covered.

Credit Recommendation: In the vocational certificate category, 2 semester hours in the familiarization of environmental system corrosion control maintenance (11/84); in the lower-division baccalaureate/associate degree category, 1 semester hour in environmental systems (11/84).

NV-1704-0280

EC-130 Power Plant and Related Systems Maintenance

Course Number: D-601-0411.

Location: Naval Air Station, Patuxent River, MD.

Length: 7 weeks (280 hours).

Exhibit Dates: 11/83–Present.

Objectives: To provide personnel with the knowledge and skills necessary to maintain aircraft gas turbine powerplants, related systems and auxiliary powerplant systems.

Instruction: Lectures and laboratory applications in aircraft fuel systems, safety procedures, turboprop engines and related systems, including oil, fuel, starting, temperature indicators, engine controls; propeller and associated systems including anti-icing and de-icing, fire detection and extinguishing systems, gas turbine auxiliary power and related systems.

Credit Recommendation: In the vocational certificate category, 6 semester hours in familiarization of turboprop engines and auxiliary power units (11/84); in the lower-division baccalaureate/associate degree category, 3 semester hours in powerplant sytems, turboprop and related systems (11/84).

NV-1704-0281

OE-159 Reel Operator/Maintenance

Course Number: D-104-0452.

Location: Naval Air Station, Patuxent River, MD.

Length: 7 weeks (280 hours).

Exhibit Dates: 1/84–Present.

Objectives: To train personnel to effectively operate and perform maintenance on the OE-159 antenna system.

Instruction: Lectures and laboratory applications in electrical systems familiarization, reel panel familiarization (antenna); hydraulic principles as related to antenna components; safety principles; electrical system proficiency in reading and understanding electrical circuits for antenna reel systems with emphasis on troubleshooting. Also covered are computer fundamentals, related test equipment and maintenance, record and inspection procedures.

Credit Recommendation: Credit is not recommended due to the military-specific nature of the course (11/84).

NV-1704-0282

AN/TPX-42A(V)10 RATCF DAIR, Class C1

Course Number: C-103-2035.

Location: Air Technical Training Center, Millington, Memphis, TN.

Length: 7 weeks (280 hours).

Exhibit Dates: 7/83–3/88.

Objectives: To train experienced electrical technicians to perform preventive and corrective maintenance on an air traffic control radar system.

Instruction: For this course after 3/88 see NV-1715-1435. Lectures and practical exercises in the operation and maintenance of selected functions of an air traffic control radar system including basic computer components, power supplies, sweep generator circuits, and data processing components. Students use block diagrams, system performance analysis and testing, troubleshooting, and the alignment of electronic equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic maintenance laboratory and repair, 1 in computer fundamentals (2/85).

NV-1704-0283

Basic Helicopter (H-1) Class A1

Course Number: C-600-2011.

Location: Air Technical Training Center, Millington, Memphis, TN.

Length: 3 weeks (116 hours).

Exhibit Dates: 12/82–8/83.

Objectives: To provide the basic skills required to operate and maintain the H-1 helicopter.

Instruction: Lectures and practical exercises in the operation and maintenance of an H-1 helicopter including safety, corrosion control, electrical and engine familiarization, fuel and oil systems, power control, power drive systems, tail rotor drive, gear box operation, dual hydraulic control, blade tracking and inspection and operation.

Credit Recommendation: In the vocational certificate category, 3 semester hours in basic helicopter principles (2/85).

NV-1704-0284

Basic Helicopter (H-46) Class A1

Course Number: C-600-2010.

Location: Air Technical Training Center, Millington, Memphis, TN.

Length: 4 weeks (160 hours).

Exhibit Dates: 6/83–8/83.

Objectives: To provide personnel with the skills required to operate and maintain the H-46 helicopter.

Instruction: Lectures and practical exercises in the operation and maintenance of the H-46 helicopter including airframe description, safety, corrosion control and prevention, ground handling and taxiing, basic electrical and engine familiarization, engine power plant and related systems to include engine controls, auxiliary powerplant, power drive systems, blade tracking, utility hydraulic-hydraulic flight boost control system, and line maintenance and operation.

Credit Recommendation: In the vocational certificate category, 3 semester hours in basic helicopter principles (2/85).

NV-1704-0285

Basic Helicopter (H-53) Class A1

Course Number: C-600-2012.

Location: Air Technical Training Center, Millington, Memphis, TN.

Length: 4 weeks (160 hours).

Exhibit Dates: 12/82-8/83.

Objectives: To provide the skills required to operate and maintain the H-53 helicopter.

Instruction: Lectures and practical exercises in the maintenance and operation of the H-53 helicopter including basic helicopter principles, safety procedures, ground handling and taxiing, engine powerplant and control system, hydraulics, flight control system, blade tracking, main and tail rotor systems, and aircraft inspection.

Credit Recommendation: In the vocational certificate category, 3 semester hours in basic helicopter principles (2/85).

NV-1704-0287

S-3A Power Plant and Related
Systems Organizational
Maintenance

Course Number: C-601-3676.

Location: Naval Air Station, Cecil Field, FL; Naval Air Station, North Island, San Diego, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/82-Present.

Objectives: To train enlisted personnel in the theory and knowledge of the propulsion, fuel and auxiliary power systems of the S-3A aircraft.

Learning Outcomes: Upon completion of the course, the student will be able to identify and operate the S-3A fuel system, power plant, auxiliary power unit and ground support equipment.

Credit Recommendation: In the vocational certificate category, 1 semester hour in jet engine familiarization (4/85).

NV-1704-0288

S-3A Structure, Hydraulic and
Flight Control Systems
Organizational Maintenance

Course Number: C-603-3676.

Location: Naval Air Station, North Island, San Diego, CA; Naval Air Station, Cecil Field, FL.

Length: 4 weeks (160 hours).

Exhibit Dates: 4/83-Present.

Objectives: To train enlisted personnel in the theory, knowledge and troubleshooting techniques of the S-3A flight control systems.

Learning Outcomes: Upon completion of the course, the student will be able to understand and troubleshoot the following systems of the S-3A aircraft: the hydraulic, landing gear, brakes, nose wheel steering, arresting hook, auxiliary power unit, wing fold, trim control and flight control systems of the aircraft.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in aircraft system maintenance (4/85).

NV-1704-0289

SH-2 Aviation Machinist's Mate
Power Plant System

Course Number: C-601-3378.

Location: Naval Air Station, North Island, San Diego, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 9/81-Present.

Objectives: To provide newly enlisted personnel the skills to understand and maintain the aircraft power plant and related systems.

Learning Outcomes: Upon completion of the course, the student will be able to understand, and maintain the power plant and related systems of the SH-2F aircraft including the electrical and gas turbine systems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in turbine engine maintenance (4/85); in the lower-division baccalaureate/associate degree category, 1 semester hour in the theory of turbine (jet) engines (4/85).

NV-1704-0290

SH-2F Airframes, Hydraulics and
Flight Control Organizational
Maintenance

Course Number: C-602-3394.

Location: Naval Air Station, North Island, San Diego, CA; Naval Air Station, Norfolk, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 3/80-Present.

Objectives: To train enlisted personnel in the basic maintenance of the hydraulic and flight control systems of the SH-2 helicopter.

Learning Outcomes: Upon completion of the course the student will be able to: (1) troubleshoot and maintain the hydraulic system, landing gear system, wheel brake system, rotor brake system, rescue hoist, and utility system and; (2) check, rig and maintain automatic stabilization systems and flight control systems of the helicopter.

Credit Recommendation: In the vocational certificate category, 2 semester hours in helicopter hydraulics and flight control systems repair and maintenance (4/85); in the lower-division baccalaureate/associate degree category, 2 semester hours in helicopter hydraulics and flight control systems theory (4/85).

NV-1704-0291

SH-2F Automatic Stabilization

Course Number: C-602-3386.

Location: Naval Air Station, Norfolk, VA; Naval Air Station, North Island, San Diego, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 9/81-Present.

Objectives: To train technicians in the functional maintenance of automatic stabilization equipment for a helicopter.

Learning Outcomes: Upon completion of the course, the student will be able to maintain, at the functional block level, helicopter automatic stabilization equipment, including gyro systems, accelerometers, trim controls, and various electromechanical servo systems that control roll, yaw, pitch, air speed and altitude.

Credit Recommendation: In the vocational certificate category, 2 semester hours in helicopter stabilization system maintenance (4/85).

NV-1704-0292

SH-60B Airframes and Related
Systems Organizational
Maintenance

Course Number: C-603-4406.

Location: Naval Air Station, North Island, San Diego, CA.

Length: 3 weeks (126 hours).

Exhibit Dates: 1/83-Present.

Objectives: To provide enlisted personnel with the skills necessary to maintain, troubleshoot and repair airframes and related systems.

Learning Outcomes: Upon completion of the course, the student will be able to maintain, troubleshoot and repair the following systems of the SH-60B helicopter: the composite structure, doors, cockpit enclosures, hydraulics, flight control systems, landing gear, environmental controls, main and tail rotor and utility and weapons systems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in aircraft structural repair (4/85); in the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft structural maintenance (4/85).

NV-1704-0293

SH-60B Power Plant and Related
Systems Organizational
Maintenance

Course Number: C-601-4406.

Location: Naval Air Station, North Island, San Diego, CA.

Length: 3 weeks (135 hours).

Exhibit Dates: 7/85-Present.

Objectives: To train enlisted personnel in the basic inspection and maintenance of a gas turbine engine and the related helicopter drive systems.

Learning Outcomes: Upon completion of the course, the student will be able to remove, install and maintain engine and auxiliary power unit components of the T700 GE-401 gas turbine engine; troubleshoot and maintain fire extinguishing systems, fuel systems and rotor drive systems of the helicopter.

Credit Recommendation: In the vocational certificate category, 2 semester hours in helicopter turbine engine overhaul (4/85); in the lower-division baccalaureate/associate degree category, 1 semester hour in turbine engine theory (4/85).

NV-1704-0294

T-700-GE 401 Intermediate
Maintenance First Degree

Course Number: C-601-4408.

Location: Naval Air Station, North Island, San Diego, CA.

Length: 3-4 weeks (120-160 hours).

Exhibit Dates: 11/84-Present.

Objectives: To train enlisted personnel in the inspection, troubleshooting, disassembly and buildup of an aircraft engine.

Learning Outcomes: Upon completion of the course, the student will be able to understand and troubleshoot the T-700-GE aircraft engine system, including engine teardown, inspection and buildup; and be familiar with engine borescope inspection.

Credit Recommendation: In the vocational certificate category, 2 semester hours in aircraft turbine engine maintenance (4/85); in the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft turbine engine theory (4/85).

NV-1704-0295

TF-34 First Degree Intermediate Maintenance

Course Number: C-601-3677.

Location: Naval Air Station, North Island, San Diego, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 5/83–Present.

Objectives: To train personnel in the inspection, diassembly, repair and reassembly of a turbine engine.

Learning Outcomes: Upon completion of the course, the student will be able to disassemble, inspect and reassemble the TF-34 turbofan engine including the fuel, electrical and lubrication systems as well as the borescope inspection.

Credit Recommendation: In the vocational certificate category, 2 semester hours in turbine engine repair and maintenance (4/85); in the lower-division baccalaureate/associate degree category, 1 semester hour in turbine engine maintenance (4/85).

NV-1704-0296

WR-27 Auxiliary Power Unit Intermediate Maintenance

Course Number: C-601-3679.

Location: Naval Air Station, North Island, San Diego, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 6/81–Present.

Objectives: To train personnel in the inspection, disassembly and buildup of an auxiliary power unit.

Learning Outcomes: Upon completion of the course, the student will be able to assemble/disassemble, inspect and troubleshoot the WR-27 auxiliary power unit using appropriate test equipment and special tools.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (4/85).

NV-1704-0297

SH-3 Aviation Machinist's Mate Class A Power Plant Systems

Course Number: C-601-4396.

Location: Naval Air Station, Jacksonville, FL; Naval Air Station, North Island, San Diego, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 10/82–Present.

Objectives: To provide personnel the skills to maintain a turbine engine power plant and its related systems.

Learning Outcomes: Upon completion of the course, the student will be able: (1) to understand and maintain a turbine engine power plant and its related systems at a very basic level and; (2) be familiar with the hydraulics, electricity, jet propulsion theory and gas turbine power plant operation of the SH-3 aircraft.

Credit Recommendation: In the vocational certificate category, 1 semester hour in jet engine laboratory (4/85); in the lower-division baccalaureate/associate degree category, 1 semester hour in turbine (jet) engine theory (4/85).

NV-1704-0298

Machinist's Mate Maintenance Skills

Course Number: A-652-0228.

Location: Naval Submarine Training Center, Pacific, Pearl Harbor, HI; Naval Submarine School, Groton, CT; Fleet Ballistic Submarine Training Center, Charleston, SC; Trident Training Facility, Bangor, Bremerton, WA; Guided Missile School Detachment, Norfolk, VA; Submarine Training Facility, San Diego, CA; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2–3 weeks (82 hours).

Exhibit Dates: 1/82–11/87.

Objectives: For this course after 11/87 see NV-1704-0332. To provide general technical skills for engineering personnel necessary for the operation, preventive and corrective maintenance of engineering components.

Instruction: Course provides an introduction to engineering safety; introduction to and basic operation of handtools; also covered are theory of operation, construction, preventive and corrective maintenance and the documentation associated with maintenance procedures on engineering piping.

Credit Recommendation: In the vocational certificate category, 2 semester hours in engineering safety and hand tool operation, 2 hours in operation, maintenance of engineering piping (11/85).

NV-1704-0299

FFG-7 Propulsion Systems Monitor

Course Number: A-652-0247.

Location: Naval Training Center, Great Lakes, IL.

Length: 10 weeks (280 hours).

Exhibit Dates: 3/84–3/86.

Objectives: To train personnel on how to operate and perform operational maintenance on the FFG-7 gas turbine power plant.

Instruction: Lectures and practical exercises in the operation and maintenance of the gas turbine power plant for an FFG-7 including fixed fire fighting systems, gas turbine engines, exhaust systems, lubricating oil systems, air intake systems, air start systems, fuel oil service systems, reduction gears, controllable pitch propeller, and watch standing procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in engineering orientation and 1 in fire fighting (1/86).

NV-1704-0300

Aircraft Launch and Recovery Equipment Officer

Course Number: C-2G-2010.

Location: Naval Air Technical Training Center, Lakehurst, NJ.

Length: 2–3 weeks (95 hours).

Exhibit Dates: 10/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to direct aircraft launch and recovery operations.

Instruction: Includes lectures and performance exercises to direct operations of aircraft launch and recovery.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (6/87).

NV-1704-0301

Aviation Boatswain's Mate Handling, Class C1, Sea Track

Course Number: C-822-2014.

Location: Naval Air Technical Training Center, Lakehurst, NJ.

Length: 5 weeks (200 hours).

Exhibit Dates: 1/83–Present.

Learning Outcomes: Upon completion of the course, the student will be able to supervise personnel in shipboard aircraft handling and crash salvage procedures.

Instruction: Includes lectures and performance exercises in aircraft ground handling, crash and fire damage control, first aid, and fire fighting.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in administration (correspondence and filing), 1 in industrial safety, and 2 in supervision of aircraft emergency operations (crash/fire/rescue) (6/87).

NV-1704-0302

Aviation Boatswain's Mate Equipment, Class A1, C13 Track

Course Number: C-604-2019.

Location: Naval Air Technical Training Center, Lakehurst, NJ.

Length: 4 weeks (160 hours).

Exhibit Dates: 5/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to apply entry-level skills to operate aircraft launch and restraint equipment under supervision.

Instruction: Includes lectures with limited performance exercises in C-13 catapult equipment and accessories for aircraft launch and restraint.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in fluid power system theory in an industrial maintenance technology program (6/87).

NV-1704-0303

Aircrew Survival Equipmentman, Class C1

Course Number: C-602-2011.

Location: Naval Air Technical Training Center, Lakehurst, NJ.

Length: 12 weeks (452 hours).

Exhibit Dates: 5/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to establish and supervise a maintenance organization which is capable of supporting aircrew survival equipment inspection, service, and repair.

Instruction: Lectures and hands-on experience in theory and practical application relating to maintenance and material management of items of equipment used for aircrew survival. Detailed study of industrial-grade sewing machines, gaseous and liquid oxygen support systems and equipment, and related aviation survival equipment.

Credit Recommendation: In the vocational certificate category, 3 semester hours in industrial sewing machine repair and service (6/87); in the lower-division baccalaureate/associate degree category, 3 semester hours in general science laboratory, 1 in aircraft environmental control systems, and 1 in maintenance systems planning (6/87).

NV-1704-0304

Aircrew Survival Equipmentman, Class A1

Course Number: C-602-2010.

Location: Naval Air Technical Training Center, Lakehurst, NJ.

Length: 11 weeks (368 hours).

Exhibit Dates: 10/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to work with minimum supervision in the area of equipment inspection, repair and operation. This equipment is essential to support flying safety and pilot survival in an emergency.

Instruction: Classroom instruction is balanced with hands-on practical exposure with approximately 1:3 ratio. Major topics included are parachute assembly, packing and inspection, survival clothing, oxygen masks, and exposure equipment, sewing machine use, maintenance and repair of fabrics, interpretation and application of technical requirements and documents.

Credit Recommendation: In the vocational certificate category, 2 semester hours in sewing machine operation, service and maintenance, and 2 in parachute packing and inspection (6/87); in the lower-division baccalaureate/associate degree category, 3 semester hours in aviation safety equipment repair and maintenance.

NV-1704-0305

Aircraft Launch and Recovery Equipment, Class C1, C13 Mod O Track

Course Number: C-604-2011.

Location: Naval Air Technical Training Center, Lakehurst, NJ.

Length: 8 weeks (310 hours).

Exhibit Dates: 11/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to inspect, operate and maintain C-13 catapults and related equipment, Mk-7 Mods 1, 2, and 3 arresting gear, barriers, and share-based arresting gear.

Instruction: Lecture and practical experiences in aircraft launch and recovery equipment, C13 and C13-Mod 1.

Credit Recommendation: In the vocational certificate category, 3 semester hours in fluid power principles (6/87); in the lower-division baccalaureate/associate degree category, 3 semester hours in fluid power maintenance and troubleshooting, and 1 in industrial safety (6/87).

NV-1704-0306

Aviation Boatswain's Mate Fuels, Class A1

Course Number: C-821-2010.

Location: Naval Air Technical Training Center, Lakehurst, NJ.

Length: 4-5 weeks (167 hours).

Exhibit Dates: 4/83–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform entry level duties of aircraft refueling and maintenance of refueling equipment.

Instruction: Includes lectures and performance exercises in aircraft refueling, maintenance and repair of refueling systems, and fuel quality verification.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft ground operations and servicing (6/87).

NV-1704-0307

Aviation Boatswain's Mate Equipment, Class C1, C113 Mod 1 Track

Course Number: C-604-2014.

Location: Naval Air Technical Training Center, Lakehurst, NJ.

Length: 8 weeks (300 hours).

Exhibit Dates: 5/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to fully understand and maintain Type C Mark 13 Mod 1 catapult and Mark 7 Mod 3 arresting gear equipment for aircraft launch and restraint.

Instruction: Includes lectures and performance exercises relative to catapult and restraint systems to include servicing, repair, troubleshooting, inspection, and rigging procedures as well as minimum technical knowledge and guidance to perform as a work center supervisor.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in hydraulic and pneumatic system principles in an industrial maintenance technology program 3 in industrial equipment maintenance, and 1 in principles of industrial maintenance supervision (6/87).

NV-1704-0308

Aircraft Launch and Recovery Equipment Maintenance Officers

Course Number: C-2G-2011.

Location: Naval Air Technical Training Center, Lakehurst, NJ.

Length: 8 weeks (320 hours).

Exhibit Dates: 5/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to supervise aircraft launch and recovery equipment maintenance, troubleshooting, and quality assurance.

Instruction: Includes lectures and performance exercises in recordkeeping, file documentation, researching technical publications, troubleshooting, and returning to service launch and recovery equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in fluid system maintenance, 3 in industrial equipment maintenance, and 2 in technical report writing (6/87).

NV-1704-0309

Aviation Fuel Systems, Class C1

Course Number: C-821-2011.

Location: Naval Air Technical Training Center, Lakehurst, NJ.

Length: 5 weeks (193 hours).

Exhibit Dates: 6/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to supervise aviation fueling operations and the troubleshooting and repairing of the refueling system components.

Instruction: Includes lectures and performance exercises on refueling equipment for aircraft refueling operations to include operation of contamination detection equipment, pump maintenance and repair, indicator system refueling system maintenance and troubleshooting, and aircraft refueling procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in aircraft ground operations and servicing and 1 in chemistry laboratory (6/87).

NV-1704-0310

Aviation Boatswain's Mate Equipment, Class A1 Common Core
(Aviation Boatswain's Mate E Launching and Recovery Equipment, Class A1 Common Core)

Course Number: C-604-2012.

Location: Naval Air Technical Training Center, Lakehurst, NJ.

Length: 4 weeks (160 hours).

Exhibit Dates: 1/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to assist in operating and maintaining shipboard arresting gear.

Instruction: Includes lectures and performance exercises on arresting gear including corrosion control, basic hydraulics, and gear maintenance, servicing, and operation.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in industrial equipment maintenance (in industrial maintenance technology curriculum) (6/87).

NV-1704-0311

Aviation Boatswain's Mate Equipment, Class A1, C7/C11 Track

Course Number: C-604-2018.

Location: Naval Air Technical Training Center, Lakehurst, NJ.

Length: 4 weeks (133 hours).

Exhibit Dates: 4/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to apply entry level skills to operate aircraft launch and restraint equipment under supervision.

Instruction: Includes lectures with limited performance exercises in Mark 7 and Mark 11 steam catapult equipment and accessories for aircraft launch and restraint.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in fluid power system theory in industrial maintenance technology (6/87).

NV-1704-0315

Guided Missile Launcher System Mk 26

Course Number: A-121-0011.

Location: Service Schools Command, Great Lakes, IL.

Length: 22 weeks (880 hours).

Exhibit Dates: 9/87–Present.

Learning Outcomes: Upon completion of the course, the Gunner's Mate will have developed the fundamental electro-mechanical-hydraulic skills and knowledge to operate and maintain a computer controlled guided missile launching system. The student will be able to trace, analyze, isolate and repair down to card level using electrical-hydraulic interconnection and internal wiring diagrams.

Instruction: Classroom instruction and laboratory exercises covering the following topics: launching systems control, power distribution, troubleshooting and reference diagrams, system control interface, launcher load/unload, electronic servo control unit, hydraulic systems.

Credit Recommendation: In the vocational certificate category, 3 semester hours in hydraulic systems troubleshooting and maintenance (6/88); in the lower-division baccalaureate/associate degree category, 3 semester hours in electro mechanical systems troubleshooting and maintenance (6/88).

NV-1704-0316

Trident Submarine Hydraulic Combined Maintenance

Course Number: A-652-0143.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 2 weeks (80 hours).

Exhibit Dates: 9/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform all operational procedures, troubleshooting, and repair on ship's service, stern diving, and external hydraulic systems.

Instruction: Lecture and laboratory exercises in the theory of hydraulics, and the construction operation and maintenance of submarine hydraulic systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in hydraulic machinery (2/89).

NV-1704-0317

TRIDENT PNEUMATIC SUBSYSTEM MAINTENANCE

Course Number: A-652-0145.

Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.

Length: 2 weeks (90 hours).

Exhibit Dates: 11/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform all operational procedures with respect to high and low-pressure air compressors, troubleshoot and repair pneumatic systems, including air compressors, dehydrators, and air manifolds.

Instruction: Lecture and laboratory exercises in air compressor construction, operation and maintenance, and related pneumatic equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in facilities engineering (pneumatic systems) (2/89).

NV-1704-0318

TRIDENT SUBMARINE AUXILIARY EQUIPMENT TECHNICIAN LEVEL II

Course Number: A-652-0141.

Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.

Length: 6 weeks (350 hours).

Exhibit Dates: 9/84–Present.

Learning Outcomes: See individual exhibits for learning outcomes. This is a pipeline course.

Instruction: See exhibits NV-1704-0316 (A-652-0143), NV-1704-0317 (A-652-0145), NV-1731-0001 (A-652-0146), NV-1712-0028 (A-652-0150), and NV-1701-0010 (A-652-0204).

Credit Recommendation: See individual exhibits for credit recommendation (2/89).

NV-1704-0319

MACHINIST'S MATE STEAM PROPULSION MAINTENANCE SUPERVISOR

Course Number: A-651-0063.

Location: Fleet Training Center, Norfolk, VA; Fleet Training Center, San Diego, CA.

Length: 17–18 weeks (740 hours).

Exhibit Dates: 9/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to organize, perform and supervise preventive and corrective maintenance, and troubleshoot the mechanical systems associated with steam power generation systems except for the systems directly associated with the steam generation facility.

Instruction: For this course before 9/87 see NV-1704-0266. This is a pipeline course made up of A-651-0064, Engineering Maintenance Principles, Practices, and Administration; A-651-0065, Valve Maintenance; A-651-0067, Pump Maintenance; A-652-0069, Governor and Regulator Maintenance; A-651-0068, Auxiliary Turbine Maintenance; A-651-0077, Ship Service Turbo Generator Maintenance; A-651-0078, Main Engine and Lube Oil Purifier Maintenance; and A-651-0070, Air Compressor Maintenance. A-651-0071, Distilling Plant Condenser and Heat Exchanger Maintenance, was too brief for evaluation.

Credit Recommendation: For credit recommendation please see the individual courses listed above (3/89).

NV-1704-0320

SHIP SERVICE TURBO GENERATOR MAINTENANCE

Course Number: A-651-0077.

Location: Fleet Training Center, Norfolk, VA; Fleet Training Center, San Diego, CA.

Length: 1–2 weeks (51 hours).

Exhibit Dates: 9/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to use technical references to establish appropriate maintenance requirements and perform maintenance on steam turbines and the mechanical auxiliaries associated with turboelectric generators.

Instruction: Classroom instruction, demonstrations, and practical exercises on the subject matter including recordkeeping procedures.

Credit Recommendation: In the vocational certificate category, 1 semester hour in machinery maintenance (3/89).

NV-1704-0321

AUXILIARY MACHINERY TURBINE MAINTENANCE

Course Number: A-651-0068.

Location: Fleet Training Center, Norfolk, VA; Fleet Training Center, San Diego, CA.

Length: 1–2 weeks (53 hours).

Exhibit Dates: 4/83–Present.

Learning Outcomes: Upon completion of the course the student will be able to perform engineering maintenance on auxiliary steam turbines.

Instruction: Classroom and practical instruction on instrumentation, inspection, and maintenance of turbine machinery.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in turbine machinery maintenance laboratory (3/89).

NV-1704-0323

CARGO WEAPONS ELEVATOR MAINTENANCE

Course Number: A-690-0082.

Location: Naval Technical Training Center, Treasure Island, CA.

Length: 5 weeks (200 hours).

Exhibit Dates: 8/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to use the technical documentation provided for use with the Standard Electronic Module (SEM) cargo/weapons controller; describe the functional operation of the SEM controller, including signal fow, loop operation and time sequence; perform preventative and corrective maintenance on the SEM controller in accordance wth standard Navy check list procedures.

Instruction: Lecture and practical exercises in electrical, mechanical and hydraulic and safety devices (for personnel and equipment) used on ships elevators.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electro/mechanical technology laboratory (8/89).

NV-1704-0324

AVIATION MACHINIST'S MATE, CLASS A1

Course Number: C-601-2010.

Location: Naval Air Technical Training School, Memphis, Millington, TN.

Length: 8–9 weeks (334 hours).

Exhibit Dates: 7/88–Present.

Learning Outcomes: Upon completion of the course the student will be able to perform aircraft maintenance and jet engine mechanics.

Instruction: Lectures and practical exercises in jet engine repair, including AD rating and training, theory of general aircraft maintenance, corrosion control, tool inventory, jet propulsion principles, power plant familiarization, typical axial and centrifugal flow power plant familiarization, inspections, powerplant replacement, jet aircraft line operations, and fuel systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in turbine engine theory (9/89).

NV-1704-0325

AVIATION STRUCTURAL MECHANIC (SAFETY EQUIPMENT), CLASS A1

Course Number: C-601-2015.

Location: Naval Air Technical Training Center, Memphis, Millington, TN.

Length: 10 weeks (400 hours).

Exhibit Dates: 10/86–Present.

Learning Outcomes: Upon completion of the course the student will be able to perform in the capacity of an aviation systems mechanic.

Instruction: Lectures and laboratories in the functions of aviation structural mechanics, including fundamentals, schematic interpretation, application of maintenance and materiel management system, gaseous systems, typical aircraft systems, liquid oxygen systems, aircraft pressurization and air conditioning system, operation and line maintenance, egress systems, and auxilliary bleed air systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in pressure and air conditioning systems and 3 in gaseous systems (oxygen and liquid oxygen) (9/89).

NV-1704-0326

AVIATION SUPPORT EQUIPMENT TECHNICIAN, CLASS A1

Course Number: C-602-2026.

Location: Naval Air Technical Training Center, Memphis, Millington, TN.

Length: 16–17 weeks (605 hours).

Exhibit Dates: 7/89–Present.

Learning Outcomes: Upon completion of the course the student will perform maintenance and administrative duties.

Instruction: Lectures and laboratories in hand tools, hardware, composite materials, publications and forms, basic electricity, including Ohm's law, test equipment, magnetism, capacitors, semiconductors, troubleshooting, power generating equipment, charging, ignition systems, diesel engines, hydraulic accessories, air conditioning, gas turbine compressors, and corrosion control.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in hydraulic systems operation, 4 in DC circuits, and 2 in automotive fundamentals (9/89).

NV-1704-0327

BASIC HELICOPTER (H-1), CLASS A1

Course Number: C-600-2011.

Location: Naval Air Technical Training Center, Memphis, Millington, TN.

Length: 3–4 weeks (132 hours).
Exhibit Dates: 9/83–Present.
Learning Outcomes: Upon completion of the course the student will serve as apprentice helicopter mechanic at the organizational level under appropriate supervision.
Instruction: Lectures and laboratories in hand tools, aircraft hardware, safety procedures, forms and records, aircraft ground handling and taxiing, and aircraft systems, including the electrical and fuel systems, powerplant and drive system flight control system, rotor system, hydraulic system, and line operation and inspection.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in helicopter maintenance (9/89). Note: This credit duplicates that credit recommended for C-600-2010 and C-600-2012.

NV-1704-0328

BASIC HELICOPTER (H-53), CLASS A1

Course Number: C-600-2011.
Location: Naval Air Technical Training Center, Memphis, Millington, TN.
Length: 3–4 weeks (156 hours).
Exhibit Dates: 9/83–Present.
Learning Outcomes: Upon completion of the course the student will serve as apprentice helicopter mechanic at the organizational level under appropriate supervision.
Instruction: Lectures and laboratories in hand tools, aircraft hardware, safety procedures, forms and records, aircraft ground handling and taxiing, and aircraft systems, including the electrical and fuel systems, powerplant and drive system flight control system, rotor system, hydraulic system, and line operation and inspection.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in helicopter maintenance (9/89). Note: This credit duplicates that credit recommended for C-600-2010 and C-600-2011.

NV-1704-0329

BASIC HELICOPTER (H-46), CLASS A1

Course Number: C-600-2010.
Location: Naval Air Technical Training Center, Memphis, Millington, TN.
Length: 3–4 weeks (132 hours).
Exhibit Dates: 9/83–Present.
Learning Outcomes: Upon completion of the course the student will serve as apprentice helicopter mechanic at the organizational level under appropriate supervision.
Instruction: Lectures and laboratories in hand tools, aircraft hardware, safety procedures, forms and records, aircraft ground handling and taxiing, and aircraft systems, including the electrical and fuel systems, powerplant and drive system flight control system, rotor system, hydraulic system, and line operation and inspection.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in helicopter maintenance (9/89). Note: This credit duplicates that credit recommended for C-600-2011 and C-600-2012.

NV-1704-0330

MARINE AIR TRAFFIC CONTROL ADVANCED TECHNICIAN, CLASS C1

Course Number: C-103-2047.
Location: Naval Air Technical Training Center, Memphis, Millington, TN.
Length: 17 weeks (680 hours).
Exhibit Dates: 4/88–Present.
Learning Outcomes: Upon completion of the course the student will be able to operate, test, troubleshoot, install and repair advanced electronics systems and equipment and be able to train others in electronics maintenance mangement.
Instruction: Lectures and laboratories in maintenance management including maintenance procedures, supply, inspection, publications, safety, and resource management concepts. Topics included are logic gates, shift registers, memory devices, microprocessors, and programming. Also included: maintenance on communications equipment, radar equipment, and navigation equipment.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in maintenance management, 1 in computer systems and organization, and 2 in electronic systems troubleshooting and maintenance (9/89).

NV-1704-0332

GENERAL MECHANICAL MAINTENANCE SKILLS

Course Number: A-652-0228.
Location: Submarine School, Groton/New London, CT; Submarine Training Facility, Charleston, SC; Submarine Training Facility, San Diego, CA; Guided Missile School Detachment, Dam Neck, VA; Trident Training Facility, Bangor, WA.
Length: 2 weeks (80 hours).
Exhibit Dates: 12/87–Present.
Learning Outcomes: Upon completion of the course the student will be able to maintain, repair, and test piping, gauges, and heat exchangers and perform pump-motor alignment and bearing inspection.
Instruction: Lectures on the use of hand tools, gauges, measuring instruments, safety, documentation, lubrication, bearings, and precision instruments. Laboratory exercises on the use of hand tools, precision instruments, weight handling equipment, locking devices, and bearing inspection. Also includes disassembly, inspection, repair, assembly, and testing of mechanical components and systems.
Credit Recommendation: In the vocational certificate category, 2 semester hours in hand tools and safety procedures and 2 in maintenance of piping systems and mechanical instruments (10/89).

NV-1704-0333

OCEAN SYSTEMS TECHNICIAN ANALYST, CLASS A

Course Number: J-210-0011.
Location: Fleet Antisubmarine Warfare Training Center, Norfolk, VA.
Length: 13–14 weeks (532 hours).
Exhibit Dates: 10/86–Present.
Learning Outcomes: Upon completion of the course the student will be able to analyze acoustic signature displays of signals received from sonar detectors; identify ships/boats by their acoustic signature displays; describe general shipboard propulsion systems and machinery.
Instruction: Classroom lectures and practical exercises for each topic. Emphasis is on analyzing acoustic signatures.
Credit Recommendation: In the vocational certificate category, 2 semester hours in survey of marine propulsion machinery; in the upper-division baccalaureate category, 3 semester hours in ocean acoustics (3/90).

NV-1706-0001

CALCULATOR REPAIR CLASS C (Instrumentman (Calculator Repair), Class C)

Course Number: A-670-013.
Location: Service Schools Command, Great Lakes, IL.
Length: 18 weeks (555 hours).
Exhibit Dates: 2/70–6/80.
Objectives: To train petty officers to test, repair, overhaul, and maintain Friden, Marchant, and Monroe calculators.
Instruction: Lectures and practical exercises in the testing, repair, overhaul, and maintenance of Friden, Marchant, and Monroe calculators.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 10 semester hours in instrument repair (8/74).

NV-1706-0002

TELETYPEWRITER TT-299 B/UG WATCHSTANDERS REFRESHER MAINTENANCE

Course Number: L-160-011.
Location: Fleet Submarine Training Facility, Pearl Harbor, HI.
Length: 3 weeks (90 hours).
Exhibit Dates: 12/69–1/88.
Objectives: To train enlisted personnel to maintain and repair the TT-299 B/UG teletypewriter set.
Instruction: Lectures and practical exercises in the maintenance and repair of the TT-299 B/UG teletypewriter set. Course includes a detailed study of the electrical and mechanical features of the TT-299 B/UG teletypewriter and comprehensive coverage of typewriter maintenance.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in typewriter repair (8/74).

NV-1706-0003

ADVANCED OFFICE MACHINE REPAIR, CLASS C

Course Number: A-670-0027.
Location: Instrumentman Class C School, Great Lakes, IL.
Length: 25 weeks (780 hours).
Exhibit Dates: 6/72–6/77.
Objectives: To train personnel to maintain and repair office machines.
Instruction: Lectures and practical exercises in identifying, testing, diagnosing, repairing, overhauling, and adjusting specific types of adding machines, electric typewriters, and calculators.
Credit Recommendation: In the vocational certificate category, 10 semester hours in office machine maintenance (6/75); in the lower-division baccalaureate/associate degree category, 4 semester hours in office machine maintenance (6/75).

NV-1708-0001

RIVER ASSAULT CRAFT TRAINING

Course Number: H-00-1500; H-000-1500.
Location: Inshore Operations Training Center, Vallejo, CA.
Length: 11 weeks (805 hours).
Exhibit Dates: 4/69–1/88.
Objectives: To provide officers and enlisted personnel with the knowledge and skills necessary to perform river assault craft operations.
Instruction: Lectures and practical exercises in river assault craft operations, in-

cluding navigation, boat-handling techniques, damage control and salvage, swimming, in-water survival training, gunnery and small arms operation, tactics, and counterinsurgency.

Credit Recommendation: In the vocational certificate category, 4 semester hours in transportation (2/74).

NV-1708-0002

LANDING CRAFT BEACH AND SURF SALVAGE

Course Number: G-2E-6310; H-2E-5318; H-000-5318.

Location: Amphibious School, San Diego, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To provide naval personnel qualified as second class swimmers with specialized training in the techniques and procedures of amphibious boat salvage operations.

Instruction: Lectures and practical work in light-tow and heavy salvage boats; performance of salvage operations on broached and stranded boats in and beyond the surf line; emergency ramp-raising procedures; minor repair techniques.

Credit Recommendation: In the vocational certificate category, 3 semester hours in transportation or salvage operations (2/74).

NV-1708-0003

ADVANCED SUBMARINE QUARTERMASTER SCHOOL

Course Number: F-772-011.

Location: Submarine School, Groton, CT.

Length: 3 weeks (100 hours).

Exhibit Dates: 4/68-1/88.

Objectives: To teach rated quartermasters with a minimum of one year in rate the classroom elements of the professional requirements of submarine piloting and navigation.

Instruction: Consists of piloting and anchoring techniques; determination of Loran lines; familiarity with compass, including causes, kinds, significance of, and compensation for, compass error; computation of sunrise, sunset, moonrise, and moonset; determination of lines of position by celestial observaton.

Credit Recommendation: In the vocational certificate category, 3 semester hours in water transportation (2/74).

NV-1708-0004

BASIC QUARTERMASTER, ENLISTED

Course Number: J-772-620.

Location: Fleet Training Center, Newport, RI.

Length: 5 weeks (163 hours).

Exhibit Dates: 7/68-1/88.

Objectives: To train enlisted personnel in the basic principles and techniques of water navigation.

Instruction: Lectures and practical exercises in shipboard duties of the quartermaster and in navigation fundamentals, including nautical charts and chart projections; fundamentals of plotting; operation of magnetic and gyro compasses; the lateral buoy system; operation of various navigational instruments; and tides, currents, and weather.

Credit Recommendation: In the vocational certificate category, 3 semester hours in transportation (2/74).

NV-1708-0005

BASIC QUARTERMASTER

Course Number: K-772-2101.

Location: Fleet Training Center, San Diego, CA.

Length: 4 weeks (115 hours).

Exhibit Dates: 1/71-1/88.

Objectives: To provide enlisted personnel with the knowledge of navigation required to qualify them to perform as quartermasters of the watch.

Instruction: Lectures and practical exercises in basic navigation, including nautical charts, navigation publications, tides and currents, time, weather, plotting application and instrument use, and various navigational aids.

Credit Recommendation: In the vocational certificate category, 3 semester hours in transportation (2/74).

NV-1708-0006

ASSAULT BOAT COXSWAIN

Course Number: H-813-5316; G-062-6358; G-813-6358.

Location: Naval Amphibious School, San Diego, CA; Naval Amphibious School, Norfolk, VA.

Length: 3 weeks (106-121 hours).

Exhibit Dates: 1/67-1/88.

Objectives: To provide enlisted personnel with a basic knowledge of boat handling and assault boat operations.

Instruction: Lectures and practical demonstrations in basic boat-handling procedures, landing craft operations, assault boat operations, tactics and hand signals, ship-to-shore communications, and navigational aids.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/74).

NV-1708-0007

SHIPLOADING AND STOWAGE

Course Number: A-8C-0013.

Location: Naval Supply Center, Oakland, CA.

Length: 2 weeks (64 hours).

Exhibit Dates: 3/71-1/88.

Objectives: To train enlisted personnel to load, stow, and discharge cargo and to supervise others engaged in this activity.

Instruction: Lectures and practical exercises in the techniques of loading, stowing, and discharging cargo and in the supervision of such activities. Course includes cargo stowage, stevedoring, safety in cargo operations, stability in shiploading, and preplanning ship's cargo.

Credit Recommendation: In the vocational certificate category, 2 semester hours in shiploading and stowage (7/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in shiploading and stowage (7/74).

NV-1709-0001

1. PHOTOGRAPHER'S MATE SCHOOL, CLASS A
2. PHOTOGRAPHER'S MATE SCHOOL, CLASS A, BASIC
3. PHOTOGRAPHER'S MATE SCHOOL, CLASS A
4. PHOTOGRAPHER'S MATE A (AERIAL CAMERAMAN) (Photographer's Mate G (Cameraman))

Course Number: *Version 1:* C-400-2011. *Version 2:* C-400-2011. *Version 3:* C-400-10. *Version 4:* None.

Location: Naval Technical Training Center, Pensacola, FL.

Length: *Version 1:* 12 weeks (480 hours). *Version 2:* Self-paced 11-12 weeks (440 hours). *Version 3:* 15-18 weeks (614-720 hours). *Version 4:* 8-9 weeks (320-360 hours).

Exhibit Dates: *Version 1:* 2/82-Present. *Version 2:* 11/74-1/82. *Version 3:* 8/65-10/74. *Version 4:* 2/56-7/65.

Objectives: To provide personnel with a basic knowledge of the photographic work performed in the Navy, including photographic principles, camera operation, black and white and color film processing and printing, motion picture study, aerial photography, and camera maintenance.

Instruction: *All Versions:* An intensive study in the basics of photography and photographic principles, plus two weeks of military-oriented training; lectures and practical experiences with photographic theory, camera operation, lab operation, lab orientation, photo techniques, aerial photography, public affairs photography, small-format photography, color print photography, and motion picture photography. *Version 2:* Course uses modular, self-paced, individualized instruction as the primary instructional method with heavy emphasis on performance. Specific topics include exposure factors and controls, photographic materials, camera techniques, quality control, flash photography, studio photography, information and release photography, motion picture photography, color photography, and aerial photographic laboratory support.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 4 semester hours in photography (3/84). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in photography (1/77). *Version 3:* In the vocational certificate category, 6 semester hours in photography (12/73); in the lower-division baccalaureate/associate degree category, 3 semester hours in photography (12/73); in the upper-division baccalaureate category, 6 semester hours in photography (12/68). *Version 4:* In the vocational certificate category, 3 semester hours in photography (12/73); in the lower-division baccalaureate/associate degree category, 2 semester hours in photography (12/73); in the upper-division baccalaureate category, 3 semester hours in photography (12/68).

NV-1709-0002

PHOTOGRAPHIC OFFICERS CLASS O

Course Number: None.

Location: Naval Air Technical Training Unit, Pensacola, FL.

Length: 21 weeks (810 hours).

Exhibit Dates: 10/57-12/68.

Objectives: To provide selected officers with a knowledge of and skills in basic photography, including military-oriented air/sea applications.

Instruction: Basic integrated subjects, including administrative records, files, reports, and a study of electricity; general photography, including exposure, camera operation, photographic chemistry, and laboratory procedures; motion picture photography, including exposure, camera operation, and laboratory procedures; aerial photography, including aerial techniques, camera operation, laboratory operations; color photography, including techniques for both color prints and color transparencies.

Credit Recommendation: In the vocational certificate category, 6 semester hours in

photography (12/73); in the lower-division baccalaureate/associate degree category, 3 semester hours in photography (12/73); in the upper-division baccalaureate category, 6 semester hours in photography (12/68).

NV-1709-0003

1. Photographer's Mate School Class B
2. Photographer's Mate School Class B
   (Advanced Photographer's Mate School Class B)

Course Number: *Version 1:* C-400-11. *Version 2:* None.

Location: Naval Air Technical Training Unit, Pensacola, FL.

Length: *Version 1:* 24 weeks (960 hours). *Version 2:* 21-22 weeks (840-896 hours).

Exhibit Dates: *Version 1:* 2/71-10/76. *Version 2:* 10/57-1/71.

Objectives: To provide selected enlisted trainees with the knowledge and skills necessary to perform the duties of senior photographers, including operation and maintenance of service-type still, aerial, and motion picture cameras and related equipment, and production of photographs for public information purposes.

Instruction: Lectures and practical experiences in general photography, including administration and organization of Navy photography; orientation to scientific principles of photographic film and chemistry; applied photography in small, medium, and large format cameras; color slide and print photography; public affairs photography; aerial photography, including operation, reproduction, planning, and utilization of military-oriented missions; motion picture photography, including fundamentals, techniques, and equipment orientation.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in photography (12/73); in the upper-division baccalaureate category, 3 semester hours in photography (12/73). *Version 2:* In the vocational certificate category, 6 semester hours in photography (12/73); in the lower-division baccalaureate/associate degree category, 3 semester hours in photography (12/73); in the upper-division baccalaureate category, 6 semester hours in photography (12/68).

NV-1709-0004

1. Photographic Reconnaissance Officers, Class O
2. Photographic Reconnaissance Officers, Class O
3. Photographic Reconnaissance Officers, Class O
4. Photographic Reconnaissance Class O

Course Number: *Version 1:* C-2B-10. *Version 2:* None. *Version 3:* None. *Version 4:* None.

Location: Naval Air Technical Training Unit, Pensacola, FL.

Length: *Version 1:* 3 weeks (116 hours). *Version 2:* 2 weeks (98 hours). *Version 3:* 4 weeks (152 hours). *Version 4:* 21 weeks (840 hours).

Exhibit Dates: *Version 1:* 6/71-12/71. *Version 2:* 1/69-5/71. *Version 3:* 11/63-12/68. *Version 4:* 10/57-10/63.

Objectives: To provide selected aviators, observers, or officers with an understanding of aerial photographic reconnaissance.

Instruction: *All Versions:* Principles of aerial photography; aerial photographic techniques; photographic intelligence. *Version 1:* Basic photography, including camera components, exposure, laboratory orientation, film processing, and printing. *Version 4:* Advanced photography.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in photography (12/73). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in photography (12/68). *Version 3:* In the upper-division baccalaureate category, 3 semester hours in photography (12/68). *Version 4:* In the vocational certificate category, 6 semester hours in photography (12/73); in the lower-division baccalaureate/associate degree category, 3 semester hours in photography (12/73); in the upper-division baccalaureate category, 6 semester hours in photography (12/68).

NV-1709-0005

Special Photographic Course for Non-Photographic Personnel, Class C

Course Number: None.

Location: Naval Air Technical Training Unit, Pensacola, FL.

Length: 6 weeks (240 hours).

Exhibit Dates: 2/66-12/68.

Objectives: To provide trainees with the knowledge and skills of basic photography, including the operation of selected cameras, darkroom layout, and photoprocessing and exposure techniques.

Instruction: To accomplish the objectives the trainee must develop skills in the use of the Leica camera and its accessories, acquire an understanding of the principles of physics and chemistry as related to photography, have a working knowledge of exposures for natural and artificial light using black and white and color film, and apply skillfully the processing techniques for small negatives, and black and white and color reversal film. Studies also include darkroom layout, equipment planning, negative filing, and captioning. Special studies in aerial cameras for the production of oblique and vertical photographs, stereotriplets, and overlapping single- and multi-strip mosaics.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in photography (12/68).

NV-1709-0006

IOIC Photo Interpretation Officer

Course Number: D-3A-010.

Location: Reconnaissance Attack Squadron Three, Albany, GA.

Length: 5 weeks (200 hours).

Exhibit Dates: 5/69-1/88.

Objectives: To provide officers with an understanding of the capabilities of the Integrated Operational Intelligence Center (IOIC), and to qualify them to interpret, analyze, and report aerial photographic missions through the use of a computer-oriented photographic station within the IOIC area aboard attack aircraft carriers.

Instruction: IOIC concepts; multisensor capabilities of the RA-5C aircraft; basic intelligence-gathering concepts; photographic interpretation station; computer programs related to photographic interpretation.

Credit Recommendation: In the vocational certificate category, 1 semester hour in photographic interpretation (12/73).

NV-1709-0007

IOIC Photo Interpretation Operator

Course Number: D-150-015.

Location: Reconnaissance Attack Squadron Three, Albany, GA.

Length: 9 weeks (348 hours).

Exhibit Dates: 5/69-1/88.

Objectives: To provide personnel with an understanding of the capabilities of the Integrated Operational Intelligence Center (IOIC), and to qualify them to interpret, analyze, and report aerial photographic missions through the use of a computer-oriented photographic station within the IOIC area aboard attack aircraft carriers.

Instruction: IOIC concepts; multisensor capabilities of the RA-5C aircraft; basic intelligence-gathering concepts; operation of the computer-oriented photographic station; computer programs related to photographic interpretation.

Credit Recommendation: In the vocational certificate category, 2 semester hours in photographic interpretation (12/73); in the upper-division baccalaureate category, 3 semester hours in photographic interpretation (12/68).

NV-1709-0008

IOIC Photographic Processing/Maintenance

Course Number: D-150-014.

Location: Naval Intelligence Processing System Training Facility, Albany, GA.

Length: 5 weeks (175 hours).

Exhibit Dates: 5/69-1/88.

Objectives: To provide enlisted personnel with specialized training which will enable them to efficiently process and reproduce photographic intelligence collected by RA-5C aircraft.

Instruction: Familiarization with current fleet photographic operations and procedures; basic photographic quality control techniques; operation and maintenance of continuous processors, printers, and related equipment; tone reproduction techniques.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (12/73).

NV-1709-0009

1. Cinema/Television (TV) Production Specialist C1
2. Motion Picture School, Class C
   (Motion Picture Cameraman)
3. Motion Picture School, Class C

Course Number: *All Versions:* C-400-2010. *Version 2:* C-400-12.

Location: Naval Technical Training Center, Pensacola, FL.

Length: *Version 1:* Self-paced 15 weeks (576 hours). *Version 2:* Self-paced 11-12 weeks (440 hours). *Version 3:* 10-11 weeks (424-464 hours).

Exhibit Dates: *Version 1:* 10/80-12/84. *Version 2:* 10/76-9/80. *Version 3:* 11/65-9/76.

Objectives: To provide students with the skills of motion picture filming and editing, as well as an understanding of the theory and practice of processing, printing, and sound-recording for motion picture film; and to familiarize the student with aerial and underwater motion picture photography, and television applications.

Instruction: *Version 1:* Course uses modular, self-paced, individualized instruction as the primary instructional method. Course topics cover photographic laboratory supervision, advanced motion picture photography, advanced motion picture shooting techniques, studio production, double system sound, sound documentary production and television production. For the course after 1984, see NV-1709-0027. *Version 2:* Course uses modular, self-paced, individualized instruction as the primary instructional method. Course topics cover photographic laboratory supervision, advanced motion picture photography, advanced motion picture shooting techniques, studio production, double system sound, sound documentary production, and television production. *Version 3:* Phase I: Studies in basic film craft will be a product of experiences in film continuity, composition, film assembly and editing techniques, special effects, and screen direction; studies in camera mechanism, optics, and maintenance, as well as film exposure, lens setting, filter theory, and reversal film usage. Phase II: In addition to Phase I, experience with Arriflex and Mitchell cameras will be applied to advanced lighting techniques, story development, script writing, production planning, and negative-positive editing, as well as color film techniques and theory. Phase III: Studies in high-speed, underwater, and aerial photography, as well as sound theory for single and double system production.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in photo departmental operations (3/84); in the upper-division baccalaureate category, 4 semester hours in cinematography or motion picture photography (3/84). *Version 2:* In the upper-division baccalaureate category, 4 semester hours in cinematography or motion picture photography (1/77). *Version 3:* In the upper-division baccalaureate category, 3 semester hours in motion picture photography (12/68).

NV-1709-0010

Still Documentary Photography C1

Course Number: C-400-2022.

Location: Naval Technical Training Center, Pensacola, FL.

Length: Self-paced 5–6 weeks (218 hours).

Exhibit Dates: *Version 1:* 4/78–Present. *Version 2:* 10/76–3/78.

Objectives: To provide training or updating of skills in producing photo stories and written presentations for media release and the development of audio visual presentations.

Instruction: *All Versions:* The course uses modular self-paced individualized instruction as the primary instructional method. Course topics cover photographic laboratory supervision; documentary news photography, including caption writing, feature picture, basic news writing, spot news, layout and page makeup, picture story, and picture essay; and media selection, including presentation objectives analysis, audience analysis, content outline development, presentation method, storyboard development, master script, visual and narrative production, assembly and programming, general interest slide show, and multi-media presentation.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in photo department operations (3/84); in the upper-division baccalaureate category, 2 semester hours in documentary news photography, 2 in media selection (3/84). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in photojournalism or audio-visual techniques (1/77).

NV-1709-0011

Tactical Photographic Interpretation

Course Number: None.

Location: Photographic Interpretation Center, Washington, DC.

Length: 11 weeks (312 hours).

Exhibit Dates: 1/54–12/68.

Objectives: To train enlisted personnel to interpret aerial photographs for military purposes.

Instruction: Lectures and practical exercises in tactical photographic interpretation. Course includes required orientation of cameras and other equipment, mathematics, map and chart reading, and identification exercises of tactical or military items on aerial photographs.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in photographic interpretation (12/68).

NV-1709-0012

Strategic Photographic Interpretation

Course Number: None.

Location: Photographic Interpretation Center, Washington, DC.

Length: 10 weeks (238 hours).

Exhibit Dates: 1/54–12/68.

Objectives: To train enlisted personnel to interpret aerial photographs.

Instruction: Lectures and practical exercises in strategic photographic interpretation. Course includes photogeometrics and measurement, related mathematics, stereo comparagraph, and more extensive analysis and interpretation of aerial photographs for targeting purposes.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in photographic interpretation (12/68).

NV-1709-0013

IOIC Photographic Processing Officer

Course Number: D-7F-010.

Location: Reconnaisance Attack Squadron Three, Albany, GA.

Length: 4 weeks (160 hours).

Exhibit Dates: 5/69–1/88.

Objectives: To train officers to supervise a photographic laboratory.

Instruction: Lectures and practical exercises in IOIC photographic system orientation; photographic processing control, including sensitometry and desitometry; processing and support equipment; printers; equipment maintenance; and applications to fleet operations.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in photographic processing or photofinishing on the basis of institutional evaluation (7/74).

NV-1709-0014

Metrical Photographic Interpretation

Course Number: None.

Location: Photographic Interpretation Center, Washington, DC.

Length: 14 weeks (401 hours).

Exhibit Dates: 1/54–12/68.

Objectives: To train enlisted personnel to interpret aerial photographs.

Instruction: Lectures and practical exercises in aerial photographic interpretation, including map orientation, appropriate mathematics, position determination, reconnaissance surveying, map and chart projections, photogeometrics, stereocomparagraph, cartography, and trimetrogon mapping.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in photographic interpretation (7/74); in the upper-division baccalaureate category, 4 semester hours in photographic interpretation (12/68).

NV-1709-0015

Radar (Target) Intelligence

Course Number: Not available.

Location: Photographic Interpretation Center, Washington, DC.

Length: 11 weeks (440 hours).

Exhibit Dates: 4/54–12/68.

Objectives: To train enlisted personnel to interpret radar scope images and aerial photographs.

Instruction: Lectures and practical exercises in photograph analyzing for building density, height, types of structures; principles of radar reflection, distortion, and interpretation; and radar scope photographic intrepretation and plotting.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in photographic interpretation (7/74); in the upper-division baccalaureate category, 4 semester hours in photographic interpretation (12/68).

NV-1709-0016

Medical Photography Technic

(Medical Photography Technician, Class C)

Course Number: B-400-0010; B-400-10.

Location: Naval Medical School, Bethesda, MD.

Length: *Version 1:* 30 weeks (1200 hours). *Version 2:* 24–26 weeks (900–1120 hours).

Exhibit Dates: *Version 1:* 6/83-Present. *Version 2:* 1/55–5/83.

Objectives: To train enlisted personnel to take, process, and print black and white and color still and motion pictures relating to scientific, clinical, surgical, and pathological fields.

Instruction: *All Versions:* Lectures and practical exercises in medical photography, including basic principles of photography, camera operation, optics, light meters, filters, film processing and darkroom procedures for both black and white and color films, photo copying, slide duplication and mounting, slide projection, medical-related photographic techniques,and motion picture projection. *Version 1:* Includes forensic photography, audio visual and TV production. *Version 2:* Includes infrared and ultraviolet photo techniques, photomicrography and cinematography.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 6 semester hours in still photography, 4 in black and white photography, 5 in color photography, 7 in medical photography, 3 in public affairs photography, 1 in forensic photography and 1 in audiovisual techniques (2/84). *Version 2:* In the lower-division baccalaureate/associate degree category, 4 semester hours in medical photography (7/74); in the upper-division baccalaureate category, 4 semester hours in photography, 12 in medical photography (12/68).

NV-1709-0017

Illustrative Photography C1

Course Number: C-400-2021.

Location: Naval Technical Training Center, Pensacola, FL.

Length: Self-paced 4–6 weeks (182–212 hours).

Exhibit Dates: 10/76–Present.

Objectives: To provide training or skill updating in the areas of slide production and illustrative, architectural, and portrait photography.

Instruction: The course uses modular self-paced, individualized instruction as the primary instructional method. Course topics cover photographic laboratory supervision; illustrative photography, including the Kodak Ektamatic print processor, macrophotography, composition, and architectural photography; and studio lighting/portraiture.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in photo department operations (3/84); in the upper-division baccalaureate category, 2 semester hours in photography (studio/architectural/portraiture) (3/84).

NV-1709-0018

Photographic Laboratory Technician C1

Course Number: C-400-2020.

Location: Naval Technical Training Center, Pensacola, FL.

Length: Self-paced 6 weeks (213 hours).

Exhibit Dates: *Version 1:* 4/78–Present. *Version 2:* 10/76–3/78.

Objectives: To provide students training and skills in color printing and processing, photofinishing equipment operation, and chemical process quality control.

Instruction: The course uses modular self-paced, individualized instruction as the primary instructional method. Course topics cover photographic laboratory supervision; laboratory support equipment familiarization, including sensitometry, film speed, process effects and uniformity, chemical monitoring and process control, replenishment rates, statistical and sensitometric evaluation, gamma and tone reproduction; and color processing, including the master print, basket processing, visual evaluations, off-easel and on-easel spot evaluations, and calibration and indexing of color analyzer.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in photo department operations (3/84); in the upper-division baccalaureate category, 2 semester hours in photography or photographic technician training (3/84). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in photography or photographic technician training (1/77).

NV-1709-0019

Photographic Equipment Preventive/Operational Maintenance

Course Number: C-670-2016.

Location: Naval Technical Training Center, Pensacola, FL.

Length: 5-6 weeks (213 contact hours).

Exhibit Dates: 1/83–9/84.

Objectives: To provide photographer's mates with the skills required to install, operate and maintain general photographic equipment.

Instruction: Lectures and practical exercises in the concepts of mechanical and electro-mechanical devices commonly found in shore and fleet photography laboratories. For the course after 1984, see exhibit NV-1709-0028.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in photo-finishing, 1 in photo department operations (3/84).

NV-1709-0020

Periscope Photography

Course Number: A-400-0010.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2 weeks (61 hours).

Exhibit Dates: 10/73–Present

Objectives: Upon successful completion of this course, the trainee will be able to state the purpose and capabilities, characteristics, limitations and requirements of the KS-93A camera. The trainee will also be able to perform tasks required for normal operation of the ET-109 A/B film processor.

Instruction: Lectures and laboratory instruction in the theory of operation and mainenance of a KS-93A camera and ET-109 A/B film processor.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (11/85).

NV-1709-0021

AN/SXQ-8(V)2 Secure Closed Circuit Television System Maintenance

Course Number: D-150-0101; J-150-0989.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA; Naval Intelligence Processing System Training Facility, Key West, FL.

Length: 8 weeks (320 hours).

Exhibit Dates: 12/82–Present.

Objectives: To provide technical knowledge and skills needed to perform preventive and corrective maintenance actions for the AN/SXQ-8(V)2 secure closed circuit television system.

Instruction: Covers block diagram analysis of CCTV system with waveform analysis, and the correlation of special test equipment to the over-all signal block diagram. The course is broken into major segments covering the specific equipment in the input, sync, switching, and monitor blocks.

Credit Recommendation: In the vocational certificate category, 6 semester hours in closed circuit television maintenance; in the lower-division baccalaureate/associate degree category, 3 semester hours in a technical elective (electronics) (1/86).

NV-1709-0022

EH-73 Photographic Quality Control Maintenance (Kodak Ektachrome RT Processor Quality Control Maintenance)

Course Number: C-400-0101; D-400-0101.

Location: Naval Technical Training Center, Pensacola, FL; Naval Intelligence Processing System Training Facility, Key West, FL.

Length: 5 weeks (200 hours).

Exhibit Dates: 1/83–1/87.

Objectives: To provide a selected number of students with specialized training in the operation and maintenance of a color film processor and related equipment.

Instruction: Topics include recommended procedures for application to color photography; operation and maintainance of roller processors, printers, and related equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in photographic darkroom procedures (1/86).

NV-1709-0023

EH-38D Photographic Quality Control/Maintenance

Course Number: C-150-0014; D-150-0014.

Location: Naval Technical Training Center, Pensacola, FL; Naval Intelligence Processing System Training Facility, Key West, FL.

Length: 8 weeks (320 hours).

Exhibit Dates: 1/83–1/87.

Objectives: To provide students with specialized training in the operation and maintenance of film processors and related equipment, and to start and maintain a quality control program.

Instruction: Topics include the operation and maintenance of data processing equipment and darkroom procedures including chemical preparation and mixing.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in technical mathematics, 3 in photographic techniques (1/86).

NV-1709-0024

Modular Image Interpretation System and Analytical Photogrammetric Positioning System Maintenance

Course Number: D-150-0105, J-150-0990.

Location: Naval Air Station, Norfolk, VA; Naval Intelligence Processing System Training Facility, Key West, FL.

Length: 4 weeks (160 hours).

Exhibit Dates: 1/83–Present.

Objectives: Trains selected data systems technicians in corrective and preventive maintenance of the Modular Image Interpretation System (MIIS) AS-27A and the Analytical Photogrammetric Positioning System (APPS) AN/UYK-48.

Instruction: Topics include the purpose, capabilities, and operation of the over-all system; lab portion covers troubleshooting and corrective maintenance procedures.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (1/86).

NV-1709-0025

Naval Intelligence Processing System (NIPS) Photographic Processing/Tactical Air Reconnaissance Pod System (TARPS) Reconnaissance Coordinator Officer

Course Number: C-3A-0117; D-3A-0117.

Location: Naval Technical Training Center, Pensacola, FL; Naval Intelligence Processing System Training Facility, Key West, FL.

Length: 2 weeks (80 hours).

Exhibit Dates: 11/82–1/87.

Objectives: To provide detailed familiarization in the operation and management of the photographic section of a naval intelligence processing system and reconnaissance mission planning.

Instruction: Familiarization with photographic processing, aircraft photographic equipment, performance procedures, overall operation of the intelligence center, coordination efforts, and quality production.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (1/86).

NV-1709-0026

Afloat Tactical Reconnaissance Intelligence (TACRECCE) Analyst

Course Number: D-150-0016; J-150-0987.

Location: Naval Air Station, Norfolk, VA; Naval Intelligence Processing System Training Facility, Key West, FL.

Length: 8 weeks (320 hours).
Exhibit Dates: 10/84–2/87.

Objectives: To provide intelligence specialists with the technical ability to understand the capabilities of the Naval Intelligence Processing System (NIPS) afloat.

Instruction: Teaches the skills necessary to operate an image interpretation system, a photogrammetric positioning system, and to perform tactical reconnaissance procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester credits in technical mathematics (1/86); in the upper-division baccalaureate category, 3 semester hours in photogrammetry (1/86).

NV-1709-0027

Cinema Television/Production Specialist

Course Number: C-400-2010.
Location: Naval School of Photography, Corry Station, Pensacola, FL.
Length: 17–18 weeks (696 hours).
Exhibit Dates: 1/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to script cinema/television productions, operate professional cinema/television cameras and be able to apply standard cinema/television techniques for training, documentation, news and public information genres.

Instruction: Includes lectures, demonstrations and laboratory work in basic cinema and television techniques, scripting, camera work, editing and sound for training, documentary, news and public information genres.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in cinema productions and 3 in television production (7/87).

NV-1709-0028

Photographic Equipment Preventive/Operational Maintenance

Course Number: C-670-2016.
Location: Naval School of Photography, Corry Station, Pensacola, FL.
Length: 6 weeks (240 hours).
Exhibit Dates: 10/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to install, operate, maintain and provide minor repairs to general photographic equipment.

Instruction: Includes lectures, laboratories, demonstrations and exercises covering the mechanical, electrical, and electro-mechanical devices commonly found in Navy photographic laboratories.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in photographic finishing (7/87).

NV-1709-0029

Photographic Equipment Repair, Class C-1

Course Number: C-670-2012.
Location: Naval School of Photography, Corry Station, Pensacola, FL.
Length: 13 weeks (520 hours).
Exhibit Dates: 1/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform preventive maintenance on representative mechanical, electro-mechanical and electronic photographic equipment.

Instruction: Includes lectures, demonstrations and laboratory work on the procedures of preventive maintenance on representative mechanical, electro-mechanical and electronic photographic equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 8 semester hours in photography equipment repair (7/87).

NV-1709-0030

Advanced Photography Training

Course Number: C-400-2030.
Location: Naval School of Photography, Corry Station, Pensacola, FL.
Length: 14 weeks (560 hours).
Exhibit Dates: 10/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to demonstrate knowledge and skills in the areas of photographic lab administration, quality control, color photography, illustrative photography, portraiture, photojournalism, motion picture and aerial photography.

Instruction: Includes lectures, demonstrations, and laboratory work in the areas of photographic lab administration, quality control, color photography, illustrative photography, portraiture, photojournalism, motion picture and aerial photography.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in photographic lab administration, 1 in quality control, 2 in color photography, 2 in illustrative photography, 1 in portraiture, 2 in photojournalism, 2 in motion picture photography, and 1 in aerial photography (7/87).

NV-1709-0031

Still Documentary Photography

Course Number: C-400-2028.
Location: Naval School of Photography, Corry Station, Pensacola, FL.
Length: 2–3 weeks (88 hours).
Exhibit Dates: 6/84–9/87.

Learning Outcomes: Upon completion of the course, the student will be able to function as a still photography journalist including caption writing, basic news writing, layout and page make-up, produce photographs for features, picture stories, and picture groups.

Instruction: Includes lectures, laboratories, demonstrations and exercises covering caption writing, the feature picture, basic news writing, rapid access photography, layout and page make-up, the picture story, and the picture group.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in photographic journalism (7/87).

NV-1709-0032

Illustrative/Architectural Photography

Course Number: C-400-2026.
Location: Naval School of Photography, Corry Station, Pensacola, FL.
Length: 2 weeks (80 hours).
Exhibit Dates: 6/84–9/87.

Learning Outcomes: Upon completion of the course, the student will be able to use a variety of lighting techniques to enhance shape, tone and texture of various subjects, and be able to light large interiors. The student will be able to use all of the corrective features of a 4x5 view camera for architectural photography.

Instruction: Includes lectures, demonstrations and laboratory work in lighting techniques and corrective view camera functions.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in illustrative/architectural photography (corrective) (7/87).

NV-1709-0033

Photographic Quality Control

Course Number: C-400-2024.
Location: Naval School of Photography, Corry Station, Pensacola, FL.
Length: 6 weeks (242 hours).
Exhibit Dates: 6/84–9/87.

Learning Outcomes: Upon completion of the course, the student will be able to monitor photographic processes and utilize statistical and sensitometric evaluation to maintain quality control.

Instruction: Includes lectures, laboratories, demonstrations and exercises covering photographic chemistry, sensitometry and photographic process quality control.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in photographic process quality control (7/87).

NV-1709-0034

Portraiture

Course Number: C-400-2027.
Location: Naval School of Photography, Corry Station, Pensacola, FL.
Length: 1–2 weeks (52 hours).
Exhibit Dates: 6/84–9/87.

Learning Outcomes: Upon completion of the course, the student will be able to demonstrate knowledge and skills in the area of portrait photography including head and shoulders, three-quarter length, executive, group and profile portraits and the correct use of lighting and props.

Instruction: Includes lectures, demonstrations and laboratory work in portrait studio equipment operation, head and shoulders portraits, three-quarter length portraits, executive portraits, group portraits and specialized portraits.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in portraiture (7/87).

NV-1709-0035

Color Photography C1

Course Number: C-400-2012.
Location: Naval School of Photography, Corry Station, Pensacola, FL.
Length: 2 weeks (73 hours).
Exhibit Dates: 6/84–9/87.

Learning Outcomes: Upon completion of the course, the student will be able to demonstrate knowledge and skills in the area of color photography including color photography theory, quality control and corrective color printing.

Instruction: Includes lectures, demonstrations and laboratory work in color negative processing and printing and color processing quality control including process mounting.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in color photography (7/87).

NV-1709-0036

Audio-Visual Managers

Course Number: C-7F-216.
Location: Naval School of Photography, Corry Station, Pensacola, FL.

Length: 2 weeks (68 hours).

Exhibit Dates: 10/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to successfully manage an audio-visual facility.

Instruction: Includes lectures, demonstrations, covering the organization of naval audio-visual services.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in audio-visual facility management (7/87).

NV-1709-0037

Photographer's Mate School Class A

Course Number: C-400-2011.

Location: Naval School of Photography, Corry Station, Pensacola, FL.

Length: 9–10 weeks (372 hours).

Exhibit Dates: 1/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to provide, with minimal supervision, routine black and white still photographs including basic electronic flash photography, basic studio photography, and basic documentary photography.

Instruction: Includes lectures, laboratories, demonstrations and exercises in B & W photography process control, basic camera and exposure meter operation, electronic flash operation, sensitometry, studio photography and documentary photography.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in basic black and white photography, and 3 in materials and processes of photography (7/87).

NV-1709-0038

Intelligence Photography

Course Number: J-243-0974.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA. Fleet Intelligence Training Center, Pacific, San Diego, CA.

Length: 1 week (40 hours).

Exhibit Dates: 4/86–Present.

Learning Outcomes: Upon completion of the course the student will be able to operate a 35 mm camera; understand fundamental photographic theory and techniques, develop and print photographs using standard basic techniques, and maintain a photo log.

Instruction: Lectures and group-paced practical exercises in the operation and maintenance of a basic 35 mm SLR camera; limited darkroom and laboratory techniques.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in basic photography ((12/87).

NV-1709-0039

Intelligence Specialist Class A
Imagery Interpretation

Course Number: J-242-0993.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA.

Length: 15 weeks (592 hours).

Exhibit Dates: 10/86–Present.

Learning Outcomes: Upon completion of the course the student will be able to perform arithmetic and photogrammetric calculations with mechanical and electronic calculators; identify, measure, classify, and determine junction of various physical and cultural ground features through black and white, color, infrared, and radar imagery; initiate research and write reports; prepare photo mosaics; and plan work assignments.

Instruction: Through lectures, laboratory assignments and practical exercises students receive intensive instruction on all skills related to the interpretation of all-source imagery.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in technical mathematics and 3 in technical writing (12/87); in the upper-division baccalaureate category, 3 semester hours in photogrammetry and 3 in aerial photo interpretation (12/87).

NV-1709-0040

Automated Tactical Reconnaissance Systems (TACRECCE) Support Afloat

Course Number: J-150-0987.

Location: Navy and Marine Corps Intelligence Training Center, Dam Neck, VA.

Length: 4 weeks (150 hours).

Exhibit Dates: 3/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate an image interpretation system, a photogrammetic positioning system, and perform tactical reconnaissance procedures.

Instruction: Teaches the skills necessary to operate an image interpretation system, a photogrammetric positioning system, and to perform tactical reconnaissance procedures.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in photogrammetry (12/87).

NV-1710-0001

1. Boiler Technician, Class A1 (600 PSI)
2. Boilermen, Class A

Course Number: A-651-0010.

Location: Service School Command, Great Lakes, IL.

Length: *Version 1:* Self-paced 7–8 weeks (364 hours). *Version 2:* 10–15 weeks (310–456 hours).

Exhibit Dates: *Version 1:* 1/74–1/88. *Version 2:* 5/63–12/73.

Objectives: To train enlisted personnel to operate, maintain, and repair marine boilers, pumps, and associated machinery.

Instruction: *All Versions:* Lectures and practical exercises in boiler maintenance and repair; distilling plant operation; fuel oil and auxiliary equipment operation; fireroom operations; maintenance, and materiel management. Instruction includes basic mathematics, tools and materials, valves, and basic steam plant principles. *Version 1:* Instruction is self-paced.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours as a technical elective in automotive and mechanical programs and 5 in systems maintenance or a related program (9/77). *Version 2:* Credit is not recommended because of the military specific nature of the course (4/74).

NV-1710-0002

Boilerman Enlisted Maintenance

Course Number: A-651-017.

Location: Destroyer School, Newport, RI.

Length: 4 weeks (120 hours).

Exhibit Dates: 12/69–1/88.

Objectives: To train enlisted personnel to operate, inspect, and repair boilers.

Instruction: Lectures and practical exercises in the operation, inspection, and repair of boilers, including cleaning and overhaul procedures, steam cycle and theory, safety valves, fuel oil service pump, forced-draft blowers, burners and air registers, regulators and indicators, pumps and blowers, calibration, patching, and packing and gaskets.

Credit Recommendation: Insufficient data for evaluation (4/74).

NV-1710-0003

Pressure Fired Boiler Operator, Class C
(Pressure Fired Steam Generator Console Operator)

Course Number: A-651-0014.

Location: Propulsion Engineering School, Great Lakes, IL; Boilerman School, Philadelphia, PA.

Length: Self-paced 4–6 weeks (160–180 hours).

Exhibit Dates: 11/72–Present.

Objectives: To augment the training of boiler operators to operate super charged boilers.

Instruction: Lectures and practical exercises in the operation, maintenance, and repair of pressure-fired boilers, including boiler design and components, supercharger and feed system, automatic combustion and feed controls, component calibration, boiler steaming and operation, and local control of boilers.

Credit Recommendation: In the vocational certificate category, 3 semester hours in boiler operation and repair on the basis of institutional evaluation (1/82).

NV-1710-0005

Catapult, Arresting Gear, and Visual Landing Aids CVA (C-7/11 Catapults), Class C
(Catapult, Arresting Gear, and Visual Landing Aids (C-7/C-11 Catapults and Mk 7 Arresting Gear), Class C)

Course Number: Not available.

Location: *Version 1:* Air Technical Training Center, Lakehurst, NJ. *Version 2:* Air Technical Training Unit, Philadelphia, PA.

Length: 9 weeks (352-360 hours).

Exhibit Dates: 1/66–1/88.

Objectives: To train personnel in the operation, inspection, and maintenance of C-7 and C-11 catapults and related equipment, Mk-7 arresting gear and barricades; visual landing aids (Fresnel Lens OLS Mk VI and Manual Meatball); and shore-based arresting gear.

Instruction: Lectures and practical exercises in operation, inspection, and maintenance of C-7 and C-11 catapults and related equipment; basic information relating to catapults, arresting gear and visual landing aids; steam catapults; steam system, C7/11 Mod 1; launching engine; retraction and tensioning engine; bridle tension system; control system; bridle arrestor engine and associated equipment; miscellaneous information and safety precautions; shore-based arresting gear; and Mk-7 arresting gear, Fresnel Lens Mk VI and Manual Meatball.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours as a general elective in mechanical programs (7/74).

NV-1710-0006

Catapult, Arresting Gear and Visual Landing Aids CVA (C-13 Catapults), Class C
(Catapult, Arresting Gear and Visual Landing Aids (C-13 Catapult and Mk-7 Arresting Gear), Class C)

Course Number: Not available.

Location: Air Technical Training Center, Lakehurst, NJ; Air Technical Training Unit, Philadelphia, PA.

Length: 9 weeks (352–360 hours).

Exhibit Dates: 1/66–1/88.

Objectives: To train enlisted personnel to operate, inspect, and maintain C-13 catapults and related equipment, Mk-7 arresting gear and barricades, visual landing aids, and shore-based arresting gear.

Instruction: Lectures and practical exercises in the operation, inspection, and maintenance of C-13 catapults and related equipment, Mk-7 arresting gear and barricade, visual landing aids, and shore-based arresting gear, including fundamentals of catapult operation and design, launching and recovery procedures and description, nomenclature, and component operation of steam catapults.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1710-0007

CVS Catapult, Arresting Gear, and Visual Landing Aids, Class C

Course Number: Not available.

Location: Air Technical Training Unit, Philadelphia, PA.

Length: 5 weeks (192 hours).

Exhibit Dates: 10/65–12/68.

Objectives: To train enlisted personnel to operate, inspect, and maintain H-8 catapults and related equipment, Mk 5 arresting gear and barricades, Mk 1 Mod 1 and Mk 6 Mod 1 visual landing aids, and shore-based arresting gear.

Instruction: Lectures and practical exercises in the operation, inspection, and maintenance of H-8 catapults and related equipment, Mk 5 arresting gear and barricades, Mk 1 Mod 1 and Mk 6 Mod 1 visual landing aids, and shore-based arresting gear, including principles and design of catapults, component operations, launching and recovery systems, control panel operation, and description and nomenclature of hydropneumatic and steam catapults.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1710-0008

CVA Catapult Steam and Drain System, Class C

Course Number: Not available.

Location: Air Technical Training Center, Lakehurst, NJ.

Length: 3 weeks (112 hours).

Exhibit Dates: 8/68–1/88.

Objectives: To train enlisted personnel to operate, inspect, and maintain the CVA catapult's steam and drain systems and related components.

Instruction: Lectures and practical exercises in the operation, inspection, and maintenance of CVA catapult's steam and drain systems and related components, including fundamentals of steam catapults, types of steam catapults, system components, and operational procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1710-0009

Catapult and Arresting Gear, Class C

Course Number: Not available.

Location: Air Technical Training Unit, Philadelphia, PA.

Length: 11 weeks (440 hours).

Exhibit Dates: 9/56–12/68.

Objectives: To train enlisted personnel to operate, maintain, and repair H-4, H-8, and C-11 catapults and related equipment, and the Mk 5 and Mk 7 arresting gear, barriers, and barricades.

Instruction: Lectures and practical exercises in the operation, maintenance, and repair of H-4, H-5, and C-11 catapults and related equipment, and Mk 5 and Mk 7 arresting gear, barriers, and barricades, including history and design of catapults, and description, nomenclature, operation, and preventive maintenance of hydropneumatic and steam catapults.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1710-0010

CVA Catapult Electrician, Class C

Course Number: C-680-2013.

Location: Air Technical Training Center, Lakehurst, NJ.

Length: 2 weeks (80 hours).

Exhibit Dates: 4/71–1/88.

Objectives: To train enlisted personnel who have backgrounds in electronics to operate and maintain CVA catapult electrical systems and related components.

Instruction: Lectures and practical exercises in the operation and maintenance of CVA catapult electrical systems and related components, including engine systems, retract and tension system, and control system; launching and retraction of steam catapults; circuits and electrical components in catapult control (motor, relays, synchros, indicators, sequence of operation); valve control; and catapult maintenance.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1710-0011

Aircraft Launch and Recovery Equipment, Class C1, C7/C11 Track

Course Number: C-604-2010.

Location: Naval Air Technical Training Center, Lakehurst, NJ.

Length: 8 weeks (314 hours).

Exhibit Dates: 11/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate, inspect, and maintain C-7/11 catapults and related equipment, and serve as a work center supervisor.

Instruction: Lectures and practical exercises in the basic fundamentals, description, operation, function, and location of the C7/C11 catapults; Mk-7 Mod 3 arresting gear barricade components and systems including the steam system, mechanical system, hydraulic system, and control system; instruction includes familiarization, operation, replacement, servicing, repair, and inspection.

Credit Recommendation: In the vocational certificate category, 3 semester hours in fluid power principles (6/87); in the lower-division baccalaureate/associate degree category, 3 semester hours in fluid power maintenance and troubleshooting, and 1 in industrial safety (6/87).

NV-1710-0012

Engineering Watch Officer

Course Number: G-4H-6191; G-651-6191.

Location: Amphibious Base, Little Creek, VA.

Length: 2 weeks (60 hours).

Exhibit Dates: 10/72–1/88.

Objectives: To train officers to be engineering watch officers on amphibious ships.

Instruction: Lectures on the operation of steam and diesel boilers, AC-DC generator systems, switchboard controls, electrical safety precautions, electromechanical systems operation, auxiliary equipment operation, and engineering administration.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1710-0013

Prospective Engineering Officer Orientation

Course Number: A-4H-0024.

Location: Development and Training Center, San Diego, CA.

Length: 4 weeks (140 hours).

Exhibit Dates: 1/70–1/88.

Objectives: To train officers to operate and maintain steam-powered ship engine room equipment.

Instruction: Lectures and practical exercises in boilers and associated equipment operation and maintenance, including steam systems, turbines, electrical systems, evaporators, refrigeration, water pumps and valves, boiler controls, feed pump controls, recirculation systems, hydraulics, governors, and casualty control operations.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (4/74).

NV-1710-0014

Marine Corps Short Airfield For Tactical Support, Class C

Course Number: Not available.

Location: Air Technical Training Center, Lakehurst, NJ.

Length: 5 weeks (200 hours).

Exhibit Dates: 9/65–1/88.

Objectives: To train enlisted personnel to install, inspect, operate, and maintain SATS launching and recovery equipment.

Instruction: Lectures and practical exercises in installation, inspection, operation, and maintenance of support equipment, including runway matting, generators, air compressors, cranes, fork lifts, anchors, and special tools, recovery equipment, including arresting gear and SATS barricades; launch equipment, including catapult systems, and control systems; and operational procedures and field operations.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (4/74).

NV-1710-0015

Standard Tensioned Replenishment Alongside Methods (STREAM) Operator

(Standard Tensioned Replenishment Alongside Methods (STREAM) Rigging and Passing)

(UNREP Rigging Procedures)

Course Number: A-060-0025; A-551-0025.

Location: Naval Schools Command, Treasure Island, CA.

Length: 2–3 weeks (70–105 hours).

Exhibit Dates: 1/70–4/82.

Objectives: To train enlisted personnel to operate a raw-tensioned, high-level sending system.

Instruction: Lectures and practical exercises in raw-tensioned, high-line system operation, including standard methods of replenishment at sea, preventive maintenance of station components, safety precautions, and emergency breakaway procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in rigging (11/81).

NV-1710-0016

Underway Replenishment Mechanical and Hydraulic Component Maintenance
(UNREP Hydraulic and Mechanical Component Maintenance (Sending Units))

Course Number: A-690-0028; A-551-0027.

Location: Naval Schools Command, Treasure Island, CA.

Length: *Version 1:* 5 weeks (197 hours). *Version 2:* 10 weeks (300 hours).

Exhibit Dates: *Version 1:* 8/80-5/84. *Version 2:* 1/70-7/80.

Objectives: To train enlisted personnel to maintain the shipboard UNREP system's hydraulic and mechanical components.

Instruction: Lectures and practical exercises in basic electricity; basic hydraulics; winches; circuit analysis; sealing materials and gauges; circulatory systems, actuators, pumps, valves, and controls; hydraulic power unit, transfer head ram tensioner, multidirectional fork trunk, and sealed transmissions operation; cargo and personnel transfer equipment operation.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in mechanical or industrial technology (11/81). *Version 2:* In the vocational certificate category, 3 semester hours as an elective in industrial or mechanical technology (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in industrial or mechanical technology (4/74).

NV-1710-0017

Equipment Operators, Class A
(EO "A")

Course Number: *All Versions:* A-730-0010. *Version 2:* A-730-0012.

Location: Construction Training Center, Port Hueneme, CA; Construction Training Center, Gulfport, MS. *Version 2:* Construction School, Davisville, RI.

Length: *Version 1:* 9 weeks (261 hours). *Version 2:* 12 weeks (360 hours).

Exhibit Dates: *Version 1:* 11/74-1/88. *Version 2:* 11/67-10/74.

Objectives: To train enlisted personnel to operate, adjust, and service heavy construction equipment.

Instruction: Lectures and practical exercises in automotive vehicle, front-end loader, forklift, grader, and crawler tractor operation, adjustment, and servicing, including internal-combustion engine basic principles; fuels and lubricants; earthwork fundamentals; equipment production; hauling, loading, and lifting equipment adjustment, operation, and servicing; and soil compactors, crawler tractors, and tractor-drawn scrapers operation.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in heavy construction equipment (7/76); in the lower-division baccalaureate/associate degree category, 2 semester hours in construction/civil technology (7/76). *Version 2:* In the lower-division baccalaureate/associate degree category, 6 semester hours in heavy construction program, 3 in civil technology program (4/74).

NV-1710-0018

1. Equipment Operator, Class J (EO "J")
2. Equipment Operator, Class B (EO "B")

Course Number: A-730-0011.

Location: Construction Training Center, Port Hueneme, CA; Construction Training Center, Gulfport, MS.

Length: *Version 1:* 16 weeks (489 hours). *Version 2:* 16-18 weeks (480-540 hours).

Exhibit Dates: *Version 1:* 9/75-1/88. *Version 2:* 11/59-8/75.

Objectives: To train equipment operators to supervise personnel in construction, earth moving, road building, rock crushing, and asphalt mixing and paving operations.

Instruction: *Version 1:* Instruction includes soil identification; earthwork computations; operation of rock crushers; asphalt plants and pavers; operation and maintenance of cranes, crawlers, wheel tractors, and scrapers; and roadway foundations. *Version 2:* Lectures and practical exercises in instructional techniques, job planning, dispatching, records and reports; and earth moving, road building, rock crushing, and asphalt mixing and paving equipment nomenclature, lubrication, preventive maintenance, safety procedures, adjustments, and repairs; and graders, crawlers, tractors, scrapers, and cranes.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 5 semester hours in highway construction or civil technology (7/76). *Version 2:* In the lower-division baccalaureate/associate degree category, 6 semester hours in heavy construction and heavy equipment (4/74).

NV-1710-0019

Marine Expeditionary Airfield Equipment

Course Number: C-604-2015.

Location: Naval Air Technical Training Center, Lakehurst, NJ.

Length: 6 weeks (216 hours).

Exhibit Dates: 11/86-Present.

Learning Outcomes: Upon completion of the course, the student will be able to install, operate, maintain, inspect and test the M-21 arresting gear, Mk-8 Frensel Lens Optical Landing System, AM-2 matting and accessories, airfield lighting, anchoring systems, shore-based emergency arresting gear and perform cardiopulminary resuscitation as a member of a team.

Instruction: Lectures and practical exercises in movement and use of required equipment for the construction, installation, maintenance, and operation of a marine expeditionary airfield, including but not limited to portable matting, vertical/short take-off and landing, Frensel Lens Optical Landing System, M-21 arresting gear and E-28 emergency aircraft shore-based arresting gear, and the E-51 emergency arresting gear. Instruction in use and handling of explosives, as well as completion of records and maintenance reports.

Credit Recommendation: In the vocational certificate category, 1 semester hour in small engine maintenance (6/87); in the lower-division baccalaureate/associate degree category, 1 semester hour in power-plant operational theory, and 2 in safety and first aid (6/87).

NV-1710-0020

1. CV/CVN (Class) Air Compressor
2. CV Class Ship Air Compressor Maintenance, Class F

Course Number: A-652-0239.

Location: *Version 1:* Fleet Training Center Cryogenics School, Portsmouth, VA. *Version 2:* Fleet Training Center, Norfolk, VA; Fleet Training Center, San Diego, CA.

Length: *Version 1:* 2 weeks (79 hours). *Version 2:* 2-3 weeks (80 hours).

Exhibit Dates: *Version 1:* 4/84-Present. *Version 2:* 3/83-3/84.

Learning Outcomes: *Version 1:* Upon completion of the course the student will be able to operate and maintain high and low pressure centrifugal air compressors. *Version 2:* Upon completion of the course, the student will be able to perform organizational level maintenance on the low pressure and high pressure air compressors.

Instruction: *Version 1:* Classroom and practical instruction on air compressors including operation and maintenance. *Version 2:* Instruction includes group-paced instruction including both lecture and laboratory activities on air compressor theory, operation, maintenance, and repair.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour lecture and 1 in laboratory in mechanical compression systems (3/89). *Version 2:* In the vocational certificate category, 1 semester hour in air compressor theory and 3 in air compressor maintenance and repair (7/87).

NV-1710-0021

1200 PSI Boiler Technician (BT) Orientation/Operation

Course Number: A-651-0037.

Location: Boilerman School, San Diego, CA.

Length: 3-4 weeks (106-140 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train enlisted personnel to operate shipboard boilers and associated equipment.

Instruction: Lectures and practical exercises in shipboard boiler construction and operation, fireroom procedures, damage control, lighting off and securing main boilers, and underway watch standing and casualty control.

Credit Recommendation: In the vocational certificate category, 1 semester hour as an elective in building maintenance (4/74).

NV-1710-0022

Boiler Repair Technician

Course Number: K-651-0109.

Location: Fleet Training Center, San Diego, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 3/85-Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform operational tasks, preventive maintenance, and repair on the propulsion boiler.

Instruction: Instruction includes lecture and laboratory instruction on the propulsion boiler system including theory of operation, inspection, maintenance and repair.

Credit Recommendation: In the vocational certificate category, 2 semester hours in boiler operational theory and 3 in boiler maintenance and repair (7/87).

NV-1710-0023

1. LST 1179/1182 Class Controllable Pitch Propeller and Propulsion Control System, Class C1
2. Enginemen, Class C, LST 1179 Class Controllable Pitch Propeller and Propulsion Control System

Course Number: A-652-0055.

Location: Propulsion Engineering School, Great Lakes, IL.

Length: *Version 1:* 4 weeks (150 hours). *Version 2:* 3 weeks (102 hours).

Exhibit Dates: *Version 1:* 6/77-6/83. *Version 2:* 5/73-5/77.

Objectives: To train enlisted personnel who have taken a basic engineman course to operate, maintain, and troubleshoot variable-pitch ship propellers and associated control equipment.

Instruction: For this course after 6/83 see NV-1710-0106. Lectures and practical exercises in the operation, maintenance, and troubleshooting of variable-pitch ship propellers and associated control equipment, including introduction to hydraulics and pneumatics, analysis of various circuits, component assembly, and operation of specific variable-pitch propellers and associated controls.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours as an elective in automotive/mechanical technology (9/77). *Version 2:* In the vocational certificate category, 2 semester hours as an elective in mechanical technology (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour as an elective in mechanical technology (4/74).

NV-1710-0024

Steam Components (Enlisted)

Course Number: F-000-035.

Location: Naval Submarine School, Groton, CT.

Length: 2 weeks (60 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train enlisted personnel to operate and maintain steam components.

Instruction: Lectures and practical exercises in the operation and maintenance of steam components, including instruction on steam reducing valves, steam traps, flexatallic gaskets, manual valves, hotwell level control systems, steam generator relief and pilot automatic drain valves, hydrostatic testing, feed water control valves, steam generator cutout valve, condenser repair, steam root valve manifold, and steam generator sight glasses.

Credit Recommendation: In the vocational certificate category, 1 semester hour as an elective in building maintenance (4/74).

NV-1710-0025

Submarine Low Pressure and Vapor Compression Distilling Units, Enlisted

Course Number: F-652-026.

Location: Submarine School, Groton, CT.

Length: 2 weeks (60 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train enlisted personnel to operate, maintain, and repair low-pressure and vapor compression distilling units.

Instruction: Lectures and practical exercises in the operation, maintenance, and repair of low-pressure and vapor pressure distilling units, including operation and troubleshooting of low-pressure distilling steam systems, valves and meters, pumps, traps, condensers, gages, and compressors, and similar components of the vapor pressure distilling system.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1710-0026

Ordnance Handling Equipment Intermediate Maintenance

Course Number: C-646-3119.

Location: Air Maintenance Training Detachment, Jacksonville, FL; Air Maintenance Training Detachment, Norfolk, VA; Air Maintenance Training Detachment, Alameda, CA; Air Maintenance Training Detachment, North Island, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 8/71-1/88.

Objectives: To train enlisted personnel to maintain ordnance-handling equipment at the intermediate level.

Instruction: Lectures and practical exercises in the maintenance of ordnance-handling equipment, including operation, servicing, and inspection of specific skids, bomb hoists, and bomb trucks.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (4/74).

NV-1710-0027

Utilitiesman, Shore Based Boiler Controls, Class C

Course Number: A-720-0022.

Location: Construction Training Center, Gulfport, MS; Construction Training Center, Port Hueneme, CA.

Length: 7 weeks (222 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To provide the enlisted technician with advanced technical skills and knowledge in electrical and pneumatic controller systems components, safety switches, and testing meters to troubleshoot, repair, operate, and maintain steam heating boilers.

Instruction: Lectures and practical exercises in boiler equipment fittings and controls, basic electricity, electrical circuits, automatic and pneumatic controls.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in basic electricity, 2 in electrical circuitry, and 1 in boiler controls (7/76).

NV-1710-0029

Catapult, Arresting Gear and Visual Landing Aids (CVS) (H-8 Catapults and Mk-5 Arresting Gear)

Course Number: Not available.

Location: Air Technical Training Center, Lakehurst, NJ.

Length: 4 weeks (176 hours).

Exhibit Dates: 11/68-1/88.

Objectives: To train enlisted personnel to operate, inspect, and maintain H-8 catapults and related equipment, Mk-5 arresting gear and barricades, and specific visual landing aids and shore-based arresting gear.

Instruction: Lectures and practical exercises in the operation, inspection, and maintenance of H-8 catapults and related equipment, Mk-5 arresting gear and barricades, and specific visual landing aids and shore-based arresting gear, including catapult principles and design, nomenclature, hydraulic principles, and assembly, components, and analysis of specific equipment and systems.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1710-0030

Launcher Technician (Tender)

Course Number: A-733-0017.

Location: Guided Missiles School, Dam Neck, VA.

Length: 2 weeks (72 hours).

Exhibit Dates: 1/70-1/88.

Objectives: To train launcher technicians in the operation and maintenance of fleet ballistic missile submarine tenders, and missile-handling equipment.

Instruction: Lectures and practical exercises on the operation and maintenance of the missile-handling equipment found on fleet ballistic missile submarine tenders, including basic theory of handling equipment Mks 4 and 5, description of the mechanical and electrical characteristics of handling equipment components, preventive and corrective maintenance procedures, advanced theory of handling equipment Mks 4 and 5, logic elements used for control and sequencing of events for the Westinghouse moist units (Mks 1 and 2), and their functional operation.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-1710-0031

600 PSI Boiler Technician (BT) Maintenance

Course Number: A-651-0023.

Location: Development and Training Center, San Diego, CA.

Length: 3 weeks (105 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train personnel to perform as boiler technicians.

Instruction: Lectures and practical exercises in the repair and maintenance of 600-PSI boilers and associated auxiliary machinery and equipment, including precision measurement instruments, boiler tube work, boiler refractory, boiler safety valves, single-element feed regulators, forced-draft blowers, fuel oil service pump turbine, Leslie C/P governor, fuel oil service pump, reciprocating pumps, and hydrostatic tests.

Credit Recommendation: In the vocational certificate category, 2 semester hours in building engineering or building maintenance (5/74).

NV-1710-0032

1200 PSI BT Maintenance (Boilerman)

Course Number: A-651-0031.

Location: Boilerman School, San Diego, CA.

Length: 8 weeks (280 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train rated boiler technicians to maintain the 1200 PSI boilers and associated auxiliary machinery.

Instruction: Lectures and detailed practical instruction in the operational principles, construction, maintenance, and repair of the 1200 PSI steam generator and supporting auxiliary fireroom machinery, including boiler casings, boiler refractories, blueprints, precision measuring instruments, fire pump, boiler safety valves, distillate conversion, fuel oil service pump, Worthington main feed pump, forced-draft blower (carrier), governors and reducing valves, and forced-draft blower (Hardie-Tynes).

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 5 semester hours in industrial technology, or 5 in building maintenance or building engineer (5/74).

NV-1710-0033

Boilerman, Class B

Course Number: A-651-0011; A-651-011.
Location: Boilerman School, Philadelphia, PA.
Length: 15–22 weeks (450–660 hours).
Exhibit Dates: 1/54–1/88.
Objectives: To train personnel to perform as boiler technicians.
Instruction: Lectures and practical exercises in the operation and maintenance of marine boilers and associated equipment, including operation and maintenance of the 1200-psi steam generating plant; operation and maintenance of the automatic combustion control boards; operation, adjustment, maintenance, and minor repair of hydraulic, pneumatic, and electrical equipment used with automatic combustion control boards; transfer, test, and inventory of fuels and water; and maintenance and repair of boilers, pumps, and associated machinery.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 10 semester hours in building engineering, building maintenance, or industrial technology (5/74).

NV-1710-0034

Builder/Heavy Construction
Technician, Class C
(BU "C" Heavy Construction)

Course Number: A-710-0018.
Location: Construction Training Center, Port Hueneme, CA; Construction Training Center, Gulfport, MS. *Version 2:* Construction School, Davisville, RI.
Length: *Version 1:* 5 weeks (153 hours). *Version 2:* 7 weeks (208 hours).
Exhibit Dates: *Version 1:* 2/75–1/88. *Version 2:* 11/72–1/75.
Objectives: To train enlisted personnel in heavy construction.
Instruction: *Version 1:* Lectures and practical exercises in heavy construction, including tools, piles, and pile-driving methods; waterfront structures; trestle construction; railroad-track maintenance and repair; wood towers; and planning and estimating. *Version 2:* Topics also cover lumbering and sawmill operation.
Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in heavy construction (7/76). *Version 2:* In the vocational certificate category, 5 semester hours in heavy construction (5/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in heavy construction (5/74); in the upper-division baccalaureate category, 2 semester hours in heavy construction (5/74).

NV-1710-0035

Construction Mechanic, Class A1
(CM"A")

Course Number: A-610-0022.
Location: Construction Training Center, Port Hueneme, CA; Construction Training Center, Gulfport, MS.
Length: 13–14 weeks (391–421 hours).
Exhibit Dates: 8/63–1/88.
Objectives: To train enlisted personnel to operate and maintain internal-combustion engines in construction equipment.
Instruction: Lectures and practical exercises in construction equipment internal-combustion engines operation and maintenance, including internal-combustion engine principles, electrical systems, automotive power trains, malfunction diagnosis and adjustment, and safety procedures.
Credit Recommendation: In the vocational certificate category, 9 semester hours in construction equipment motor operation and maintenance (7/76); in the lower-division baccalaureate/associate degree category, 6 semester hours in construction equipment motor operation and maintenance (7/76).

NV-1710-0036

Utilitiesman, Class J (UT"J")
(Utilitiesman, Class B)

Course Number: A-720-0013.
Location: Construction Training Center, Port Hueneme, CA; Construction Training Center, Gulfport, MS.
Length: 14–15 weeks (420–450 hours).
Exhibit Dates: 11/60–1/88.
Objectives: To train enlisted personnel to repair and maintain utility systems.
Instruction: Lectures and practical exercises in utility systems maintenance and repair, including plumbing, sewage disposal, blueprint reading, boilers, refrigeration, pumps, compressors, air conditioning, water supply, and water treatment.
Credit Recommendation: In the vocational certificate category, 9 semester hours in utilities maintenance and repair (7/76); in the lower-division baccalaureate/associate degree category, 4 semester hours in utilities maintenance and repair (7/76); in the upper-division baccalaureate category, 2 semester hours in utilities maintenance and repair (7/76).

NV-1710-0037

Equipment Operators Gradework,
Class C
(EO "C" Gradework)

Course Number: A-710-0019.
Location: Construction Training Center, Port Hueneme, CA; Construction Training Center, Gulfport, MS.
Length: 6 weeks (180 hours).
Exhibit Dates: 10/71–1/88.
Objectives: To train noncommissioned officers to supervise earthwork operations according to specifications, mass diagrams, and construction schedules, and to prepare estimates.
Instruction: Lectures and practical exercises in earth supervision, including gradework principles, surveys, maps, mass-diagram preparation, drainage, soil compaction and stabilization, estimating, planning, equipment operation, and field projects.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in civil technology (7/76); in the upper-division baccalaureate category, 2 semester hours in civil or construction engineering (7/76).

NV-1710-0038

Builder/Masonry, Class C
(BU "C" Masonry)

Course Number: A-710-0017.
Location: Construction Training Center, Port Hueneme, CA; Construction Training Center, Gulfport, MS.
Length: 5 weeks (154 hours).
Exhibit Dates: 1/72–1/88.
Objectives: To train noncommissioned officers in masonry techniques and in supervision and training of masonry crews.
Instruction: Lectures and practical exercises in masonry and masonry crew training and supervision, including properties and preparation of mortars, brick and block laying and properties, stone and tiles setting, plastering, design and sketch preparation, planning, and manpower and materials estimating.
Credit Recommendation: In the vocational certificate category, 3 semester hours in masonry construction (7/76).

NV-1710-0039

Shipboard Thermal Insulation
(Lagging)

Course Number: F-000-0076; F-000-076.
Location: Fleet Ballistic Missile Submarine Training Center, Charleston, SC.
Length: 2–3 weeks (76–90 hours).
Exhibit Dates: 9/71–1/88.
Objectives: To train personnel to remove, repair and install shipboard insulation and lagging.
Instruction: Lectures and practical exercises in shipboard insulation and lagging installation, including heat insulation materials; types of insulation and lagging materials used in nuclear and non-nuclear systems; and installation of insulation on piping components, ducts, and hulls.
Credit Recommendation: In the vocational certificate category, 2 semester hours in thermal insulation (5/74).

NV-1710-0040

Builder/Concrete, Class C
(BU "C" Concrete)

Course Number: A-730-0020.
Location: Construction Training Center, Port Hueneme, CA; Construction Training Center, Gulfport, MS.
Length: 7 weeks (216 hours).
Exhibit Dates: 10/71–1/88.
Objectives: To train noncommissioned officers to use, mix, and handle concrete.
Instruction: Lectures and practical exercises in concrete use, mixing, and handling, including applied mathematics; plans and specifications; concrete ingredients; design and control of concrete mix; precast concrete; reinforcement, joints and batch plants; placing, finishing and curing concrete; decorative concrete; road and airfield paving; concrete-block and pipe plants; gunite and estimating.
Credit Recommendation: In the vocational certificate category, 5 semester hours in concrete mixing, placing, and use (7/76); in the lower-division baccalaureate/associate degree category, 4 semester hours in concrete mixing, placing, and use (7/76).

NV-1710-0041

Shipfitters, Class A (Pipefitters)

Course Number: Not available.
Location: Training Center, San Diego, CA.
Length: 12 weeks (360 hours).
Exhibit Dates: 5/63–12/68.
Objectives: To train enlisted personnel to be pipefitters.
Instruction: Lectures and practical exercises in pipefitting, including shipfitter responsibilities, mathematics, blueprint reading, shipfitters working drawings and symbols, tools and materials, metallurgy, welding, brazing and soldering, coppersmithing, and pipefitting.

Credit Recommendation: In the vocational certificate category, 8 semester hours in pipefitting (5/74).

NV-1710-0042

Builder, Class J (BU "J")
(Builder, Class B)

Course Number: A-710-0011; A-710-0014.
Location: Construction Training Center, Port Hueneme, CA; Construction Training Center, Gulfport, MS; Construction School, Davisville, RI.
Length: 16–17 weeks (480–511 hours).
Exhibit Dates: 10/70–1/88.
Objectives: To train petty officers to supervise builders.
Instruction: Lectures and practical exercises in builder supervision, including mathematics, shop machinery, foremanship, light frame construction, concrete, masonry, plastering, ceramic tile, advance-base and waterfront structures, and project planning.
Credit Recommendation: In the vocational certificate category, 30 semester hours in general contracting (7/76); in the lower-division baccalaureate/associate degree category, 5 semester hours in general contracting (7/76).

NV-1710-0043

Equipment Operators/Crushing and Screening Plant Operations, Class C
(EO "C" Crushing and Screening Operations)

Course Number: A-730-0018.
Location: Construction Training Center, Port Hueneme, CA.
Length: 2 weeks (63 hours).
Exhibit Dates: 1/72–1/88.
Objectives: To train enlisted personnel to operate, adjust, and service portable rock-crushing and -screening equipment.
Instruction: Lectures and practical exercises in rock-crushing and rock-screening equipment operation, adjustment, and servicing, including site selection procedures; assembling and operating the plant; and lubrication, maintenance, and adjustments necessary for production of different sizes of aggregates as required for construction projects.
Credit Recommendation: In the vocational certificate category, 1 semester hour in construction, rock crushing and screening operator (5/74).

NV-1710-0044

Basic Welding, Class C
(Plate Welders, Class C)

Course Number: A-701-0025.
Location: Service School Command, San Diego, CA. *Version 1:* Naval Shipyard, Norfolk, VA.
Length: *Version 1:* 6 weeks (240 hours). *Version 2:* 10 weeks (300 hours).
Exhibit Dates: *Version 1:* 3/82–Present. *Version 2:* 7/70–2/82.
Objectives: To train enlisted personnel to weld various structures and hulls.
Instruction: Lectures and practical exercises in welding, including manual metal arc welds on steel alloy plate, metal inert-gas welds on aluminum plate, both types of welds on ferrous and nonferrous metal plate, gas tungsten-arc welding, and use of a variety of electrodes in both overhead and vertical positions.
Credit Recommendation: In the vocational certificate category, 3 semester hours in welding (5/82); in the lower-division baccalaureate/associate degree category, 2 semester hours in welding (5/82).

NV-1710-0045

Stainless Steel Welding Requalification—Phase I (Enlisted)

Course Number: F-701-015.
Location: Submarine School, Groton, CT.
Length: 3 weeks (90 hours).
Exhibit Dates: 7/67–12/68.
Objectives: To train stainless steel welders to make limited emergency welds on reactor plant systems.
Instruction: Lectures and practical exercises in welding of reactor plant systems, including fillet welds on paddle wheel, carbon steel and specialty pipe welding in horizontal and vertical positions, and identification of welding defects using liquid dye penetrant methods of inspection.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-1710-0046

Nuclear Propulsion Plant Operators Welding
(Welding for Nuclear Power Plant Operators, Course V)

Course Number: F-701-010; A-701-014; A-701-015; A-701-0015.
Location: Submarine School, San Diego, CA; Welding School, Class C, San Diego, CA; Naval Submarine School, Groton, New London, CT.
Length: 12–16 weeks (420 hours).
Exhibit Dates: 1/63–3/80.
Objectives: To provide enlisted personnel with training in arc and oxyacetylene welding.
Instruction: For this course after 3/80 see NV-1710-0114. Lectures and practical exercises in welding for use by nuclear power plant operators. Topics include principles of manually shielded metal and arc welding; arc welding of the root pass in welding grooves using "EB" inserts; shielded metal arc welding using W-1 and W-7A electrodes; materials and processes used in nuclear power plant welding; preparation and inspection of welded joints; seal welding joints; pipe welding in fixed position, restricted access in confined spaces; and oxyacetylene torch brazing and cutting.
Credit Recommendation: In the vocational certificate category, 6 semester hours in arc welding (6/81); in the lower-division baccalaureate/associate degree category, 3 semester hours in arc welding (6/81).

NV-1710-0047

Stainless Steel Welding (Requalification)
(Maintenance of Welding Qualifications)

Course Number: L-701-0014; L-701-014.
Location: Fleet Submarine Training Facility, Pearl Harbor, HI; Fleet Submarine Training Facility, Groton, CT.
Length: 3–4 weeks (84–160 hours).
Exhibit Dates: 12/69–1/88.
Objectives: To train enlisted personnel to perform as stainless steel welders.
Instruction: Lectures and practical exercises in stainless-steel welding. Course includes preparation and inspection of welded joints; manually shielded metal arc welding using the W-1 and W-7A coated electrodes; manual inert-gas tungsten-arc welding of the root pass in welding grooves using a consumable insert; and a qualifications test.
Credit Recommendation: In the vocational certificate category, 2 semester hours in welding (5/74).

NV-1710-0048

Stainless Steel Welding Requalification—Phase III (Enlisted)

Course Number: F-701-016.
Location: Submarine School, Groton, CT.
Length: 3 weeks (90 hours).
Exhibit Dates: 1/67–12/68.
Objectives: To requalify enlisted personnel who were once qualified as stainless steel welders to work in a limited capacity on welds in a reactor plant system.
Instruction: Lectures and practical exercises in stainless steel welding. Topics include fillet welds on paddle wheel and curved surfaces; welding using the manual arc process in horizontal, vertical, and restricted fixed positions; welding, inspecting, and grinding carbon steel rockets, sleeves, and tees; and identifying welding defects using liquid dye penetrant methods of inspection.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-1710-0049

Pressure Hull Welders

Course Number: A-701-0029.
Location: Service School Command, San Diego, CA.
Length: 2 weeks (60 hours).
Exhibit Dates: 11/70–1/88.
Objectives: To train enlisted personnel to perform manual metal arc welds on steel alloy or austenitic steel plate.
Instruction: Lectures and practical exercises in the metal arc welding of steel alloy and austenitic steel hull plate in fixed-overhead and vertical positions, and the general properties and characteristics of hull plate.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-1710-0050

1. General Maintenance Welder, Class C1
2. Pipe Welders

Course Number: A-701-0026.
Location: Service School Command, San Diego, CA; Naval Shipyard, Norfolk, VA.
Length: *Version 1:* 6 weeks (240 hours). *Version 2:* 4 weeks (120 hours).
Exhibit Dates: *Version 1:* 5/78–Present. *Version 2:* 7/70–4/78.
Objectives: To train enlisted personnel to perform manual welding on carbon steel or copper-nickle pipe.
Instruction: *Version 1:* Lectures and practical exercises in manual arc welds on carbon steel pipe in fixed-restricted vertical and horizontal positions and brazing of copper-nickel pipe. *Version 2:* Lectures and practical exercises in manual metal arc welds on carbon steel pipe in fixed-restricted vertical and horizontal positions and in manual metal arc welds on copper-nickel pipe using copper-nickel electrodes in fixed-restricted vertical and horizontal positions.
Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in welding (5/82); in the lower-division baccalaureate/associate degree category, 1 semester hour in welding (5/82). *Version 2:* In the vocational certificate category, 1 semester hour in pipe welding (5/74).

NV-1710-0051

1. Non-Nuclear Component Welding
2. High Pressure Pipe Welders

Course Number: A-701-0027.

Location: Service School Command, San Diego, CA; Naval Shipyard, Norfolk, VA.

Length: *Version 1:* 10 weeks (400 hours). *Version 2:* 4 weeks (120 hours).

Exhibit Dates: *Version 1:* 10/78–Present. *Version 2:* 8/70–9/78.

Objectives: To train enlisted personnel to perform manual metal arc welds on carbon-molybdenum high-pressure piping systems.

Instruction: Lectures and practical exercises in high-pressure pipe welding. Course includes manual metal arc welding of steel pipe with carbon-molybdenum electrodes; manual metal arc welding of steel pipe with chrome-molybdenum electrodes; and gas tungsten-arc welding of carbon steel pipe with root inserts.

Credit Recommendation: *Version 1:* In the vocational certificate category, 5 semester hours in pipe welding (5/82); in the lower-division baccalaureate/associate degree category, 2 semester hours in pipe welding (5/82). *Version 2:* In the lower-division baccalaureate/associate degree category, 1 semester hour in pipe welding (5/74).

NV-1710-0052

Fuel Gas Welders

Course Number: A-701-0024.

Location: Welding Class C School, San Diego, CA.

Length: 4 weeks (120 hours).

Exhibit Dates: 6/70–1/88.

Objectives: To train enlisted personnel to perform silver brazing of ferrous and nonferrous piping systems and structural braze welding and fuel-gas welding in ferrous and nonferrous metals.

Instruction: Lectures and practical exercises in specialty skills developed in fuel-gas welding of mild steel in the flat position; fuel gas welding and brazing with brass; hard-surfacing mild steel by the fuel-gas process; silver brazing by the fuel-gas process using bronze fittings and couplings with copper, copper-nickel, brass, and steel pipe in fixed-restricted horizontal and vertical positions.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in pipe welding (5/74).

NV-1710-0053

Steelworker/Welding Certification, Class C
(SW Welding Certification)

Course Number: A-701-0038.

Location: Construction Training Center, Port Hueneme, CA; Construction Training Center, Gulfport, MS.

Length: 4 weeks (120 hours).

Exhibit Dates: 11/62–1/88.

Objectives: To provide enlisted personnel with training in arc and gas welding.

Instruction: Lectures and practical exercises in welding procedures. Course includes welding safety policies and attitudes; flat and vertical welding positions; theories and techniques of welding fixed-position pipe; oxyacetylene welding theory and techniques in vertical and overhead positions; theory and techniques of inert gas-shielded metal arc welding in vertical and overhead positions with aluminum.

Credit Recommendation: In the vocational certificate category, 2 semester hours in welding (7/76); in the lower-division baccalaureate/associate degree category, 1 semester hour in welding (7/76).

NV-1710-0054

Intermediate Welding
(Welding Course I)

Course Number: Not available.

Location: Welding School, Class C, San Diego, CA.

Length: 12 weeks (360–390 hours).

Exhibit Dates: 11/63–12/68.

Objectives: To train enlisted personnel to weld and braze ship structures and piping.

Instruction: Lectures and practical exercises in welding. Course includes introduction to oxyacetylene welding; oxyacetylene welding of mild steel; brazing; hard surfacing; tungsten inert-gas arc welding (T.I.G.); shielded inert-gas metal-arc welding of aluminum (M.I.G.); introduction to shielded metal-arc welding; arc welding with mild steel electrode, with MIL-7018 low-hydrogen electrodes, and with MIL-310 15/16 chromium-nickel steel electrodes; and hand-surfacing mild steel by the metal-arc process.

Credit Recommendation: In the vocational certificate category, 6 semester hours in welding (5/74); in the lower-division baccalaureate/associate degree category, 5 semester hours in welding (5/74).

NV-1710-0055

Advanced Welding
(Welding Course II)

Course Number: Not available.

Location: Welding School, Class C, San Diego, CA.

Length: 8 weeks (240 hours).

Exhibit Dates: 11/63–12/68.

Objectives: To train enlisted personnel as welders.

Instruction: Lectures and practical exercises in advanced welding techniques. Course includes welding steel pipe with carbon-molybdenam electrodes; welding steel pipe with chrome-molybdenum electrodes; introduction to hull welding; welding high-tensile steel hull plate with low-hydrogen electrodes; welding heavy hull plate with low-hydrogen electrodes; air-arc gouging; welding austenite-chromium electrodes; welding copper-nickel alloy (70-30) with copper-nickel electrodes; and shielded inert-gas metal-arc welding of aluminum (M.I.G.).

Credit Recommendation: In the vocational certificate category, 2 semester hours in welding/metallurgy (5/74); in the upper-division baccalaureate category, 1 semester hour in welding/metallurgy (5/74).

NV-1710-0056

Automated Propulsion System Operator, Class C

Course Number: A-651-0036.

Location: Service School Command, San Diego, CA.

Length: 6 weeks (180 hours).

Exhibit Dates: 1/71–1/88.

Objectives: To train enlisted personnel in automated propulsion system controls and in engineering plant concepts, with particular emphasis on burner management, throttle control, and plant surveillance.

Instruction: Lectures and practical exercises in automated propulsion system controls and in engineering plant concepts. Course includes analog systems, pneumatic analog system functions, digital systems, Bailey 760 system, input and output control signals and devices, practical use of schematics and flow charts, central operations system design, engine room console, bridge console, and plant operations.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours as a technical elective in mechanical maintenance (7/74).

NV-1710-0057

1. Propulsion Shaft Components Combined Maintenance
2. Propulsion Shaft Components

Course Number: A-651-0061; F-000-040; L-661-020.

Location: *Version 1:* Submarine Training Center, Pacific, Pearl Harbor, HI; Fleet Ballistic Submarine Training Center, Charleston, SC. *Version 2:* Fleet Ballistic Missile Submarine Training Center, Charleston, SC; Fleet Submarine Training Facility, Pearl Harbor, HI; Naval Submarine School, Groton, CT.

Length: *Version 1:* 1 week (36 hours). *Version 2:* 2-3 weeks (60–105 hours).

Exhibit Dates: *Version 1:* 1/81–Present. *Version 2:* 11/66–12/80.

Objectives: To train enlisted personnel to maintain the propulsion shaft components found on nuclear-powered submarines.

Instruction: Lectures and practical exercises in the maintenance of propulsion shaft components. Course includes principles of operation, theory of construction, and practical training in the repair of propulsion shaft components.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in marine machinist (11/85). *Version 2:* In the lower-division baccalaureate/associate degree category, 1 semester hour as an elective in mechanical or industrial programs (7/74).

NV-1710-0058

Officer Damage Control

Course Number: Not available.

Location: Damage Control Training Center, Philadelphia, PA; Naval Schools Command, Treasure Island, CA.

Length: 4 weeks (120 hours).

Exhibit Dates: 5/65–12/68.

Objectives: To train enlisted personnel to perform as damage control assistants.

Instruction: Lectures and practical exercises in the duties and skills necessary to perform as a damage control assistant. Course includes hull design and construction, emergency communication systems, damage identification and control, and repair procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (7/74).

NV-1710-0059

Engineer Officer (Amphibious Ship)

Course Number: G-4H-6190.

Location: Amphibious School, Norfolk, VA.

Length: 4–6 weeks (160–240 hours).

Exhibit Dates: 1/70–1/88.

Objectives: To train officers as amphibious ship engineering officers.

Instruction: Lectures and practical exercises in the duties of amphibious ship engineering officers, including boiler maintenance, steam and diesel propulsion, ship engineering organization, auxiliary machinery, electrical power distribution and equipment, and basic electrical principles and applications to shipboard equipment.

Credit Recommendation: Credit is not recommended because of the technical nature of the course (7/74).

NV-1710-0060

MACHINIST'S MATE ENLISTED MAINTENANCE

Course Number: A-651-016.
Location: Destroyer School, Newport, RI.
Length: 4 weeks (120 hours).
Exhibit Dates: 12/69–1/88.
Objectives: To train enlisted personnel to perform as machinist's mates.
Instruction: Lectures and practical exercises in the duties and skills necessary to perform as machinist's mates. Course includes hand tools, precision tools, steam theory and cycle, main feed booster pump and system, main pump and system, and boiler construction and operation.
Credit Recommendation: Insufficient data for evaluation (7/74).

NV-1710-0061

MARINE AIRCRAFT LAUNCH AND RECOVERY EQUIPMENT, CLASS A

Course Number: C-680-2015.
Location: Air Technical Training Center, Lakehurst, NJ.
Length: 8 weeks (320 hours).
Exhibit Dates: 11/72–1/88.
Objectives: To train enlisted personnel to operate and maintain aircraft launching and recovery equipment.
Instruction: Lectures and practical exercises in aircraft launching and recovery equipment operation and maintenance, including survival and emergency equipment, heavy equipment, and arresting gear.
Credit Recommendation: In the vocational certificate category, 6 semester hours in heavy equipment technology (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in heavy equipment technology (7/74).

NV-1710-0062

EQUIPMENT OPERATORS/ASPHALT PAVING AND PLANT OPERATION, CLASS C
(EO "C" Asphalt)

Course Number: A-730-0017.
Location: Construction Training Center, Gulfport, MS; Construction Training Center, Port Hueneme, CA.
Length: 7 weeks (210 hours).
Exhibit Dates: 2/72–1/88.
Objectives: To train personnel in the operating techniques and supervisory skills required for asphalt paving and plant operation.
Instruction: Lectures and practical exercises in asphalt paving and plant operation, including plant components, plant disassembly, plant erection, asphalt construction materials, designing hot asphalt mix, production equipment, placement equipment, protective coatings, producing and laying asphalt, and pavement failure and repair.
Credit Recommendation: In the vocational certificate category, 4 semester hours in asphalt paving construction (7/76); in the lower-division baccalaureate/associate degree category, 1 semester hour in asphalt paving construction (7/76).

NV-1710-0063

BUILDERS, CLASS A (BU "A")

Course Number: A-710-0010.
Location: Construction Training Center, Port Hueneme, CA; Construction Training Center, Gulfport, MS; Construction Training Center, Davisville, RI.
Length: 9–12 weeks (280–370 hours).
Exhibit Dates: 3/60–1/88.
Objectives: To train personnel as builders.
Instruction: Lectures and practical exercises in the duties of builders, including hand tools and portable machinery, construction materials, construction rigging, blueprint reading, woodworking and mill work, construction carpentry, concrete, concrete finishing and masonry construction, roofing, painting, glazing and composition tile, and field and waterfront structures.
Credit Recommendation: In the vocational certificate category, 8 semester hours in construction technology (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in construction technology (7/76).

NV-1710-0064

EQUIPMENT OPERATORS/BLASTING AND QUARRY OPERATIONS, CLASS C
(EO "C" Blasting and Quarry Operations)

Course Number: A-730-0019; A-710-012.
Location: Construction Training Center, Port Hueneme, CA.
Length: 4 weeks (120 hours).
Exhibit Dates: 6/65–1/88.
Objectives: To train enlisted personnel to supervise quarry operations.
Instruction: Lectures and practical exercises in drilling, placing charges, detonation procedures, construction blasting, quarry layout, development and operation of a quarry, and rock-crushing plant operation.
Credit Recommendation: In the vocational certificate category, 3 semester hours in quarry foremanship (7/74).

NV-1710-0065

CONSTRUCTION MECHANIC, CLASS J (CM"J")
(Construction Mechanic, Class B)

Course Number: A-610-0011; A-610-0015.
Location: Construction Training Center, Gulfport, MS; Construction Training Center, Port Hueneme, CA.
Length: 14–15 weeks (420–450 hours).
Exhibit Dates: 2/65–1/88.
Objectives: To train enlisted personnel in the maintenance, repair, and overhaul of automotive materials and parts.
Instruction: Lectures and practical exercises in the repair and maintenance of construction vehicles and parts, including foremanship training, basic mathematics, instruments, internal-combustion engines, electrical systems, adjustment and troubleshooting procedures; Caterpillar, International, General Motors, and Cummins engines; multifuel engines; construction equipment power trains and chassis units; and automotive chassis and power trains.
Credit Recommendation: In the vocational certificate category, 9 semester hours in construction equipment repair foremanship (7/76).

NV-1710-0066

1. MARINE GAS TURBINE BASIC, CLASS C1
2. ENGINEMEN, CLASS C, MARINE GAS TURBINE BASIC

Course Number: A-652-0027.
Location: Propulsion Engineering School, Great Lakes, IL.
Length: *Version 1:* 6 weeks (213 hours). *Version 2:* 4 weeks (120 hours).
Exhibit Dates: *Version 1:* 8/77–10/78. *Version 2:* 8/73–7/77.
Objectives: To provide the required technical background and skills for entry into specific gas turbine system courses.
Instruction: Lectures and practical exercises in the theory, operation, and characteristics of gas turbine engines, assemblies, sub-assemblies, and component parts.
Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 4 semester hours in gas turbine engines (9/77). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in gas turbine engines (6/75).

NV-1710-0067

SOLAR T-10205-11A SATURN ENGINE, CLASS C1
(Enginemen, Class C, Solar T-10205-11A Saturn Engine)

Course Number: A-652-0068.
Location: Propulsion Engineering School, Great Lakes, IL.
Length: 3 weeks (85 hours).
Exhibit Dates: 8/73–10/78.
Objectives: To upgrade the knowledge and skills of petty officers with Gas Turbine System Technician ratings for more effective performance of duties.
Instruction: Lectures and practical exercises in operating, testing, adjusting, and diagnosing and repairing malfunctions in the Solar Saturn gas turbine engine.
Credit Recommendation: Credit is not recommended because of the refresher nature of the course (9/77).

NV-1710-0068

STEELWORKER, MAINTENANCE WELDING TECHNIQUES, CLASS C
(SW Maintenance Welding)

Course Number: A-701-0037.
Location: Construction Training Center, Port Hueneme, CA; Construction Training Center, Gulfport, MS.
Length: 4–5 weeks (120–150 hours).
Exhibit Dates: 7/73–1/88.
Objectives: To provide instruction in the repair of machinery by welding.
Instruction: Lectures and practical exercises in welding consumables; applied welding, metallurgy, and general and high strength brazing of steel; heat treatment of metals and silver brazing of steel; welding processes and silver brazing of stainless steel; welding consumable selection and silver brazing of brass, stress analysis, and cast iron and aluminum welding; welding processes and torch soldering; techniques of arc welding in maintenance; and wearfacing in maintenance welding and gas tungsten arc in maintenance welding.
Credit Recommendation: In the vocational certificate category, 3 semester hours in advanced welding (7/76); in the lower-division baccalaureate/associate degree category, 2 semester hours in advanced welding (7/76).

NV-1710-0069

NUCLEAR POWER PLANT COMPONENTS WELDER, CLASS C1

Course Number: A-701-0028.
Location: Service School Command, San Diego, CA.
Length: 14 weeks (447–560 hours).
Exhibit Dates: 10/73–Present.

Objectives: To train personnel to weld reactor coolant and associated systems in a nuclear power plant.

Instruction: Topics include introduction to nuclear power plant components welding, welding consumable material, pipe butt and socket type joints, and upper seal weld of a beveled canopy.

Credit Recommendation: In the vocational certificate category, 6 semester hours in advanced or specialized welding (5/82); in the lower-division baccalaureate/associate degree category, 3 semester hours in advanced or specialized welding (5/82).

NV-1710-0070

General Pump Maintenance

Course Number: F-000-0045; F-000-045.

Location: Submarine School, Groton, New London, CT; Fleet Ballistic Missile Submarine Training Center, Charleston, SC; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2-3 weeks (60-105 hours).

Exhibit Dates: 9/66-1/88.

Objectives: To train personnel to recognize, operate, maintain, and repair various types of liquid pumps and their components.

Instruction: Lectures and practical exercises in pump classification and application and shaft seals, couplings, valves, and other pump components and their maintenance.

Credit Recommendation: In the vocational certificate category, 2 semester hours in construction equipment (pump maintenance) (5/74).

NV-1710-0071

Aircraft Launch and Recovery Equipment (C-7/11 Catapult), Class C

Course Number: None.

Location: Air Technical Training Center, Lakehurst, NJ.

Length: 9 weeks (352 hours).

Exhibit Dates: 10/70-10/85.

Objectives: To train selected personnel in the operation, inspection, and maintenance of C-7/11 catapults and related equipment.

Instruction: Lectures and practical exercises in the basic fundamentals, description, operation, function, and location of the C-7/11 catapults; Mk-7 arresting gear barricade components, and systems to include the steam system, mechanical system, hydraulic system, control system familiarization, operation, replacement, servicing, and repair and inspection.

Credit Recommendation: In the vocational certificate category, 14 semester hours in steam systems and hydromechanical systems (6/74); in the lower-division baccalaureate/associate degree category, 7 semester hours in steam systems and hydromechanical systems (6/74).

NV-1710-0072

General Regulator Automatic Boiler Control Maintenance

(Steam Plant Automatic Controls Maintenance (General Regulator))

Course Number: A-651-0039; A-651-0040.

Location: *Version 1:* Fleet Training Center, San Diego, CA. *Version 2:* Development and Training Center, Norfolk, VA; Boiler Technician School, San Diego, CA; Boiler Technician School, Philadelphia, PA.

Length: *Version 1:* 8 weeks (320 hours). *Version 2:* 6 weeks (210 hours).

Exhibit Dates: *Version 1:* 1/81-Present. *Version 2:* 11/72-12/80.

Objectives: To train personnel to perform their duties in the operation and calibration of the General Regulator automatic boiler control system.

Instruction: *Version 1:* Instruction and practical exercises in the operation and calibration of the General Regulator automatic boiler control system including air and fuel regulation, multi-element feed water regulators, feed pump controllers, systems and component calibration and troubleshooting procedures. *Version 2:* Classroom and practical instruction in the operation of high pressure steam systems using General Regulator Automatic Control systems, including safety controls and feed controls.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in automatic control or high pressure boiler operation (5/82); in the lower-division baccalaureate/associate degree category, 1 semester hour in automatic control instrumentation laboratory (5/82). *Version 2:* In the vocational certificate category, 3 semester hours in building maintenance and engineering (6/75).

NV-1710-0073

Hagan Automatic Boiler Control Maintenance

(Steam Plant Automatic Controls Maintenance (Hagan))

Course Number: A-651-0041; A-651-0042.

Location: *Version 1:* Fleet Training Center, San Diego, CA. *Version 2:* Boiler School, Norfolk, VA; Development and Training Center, Philadelphia, PA; Development and Training Center, San Diego, CA.

Length: *Version 1:* 7 weeks (280 hours). *Version 2:* 5 weeks (150 hours).

Exhibit Dates: *Version 1:* 9/80-Present. *Version 2:* 10/72-8/80.

Objectives: To train personnel to perform their duties in the operation and calibration of the Hagan automatic boiler control system.

Instruction: *Version 1:* Classroom instruction and practical exercises in the operation and calibration of the Hagan boiler control system including air and fuel regulation, multi-element feedwater regulators, feed pump controllers, systems and component calibration and troubleshooting procedures. *Version 2:* Instruction includes the operation of high pressure steam systems using the Hagan Automatic Control system, including safety controls and feed controls.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in automatic control or high pressure boiler operation (5/82); in the lower-division baccalaureate/associate degree category, 1 semester hour in automatic control instrumentation laboratory (5/82). *Version 2:* In the vocational certificate category, 3 semester hours in building maintenance and engineering (6/75).

NV-1710-0074

Bailey Automatic Boiler Control Maintenance

(Steam Plant Automatic Controls Maintenance (Bailey Meter))

Course Number: A-651-0043; A-651-0044.

Location: *Version 1:* Fleet Training Center, San Diego, CA. *Version 2:* Boiler Technician School, Philadelphia, PA; Development and Training Center, San Diego, CA.

Length: *Version 1:* 7 weeks (280 hours). *Version 2:* 6 weeks (180 hours).

Exhibit Dates: *Version 1:* 3/81-Present. *Version 2:* 12/72-2/81.

Objectives: To train personnel to perform their duties in the operation and calibration of the Bailey automatic combustion control systems.

Instruction: *Version 1:* Instruction and practical exercises in the operation and calibration of the Bailey automatic combustion control systems including air and fuel regulation, multi-element feed water regulators, feed pump controls, system and component calibration and troubleshooting procedures. *Version 2:* Instruction includes the operation of high pressure steam systems using the Bailey Meter Automatic Control system, including safety controls and feed controls.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in automatic combustion control or high pressure boiler operation (5/82); in the lower-division baccalaureate/associate degree category, 1 semester hour in automatic controls instrumentation laboratory (5/82). *Version 2:* In the vocational certificate category, 3 semester hours in building maintenance and engineering (6/75).

NV-1710-0075

1200 PSI Steam Generating Plant Operator

Course Number: A-651-0038.

Location: Boiler Technician School, Philadelphia, PA.

Length: 3 weeks (106 hours).

Exhibit Dates: 10/72-1/88.

Objectives: To train boiler technicians in the operation of the 1200 PSI boilers and associated auxiliary machinery.

Instruction: Classroom and practical instruction in the principles of high pressure steam systems including start-up, operation, and control of steam plants and steam plant accessories.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in plant operation and maintenance (6/75).

NV-1710-0076

Repair Party Leader

Course Number: A-495-0040.

Location: Naval Technical Training Center, Treasure Island, San Francisco, CA; Navy Damage Control Training Center, Philadelphia, PA.

Length: Self-paced 3 weeks (120 hours).

Exhibit Dates: 7/80-Present.

Objectives: Designed to train enlisted personnel in advanced damage control theory and techniques, to fill repair party leader billets, to facilitate the proper management of repair party personnel in casualty situations under all shipboard readiness conditions.

Instruction: The course covers damage control theory, systems and watchstations including nuclear detection, calculations, effects, countermeasures and accidents.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course.

NV-1710-0077

Three Winch Controller Using Standard Electronic Modules (SEM) and Controls for Logic Elevators

Course Number: A-690-0030.

Location: Naval Technical Training Center, Treasure Island, San Francisco, CA.
Length: 5 weeks (200 hours).
Exhibit Dates: 1/81-7/81.
Objectives: Provides experienced personnel with technical knowledge and skills to maintain and repair a three winch controller.
Instruction: Lectures and practical exercises covering the maintenance and repair of a three winch controller using standard electronic modules; sliding block controls; marine elevator electronics control systems, and safety devices. Topics include solid state and logic theory review; hauling winch systems, control stations systems; Denison Vickers, Cutler-Hammer, and General Electric elevator electronics controller systems, as well as elevator power supplies.
Credit Recommendation: In the vocational certificate category, 6 semester hours in elevator repairs (11/81).

NV-1710-0078

Hagan Automatic Boiler Control Console (ACC) Operator

Course Number: A-651-0049.
Location: Fleet and Mine Warfare Training Center, Charleston, SC; Fleet Training Center, Norfolk, VA; Fleet Training Center, Mayport, FL; Fleet Training Center, San Diego, CA; Fleet Training Group, Pearl Harbor, HI; Surface Warfare Officer School, Newport, RI.
Length: 2-3 weeks (84 hours).
Exhibit Dates: 10/77-Present.
Objectives: This course trains enlisted personnel and others possessing boiler operator skills to operate a Hagan Automatic Boiler Control Console.
Instruction: This course covers automatic boiler control theory and a typical automatic combustion control system. Lectures in the principles of feedwater control, feed pump differential pressure control, feedback recirculation controls and air locks. Lecture and practical experience in automatic boiler control console operation and procedures.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in a technical elective in manufacturing technology, mechanical technology or engineering technology (11/81).

NV-1710-0079

General Regulator Automatic Boiler Control Console Operator

Course Number: A-651-0046.
Location: Fleet Training Center, Norfolk, VA; Fleet Training Center, Mayport, FL; Fleet and Mine Warfare Training Center, Charleston, SC; Fleet Training Center, San Diego, CA; Fleet Training Center, Pearl Harbor, HI.
Length: 2-3 weeks (84 hours).
Exhibit Dates: 11/77-Present.
Objectives: The course trains enlisted personnel and others possessing boiler operator skills to operate a General Regulator automatic boiler control console.
Instruction: This course covers automatic boiler control theory and a typical automatic combustion control system. Lectures in the principles of feedwater control, feedpump differential pressure control, feedback recirculation controls and air locks. Lectures and practical experience in automatic boiler control console operation and procedures.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in a technical elective in manufacturing technology, mechanical technology, or engineering technology (11/81).

NV-1710-0080

Boiler Technician Six Year Obligator (BT6YO) Advanced Operator

(Boiler Technician 6 Year Option (6YO) Operator Advanced Class A1)

Course Number: A-651-0079.
Location: Service School Command, Great Lakes, IL.
Length: 9 weeks (360 hours).
Exhibit Dates: 10/78-5/86.
Objectives: To train personnel in the operation of a high pressure boiler.
Instruction: For this course after 5/86 see NV-1710-0104. Lectures and practical exercises in the operation of a high pressure boiler including firing, feed water systems, feed control, feed deairation, chemical feed systems, blow down systems, fuel oil systems, combination control, boiler water chemistry and a basic understanding of engine room systems with associated equipment.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in boiler operation, 1 in boiler operation laboratory (10/83).

NV-1710-0081

Boiler Technician/Maintenance Management Six Year Option

(Boiler Technician 6 Year Option (6YO) Advanced Maintenance) Phase 3 Class C1

Course Number: A-651-0080.
Location: Service School Command, Great Lakes, IL.
Length: 4 weeks (160 hours).
Exhibit Dates: 8/78-Present.
Objectives: To train personnel to perform preventive and corrective maintenance on basic steam propulsion system components.
Instruction: Lectures and practical exercises to provide boiler technicians with knowledge and skills concerning the use of marine engineering technical documentation, preparation of Planned Maintenance System (PMS) forms and supply requisitions, maintenance principles and practices for mechanical fasteners, static and dynamic seals, sliding and rolling contact hearings ship board lubrication management, and scheduled and corrective maintenance of manually-operated valves.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in maintenance management (6/88).

NV-1710-0082

Gas Turbine Systems Technician Fundamentals Class A1

Course Number: A-652-0176.
Location: Service School Command, Great Lakes, IL.
Length: 3 weeks (120 hours).
Exhibit Dates: 8/80-2/84.
Objectives: To train personnel in the basic contruction and principles of marine gas turbines.
Instruction: Lectures in basic gas turbine theory, construction, and operation including single and split shaft type engines, fuel systems, propulsion shafting, reduction gears, controllable pitch propellers, corrosion control performance computation, operating procedures, and troubleshooting.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in gas turbine principles (1/82).

NV-1710-0083

Gas Turbine Systems Technician Mechanical Class A1

Course Number: A-652-0177.
Location: Service School Command, Great Lakes, IL.
Length: 10 weeks (400 hours).
Exhibit Dates: 10/78-2/84.
Objectives: To provide personnel with the knowledge and skills required to maintain hydraulic, electrical power distribution, and other related systems of the LM2500 gas turbine module.
Instruction: Lectures and practical exercises in maintaining hydraulic systems, air-fuel systems and start systems including hydraulic fluids, seals, hoses, reservoirs, filters, pumps, actuators, accumulators, valves, symbols and schematics. Also included are electrical distribution systems, connectors, circuit breakers, switch gear, batteries, thermocouples, photoelectric cells, and multimeters use.
Credit Recommendation: In the vocational certificate category, 2 semester hours in basic electrical service (1/82); in the lower-division baccalaureate/associate degree category, 6 semester hours in hydraulic technology (1/82).

NV-1710-0084

Boiler Technician (1200 PSI), Class A1

Course Number: A-651-0052; A-651-0010.
Location: Service School Command, Great Lakes, Il.
Length: *Version 1:* Self-paced 7 weeks (280 hours). *Version 2:* Self-paced 8 weeks (320 hours).
Exhibit Dates: *Version 1:* 9/77-Present. *Version 2:* 1/74-8/77.
Objectives: To train personnel in the operation of components/systems of steam propulsion plants.
Instruction: *Version 1:* Individualized-computer managed instruction in the operation of components and systems in the fire room steam propulsion plants. Instruction includes fire-fighting systems, mainstream systems, boilers, water level indicator and chemical feed systems, auxiliary steam systems, combustion air systems, exhaust systems and service and control systems. *Version 2:* Self-paced instruction in boiler maintenance and repair; distilling plant operation; fuel oil and auxiliary equipment operation and fireroom operations, maintenance and materiel management. Instruction also includes basic mathematics, tools and materials, valves and basic steam plant principles.
Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours as a technical elective in systems operations or related programs (1/82). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours as a technical elective in automotive and mechanical programs and 7 in systems maintenance or related programs (9/77).

NV-1710-0085

Bailey Automatic Boiler Control Console Operator

Course Number: A-651-0050.

Location: Fleet Training Center, San Diego, CA; Fleet Training Center, Pearl Harbor, HI.
Length: 3 weeks (84-105 hours).
Exhibit Dates: 4/78-Present.
Objectives: To train enlisted personnel and others possessing boiler operator skills to operate a Bailey automatic boiler console.
Instruction: Lectures and laboratory exercises in automatic boiler control theory and a typical automatic combustion control system including principles of feedwater control, feed pump differential pressure control, feedwater recirculation controls, air locks, boiler control console operation and procedures.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in a technical elective in manufacturing technology or mechanical technology or engineering technology (5/82).

NV-1710-0086

Auxiliary Machinery Controls, Governors and Regulators Maintenance

Course Number: A-651-0069.
Location: Fleet Training Center, Norfolk, VA; Fleet Training Center, San Diego, CA.
Length: 2-3 weeks (83 hours).
Exhibit Dates: 8/80-Present.
Objectives: To train personnel in the maintenance of machinery controls, governors and regulators.
Instruction: Classroom instruction and practical exercise in troubleshooting, disassembly, inspection, measurement, repair, reassembly and testing of machinery controls, governors and regulators including speed control devices, air pilot diaphragm control devices, pressure control devices, and safety shutdown devices.
Credit Recommendation: In the vocational certificate category, 3 semester hours in machinery controls, governors and regulators maintenance; in the lower-division baccalaureate/associate degree category, 1 semester hour in mechanical systems laboratory (3/89).

NV-1710-0087

Forced Draft Blower Maintenance

Course Number: A-651-0074.
Location: Fleet Training Center, San Diego, CA; Fleet Training Center, Norfolk, VA.
Length: 2 weeks (64 hours).
Exhibit Dates: 8/80-8/87.
Objectives: To train personnel in forced draft blower maintenance.
Instruction: For this course after 8/87 see NV-1710-0110. Classroom instruction and practical experience in forced draft blower component maintenance including steam turbine drives, lubricating systems and fans; maintenance principles and recordkeeping, and spare part procurement.
Credit Recommendation: In the vocational certificate category, 2 semester hours in machinery repair (5/82).

NV-1710-0088

Boiler Technician Advanced Maintenance

Course Number: A-651-0083.
Location: Fleet Training Center, Norfolk, VA; Fleet Training Center, San Diego, CA.
Length: 20 weeks (701 hours).
Exhibit Dates: 8/80-8/87.
Objectives: To train personnel to perform preventive and corrective maintenance on steam propulsion and auxiliary machine system components.
Instruction: For this course after 8/87 see NV-1710-0109. Classroom instruction and practical experience in preventive and corrective maintenance including engineering maintenance administration; valve and steam trap maintenance; engineering maintenance principles and practices; pump maintenance; auxiliary turbine maintenance; auxiliary machinery controls, governors and regulators maintenance; forced draft blower maintenance and steam generator maintenance.
Credit Recommendation: In the vocational certificate category, 20 semester hours in high pressure steam plant machinery maintenance and repair (5/82); in the lower-division baccalaureate/associate degree category, 6 semester hours in high pressure steam plant machinery operation and maintenance (5/82).

NV-1710-0089

Propulsion Alarm and Indicating Systems Maintenance

Course Number: A-651-0047.
Location: Service School Command, San Diego, CA; Fleet Training Center, Norfolk, VA.
Length: 4 weeks (160 hours).
Exhibit Dates: 7/75-Present.
Objectives: To train personnel in preventive and corrective maintenance of propulsion plant remote alarm and indicating systems.
Instruction: Lectures and practical exercises in calibration, troubleshooting and preventive maintenance procedures for pressure, temperature alarm panels and switchboards, salinity indicating systems and boiler water level indicating/ alarm systems.
Credit Recommendation: In the vocational certificate category, 2 semester hours in maintenance of remote indicating devices (5/82).

NV-1710-0090

Automated Propulsion System Maintenance

Course Number: A-651-0045.
Location: Service School Command, San Diego, CA.
Length: 10 weeks (400 hours).
Exhibit Dates: 12/81-Present.
Objectives: To train personnel in preventive and corrective maintenance of propulsion system indicating and control components and systems.
Instruction: Lectures and laboratory exercises in calibration, troubleshooting, and preventive maintenance procedures in propulsion system remote indicating and control components for boiler burner controls, temperature and pressure indicating systems and printer output units.
Credit Recommendation: In the vocational certificate category, 2 semester hours in maintenance of remote and indicating devices and 1 in printer output devices (5/82).

NV-1710-0091

Pump Maintenance

Course Number: A-651-0067.
Location: Fleet Training Center, San Diego, CA; Fleet Training Center, Norfolk, VA.
Length: 2 weeks (70-76 hours).
Exhibit Dates: 8/80-Present.
Objectives: To train personnel in the proper inspection and maintenance of pumps.
Instruction: Classroom instruction and practical exercise in pump inspection and maintenance including centrifugal, reciprocating, and rotory type pumps, external and internal inspection, troubleshooting, disassembly, repair, reassembly, test maintenance, recordkeeping and spare part procurement.
Credit Recommendation: In the vocational certificate category, 3 semester hours in machinery pump repair; in the lower-division baccalaureate/associate degree category, 1 semester hour in mechanical systems laboratory (3/89).

NV-1710-0092

Damage Control Assistant

Course Number: A-4G-0020.
Location: Surface Warfare Officers School Command, Newport, RI.
Length: 8 weeks (320 hours).
Exhibit Dates: 5/82-Present.
Objectives: To provide an officer with the knowledge necessary to perform as a damage control assistant and electrical officer.
Instruction: The course includes a detailed study into the area of damage control equipment, systems and administration including equipment and maintenance procedures, stability, buoyancy, battle damage evaluation and containment techniques.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in shipboard repair orientation (11/82).

NV-1710-0093

Surface Warfare Officer Specialty Course Steam Main Propulsion Assistant

Course Number: A-4H-0021.
Location: Surface Warfare Officers School Command, Newport, RI.
Length: 12 weeks (480 hours).
Exhibit Dates: 6/79-Present.
Objectives: To train officers to operate 1200 PSI steam propulsion plants.
Instruction: Lectures and practical exercises in power plant operations and maintenance including the following systems: main feed and condensate, lubricating oil, fuel oil, main steam, auxiliary steam and propulsion systems. Subjects covered include air compressors, valves, pumps, gauges, distilling plants, pollution control, brazing and soldering.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in basic marine engineering or 3 in power plant operations or 2 in high pressure boilers and 2 in marine engineering laboratory (11/82).

NV-1710-0094

Boiler Technician/Maintenance Management Six Year Option
(Machinist's Mate Advanced Maintenance)

Course Number: A-651-0114.
Location: Service School Command, Great Lakes, IL.
Length: 4 weeks (160 hours).
Exhibit Dates: 6/78-Present.
Objectives: To train personnel to perform preventive and corrective maintenance on basic steam propulsion system components.

Instruction: Lectures and practical exercises to provide machinist mates with knowledge and skills concerning the use of marine engineering technical documentation, preparation of Planned Maintenance System (PMS) forms and supply requisition, maintenance principles and practices for mechanical fasteners, static and dynamic seals, sliding and rolling contact hearings, shipboard lubrication management, and scheduled and corrective maintenance of manually-operated valves.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in maintenance management (6/88).

NV-1710-0095

Solar T-1020S-100B Gas Turbine Generator Set Operator and Maintenance

Course Number: A-652-0226.

Location: Service School Command, Great Lakes, IL.

Length: 4 weeks (160 hours).

Exhibit Dates: 3/83–Present.

Learning Outcomes: Upon completion of the course the student will be able to identify component/systems of the gas turbine generator by function; operate generator; perform operational checks; perform scheduled maintenance; and take appropriate corrective maintenance on generator set.

Instruction: Lectures and practical exercises in gas turbine operation including lubrication, cooling, water and fuel systems; starting procedures, combustion air systems, safety procedures, inspection and maintenance of gas turbines and bore scope, cleaning and adjusting turbine control systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in gas turbine technology (6/88).

NV-1710-0096

Machinist's Mate Six Year Obligator (MM6YO) Advanced

Course Number: A-651-0105.

Location: Service School Command, Great Lakes, IL.

Length: 9 weeks (360 hours).

Exhibit Dates: 10/78–5/86.

Objectives: To train personnel in the operation of a high pressure boiler.

Instruction: For this course after 5/86 see NV-1710-0105. Lectures and practical exercises in the operation of a high pressure boiler including firing, feed water systems, feed control, feed deairation, chemical feed systems, blow down systems, fuel oil systems, combination control, boiler water chemistry and a basic understanding of engine room systems with associated equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in boiler operation, 1 in boiler operation laboratory (11/83).

NV-1710-0097

Gas Turbine Fundamentals

Course Number: A-652-0244.

Location: Naval Training Center, Great Lakes, IL.

Length: 9 weeks (360 hours).

Exhibit Dates: 3/84–Present.

Objectives: To teach students the basic construction and qualitative theory of operation and maintenance of an LM 2500 marine gas turbine propulsion system.

Instruction: Lectures and practical exercises in basic pneumatic, hydraulics, AC and DC theory and devices and gas turbine theory, specific instruction and exercises in the operating theory, construction and maintenance of LM 2500 gas turbine propulsion systems including fresh water, fuel and lube oil, pumps and heat exchangers, and fire fighting systems, and instruction in occupational safety including bearing loss, electric safety and heat stress.

Credit Recommendation: In the vocational certificate category, 3 semester hours in gas turbine power systems or 2 in basic AC/DC theory, 1 in hydraulic principles, and 1 in gas turbine construction (1/86).

NV-1710-0098

FFG-7/Auxiliary Systems Operations GS

Course Number: A-652-0246.

Location: Naval Training Center, Great Lakes, IL.

Length: 8 weeks (320 hours).

Exhibit Dates: 3/84–4/86.

Objectives: To train personnel how to operate and perform operational maintenance on the FFG-7 Gas Turbine Auxiliary Plant.

Instruction: Classroom lectures and practical exercises in the operation and operational maintenance on an FFG-7 Gas Turbine Auxiliary Plant including fixed fire fighting systems, ventilation systems, fuel oil transfer and waste systems, ballast systems, low and high pressure compressed air systems, distilling plant electrical generating equipment, and the line up and starting of these systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in marine engineering orientation (1/86).

NV-1710-0099

FFG-7 Electric Plant Operations G5

Course Number: A-652-0245.

Location: Naval Training Center, Great Lakes, IL.

Length: 8 weeks (320 hours).

Exhibit Dates: 3/84–8/86.

Objectives: To train personnel how to operate and perform operational maintenance on the FFG-7 Gas turbine Auxiliary Plant.

Instruction: Classroom lectures and practical exercises in the operation and operational maintenance on an FFG-7 Gas Turbine Auxiliary Plant including, fixed fire fighting systems, ventilation systems, fuel oil transfer and waste systems, ballast systems, low and high pressure compressed air systems, distilling plant electrical generating equipment, and the line up and starting of these systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in marine engineering orientation orientation (1/86).

NV-1710-0100

Damage Control/Fuel Control Console Operator Course

Course Number: A-652-0079.

Location: Naval Training Center, Great Lakes, IL.

Length: 1 week (40 hours).

Exhibit Dates: 6/84–Present.

Objectives: Train students to operate the Damage Control/Fuel Control Console of a marine power plant.

Instruction: Lectures and practical experience in operating control consoles.

Credit Recommendation: Credit is not recommended because of the limited, specific nature of the course (1/86).

NV-1710-0101

FFG-7 Propulsion Control Console Engineering Officer of the Watch Operators

Course Number: A-652-0254.

Location: Naval Training Center, Great Lakes, IL.

Length: 10 weeks (280 hours).

Exhibit Dates: 4/84–3/86.

Objectives: To train student as a supervisory operator of a FFG-7 gas turbine power plant.

Instruction: Lectures and practical experience in gas turbine power plant systems and operations including intersystem influence. Covers topics for fire fighting, ventilation, fuel oil, lube oil, pnematic, power transfer, auxiliary, electrical and gas turbine systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in marine systems orientation (1/86).

NV-1710-0102

Gas Turbine Electrical, Class A

Course Number: A-652-0299.

Location: Service Schools Command, Great Lakes, IL.

Length: 25–26 weeks (1050 hours).

Exhibit Dates: 1/86–Present.

Learning Outcomes: Upon completion of the course, the student will understand basic principles of the engineering sciences–thermodynamics, heat transfer, fluid mechanics, electricity and electronics; identify components/systems of a gas turbine propusion unit by function; perform basic functions in the operation of a gas turbine; recognize interrelationship of components in a gas turbine power plant; diagnose malfunctions in plant operation.

Instruction: Engineering fundamentals, basic fluid mechanics, basic thermodynamics and heat transfer, engineering materials and methods, gas turbine theory, gas turbine construction, gas turbine operations, basic AC/DC circuits, basic electric devices, introduction to electrical machinery, 760 hours of classroom instruction and 284 hours of laboratory work including 4 weeks of gas turbine plant operation.

Credit Recommendation: In the vocational certificate category, 4 semester hours in gas turbine plant operations (6/88); in the lower-division baccalaureate/associate degree category, 2 semester hours in thermo/hydraulic technology, 3 in gas turbine technology, 4 in basic electricity and electronics (6/88).

NV-1710-0103

Gas Turbine Mechanical, Class A

Course Number: A-652-298.

Location: Service Schools Command, Great Lakes, IL.

Length: 15–16 weeks (764 hours).

Exhibit Dates: 1/86–Present.

Learning Outcomes: Upon completion of the course, the student will understand the basis principles of the engineering sciences–thermodynamics, heat transfer, fluid mechanics, and electricity; identify components/systems of a gas turbine propulsion plant by function; perform basic functions in operating a gas turbine power plant, and diagnose malfunctions based on observation of operating parameters.

Instruction: Engineering fundamentals, basic fluid mechanics, basic thermodynamics and heat transfer, engineering materials and methods, gas turbine theory, gas turbine construction, gas turbine operations, basic AC/DC circuits, electrical maintenance techniques, 530 hours of classroom instruction and 226 hours of laboratory work including 4 weeks of gas turbine plant operation.

Credit Recommendation: In the vocational certificate category, 4 semester hours in gas turbine plant operation (6/88); in the lower-division baccalaureate/associate degree category, 2 semester hours in thermo/hydraulic technology, 3 in gas turbine technology, and 2 in basic electricity (6/88).

NV-1710-0104

BOILER TECHNICIAN SIX YEAR OBLIGATOR (BT 6YO) ADVANCED OPERATOR COURSE

Course Number: A-652-0079.

Location: Service Schools Command, Great Lakes, IL.

Length: 8 weeks (269 hours).

Exhibit Dates: 6/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify steam power plant components by function, operate the following steam power plant systems: steam generators, main feed and condensate, sea water cooling, air-removal, lubricating oil service, auxiliary steam, and electrical distribution systems. Stand appropriate 1200 psi steam power plant watches with special emphasis on automatic boiler control (ABC) systems, and practice high standard of steam power plant and industrial safety.

Instruction: Approximately equal time emphasis and classroom presentation and laboratory work. Testing is both written and oral. Emphasis on knowledge base, facts, and terminology. Topics include: safety, metrology, steam power plant systems, basic thermodynamic calculations, basic power plant system function and interconnection and operating procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in steam power plant operation and 1 in industrial safety (6/88).

NV-1710-0105

MACHINIST'S MATE SIX-YEAR OBLIGATOR (MM6YO)

Course Number: A-651-0105.

Location: Service Schools Command, Great Lakes, IL.

Length: 8 weeks (275 hours).

Exhibit Dates: 6/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify steam powerplant components by function; operate the following steam powerplant systems: steam generators, main feed and condensate, sea water cooling, air removal, lubricator oil service, auxiliary steam, and electrical distribution systems; stand appropriate 1200 PSI steam powerplant watches with special emphasis on ship's service generator operations and flash type distilling plant operations; practice high standards of steam powerplant and industrial safety.

Instruction: Approximately equal time emphasis on classroom presentations and laboratory work; testing is both written and oral, emphasis on knowledge base, facts, and terminology. Topics include: safety, metrology, steam powerplant systems, basic thermodynamic calculations, basic powerplant system function and interconnections and operating procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in steam power plant operations, 1 in industrial safety (6/88).

NV-1710-0106

KAMEWA CONTROLLABLE PITCH PROPELLER MAINTENANCE

Course Number: A-652-0055.

Location: Service Schools Command, Great Lakes, IL.

Length: 4 weeks (160 hours).

Exhibit Dates: 7/83–Present.

Learning Outcomes: Upon completion of the course, the student will be able to train enginemen to operate, maintain and troubleshoot variable-pitch ship propellers and associated control equipment.

Instruction: Lectures and practical exercises in the operation, maintenance and troubleshooting of variable-pitch ship propellers and associated control equipment including applications of hydraulics and pneumatics, analysis of electrical control circuits, and mechanical components.

Credit Recommendation: In the vocational certificate category, 3 semester hours in pneumatic/hydraulic control systems maintenance (6/88).

NV-1710-0107

MISSILE TUBE SUPPORT EQUIPMENT (MECHANICAL)

Course Number: A-121-0470.

Location: Trident Training Facility, Bangor, Bremerton, WA.

Length: 2 weeks (56 hours).

Exhibit Dates: 12/83–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform operational procedures with respect to the missile launcher pressurization system and missile tube hydraulic, perform preventive and corrective maintenance on missile tube heating and cooling, dehumidifying, and hydraulic systems and missile launcher pressurization system.

Instruction: Lecture and laboratory exercises on the mechanical subsystems (pneumatic, hydraulic, heating, cooling, and dehumidifying) related to submarine missile launching tubes.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in mechanical engineering technology laboratory (2/89).

NV-1710-0108

ENGINEERING MAINTENANCE PRINCIPLES, PRACTICES, AND ADMINISTRATION

Course Number: A-651-0064.

Location: Fleet Training Center, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: 3 weeks (97 hours).

Exhibit Dates: 9/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to perform and administer general mechanical maintenance.

Instruction: Classroom and practical exercises on instrumentation of machinery, mechanical fasteners, mechanical seals, lubrication, bearings, and couplings. Course includes administrative procedures for performing maintenance on mechanical systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour lecture and 1 semester hour laboratory in machinery maintenance (3/89).

NV-1710-0109

BOILER TECHNICIAN STEAM PROPULSION MAINTENANCE SUPERVISOR

Course Number: A-651-0083.

Location: Fleet Training Center, Norfolk, VA; Fleet Training Center, San Diego, CA.

Length: 17–18 weeks (675 hours).

Exhibit Dates: 9/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to organize, perform and supervise preventive and corrective maintenance, and troubleshoot the mechanical systems associated with steam power generation systems not including main steam turbines and high pressure compressors.

Instruction: This is a pipeline course made up of the following courses: A-651-0064 Engineering Maintenance Principles, Practices, and Administration; A-651-0065 Valve Maintenance; A-651-0067 Pump Maintenance; A-651-0069 Governor and Regulator Maintenance; A651-0068 Auxiliary Turbine Maintenance; A-651-0074 Forced Draft Blower Maintenance; A-651-0075 Steam Generator Maintenance. (A-651-0071 Distilling Plant Condensor and Heat Exchanger Maintenance was too brief for evaluation.) For descriptions please see the individual courses.

Credit Recommendation: For credit recommendations please see the individual courses (3/89).

NV-1710-0110

FORCED DRAFT BLOWER MAINTENANCE

Course Number: A-651-0074.

Location: Fleet Training Center, Norfolk, VA; Fleet Training Center, San Diego, CA.

Length: 1–2 weeks (56 hours).

Exhibit Dates: 9/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to perform forced draft blower component maintenance including steam turbine drives, lubricating systems and fans.

Instruction: Classroom instruction, demonstrations and practical experience.

Credit Recommendation: In the vocational certificate category, 1 semester hour in steam power systems maintenance or repair (3/89).

NV-1710-0111

THREE WINCH CONTROLLER USING STANDARD ELECTRONIC MODULES (SEM) AND CONTROLS FOR LOGIC ELEVATORS

Course Number: A-690-0030.

Location: Naval Technical Training Center, Treasure Island, CA.

Length: 5 weeks (200 hours).

Exhibit Dates: 8/81–Present.

Learning Outcomes: Upon completion of the course, the student wil be able to describe the operation of multivibrators, power supplies and operational amplifiers; troubleshoot the logic elevator simulator to the circuit board level in accordance with standard Navy procedures; describe the hydraulic operation of the 3rd generation Western Gear Sealed transmissions; state the function and designation of the pressure control; check pilot-operated, solenoid-operated and servo-operated valves.

Instruction: Lecture and Laboratory exercises covering the maintenance and repair of a three winch controller.

Credit Recommendation: In the vocational certificate category, 6 semester hours in elevator repair (8/89).

NV-1710-0112

STANDARD TENSIONAL REPLENISHMENT ALONGSIDE METHODS (STREAM) OPERATOR

Course Number: A-060-0025.

Location: Naval Technical Training Center, Treasure Island, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 5/82–Present.

Learning Outcomes: Upon completion of the course, the student will be able to safely perform procedures utilizing standard tensioned replenishment alongside methods (STREAM).

Instruction: Lecture and practical exercises in raw-tensioned, high-line system operation, including standard methods of replenishment at sea, preventive maintenance of station components, safety precautions, and emergency breakway procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in national science (cargo operations) (8/89).

NV-1710-0113

UNDERWAY REPLENISHMENT MECHANICAL AND HYDRAULIC COMPONENT MAINTENANCE

Course Number: A-690-0028.

Location: Naval Technical Training Center, Treasure Island, CA.

Length: 7 weeks (280 hours).

Exhibit Dates: 6/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to relate principles of hydraulics to construction, operation and maintenance of mechanical/hydraulic machinery such as pumps, actuators, accumulators etc., associated with the standard tensioned replenishment alongside methods (STREAM).

Instruction: Lecture and labs concerning principles of hydraulics, construction, operation and maintenance of hydraulic equipment and interpretation of hydraulic system drawings, and troubleshooting techniques for mechanical hydraulic equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in mechanical technology (hydraulic), and 2 in hydraulic laboratory (8/89).

NV-1710-0114

NUCLEAR POWER PLANT WELDER

Course Number: A-701-0015.

Location: Submarine School, Groton/New London, CT; Service School Command, San Diego, CA.

Length: 12 weeks (480 hours).

Exhibit Dates: 4/80–Present.

Learning Outcomes: Upon completion of the course the student will be able to perform basic welding functions and take intermediate and advanced welding or welding supervisor instruction to ASME pressure vessel and nuclear code standards.

Instruction: Lectures on safety, welding and silver brazing processes, and nondestructive testing processes. Laboratory sessions are used to bring the student to a reasonable level of proficiency in welding (or brazing) pipe or plate. Repairs to welds and braze joints are also covered.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours lecture and 3 semester hours laboratory in welding processes, brazing processes, and nondestructive testing processes (10/89). Note: this course duplicates A-701-0031. Credit should not be awarded for both.

NV-1710-0115

SHIELDED METAL ARC WELDING

Course Number: A-701-0053.

Location: Submarine School, Groton/New London, CT.

Length: 2 weeks (80 hours).

Exhibit Dates: 2/85–Present.

Learning Outcomes: Upon completion of the course the student will be able to perform metal arc welding on ferrous materials. The student will be able to position the work, set up the equipment, select welding rod, weld, remove slag, visually inspect, and make repairs to the work.

Instruction: Lectures and practical exercises on safety precautions, equipment setup, equipment operation, welding techniques, and visual inspection and acceptance standards.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in basic welding (shielded metal arc) (10/89).

NV-1710-0116

FUEL GAS WELDING, BRAZING, AND CUTTING

Course Number: A-701-0054.

Location: Submarine School, Groton/New London, CT.

Length: 2 weeks (80 hours).

Exhibit Dates: 2/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to weld, braze, cut, and solder using fuel gases such as acetylene and propane. The student will be able to describe theory, equipment charcteristics and safety precautions involved with the welding. Student will be able to position the work, set up the equipment, perform the work, visually inspect it, and make repairs.

Instruction: Lectures and extensive practical exercises on the above subjects.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in basic gas welding, brazing, soldering, and cutting (10/89).

NV-1712-0001

WAUKESHA DIESEL ENGINE

Course Number: A-652-0037; J-651-0473; J-651-0477.

Location: Fleet and Mine Warfare Training Center, Charleston, SC.

Length: *Version 1:* 4 weeks (135 hours). *Version 2:* 5 weeks (145 hours).

Exhibit Dates: *Version 1:* 1/80–Present. *Version 2:* 7/73–12/79.

Objectives: To train enginemen to operate and maintain specific diesel engines and distilling plant and engineering plant systems.

Instruction: *Version 1:* A limited amount of lecture material on the design, construction and operating theory of a specific diesel engine is complimented by a major part of the course which is student centered practical laboratory exercises in the disassembly, diagnosis and assembly of a specific diesel engine. Troubleshooting and adjustment techniques are also taught in a practical laboratory situation. *Version 2:* Lectures and practical exercises in the operation and maintenance of specific diesel engines and distilling plant and engineering plant systems, including diesel engine construction, pump, and components; diesel engine systems, disassembly and reassembly procedure, alignment and troubleshooting; theory of distillation; principles, systems, and components of equipment; troubleshooting techniques; and engineering plant system, clutches and couplings, reduction gears, propellers and shafting, engine alignment, and main propulsion system operating procedure.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours of technical elective credit in automotive, diesel or heavy equipment technology (11/81). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in mechanical technology (4/74); in the upper-division baccalaureate category, 2 semester hours in diesel engines (4/74).

NV-1712-0002

1. DIESEL ENGINE/FAIRBANKS MORSE MAINTENANCE TECHNICIAN
2. SSN/SSBN DIESEL ENGINE (FAIRBANKS-MORSE) MAINTENANCE

Course Number: A-652-0046.

Location: *All Versions:* Submarine School Groton, New London, CT. *Version 1:* Fleet Ballistic Training Center, Charleston, SC; Naval Submarine Training Center, Pearl Harbor, HI; Submarine Training Facility, San Diego, CA.

Length: *Version 1:* 2 weeks (80 hours). *Version 2:* 5 weeks (150 hours).

Exhibit Dates: *Version 1:* 1/80–Present. *Version 2:* 12/71–12/79.

Objectives: To train enlisted personnel to maintain and repair the Fairbanks-Morse diesel engine.

Instruction: Lectures and practical exercises in Fairbanks-Morse diesel engine maintenance and repair, including diesel engine principles, components familiarization and maintenance procedures, engine fluid systems, scavenging blower, camshaft drive and bearings, tappet assemblies, fuel injection, engine timing, governor, engine control linkage, snorkel systems, and troubleshooting and corrective maintenance procedures.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in automotive technology (6/81). *Version 2:* In the upper-division baccalaureate category, 5 semester hours in diesel engines (4/74).

NV-1712-0003

FAIRBANKS-MORSE 38F5 1/4 DIESEL ENGINE

Course Number: F-652-020.

Location: Submarine School, Groton, CT.

Length: 2 weeks (60 hours).

Exhibit Dates: 4/70–1/88.

Objectives: To train enlisted personnel to maintain and repair the Fairbanks-Morse diesel engine.

Instruction: Lectures and practical exercises in Fairbanks-Morse diesel engine maintenance and repair, including diesel engine characteristics, component parts, fresh and salt water systems, lube oil system, vertical drive assembly, blower, starting air system, camshaft, timing and pump drive, fuel system, governor, fuel injection system, and troubleshooting and repair procedures.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in diesel engines (4/74).

NV-1712-0004

Mine Warfare Waukesha Diesel Engineman, Class C

Course Number: Not available.
Location: Mine Warfare Class C School, Charleston, SC.
Length: 3 weeks (120 hours).
Exhibit Dates: 1/69–6/73.
Objectives: To train enlisted personnel to maintain the Waukesha diesel engine.
Instruction: Lectures and practical exercises in Waukesha diesel engine maintenance, including engine system introduction; components familiarization; disassembly and reassembly procedures; turbocharger, water pumps, cooler, and fuel injector maintenance; and alignment, break-in, and troubleshooting procedures.
Credit Recommendation: In the upper-division baccalaureate category, 1 semester hour in diesel engines (4/74).

NV-1712-0005

GM-16-278A Diesel Engine Maintenance, Class C1
(Enginemen, Class C, General Motors 16-278A Diesel Engine)

Course Number: A-652-0021.
Location: Propulsion Engineering School, Great Lakes, IL.
Length: 2–3 weeks (90–100 hours).
Exhibit Dates: 5/73–Present.
Objectives: To train petty officers to perform the maintenance and repair of the GM 16-278A diesel engine.
Instruction: Lectures and practical exercises in GM 16-278A diesel engine maintenance and repair, including component parts operation, gear trains, engine timing, air intake and exhaust systems, centrifugal pumps and cooling systems, lubrication system, governor, speed control device, air starting and operating and troubleshooting procedures.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in diesel engine,automotive or heavy equipment technology (1/82).

NV-1712-0006

GM-12-567E/645E Diesel Engine Maintenance, Class C1
(Enginemen, Class C, General Motors 12-567E Diesel Engine)

Course Number: A-652-0022.
Location: Propulsion Engineering School, Great Lakes, IL.
Length: 2–3 weeks (90–92 hours).
Exhibit Dates: 6/73–Present.
Objectives: To train personnel in the maintenance and repair of the GM 12-567E diesel engine.
Instruction: Lectures and practical exercises in GM 12-567E diesel engine maintenance and repair, including component parts operation, engine timing, blowers, air intake and exhaust systems, centrifugal pumps and cooling systems, lubrication system, fuel system, governor, starting system operation, reversing reduction gear and clutch, maintenance procedures, starting, operating and troubleshooting procedures.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in diesel engine, automotive or heavy equipment technology (1/82).

NV-1712-0007

GM8-268A Diesel Engine Maintenance, Class C1
(Engineman Class C, General Motors 8-268A Diesel Engine)

Course Number: A-652-0020.
Location: Propulsion Engineering School, Great Lakes, IL.
Length: 2–3 weeks (90–120 hours).
Exhibit Dates: 5/73–Present.
Objectives: To train petty officers in the maintenance and repair of the GM 8-268A diesel engine.
Instruction: Lectures and practical exercises in GM 8-268A diesel engine maintenance and repair, including component parts operation, gear trains, engine timing, air intake and exhaust system, centrifugal pumps and cooling system, lubrication system, fuel system, governor, maintenance procedures, starting, operating and troubleshooting procedures.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in diesel engine technology, automotive or heavy equipment technology (1/82).

NV-1712-0008

Engineering Officer
(Engineer Officer)

Course Number: K-4H-2008; A-4H-0022.
Location: Fleet Training Center, San Diego, CA.
Length: 12–13 weeks (360–417 hours).
Exhibit Dates: 9/70–1/88.
Objectives: To train junior officers to perform as engineering officers in diesel- and steam-powered ships.
Instruction: Lectures and practical exercises in the operation of diesel- and steam-powered ships, including engineering department management, shipboard fire fighting, damage control; nuclear, biological, and chemical warfare defense; shipboard electrical systems; diesel propulsion principles; specific boiler operations; auxiliary machinery and steam propulsion machinery; officer administration; fuel oil system and cooling system; gauges and calibration; and operation of vertical, forced-draft blowers.
Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1712-0009

Assault Boat Engineer

Course Number: G-652-6160.
Location: Amphibious School, Little Creek, VA.
Length: 3 weeks (105 hours).
Exhibit Dates: 1/67–1/88.
Objectives: To train enlisted personnel in diesel engine and assault boat operation and maintenance.
Instruction: Lectures on diesel engine operation, component nomenclature, lubricating system, cooling system, fuel system, blowers, governors, fuel injection, hydraulic reverse gear, V drive, transmission, electrical systems, ramp winch, and overhaul and troubleshooting procedures.
Credit Recommendation: In the vocational certificate category, 3 semester hours in heavy equipment or diesel technology (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in heavy equipment or diesel technology (4/74).

NV-1712-0010

American Locomotive (ALCO 251C) Diesel Engine, Class C1
(Engineman, Class C, American Locomotive (ALCO 251-C) Diesel Engine)

Course Number: A-652-0056.
Location: Propulsion Engineering School, Great Lakes, IL.
Length: 3 weeks (99–120 hours).
Exhibit Dates: *Version 1:* 9/76–Present. *Version 2:* 4/73–8/76.
Objectives: To train petty officers to supervise the operation, maintenance, and repair of diesel engines.
Instruction: Lectures in diesel engine introduction; construction; turbocharger, intake, and exhaust systems; starting air systems; lubrication, fuel, and cooling systems; governors and instrumentation; PMS requirements; and engine operation and troubleshooting procedures.
Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in diesel technology (10/83). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in diesel technology (9/77).

NV-1712-0011

Engineman, Class A1

Course Number: A-652-0018.
Location: Service School Command, Great Lakes, IL.
Length: *Version 1:* 9 weeks (360 hours) *Version 2:* 6 weeks (240 hours) *Version 3:* Self-paced 3–4 weeks (160 hours). *Version 4:* Self-paced 5–6 weeks (236 hours). *Version 5:* 15 weeks (455 hours). *Version 6:* 12 weeks (373 hours).
Exhibit Dates: *Version 1:* 3/86–4/87. *Version 2:* 6/85–2/86 *Version 3:* 9/78–5/85. *Version 4:* 1/74–8/78. *Version 5:* 2/68–12/73. *Version 6:* 7/63–1/68.
Objectives: To train enlisted personnel to operate diesel-powered ship engines.
Instruction: For this course after 4/87 see NV-1712-0024. *All Versions:* Lectures and practical exercises in engine introduction; portable pumps; internal-combustion engine; lubrication, cooling, fuel, electrical, and transmission systems; diesel engines; auxiliary boilers; plants; and oil purification operation. *Version 1:* includes air-conditioning, refrigeration, fire-fighting systems, valve maintenance, and pump maintenance. *Version 3:* Instruction is self-paced and includes propulsion shafting. *Version 4:* Instruction is self-paced and includes hydraulic steering, refrigeration and distilling plants. *Version 5:* Instruction includes maintenance, materiel management, hydraulic steering, refrigeration and distilling plants. *Version 6:* Instruction includes mathematics, blueprint reading, tools and materials familiarization, temperature and measuring instruments, valves and pumps, gas turbine engines, damage control, fire fighting, hydraulic steering, refrigeration and distilling plants.
Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in diesels and plant auxiliaries, 2 in diesel laboratory (1/86). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in diesels and plant auxilliaries, and 1 in diesel laboratory (1/86). *Version 3:* In the upper-division baccalaureate category, 3 semester hours in marine diesel engine and power train or automotive and heavy equipment technology (1/82). *Version 4:* In the lower-division

baccalaureate/associate degree category, 3 semester hours in diesel mechanics and 2 as a technical elective in automotive and mechanical programs (9/77). *Version 5:* In the lower-division baccalaureate/associate degree category, 5 semester hours in diesel mechanics, and credit in automotive technology on the basis of institutional evaluation (4/74). *Version 6:* In the lower-division baccalaureate/associate degree category, 3 semester hours in diesel mechanics, and credit in automotive technology on the basis of institutional evaluation (4/74).

NV-1712-0012

Mine Warfare Packard Diesel Engineman (Class C)

Course Number: J-651-0475; A-652-039.

Location: Naval Schools, Charleston, SC.

Length: *Version 1:* 4 weeks (120 hours). *Version 2:* 2-3 weeks (69-90 hours).

Exhibit Dates: *Version 1:* 9/81-Present. *Version 2:* 9/70-8/81.

Objectives: To train enlisted personnel who have completed an introductory course in diesel engine fundamentals to a more advanced competency in the diagnosis, troubleshooting and repair of diesel engines.

Instruction: Lectures, demonstrations and practical exercises in diesel engine operation, maintenance, diagnosis, and overhaul, including turbosuperchargers, instruments, and controls; operating and construction data; cooling, lubrication, air intake, exhaust and fuel systems; engine maintenance and overhaul procedures; and engine timing, troubleshooting, testing, and starting procedures.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 4 semester hours in automotive or diesel technology, heavy equipment or a technical elective (11/81). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in diesel technology or heavy equipment (11/81).

NV-1712-0013

Depot Level Boat Repairman (Engineman)

Course Number: H-652-0060.

Location: Amphibious School, Coronado, San Diego, CA.

Length: 3 weeks (105 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train enginemen to operate, maintain, troubleshoot, and repair typical diesel marine engines.

Instruction: Lectures and practical exercises in the operation, maintenance, troubleshooting, and repair of typical diesel marine engines, including tune-up fundamentals, servicing and operation principles for camshafts, gear train and flywheel housings, pistons, rods and cylinder heads, air intake and exhaust systems, fuel oil systems, lubricating systems, and cooling systems and governors.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour as an elective in automotive or diesel technology (4/74).

NV-1712-0014

FM38D8 1/8 DR Diesel Engine, Class C1
(Engineman Fairbanks-Morse 38D 8 1/8 DR Diesel Engine)

Course Number: A-652-0023.

Location: Propulsion Engineering School, Great Lakes, IL.

Length: 2-3 weeks (65-120 hours).

Exhibit Dates: 6/73-Present.

Objectives: To train petty officers in diesel engine operation, maintenance, diagnosis, and repair.

Instruction: Lectures and practical exercises in diesel engine operation, maintenance, diagnosis, and repair, including engine construction, control and vertical drive, timing, lubrication system, fuel system, cooling system, air starting system, blowers, intake and exhaust system, governor, and planned maintenance and troubleshooting procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in diesel, automotive or heavy equipment technology (1/82).

NV-1712-0015

Basic Engineman, Class C1
(Enginemen Class C Basic Enginemen)

Course Number: A-652-0019.

Location: Propulsion Engineering School, Great Lakes, IL.

Length: 2-3 weeks (80-120 hours).

Exhibit Dates: 5/73-Present.

Objectives: To train enlisted personnel to operate diesel engines and to supervise engine room operations.

Instruction: Lectures and practical exercises in the operation of diesel engines and engine rooms, including fundamentals of diesel engines, instrumentation, diesel engine systems analysis, and construction and inspection of diesel engines and ancillary equipment, shafts, and gearing. Prior to 1979 the course included administration of engineering systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in diesel engine technology (10/83).

NV-1712-0016

Assault Boat Engineer

Course Number: H-652-5317.

Location: Amphibious School, Coronado, San Diego, CA.

Length: 3 weeks (105-113 hours).

Exhibit Dates: 7/66-1/88.

Objectives: To train personnel as assault boat engineers.

Instruction: Lectures and practical exercises in model 64HN9 and 6121-T diesel engines installed in landing craft, and in the operation and maintenance of ramp and steering machinery installed in LCVP's and LCM's, including basic diesel engine construction and operation, General Motors 64HN9 diesel engine familiarization, cylinder block and cylinder head overhaul, engine pump overhaul, engine disassembly and assembly, engine timing and adjustments, transmission, and troubleshooting.

Credit Recommendation: In the vocational certificate category, 3 semester hours in diesel engines (5/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in automotive technology (5/74).

NV-1712-0017

Enginemen, Diesel Engine, Class C

Course Number: Not available.

Location: Engineman Class C School, Great Lakes, IL.

Length: 6 weeks (185-190 hours).

Exhibit Dates: 7/63-12/68.

Objectives: To train enlisted personnel to maintain and repair fleet diesel engines.

Instruction: Lectures and practical exercises in the maintenance, repair, and operation of fleet diesel engines. Topics include diesel engine construction and operation, fuel systems, and individual units of instruction on specific power plants.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in diesel engine laboratory and lecture (7/74); in the upper-division baccalaureate category, 5 semester hours in diesel engine laboratory and lecture (7/74).

NV-1712-0018

Patrol Gunboat/PG/Engineering Systems Operator and Maintenance

Course Number: A-652-0032.

Location: Development and Training Center, San Diego, CA.

Length: 10 weeks (343 hours).

Exhibit Dates: 7/72-1/88.

Objectives: To provide personnel with the necessary skills and related knowledge to enable them to operate and perform shipboard maintenance on patrol gunboat engineering systems.

Instruction: Lectures and practical exercises in the principles of operation, maintenance, and repair of gas turbines, diesel engines and generators, reduction gears, controllable pitch propellers, air control systems, engineering subsystems, generators, and switchboards.

Credit Recommendation: In the vocational certificate category, 3 semester hours in boat mechanics (5/74).

NV-1712-0019

Detroit Diesel V71 Series Engine Maintenance, Class C1

Course Number: A-652-0080.

Location: Service School Command, Great Lakes, IL.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/77-1/88.

Objectives: To train selected petty officers to supervise performance of scheduled and unscheduled maintenance, diagnosis and repair of the Detroit Diesel V71 engine.

Instruction: Areas of instruction include engine construction, fuel systems, lubrication, cooling, governors, tune up and maintenance procedures, starting, operating procedures and troubleshooting.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in diesel engine operation, repair and maintenance (9/77).

NV-1712-0020

Diesel Engine Technician, Class C1

Course Number: A-652-0035; A-652-0020; A-652-0021; A-652-0022.

Location: Service School Command, Great Lakes, IL.

Length: 9 weeks (300 hours).

Exhibit Dates: 5/73-1/88.

Objectives: To train selected petty officers to supervise the maintenance and repair of diesel engines.

Instruction: This course is a combination of A-652-0020, GM 268A Diesel Engine, Class C1 (NV-1712-0007), A-652-0021, GM-12-278A Diesel Engine, Class C1 (NV-1712-0005), and A-652-0022, GM-12-567E/645E Diesel Engine, Class C1 (NV-

1712-0006). Topics cover the maintenance and repair of the specified diesel engines.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in diesel engine technology (9/77).

NV-1712-0021

Aviation Support Equipment Detroit Series 53 Diesel Intermediate Maintenance

(Aviation Support Equipment UD-282 and Detroit Series 53 Diesel Engines Intermediate Maintenance)

Course Number: C-602-3213.

Location: Naval Air Station, Jacksonville, FL; Naval Air Station, North Island, CA.

Length: 2-3 weeks (96 hours).

Exhibit Dates: *Version 1:* 7/83-Present *Version 2:* 7/80-6/83.

Objectives: To train support equipment technicians in maintenance and repair of diesel engines.

Instruction: *All Versions:* Lectures and practical exercises in the maintenance, repair and troubleshooting of diesel engines including system analysis using applicable publications, test equipment, special tools and safety precautions.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in automotive shop (4/85); in the lower-division baccalaureate/associate degree category, 1 semester in diesel engine maintenance (4/85). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in diesel engine maintenance (3/82).

NV-1712-0022

Caterpillar D-399 Diesel Engine Maintenance

Course Number: A-652-0173.

Location: Service School Command, Great Lakes, IL.

Length: 3 weeks (120 hours).

Exhibit Dates: 5/81-Present.

Objectives: To provide enginemen and equipment operators with specific knowledge and skills to operate and maintain the Caterpillar D-399 diesel engine.

Instruction: Lectures and practical exercises in the maintenance and operation of the Caterpillar D-399 diesel engine, including lubrication, coating water, fuel, intake and exhaust (turbo charges) and governor systems. Troubleshooting with specialized testing equipment is also done.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in diesel engine maintenance and repair (1/82).

NV-1712-0023

Detroit Diesel Allison 16V149TI Ships Service Diesel Generator Maintenance

(Model 114 Ship Service Diesel Generator Set Maintenance Class C1)

Course Number: A-652-0166.

Location: Service School Command, Great Lakes, IL.

Length: 3 weeks (120 hours).

Exhibit Dates: 9/75-Present.

Objectives: To train personnel to operate and perform general maintenance on the 16V-149TI GM diesel engine.

Instruction: Lectures and practical exercises in the routine operation of the 16V-149TI GM diesel engine, including cooling, fuel, lubrication, air intake and exhaust systems. Start and perform routine maintenance and minor adjustments.

Credit Recommendation: In the vocational certificate category, 2 semester hours in diesel maintenance (10/83).

NV-1712-0024

Engineman Class A, Class A1

Course Number: A-652-0018.

Location: Service Schools Command, Great Lakes, IL.

Length: 9 weeks (344 hours).

Exhibit Dates: 5/87-Present.

Learning Outcomes: Upon completion of the course, the student will be able to function as an entry level diesel engine operator and perform basic maintenance and repair functions on diesel engines and auxiliary systems.

Instruction: Lectures and practical exercises in engines including portable pumps, internal combustion engines, diesel engines and lubrication, cooling, fuel, electrical and transmission systems, and auxiliary boilers. The course includes air conditioning, refrigeration, fire-fighting systems and valve and pump maintenance.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in diesel engines and power plant auxiliaries and 2 in diesel engine laboratory (6/88).

NV-1712-0025

1182 Propulsion System Technician

Course Number: A-652-0054.

Location: Service Schools Command, Great Lakes, IL.

Length: 19 weeks (760 hours).

Exhibit Dates: 7/86-Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate, maintain, overhaul and repair medium speed, marine diesel engines of various manufacture; and operate, maintain and troubleshoot a KAMEWA controllable pitch propeller.

Instruction: Lectures and practical exercises in the operation, maintenance and troubleshooting of variable-pitch ship propellers and associated control equipment including applications of hydraulics and pneumatics, analysis of electrical control circuits, and mechanical components.

Credit Recommendation: In the vocational certificate category, 5 semester hours in diesel engine maintenance and 3 in pneumatic/hydraulic control systems maintenance (6/88); in the lower-division baccalaureate/associate degree category, 3 semester hours in diesel engine technology (6/88).

NV-1712-0026

Master Marine Diesel Mechanic Maintenance

Course Number: A-652-0305.

Location: Service Schools Command, Great Lakes, IL.

Length: 15 weeks (600 hours).

Exhibit Dates: 7/86-Present.

Learning Outcomes: Upon successful completion of the course, the student will be able to operate, maintain, overhaul and repair medium speed Marine diesel engines.

Instruction: Lectures and practical exercises in diesel engine construction, operation, maintenance, overhaul and repair as it applies to a wide variety of medium speed Marine diesel engines. Topics include: construction, turbocharging, diesel auxiliary systems and control systems.

Credit Recommendation: In the vocational certificate category, 5 semester hours in diesel engine maintenance (6/88); in the lower-division baccalaureate/associate degree category, 3 semester hours in diesel engine technology (6/88).

NV-1712-0027

FFG-7 Auxiliary 16V149TI Diesel Engine Maintenance

Course Number: A-652-0306.

Location: Service Schools Command, Great Lakes, IL.

Length: 5 weeks (180 hours).

Exhibit Dates: 7/86-Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify components and explain fundamental operating principles of 2-stroke and 4-stroke diesel engines, perform designated scheduled maintenance on components and systems of diesel engines in general, and perform designated scheduled maintenance, troubleshoot and perform limited corrective maintenance on the DDA 16V149TI diesel engine.

Instruction: Classroom and practical exercises in diesel engine maintenance covering the following topics: diesel engine construction and operating principles, shaft alignment principles and practices, diesel engine systems, diesel engine troubleshooting, detailed construction, maintenance, timing operation and troubleshooting of DDA 16V149TI diesel engines.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in diesel engine technology and 1 in diesel engine operation and maintenance (6/88).

NV-1712-0028

Trident Submarine Diesel Engine Maintenance

Course Number: A-652-0150.

Location: Submarine Training Facility, Kings Bay, GA; Submarine Training Facility, Charleston, SC; Submarine Training Facility, San Diego, CA; Submarine School, Groton/New London, CT; Submarine Training Center Pacific, Pearl Harbor, HI; Submarine Training Facility, Norfolk, VA; Trident Training Facility, Bangor, Bremerton, WA.

Length: 2 weeks (79 hours).

Exhibit Dates: 2/88-Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform standard preventive maintenance procedures on a medium speed diesel engine, troubleshoot and repair diesel engine faults.

Instruction: Lecture and laboratory exercises in the construction, operation, and maintenance of auxiliary diesel engines.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in diesel engine technology. Credit listed in this course does not duplicate credit for Trident Diesel Engine Supervisor, A-652-0267 (NV-1712-0029) (2/89).

NV-1712-0029

Trident Diesel Engine Supervisor

Course Number: A-652-0267.

Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.

Length: 1 week (53 hours).

Exhibit Dates: 6/85-Present.

Learning Outcomes: Upon completion of the course, the student will be able to troubleshoot and repair diesel engine faults.

Instruction: Lecture and laboratory exercises in the theory of operation, construction, and maintenance of auxiliary diesel engines. Emphasis on lubrication and governor systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in diesel engine technology. Credit listed for this course is not duplicated in Trident Submarine Diesel Engine Maintenance, A-652-0150 (NV-1712-0028) (2/89).

NV-1712-0030

Trident Submarine Auxiliary
Equipment Technician Level III

Course Number: A-652-0142.

Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.

Length: 2 weeks (97 hours).

Exhibit Dates: 6/85–Present.

Learning Outcomes: See individual exhibits for learning outcomes. This is a pipeline course.

Instruction: See exhibits NV-1712-0029 (A-652-0267) and NV-1701-0011 (A-652-0265).

Credit Recommendation: See individual exhibits for credit recommendation (2/89).

NV-1712-0031

Fairbanks-Morse 38F 5 1/4 Diesel
Maintenance Technician

Course Number: A-652-0236.

Location: Submarine School, Groton/New London, CT.

Length: 1–2 weeks (65 hours).

Exhibit Dates: 1/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to describe diesel operation and maintenance. Student will be able to operate, troubleshoot and perform maintenance on diesel engines.

Instruction: Lectures and laboratory in diesel operation and maintenance subjects including construction and assembly of components, fuel injection systems, governors, turbochargers, lubrication, and timing.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour lecture and 1 in laboratory in diesel engine technology (10/89). (May be applied to an automotive technology program.)

NV-1713-0001

Engineering Aids, Class B
(EA "J")

Course Number: A-412-0015.

Location: Construction Training Center, Port Hueneme, CA; Construction Training Center, Gulfport, MS.

Length: 15–16 weeks (450–480 hours).

Exhibit Dates: 5/64–1/88.

Objectives: To train petty officers to be civil technicians.

Instruction: Lectures and practical exercises in foremanship, mathematics, construction, drafting, construction surveys, triangulation and field astronomy, map projections, planning and estimating, advance-base planning, soils testing, bituminous materials and concrete testing.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 10 semester hours in construction surveying and drafting (5/74); in the upper-division baccalaureate category, 6 semester hours in construction surveying, 3 in drafting (12/68).

NV-1713-0002

Illustrator Draftsman, Class A

Course Number: Not available.

Location: Construction School, Port Hueneme, CA.

Length: 15 weeks (450 hours).

Exhibit Dates: 5/63–12/68.

Objectives: To train enlisted personnel to be draftsmen.

Instruction: Lectures and practical exercises in mathematics, basic drafting, machine drafting, ship and aircraft structural drafting, electrical and electronic drafting, media, visual aids, methods of reproduction, and screen processes reproduction.

Credit Recommendation: In the vocational certificate category, 6 semester hours in basic drafting (5/74); in the upper-division baccalaureate category, 3 semester hours in basic drafting (12/68).

NV-1714-0001

EC-130Q Electrical Systems and
Circuits Organizational
Maintenance

Course Number: None.

Location: Naval Air Maintenance Training Detachment, El Toro, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 3/70–1/88.

Objectives: To train maintenance personnel to maintain, service, and functionally test the EC-130Q electrical systems and circuits at the organizational maintenance level.

Instruction: Electrical power supplies, circuits, and miscellaneous electrical systems; utility and fuel systems; power plants and propeller systems as they pertain specifically to the EC-130Q.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (11/73).

NV-1714-0002

Electrician's Mate Enlisted
Maintenance

Course Number: A-662-018.

Location: Naval Destroyer School, Newport, RI.

Length: 4 weeks (117 hours).

Exhibit Dates: 12/69–1/88.

Objectives: To provide a knowledge of basic electrical theories and systems and to inculcate necessary basic repair and maintenance skills.

Instruction: Basic electrical theory and application; equipment familiarization.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (11/73).

NV-1714-0003

Electrician's Mate Maintenance,
Class C1
(Electrician's Mate Maintenance, Class P)

Course Number: A-651-0025.

Location: Fleet Training Center, San Diego, CA; Naval Development and Training Center, San Diego, CA.

Length: 3 weeks (90 hours).

Exhibit Dates: *Version 1:* 11/76–Present. *Version 2:* 11/72–12/75.

Objectives: To provide electrician-supervisors with practical training in maintenance and repair procedure of ship's electrical installations.

Instruction: *Version 1:* Lectures and laboratory exercises in electrical machine operation, safety and maintenance including electric motor theory, motor controllers, alternators, regulators (including solid state regulators), basic magnetism, magnetic amplifiers, degaussing, cathodic equipment, lead and batteries, starter motors, battery charge systems and their application to shipboard systems. *Version 2:* Engineering department administration; electrical systems operations and safety precaution; disassembly, adjustment, and reassembly of electrical rotating equipment, measuring instruments, motors, motor controllers, voltage regulators, magnetic amplifiers, static exciters, gyros, and small-boat electrical systems.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in electrical machine systems and controls (5/82). *Version 2:* In the vocational certificate category, 2 semester hours in electrical technology (11/73).

NV-1714-0004

Missile Launcher System Mk 24
Maintenance - Electrical

Course Number: A-121-0267.

Location: Fleet Ballistic Missile Training Center, Charleston, SC; Naval Submarine School, Groton, New London, CT.

Length: 2 weeks (96 hours).

Exhibit Dates: 8/78–Present.

Objectives: To provide missile technicians with skills needed to maintain and repair electrical portions of the Mk 24 missile launcher system.

Instruction: Lectures and laboratory exercises in the electrical and electro mechanical components of the Mk 24 missile launcher system including maintenance and repair philosophy and techniques; safety procedures, flow diagrams, circuit breakers, and alignment tool and calibration.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electrical and electro mechanical system maintenance (3/81).

NV-1714-0005

1. Electrical Distribution and
   Control Equipment Combined
   Maintenance
2. Electrical Distribution and
   Control

Course Number: A-662-0025; F-662-011.

Location: Naval Submarine School, Groton, New London, CT.

Length: 2 weeks (60–72 hours).

Exhibit Dates: *Version 1:* 4/73–Present. *Version 2:* 11/72–3/73.

Objectives: To train students to inspect, maintain, adjust, and repair electrical distribution and control equipment installed in nuclear submarines.

Instruction: *Version 1:* Lectures and exercises in electrical switchboards, circuit breakers and circuit breaker control circuitry, AC controllers, coolent pump controllers and DC starters. *Version 2:* Includes electrical switchboards; air, motor-operated, and arc-quenching circuit breakers; coolant pump control circuitry, AC controllers and DC starters.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in electrical distribution and maintenance (6/81). *Version 2:* Credit is not recommended because of the limited technical nature of the course (11/73).

NV-1714-0006

Aviation Ordnanceman (Utility),
Class A

Course Number: None.

Location: Air Technical Training Center, Jacksonville, FL.

Length: 11 weeks (440 hours).

Exhibit Dates: 3/57-12/68.

Objectives: To train enlisted personnel to inspect, test, and maintain aviation ordnance.

Instruction: Lectures and practical exercises in basic electricity, aircraft munitions, bomb- and torpedo-handling equipment, weapons, and munitions handling.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in electricity on the basis of institutional evaluation (3/74).

NV-1714-0007

Aviation Ordnanceman (Turret),
Class A

Course Number: None.

Location: Air Technical Training Center, Jacksonville, FL.

Length: 11 weeks (440 hours).

Exhibit Dates: 3/57-12/68.

Objectives: To train enlisted personnel to inspect, test, and maintain aviation ordnance and to perform maintenance on aircraft turrets.

Instruction: Lectures and practical exercises in basic electricity, aircraft munitions, bomb- and torpedo-handling equipment, weapons, munitions handling, and aircraft turrets.

Credit Recommendation: In the vocational certificate category, credit in electricity on the basis of institutional evaluation (3/74).

NV-1714-0008

Construction Electrician, Class A
(CE "A")

Course Number: *Version 1:* A-721-0018. *Version 2:* A-721-0018; A-721-018; A-721-0021; A-721-021. *Version 3:* None.

Location: Construction Training Center, Port Hueneme, CA; Construction Training Center, Gulfport, MS. *Version 2:* Construction School, Davisville, RI. *Version 3:* Construction School, Davisville, RI.

Length: *Version 1:* 8 weeks (241 hours). *Version 2:* 14 weeks (420 hours). *Version 3:* 14 weeks (420-432 hours).

Exhibit Dates: *Version 1:* 12/74-1/88. *Version 2:* 10/69-11/74. *Version 3:* 7/58-9/69.

Objectives: To train enlisted personnel to perform as electricians and linemen.

Instruction: Lectures and practical experience in basic electrical theory, telephone communication, interior wiring, pole line construction, motors and generators, mathematics review, and electrical blueprint reading.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in power generation and distribution and 2 in residential house wiring (7/76). *Version 2:* In the vocational certificate category, 7 semester hours in electricity (3/74); in the lower-division baccalaureate/associate degree category, credit in electricity on the basis of institutional evaluation (3/74). *Version 3:* In the vocational certificate category, 7 semester hours in electricity (3/74); in the lower-division baccalaureate/associate degree category, credit in electricity on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, credit in electricity on the basis of institutional evaluation (3/74).

NV-1714-0009

1. Basic Electricity and Electronics, (Modules 1-14)
2. Basic Electricity and Electronics, Class AP (Modules 0-25)
3. Basic Electricity and Electronics, Class P
   (Basic Electricity Phase of Class A Electronics Technician School)

Course Number: *All Versions:* A-100-0010; A-100-010. *Version 2:* A-100-011.

Location: Basic Electricity/Electronics School, Great Lakes, IL; Basic Electricity/Electronics School, Millington, TN; Basic Electricity/Electronics School, Memphis, TN; Basic Electricity/Electronics School, Treasure Island, CA; Basic Electricity/Electronics School, Orlando, FL; Basic Electricity/Electronics School, San Diego, CA.

Length: *Version 1:* Self-paced average 2-6 weeks (132 hours). *Version 2:* Self-paced average 1-8 weeks (150-264 hours). *Version 3:* 4-8 weeks (162-215 hours).

Exhibit Dates: *Version 1:* 7/78-Present. *Version 2:* 6/75-6/78. *Version 3:* 4/55-5/75.

Objectives: To provide enlisted personnel with training in basic electricity/electric circuits.

Instruction: *All Versions:* Lectures and laboratories in magnetism, field patterns, domain theory, Coulomb's law; AC generator operation; DC circuits, including resistor characteristics, voltage dividers, power calculations, and Kirchhoff's laws; AC circuits, including average, effective, and peak values, and phasor use; inductance and capacitance, including basic properties, types, universal time constant, reactance, and phase relationship; transformer introduction; and AC circuits impedance, phasor solutions, band width, filters, and resonance in series. *Version 1:* A self-paced course that does not include magnetism, field patterns, domain theory, AC generator operation and Coulomb's law. *Version 2:* Also includes self-paced modules in basic electronics maintenance, basic circuit assembly and repair, troubleshooting simple amplifiers, power supply circuits, simple transistor circuitry, oscillator, multivibrator circuits, wave shaping circuitry, and some special solid state devices.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity/electric circuits. *Version 2:* In the lower-division baccalaureate/associate degree category. For gunner's mates (GM), torpedoman's mates (TM), construction electrician's (CE), and enginemen (EN), 3 semester hours in basic electronics; for all other ratings, 6 semester hours in basic electronics (9/77). *Version 3:* In the vocational certificate category, 3 semester hours in basic electricity (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in basic electricity (12/68); in the upper-division baccalaureate category, 1 semester hour in electrical laboratory for non-engineering majors (3/74).

NV-1714-0010

Construction Electrician, Class J (CE "J")
(Construction Electrician, Class B)

Course Number: *Version 1:* A-721-0019, A-721-0022. *Version 2:* Not available.

Location: Construction Training Center, Port Hueneme, CA; Construction Training Center, Gulfport, MS; Construction School, Davisville, RI.

Length: *Version 1:* 17 weeks (510 hours). *Version 2:* 15-16 weeks (450-480 hours).

Exhibit Dates: *Version 1:* 7/70-1/88. *Version 2:* 3/64-6/70.

Objectives: To train enlisted personnel to be construction electricians.

Instruction: *All Versions:* Lectures and practical exercises in basic electrical theory, power distribution, interior wiring, local and common battery telephone, interoffice communication systems, cable splicing and fault location, and AC motors. *Version 1:* Instruction includes electric power plant operation and maintenance.

Credit Recommendation: *Version 1:* In the vocational certificate category, 9 semester hours in electricity (7/76); in the lower-division baccalaureate/associate degree category, credit in electricity on the basis of institutional evaluation (7/76). *Version 2:* In the vocational certificate category, 8 semester hours in electricity (3/74); in the lower-division baccalaureate/associate degree category, credit in electricity on the basis of institutional evaluation (3/74).

NV-1714-0011

H-46 Electrical and Instrument
Systems Organizational
Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, New River, NC; Air Maintenance Training Detachment, Santa Ana, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 6/68-1/88.

Objectives: To train maintenance personnel to maintain a specific electrical and instrument system.

Instruction: Lectures and practical exercises in the maintenance of the H-46 electrical and instrument system, including elements of power distribution, electrical power supply, starting and control systems, utility electric systems, and instruments and indicating systems.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1714-0012

1. Electrician's Mate, Class A
2. Electrician's Mate, Class A1
3. Electrician's Mate, Class A1
4. Electrician's Mates, Class A
   (Electrician's Mates, Class A, Part II Power and Lighting Equipment)

Course Number: *All Versions:* A-662-0016. *Version 2:* A-662-0015.

Location: Service School Command, Great Lakes, IL. *Version 2:* Service School Command, San Diego, CA.

Length: *Version 1:* 10 weeks (408 hours). *Version 2:* 6-7 weeks (240 hours). *Version 3:* 8-9 weeks (258 hours). *Version 4:* 13-14 weeks (387-420 hours).

Exhibit Dates: *Version 1:* 4/84-6/87. *Version 2:* 2/79-3/84. *Version 3:* 3/76-1/79. *Version 4:* 6/62-2/76.

Objectives: To train enlisted personnel to operate, maintain, and repair electrical equipment.

Instruction: For this course after 6/87 see NV-1714-0044. *All Versions:* Lectures and practical exercises in electrical equipment operation, maintenance, and repair, including safety precautions and first aid, rotating-machinery introduction, AC and DC generators, rotary and magnetic amplifiers, handtools operation, maintenance and materiel management, single-phase motors, degaussing, AC and DC controllers, electrohydraulics and electropneumatics, and small-craft electrical systems. *Version 1:* Instruction includes power panels, power distribution networks, lighting distribution, three phase motors and generators, heating and refrigeration systems, solid state controllers and emergency power distribution. *Version 2:* Instruction includes three phase motors and generators and solid state controls. *Version 3:* Instruction includes three phase motors and generators and solid state controls. *Version 4:* Instruction includes solid-state controls of motors.

Credit Recommendation: *Version 1:* In the vocational certificate category, 5 semester hours in motors, generators, and power distribution systems operation and maintenance (1/86); In the lower-division baccalaureate/associate degree category, 3 semester hours AC/DC generator motors and controllers and 1 in motor/generator laboratory (1/86). *Version 2:* In the vocational certificate category, 5 semester hours in motors, generators and power systems operation and maintenance (1/82); in the lower-division baccalaureate/associate degree category, 2 semester hours in motors, generators and power systems laboratory (1/82). *Version 3:* In the vocational certificate category, 5 semester hours in electricity and electrical laboratory (9/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity (9/77). *Version 4:* In the vocational certificate category, 6 semester hours in electricity and electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity and electrical laboratory (12/68); in the upper-division baccalaureate category, 3 semester hours in industrial education (3/74).

NV-1714-0013

E-1B ELECTRICAL AND INSTRUMENT SYSTEMS ORGANIZATIONAL MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA; Air Maintenance Training Detachment, Norfolk, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 8/68–1/88.

Objectives: To train maintenance personnel to operate and maintain the electrical and instrument systems of the E-1B aircraft.

Instruction: Lectures and practical exercises in the operation and maintenance of the electrical and instrument systems of the E-1B aircraft, including power supplies, power plant and accessories, controls, various circuits, structural control systems, heating and de-ice systems, fuel and oxygen systems, lighting systems, various electrical instruments, and Pitot and static instruments.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1714-0014

KA-3A/KA-3B ELECTRICAL AND INSTRUMENTS ORGANIZATIONAL MAINTENANCE

Course Number: C-602-3702; C-602-43.

Location: Air Maintenance Training Detachment, Whidbey Island, WA.

Length: 2 weeks (64 hours).

Exhibit Dates: 1/70–1/88.

Objectives: To train maintenance personnel to operate and maintain electrical equipment and instruments at the organizational level.

Instruction: Lectures and practical exercises in the operation and maintenance of electrical equipment and instruments, including DC and AC power, power plant accessories, actuators, lighting, heater and safety equipment, fuel quantity, light maintenance, various circuits, engine instruments, and the position-indicating, Hytrol anti-skid brake, air conditioning, and pressurization systems.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74)).

NV-1714-0015

CONSTRUCTION ELECTRICIAN—POWER AND COMMUNICATIONS CABLE SPLICING

(Construction Electrician Cable Splicer (Class C))

(CE "C" Cable Splicing)

Course Number: A-721-0023.

Location: Construction Training Center, Port Hueneme, CA; Construction Training Center, Gulfport, MS; Construction School, Davisville, RI.

Length: 11-13 weeks (345–406 hours).

Exhibit Dates: 11/72–1/88.

Objectives: To train construction electricians to perform as cable-splicing technicians for telephone and power cable systems.

Instruction: Lectures and practical exercises in the installation and repair of telephone and power cables, including cable types, splicing techniques, and installation of telephone and high-voltage cables, cable termination, project planning, electrical properties of power cable insulation, and troubleshooting techniques and test equipment.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electrical equipment maintenance (7/76); in the lower-division baccalaureate/associate degree category, credit in electrical equipment maintenance on the basis of institutional evaluation (7/76).

~NV-1714-0016

ELECTRIC MOTOR REWIND, CLASS C

Course Number: A-662-0021.

Location: Fleet Training Center, Norfolk, VA; Naval Training Center, San Diego, CA.

Length: 5 weeks (150-160 hours).

Exhibit Dates: *Version 1:* 9/75–1/88. *Version 2:* 8/73–8/75.

Objectives: To train enlisted personnel in the techniques and procedures used in winding AC and DC motors.

Instruction: Lectures and practical exercises in the recording of data; construction of wiring diagrams; rewinding, assembling, and testing of DC motors, single-phase AC motors, and three-phase AC motors.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in electric motor repair laboratory, 1 in electric motor repair (5/82). *Version 2:* in the lower-division baccalaureate/associate degree category, 2 semester hours in AC/DC motors (6/75).

NV-1714-0017

7L16 OXYGEN GENERATOR TECHNICIAN

(7L16 Oxygen Generator Electrical Support Technician)

Course Number: A-623-0035.

Location: Fleet Ballistic Missile Training Center, Charleston, SC; Naval Submarine School, Groton, CT; Naval Submarine School, New London, CT.

Length: 2 weeks (72-80 hours).

Exhibit Dates: 12/71–Present.

Objectives: To provide enlisted personnel training in electrical troubleshooting and repair of an oxygen generator.

Instruction: Lectures and practical exercises in the operation, service and maintenance of the electrical components of the Treadwell 7L16 oxygen generator including basic theory of components controlled by electrical devices.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (10/89).

NV-1714-0018

VARIABLE SPEED CONTROLLERS COMBINED MAINTENANCE

Course Number: A-662-0040.

Location: Naval Submarine School, Groton, CT; Naval Submarine School, New London, CT; Naval Submarine School, Charleston, SC; Naval Submarine School, Pearl Harbor, HI.

Length: 1-2 weeks (33–80 hours).

Exhibit Dates: 3/72–Present.

Objectives: To train students in the theory, operation and maintenance of four types of variable speed AC motor controllers.

Instruction: Lectures and practical exercises in four types of variable speed AC motor controllers including functional characteristics, modes of operation and controls. Theory to the component level, corrective maintenance using schematics,signal flow and operating sequence is also covered. The student learns to interpret malfunctions, isolate faults tothe component level, and repair, align, adjust and calibrate the controllers. The course includes a basic semiconductor review and in depth theory, operation, and the corrective and preventive maintenance of variable voltage-variable frequency controller at the component level. Equipment studied includes the McCarr SIX-SCR variable voltage controller, the G.E. variable voltage/frequency controller, the G.E. variable frequency controller and the Cutler Hammer variable voltage/frequency controller.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electrical machinery controllers (11/85).

NV-1714-0019

AVIATION SUPPORT EQUIPMENT TECHNICIAN ELECTRICAL

Course Number: C-000-3263.

Location: Naval Air Station, Jacksonville, FL; Naval Air Station, North Island, CA.

Length: 2 weeks (64 hours).

Exhibit Dates: 12/78–Present.

Objectives: To provide non-electrical maintenance personnel with electrical and electronic familiarization, and electrical safety procedures and practices.

Instruction: Lectures and practical exercises in basic electricity including DC circuits, magnetism, transformers, generators, transistors, electrical safety, soldering and troubleshooting principles and procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electrical fundamentals for non-electrical engineering students (3/82).

NV-1714-0020

BASIC ELECTRICITY AND ELECTRONICS - MODULES 15-25

Course Number: A-100-0010.

Location: Service School Command, San Diego, CA; Service School Command, Orlando, FL; Service School Command, Great Lakes, IL.

Length: Self-paced 5-12 weeks (200-480 hours).

Exhibit Dates: 4/77-Present.

Objectives: To provide enlisted personnel with training in electronic equipment theory and maintenance.

Instruction: Programmed instruction and laboratory exercises in soldering techniques, technical manuals, oscilloscope operation, basic troubleshooting of RF, IF, AF and power amplifiers, solid state power supplies, electron tube power supplies, basic transistor theory, oscillators, multivibrators, wave shaping circuits, unijunction transistors and SCR's.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electronics (1/82).

NV-1714-0021

BASIC ELECTRICITY AND ELECTRONICS - MODULES 30-34

Course Number: A-100-0010.

Location: Service School Command, San Diego, CA; Service School Command, Orlando, FL; Service School Command, Great Lakes, IL.

Length: Self-paced 3 weeks (120 hours).

Exhibit Dates: 7/80-Present.

Objectives: To provide basic technical knowledge and skills in electrical and electronic theory and application as a prerequisite for additional training.

Instruction: Individualized instruction at a nonmathematical level and laboratory troubleshooting experience on regulated and nonregulated power supplies including SCR power supplies; RF, IF and video amplifiers; oscillators both electronic and crystal controlled; delay lines; optical electronic devices; and linear integrated operational amplifiers.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic devices (1/82).

NV-1714-0022

FFG-7 AUXILIARY ELECTRICAL SUBSYSTEM MAINTENANCE CLASS C1

Course Number: A-652-0172.

Location: Service School Command, Great Lakes, IL.

Length: *Version 1:* 4 weeks (160 hours). *Version 2:* 3 weeks (120 hours).

Exhibit Dates: *Version 1:* 7/81-8/87. *Version 2:* 3/80-6/81.

Objectives: To train electricians in the maintenance of auxiliary electrical subsystems.

Instruction: For this course after 8/87 see NV-1714-0043. Lectures and practical exercises in the operation, maintenance and troubleshooting of incinerator, air compressor, palet elevator, cooling water, propulsion, air conditioning and oil-water separation electrical control systems.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in electrical controls maintenance laboratory (10/83). *Version 2:* In the vocational certificate category, 2 semester hours in electrical controls maintenance (1/82).

NV-1714-0023

FFG-7 ENGINEERING SYSTEM MAINTENANCE MANAGEMENT, ELECTRICAL, CLASS C1

Course Number: A-652-0154.

Location: Service School Command, Great Lakes, IL.

Length: 7 weeks (280 hours).

Exhibit Dates: 7/79-Present.

Objectives: To train mechanical technicians in the theory of operation and maintenance management of shipboard electrical control systems.

Instruction: Group lectures and individual practice in the theory of operations, capabilities, limitations and management of shipboard electrical control systems.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course.

NV-1714-0024

GAS TURBINE SYSTEMS TECHNICIAN ELECTRICAL CLASS A1

Course Number: A-652-0178.

Location: Service School Command, Great Lakes, IL.

Length: 10 weeks (400 hours).

Exhibit Dates: 3/80-Present.

Objectives: To train technicians to maintain gas turbine electrical systems.

Instruction: Lectures, demonstrations and exercises in DVM's, oscilloscope, lead acid storage batteries, blueprint reading, transformers, motors, 3 phase AC motor controllers, AC generators, magnetic amplifiers, number systems, BCD code, logic symbols, Boolean algebra, and digital circuits.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electric generator plant maintenance (1/82); in the lower-division baccalaureate/associate degree category, 2 semester hours in digital logic (1/82).

NV-1714-0025

400 HZ MOTOR GENERATOR ELECTRICAL SYSTEM MAINTENANCE

Course Number: A-662-0023.

Location: Service School Command, Norfolk, VA; Service School Command, San Diego, CA.

Length: 6 weeks (228 hours).

Exhibit Dates: 7/74-Present.

Objectives: To train personnel in the preventive and corrective maintenance of 400 HZ motor generator systems.

Instruction: Lectures and practical demonstrations in the preventive and corrective maintenance of 400 HZ motor generator systems including basic electronics, motor-generator maintenance and repair, power supply and transistor and magnetic amplifiers.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in basic electricity, 1 in basic electricity laboratory (5/82).

NV-1714-0026

INTERIOR COMMUNICATIONS (IC) ELECTRICIAN CLASS A

Course Number: A-623-0105.

Location: Service School Command, San Diego, CA.

Length: Self-paced 7 weeks (245 hours).

Exhibit Dates: 10/80-Present.

Objectives: To provide personnel with technical knowledge and skills to maintain, at the organizational level, interior communication equipment.

Instruction: Self-paced instruction with A/V laboratory demonstrations and practical laboratory applications covering: digital logic, hardware and number systems; motor/generator/rectifier maintenance; telephone, switchboard, announcing and alarm systems/equipment; and different types of transducers and transmitters including syncro devices and systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in digital fundamentals, 1 in syncro systems, 1 in telephone systems (5/82).

NV-1714-0027

MINESWEEPING ELECTRICIAN'S MATE

Course Number: J-647-0019.

Location: Fleet and Mine Warfare Training Center, Charleston, SC.

Length: 8 weeks (280 hours).

Exhibit Dates: 1/72-Present.

Objectives: To train foreign and U.S. Navai personnel to operate and maintain minesweeping equipment found on board minesweeping vessels.

Instruction: Lectures and laboratory instruction in installing, operating, maintaining and repairing degaussing and and minesweeping ships and equipment utilizing the principles of magnetism and electricity. Laboratory includes the use of equipment such as meters, generators, M.G. sets, VTVM, oscilloscopes, magnometers, signal amplifiers and fault logic amplifiers.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electrical theory (3/83).

NV-1714-0028

MINEMAN CLASS A

Course Number: J-647-0016.

Location: Fleet and Mine Warfare Training Center, Charleston, SC.

Length: 12 weeks (520 hours).

Exhibit Dates: 8/81-Present.

Objectives: To provide designated personnel with the necessary skills and related knowledge to perform final preparation, upgrading maintenance and safety for the assurance of reliable mine warfare weapons.

Instruction: Lectures and laboratory instruction in identifying, handling, maintaining and repairing equipment utilizing equipment, manuals and directives that meet all safety and quality assurance requirements needed to produce reliable mine warfare weapons and support equipment.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/83).

NV-1714-0029

FFG-7/DD-963 60/40 HZ STATIC FREQUENCY CONVERTER MAINTENANCE

Course Number: A-652-0243.

Location: Service School Command, Great Lakes, IL.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/82-Present.

Objectives: To train personnel in maintenance and troubleshooting procedures for a 60 to 400 Hz converter.

Instruction: Lectures and practical exercises in the theory of operation, component function, and maintenance and troubleshooting procedures for a converter including rectifier circuits and digital control circuits.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electrical control systems troubleshooting laboratory (10/83).

NV-1714-0030

FFG-7 Class Ship Auxiliary
Electrical Subsystem Technician

Course Number: A-662-0120.

Location: Service School Command, Great Lakes, IL.

Length: 10 weeks (400 hours).

Exhibit Dates: 2/81–Present.

Objectives: To train personnel to operate and perform corrective maintenance on electrical auxiliary subsystem components installed in FFG-7 class ships.

Instruction: This is a pipeline course consisting of the following courses: NV-1402-0020, NV-1714-0022 and NV-1704-0262.

Credit Recommendation: Please refer to the above listed exhibits for our credit recommendations (11/83).

NV-1714-0031

FFG-7 Auxiliary Electrical Systems
Maintenance

Course Number: A-652-0215.

Location: Service School Command, Great Lakes, IL.

Length: 2 weeks (80 hours).

Exhibit Dates: 2/81–Present.

Objectives: To train electricians in the maintenance of shipboard auxiliary electrical systems.

Instruction: Lectures and practical exercises in the operation, maintenance and troubleshooting of auxiliary electrical systems including a diesel generator static exciter, electric distribution switchboards and 400 Hz line voltage regulators.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electrical controls maintenance; 1 semester hour if this course is taken in conjunction with other courses cited in exhibit NV-1732-0010 (A-662-0121).

NV-1714-0032

AN/USM-403 Electrical System
Equipment Test Set
Intermediate Maintenance

Course Number: C-198-3678.

Location: Naval Air Station, North Island, San Diego, CA.

Length: 11 weeks (440 hours).

Exhibit Dates: 4/85–Present.

Objectives: to provide electronic maintenance personnel training in the maintenance and repair of an electrical equipment test set.

Learning Outcomes: Upon completion of this course the student will be able to perform the following tasks: computer functional checkout, operator interface circuit card analysis, diagnosis of program system procedures, circuit board analysis of various circuits including use of AC/DC power supply, function generator, sampling measurement system, and frequency standard and test station troubleshooting at the board or component level.

Credit Recommendation: In the vocational certificate category, 6 semester hours in computer maintenance and repair laboratory (4/85); in the lower-division baccalaureate/associate degree category, 2 semester hours in computer maintenance laboratory, 1 semester hour in computer systems applications (4/85).

NV-1714-0033

S-3A Electrical Systems
Organizational Maintenance

Course Number: C-602-3676.

Location: Naval Air Station, North Island, San Diego, CA.

Length: 8 weeks (320 hours).

Exhibit Dates: 3/84–Present.

Objectives: To familiarize enlisted personnel with aircraft electrical and instrument systems.

Learning Outcomes: Upon completion of the course, the student will have a basic understanding of the following S-3A aircraft systems: electrical power generation and distribution systems, electronic control systems, electromechanically operated systems, flight and navigation instrument systems and will be familiar with troubleshooting procedures using limited test equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in aircraft electrical systems (4/85).

NV-1714-0034

S-3A Electrical System Intermediate
Maintenance

Course Number: C-602-3680.

Location: Naval Air Station, North Island, San Diego, CA.

Length: 3 weeks (112 hours).

Exhibit Dates: 4/83–Present.

Objectives: To train personnel in the maintenance and repair, to the component level, of an automatic flight control system.

Learning Outcomes: Upon completion of the course, the student, will maintain and repair the following avionic components, assemblies and procedures: pressure temperature testing, automatic altitude encoders and test sets, pitch trim activators, angle of attack systems, liquid quantity gaging systems, antiskid wheel speed transducer, control logic assembly and an automatic flight control system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in aviation maintenance systems (4/85).

NV-1714-0035

SH-2F Electrical Component
Intermediate Maintenance

Course Number: C-602-4386.

Location: Naval Air Station, North Island, San Diego, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 1/85–Present.

Objectives: To train aviation technicians in the principles of operation, repair and maintenance of the aircraft's electrical system.

Learning Outcomes: Upon completion of the course, the student will be able to troubleshoot, repair and maintain to the component level the following electrical components of a military helicopter: search and landing lights, fuel control activators, blade tracking activator controllers and fuel quantity bridge amplifiers.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electromechanical laboratory (4/85).

NV-1714-0036

SH-2F Electrical System
Organizational Maintenance

Course Number: C-602-3395.

Location: Naval Air Station, Norfolk, VA; Naval Air Station, North Island, San Diego, CA.

Length: 2 weeks (77 hours).

Exhibit Dates: 6/80–Present.

Objectives: To train aviation technicians to analyze, troubleshoot, repair and maintain the electrical systems of the SH-2F helicopter.

Learning Outcomes: Upon completion of the course, the student will be able to service and maintain the following components of a helicopter: AC/DC power supplies, the lighting system, flight instrumentation, landing gear electrical circuits, cockpit blade tracking, rescue hoist, heating/ventilation, defogging, and miscellaneous utility systems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electromechanical maintenance (4/85).

NV-1714-0037

SH-60B Electrical System
Organizational Maintenance

Course Number: C-602-4406.

Location: Naval Air Station, Mayport, FL; Naval Air Station, North Island, San Diego, CA.

Length: 4 weeks (174 hours).

Exhibit Dates: 2/84–Present.

Objectives: To train aviation electricians in the theory of operation, troubleshooting, repair and maintenance of the electrical systems of a helicopter.

Learning Outcomes: Upon completion of the course, the student will be able to test, troubleshoot, repair and maintain, to the block diagram level, the following aspects of the SH-60B helicopter: the AC/DC power system, caution advisory system, hydraulic power system, engine electric system, as well as the fuel, fire protection, power train, blade/pylon fold, de-ice/anti-ice, interior/exterior lighting and landing gear.

Credit Recommendation: In the vocational certificate category, 2 semester hours in aircraft systems maintenance laboratory, 1 in electromechanical laboratory (4/85); in the lower-division baccalaureate/associate degree category, 1 semester hour in aircraft systems maintenance (4/85).

NV-1714-0038

MMG-1A Mobile Electric Power
Plant Intermediate
Maintenance

Course Number: C-602-3237.

Location: Naval Air Station, Jacksonville, FL; Naval Air Station, North Island, San Diego, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 3/84–Present.

Objectives: To train aviation electrical technicians to repair and maintain a mobile electrical power plant.

Learning Outcomes: Upon completion of the course, the student will be able to operate, troubleshoot, repair and maintain the following elements of a mobile electric power plant to the component level: AC/DC control circuits, AC/DC voltage regulation, frequency regulation and protection circuits.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electric power laboratory (4/85).

NV-1714-0039

FFG-7 Electrical Plant Control Console Operator Electrical Maintenance

Course Number: A-652-0249.

Location: Naval Training Center, Great Lakes, IL.

Length: 5 weeks (200 hours).

Exhibit Dates: 7/84–Present.

Objectives: To qualify personnel for electric power plant control panel operation.

Instruction: Lecture and practical exercises in engine room and electric power plant operations. The student learns about systems operation and intersystem influences. The student learns operating procedures and operats an electric power plant simulator. General instruction on fuel oil quality assurance, and personal hearing and heating stress physiology and prevention programs.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electric power plant operation laboratory and 1 in occupational safety (1/86).

NV-1714-0040

FFG-7 Electrical Plant Control Console Operator Mechanical Maintenance

Course Number: A-652-0251.

Location: Naval Training Center, Great Lakes, IL.

Length: 5 weeks (200 hours).

Exhibit Dates: 7/84–Present.

Objectives: To qualify personnel for electric power plant control panel operation.

Instruction: Lecture and practical exercises in engine room and electric power plant operations. The student learns about systems operation and intersystem influences, operating procedures and operates an electric power plant simulator. General instruction on fuel oil quality assurance and personal hearing and heat stress physiology and prevention programs.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electric power plant operation laboratory and 1 in occupational safety (1/86).

NV-1714-0041

FFG-7 Electrical Systems Maintenance

Course Number: A-652-0253.

Location: Naval Training Center, Great Lakes, IL.

Length: 5 weeks (200 hours).

Exhibit Dates: 2/84–Present.

Objectives: To train personnel in the operation and maintenance of data acquisition equipment for the FFG-7 Gas Turbine Power Plant.

Instruction: Lectures and laboratory exercises in operation, calibration and maintenance of analog and digital circuits used to monitor and control gas turbine power plants.

Credit Recommendation: In the vocational certificate category, 3 semester hours in operation and maintenance of electronic monitoring and control equipment (1/86).

NV-1714-0042

CV Catapult Electrician

Course Number: C-604-2013.

Location: Naval Air Technical Training Center, Lakehurst, NJ.

Length: 4 weeks (156 hours).

Exhibit Dates: 3/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to maintain and repair catapult electrical systems and associated equipment.

Instruction: Lectures and practical exercises in control sequence, safety in hazardous conditions and environments, operation, maintenance and repair of electrical systems and related components including engine system, launching recovery systems and tension systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electrical system maintenance, 2 in electrical systems troubleshooting and schematic interpretation (6/87).

NV-1714-0043

FFG-7 Class Ship Auxiliary Electrical Subsystems

Course Number: A-652-0172.

Location: Service Schools Command, Great Lakes, IL.

Length: 4 weeks (120 hours).

Exhibit Dates: 9/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to troubleshoot common malfunctions in unidynamic 1211-1 pallet elevator control systems, incinerator control systems, auxiliary propulsion unit control systems, and air conditioning fan coil unit control systems.

Instruction: Lectures and practical exercises in the operation, maintenance and troubleshooting of incinerator, air compressor, pallet elevator, cooling water, propulsion, air conditioning and oil-water separator electrical control systems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electrical control systems maintenance (6/88).

NV-1714-0044

Electrician's Mate Class 'A'

Course Number: A-662-0016.

Location: Service Schools Command, Great Lakes, IL.

Length: 21 weeks (840 hours).

Exhibit Dates: 7/87–Present.

Learning Outcomes: Upon completion of the course, the student will have a fundamental understanding of basic electricity and electronics, solid state devices, digital logic, switchgear, single and multiphase motors, motor starter and controller circuits, AC/DC generators, soldering techniques and first aid. The student is taught how to interpret logic and schematic diagrams and the use of electronic test equipment in identifying and correcting problems related to shipboard electrical machinery and galley equipment. The student is given instruction on how to plan and conduct a preventive maintenance program.

Instruction: Lecture and practical laboratories in magnetism, inductive and capacitive circuits, power factor, phase angles, motors and generators, DC circuits, voltage dividers, power calculations, and Kirchhoff's Laws, AC and DC generators, single and multiphase motors, motor control circuits, solid state theory, digital logic theory, maintenance and material management.

Credit Recommendation: In the vocational certificate category, 3 semester hours in solid state electronics and 2 in technical mathematics (6/88); in the lower-division baccalaureate/associate degree category, 4 semester hours in DC circuits, 4 in AC circuits, and 3 in AC/DC motors, generators, and controllers (6/88).

NV-1714-0045

SD/P Elevator System Maintenance Technician

Course Number: A-690-0079.

Location: Service Schools Command, Great Lakes, IL.

Length: 1 week (40 hours).

Exhibit Dates: 2/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to interpret control system drawings for FFG-7 pallet elevators; troubleshoot common malfunctions of control system; and perform preventive and corrective maintenance on pallet elevator controls.

Instruction: Classroom and practical exercises covering the nomenclature, physical construction, and automatic electrical control system and including operation, maintenance and repair of a pallet elevator.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electrical control systems maintenance (6/88).

NV-1714-0046

500 KW 60 HZ Motor Generator Set Electrical Maintenanece

Course Number: A-662-0125.

Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.

Length: 1 week (48 hours).

Exhibit Dates: 11/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform electrical preventive maintenance procedures with supervision on ships service motor generator (SSMG) set.

Instruction: Lecture and laboratory exercises in construction, maintenance and theory of operation of DC/AC motor generator sets. Emphasis on controllers and electrical troubleshooting.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electromechanical technology laboratory (2/89).

NV-1714-0047

500 KW 60 HZ Motor Generator Set Mechanical Maintenance

Course Number: A-662-0102.

Location: Trident Training Facility, Kings Bay, GA; Trident Training Facility, Bangor, Bremerton, WA.

Length: 2 weeks (64 hours).

Exhibit Dates: 11/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform mechanical preventive maintenance with supervision on ships service motor generator set, troubleshoot and repair ships service motor generator for mechanical faults.

Instruction: Lecture and laboratory exercises in construction, maintenance and theory of operation of DC/AC motor generator set. Emphasis on mechanical features and troubleshooting.

Credit Recommendation: In the lower-division baccalaureate/associate degree cate-

gory, 2 semester hours in electromechanical technology laboratory (2/89).

NV-1714-0048

LAMPS Mk 3 Horizon Reference Set Maintenance,

Course Number: K-652-2203.
Location: Fleet Training Center, Norfolk, VA; Fleet Training Center, San Diego, CA.
Length: 1-2 weeks (62 hours).
Exhibit Dates: 8/87-Present.
Learning Outcomes: Upon completion of the course the student will be able to perform electrical maintenance, troubleshoot, and repair the horizontal reference system (a subsystem of a helicopter shipboard landing system) and its components.
Instruction: Lectures and practical exercises on the subject matter.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electrical control systems (3/89).

NV-1714-0049

400 Hertz Maintenance

Course Number: J-662-0023.
Location: Fleet Training Center, Norfolk, VA; Service School Command, San Diego, CA.
Length: 5-6 weeks (232 hours).
Exhibit Dates: 11/84-Present.
Learning Outcomes: Upon completion of the course the student will be able to troubleshoot and maintain 400 Hz motor generators and voltage and frequency regulators under shipboard conditions.
Instruction: Instructional methods include lectures and supporting laboratories in analyzing, locating and repairing faults in 400Hz voltage and frequency regulators.
Credit Recommendation: In the vocational certificate category, 3 semester hours in industrial electricity (3/89).

NV-1714-0050

Electrical Control Devices

Course Number: J-662-0044.
Location: Fleet Training Center, Norfolk, VA.
Length: 3-4 weeks (144 hours).
Exhibit Dates: 11/79-Present.
Learning Outcomes: Upon completion of the course the student will be able to troubleshoot and maintain AC relay motor controllers, small craft electrical systems and charging systems.
Instruction: Lectures and laboratory exercises to demonstrate operational theory, troubleshooting techniques, and safety practices with relay-operated controllers.
Credit Recommendation: In the vocational certificate category, 3 semester hours in electromechanical control systems troubleshooting and maintenance (3/89).

NV-1714-0051

Aviation Electrican's Mate, Class A1

Course Number: C-601-2012.
Location: Naval Air Technical Training Center, Memphis, Millington, TN.
Length: 21-22 weeks (869 hours).
Exhibit Dates: 12/88-Present.
Learning Outcomes: Upon completion of the course the student will be able to maintain aircraft electrical, electronic, and engine instrument systems.
Instruction: Lectures and practical exercises in DC and AC circuits, vacuum tubes, rectifiers, filters, amplifiers, basic test instruments, electrical indicating systems, fuel quality systems, compasses, automatic pilots, instrument checks and troubleshooting.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in DC circuits, 4 in aircraft electrical systems, 3 in aircraft electronic systems and 2 in aircraft instrumentation systems (9/89).

NV-1714-0052

Aviation Electrician's Mate Intermediate, Class C7

Course Number: C-602-2014.
Location: Naval Air Technical Training Center, Memphis, Millington, TN.
Length: 26-27 weeks (1049 hours).
Exhibit Dates: 10/86-Present.
Learning Outcomes: Upon completion of the course the student will be able to use standard and specialized test equipment to effect detailed preventive and corrective maintenance of electrical and electronic circuitry on common avionics weapons systems.
Instruction: Lectures and practical exercises including technical mathematics, technical physics, AC circuit analysis, solid state electronics, operational amplifiers, analog and digital computers, DC theory, and avionics.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in technical mathematics, 2 in physics, 4 in solid state electronics, 5 in AC circuits, 4 in introduction to computers, 1 in introduction to avionics, and 3 in operational amplifiers (9/89).

NV-1714-0053

Submarine Main Power Generating Equipment

Course Number: A-662-0137.
Location: Submarine School, Groton/New London, CT; Submarine Training Facility, Charleston, SC; Guided Missile School Detachment, Dam Neck, VA; Submarine Training Center, Pacific, Pearl Harbor, HI.
Length: 2 weeks (80 hours).
Exhibit Dates: 2/87-Present.
Learning Outcomes: Upon completion of the course the student will be able to describe magnetic amplifiers and AC and DC power generation, regulation and control and will be able to repair, troubleshoot and maintain magnetic amplifiers and controllers.
Instruction: Lectures, demonstrations, and laboratory exercises in electric power generation, regulation and control.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour lecture and 1 semester hour laboratory in electric power generation and regulation (10/89).

NV-1714-0054

Submarine Electrical Control and Distribution Equipment Combined Maintenance

Course Number: A-662-0136.
Location: Submarine School, Groton/New London, CT; Submarine Training Facility, Charleston, SC; Guided Missile School Detachment, Dam Neck, VA; Submarine Training Center, San Diego, CA.
Length: 2 weeks (77 hours).
Exhibit Dates: 2/87-Present.
Learning Outcomes: Upon completion of the course the student will be able to describe electrical control and distribution equipment and operate and maintain circuit protection and motor control.
Instruction: Lectures and laboratory instruction in electrical control and distribution equipment.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electric power systems control (10/89).

NV-1715-0001

Basic Electronics (MA-40)

Course Number: R-100-6209.
Location: Naval Air Reserve Training Command, U.S.A.
Length: 6 weeks (240 hours).
Exhibit Dates: 9/68-2/69.
Objectives: To provide selected reserve personnel (on active duty) of the Naval Air Reserve Training Command with the opportunity to become familiar with basic theoretical knowledge, safety, and alignment/troubleshooting procedures of the superheterodyne receiver and basic transmitter.
Instruction: Applied mathematics and essentials of electronics; series/parallel circuitry and magnetism; measuring devices; introduction to AC theory; AC circuits and resonance; electron principles and the diode; vacuum tube theory; amplifier circuits and systems; transmitters; receiver theory; transmission line, antenna, and wave-propagation theory; and semiconductor theory.
Credit Recommendation: In the vocational certificate category, 10 semester hours in electronics (11/73); in the upper-division baccalaureate category, 2 semester hours in electronics, and credit in electrical laboratory on the basis of demonstrated skills and/or institutional evaluation (11/73).

NV-1715-0002

Airborne Electronic Warfare, Class O

Course Number: None.
Location: Naval Air Technical Training Center, Glynco, GA.
Length: 8 weeks (304 hours).
Exhibit Dates: 5/68-1/88.
Objectives: To train fleet personnel in electronic warfare principles and systems.
Instruction: Electronic countermeasures principles and systems; processing procedures; electronic countermeasures aircraft systems; electronic emissions; and electronic warfare.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (11/73).

NV-1715-0003

ELINT Evaluation Operator/Officer

Course Number: D-150-016.
Location: Reconnaissance Attack Squadron Three, Naval Air Station, Albany, GA.
Length: 11 weeks (430 hours).
Exhibit Dates: 5/69-1/88.
Objectives: To train officer and enlisted personnel to efficiently process and evaluate electronic intelligence data collected by RA-5C aircraft.
Instruction: IOIS Systems Cross-Training; basic ELINT intelligence; data display; ELINT evaluation; dissemination; maintenance consideration; operational problems; fleet operations; electronic data processing;

photo interpretation; electronic countermeasures; teletype; digital plotter.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (11/73).

NV-1715-0004

AN/UPR-2 Ionospheric Sounder Set Maintenance (Electronics Technician, Class C1)

Course Number: A-101-0047.

Location: Service School Command, San Diego, CA.

Length: 4 weeks (119-120 hours).

Exhibit Dates: 5/71-1/88.

Objectives: To provide selected trainees with the skills and related knowledge necessary to operate and maintain the AN/UPR-2 Oblique Ionospheric Sounder.

Instruction: Operation and system maintenance, including transmitted wave form and functional block diagram; technical maintenance, including frequency standard, master timing and programming, filter switching, frequency synthesizer, and digital code filter.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics (11/77).

NV-1715-0005

Electronic Test Equipment Operation/Operational Use

Course Number: J-100-0700.

Location: Fleet Training Center, Mayport, FL.

Length: 2 weeks (57 hours).

Exhibit Dates: 11/71-1/88.

Objectives: To train shipboard electronics maintenance and repair personnel in the correct methods of operation and application of electronic test equipment.

Instruction: Equipment theory of operation; equipment operational methods and techniques; successful utilization of electronic test equipment.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics (11/73).

NV-1715-0006

Electronics Technician Class C, AN/SPS-40A Radar Set Maintenance

Course Number: A-104-0050; A-104-0131.

Location: Naval Schools Command, Norfolk, VA; Naval Schools Command, San Diego, CA.

Length: 8 weeks (231-240 hours).

Exhibit Dates: 1/72-1/88.

Objectives: To provide selected trainees with the skills and knowledge necessary to operate and maintain the AN/SPS-40A, and to operate and use associated test equipment.

Instruction: Power conversion; AN/SPS-40A radar set operation; and functional analysis of maintenance units and subunits such as antenna, air pressure and cooling systems.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (11/73).

NV-1715-0007

Electronics Technician, Class C, Electronics Material Officer

Course Number: A-4B-019.

Location: Naval School, Norfolk, VA.

Length: 4 weeks (97 hours).

Exhibit Dates: 7/70-1/88.

Objectives: To provide selected officers with the necessary knowledge and skill to enable them to direct the administration of the electronics division aboard their ship.

Instruction: Administration; maintenance and materiel management systems; preventive and corrective maintenance; publications; field changes; electronic navigation, radar, communication, and electronic countermeasures systems.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (11/73).

NV-1715-0008

Electronics Technician, Class C, AN/SSM-5 Monitor Test Set Maintenance

Course Number: A-100-0022; A-100-0030.

Location: Naval School, San Diego, CA; Naval School, Norfolk, VA.

Length: 4 weeks (120 hours).

Exhibit Dates: 1/72-1/88.

Objectives: To provide selected trainees with the skills and knowledge necessary to maintain the AN/SSM-5 monitor test set.

Instruction: Test set operation; basic operation of tape reader and line printer; power distribution; tape format and sequence; logic symbols and special circuits; test control block-diagram analysis; tape reader; parity and coincidence control; tape drive control; sequence counter and control; stimuli control; analog-to-frequency converter; decision comparator; digital data line printer; associated test equipment; preventive maintenance; troubleshooting.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (11/73).

NV-1715-0009

AN/UCC-1 Series Telegraph Terminal Maintenance (Electronics Technician, Class C1)

Course Number: A-101-0022; A-101-022; A-101-023.

Location: Service School Command, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: 2 weeks (60-80 hours).

Exhibit Dates: *Version 1:* 2/80-Present. *Version 2:* 1/70-1/80.

Objectives: To provide the skills and knowledge necessary to operate and maintain the AN/UCC-1, 1C, and 1D telegraph terminals, and to operate and use associated test equipment to the extent required for maintenance of the telegraph terminals.

Instruction: Operational characteristics and system configurations; location and identification of major units and subunits; test sets; operating procedures; AC and DC power distribution; frequency shift keyers; control attenuators; frequency shift converters; block and schematic diagram analysis; system troubleshooting.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in electronic troubleshooting (5/82). *Version 2:* In the vocational certificate category, 1 semester hour in electronics laboratory (11/77).

NV-1715-0010

AN/WRC-1 Radio Set Maintenance (Electronics Technician, Class C1)

Course Number: A-101-0029.

Location: Service School Command, San Diego, CA; Fleet Training Group, Pearl Harbor, HI.

Length: 2 weeks (59-60 hours).

Exhibit Dates: 3/71-1/88.

Objectives: To provide selected trainees with the skills and knowledge necessary to maintain the AN/WRC-1 radio set.

Instruction: Operation and familiarization; functional block diagram; radio receiver technical maintenance; frequency standard assembly; R-F amplifier; translator-synthesizer assembly; mode selector; I-F assemblies; chassis and main frame; troubleshooting; operation and maintenance of radio transmitter; FSK tone generator; audio amplifier; mode selector; I-F amplifier; antenna coupler operation and maintenance.

Credit Recommendation: In the vocational certificate category, 1 semester hour in communications systems (11/77).

NV-1715-0011

AN/WRT-2 Radio Transmitter Maintenance (Electronics Technician, Class C1)

(Electronics Technician Class C, AN/WRT-2 and AN/WRR-2)

Course Number: A-101-0031; A-101-0033; A-101-0032.

Location: Service School Command, San Diego, CA; Fleet Training Center, Norfolk, VA; Naval Technical Training Command, San Francisco, CA.

Length: 3-4 weeks (90-110 hours).

Exhibit Dates: 1/71-1/88.

Objectives: To provide selected trainees with the skills and knowledge necessary to maintain the AN/WRT-2 radio transmitting set.

Instruction: Operation of and familiarization with AN/WRT-2; AC/DC power distribution; modulator functional section-amplifier/power supply; RF amplifier and tuner functional section, RF amplifier; transmitter troubleshooting.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic communications systems (11/77).

NV-1715-0012

Electronics Technician, Class C, AN/UXH-2B Facsimile Recording Equipment Maintenance

Course Number: A-101-0035; A-101-0050.

Location: Naval School, San Diego, CA; Naval School, Norfolk, VA.

Length: 3 weeks (60 hours).

Exhibit Dates: 5/71-1/88.

Objectives: To provide selected trainees with the skills and knowledge necessary to operate and maintain the AN/UXH-2B and CV-1066B/UX, and to operate and use associated test equipment.

Instruction: Maintenance and material management; introduction to AN/UXH-2B and CV-1066B/UX; operating procedures and safety; converter analysis and maintenance; recorder set analysis; troubleshooting.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (11/73).

NV-1715-0013

Electronics Technician, Indicator Group AN/SPA-40, Class C

Course Number: A-104-019; A-104-020.

Location: Naval School, San Diego, CA; Naval School, Norfolk, VA.

Length: 2 weeks (60 hours).

Exhibit Dates: 10/69–1/88.

Objectives: To provide selected trainees with the skills and knowledge necessary to operate and maintain the AN/SPA-40 range/height indicator, and to operate and use associated test equipment.

Instruction: Familiarization and operation, including location and identification of units, assemblies, and subassemblies; technical maintenance, including AC power distribution, auto zero correction, DC power supplies, timing, height line cursor generation and servomechanism, range sweep deflection, height sweep deflection, marker generation and video amplifier, and intensity control; system maintenance and troubleshooting.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (11/73).

NV-1715-0014

Electronics Technician, Ship's Navigation and Aircraft Inertial Alignment System (SNAIAS), Class C Operator Maintenance

Course Number: A-193-025.

Location: Naval School, Norfolk, VA.

Length: 2 weeks (72 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To train students to operate and maintain ship's navigation and aircraft inertial alignment systems (SNAIAS).

Instruction: Familiarization and operation, including SNAIAS functional block diagram, equipment, modes of operation, and alarms; technical maintenance, including block diagrams, data distribution, intercommunications system, test sets, troubleshooting.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (11/73).

NV-1715-0015

AN/SPN-40 Radio Navigation Set (Electronics Technician, Class C1)

Course Number: A-102-0080; A-102-0085.

Location: Service School Command, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: 2 weeks (60 hours).

Exhibit Dates: 8/71–1/88.

Objectives: To train students to operate and maintain the AN/SPN-40 radio navigation set.

Instruction: Equipment operation and familiarization; technical maintenance, including Loran A receiver and vertical deflection, oscillator-AFC section, framing section, divider section, rate selector and reset generator section, basic pulse repetition rate (BPRR), specific pulse repetition rate (SPRR), square wave generator, pedestal generator, deflection section, attenuator and gain control, and system troubleshooting.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics laboratory (11/77).

NV-1715-0016

Electronics Technician Class C, AN/VCC-2 Shipboard System

Course Number: None.

Location: Naval School, San Diego, CA; Naval School, Norfolk, VA.

Length: 3 weeks (96 hours).

Exhibit Dates: 10/71–1/88.

Objectives: To provide selected trainees with the skills and related knowledge necessary to maintain the AN/VCC-2 shipboard communications system.

Instruction: Maintenance and material management system; operation of and familiarization with the RT-524/VRC radio transmitter-receiver; functional analysis and maintenance of the receiver transmitter, including AC/DC power distribution and control circuits, VHF tuner and squelch assembly, modulator assembly, master oscillator and buffer amplifier, transmitter driver and power amplifier, power supply, and transistor adapter; functional analysis of the AN/VCC-2 telephone-telegraph terminal; functional analysis of the AN/SRA-60(V) antenna coupler, including RF, four-channel combiner, operational control section, monitoring and protection section, and power supply.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (11/73).

NV-1715-0017

Basic Electronic Warfare (EW) Equipment Operator

Course Number: K-233-0025; K-233-281.

Location: Fleet Anti-Air Warfare Training Center, San Diego, CA.

Length: 2 weeks (59 hours).

Exhibit Dates: 5/71–1/88.

Objectives: To train enlisted personnel in the fundamentals and techniques of electronic warfare (EW) and EW equipment operation.

Instruction: Fundamentals of electronic warfare; electronic warfare support measures; signal recognition; analysis and evaluation; electronic countermeasures; equipment theory and operation; electronic intelligence collection procedures and ESM reporting procedures; basic electronic counter-countermeasures.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (11/73).

NV-1715-0018

Electronics Technician, Class C, Indicator Group AN/SPA-41 Maintenance

Course Number: A-104-0124.

Location: Naval School, Norfolk, VA.

Length: 3 weeks (80 hours).

Exhibit Dates: 7/70–1/88.

Objectives: To train technicians to operate and maintain the AN/SPA-41 Shipboard Range/Height Indicator and associated test equipment.

Instruction: System familiarization and operational characteristics; location and identification of units, assemblies, and subassemblies; operating procedures; technical maintenance, including AC power distribution, auto zero correction, DC power supplies, timing, height line cursor generation and servomechanism, range and height computing section, range and height time share networks and sweep deflection, and range calibration, marking, and intensity; system troubleshooting.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (11/73).

NV-1715-0019

Electronics Technician Class C, AN/FGC-73 Teletypewriter Routing Set and AN/UGR-14 Inktronic Page Printer

Course Number: A-101-0048.

Location: Naval School, Great Lakes, IL.

Length: 6 weeks (180 hours).

Exhibit Dates: 11/72–6/77.

Objectives: To train students to maintain and program teletypewriter routing sets, the Inktronic page printer, and associated test equipment.

Instruction: Teletypewriter familiarization; message format; introduction to AN/FGC-73 system; logic fundamentals; core memories; TS-2723/FG-73 printed circuit board test; MX-8173/FGC format stripper; AN/UGR-14 Inktronic Page Printer; system maintenance and packaging of reparables.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (11/73).

NV-1715-0020

Electronic Warfare for Nonacoustic Operator, P3A/B(D)

Course Number: E-210-48.

Location: Fleet Aviation Specialized Operational Training Group, Pacific Fleet, Moffett Field, CA.

Length: 2 weeks (63 hours).

Exhibit Dates: 10/72–1/88.

Objectives: To train antisubmarine warfare operators in electronic warfare intercept procedures, terminology, applications, and the skills of signal evaluation.

Instruction: Introduction to and definition of electronic warfare; ESM fundamentals; radar scans and types; passive receiver system AN-ALD-2B; pulse analyzer AN-ULA-2; pulse analyzer cameras; tactical voice procedures; electronic warfare logs; intercept procedures; electronic warfare; and signal identification.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (11/73).

NV-1715-0021

Electronic Warfare Intelligence Operator

Course Number: E-221-34.

Location: Fleet Airborne Electronics Training Unit, Pacific, San Diego, CA.

Length: 4 weeks (132 hours).

Exhibit Dates: 10/72–1/88.

Objectives: To train aircrew members in the fundamentals, techniques, and terminology of electronic warfare (EW), and in the operation of EW equipment.

Instruction: History of electronic warfare; radar fundamentals; EW equipment and operation; electronic intelligence (ELINT) operator procedures; logging; signal identification; ELINT publications familiarization; special intercept techniques; plotting; tactical missions.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (11/73).

NV-1715-0022

Electronic Warfare Officers and Supervisors Course

Course Number: K-2G-0013.

Location: Fleet Combat Direction Systems Training Center, Pacific, San Diego, CA.

Length: 2 weeks (58 hours).

Exhibit Dates: 5/72–1/88.

Objectives: To train junior officers and senior enlisted radarmen in the fundamentals and techniques of electronic warfare (EW) and electronic intelligence (ELINT).

Instruction: Concepts of electronic warfare; duties and responsibilities of the EWO and supervisor; characteristics of electronic emissions; rapid and thorough evaluation of intercepted electronic emissions; threat radars and IFF systems; EW capabilities and ELINT.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (11/73).

NV-1715-0023

OFFICER ELECTRONIC WARFARE OPERATIONS

Course Number: K-2G-0026.

Location: Fleet Combat Direction Systems Training Center, Pacific, San Diego, CA.

Length: 4 weeks (117 hours).

Exhibit Dates: 5/72-1/88.

Objectives: To train officers in the fundamentals and techniques of electronic warfare.

Instruction: Fundamentals of electronic warfare; fundamentals of electromagnetic radiation; electronic systems theory; friendly use of the electromagnetic spectrum; intelligence in support of electronic warfare; electronic warfare management; electronic warfare in support of military operations.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (11/73).

NV-1715-0024

ELECTRONICS TECHNICIAN, CLASS C, AN/SPS-29 RADAR SET

Course Number: A-104-0031.

Location: Naval Technical Training, Treasure Island, San Francisco, CA.

Length: 4 weeks (120 hours).

Exhibit Dates: 7/72-1/88.

Objectives: To provide selected trainees with the skills and related knowledge necessary to maintain the AN/SPS-29 radar set.

Instruction: System operation; AC and DC power distribution; trigger generator and monitor function; transmitting channel; antenna function; receiving channel; AN/SPS-29 radar set maintenance and troubleshooting.

Credit Recommendation: Credit is not recommended due to the limited, technical nature of the course (11/73).

NV-1715-0025

ELECTRICAL COMPONENT MAINTENANCE (UNREP)

(UNREP Electrical Component Maintenance United Controls)

Course Number: A-551-0026; A-551-0030.

Location: UNREP Schools Division of the Naval Schools Command, Treasure Island, San Francisco, CA.

Length: 10 weeks (294 hours).

Exhibit Dates: 12/68-1/88.

Objectives: To train electricians and interior communications specialists to maintain the electronic and electronic-hydraulic components of highline-tensioned inhaul and outhaul winches, sliding blocks, transfer heads, and ram tensioners.

Instruction: Basic electricity; basic electronics; hydraulic interface with electric/electronic controls for UNREP winches; maintenance of power supplies; drive systems and control systems for sliding blocks; transfer heads, Drexel & Western gear multi-directional missile-handling trucks; maintenance of Cutler-Hammer and General Electric static logic controllers.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electronics (11/73); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (11/73); in the upper-division baccalaureate category, 1 semester hour in electrical laboratory (11/73).

NV-1715-0026

ELECTRONICS TECHNICIAN CLASS C, DATA TRANSMISSION GROUP, TRANSMISSION EQUIPMENT MAINTENANCE

Course Number: A-101-042.

Location: Naval School, Mare Island, Vallejo, CA.

Length: 14 weeks (411 hours).

Exhibit Dates: 1/70-1/88.

Objectives: To train students with a background in electronics and communications theory to operate and maintain electronic data transmission equipment of the Naval Tactical Data System.

Instruction: Introduction and orientation to data transmission equipment; general troubleshooting; indoctrination and orientation to data transmission procedures; radio sets; antenna couplers; communications central equipment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics (11/73).

NV-1715-0027

ELECTRONICS TECHNICIAN CLASS C, HIGH POWER INDEPENDENT SINGLE SIDEBAND TRANSMITTER (AN/FRT-39; AN/URT-19; AN/URA-30)

Course Number: A-101-0038.

Location: Electronics Technician Class C Naval Training Center, Great Lakes, IL.

Length: 4 weeks (120 hours).

Exhibit Dates: 11/72-7/74.

Objectives: To train students with electronic communications backgrounds to operate and maintain the AN/FRT-39 transmitting set and auxiliary equipment.

Instruction: Characteristics of teletype signals; multichannel telegraph; transmission test set; audio distribution and patching; DC signal distribution; telephone terminal equipment; single-sideband fundamentals; multiplexing; spectrum analyzer; AN/FRT-39B transmitter; independent sideband receivers; AN/URA-30 modulator oscillator; system troubleshooting.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics (11/73).

NV-1715-0028

ELECTRONICS TECHNICIAN CLASS C, R-1524(P)/WRR COUNTERMEASURES RECEIVER MAINTENANCE

Course Number: A-102-0098; A-102-0108.

Location: Naval Technical Training Schools, San Diego, CA; Naval Technical Training Schools, Norfolk, VA.

Length: 2 weeks (60 hours).

Exhibit Dates: 8/72-1/88.

Objectives: To train students with electronics and communications backgrounds to operate and maintain the R-1524(P)/WRR countermeasures receiver and its associated tuning and test equipment.

Instruction: Familiarization with and operation of R-1524(P)/WRR countermeasures receiver; functional analysis and maintenance, including AC and DC power distribution, RF tuning units, IF amplifiers; isolation amplifier, AFC/AGC/squelch/video, and audio amplifier circuitry; troubleshooting.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (11/73).

NV-1715-0029

1. AN/SPA-25/-25(B) RADAR INDICATOR AND SB-1505 SWITCHBOARD MAINTENANCE
2. RADAR REPEATER SYSTEMS MAINTENANCE (ELECTRONICS TECHNICIAN, CLASS C)

Course Number: A-104-0129; A-104-0130.

Location: Service School Command, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: *Version 1:* 3 weeks (90 hours). *Version 2:* 10 weeks (220-235 hours).

Exhibit Dates: *Version 1:* 10/77-Present. *Version 2:* 1/71-9/77.

Objectives: To provide training for the operation and maintenance of a radar distribution switchboard and radar display system.

Instruction: *Version 1:* Operation and familiarization of a signal distribution switchboard and a radar indicator including power supply, display circuits and troubleshooting techniques. *Version 2:* Operation and system maintenance of switchboards, indicator groups, radar trainers, and signal data converters; circuit analysis; calibration; troubleshooting.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in electronics (5/82). *Version 2:* In the vocational certificate category, 2 semester hours in electronics (11/73).

NV-1715-0030

IOIC INTELLIGENCE DATA SYSTEM (STORAGE AND RETRIEVAL) MAINTENANCE

Course Number: D-150-011.

Location: Reconnaissance Attack Squadron Three, Albany, GA.

Length: 15 weeks (600 hours).

Exhibit Dates: 5/69-1/88.

Objectives: To train data systems technicians to perform center equipment maintenance and repair.

Instruction: Lectures and practical exercises in digital plotting systems and logic design; system timing; printers display equipment and position encoders; paper tape reader and punch; stereo comparison viewer, functions, logic, electromechanisms, and optics testing and maintenance; code matrix reader circuit analysis, logic, alignment, and maintenance; and system peripheral equipment maintenance and testing.

Credit Recommendation: In the vocational certificate category, 12 semester hours in electronics laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics laboratory (3/74).

NV-1715-0031

RD-293/UYK-5 CARD READER PUNCH MAINTENANCE

Course Number: A-150-0049.

Location: Combat Systems Technical Schools Command, Mare Island, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: 1/79-Present.

Objectives: To provide data systems technicians with the theory of operation and maintenance of a card reader/punch unit.

Instruction: Lectures and practical exercises covering the theory of operation and the maintenance of a computer input/output card reader/punch including the mechanical operations, power distribution, memory operation, block diagram analysis and electronic circuit fault analysis and repair.

Credit Recommendation: In the vocational certificate category, 1 semester hour in computer I/O equipment operation and repair (11/81).

NV-1715-0032

RA-5C Signal Data Converter Group Test Equipment Intermediate Maintenance

Course Number: None.

Location: Air Maintenance Training Detachment, Sanford, FL.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/68–12/68.

Objectives: To train maintenance personnel to repair RA-5C signal data converter group test equipment.

Instruction: Lectures and practical exercises in operation, maintenance, and servicing of data converter and viewfinder test equipment and digital data system test equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in signal data converter group test equipment maintenance on the basis of institutional evaluation (3/74).

NV-1715-0033

Mk XII IFF Systems, Class C

Course Number: Not available.

Location: Service Schools Command, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: 11 weeks (330 hours).

Exhibit Dates: 3/72–1/88.

Objectives: To train enlisted personnel to maintain Mk XII IFF electronic systems.

Instruction: Lectures and practical exercises in Mk XII operation, malfunctioning components troubleshooting procedures and test equipment usage, preventive maintenance procedures, and electronic circuits and mechanical assemblies alignment.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic systems, 1 in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in electronic systems (3/74).

NV-1715-0034

H-46 AN/APX-6B and AN/APA-89 Identification System Intermediate Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Jacksonville, NC; Air Maintenance Training Detachment, Santa Ana, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 11/72–1/88.

Objectives: To train maintenance personnel to maintain and service AN/APX-6B and AN/APA-89 electronics systems.

Instruction: Lectures and practical exercises in AN/APX-6B and AN/APA-89 electronic systems analysis, maintenance procedures, alignment, circuit and circuit-component repair, servicing techniques, and diagnosis and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic systems, 1 in electrical laboratory (3/74).

NV-1715-0035

Integrated Avionics Radar System Technician

Course Number: Not available.

Location: Air Maintenance Training Detachment, Lemoore, CA.

Length: 8 weeks (320 hours).

Exhibit Dates: 9/71–1/88.

Objectives: To train enlisted personnel in integrated avionics radar system operational theory, functional capability, and maintenance and servicing techniques.

Instruction: Lectures include avionics system theory, radar theory, altimeters, Doppler systems and power supplies; air data and tactical computer operation; air navigation computation analysis; malfunction isolation techniques; electrical systems circuit analysis and block diagrams; mathematics flow diagramming; inertial measurement; weapons systems release switchology and armament control; associated test equipment; and maintenance, servicing, and alignment procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic communications, 1 in laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in electronic communications (3/74).

NV-1715-0036

KC-130F AN/APN-59 Radar Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, El Toro, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To train enlisted personnel to maintain the AN/APN-59 radar set and associated test equipment.

Instruction: Lectures in AN/APN-59 radar set maintenance, including block diagrams, functional operation of radar set controls, analysis of transmitter unit, power supplies, phantastron oscillator, gate and sweep generator, various circuits operation, antennas, amplifiers, and troubleshooting and alignment techniques.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic communications, 1 in laboratory (3/74).

NV-1715-0037

1. Marine Air Traffic Control Navigational Aids Repairman, Class C
2. Marine Air Traffic Control Navigational Aids Maintenance

Course Number: C-103-2020.

Location: *Version 1:* Air Technical Training Center, 'Millington,TN; Air Technical Training Center, Memphis, TN. *Version 2:* Air Technical Training Center, Glynco, GA.

Length: *Version 1:* 8-16 weeks (267–480 hours). *Version 2:* 13 weeks (520 hours).

Exhibit Dates: *Version 1:* 5/73–12/83. *Version 2:* 3/71–4/73.

Objectives: To train electronic technicians to install, inspect, test, maintain, and repair air control navigation equipment.

Instruction: Lectures and laboratories in radio direction-finding techniques; logic circuit techniques; and familiarization and maintenance of AN/GRD-11A direction-finding sets, AN/TRN-29 beacon-transponder sets, and radio beacon sets.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in aviation electronics (2/81). *Version 2:* In the vocational certificate category, 3 semester hours in electronic communications, 1 in electronic communications laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in electronic communications (3/74).

NV-1715-0038

Marine Air Traffic Control Unit Radar Repairman, Class C
(Marine Air Traffic Control Unit Radar Maintenance, Class C)

Course Number: C-103-2021.

Location: *Version 1:* Air Technical Training Center, Memphis, TN; Air Technical Training Center, Millington, TN. *Version 2:* Air Technical Training Center, Glynco, GA.

Length: *Version 1:* 8 weeks (267–320 hours). *Version 2:* 17 weeks (680 hours).

Exhibit Dates: *Version 1:* 5/73–12/83. *Version 2:* 9/72–4/73.

Objectives: To train electronic technicians to site, install, inspect, test, maintain, and repair specific air control navigational equipment.

Instruction: Lectures and practical exercises in air control navigational equipment operation and maintenance, including AN/TPN-8A precision approach radar and AN/UPS-1 radar set maintenance, power distribution and supplies, antenna control, transmitter, radio frequency system, receiver operation and maintenance, and system analysis and alignment; and C-4150 control indicator and AN/APA-125 surveillance approach indicator circuitry, amplifiers, search servo system, and system alignment and troubleshooting procedures.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic communications (2/81). *Version 2:* In the vocational certificate category, 3 semester hours in electronic communications, 1 in electronic communications laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in electronic communications (3/74).

NV-1715-0039

1. Marine Air Traffic Control Unit Maintenance Management, Class C
   (Marine Air Traffic Control Unit Maintenance Management, Class O)
2. Marine Air Traffic Control Unit Equipment Maintenance, Class C
3. Marine Air Traffic Control Unit Equipment Maintenance, Class C

Course Number: *Version 1:* C-103-2019; C-2G-2023.

Location: Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN; Air Technical Training Center, Glynco, GA.

Length: *Version 1:* 3 weeks (120 hours). *Version 2:* 15 weeks (600 hours). *Version 3:* 18 weeks (720 hours).

Exhibit Dates: *Version 1:* 7/71–12/83. *Version 2:* 2/69–6/71. *Version 3:* 2/66–1/69.

Objectives: To train radar technicians to operate and maintain air traffic control systems.

Instruction: *Version 1:* Lectures and practical exercises in air traffic control principles and in the supervision of the installation, maintenance, and repair of air traffic systems, navigational aids, and communication systems and associated equipment. *Version 2:* Lectures in installation, maintenance, testing, and repair of specific radar sets, including basic electronics review, transistor fundamentals review, and basic radar and test equipment review and components circuit analysis. *Version 3:* Lectures in installation, maintenance, testing, and repair of specific radar sets, including basic electronics review, transistor fundamentals review, and basic radar and test equipment review and components circuit analysis.

Credit Recommendation: *Version 1:* Credit is not recommended because of the limited technical nature of the course (2/81). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in electronics, 1 in electronics laboratory (3/74). *Version 3:* In the vocational certificate category, 3 semester hours in electronics, 3 in electronics laboratory (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics, 1 in electronics laboratory (3/74).

NV-1715-0040

SUBMARINE SONAR TECHNICIAN A-1

Course Number: A-130-0029; J-130-0515; K-130-1007.

Location: Fleet Anti-Submarine Warfare Training Center, San Diego, CA.

Length: *Version 1:* 10-12 weeks (400-480 hours). *Version 2:* 16-18 weeks (640-720 hours).

Exhibit Dates: *Version 1:* 8/77-1/88. *Version 2:* 4/70-7/77.

Objectives: To train enlisted personnel to operate and maintain specific submarine sonar systems and auxiliary equipment.

Instruction: *All Versions:* Lectures and laboratory in basic mathematics, vacuum tube and semiconductor devices, physics of sound, and specific sonar systems operation and maintenance techniques. *Version 1:* Emphasis is placed on sonar fundamentals and operation of specific sonar equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in electronic communications and 1 in electronics laboratory (9/77). *Version 2:* In the vocational certificate category, 3 semester hours in electronic communications, 1 in laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in electronic communications (3/74).

NV-1715-0041

KC-130F AN/APN-59B RADAR INTERMEDIATE MAINTENANCE

Course Number: C-102-3501.

Location: Air Maintenance Training Detachment, El Toro, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 12/69-1/88.

Objectives: To train maintenance personnel to maintain, repair, and test the AN/APN-59B radar set at the intermediate maintenance level.

Instruction: Lectures and practical exercises in AN/APN-59B radar set maintenance, testing and repair, including radar set operation and circuitry, block diagrams, cabling, oscillators, transmitters, indicator and power supply, antenna circuits, accessory equipment, and alignment and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronic communications, 1 in electronics laboratory (3/74).

NV-1715-0042

BASIC SONARMAN
(Sonarman, Class A)

Course Number: 560.

Location: Fleet Sonar School, Key West, FL; Fleet Antisubmarine Warfare School, San Diego, CA.

Length: 24-30 weeks (931-1161 hours).

Exhibit Dates: 1/54-12/68.

Objectives: To train personnel to operate and perform preventive and corrective maintenance on sonar and allied equipment.

Instruction: The course consists of an operational phase and a maintenance phase. Maintenance phase includes fundamentals of AC and DC, DC series and parallel circuits, DC generators and motors, AC circuits, inductance and capacitance, transformers and alternators, power supplies, rectifiers, amplifiers, vacuum tubes, oscillators, transmitters, receivers, synchros, multivibrators, sonar and auxiliary equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in electricity and electronics and additional credit in electrical laboratory on the basis of institutional evaluation (12/68).

NV-1715-0043

DATA SYSTEMS TECHNICIAN SCHOOL, CLASS A (PHASE A-2)—PART I, CP-789

Course Number: A-150-0026.

Location: Naval Schools Command, Mare Island, CA.

Length: 8 weeks (240 hours).

Exhibit Dates: 1/70-1/88.

Objectives: To train enlisted personnel to troubleshoot the CP-789(V)/UYK computer.

Instruction: Lectures and practical exercises in troubleshooting the control, arithmetic, memory, and input/output sections of the CP-789(V)/UYK computer. (See NV-1715-0753 for Phase A-1.)

Credit Recommendation: Credit is not recommended because of the limited, technical nature of the course (3/74).

NV-1715-0044

DATA SYSTEMS TECHNICIAN, CLASS A (PHASE A-2)—PART II, CP-642A/642B/USQ-20(V) DIGITAL DATA COMPUTER MAINTENANCE
(Data Systems Technician, Class A(A-2), Part II CP-642B)

Course Number: A-150-0026; A-150-0066.

Location: Naval Schools Command, Mare Island, CA.

Length: 8 weeks (240 hours).

Exhibit Dates: 1/70-1/88.

Objectives: To teach enlisted personnel to operate and repair digital data computers.

Instruction: Lectures and practical exercises in electronic and logical analysis of the control, arithmetic, memory, and input/output sections; and maintenance and repair procedures for digital data computers. (See NV-1715-0753 for Phase A-1.)

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0045

DATA SYSTEMS TECHNICIANS, CLASS A, (PHASE A-2)—PART III, CP-642A

Course Number: A-150-0026.

Location: Naval Schools Command, Mare Island, CA.

Length: 8 weeks (240 hours).

Exhibit Dates: 1/70-1/88.

Objectives: To train enlisted personnel who have some knowledge of digital computer fundamentals to operate, troubleshoot, and repair the CP-642A computer.

Instruction: Lectures and practical exercises in CP-642A computer operation; computer maintenance programming; and computer and peripheral equipment operation, maintenance, and repair. (See NV-1715-0753 for Phase A-1.)

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0046

E-2A COMPUTER INDICATOR (AN/ASA-27) INTERMEDIATE MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 22 weeks (880 hours).

Exhibit Dates: 1/68-1/88.

Objectives: To train maintenance personnel to perform shop maintenance on computer indicators.

Instruction: Lectures and practical exercises in operation, function, and shop maintenance of computer indicators, including computer system fundamentals and timing, intercept computer operations, programming, and in-flight navigation computer operations.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0047

DATA SYSTEMS TECHNICIAN—PERIPHERAL EQUIPMENT MAINTENANCE, CLASS C

Course Number: A-150-0051.

Location: Naval Schools Command, Mare Island, CA.

Length: 5 weeks (200 hours).

Exhibit Dates: 10/72-1/88.

Objectives: To train qualified computer technicians in the operation and maintenance of peripheral equipment.

Instruction: Practical experience in the operation and maintenance of RD-231/USQ-20(V) paper tape units, modified teletypewriter sets, and system-monitoring panels; and identification and use of management tools, including maintenance requirement cards.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0048

DATA SYSTEMS TECHNICIAN, CLASS C, MK 11, MOD 2/4 SYSTEMS GROUP MAINTENANCE

Course Number: A-150-060.

Location: Naval Schools Command, Mare Island, CA.

Length: 8 weeks (240 hours).

Exhibit Dates: 10/72-1/88.

Objectives: To train NTDS conversion equipment repairmen to maintain and repair NTDS/WDS Mark 11 systems.

Instruction: Practical experience in missile, gun, and weapon systems; maintenance and material management; functional analysis; logical description; and system switching and testing.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0049

Avionics Fundamentals, Class A

Course Number: Not available.

Location: Air Reserve Electronics Training Unit, Los Alamitos, CA.

Length: 12 weeks (520 hours).

Exhibit Dates: 6/64–12/68.

Objectives: To provide selected enlisted personnel with a basic understanding of electronic circuitry and test equipment.

Instruction: Lectures and practical experience in the fundamentals of radio, transmitter, transistor, and radar electronics.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electricity and electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity and electronics, 3 in electronic circuits (12/68).

NV-1715-0050

Digital and Electronics Training

Course Number: K-130-0271.

Location: Fleet Anti-Submarine Warfare Training Center, San Diego, CA.

Length: 16 weeks (560 hours).

Exhibit Dates: 1/86–Present.

Objectives: To provide enlisted personnel with the skills and knowledge necessary to interpret, analyze, and troubleshoot electronic equipment.

Instruction: Course covers, at a basic level, algebra, trigonomotry, scientific notation, construction techniques, basic electricity and electronic theory, AC/DC circuit analysis, semiconductor theory, basic AM/FM theory, basic servo principles, Boolean algebra, binary, octel, hexadecimal number systems, computer architecture, digital logic circuits, and computer troubleshooting.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in technical mathematics, 3 in AC/DC circuits, 3 in solid state electronics, 3 in digital fundamentals, 1 in introduction to computers and 1 in synchros (7/86).

NV-1715-0051

Sonar Communications Set AN/WQC-5 Basic Maintenance

Course Number: K-130-0234.

Location: Fleet Anti-Submarine Warfare Training Center, San Diego, CA; Fleet Anti-Submarine Warfare Training Center, Yokosuka, Japan.

Length: 2 weeks (63 hours).

Exhibit Dates: 11/79–9/86.

Objectives: To train personnel to operate and perform maintenance on a sonar communication system.

Instruction: Includes only routine maintenance and operating characteristics of the sonar communication set.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (7/86).

NV-1715-0052

1. AN/ALQ-99 Tracking Receivers Control Modulators, Exciters with AN/ALM-109C Tracking Receiver Test Station and TS 3517/ALM RF Oscillator Rom Linearizer Test Set Intermediate Maintenance
2. AN/ALM-109 Test Console and AN/ALQ-99 Tracking Receivers and Control Modulators Intermediate Maintenance

Course Number: C-102-3944.

Location: Air Maintenance Training Detachment, Whidbey Island, WA.

Length: *Version 1:* 12 weeks (480 hours). *Version 2:* 7 weeks (280 hours).

Exhibit Dates: *Version 1:* 3/80–Present. *Version 2:* 4/73–2/80.

Objectives: To train enlisted personnel to operate, test, maintain, and repair radio receivers.

Instruction: *Version 1:* Lectures and laboratory instruction at the block diagram level in control data registers, Boolean logic, digital modulation and driver circuits, rate and dwell circuitry and voltage controlled RF oscillators. Emphasis is placed on publication interpretation and troubleshooting of specialized equipment. *Version 2:* Lectures and practical exercises in digital integrated circuits, and circuit analysis and maintenance procedures for functional circuitry of radio receivers.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in systems maintenance laboratory (7/80). *Version 2:* In the vocational certificate category, 3 semester hours in electronic communications, 2 in electronic communications laboratory (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronic communications laboratory (3/74).

NV-1715-0053

AN/ALQ-99 Jamming Transmitters and AN/ALM-107B Countermeasures Test Station Intermediate Maintenance

(AN/ALQ-99 Jamming Transmitters and AN/ALM-107 Countermeasures Test Station Intermediate Maintenance)

Course Number: C-102-3946.

Location: Air Maintenance Training Detachment, Whidbey Island, WA.

Length: 11–12 weeks (440-480 hours).

Exhibit Dates: 3/73–Present.

Objectives: To train enlisted personnel in the maintenance, repair, and functional testing procedures for special-purpose radio transmitters.

Instruction: Lectures and practical exercises in troubleshooting, repair, power distribution and control, countermeasures, power supply modules, RF source, traveling wave, tube testing and block and signal flow analysis.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic communications, 3 in electronic communications laboratory (7/80).

NV-1715-0054

1. AN/ALM-108 Surveillance Receiver Test Station AN/ALQ-99 Surveillance Receivers Intermediate Maintenance
2. AN/ALM-108 Receiver Test Console AN/ALQ-99 Receivers Intermediate Maintenance

Course Number: C-102-3945.

Location: Air Maintenance Training Detachment, Whidbey Island, WA.

Length: *Version 1:* 12 weeks (480 hours). *Version 2:* 8 weeks (320 hours).

Exhibit Dates: *Version 1:* 3/80–Present. *Version 2:* 4/73–2/80.

Objectives: To train enlisted personnel in the maintenance, repair, and testing of specific radio receivers.

Instruction: *Version 1:* Lectures and practical exercises in the operational theory, voltage levels and signal flow in each subsystem of a surveillance receiver. The subsystems include power supplies, power distribution, local oscillators, radio and intermediate frequency amplifiers, video amplifiers, video to digital converters and mixer circuits. Practical work is done in troubleshooting using oscilloscopes, frequency counters and digital voltmeters. *Version 2:* Lectures and practical experience in functional analysis and power generation, surveillance receivers, fault isolation, and circuit analysis.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in the theory and repair of communications systems (7/80); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronic technology communication laboratory or 3 semester hours in general technical elective for nonelectronic technology students (7/80). *Version 2:* In the vocational certificate category, 3 semester hours in electronic communications, 3 in electronic communications laboratory (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronic communications laboratory (3/74).

NV-1715-0055

AN/ALQ-92 Countermeasures Set Intermediate Maintenance

Course Number: C-102-3708.

Location: Air Maintenance Training Detachment, Whidbey Island, WA.

Length: 6 weeks (240 hours).

Exhibit Dates: 1/73–1/88.

Objectives: To train enlisted personnel to test, maintain, and repair specific electronic systems.

Instruction: Discussions and practical experience in basic digital logic, circuit analysis, and maintenance procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic communications, 2 in electronic communications laboratory (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronic communications laboratory (3/74).

NV-1715-0056

AN/URT-23 Radio Transmitter Set With AN/URA-38 Antenna Coupler Maintenance (Electronics Technician, Class C1)

(AN/URT-23(V) Radio Transmitting Set and AN/URA-38 Antenna Coupler Maintenance, Class C)

Course Number: A-101-0049; A-101-0051.

Location: Fleet Training Center, Norfolk, VA; Service School Command, San Diego, CA.

Length: *Version 1:* 4 weeks (144 hours). *Version 2:* 3 weeks (90 hours).

Exhibit Dates: *Version 1:* 6/81–Present. *Version 2:* 4/72–5/81.

Objectives: To train enlisted personnel in the operation and maintenance of specific radio transmitter sets.

Instruction: *Version 1:* Practical training in the operation and maintenance of an AN/URT series radio transmitter using single sideband CUI, amplitude modulated, independent sideband and frequency shift keying. The student uses general purpose test equipment and troubleshoots defective radio equipment. *Version 2:* Practical and theoretical instruction in the operation and preventive and corrective maintenance of a single sideband transmitter.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in radio transmitter operation, maintenance and troubleshooting (5/82). *Version 2:* In the vocational certificate category, 2 semester hours in electronics or communications (11/77).

NV-1715-0057

AN/ALQ-76 Intermediate Maintenance

Course Number: C-102-3069.

Location: Air Maintenance Training Detachment, Cherry Point, NC.

Length: 6 weeks (240 hours).

Exhibit Dates: 2/73-1/88.

Objectives: To train enlisted personnel in the maintenance, repair, and troubleshooting of specific radio transmitters.

Instruction: Practical experience in alignment, troubleshooting, and repair of radio transmitters.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronic communications, 2 in electronic communications laboratory (3/74).

NV-1715-0058

AN/ARC-161 HF Radio Set Intermediate Maintenance

(AN/ARC-142 HF Communications System Intermediate Maintenance)

Course Number: C-102-3582.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, Jacksonville, FL.

Length: 4 weeks (120 hours).

Exhibit Dates: 2/73-1/88.

Objectives: To train enlisted personnel in the maintenance and repair of a specific transmitter-receiver.

Instruction: Practical experience in introduction to radio sets; system description; bench check-out; power distribution, including block-diagram and functional analyses; band selection; and fixed-frequency generation.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronic communications, 1 in electronic communications laboratory (3/74).

NV-1715-0059

1. AN/ARC-143 and AN/ARC-143A UHF Radio Set Intermediate Maintenance
2. AN/ARC-143 Communications System Intermediate Maintenance

Course Number: C-102-3581.

Location: *All Versions:* Air Maintenance Training Detachment, Moffett Field, CA. *Version 1:* Air Maintenance Training Detachment, Jacksonville, FL. *Version 2:* Air Maintenance Training Detachment, Patuxent River, MD.

Length: 2-3 weeks (80-120 hours).

Exhibit Dates: *Version 1:* 8/76-Present. *Version 2:* 2/73-7/76.

Objectives: To train enlisted personnel in the maintenance, repair, and functional testing of a specific UHF radio set.

Instruction: *Version 1:* Lectures and practical exercises in the operation of a UHF radio set including block diagram analysis, signal tracing, maintenance, troubleshooting and repair procedures. The operation of the UHF radio test set is also covered. *Version 2:* Lectures and practical experience in communications system theory of operation, UHF radio test sets, system description, radio set control, and functional analysis.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in electronic communications, 1 in electronic communications laboratory (7/81). *Version 2:* In the vocational certificate category, 1 semester hour in electronic communications, 1 in electronic communications laboratory (7/74).

NV-1715-0060

AN/ALQ-86 Mid-Band Tuner Intermediate Maintenance

Course Number: C-102-3072.

Location: Air Maintenance Training Detachment, Cherry Point, NC.

Length: 4 weeks (120 hours).

Exhibit Dates: 10/72-Present.

Objectives: To train enlisted personnel to maintain and repair tuners.

Instruction: Practical experience in tuner operation, check-out, alignment and trouble analysis.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0061

Submarine Radar Maintenance (Enlisted)

Course Number: F-104-010.

Location: Submarine School, Groton, CT.

Length: 3 weeks (90 hours).

Exhibit Dates: 4/68-1/88.

Objectives: To train submarine force electronics technicians to maintain and repair AN/BPS-13 radar sets.

Instruction: Lectures and practical exercises in AN/BPS-13 operation theory, maintenance procedures, standard submarine test equipment, and safety precautions.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0062

1. Submarine Gyrocompass Mk 19 Mod 3 Combined Maintenance
2. Submarine Gyrocompass Mk 19 Mod 3 (Sperry Mk XIX Mod III Gyrocompass)

Course Number: A-670-0042; F-623-015.

Location: *All Versions:* Submarine School, Groton, New London, CT; Fleet Ballistic Missile School, Charleston, SC. *Version 1:* Naval Submarine Pacific, Pearl Harbor, HI.

Length: 3-4 weeks (90-120 hours).

Exhibit Dates: *Version 1:* 8/79-Present. *Version 2:* 8/67-7/79.

Objectives: To train students to operate and maintain specific submarine gyrocompasses.

Instruction: *Version 1:* Lectures and practical exercises in the theory of operation of the gyrocompass to the component level including alignment, adjustment, fault isolation and repair of the equipment. *Version 2:* Lectures and practical exercises in a review of trigonometry, electronics, transistors, and magnetic amplifiers; gyroscopic principles; and operation and preventive maintenance of the Sperry Mk 19 Mod 3A and 3R gyrocompasses.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in servo amplifier control system troubleshooting (6/81). *Version 2:* In the lower-division baccalaureate/associate degree category, credit in electronics on the basis of institutional evaluation (3/74).

NV-1715-0063

Electronics Technician, Class C, SSBN Navigation Aids Technician Maintenance

Course Number: A-193-034.

Location: Electronics Technician School, Dam Neck, VA.

Length: 26 weeks (910 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train electronic technicians to operate and maintain environmental detector systems, frequency-time standards, Loran C receiving sets, radio navigation sets, and sonar sounding sets.

Instruction: Lectures and practical exercises in the operation of navigational subsystems of fleet ballistic missile submarines, including equipment familiarization and operation, technical maintenance, subsystem tie-in, and utilization of test equipment.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0064

Electronics Technician, Class C, SSBN Navigation Aids, Fleet Ballistic Missile (FBM) Tender Navigation Maintenance

Course Number: A-193-0037.

Location: Guided Missiles School, Dam Neck, VA.

Length: 6 weeks (210 hours).

Exhibit Dates: 11/72-12/74.

Objectives: To train electronic technicians to maintain navigational aids equipment.

Instruction: Lectures and laboratories in digital module test sets, sonar test sets, Loran-C switching units, electronic circuit plug-in units, and signal simulators, ancillary commercial test equipment; and advanced soldering and wire-wrapping techniques.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electronics laboratory (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics laboratory (3/74); in the upper-division baccalaureate category, credit in electronics laboratory on the basis of institutional evaluation (3/74).

NV-1715-0065

Fleet Ballistic Missile Tender Navigation Maintenance Ship's Inertial Navigation System

(Fleet Ballistic Missile (FBM) Tender Navigation Maintenance)

(Electronics Technician, Class C, SSBN Ship's Inertial Navigation, Fleet Ballistic Missile (FBM) Tender Navigation Maintenance)

Course Number: A-193-0036.

Location: Guided Missiles School, Dam Neck, VA.

Length: *Version 1:* 6-8 weeks (240-248 hours). *Version 2:* 6 weeks (210 hours).

Exhibit Dates: *Version 1:* 3/80-Present. *Version 2:* 11/72-2/80.

Objectives: To train electronics technicians to maintain inertial navigation systems.

Instruction: *Version 1:* Lectures and practical exercises in the operation, maintenance and repair of an inertial navigation subsystem and its support equipment including specialized test sets and equipment (VOH meters, oscilloscopes, wave analyzers, destortion analyzers, and signal generators); optical equipment alignment and maintenance; selectric typewriter maintenance and theory, and paper tape unit operation and repair. *Version 2:* Lectures and laboratories in digital module test sets, Loran-C test systems, NAVDAC test sets, sonar test sets, SDC test sets, synchro/resolver test sets, and type 11 servo amplifier test sets; advanced soldering and wire-wrapping techniques; and ancillary commercial test equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in typewriter maintenance, 1 in optical equipment maintenance/alignment techniques; In the lower-division baccalaureate/associate degree category, 1 semester hour in electronics maintenance laboratory (6/89). *Version 2:* In the vocational certificate category, 4 semester hours in electronics laboratory (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics laboratory (3/74); in the upper-division baccalaureate category, credit in electronics laboratory on the basis of institutional evaluations (3/74).

NV-1715-0066

Ships Inertial Navigation System (SINS) Technician Poseidon Replacement
(Electronics Technician, Class C, SSBN Ship's Inertial Navigation System (SINS) Mk 2 Mod 0-6 Technician)

Course Number: A-193-0026.

Location: Guided Missiles School, Dam Neck, VA.

Length: *Version 1:* 25 weeks (1000 hours). *Version 2:* 23 weeks (805 hours).

Exhibit Dates: *Version 1:* 8/82-1/89. *Version 2:* 11/72-7/82.

Objectives: To train electronics technicians to operate, maintain and repair a ships inertial navigation systems, and associated subsystems.

Instruction: *All Versions:* Lectures and practical exercises in equipment familiarization and operation, technical maintenance, subsystem tie-in, and utilization of test equipment. *Version 1:* Includes maintenance of paper tape readers, selectric typewriters and some optical equipment.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in electronics maintenance laboratory (11/83). *Version 2:* Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0067

A-6 AN/ASQ-61A Ballistics Computer Theory

Course Number: C-150-3766.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.

Length: 7 weeks (280 hours).

Exhibit Dates: 11/71-1/88.

Objectives: To train maintenance personnel in the operation of AN/ASQ ballistics computer sets.

Instruction: Lectures and practical exercises in flip-flops, computer organization, logic circuits, adders, and ballistics computer sets.

Credit Recommendation: In the vocational certificate category, 3 semester hours in computer systems (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in computer systems (3/74).

NV-1715-0068

A-6 AN/ASQ-61 Ballistics Computer Intermediate Maintenance
(A-6 AN/ASQ-61A Ballistics Computer Intermediate Maintenance)

Course Number: C-150-3763.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.

Length: 2-7 weeks (280-560 hours).

Exhibit Dates: 6/68-1/88.

Objectives: To train maintenance personnel in the operation of AN/ASQ-61A ballistics computer sets.

Instruction: Lectures and practical exercises in ballistics computer sets, flip-flops, computer organization, logic circuits, and adders.

Credit Recommendation: In the vocational certificate category, 3 semester hours in computer systems (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in computer systems (3/74).

NV-1715-0069

AN/AJM-32(V) Special Support Equipment Intermediate Maintenance
(AN/AJM-32(V) Intermediate Maintenance)

Course Number: C-150-3784.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL.

Length: *Version 1:* 3 weeks (112 hours). *Version 2:* 4 weeks (160 hours).

Exhibit Dates: *Version 1:* 12/78–Present. *Version 2:* 11/72–11/78.

Objectives: To train personnel in maintenance techniques, including the testing, calibration and troubleshooting of digital electronic equipment.

Instruction: *Version 1:* Lectures and practical exercises in operational theory, safety procedures, maintenance and troubleshooting, and repair of digital electronic equipment. *Version 2:* Lectures and practical exercises in operational theory, maintenance and troubleshooting, and automatic and semiautomatic testing procedures.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in digital electronics control systems or 2 semester hours in digital electronics for electrical engineering majors (3/82). *Version 2:* Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0070

A-7E AN/ASN-91 Tactical Computer Intermediate Maintenance

Course Number: C-102-3784.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL.

Length: 6 weeks (240 hours).

Exhibit Dates: 1/71-6/81.

Objectives: To train fleet maintenance personnel to operate, maintain, and repair the AN/ASN-91 computer, special support equipment, and loader-verifier.

Instruction: Lectures and practical exercises in the AN/ASN-91 computer system, including programming and data flow, computer circuit analysis, test benches, and loader-verifier units.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0071

A-6 Memory Drum Test Console, AN/ASM-316 (XN-1) and Card and Module Tester Intermediate Maintenance

Course Number: C-150-3769.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.

Length: 7 weeks (280 hours).

Exhibit Dates: 2/70-1/88.

Objectives: To train maintenance personnel to operate and maintain AN/ASM-316 (XN-1) memory drum test consoles and card and module testers.

Instruction: Lectures and practical exercises in the theory of operation, maintenance, reliability testing, and repair of the memory drum test consoles, card and module testers, and ballistics computer sets.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0072

Tartar DSOT Analysis Missile Fire Control System (MFCS) Mk 74 Mod 0

Course Number: A-121-0096; A-121-0097.

Location: Guided Missiles School, Dam Neck, VA; Training Center, Mare Island, CA.

Length: 2 weeks (70 hours).

Exhibit Dates: 10/72-12/80.

Objectives: To train fleet Tartar systems supervisors to conduct a defense system operational test (DSOT), analyze the results, and initiate corrective actions.

Instruction: Lectures and practical exercises in DSOT analysis, including introduction to DSOT, DSOT and ADSOT procedures, DSOT practical, system casualty analysis, systems tests, specific radar test set, specific systems dynamic tester, and specific missile simulators.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/74).

NV-1715-0073

AN/ALH-6 Recorder/Reproducer Intermediate Maintenance

Course Number: C-102-3073.

Location: Air Maintenance Training Detachment, Cherry Point, NC.

Length: 3 weeks (120 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To train maintenance personnel to maintain, operate, and service AN/ALH-6 recorder/reproducer systems.

Instruction: Lectures and practical exercises in A/D converters, digitizers, AN/ALH-6 systems, troubleshooting techniques, and test equipment.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0074

A-6A Programmer, Semi-Automatic
Test Equipment Intermediate
Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.

Length: 14 weeks (560 hours).

Exhibit Dates: 1/70–1/88.

Objectives: To train maintenance personnel to maintain the programming test group equipment.

Instruction: Lectures and practical exercises in programming test groups, programming analyzer test benches, and GT-1 programming test stations.

Credit Recommendation: In the vocational certificate category, credit in computer laboratory on the basis of institutional evaluation (3/74).

NV-1715-0075

1. Plotting System MK NC-2 Mod 1A
   Maintenance
2. Mk NC-2 Plotter Mod 1A (Sperry)
   Maintenance, Class C

Course Number: A-623-0020; A-623-0021.

Location: *All Versions:* Technical Training Command, Norfolk, VA; *Version 2:* Technical Training Command, San Diego, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: *Version 1:* 3/80–Present. *Version 2:* 5/72–2/80.

Objectives: To train enlisted personnel to maintain, troubleshoot, and repair the Mk NC-2 Mod 1A plotting systems.

Instruction: *Version 1:* Lectures and practical exercises in the review of basic electronics and servo systems; complete coverage of an eletromechanical system including plotting table, data converter, dead reckoning indicator and troubleshooting. *Version 2:* Lectures and practical exercises in review of basic electronics, synchro/servo systems, solid-state devices, plotting systems and tables, transistors, and voltage networks.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in electromechanical systems (9/83); in the lower-division baccalaureate/associate degree category, 2 semester hours in electromechanical systems (9/83). *Version 2:* In the vocational certificate category, 4 semester hours in electronics, and additional credit in electronics on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (3/74).

NV-1715-0076

Plotting System Mk NC-2 Mod 2/2A
Maintenance
(Mk NC-2 Plotter Mod 2/2A Maintenance, Class C)

Course Number: A-623-0015; A-623-0016.

Location: Interior Communications School, San Diego, CA; Electrical Schools, Norfolk, VA.

Length: *Version 1:* 5 weeks (190 hours). *Version 2:* 4 weeks (160 hours). *Version 3:* 3 weeks (120 hours).

Exhibit Dates: *Version 1:* 5/82–10/84. *Version 2:* 8/71–4/82. *Version 3:* 4/69–7/71.

Objectives: To train interior communications electricians to maintain, troubleshoot, and repair the Mk NC-2 Mod 2/2A plotting system and the dead-reckoning analyzer-indicator Mk 9 Mod 2.

Instruction: For this course after 10/84 see NV-1715-1339. *All Versions:* Lectures and laboratories in solid-state devices, voltage networks, transistors, synchro/servo systems, dead-reckoning analyzer-indicator, plotting tables, and troubleshooting procedures. *Version 1:* Includes use of stepper motors.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic systems, 1 in electronics systems laboratory and 1 in electronic troubleshooting (5/82). *Version 2:* In the vocational certificate category, 4 semester hours in electronics, and additional credit in electronics on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (3/74). *Version 3:* In the vocational certificate category, 2 semester hours in electronics, and additional credit in electronics on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics (3/74).

NV-1715-0077

AN/ARC-101 Intermediate
Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To train enlisted personnel to repair and maintain specific radio transceivers.

Instruction: Practical experience in VHF receivers, circuit analysis, oscillators, transmitters, and power supplies.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronic communications, 1 in electronic communications laboratory (3/74).

NV-1715-0078

Ground Controlled Approach
Electronics Technician, Radar
Set AN/MPN-1B, Class C

Course Number: Not available.

Location: Air Technical Training Unit, Olathe, KS.

Length: 15 weeks (600 hours).

Exhibit Dates: 8/57–12/68.

Objectives: To train electronics technicians to operate and maintain ground control approach installations.

Instruction: Lectures and laboratories in review of basic electronics and radar circuits, advanced radar circuit theory, communications equipment, search radar systems, and precision radar systems.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electricity or electronics, and additional credit in electricity or electronics on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

NV-1715-0079

Ground Controlled Approach
Electronics Maintenance, Radar
Set AN/CPN-4A, Class C

Course Number: *Version 1:* C-103-1013. *Version 2:* C-103-13.

Location: Air Technical Training Center, Glynco, GA.

Length: *Version 1:* 4 weeks (147 hours). *Version 2:* 17–18 weeks (696–712 hours).

Exhibit Dates: *Version 1:* 3/73–12/75. *Version 2:* 3/66–2/73.

Objectives: To train electronic technicians to maintain and operate complete ground control approach installations.

Instruction: *All Versions:* Lectures and laboratories in radar circuit theory, synchroscopes, search radar systems, precision radar systems, and communications equipment. *Version 2:* Includes a complete introduction to basic radar circuits.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional examination (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional examination (3/74); in the upper-division baccalaureate category, 1 semester hour in electricity or electronics, and credit in electrical laboratory on the basis of institutional examination (3/74). *Version 2:* In the vocational certificate category, 6 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

NV-1715-0080

1. Ground Controlled Approach
   Electronics Maintenance, Radar
   Set AN/MPN-5, Class C
2. Ground Controlled Approach
   Electronics Technician,
   AN/MPN-5, Class C

Course Number: *All Versions:* Not available.

Location: *Version 1:* Air Technical Training Center, Glynco, GA. *Version 2:* Air Technical Training Center, Olathe, KS.

Length: *Version 1:* 17 weeks (696 hours). *Version 2:* 18 weeks (720 hours).

Exhibit Dates: *Version 1:* 4/66–12/68. *Version 2:* 11/54–3/66.

Objectives: To train electronics technicians to operate and maintain ground controlled approach installations.

Instruction: *All Versions:* Lectures and laboratories in radar circuit theory, search radar, precision radar, search and precision antennas and indicators, radar systems measurements and auxiliary equipment, and a review of basic radar circuits, including LCR, limiters, oscillators, multivibrators, and sweep and bootstrap circuits. *Version 2:* Includes basic AC and DC circuits and electronics.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74). *Version 2:* In the vocational certificate category, 8 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 1 semester hour in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

NV-1715-0081

1. Ground Controlled Approach Maintenance (Engineman), Class C
2. Ground Controlled Approach Maintenance (Engineman), Radar Sets AN/CPN-4A and AN/MPN-5, Class C
3. Ground Controlled Approach Maintenance (Engineman), Radar Sets AN/CPN-4A and AN/MPN-5, Class C

(Ground Controlled Approach Engineman, Class C, AN/MPN-5)

Course Number: *All Versions:* Not available.

Location: Air Technical Training Center, Glynco, GA. *Version 3:* Air Technical Training Center, Olathe, KS.

Length: *Version 1:* 6 weeks (240 hours). *Version 2:* 8 weeks (320 hours). *Version 3:* 10 weeks (400 hours).

Exhibit Dates: *Version 1:* 7/68–1/88. *Version 2:* 5/67–6/68. *Version 3:* 10/55–4/67.

Objectives: To train enginemen to operate and maintain all GCA power, air conditioning, heating, and air distribution equipment.

Instruction: Lectures and laboratories in the theory, operation, and maintenance of alternators, voltage regulators, lighting systems, batteries, and cable connections.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electricity or electronics (3/74). *Version 2:* In the vocational certificate category, 3 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electricity or electronics (3/74); in the upper-division baccalaureate category, credit in electricity or electrical laboratory on the basis of institutional evaluation (3/74). *Version 3:* In the vocational certificate category, 3 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electricity or electronics (3/74); in the upper-division baccalaureate category, credit in electricity or electrical laboratory on the basis of institutional evaluation (3/74).

NV-1715-0082

1. Plotting System Mk NC-2 Mod 0 Maintenance
2. Mk NC-2 Plotter Mod 0 Maintenance, Class C

Course Number: A-623-0018; A-623-0019.

Location: *All Versions:* Service Schools Training Division, Norfolk, VA; *Version 2:* Service Schools Training Division, San Diego, CA.

Length: 4 weeks (160 hours).

Exhibit Dates: *Version 1:* 9/83–Present. *Version 2:* 8/71–8/83.

Objectives: To train enlisted personnel to maintain, troubleshoot, and repair Mk NC-2 Mod 0 plotting systems.

Instruction: Lectures and practical exercises in a review of basic electronics and servo systems and complete coverage of an electromechanical system including plotting table,data converter, dead reckoning indicator and troubleshooting. *Version 2:* Lectures and laboratories in solid-state devices, servo systems, voltage networks, transistors, plotting tables, data converters, dead-reckoning indicators, and troubleshooting procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in electromechanical systems (9/83); in the lower-division baccalaureate/associate degree category, 2 semester hours in electromechanical systems (9/83). *Version 2:* In the vocational certificate category, 4 semester hours in electronics, and additional credit in electronics on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (3/74).

NV-1715-0083

Data Systems Technician—Data Conversion Group Equipment Maintenance, Class C

Course Number: A-150-0057.

Location: Naval Schools Command, Mare Island, CA.

Length: 20 weeks (600 hours).

Exhibit Dates: 10/72–1/79.

Objectives: To train data systems technicians to maintain and repair data conversion group equipment.

Instruction: Lectures and practical exercises in data systems theory and maintenance procedures, including digital data converter fundamentals, dynamic synchro data source equipment maintenance, radar azimuth converter maintenance, sonar azimuth converter fundamentals, video signals simulator theory of operation and computer message formats, signal data converter equipment maintenance, and beacon video processor system fundamentals and troubleshooting procedures.

Credit Recommendation: Insufficient data for evaluation (3/74).

NV-1715-0084

IOIC Systems Maintenance

Course Number: D-150-019.

Location: Intelligence Processing System Training Facility, Albany, GA.

Length: 28 weeks (1160 hours).

Exhibit Dates: 11/72–1/88.

Objectives: To train maintenance personnel to maintain and repair EDP and intelligence display equipment.

Instruction: Lectures and practical exercises in EDP familiarization, theory of operation and maintenance procedures for input/output adapter, control signal converter, controller, program request panel, Itek viewer/printer, film titler, and Mitran copy camera; mechanical alignment procedures and troubleshooting techniques; input/output drawer and keyboard, pneumatics, power supply, and memory operation; and video, TV monitor sections, and electronics logic circuitry theory of operation, maintenance, repair and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 6 semester hours in computer science (3/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in computer science (3/74).

NV-1715-0085

Central Navigation Computer (CNC) Technician

(Electronics Technician, Class C, SSBN CNC Technician Maintenance)

Course Number: A-193-0028.

Location: Guided Missiles School, Dam Neck, VA.

Length: *Version 1:* 20 weeks (800 hours). *Version 2:* 32 weeks (1116 hours).

Exhibit Dates: *Version 1:* 10/82–1/89. *Version 2:* 6/70–9/82.

Objectives: To train electronics technicians to operate, maintain, and repair central navigation computers and related equipment.

Instruction: *All Versions:* Lectures and laboratories in familiarization, operation, and technical maintenance of central navigation computers, navigation control consoles, magnetic tape equipment, D/D and D/A converters, data processing subsystems, and navigation subsystems. *Version 1:* Includes an xy plotter and teleprinters.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in computer troubleshooting and maintenance (11/83); in the lower-division baccalaureate/associate degree category, 3 semester hours in machine language programming (11/83). *Version 2:* In the vocational certificate category, 6 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics (3/74); in the upper-division baccalaureate category, 3 semester hours as a technical elective in electronics areas (3/74).

NV-1715-0086

Computer Mk 1A Maintenance

Course Number: J-113-0138; J-113-1382.

Location: Fleet Anti-Air Warfare Training Center, Dam Neck, VA.

Length: 4 weeks (140 hours).

Exhibit Dates: 6/72–1/88.

Objectives: To train shipboard fire control technicians to test and maintain MK 1 and MK 1A computers.

Instruction: Lectures and practical exercises in basic theory of operation of MK 1A computers and MK 1 Star Shell computers, testing and casualty analysis, and preventive and corrective maintenance.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0087

Data Systems Technician, Class C, AN/UYK-5(V) Peripheral Maintenance

Course Number: A-150-0042.

Location: Naval Schools Command, Mare Island, CA.

Length: 10 weeks (300 hours).

Exhibit Dates: 11/71–1/88.

Objectives: To train data system technicians to operate, maintain, and repair computer peripheral equipment.

Instruction: Lectures and practical exercises in theory of operation, system maintenance, and troubleshooting of digital data recorder-reproducers, card reader-punch, data processing line printers, input-output keyboard printers, and motor generator/controllers.

Credit Recommendation: In the vocational certificate category, 8 semester hours in computer science (3/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in computer science (3/74).

NV-1715-0088

AN/SRC-20, AN/SRC-21 RADIO SETS MAINTENANCE (ELECTRONICS TECHNICIAN, CLASS 1)

(Electronics Technician, AN/SRC-20, AM/SRC-21 Radio Set Maintenance)

(Electronics Technician, AN/URC-9, AN/SRC-20, AN/SRC-21 Radio Sets with AN/ SRA-33 Antenna Coupler Maintenance)

Course Number: A-101-0015; A-101-0016; A-101-015; A-101-016; A-101-017; A-101-011.

Location: Electronics Technician, Class C School, San Diego, CA; Electronics Technician, Class C School, Norfolk, VA; Electronics Technician, Class C School, Pearl Harbor, HI; Electronics Technician, Class C School, Treasure Island, CA.

Length: 3-4 weeks (90-160 hours).

Exhibit Dates: *Version 1:* 7/78-Present. *Version 2:* 5/69-6/78.

Objectives: To train enlisted personnel to operate, maintain, and repair the AN/SRC-20/21 radio sets and associated test equipment.

Instruction: Lectures and laboratories in AN/SRC-20/21 radio set function during broadband, normal, retransmit, and tone modes of operation; radio set power requirements, frequency range, frequency selection, and output data; receiver, modulator, transmitter, channel selection, and antenna coupler signal characteristics and signal tracing by use of block diagrams; and radio set alignment, operational checks, and maintenance testing procedures.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in aviation electronics laboratory and 1 semester hour in electronic troubleshooting (5/82). *Version 2:* In the vocational certificate category, 2 semester hours in electronics or communications (11/77).

NV-1715-0089

TRANSCEIVER AN/SRC-20 COMBINED MAINTENANCE

(AN/SRC-20 Radio Transceiver)

(AN/SRC-20, Operation and Maintenance, Enlisted)

(Radio Transceiver AN/SRC-20 Maintenance)

Course Number: A-101-0103; L-101-0015; F-101-016.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Fleet Ballistic Missile Submarine Training Center, Charleston, SC; Submarine School, New London, CT.

Length: 3 weeks (80-90 hours).

Exhibit Dates: 5/68-1/88.

Objectives: To train submarine radiomen and electronics technicians to operate, maintain, and repair the AN/SRC-20 radio transceiver.

Instruction: Lectures and laboratories in AN/SRC-20 operation principles, audio and modulator circuits, squelch circuits, frequency multiplier oscillator, power distribution and amplification, block diagram usage, voltage measurements, maintenance procedures, and basic and advanced troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronic communications and 1 in electronic communications laboratory (9/77).

NV-1715-0090

TELETYPEWRITER AN/UGC-20B/25 COMBINED MAINTENANCE

(AN/UGC-20A/25A Teletypewriter Set Maintenance)

(AN/UGC-20/25 Teletypewriter Set Maintenance)

Course Number: A-160-0064; A-160-0065; A-160-0066; F-160-0064; F-160-011.

Location: Submarine School, New London, CT; Fleet Ballistic Missile Submarine Training Center, Charleston, SC; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 5-7 weeks (150-264 hours).

Exhibit Dates: 10/68-Present.

Objectives: To train submarine radiomen and submarine tender personnel to perform maintenance and repair on the AN/UGC-20/25 teletype machine.

Instruction: Lectures and practical exercises in AN/UGC-20/25 teletype machine fundamentals and operating procedures for each section of the machine, fault isolation and repair to major subassemblies of the electrical and mechanical systems, routine maintenance, cleaning, and material usage.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electromechanical repair, 1 in electromechanical laboratory (3/81).

NV-1715-0091

DATA SYSTEMS TECHNICIAN, CLASS C, DATA TRANSMISSION GROUP, DATA TERMINAL

Course Number: A-150-017.

Location: Naval Schools Command, Mare Island, CA.

Length: 14 weeks (420 hours).

Exhibit Dates: 10/72-1/88.

Objectives: To train enlisted personnel who have backgrounds in electronics and digital theory to operate and maintain data transmission equipment.

Instruction: Lectures and laboratories in data transmission equipment operation and block-diagram analysis, with emphasis on testing, maintenance, and repair of transmitter, receiver, and control sections.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electronics or computers; in the upper-division baccalaureate category, 3 semester hours as a technical elective in electronics or computer subjects (3/74).

NV-1715-0093

AN/AQH-4 SOUND RECORDER/REPRODUCER SET INTERMEDIATE MAINTENANCE

Course Number: C-102-3596.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, Jacksonville, FL.

Length: 2 weeks (80 hours).

Exhibit Dates: 2/73-Present.

Objectives: To train fleet maintenance personnel to maintain AN/AQH-4 sound recorder/reproducer sets at the computer level.

Instruction: Lectures and practical exercises in circuit analysis, alignment, adjustment, and troubleshooting of sound recording and reproducing equipment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in audio electronic equipment maintenance and repair (7/81).

NV-1715-0094

AN/ARC-38A SINGLE SIDE BAND TRANSCEIVER INTERMEDIATE MAINTENANCE

Course Number: C-102-3022.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Norfolk, VA; Air Maintenance Training Detachment, North Island, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 10/69-1/88.

Objectives: To train maintenance personnel to maintain, repair, and test SSB transceiver sets.

Instruction: Lectures and practical exercises in theory of operation and maintenance procedures, including block-diagram and circuit analysis, bench testing, and troubleshooting.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electrical laboratory, and additional credit in electrical laboratory on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory, and additional credit in electrical laboratory on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

NV-1715-0095

ELECTRONICS TECHNICIAN (CLASS C) AN/URC-58, AN/VRC-46 RADIO SETS MAINTENANCE

Course Number: A-101-0036.

Location: Service School Command, San Diego, CA.

Length: 3 weeks (90 hours).

Exhibit Dates: 2/72-1/88.

Objectives: To train enlisted personnel to align, maintain, and repair AN/URC-58 and AN/VRC-46 radio transceiver sets.

Instruction: Lectures and practical exercises in maintenance procedures, block-diagram analysis, and troubleshooting procedures for AN/URC-58 and AN/VRC-46 transceivers.

Credit Recommendation: In the vocational certificate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

NV-1715-0096

P-3A/B COMMUNICATIONS NAVIGATION (COMM/NAV) ORGANIZATIONAL MAINTENANCE

Course Number: C-102-3545.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.

Length: 3 weeks (96 hours).

Exhibit Dates: 10/72-1/88.

Objectives: To train experienced technicians to maintain and repair radio navigation equipment.

Instruction: Lectures and practical exercises in radio navigation system operation; communication system organizational maintenance; and radio navigation equipment, including direction finders, radio altimeters, Loran receiver, TACAN, and marker beacon maintenance and repair.

Credit Recommendation: In the vocational certificate category, credit in electronics laboratory on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, credit in electronics laboratory on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, credit in electronics laboratory on the basis of institutional evaluation (3/74).

NV-1715-0097

Aviation Electronics Technician N (Navigation), Class A

Course Number: None.

Location: Air Technical Training Center, Memphis, TN.

Length: *Version 1:* 9-10 weeks (360-384 hours). *Version 2:* 22 weeks (880 hours).

Exhibit Dates: *Version 1:* 12/58-12/68. *Version 2:* 5/56-11/58.

Objectives: To train enlisted personnel in communications equipment maintenance and repair.

Instruction: *All Versions:* Lectures and laboratories in communications equipment maintenance and repair, including UHF and HF transceiver circuits, test equipment, and troubleshooting procedures; and radio/radar navigational systems operation, test equipment, and troubleshooting procedures. *Version 2:* Includes additional material on AC and DC circuits, pulse circuits and techniques, and basic amplifiers and receivers.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in electronics, 1 in electrical laboratory (3/74). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in electricity, 3 in electronics, 3 in electronic circuits (12/68); in the upper-division baccalaureate category, credit in electronics on the basis of institutional evaluation (3/74).

NV-1715-0098

AN/ARC-54 VHF Communication Set Intermediate Maintenance

Course Number: None.

Location: Air Maintenance Training Detachment, New River, NC; Air Maintenance Training Detachment, Santa Ana, CA; Air Maintenance Training Detachment, Cp. Pendleton, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 6/69-1/88.

Objectives: To train maintenance personnel to maintain, repair, and functionally test AN/ARC VHF communication sets.

Instruction: Lectures and practical exercises in the operation, circuitry, maintenance, and utilization of test equipment in troubleshooting and bench testing AN/ARC-54 VHF communication sets.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronic communications, 1 in electronic communications laboratory (3/74).

NV-1715-0099

AN/SRN-9 Satellite Radio Navigation Set Maintenance (Electronics Technician, Class C1)
(Electronics Technician, Class C, AN/SRN-9 Radio Navigation Set)

Course Number: A-102-0081; A-102-0087.

Location: Service School Command, San Diego, CA; Technical Training Center, Memphis, TN; Fleet Training Center, Norfolk, VA.

Length: 5-6 weeks (160-180 hours).

Exhibit Dates: 3/71-1/88.

Objectives: To train technicians with experience in digital techniques to maintain AN/SRN-9 radio navigation sets.

Instruction: Lectures and practical experience in the operation, practical and corrective maintenance of a navigation receiver and antenna.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics or electronic communications (11/77).

NV-1715-0100

AN/ARC-94 Radio Transceiver Intermediate Maintenance

Course Number: None.

Location: Air Maintenance Training Detachment, Santa Ana, CA; Air Maintenance Training Detachment, North Island, CA; Air Maintenance Training Detachment, Key West, FL; Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, New River, NC.

Length: 3 weeks (114 hours).

Exhibit Dates: 4/69-1/88.

Objectives: To train enlisted personnel to maintain and repair AN/ARC-94 radio transceivers.

Instruction: Lectures and laboratories in AN/ARC-94 radio transceiver maintenance and repair, including single-sideband transmission and reception, and specific transmitter and receiver circuits.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronic communications, 1 in electronic communications laboratory (3/74).

NV-1715-0101

CH-53 Communication, Navigation and Identification (CNI) Systems Organizational Maintenance

Course Number: C-102-3441.

Location: Air Maintenance Training Detachment, New River, NC; Air Maintenance Training Detachment, Santa Ana, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 3/71-1/88.

Objectives: To train enlisted personnel to repair helicopter electronic systems.

Instruction: Lectures and practical exercises in identification, assembly, organizational maintenance, and troubleshooting of CH-53 helicopter electronic systems.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0102

1. Avionics Intermediate, Class C7
2. Avionics Intermediate, Class B
3. Avionics Intermediate, Class B
(Intermediate Avionics, Class B)

Course Number: C-100-2012; C-102-2012; C-111-2012; C-112-2012.

Location: Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN.

Length: *Version 1:* 31-32 weeks (1110 hours). *Version 2:* 28-29 weeks (950-1120 hours). *Version 3:* 32-33 weeks (1264-1336 hours).

Exhibit Dates: *Version 1:* 1/79-9/86. *Version 2:* 6/71-12/78. *Version 3:* 10/65-5/71.

Objectives: To train enlisted personnel to perform complex circuit analysis and avionics maintenance procedures.

Instruction: For this course after 9/86 see NV-1715-1438. *All Versions:* Lectures and practical exercises in mathematics and physics, airborne radar principles, systems analysis, and aviation maintenance and material management procedures. *Version 1:* Includes lectures and practical exercises in electronic devices and systems, digital and digital computer principles, servomechanisms, test equipment operations, communication and microwave principles. *Version 2:* Includes instruction in electronics principles, digital and analog computers, test equipment operation, and transmission and reception principles. *Version 3:* Includes instruction in electronics principles, digital and analog computers and test equipment operation and transmission and reception principles.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 6 semester hours in technical mathematics, 6 in electronics devices and systems, 4 in electricity, 3 in servomechanisms, 3 in digital principles, 3 in communications, 3 in microwave and radar and 2 in physics (mechanics) (2/81); in the upper-division baccalaureate category, 3 semester hours in digital computers (2/81). *Version 2:* In the vocational certificate category, certificate credit in electronics laboratory on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, 8 semester hours in electricity or electronics, 4 in computer technology, 4 in mathematics (3/74); in the upper-division baccalaureate category, 5 semester hours in electricity or electronics, and credit in electronics laboratory on the basis of institutional evaluation (3/74). *Version 3:* In the vocational certificate category, certificate credit in electronics laboratory on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, 8 semester hours in electricity or electronics, 4 in computer technology, 4 in mathematics (3/74); in the upper-division baccalaureate category, 6 semester hours in electricity or electronics, and credit in electronics laboratory on the basis of institutional evaluation (3/74).

NV-1715-0103

1. Solid State Theory and Digital Electronics
2. Solid State Theory for Electronic Equipment
(Solid State Theory)
(Electronics Technician, Class C, Solid State Fundamentals)

Course Number: K-113-2067.

Location: *All Versions:* Fleet Training Center, San Diego, CA. *Version 1:* Fleet Training Center, Pearl Harbor, HI; Fleet Training Center, Yokasuka, Japan. *Version 2:* Electronics Technician, Class C School, Treasure Island, CA.

Length: 2-3 weeks (60-95 hours).

Exhibit Dates: *Version 1:* 1/82-Present. *Version 2:* 3/63-12/81.

Objectives: To provide electronics technicians with training in semiconductor and solid-state technology.

Instruction: *Version 1:* Lectures and laboratory exercises in solid state devices including diodes, bi-polar and field effect transistors, op. amps, thyristors; digital circuits including logic gates, flip flops, shift regulators, counters, combinational circuits, arithmetic elements and Rom and Ram memories, amplifiers and oscillators. *Version 2:* Lectures and practical exercises in transistor and transistor amplifiers, single and multijunction semiconductors, sine wave oscillators operation and theory; switching, gating, and pulsing circuits; and troubleshooting and servicing transistor circuits.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in digital electronic devices and 1 semester hour in digital electronic laboratory for electrical engineering majors (5/82). *Version 2:* In the vocational certificate category, 2 semester hours in electronics laboratory (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (3/74); in the upper-division baccalaureate category, 1 semester hour in electronics, and additional credit in electronics laboratory on the basis of institutional evaluation (3/74).

NV-1715-0104

1. Electrician's Mate, Class C7
2. Electrician's Mate, Class C7
3. Electrician's Mate, Class B
4. Electrician's Mate, Class B

Course Number: A-662-0017.

Location: Service School Command, Great Lakes, IL.

Length: *Version 1:* 18-20 weeks (720-800 hours). *Version 2:* 26 weeks (850 hours). *Version 3:* 30 weeks (900 hours). *Version 4:* 23 weeks (690 hours).

Exhibit Dates: *Version 1:* 10/79-5/87. *Version 2:* 12/76-9/79. *Version 3:* 6/72-11/76. *Version 4:* 10/64-5/72.

Objectives: To train electrician's mates to repair electrical systems with electronic controls.

Instruction: For this course after 5/87 see NV-1715-1295. *All Versions:* Lectures and laboratories in AC and DC circuits, semiconductors, digital logic and logic circuits, controllers operation and troubleshooting procedures, degaussing systems operation and testing, voltage regulators, and AC and DC motors and generators operation and maintenance. *Version 1:* Includes magnetics, AC and DC servo systems, synchros, and elevator repair. *Version 2:* Includes trigonometry, vacuum tubes and AC and DC drive systems. *Version 3:* Includes trigonometry, vacuum tubes and AC and DC drive systems. *Version 4:* Includes trigonometry, vacuum tubes and AC and DC drive systems.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 4 semester hours in AC/DC circuits, 2 in digital logic and 3 in electromechancial systems (1/82). *Version 2:* In the vocational certificate category, 7 semester hours in electricity and electronics, 2 in computer technology and 7 in electricity and electronics laboratory (9/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity and electronics, 2 in computer technology and 1 in electronics laboratory (9/77). *Version 3:* In the vocational certificate category, 14 semester hours in electricity and electronics, 4 in computer technology, and additional credit in electronics laboratory on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity and electronics, 2 in computer technology, and additional credit in electrical laboratory on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, 1 semester hour in digital logic, 1 in rotating machines, and additional credit in electrical laboratory on the basis of institutional evaluation (3/74). *Version 4:* In the lower-division baccalaureate/associate degree category, 2 semester hours in electricity and electronics (12/68).

NV-1715-0105

Communications Systems Technician, Class C

Course Number: A-202-0013; A-580-0014.

Location: Service School Command, San Diego, CA; Communication Station, Washington, DC.

Length: 12 weeks (420–480 hours).

Exhibit Dates: *Version 1:* 2/82–Present. *Version 2:* 12/71–1/82.

Objectives: To train enlisted personnel to operate specific types of communications equipment.

Instruction: *All Versions:* Lectures and laboratories in SSB receiver operation, UHF and microwaves, multiplexing techniques, and the use and interpretation of wavemeter readings. *Version 1:* Includes teletype devices and modems.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic communications, 1 in communication systems laboratory (5/82). *Version 2:* In the vocational certificate category, 6 semester hours in electrical laboratory (6/75); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory (6/75).

NV-1715-0106

AN/GRC-27A Maintenance

(AN/GRC-27A Radio Equipment Maintenance)

Course Number: K-102-276.

Location: Training Command, Pacific, Pearl Harbor, HI; School Command, Treasure Island, CA.

Length: 3 weeks (90 hours).

Exhibit Dates: 8/64–1/88.

Objectives: To train maintenance personnel who have backgrounds in basic electronic theory to maintain AN/GRC-27A radio equipment.

Instruction: Lectures on AN/GRC-27A radio components theory of operation, receiver and transmitter electrical and mechanical alignment procedures, modulator power supply adjustments, and troubleshooting and repair of all major components.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronic communications, 1 in electrical laboratory (3/74).

NV-1715-0107

AN/UGA-3A Maintenance

Course Number: F-160-010.

Location: Submarine School, Groton, CT.

Length: 2 weeks (60 hours).

Exhibit Dates: 11/72–1/88.

Objectives: To train technicians who have completed basic electronics training to maintain and troubleshoot the AN/UGA-3A code converter.

Instruction: Lectures and laboratories in AN/UGA-3A code converter maintenance and troubleshooting procedures, including equipment familiarization; maintenance and material management introduction; logic diagram analysis; digital logic circuits analysis and troubleshooting; and special circuits, output oscillator, demodulator, and power supply operation and maintenance.

Credit Recommendation: In the vocational certificate category, 1 semester hour as an elective in digital circuits (3/74).

NV-1715-0108

Data Systems Technician Class C Data Display Group Maintenance

Course Number: A-150-018.

Location: Naval Schools Command, Mare Island, CA.

Length: 20 weeks (600 hours).

Exhibit Dates: 10/72-1/88.

Objectives: To train enlisted personnel with a background in electronics and digital theory to operate, maintain, and repair data display group equipment.

Instruction: Lectures and practical exercises in operation and maintenance of display consoles, display readouts, symbol generators, radar data switchboards, plug-in module test sets, pulse amplifiers, and communications systems of AN/SYA-4(V) and AN/UYA-4(V) data display groups.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0109

A-6A OA-6672/ASA-48 Universal Encoder Test Console Intermediate Maintenance

Course Number: None.

Location: Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Whidbey, WA.

Length: 2 weeks (80 hours).

Exhibit Dates: 5/70–1/88.

Objectives: To train enlisted personnel to maintain and operate universal encoder test consoles.

Instruction: Lectures and practical exercises in test console description and operation, testing procedures, and troubleshooting procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0110

Data Systems Technician RD-294/UYK Magnetic Tape Unit Maintenance, Class C

Course Number: A-150-0073.

Location: Naval Schools Command, Mare Island, CA.

Length: 3 weeks (90 hours).

Exhibit Dates: 3/71–1/88.

Objectives: To train enlisted personnel with a background in electronics and digital theory to operate, maintain, and repair RD-294/UYK magnetic tape units.

Instruction: Lectures and laboratories in RD-294/UYK magnetic tape unit basics, operational control logic, magnetic tape operations, and system maintenance.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0111

ASA-27 Computer Detector and ASM-76 Test Console Intermediate Maintenance

(Computer Detector (CP-413/ASA-27) Intermediate Maintenance)

Course Number: C-150-3487; C-150-16.

Location: Air Maintenance Training Detachment, Air Maintenance Training Detachment, Miramar, CA North Island, CA.

Length: 8–9 weeks (320–360 hours).

Exhibit Dates: *Version 1:* 9/78-Present. *Version 2:* 1/68–12/72.

Objectives: To train enlisted personnel who are familiar with digital fundamentals and avionics systems to operate, test, and repair computer detectors.

Instruction: Lectures and practical exercises in computer detector operation, function, and theory, including system power supply, block diagram, drum servo system, and timing generator operation; target detection, including radar magnetic drum, quantizers, density detectors, and IFF decoder and density detector; data acquisition, including data control and counting, servos and translators; target computation, including programmer, drum memory, height coordinate computer, and arithmetic and transfer logic; and test circuits and troubleshooting procedures.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic/digital systems, 1 in electronics laboratory (5/85). *Version 2:* Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0112

AN/APN-70B Loran System
Intermediate Maintenance

(P-3 AN/APN-70 Loran System Intermediate Maintenance)

Course Number: C-102-3539.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.

Length: 2–3 weeks (80–120 hours).

Exhibit Dates: *Version 1:* 7/77–Present. *Version 2:* 10/70–6/77.

Objectives: To train maintenance personnel who have backgrounds in transistor theory to operate and maintain the AN/APN-70 Loran navigational system.

Instruction: *All Versions:* Lectures on the AN/APN-70 Loran navigational system components and equipment familiarization, including circuit analysis, block-diagram analysis, radar introduction, low-voltage power supplies, oscillators, and antennas; calibration and alignment adjustment procedures; bench setup troubleshooting Loran equipment and associated test equipment usage; and equipment malfunction isolation and repair procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in avionics or marine electronics (7/81). *Version 2:* Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0113

Communications Officer Ashore

Course Number: A-4C-0016.

Location: Education and Training Center, Newport, RI.

Length: 3–5 weeks (87–120 hours).

Exhibit Dates: 12/71–1/88.

Objectives: To provide officers with instruction in communications procedures, cryptography, care and custody of registered publications, security, and operational communications.

Instruction: Lectures and practical exercises in communications procedures, cryptographic operations, and registered publications system.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0114

P-3 Radar and IFF Systems
Organizational Maintenance

Course Number: C-104-3531.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.

Length: 2–3 weeks (80–120 hours).

Exhibit Dates: 4/70–1/88.

Objectives: To train maintenance personnel to maintain, calibrate, align, and maintain P-3 radar and IFF systems.

Instruction: Lectures and practical exercises in radar and IFF systems, components, and equipment; organizational maintenance; and troubleshooting procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0115

P-3 AN/ASA-16 Indicator Group
Organizational Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, Patuxent River, MD.

Length: 2 weeks (80 hours).

Exhibit Dates: 6/70–1/88.

Objectives: To train fleet maintenance personnel to operate, calibrate, align, and maintain AN/ASA-16 indicator groups.

Instruction: Lectures and practical exercises in indicator group components and equipment, organizational maintenance, and troubleshooting procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0116

F-8 AN/APR-30(V) Radar Set
Intermediate Maintenance

Course Number: C-102-3858.

Location: Air Maintenance Training Detachment, Miramar, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 9/69–1/88.

Objectives: To train fleet maintenance personnel on the radar homing and warning sets.

Instruction: Lectures and practical exercises in theory of operation of radar homing and warning sets, test equipment, circuit analysis, and intermediate maintenance.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0117

P-3 PT-396/AS and OA-1768A/ASA-13
Plotter Group Intermediate
Maintenance

Course Number: C-102-3555.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 7/70–1/88.

Objectives: To train enlisted personnel to operate, maintain, and isolate malfunctions in PT-396/AS and OA-1768A/ASA-13 plotter groups.

Instruction: Lectures and practical exercises in plotting group maintenance and troubleshooting procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0118

P-3 AN/APX-6 Radar Identification
System Intermediate
Maintenance

Course Number: None.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.

Length: 2 weeks (64 hours).

Exhibit Dates: 3/71–1/88.

Objectives: To train maintenance personnel to operate, calibrate, align, and maintain AN/APX-6 radar identification systems.

Instruction: Lectures and practical exercises in radar identification system components and equipment, maintenance, and troubleshooting procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0119

Underwater Fire Control Group Mk
111 Maintenance

Course Number: K-130-0056; A-130-0056.

Location: Fleet Antisubmarine Warfare Training Center, Pacific, San Diego, CA.

Length: 18–23 weeks (540–920 hours).

Exhibit Dates: 3/76–Present.

Objectives: To provide selected sonar technicians with the necessary skills to maintain the specified fire control equipment.

Instruction: Lectures and practical exercises in the preventive and corrective maintenance of sonar based fire control equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic digital troubleshooting (7/86).

NV-1715-0120

P-3 AN/AQA-1 Sono Indicator System
Intermediate Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.

Length: 3 weeks (96 hours).

Exhibit Dates: 12/70–1/88.

Objectives: To train maintenance personnel to operate, calibrate, align, repair, and maintain AN/AQA-1 sono indicator systems.

Instruction: Lectures and practical exercises in AN/AQA-1 components and equipment familiarization, maintenance procedures, use of test equipment, and troubleshooting.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0121

P-3 AN/AQA-5 Sonar Data Recording
System Maintenance, No. 46

Course Number: Not available.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA.

Length: 3–4 weeks (120–160 hours).

Exhibit Dates: 3/68-1/88.

Objectives: To train maintenance personnel in the latest maintenance, modification, and operating procedures for AN/AQA-5 sonar data recording systems.

Instruction: Lectures and practical exercises in AN/AQA-5 sonar data recording system special circuits, functional block diagrams, various circuit analyses, system switching, and power supply operation and maintenance techniques.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0122

Ground Controlled Approach Operator, Class C

Course Number: Not available.

Location: Air Technical Training Unit, Olathe, KS.

Length: 8 weeks (320 hours).

Exhibit Dates: 7/55-12/68.

Objectives: To train enlisted personnel and officers to operate ground controlled approach equipment.

Instruction: Lectures and practical exercises in AN/CPN-4 and AN/MPN-5 radar sets, search radio/telephone procedures, precision radio/telephone procedures, and operational training, including normal approaches, hooded approaches, emergency approaches, and in-flight training.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0123

1. Air Traffic Control Facility Management/TERPS, Class C1
2. Ground Controlled Approach Controller, Class C

Course Number: C-222-2013.

Location: Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN. *Version 2:* Air Technical Training Center, Glynco, GA.

Length: 5-6 weeks (190-240 hours).

Exhibit Dates: *Version 1:* 3/78-4/85. *Version 2:* 3/65-2/78.

Objectives: To train air controlmen, Marine Corps personnel, and radarmen in ground-controlled approach procedures and equipment.

Instruction: Lectures and practical exercises in ground-controlled approach basic operating procedures, ATC radar familiarization, surveillance control training, precision control procedures, and radar air traffic control facility organization and operation.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in basic drafting (2/81). *Version 2:* Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0124

AN/BQS-8 (Series) Sonar Maintenance

Course Number: K-130-1025.

Location: Fleet Anti-Submarine Warfare School, San Diego, CA.

Length: 3 weeks (105 hours).

Exhibit Dates: 6/72-8/77.

Objectives: To train sonar technicians to operate and maintain AN/BQS-8 (Series) sonar detecting-ranging sets.

Instruction: Lectures and practical exercises in theory and principles of continuous transmission, frequency modulated sonars; preventive and corrective maintenance of AN/BQS-8 (Series) Sonar; and the 3-M system.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0125

Basic Navigation Watchstander
(Navigational Technician Watchstander (Enlisted))

Course Number: F-193-076.

Location: Submarine School, Groton, CT.

Length: 3 weeks (90 hours).

Exhibit Dates: 2/69-1/88.

Objectives: To train enlisted personnel to operate and monitor navigational center equipment.

Instruction: Lectures and practical exercises in operation of navigation subsystems primary power and data flow requirements of navigation subsystem equipment, and monitoring navigation centers.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0126

General Submarine Sonar Maintenance

Course Number: A-130-0027; K-130-567; K-130-1009.

Location: Fleet Anti-Submarine Warfare School, San Diego, CA.

Length: 6-17 weeks (240-595 hours).

Exhibit Dates: 8/70-6/79.

Objectives: To train sonar technicians to operate and maintain all sonar equipment found aboard conventional, skate, skipjack, and SSBN-type submarines.

Instruction: Lectures and practical exercises in preventive and corrective maintenance of auxiliary and major sonar equipment.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (8/77).

NV-1715-0127

Gun Fire Control Radar Mk 25 Mod 3 Maintenance

Course Number: J-113-0118; J-113-1181; J-113-1182.

Location: Fleet Combat Direction Systems Training Center, Atlantic, Dam Neck, VA; Fleet Combat Direction Systems Training Center, Atlantic, Newport, RI.

Length: 3 weeks (105 hours).

Exhibit Dates: 10/72-1/88.

Objectives: To teach shipboard personnel to perform required tests, adjustments, troubleshooting, casualty analysis, repairs, and maintenance of Mk 25 Mod 3 radar equipment.

Instruction: Lectures and practical exercises in capabilities and limitations of gun fire control radar systems, including special circuits, power distribution circuits, transmitter and receiver sections theory and operation, automatic tracking and range determination systems circuits and operation, planned maintenance, and radar signal processing equipment.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0128

Navigation Operational Checkout Console (NOCC) Mk 1 Mod 1 Advanced Maintenance

Course Number: A-193-0259; F-193-088.

Location: FBM Submarine Training Center, Charleston, SC.

Length: 2 weeks (80 hours).

Exhibit Dates: 11/72-1/88.

Objectives: To provide navigation electronics technicians with advanced training in the operation and maintenance of Mk 1 and Mod 1 navigation operational checkout consoles theory.

Instruction: Lectures in NOCC circuitry review and Loran C signal simulator functional description; encoder test set; internal NOCC simulator; and troubleshooting, maintenance, and adjustment procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0129

Radar Mk 25 Mod 3 Maintenance

Course Number: K-113-2024.

Location: Fleet Training Center, San Diego, CA.

Length: 2 weeks (60 hours).

Exhibit Dates: 10/72-1/88.

Objectives: To train fire control technicians and strikers to maintain and repair Mk 25 and Mod 3 radar systems.

Instruction: Lectures and practical exercises in Mk 25 and Mod 3 radar familiarization, AC power distribution, power supplies, transmission and receiving systems, indication system, automatic tracking and synchronizing systems, and radar systems maintenance and adjustments.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0130

Electronics Technician, Class C, SSBN Ship's Inertial Navigation System (SINS) Mk 2 Mod 2/3 Technician

Course Number: A-193-015.

Location: Guided Missiles School, Dam Neck, VA.

Length: 26 weeks (910 hours).

Exhibit Dates: 11/72-7/82.

Objectives: To train electronic technicians to operate and maintain ship's inertial navigation systems multispeed repeaters, sonar sounding sets, navigation operational checkout consoles, and navigation subsystem switchboards.

Instruction: Lectures and practical exercises in inertial navigation equipment familiarization, operation, theory of operation, technical maintenance, and subsystem tie-in, and use of associated test equipment.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0131

Loran Receiving Set AN/WPN-5 Operation and Maintenance
(Loran Receiving Sets AN/SPN-38 and AN/WPN-5 Operation, Maintenance and Functional Checkout)

Course Number: L-193-026; F-102-015.

Location: Fleet Submarine Training Facility, Pearl Harbor, HI; Submarine School Groton, New London, CT.

Length: 4 weeks (160 hours).

Exhibit Dates: 10/66-1/88.

Objectives: To train enlisted personnel who have electronics backgrounds to operate and maintain AN/SPN-38 and AN/WPN-5 Loran C receiving sets.

Instruction: Lectures in Loran C receiving sets operation theory and logic analysis; logic fundamentals; binary mathematics; Boolean algebra; and Loran C navigation principles, block-diagram and circuit analysis, generation system and generator logic analysis, voltage-controlled reference oscillator circuit analysis, strobe control and strobe pulse logic analysis, power supply, maintenance standards, and troubleshooting procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0132

Antenna Coupler CU-1441 Combined Maintenance
(Coupler, Antenna CU-1441/BRR Checkout and Maintenance)
(Antenna Series (CU-1441/BRR Multicoupler))

Course Number: A-101-0107; F-101-024; L-101-0031.

Location: Submarine School, New London, CT; Fleet Ballistic Missile Submarine Training Center, Charleston, SC; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 2 weeks (60-65 hours).

Exhibit Dates: 5/67-9/77.

Objectives: To train rated electronics technicians and designated strikers to operate and maintain the CU-1441/BRR antenna multicoupler.

Instruction: Lectures in symbolic integrated maintenance system familiarization; technical manual analysis; circuit analysis; and operational, technical, and preventive maintenance alignment, adjustment and calibration on the CU-1441/BRR antenna multicoupler.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/74).

NV-1715-0133

Underwater Fire Control Group Mk 114 Maintenance

Course Number: *Version 1:* K-130-0057. *Version 2:* A-130-0057; A-130-0058.

Location: *Version 1:* Fleet Anti-Submarine Warfare Training Center, San Diego, CA. *Version 2:* Fleet Sonar School, Key West, FL; Fleet Anti-Submarine Warfare Training Center, Pacific, San Diego, CA.

Length: *Version 1:* 15 weeks (600 hours). *Version 2:* 12-14 weeks (360-420 hours).

Exhibit Dates: *Version 1:* 7/82-Present. *Version 2:* 11/71-6/82.

Objectives: To train enlisted personnel to perform maintenance on the specified fire control system.

Instruction: Lectures and practical exercises in Mark 114 fire control system maintenance, including introduction to weapons, basic maintenance techniques, relay transmitter and position indicator operation, input data flow and stabilization computer maintenance, and attack console operation.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in systems troubleshooting (7/86). *Version 2:* In the vocational certificate category, 1 semester hour in synchro-resolver systems (9/77).

NV-1715-0134

1. Aviation Electrician's Mate, Class B (Advanced)
2. Aviation Electrician's Mate, Class B

Course Number: None.

Location: Air Technical Training Center, Jacksonville, FL.

Length: *Version 1:* 26 weeks (1040 hours). *Version 2:* 33 weeks (1320 hours).

Exhibit Dates: *Version 1:* 10/65-12/68. *Version 2:* 8/56-9/65.

Objectives: To provide aviation electrician's mates with advanced technical training in electricity and electronics.

Instruction: Lectures and practical exercises in advanced principles of DC theory, AC theory, and electronics; aviation electrical and electronic equipment, including motors, generators, aircraft compasses, navigational equipment, flight control equipment, and analog and digital computers; troubleshooting procedures; principles of leadership and management; and supply and maintenance functions.

Credit Recommendation: *Version 1:* In the vocational certificate category, 15 semester hours in electricity or electronics (3/74); in the upper-division baccalaureate category, 6 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional examination (3/74). *Version 2:* In the lower-division baccalaureate/associate degree category, 9 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 9 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

NV-1715-0135

1. Aviation Electrician's Mate Intermediate, Class C7
2. Aviation Electrician's Mate, Class B (Intermediate)
3. Aviation Electrician's Mate, Class B (Intermediate)

Course Number: C-602-2014.

Location: Air Technical Training Center, Millington, TN; Air Technical Training Center, Memphis, TN; Air Technical Training Center, Jacksonville, FL.

Length: *Version 1:* 28 weeks (1089 hours). *Version 2:* 20 weeks (833 hours). *Version 3:* 23 weeks (936 hours).

Exhibit Dates: *Version 1:* 1/78-9/86. *Version 2:* 6/74-12/77. *Version 3:* 10/65-5/74.

Objectives: To provide aviation electrician's mates with advanced technical training in electricity and electronics.

Instruction: For this course after 9/86 see NV-1714-0052. *All Versions:* Lectures and practical exercises in advanced principles of DC theory, AC theory, and electronics; aviation electrical and electronic equipment, including motors, generators, aircraft compasses, navigational equipment, flight control equipment, and analog and digital computers; troubleshooting procedures; principles of supervision and management. *Version 1:* Instruction includes digital and digital computer principles.

Credit Recommendation: *Version 1:* In the vocational certificate category, 5 semester hours in aircraft electrical systems (2/81); in the lower-division baccalaureate/associate degree category, 6 semester hours in technical mathematics, 4 in electricity, 6 in electronics devices and systems, 3 in electrical machinery technology, 3 in digital principles, and 2 in physics (mechanical) (2/81); in the upper-division baccalaureate category, 3 semester hours in digital computers (2/81). *Version 2:* In the vocational certificate category, 15 semester hours in electricity or electronics (6/75); in the lower-division baccalaureate/associate degree category, 6 semester hours in electronic technology, 3 in computer technology, and 3 in machinery technology (6/75). *Version 3:* In the vocational certificate category, 15 semester hours in electricity or electronics (3/74); in the upper-division baccalaureate category, 6 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

NV-1715-0136

Mk 152 Computer Common Core

Course Number: A-113-0068.

Location: Service School Command, Great Lakes, IL.

Length: 8 weeks (296 hours).

Exhibit Dates: 1/75-1/88.

Objectives: To train personnel in corrective and preventive maintenance of the Mk 152 computer and its I/O console and motor generator set.

Instruction: Topics include the recognition of normal and abnormal operation and the use of diagnostic programs to identify malfunction during maintenance of the Mk 152 computer and associated I/O console. Also includes preventive maintenance and repair of the Mk 9 motor generator set.

Credit Recommendation: In the vocational certificate category, 2 semester hours in computer systems and 3 in computer systems laboratory (9/77).

NV-1715-0137

1. Avionics Advanced, Class C7
   (Avionics Advanced, Class B)
2. Avionics Advanced, Class B
   (Avionics, Class B)
   (Aviation Electronics Technician/Aviation Fire Control Technician, Advanced Class B)
3. Aviation Electronics Technician, Class B

Course Number: C-100-2011; C-102-2011; C-111-2011; C-112-2011.

Location: Air Technical Training Center, Millington, Memphis, TN.

Length: *Version 1:* 26 weeks (866-1040 hours). *Version 2:* 31-32 weeks (1256-1280 hours). *Version 3:* 40 weeks (1600 hours).

Exhibit Dates: *Version 1:* 6/71-1/88. *Version 2:* 4/59-5/71. *Version 3:* 4/55-3/59.

Objectives: To train noncommissioned officers to maintain and supervise the maintenance of avionics systems.

Instruction: *All Versions:* Lectures and practical exercises in algebra, trigonometry, electricity and magnetism, AC and DC circuits, basic electronics, small-signal and power amplifier analysis, synchros, servos, transmission lines, antennas, and modulation techniques. *Version 1:* Instruction includes semiconductors, rectifiers, power supplies, amplifiers, oscillators, limiters, clampers, multivibrators, counters, CRTs, and analog computers. *Version 2:* Instruction includes analytical geometry, calculus, limits, differentiation, integration, integrals, transcendental functions, partials, double integrals, infinite series, differential equations, atomic physics, and digital computers.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in mathematics, 3 in physics, and 9 in electricity (6/75). *Version 2:* In the vocational certificate category, 20 semester hours in mathematics, physics, and electrical engineering (3/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in mathematics, 3 in physics, 10 in electricity or electronics (3/74); in the upper-division baccalaureate category, 5 semester hours in mathematics, 5 in physics, 5 in electrical engineering (12/68). *Version 3:* In the vocational certificate category, 25 semester hours in physics and electrical engineering (3/74); in the lower-division baccalaureate/associate degree category, 15 semester hours in physics and electrical engineering (3/74); in the upper-division baccalaureate category, 6 semester hours in physics (electricity), 12 in electrical engineering (12/68).

NV-1715-0138

Aviation Fire Control Technician (F) Conversion (Class C)

Course Number: None.
Location: Air Weapons Systems School, Jacksonville, FL.
Length: 27 weeks (1080 hours).
Exhibit Dates: 8/57–12/68.
Objectives: To train enlisted personnel to inspect, test, and repair aircraft armament systems.
Instruction: Lectures and practical experience in AC and DC circuit fundamentals and the inspection, testing, and repair of communication circuits, gyroscopes, vacuum tubes, radar, accelerometers, optics, and servomechanisms.
Credit Recommendation: In the vocational certificate category, 9 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (3/74); in the upper-division baccalaureate category, 4 semester hours in electricity or electronics, and additional credit in electrical laboratory on the basis of institutional evaluation (12/68).

NV-1715-0139

Aviation Fire Control Technician (B) Conversion (Class C)

Course Number: Not available.
Location: Air Weapons Systems School, Jacksonville, FL.
Length: 27 weeks (1080 hours).
Exhibit Dates: 8/57–12/68.
Objectives: To train Navy and Marine Corps enlisted personnel to inspect, test, troubleshoot, and repair aircraft armament control systems.
Instruction: Lectures and practical experience in aircraft armament control systems inspection, testing, troubleshooting, and repair, including AC and DC circuits fundamentals, gyroscopes, accelerometers, optics, vacuum tubes, radar, servomechanisms, and communication circuits.
Credit Recommendation: In the vocational certificate category, 9 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (12/68).

NV-1715-0140

Aviation Fire Control Technician F (Armament Control), Class A

Course Number: Not available.
Location: Air Technical Training Center, Memphis, TN.
Length: 24 weeks (960 hours).
Exhibit Dates: 6/56–12/68.
Objectives: To train Navy and Marine Corps enlisted personnel to isolate electrical and mechanical malfunctions in fire control systems.
Instruction: Lectures and practical exercises in aviation fire control systems, AC circuits, resonance, vacuum tubes, audio amplifiers, radio receivers and transmitters, servomechanisms, and troubleshooting and maintenance procedures.
Credit Recommendation: In the vocational certificate category, 9 semester hours in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, 6 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (12/68).

NV-1715-0141

Aviation Fire Control Technician B (Bomb Director), Class A

Course Number: Not available.
Location: Air Technical Training Center, Memphis, TN.
Length: 24 weeks (960 hours).
Exhibit Dates: 6/56–12/68.
Objectives: To train Navy and Marine Corps enlisted personnel to isolate and troubleshoot electronic and mechanical malfunctions in fire control equipment.
Instruction: Lectures and practical experience in AC circuit fundamentals; series and parallel resonant circuits; vacuum tube characteristics, including diodes, triodes, tetrodes, and pentodes; full- and half-wave rectifiers and filter circuits; audio frequency amplifier basics, including R-C, impedance, and transformer coupled amplifiers; power amplifiers; receiver alignment and troubleshooting; and radio receiver theory, including amplifiers, detectors, superheterodyne systems, and I-F systems.
Credit Recommendation: In the vocational certificate category, 9 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours in electricity or electronics for non-engineering majors (3/74).

NV-1715-0142

F-4 Basic Electrical Systems Organizational Maintenance

Course Number: C-602-3821.
Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Oceana, VA.
Length: 4 weeks (160 hours).
Exhibit Dates: 4/73–1/88.
Objectives: To train enlisted personnel to repair F-4 aircraft electrical systems.
Instruction: Lectures and practical exercises in F-4 aircraft AC and DC electrical generation systems; power distribution; transformers; and hydraulic, pneumatic, fuel, attitude reference, and flight control systems maintenance.
Credit Recommendation: In the vocational certificate category, 6 semester hours in electronics or electronics laboratory, 2 in hydraulics and fluids (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics or electronics laboratory, 1 in hydraulics and fluids (3/74).

NV-1715-0143

RA-5C Panoramic Camera Shop Maintenance

Course Number: C-100-3745.
Location: Air Maintenance Training Detachment, Sanford, FL.
Length: 6 weeks (240 hours).
Exhibit Dates: 1/68–1/88.
Objectives: To train maintenance personnel to maintain and service electronic camera systems.
Instruction: Lectures and practical exercises in an introduction to panoramic cameras, test equipment, panoramic camera control electronics and automatic exposure control, mounts and mount electronics, and maintenance of panoramic cameras.
Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics laboratory (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (3/74).

NV-1715-0144

AN/APN-120 Electronic Altimeter Intermediate Maintenance

Course Number: C-102-3742.
Location: Air Maintenance Training Detachment, Sanford, FL.
Length: 4 weeks (160 hours).
Exhibit Dates: 4/68–1/88.
Objectives: To train electronic repairmen to maintain electronic altimeters.
Instruction: Lectures and practical exercises in altimeter principles; low- and high-altitude systems theory, control circuits, power supply, amplifiers, modulators, oscillators, and test equipment maintenance; and electronic countermeasures equipment, operation, maintenance, and testing procedures.
Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics and electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics and electrical laboratory (3/74).

NV-1715-0145

RA-5C AN/ASQ-56A Integrated Electronics Central and Related Systems Intermediate Maintenance

Course Number: C-102-3741.
Location: Air Maintenance Training Detachment, Albany, GA.
Length: 7 weeks (280 hours).
Exhibit Dates: 5/68–1/88.
Objectives: To train maintenance personnel to repair integrated electronic airborne systems.
Instruction: Lectures and practical exercises in UHF communications repair, tactical air navigation system principles, pulse coding and decoding techniques, and antenna and intercommunication system theory and troubleshooting procedures.
Credit Recommendation: In the vocational certificate category, 6 semester hours in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electrical laboratory (3/74).

NV-1715-0146

A-7E AN/ASM-375 Inertial Measurement System Test Set Intermediate Maintenance

Course Number: C-102-3798.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL.

Length: 6-7 weeks (240-260 hours).

Exhibit Dates: *Version 1:* 6/77-Present. *Version 2:* 11/72-5/77.

Objectives: To train maintenance personnel to repair inertial measurement system test sets.

Instruction: *All Versions:* Lectures and practical exercises in inertial measurement system theory and maintenance techniques, including digital fundamentals, logic functions and trace signal flow. *Version 1:* Includes fault isolation. *Version 2:* Includes power supplies, switching units, and programming.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in digital electronics fundamentals or 1 semester hour in digital electronics fundamentals for electrical engineering majors (3/82). *Version 2:* In the vocational certificate category, 4 semester hours in digital computer fundamentals (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in digital computer fundamentals (3/74).

NV-1715-0147

Mk 35 Power Drive Maintenance for 3"/50 Caliber Rapid Fire Gun Mount

Course Number: K-041-2051.

Location: Fleet Training Center, San Diego, CA.

Length: *Version 1:* 3 weeks (90 hours). *Version 2:* 2 weeks (60 hours).

Exhibit Dates: *Version 1:* 10/78-Present. *Version 2:* 10/72-9/78.

Objectives: To train enlisted personnel to perform preventive and corrective maintenance and casualty analysis on the 3'/50 Mk 35 power drive rapid-fire gun mount.

Instruction: *All Versions:* Lectures and practical exercises in Mk 35 power drive description, function, and operation; power control, gun mount control, and motor field control circuits; and inspection, testing, and preventive and corrective maintenance procedures. *Version 1:* Includes basic electrical theory including AC/DC circuits and circuit theory.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in basic electrical theory (5/82). *Version 2:* Credit is not recommended because of the military-specific nature of the course (3/74).

NV-1715-0148

CHAFFROC Mk 28 Mod 1 Launcher Systems Maintenance

Course Number: K-041-2010.

Location: Fleet Training Center, San Diego, CA.

Length: 3 weeks (90 hours).

Exhibit Dates: 2/73-1/88.

Objectives: To train enlisted personnel who have experience in basic hydraulics and electricity to operate, load, and launch decoys.

Instruction: Lectures in basic electrical review, including Ohm's law, magnetism, conductors, resistors, insulators, circuits, meters, and batteries; hydraulics principles, including Pascal's law, Bernoulli's law, and hydraulic pumps; and launch operation, including electrical firing circuits, applied hydraulics, and local and remote control techniques.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics, and additional credit in electronics on the basis of institutional evaluation (3/74).

NV-1715-0149

Solid State Circuit Troubleshooting Techniques

Course Number: C-000-3189.

Location: Air Maintenance Training Detachment, Miramar, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 2/73-1/88.

Objectives: To train maintenance personnel to troubleshoot and repair solid-state electronic circuits.

Instruction: Lectures and practical exercises in solid-state circuits and troubleshooting, including diode limiters, rectifiers, detector circuits, silicon controlled rectifier circuits, basic types of transistor circuits, multivibrators and oscillators, DC and operational amplifiers, and test equipment for troubleshooting.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics (3/74); in the lower-division baccalaureate/associate degree category, credit in electronics on the basis of institutional evaluation (3/74).

NV-1715-0150

C-2A Electrical and Instruments Organizational Maintenance

Course Number: C-602-3491.

Location: Air Maintenance Training Detachment, North Island, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 8/67-1/88.

Objectives: To train aviation electricians to repair, maintain, and troubleshoot aircraft electrical and instrument systems.

Instruction: Lectures and practical exercises in aircraft AC and DC power systems operation, circuit analysis, maintenance, and repair; and aircraft utility, environmental, instrumental, and electrical systems maintenance, repair, and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics (3/74).

NV-1715-0151

F-4B 20 KVA and AN/AJB-3A Electrical Organizational Maintenance

Course Number: C-602-3825.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Oceana, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 2/73-1/88.

Objectives: To train fleet maintenance personnel to maintain power generating systems and loft bomb release computer systems on F-4B aircraft.

Instruction: Lectures and practical exercises in circuit analysis and organizational maintenance of power generating and loft bomb release computer systems, use of test equipment, and troubleshooting procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0152

RA-5C Photographic Electronics Fundamentals

Course Number: C-602-3748.

Location: Air Maintenance Training Detachment, Albany, GA.

Length: 4 weeks (120 hours).

Exhibit Dates: 1/70-1/88.

Objectives: To teach maintenance personnel the fundamentals of electrical systems, electronics, and transistors in preparation for camera shop maintenance instruction.

Instruction: Lectures and practical exercises in basic electronics and solid-state electronics, including resistance, inductance, capacitance, circuits, conductors, transistors, power supplies, semiconductor devices, and test equipment.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electronics and electronics laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics and electronics laboratory (3/74).

NV-1715-0153

F-4B/J Advanced Electrical Organizational Maintenance

Course Number: C-602-3822.

Location: Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Oceana, VA.

Length: 3 weeks (120 hours).

Exhibit Dates: 6/72-1/88.

Objectives: To train fleet maintenance personnel to maintain F-4B/J power-generating, air data computer, and automatic flight control groups.

Instruction: Lectures and practical exercises in power-generating systems, air data computer sets and related systems, automatic flight control groups, circuit analysis, and organizational maintenance.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics (3/74).

NV-1715-0154

1. Aviation Antisubmarine Warfare (AASW) Technician, Class A (Aviation Electronics Technician S (Antisubmarine), Class A)
2. Aviation Electronics Technician S (Antisubmarine), Class A

Course Number: Not available.

Location: Air Technical Training Center, Millington, Memphis, TN.

Length: *Version 1:* 9-11 weeks (342-360 hours). *Version 2:* 22 weeks (880 hours).

Exhibit Dates: *Version 1:* 12/58-12/68. *Version 2:* 5/56-11/58.

Objectives: To train enlisted personnel to maintain and repair antisubmarine warfare equipment.

Instruction: *All Versions:* Lectures and practical exercises in antisubmarine warfare equipment repair, including airborne sonar, special detecting systems, sonobuoy systems, magnetic airborne detection systems, and dipping sonar equipment. *Version 1:* Instruction includes integrated display systems repair. *Version 2:* Instruction includes electronic fundamentals; UHF and VHF; transmitter theory and radar electronics, including amplification, rectification, power amplifiers, AC fundamentals, and series-parallel resonance.

Credit Recommendation: *Version 1:* Credit is not recommended because of the limited technical nature of the course (3/74). *Version 2:* In the vocational certificate category, 9 semester hours in electricity or electronics (3/74); in the upper-division baccalaureate category, 3 semester hours in electronics, 3 in electronic circuits, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

NV-1715-0155

Fire Control Technician, Class A
(Phases I and II)

Course Number: A-113-0010; A-113-0012; A-113-0019; A-113-0021.

Location: Service School Command, Bainbridge, MD; Service School Command, Great Lakes, IL; Service School Command, Mare Island, CA.

Length: *Version 1:* 26 weeks (910 hours). *Version 2:* Phase I, 11 weeks; Phase II, 12-13 weeks weeks (Phase I, 410 hours; Phase II, 427 hours). *Version 3:* Phase I, 11 weeks; Phase II, 13 weeks (Phase I, 330 hours; Phase II, 390 hours). *Version 4:* Phase I, 18 weeks; Phase II, 14 weeks (Phase I, 520 hours; Phase II, 440 hours). *Version 5:* 31 weeks (930 hours).

Exhibit Dates: *Version 1:* 5/83-Present. *Version 2:* 1/77-4/83. *Version 3:* 7/75-12/76. *Version 4:* 1/68-6/75. *Version 5:* 1/56-12/67.

Objectives: To train enlisted personnel with prior electrical experience in complex weapons guidance and control systems.

Instruction: *Version 1:* The full 26 week course content is the same as described in version 2 of this exhibit. *Version 2:* Phase I: The course content is the same as described below in version 3. Phase II: Lectures and laboratory exercises on microwave tubes, wave guides, video amplifier, antennas, radar principles, numbering systems and arithmetic, logic blocks, Boolean expressions and realization, adders, counters, digital computers, I/O systems, converters (AD and DA), programming, analog computer fundamentals, encoders, decoders, core memory, and fire control radar systems. *Version 3:* Phase I: Lectures and practical exercises in the use of fire control equipment and all related equipment needed to keep the fire control system operational including test equipment, transmitters, receivers, motor-generators, gyros, syncros, resolvers, servo system fundamentals, oscilloscope operation, amplifiers, oscillators, and wave forming circuitry without a rigorous mathematical treatment. Phase II: Lectures and laboratory exercises in numbering systems and arithmetic, logic blocks, Boolean expressions and realizations, adders, counters, digital computers, I/O systems, converters (AD and DA), analog computer fundamentals, encoders, decoders, core memory, and fire control radar systems. *Version 4:* Lectures and practical exercises in theory, operation, maintenance and repair of weapons guidance and control systems, including mathematics, magnetic amplifiers, gyroscopes, mathematical analysis of electronic circuits, theory and construction of computers, solution types of analog and digital computing devices, A-D and D-A conversion, Boolean algebra, binary and actual number systems, logic circuitry and diagrams, programming methods and troubleshooting procedures, test equipment theory and usage, solid-state electronics. *Version 5:* Topics include basic electricity, synchros, servos, and basic and advanced electronics.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in solid state electronics, 3 in electromechanical systems, 3 in digital circuits, 2 in microwave fundamentals, 1 in electronics laboratory, 1 in digital laboratory, and 1 in radar maintenance (1/86). *Version 2:* In the vocational certificate category, 3 semester hours in electronics laboratory, 3 in electromechanical laboratory for phase I and 3 semester hours in radar electronic maintenance for phase II; in the lower-division baccalaureate/associate degree category, 3 semester hours in electronic fundamentals, 3 in electromechanical systems for phase I and 3 semester hours in digital logic, 2 in microwave fundamentals and 2 in digital computer machine language programming for phase II (1/82). *Version 3:* In the vocational certificate category, 3 semester hours in basic electronics, 2 in electromechanical systems operation, and 2 in electronics laboratory for Phase I (9/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronic fundamentals for Phase I and 5 semester hours in digital and radar electronics and 2 in digital and radar electronics laboratory for Phase II (9/77). *Version 4:* In the lower-division baccalaureate/associate degree category, 3 semester hours in electricity, radio, or electronics for Phase I and 3 in electricity, radio, or electronics for Phase II (12/68); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74). *Version 5:* In the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

NV-1715-0156

Miniature Component Repair

Course Number: C-000-3182.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Albany, GA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Meridian, MS; Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Kingsville, TX; Air Maintenance Training Detachment, Cherry Point, NC; Air Maintenance Training Detachment, North Island, CA; Air Maintenance Training Detachment, New River, NC; Air Maintenance Training Detachment, Cecil Field, FL; Air Maintenance Training Detachment, Quonset Point, RI; Air Maintenance Training Detachment, Norfolk, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 2/73-1/86.

Objectives: To train maintenance personnel to repair printed circuit boards.

Instruction: Lectures and laboratory exercises in the selection and use of handtools for maintenance and soldering of printed circuits, terminals, and conductor pins, and the latest methods on conformed coating and component removal from printed circuit boards; repair of circuit boards, runs, and eyelets; techniques of soldering on printed circuit boards, for making connections to turret terminals, hook and eyelet terminals, and bifurcated terminals; and inspection and evaluation of soldered electrical connections.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics laboratory (3/74); in the lower-division baccalaureate/associate degree category, credit in electronics laboratory on the basis of institutional evaluation (3/74).

NV-1715-0157

Microminiature Component Repair
Intermediate Maintenance

Course Number: C-000-3187.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Cherry Point, NC; Air Maintenance Training Detachment, Cecil Field, FL.

Length: 2 weeks (80 hours).

Exhibit Dates: 3/73-1/88.

Objectives: To train maintenance personnel to repair microminiature printed circuits.

Instruction: Lectures and laboratory exercises in the selection and use of the proper hand tools for repair and soldering of microminiature printed circuits, digital encoders, and solderable connectors; methods of microminiature disassembly, circuit board laminate and conductor repair, electronic soldering, correct splicing of electrical wire, electroplating electronic circuits, repairing plastic edge-lighted panels, and maintenance of microminiature repair stations.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics laboratory (3/74); in the lower-division baccalaureate/associate degree category, credit in electronics laboratory on the basis of institutional evaluation (3/74).

NV-1715-0158

Sonar Technician, Class B
(Advanced Sonarman)

Course Number: C-570; K-130-570.

Location: Fleet Antisubmarine Warfare School, San Diego, CA; Fleet Sonar School, Key West, FL.

Length: 33-44 weeks (989-1232 hours).

Exhibit Dates: 1/64-5/78.

Objectives: To train enlisted personnel in electronics and physics fundamentals applicable to sonar equipment and systems.

Instruction: Lectures and practical exercises in mathematics, including basic trigonometry; AC and DC circuit fundamentals; network theorems; transistors, power supplies, amplifiers, and oscillators; pulse and switching circuits; amplitude and frequency modulation and detection; analog and digital computer principles; and servomechanisms.

Credit Recommendation: In the vocational certificate category, 15 semester hours in electricity or electronics and credit in electrical laboratory on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, 6 semester hours in electricity or electronics (3/74).

NV-1715-0159

1. AN/AVA-1 Vertical Display Indicator Group Intermediate Maintenance
2. A-6A AN/AVA-1 Vertical Display Indicator Group and Associated Test Equipment Intermediate Level Maintenance

Course Number: C-198-3761.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.

Length: *Version 1:* 5 weeks (216 hours). *Version 2:* 11 weeks (440 hours).

Exhibit Dates: *Version 1:* 8/76–Present. *Version 2:* 1/70–7/76.

Objectives: To train technicians to troubleshoot, maintain and repair a radar vertical display system.

Instruction: *Version 1:* Lectures and laboratory instruction in basic electronic theory including flip-flops, logic devices and Schmitt triggers. Also included are basic television, power supplies, video amplifiers and saw tooth generators as found in the display indicator both at the block and schematic level. Approximately half the course is devoted to video circuit theory and the remainder to practical application and laboratory work. *Version 2:* Lectures and practical exercises in basic electronic theory, including diodes, transistors, and cathode ray tubes; radar review; emphasis on radar and video receiver circuit purpose, location, and block diagram description; semiautomatic check-out equipment familiarization and application to troubleshooting the video display and radar receiving system.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in electronic technology, 3 in electronics laboratory (7/80); in the lower-division baccalaureate/associate degree category, 4 semester hours in engineering electronic technology (7/80). *Version 2:* In the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory, and additional credit in electronics laboratory on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, credit in electronics laboratory on the basis of institutional evaluation (3/74).

NV-1715-0160

1. Photographic Equipment Maintenance and Repair, Class C
2. Photographic Equipment Maintenance
3. Photographic Equipment Repair, Class C

Course Number: *All Versions:* C-670-2012; *Version 3:* C-670-12.

Location: Naval Technical Training Center, Pensacola, FL.

Length: *Version 1:* Self-paced 15 weeks (573 hours). *Version 2:* Self-paced 15 weeks (530 hours). *Version 3:* 14–15 weeks (556–600 hours).

Exhibit Dates: *Version 1:* 1/83–12/84. *Version 2:* 8/75–12/82. *Version 3:* 10/63–7/75.

Objectives: To train photographer's mates to repair standard mechanical photographic equipment used in naval photography.

Instruction: *Version 1:* Course uses modular, self-paced individualized instruction as the primary instructional method with a heavy emphasis on performance. It includes eight modules and a five-day performance laboratory. There is an optional nine-day aerial cameras and systems module which some students elect to take instead of the eight modules. NOTE: Students who attend only the nine-day aerial cameras and systems module are not elegible for credit. The eight modules are: photographic laboratory supervision, mechanical application skills, basic camera components, basic DC electricity, SLR and rangefinder camera, applied DC electricity, basic AC electricity, and applied AC electricity. For the course after 1984, see exhibit NV-1709-0029. *Version 2:* Course uses modular, self-paced individualized instruction as the primary instructional method with a heavy emphasis on performance. It includes eight modules and a five-day performance laboratory. There is an optional nine-day aerial cameras and systems module which some students elect to take instead of the eight modules. NOTE: Students who attend only the nine-day aerial cameras and systems module are not eligible for credit. The eight modules are: photographic laboratory supervision, mechanical application skills, basic camera components, basic DC electricity, SLR and rangefinder camera, applied DC electricity, basic AC electricity, and applied AC electricity. *Version 3:* Lectures and laboratories in photographic equipment repair, including DC circuit fundamentals, electron theory, and hand tools usage. Instruction emphasizes aerial camera components and principles, motion picture systems, (CMY-5, CMY-2a, and KF-9) and still ground cameras (Graflex); multimeters and soldering techniques; twin lens reflex cameras (Mamiyaflex C-3), dual-curtain focal plane camera (KE-28), and mechanical Rapidyne shutters; and photographic laboratory film processing equipment, advanced aerial equipment, and Navy camera control systems repair procedures.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in photo department operations, 8 in camera repair or photographic equipment repair and additional credit in electricity and electronics on the basis of demonstrated skills and/or institutional evaluation (see note above)(3/84). *Version 2:* In the lower-division baccalaureate/associate degree category, 8 semester hours in camera repair or photographic equipment repair and additional credit in electricity and electronics on the basis of demonstrated skills and/or institutional evaluation (see note above) (1/77). *Version 3:* In the vocational certificate category, 3 semester hours in electronics, and credit in photography on the basis of institutional evaluation (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics, and credit in photography on the basis of institutional evaluation (4/74).

NV-1715-0161

Antenna Multicoupler AN/BRA-16 Combined Maintenance
(Antenna Group AN/BRA-16 Functional Check-Out and Maintenance)

Course Number: A-101-0104; F-101-019.

Location: Submarine School, New London, CT; Fleet Ballistic Missile Submarine Training Center, Charleston, SC; Submarine Training Center, Pacific, Pearl Harbor, HI.

Length: 3 weeks (90 hours).

Exhibit Dates: 11/72–1/88.

Objectives: To provide the theory and skills to operate, maintain, troubleshoot and repair the AN/BRA-16 submarine antenna.

Instruction: Lectures and practical exercises in AN/BRA-16 antenna components operation, troubleshooting, and repair, including power supply, control panels, test equipment, maintenance charts, antenna circuitry, navigation output phasing, and mast preamplifier circuitry.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electronics laboratory (9/77).

NV-1715-0162

AN/ASN-99(V) Projected Map Display Set Intermediate Maintenance
(AN/ASN-99 Projected Map Display Set Intermediate Maintenance)

Course Number: C-102-3787.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL.

Length: *Version 1:* 4 weeks (160 hours). *Version 2:* 2 weeks (80 hours).

Exhibit Dates: *Version 1:* 10/77–Present. *Version 2:* 9/72–9/77.

Objectives: To train qualified electronics technicians to operate, maintain, and troubleshoot the AN/ASN-99 projected map display set.

Instruction: *All Versions:* Lectures and practical exercises in AN/ASN-99 projected map display set operation, maintenance, and troubleshooting, including servomechanisms, block-diagram analysis, and maintenance and fault isolation procedures. *Version 2:* Includes digital logic review, maintenance procedures and training on model equipment.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic circuit analysis, 1 in electronic troubleshooting laboratory for non-electrical engineering majors (3/82). *Version 2:* In the vocational certificate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

NV-1715-0163

Continuous Wave Illuminator (CWI) Common Core

Course Number: A-113-0070.

Location: Service School Command, Great Lakes, IL.

Length: 4 weeks (108 hours).

Exhibit Dates: 11/74–1/88.

Objectives: To train selected personnel to perform circuit-level fault isolation and planned maintenance on a continuous-wave illuminator.

Instruction: Instruction includes use of instruments to isolate and repair the continuous-wave illuminator radar system; operating procedures; and regular maintenance.

Credit Recommendation: In the vocational certificate category, 2 semester hours in radar systems laboratory (9/77).

NV-1715-0164

E-1B AN/ASN-28 Central Gyro Reference System Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA; Air Maintenance Training Detachment, Norfolk, VA.

Length: 6 weeks (240 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To train maintenance personnel with backgrounds in electronics to maintain, troubleshoot, and repair the AN/ASN-28 central gyro reference system.

Instruction: Lectures and practical exercises in central gyro reference system maintenance and repair, including in-depth functional and circuit-level descriptions of components, power systems, and control circuits; circuit card and card components troubleshooting; electronic control amplifier, including azimuth, pitch and roll servo signal processing, logic, relay, and power circuitry, and resolver excitation and accelerometer restoring amplifier; navigational computer amplifiers, relay control circuits, power supply, gyroscope assembly control, signal data converter, and environmental controls; and extensive alignment, troubleshooting and bench-testing experience.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, credit in electronics or aviation on the basis of institutional evaluation (4/74).

NV-1715-0165

Advanced Transistor Theory

Course Number: F-000-023.

Location: Submarine School, Groton, CT.

Length: 3 weeks (90 hours).

Exhibit Dates: 2/68–1/88.

Objectives: To train electronics technicians to operate, troubleshoot, and repair semiconductor devices.

Instruction: Lectures and laboratories in transistor and circuit theory; energy diagrams; physics and chemistry of crystals; transistor amplification and power gain; contruction and basic principles of Zeners, thermistors, and photo and tunnel diodes; AC and DC circuits review, including network theorems and mesh equation solutions using determinants; circuit analysis of CE, CB, and CC amplifier configurations using graphical and small signal, h-parameter equivalent circuits; interstage coupling methods, including gain, frequency response, and feedback circuits; transistor applications in digital circuits, high-frequency equivalent circuits, and FET properties; bias equations, stability, and noise design considerations; and unijunction transistors and SCR properties.

Credit Recommendation: In the vocational certificate category, 5 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electrical laboratory (4/74); in the upper-division baccalaureate category, 2 semester hours in electronic engineering on the basis of institutional evaluation (4/74).

NV-1715-0166

Sonar Communications Set AN/WQC-2/2A Operation and Maintenance (Surface)
(Sonar Communications Set AN/WQC-2/2A Operation and Maintenance)

Course Number: A-130-0213; K-130-0213.

Location: Fleet Anti-Submarine Warfare Training Center, San Diego, CA; Fleet Anti-Submarine Warfare Training Center-Atlantic, Norfolk, VA.

Length: 1–2 weeks (42 hours).

Exhibit Dates: 3/78–Present.

Objectives: To instruct personnel in the operation and routine maintenance of a sonar communications set.

Instruction: Instruction in routine operation and maintenance of the sonar communication set.

Credit Recommendation: Credit is not recommended because of the military specific nature of the course (3/89).

NV-1715-0167

Intermediate Aviation Antisubmarine Warfare (AASW) Technician, Class B

Course Number: Not available.

Location: Air Technical Training Center, Memphis, TN.

Length: 34 weeks (1360 hours).

Exhibit Dates: 1/63–1/88.

Objectives: To provide aviation antisubmarine warfare technicians with supplemental training in electronics theory and antisubmarine warfare equipment maintenance and repair.

Instruction: Lectures and practical experience in mathematics through trigonometry; electronics, including AC and DC fundamentals, tubes, transistors, power supplies, voltage regulators, video and magnetic amplifiers, oscillators, servomechanisms, mixing and frequency conversion; and analog and digital computer principles.

Credit Recommendation: In the vocational certificate category, 20 semester hours in electronics (3/74); in the lower-division baccalaureate/associate degree category, 8 semester hours in electronics, and additional credit in electronics on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, 5 semester hours in mathematics, 5 in physics, 5 in engineering electronics (12/68).

NV-1715-0168

Electronics Technician, Class C, SSBN Naval Data Automated Computer (NAVDAC) Fleet Ballistic Missile (FBM) Tender Navigation Maintenance

Course Number: A-193-0039.

Location: Guided Missiles School, Dam Neck, VA.

Length: 6 weeks (210 hours).

Exhibit Dates: 11/72–1/88.

Objectives: To provide electronics technicians with supplemental training in ballistic-missile submarine systems maintenance and repair.

Instruction: Laboratory in calibration, testing, and repair of ballistic missile submarine systems equipment, including SDC test systems, servo amplifier, synchro/resolver, and NAVDAC test sets, and NAVDAC magnetic drum loader operation, maintenance, troubleshooting, and repair; advanced soldering and wire-wrapping techniques; and ancillary commercial test equipments, including oscilloscope, signal generator, electronic counter, differential voltmeter, megohmeter, ratio transformer, RMS voltmeter, and electronic voltmeter.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electronics laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics laboratory (3/74); in the upper-division baccalaureate category, credit in electronics laboratory on the basis of institutional evaluation (3/74).

NV-1715-0169

Electronics Specialized Training

Course Number: A-100-0031.

Location: Amphibious School Coronado, San Diego, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 11/72–1/88.

Objectives: To train electronics technicians to operate, maintain, and repair radio, radar, and cryptographic equipment.

Instruction: Lectures include radar, SSB transmission, radio frequency interference, and teletype review; waterproofing equipment usage; antenna theory and wave propagation review. Emphasis is on circuit analysis, operation, and preventive maintenance procedures for specific radio, radar, and cryptographic equipment.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0170

Avionics Officers, Class O

Course Number: C-4B-2010.

Location: Air Technical Training Center, Memphis, TN.

Length: 40 weeks (1600 hours).

Exhibit Dates: *Version 1:* 9/71–1/88. *Version 2:* 11/69–8/71. *Version 3:* 1/69–10/69. *Version 4:* 9/68–12/68.

Objectives: To train officers to be avionics officers.

Instruction: Lectures and practical exercises in algebra, trigonometry, differential and integral calculus, and differential equations; calculus-based physics, both traditional and modern; AC and DC circuits, circuit analysis, measurements and standards, electromagnetic wave theory, microwave devices and principles; and digital and analog computers.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 9 semester hours in mathematics, 6 in physics, 3 in maintenance management, and 14 in engineering electronics (6/74). *Version 2:* In the upper-division baccalaureate category, 4 semester hours in mathematics, 3 in physics, 2 in maintenance management, and 12 in engineering electronics (12/68). *Version 3:* In the upper-division baccalaureate category, 4 semester hours in mathematics, 3 in physics, 2 in maintenance management, and 14 in engineering electronics (12/68). *Version 4:* In the upper-division baccalaureate category, 4 semester hours in mathematics, 3 in physics, 2 in maintenance management, and 15 in engineering electronics (12/68).

NV-1715-0171

Navy Nuclear Weapons Electronics, Calibration, and Maintenance (EC) (Gunner's Mate Technician)

Course Number: A-140-0010.

Location: Defense Atomic Support Agency, Albuquerque,NM.

Length: 12 weeks (472 hours).

Exhibit Dates: 11/72–1/88.

Objectives: To train electronics technicians to operate, maintain, and calibrate air and surface nuclear weapons test equipment.

Instruction: Lectures and practical exercises in electrical and electronic fundamentals, and tester maintenance and calibration, including circuit symbols and diagrams, repair procedures, commercial test equipment, performance tests, basic metrology, electrical indicating meters and multimeters, electronic voltmeters, pressure concepts and pressure gauge theory and specifications, and torque tools and testers. Electrical and electronic fundamentals are reviewed extensively. Emphasis throughout the remainder of the course is on operation and maintenance of specific test sets.

Credit Recommendation: In the vocational certificate category, 8 semester hours in electronics (3/74); in the upper-division baccalaureate category, credit in electronics on the basis of institutional evaluation (3/74).

NV-1715-0172

P-3 AN/APA-125A Indicator Group Intermediate Maintenance
(P-3 AN/APA-125A Indicator Maintenance, No. 48)

Course Number: C-102-3535.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Training Detachment, Jacksonville, FL; Air

Maintenance Training Detachment, Moffett Field, CA.

Length: 3 weeks (104 hours).

Exhibit Dates: *Version 1:* 5/75–Present. *Version 2:* 1/68–4/75.

Objectives: To train maintenance personnel with a knowledge of electronics and transistor theory to operate, calibrate, align, and maintain an aircraft radar indicator display.

Instruction: *All Versions:* Lectures and practical exercises in theory, maintenance, and operation of the AN/APA-125A radar indicator, including low- and high-voltage power supplies, range gate generators, video amplifiers and mixers, indicator control circuits, sweep circuits, and servo systems. *Version 2:* Includes multivibrators.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in basic radar theory and operation (7/81). *Version 2:* Credit is not recommended because of the military-specific nature of the course (3/74).

NV-1715-0173

INTERIOR COMMUNICATIONS (IC), CLASS A, PART II (INTERIOR COMMUNICATIONS EQUIPMENT)

Course Number: A-623-0011.

Location: IC Electricians, Class A School, Great Lakes, IL; IC Electricians, Class A School, San Diego, CA.

Length: 8 weeks (240 hours).

Exhibit Dates: 12/57–12/68.

Objectives: To provide enlisted personnel with a basic understanding of electricity and electronic principles.

Instruction: Lectures and laboratories in basic concepts of electricity, including circuit diagrams, symbols, familiarization with cables, resistors, capacitors, inductors, tubes and transformers; use of electrician's hand tools and soldering techniques; construction of simple circuits using bells and push buttons; basic electrical metering equipment, principles of vacuum tube amplifiers, RC coupling, frequency response, ideal transformer coupling, push-pull amplifier, and power amplifiers.

Credit Recommendation: In the vocational certificate category, 8 semester hours in electricity or electrical laboratory on the basis of institutional evaluation; in the lower-division baccalaureate/associate degree category, credit in electricity or electrical laboratory on the basis of institutional evaluation (3/74).

NV-1715-0174

AN/AWM-55(V) ARMAMENT STATION CONTROL UNIT TEST SET INTERMEDIATE MAINTENANCE

Course Number: C-198-3781.

Location: Air Mantenance Training Detachment, Lemoore, CA; Air Mantenance Training Detachment, Cecil Field, FL.

Length: 5 weeks (176 hours).

Exhibit Dates: 11/72–1/88.

Objectives: To train fleet maintenance personnel to operate, maintain, and repair AN/AWM-55(V) armament station control unit test sets.

Instruction: Lectures and practical exercises in armament station control test sets, test set peculiarities, and fault control and fault data display.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0175

AN/SRN-15 TACAN DISTANCE AZIMUTH MEASURING EQUIPMENT (DAME) MAINTENANCE (ELECTRONICS TECHNICIAN, CLASS C1)

Course Number: A-102-0124.

Location: Service School Command, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: 3 weeks (90–120 hours).

Exhibit Dates: *Version 1:* 5/81–Present. *Version 2:* 3/73–4/81.

Objectives: To train electronics technicians to operate, align, and repair AN/SRN-15 TACAN azimuth-measuring equipment.

Instruction: Lectures and laboratory exercises in circuit analysis and block diagrams of receivers and transmitters, logic sections, RF and control sections, power supplies and antennas; and utilization of test equipment for troubleshooting and repairing the specified equipment.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic systems maintenance laboratory (5/82). *Version 2:* In the vocational certificate category, 2 semester hours in electronics laboratory (11/77); in the lower-division baccalaureate/associate degree category, credit in electronics laboratory on the basis of institutional evaluation (11/77).

NV-1715-0176

RA-5C SEMI-AUTOMATIC TEST EQUIPMENT, PROGRAMMER, SYSTEM ANALYZER AND COUNTERMEASURES TEST BENCH AN/ULM-1 INTERMEDIATE MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, Albany, GA.

Length: 7 weeks (280 hours).

Exhibit Dates: 12/70–1/88.

Objectives: To train maintenance personnel who have backgrounds in advanced electronics to operate, maintain, and repair RA-5C aircraft electronics system semiautomatic test equipment.

Instruction: Lectures in semiautomatic test equipment, programmer, and system analyzer, and countermeasure test bench operation, maintenance, and repair, including equipment introduction, control panel, power distribution, tape programmer, self-test procedures, signal relay assembly, decoder and matrix circuitry, tape reader monitor logic, adapter control and programming unit control signal generation, and various testing and maintenance routines and procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (3/74).

NV-1715-0177

A-6 SHIP AND SHORE INERTIAL PLATFORM TEST STATION INTERMEDIATE MAINTENANCE

Course Number: C-102-3762.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Oceana, VA.

Length: 3 weeks (120 hours).

Exhibit Dates: 2/70–1/88.

Objectives: To train experienced electronics maintenance personnel to maintain, operate and repair the inertial platform test station.

Instruction: Lectures in accelerometer theory, assembly, and operation; Litton gyroscope construction and operation; amplifiers, modulators, and demodulators associated with azimuth theory of operation and power sources; elevation and roll test loops; four-gimbal platform operation; and test station overall operation and maintenance procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (3/74).

NV-1715-0178

AN/ASQ-10 MAGNETIC ANOMALY DETECTOR INTERMEDIATE MAINTENANCE

(AN/ASQ-10A Magnetic Anomaly Detecting Systems Intermediate Maintenance)

(P-3 AN/ASQ-10A Magnetic Anomaly Detecting Systems Maintenance, No 42)

Course Number: C-102-3059.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Quonset Point, RI; Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, Key West, FL; Air Maintenance Training Detachment, North Island, CA.

Length: 3 weeks (80–104 hours).

Exhibit Dates: 1/68–Present.

Objectives: To train enlisted personnel to maintain, calibrate, align, troubleshoot, and repair magnetic anomaly-detecting systems.

Instruction: Lectures in magnetic anomaly detector block diagrams, theory of operation, maintenance, calibration, alignment, troubleshooting and repair; and subsystems maintenance, including power supplies, detecting head, magnetometer oscillator and amplifier, band-pass and pen amplifier, test circuits, and error voltage controls.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/81).

NV-1715-0179

GUN MAINTENANCE 5"/54 CALIBER RAPID FIRE MK 42

Course Number: J-041-0123; J-113-123.

Location: Fleet Anti-Air Warfare Training Center, Dam Neck, VA.

Length: 2 weeks (70 hours).

Exhibit Dates: 10/72–1/88.

Objectives: To train gunnery personnel to operate and maintain the 5"/54 (RF) gun mount.

Instruction: Lectures and practical exercises in operation of 5"/54 (RF) gun mount, safety precautions, gun loading system tests and adjustments, corrective and preventive maintenance, and troubleshooting techniques.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/74).

NV-1715-0180

5"/54 GUN MOUNT MK 42 MOD 7/9 DIFFERENCES

Course Number: A-113-0028.

Location: Service School Command, Great Lakes, IL.

Length: 6 weeks (170 hours).

Exhibit Dates: 2/70–1/88.

Objectives: To train gunner's mates to maintain, adjust, and operate 5"/54 gun mounts.

Instruction: Lectures and practical exercises in system control circuits, lower accumulation systems, loaders and lower hoists, upper-gun loading systems, fuze setters, train and elevation power drives, firing circuits, and gun mount controls.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0181

F-8 Armament System Organizational Maintenance

Course Number: C-646-3851, C-646-12.

Location: Air Maintenance Training Detachment, Miramar, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 5/69–1/88.

Objectives: To train fleet maintenance personnel to operate and maintain the F-8H/J armament system.

Instruction: Lectures and practical exercises in the maintenance and testing of the F-8H/J aircraft armament system, including instruction in system components, the gunnery system, fuselage stores system, wing pylon stores system and associated equipment, corrosion control and radiation hazards.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0182

Fleet Ballistic Missile (FBM) Tender Navigation Maintenance Computer

(Electronics Technician, Class C, Fleet Ballistic Missile (FBM) Tender Navigation Maintenance)

Course Number: A-193-0038.

Location: Naval Guided Missiles School, Dam Neck, VA.

Length: *Version 1:* 3 weeks (104 hours). *Version 2:* 7 weeks (210 hours).

Exhibit Dates: *Version 1:* 6/80–2/88. *Version 2:* 9/70–5/80.

Objectives: To train electronics technicians to maintain and repair the submarine central navigation system and support equipment.

Instruction: For this course after 2/88 see NV-1715-1402. *Version 1:* Lectures and practical exercises in the operation, maintenance and repair of a paper tape punch unit, a gear train test set and an X-Y plotter. *Version 2:* Lectures and practical exercises in the maintenance of the central navigation computer, the digital module test set, and the gear train test set, including test equipment procedures, calibration and fault analysis, computer logic, circuit analysis, analog/digital conversion, and magnetic tape storage units maintenance.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in electro mechanical maintenance laboratory (11/83). *Version 2:* In the vocational certificate category, 4 semester hours in digital computers, 2 in digital computer laboratory (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in digital computers, 1 in digital computer laboratory (3/74).

NV-1715-0183

F-8 Electrical, Instruments and Stabilization Systems Organizational Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Miramar, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 6/69–1/88.

Objectives: To train electrical maintenance personnel to maintain selected aircraft instruments and electrical and flight stabilization systems.

Instruction: Lectures and practical exercises in the maintenance of the F8A/J, including systems components and test equipment, electricity fundamentals, generator systems, power distribution, circuit analysis, fuel systems, and stabilization.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electricity, 2 in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity, 1 in electrical laboratory (3/74).

NV-1715-0184

KY-532A/KY-533A IFF Transponder Intermediate Maintenance

Course Number: C-102-3078.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Albany, GA; Air Maintenance Training Detachment, Miramar, CA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Cherry Point, NC; Air Maintenance Training Detachment, North Island, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 3/73–1/88.

Objectives: To train maintenance personnel to test, repair, and maintain the KY-532A/KY-533A IFF transponder at the intermediate level.

Instruction: Lectures and practical exercises in IFF transponder repair, including theory, components, various modes of operation, and testing procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0185

Fire Control Technician, Class B

Course Number: A-113-0015.

Location: Service Schools Command, Great Lakes, IL.

Length: 29 weeks (870 hours).

Exhibit Dates: 2/68–10/73.

Objectives: To train senior fire control technicians to operate and maintain complex weapons guidance and control systems.

Instruction: Lectures and practical exercises in the maintenance of complex weapons guidance and control systems, including mathematics at the college algebra level, DC and AC circuits, basic electronic circuits, including vacuum tubes and transistors, communication circuits, industrial or control circuits, pulse and digital circuits, instrumentation, magnetic amplifiers, synchros, and alignment and test equipment.

Credit Recommendation: In the vocational certificate category, certificate in electricity or electronics (3/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electricity or electronics (12/68).

NV-1715-0186

Electronics Technician, Class C, Microwave Fundamentals

Course Number: Not available.

Location: Electronics Technician, Class C School, Treasure Island, CA.

Length: 4 weeks (133 hours).

Exhibit Dates: 3/63–12/68.

Objectives: To train electronics technicians to maintain electronic equipment and systems utilizing microwave components and devices.

Instruction: Lectures and practical exercises in the maintenance of electronics equipment and systems using microwave components and devices, including basic transmission line theory, use of the Smith chart, transmission line measurements, microwave amplifiers and oscillators, antennas and antenna systems, measurement methods and test equipment, and circuit components.

Credit Recommendation: In the vocational certificate category, 4 semester hours in microwaves (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in microwave laboratory, and credit in microwaves on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, credit in microwave measurements laboratory on the basis of institutional evaluation (3/74).

NV-1715-0187

AN/ALQ-51A Countermeasures Internal Set Maintenance

Course Number: C-102-225.

Location: Air Maintenance Training Detachment, Cherry Point, NC; Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Beaufort, SC.

Length: 4 weeks (160 hours).

Exhibit Dates: 10/67–1/88.

Objectives: To train fleet maintenance personnel to operate, maintain, and repair a specific countermeasures system at the intermediate level.

Instruction: Lectures and practical exercises in the maintenance of the AN/ALQ-51A countermeasures system, including circuitry, components, assembly, power supply, and system checks and troubleshooting.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic communications (3/74).

NV-1715-0188

AN/ARC-131 Receiver Transmitter Intermediate Maintenance

Course Number: C-102-3016.

Location: Air Maintenance Training Detachment, New River, NC; Air Maintenance Training Detachment, Santa Ana, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 7/69–1/88.

Objectives: To train maintenance personnel to maintain, repair, and test the AN/ARC-131 receiver-transmitter at the intermediate level.

Instruction: Lectures and practical exercises in the maintenance and repair of the AN/ARC-131 receiver-transmitter, including a brief introduction to FM systems, circuitry, block diagrams, amplifiers, and operation of test equipment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in

electronic communications laboratory (3/74).

NV-1715-0189

Closed Circuit TV Maintenance, Class C1

Course Number: A-198-0020; A-198-020.

Location: Service School Command, Great Lakes, IL.

Length: *Version 1:* 18 weeks (636 hours). *Version 2:* 19 weeks (570 hours).

Exhibit Dates: *Version 1:* 10/75–1/88. *Version 2:* 12/66–9/75.

Objectives: To train communications electricians to operate, maintain, and repair closed-circuit television and pilot-LSO landing aid television systems.

Instruction: Lectures and practical exercises in the maintenance and repair of black and white and color closed-circuit television and pilot-LSO landing aid television systems, including circuit inputs, outputs, and changes of wave shapes; receiver fundamentals; cameras; video tape recorders; and inspection, calibration and testing of television systems.

Credit Recommendation: *Version 1:* In the vocational certificate category, 8 semester hours in TV systems and 5 in TV systems laboratory (9/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in TV systems (9/77). *Version 2:* In the vocational certificate category, 10 semester hours in electronic communications, 5 in electronic communications laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronic communications, 2 in electronic communications laboratory (3/74); in the upper-division baccalaureate category, 3 semester hours as an elective in electronic communications (3/74).

NV-1715-0190

E-2A AN/ARC-80 Radio Set Intermediate Maintenance

(E-2A Radio Set AN/ARC-80 Intermediate Maintenance)

Course Number: C-150-3477.

Location: Air Maintenance Training Detachment, Air Maintenance Training Detachment, Miramar, CA. North Island, CA.

Length: 4–6 weeks (160–240 hours).

Exhibit Dates: *Version 1:* 11/81–Present. *Version 2:* 3/68–10/81.

Objectives: To train fleet maintenance personnel to maintain the E-2A AN/ARC-80 SSB transmitter and receiver and associated test equipment.

Instruction: Lectures and practical exercises in SSB transmitter and receiver circuit analysis; operating principles; section theory; radio frequency amplifier, antenna coupler, and trailing-wire antenna units operation and maintenance; amplifier control; high-voltage circuits; control indicator; set control operation and maintenance; and AN/ASM 228 test bench and test procedures.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in electronic communications systems and 1 in electronic communications laboratory (5/85). *Version 2:* In the vocational certificate category, 3 semester hours in electronic communications (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory (3/74).

NV-1715-0191

AN/AQH-1 Tape Recorder/Reproducer Set Intermediate Maintenance

Course Number: C-102-3534.

Location: Air Maintenance Training Detachment, Patuxent River, MD; Air Maintenance Training Detachment, Moffett Field, CA; Air Maintenance Training Detachment, Jacksonville, FL.

Length: 2 weeks (80 hours).

Exhibit Dates: *Version 1:* 5/73–Present. *Version 2:* 9/70–4/73.

Objectives: To train intermediate maintenance personnel to operate, maintain, and modify the AN/AQH-1 recorder/playback device.

Instruction: Lectures and practical exercises in basic tape recorder principles; head circuits; motor and control circuits; power supply, FM, and direct-channel theory of operation; and precision plate assembly maintenance.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in electronics laboratory (7/81). *Version 2:* In the vocational certificate category, 3 semester hours in electronics, 1 in electronics laboratory (3/74).

NV-1715-0192

EA-6B Course Attitude Data Transmitter Intermediate Maintenance

(T-1073A/A Course Attitude Data Transmitter Intermediate Maintenance (EA-6B))

Course Number: C-602-3775.

Location: Air Maintenance Training Detachment, Whidbey Island, WA.

Length: 2 weeks (72 hours).

Exhibit Dates: 12/72–1/88.

Objectives: To train maintenance personnel to maintain and repair the EA-6B attitude data transmitter.

Instruction: Lectures and practical exercises in EA-6B attitude data transmitter maintenance and repair, including system equipment and analysis, calibration, alignment, testing, and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics, 1 in electronics laboratory (3/74).

NV-1715-0193

AN/URN-20 Radio Set Maintenance

(AN/URN-20 TACAN Maintenance (Electronics Technician, Class C1)

(Electronics Technician AN/URN-20 Radio Set Class C Maintenance)

Course Number: A-102-0034; A-102-034; A-102-035.

Location: Service Schools Command, San Diego, CA; Fleet Training Center, Norfolk, VA.

Length: *Version 1:* 6 weeks (240 hours). *Version 2:* 5 weeks (150 hours).

Exhibit Dates: *Version 1:* 2/82–Present. *Version 2:* 3/69–1/82.

Objectives: To train enlisted personnel to operate and maintain the AN/URN-20 radio receiver-transmitter.

Instruction: *Version 1:* Lectures and practical exercises in AN/URN-20 radio receiver transmitter operation including basic air navigation systems, power distribution, antenna system, receiver, keyer, coder and transmitter; maintenance, test equipment operation and troubleshooting techniques are also included. *Version 2:* Lectures and practical exercises in AN/URN-20 radio receiver-transmitter familiarization and operation, and in technical maintenance, including receiver block diagram, test equipment operation, and logical troubleshooting procedures.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in navigation electronics systems and 1 in electronic troubleshooting or, for non-electrical engineering majors, 3 semester hours in electronics systems theory and 1 in electronics laboratory (5/82). *Version 2:* In the vocational certificate category, 3 semester hours in electronic communications systems and 2 in electronics laboratory (11/77).

NV-1715-0194

Electronics Technician, Class C, AN/FGC-60; AN/FTA-15 Multichannel Voice Frequency Telegraph Terminal Equipment

Course Number: A-101-0040.

Location: Service School Command, Great Lakes, IL.

Length: 4 weeks (120 hours).

Exhibit Dates: 11/72–7/74.

Objectives: To train enlisted personnel who have completed the electronic technician shipboard course to maintain a specific multiplex voice-telegraph system.

Instruction: Lectures and practical exercises in communications system and terminal fundamentals, transmitter and receiver fundamentals, system operation, and telephone and telegraph terminal devices maintenance.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in telephony, 1 in telephony laboratory (3/74).

NV-1715-0195

E-1B ARC-97 Radio Repeater System Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, North Island, CA; Air Maintenance Training Detachment, Norfolk, VA.

Length: 2 weeks (80 hours).

Exhibit Dates: 10/72–1/88.

Objectives: To train maintenance personnel to operate and maintain the E-1B ARC-97 radio repeater set.

Instruction: Lectures and practical exercises in E-1B ARC-97 radio repeater operation and maintenance, including transistors and special-purpose tubes; component numbering system; theory of operation; and bench check, alignment, and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic communications, 1 in electronic communications laboratory (3/74).

NV-1715-0196

AN/ALQ Countermeasures Set Intermediate Maintenance

(AN/ALQ-81/100 Countermeasures Set Maintenance)

Course Number: C-102-3074.

Location: Air Maintenance Training Detachment, Whidbey Island, WA; Air Maintenance Training Detachment, Albany, GA; Air Maintenance Training Detachment, Oceana, VA; Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL; Air Maintenance Training Detachment, Cherry Point, NC; Air Maintenance Training Detachment, El Toro, CA; Air Maintenance Training Detachment, Miramar, CA.

Length: 6 weeks (240 hours).

Exhibit Dates: 8/67–1/88.

Objectives: To train fleet maintenance personnel to operate, modify, and troubleshoot the AN/ALQ-100 and AN/ALQ-81/100 electronic countermeasures systems.

Instruction: Lectures and practical exercises in AN/ALQ-100 and AN/ALQ-81/100 countermeasures set operation, modification, and troubleshooting, including low-band block diagram, video assembly, modulator, and program assembly; high-band block diagram, video control, modulator, driver SMT assembly, and destruct unit and hydraulic package; systems power control and power supplies; and systems maintenance and testing procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic communications, 1 in electronic communications laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in electronic communications (3/74).

NV-1715-0197

TACAN Maintenance, Class C1
(Electronics Technician, Class C, TACAN Maintenance)

Course Number: A-102-0044; A-102-0045.

Location: Electronics Technician, Class C School, Treasure Island, CA; Electronics Technician, Class C School, Great Lakes, IL.

Length: 7 weeks (210 hours).

Exhibit Dates: 3/63–1/88.

Objectives: To train electronics technicians to operate and maintain TACAN navigation equipment.

Instruction: Lectures and practical exercises in TACAN navigation system equipment components circuit analysis, including beacon electronics, test equipment, antennas, control circuits, and radio frequency monitors; and 3-M system maintenance and material management.

Credit Recommendation: In the vocational certificate category, 3 semester hours in microwave and pulse electronics and 1 in microwave and pulse electronics laboratory (9/77).

NV-1715-0198

EA-6A AN/ALQ-76/86 ECM Systems Organizational Maintenance

Course Number: C-102-3942.

Location: Air Maintenance Training Detachment, Cherry Point, NC.

Length: 5 weeks (200 hours).

Exhibit Dates: 3/73–1/88.

Objectives: To train maintenance personnel to maintain a specific ECM system.

Instruction: Lectures and practical exercises in the operation and maintenance of the AN/ALQ-76/86 ECM system, including components, troubleshooting, and use of associated test equipment.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0199

AN/SPS-T3 Radar Trainer Class C Maintenance

Course Number: A-104-0048; A-104-0049.

Location: Electronics Technician, Class C School, Norfolk, VA; Electronics Technician, Class C School, San Diego, CA.

Length: 4 weeks (120 hours).

Exhibit Dates: 6/67–1/88.

Objectives: To train electronics technicians to operate and maintain specific radar trainer systems.

Instruction: Lectures and practical exercises in the maintenance and operation of the AN/SPS-T3 radar trainer, including use of associated test equipment, components of the system, signal simulation, and system troubleshooting.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0200

AN/APN-190(V) Doppler Radar Navigation System Intermediate Maintenance
(A-7 AN/APN-190 Doppler Radar Navigation System Intermediate Maintenance)

Course Number: C-102-3785.

Location: Air Maintenance Training Detachment, Lemoore, CA; Air Maintenance Training Detachment, Cecil Field, FL.

Length: 6–7 weeks (240–264 hours).

Exhibit Dates: *Version 1:* 9/79–Present. *Version 2:* 8/71–8/79.

Objectives: To train enlisted personnel to maintain, operate and repair a Doppler radar system.

Instruction: *All Versions:* Lectures and practical exercises in the maintenance of the AN/APN-190 Doppler radar navigation system, including block-diagram analysis and receiver, transmitter, antenna, and control indicator analysis. *Version 1:* Includes troubleshooting techniques and repair procedures.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in aviation electronics and 1 in aviation electronics laboratory for non-electrical engineering students or 1 semester hour in electronics laboratory for electrical engineering majors (3/82). *Version 2:* Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0201

Electronics Technician, Class C, AN/SRN-12 Omega Receiving Set Maintenance

Course Number: A-102-0077; A-102-0086.

Location: Electronics Technician, Class C School, Norfolk, VA; Electronics Technician, Class C School, San Diego, CA.

Length: 2 weeks (60 hours).

Exhibit Dates: 5/71–3/74.

Objectives: To train electronics technicians to operate and maintain the AN/SRN-12 Omega receiving set and associated test equipment.

Instruction: Lectures and practical exercises in the operation and maintenance of the AN/SRN-12 Omega receiving set (a long-range surface navigation aid) and test equipment, including components, circuitry, and preventive maintenance procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (4/74).

NV-1715-0202

Ship's Inertial Navigation System (SINS) Mk 2 Mod 6 Calibration

Course Number: A-193-0300.

Location: Fleet Ballistic Missile Submarine Training Center, Charleston, SC; Submarine School, New London, Groton, CT.

Length: 2 weeks (60 hours).

Exhibit Dates: 3/77–Present.

Objectives: To provide an advanced knowledge of the theory of operation and calibration of the specified navigation system.

Instruction: Lectures and laboratories in monitor gyro mechanization, monitor gyro error analysis, use of current procedures for performing calibration and evaluation of data; VM bias, DEACON, PAD/PAP/HAP calibrations are performed on an operational system.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (3/81).

NV-1715-0203

Fire Control System (FCS) Technician Mk 88 Conversion (Mod 0 to Mod 1)

Course Number: A-121-0178.

Location: Guided Missiles School, Dam Neck, VA.

Length: 3 weeks (120 hours).

Exhibit Dates: 10/72–12/83.

Objectives: To train Mk 84 fire control system technicians to operate and maintain a specific fire control system and associated nontactical equipment.

Instruction: Lectures and practical exercises in the theory, operation, and maintenance of the Mk 88 fire control system (Mod 1), including changes introduced from the Mod 0 system; digital and analog circuitry associated with the digital read-in and control and display subsystems, and the digital fire control test equipment; and rate compensation electronics.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0204

F-8 AN/ARN-52 TACAN Intermediate Maintenance

Course Number: Not available.

Location: Air Maintenance Training Detachment, Miramar, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To train maintenance personnel to maintain and operate the AN/ARN-52 TACAN system at the intermediate level.

Instruction: Lectures and practical exercises in the maintenance of the AN/ARN-52 TACAN system, including specialized treatment of the specific equipment components and circuitry.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0205

Fire Control System (FCS) Technician Mk 88 Mod 1 Tender Maintenance

Course Number: A-121-0190.

Location: Guided Missiles School, Dam Neck, VA.

Length: 14 weeks (220 hours).

Exhibit Dates: 1/71–12/80.

Objectives: To train enlisted personnel to operate and maintain the electromechanical teleprinter, the computer tape reader, and the optical alignment group of the Fleet Ballistic Missile Weapons System.

Instruction: Lectures and practical exercises in the maintenance of the electromechanical teleprinter, the computer tape reader, and the optical alignment group, including computer logic and instruction in theory, calibration, components, optical principles, electro-servo components, and diagnosis of malfunctions.

Credit Recommendation: In the vocational certificate category, 3 semester hours in computers (3/74); in the lower-division baccalaureate/associate degree category, credit in computer laboratory on the basis of institutional evaluation (3/74).

NV-1715-0206

F8 AN/APQ-83A RADAR INTERMEDIATE MAINTENANCE

Course Number: Not available.

Location: Air Maintenance Training Detachment, Jacksonville, FL.

Length: 4 weeks (160 hours).

Exhibit Dates: 1/68–1/88.

Objectives: To train enlisted personnel to operate and maintain the AN/APQ-83A radar set and associated equipment.

Instruction: Lectures and practical exercises in the maintenance of the AN/APQ-83A radar set, including amplifiers, circuits, transmitters and power supply, range tracker, antennas, systems and test set alignment, and radiation hazards. Areas are covered in general terms with relation to the specified equipment.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0207

GUN FIRE CONTROL SYSTEM (GFCS) MK 56 MAINTENANCE

Course Number: J-113-0116; J-113-1161; J-113-1162; K-113-2072.

Location: Fleet Combat Direction Systems Training Center, Dam Neck, VA; Fleet Combat Direction Systems Training Center, Newport, RI; Fleet Combat Direction Systems Training Center, San Diego, CA.

Length: 3 weeks (105 hours).

Exhibit Dates: 10/72–1/88.

Objectives: To train enlisted personnel to maintain a shipboard ground fire control system.

Instruction: Lectures and practical exercises in the maintenance of the Mk 56 ground fire control system, including use of PMS and MDCS, power distribution, AC and DC, power and mode control switching, power supplies, director control circuits, specific radar and rate-computation circuits, system servo loops, and computer power supply and maintenance.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0208

GUN FIRE CONTROL SYSTEM (GFCS) MK 68 MOD 4 MAINTENANCE

Course Number: K-113-2075.

Location: Fleet Training Center, San Diego, CA.

Length: 2 weeks (60 hours).

Exhibit Dates: 10/72–1/88.

Objectives: To train fire control technicians to maintain a shipboard ground fire control system.

Instruction: Lectures and practical exercises in the maintenance of the Mk 68 ground fire system, including analysis of the system and subsystems, power distribution and drive, control switching, free gyroscopes, circuits, electromechanical computing elements, information flow, tests, and test analysis.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0209

F/RF-4B AIR DATA COMPUTER SET MAINTENANCE

Course Number: C-602-3834; C-602-181.

Location: Air Maintenance Training Detachment, El Toro, CA.

Length: 2 weeks (80 hours).

Exhibit Dates: 10/72–1/88.

Objectives: To train maintenance personnel to test and maintain the F/RF-4B aircraft's air data computer.

Instruction: Lectures and practical exercises in the maintenance of the F/RF-4B aircraft air data computer, including computer compensator module operation and organizational level test equipment and procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0210

GUN FIRE CONTROL SYSTEM (GFCS) MK 37 MAINTENANCE (LESS MK 25 MOD 3 RADAR)

(Gun Fire Control System (GFCS) (Less Radar) Operation and Maintenance)

Course Number: K-113-2071; K-113-180.

Location: Fleet Training Center, San Diego, CA; Fleet Training Group, Pearl Harbor, HI.

Length: 2–3 weeks (60–90 hours).

Exhibit Dates: 11/65–1/88.

Objectives: To train enlisted personnel to operate and maintain the Mk-37 GFCS ground fire control system.

Instruction: Lectures and training in Mk-37 GFCS ground fire control system operation and maintenance, including components familiarization, mechanical and electrical systems theory of operation, alignment procedures and system checks, and system computer components operation and adjustment procedures.

Credit Recommendation: Credit is not recommended because of the limited technical nature of the course (3/74).

NV-1715-0211

FIRE CONTROL SYSTEM (FCS) TECHNICIAN MK 80

(Fire Control System (FCS) Technician Mk 80 Replacement)

Course Number: A-121-0244; A-121-0013.

Location: Submarine Training Center, Pacific, Pearl Harbor, HI; Guided Missiles School, Dam Neck, VA.

Length: 20–27 weeks (630–945 hours).

Exhibit Dates: 1/61–12/83.

Objectives: To train enlisted personnel to operate and maintain the Mk 80 fire control system.
